There are great economic challenges facing America. We know the economic challenge of a Japan and other Asian countries, European countries, Western European countries under EC-92. With emerging democracies in Eastern Europe, we know there will be additional competitive pressures on the United States. But that is a good, competitive challenge that we must face in developing these new technologies.

I talked to Czechoslovakians and Hungarians. In fact, I talked to a Hungarian just yesterday. They are worried about their dirty air. They have dirty air, too. Here is an opportunity for America to develop the coming and emerging environmental technologies for the future so that countries and cities around the world, the new Mexico City's of the world, can clean up their air with American technology. Otherwise, if we do not develop those technologies to meet those rising developmental concerns that are happening worldwide, other countries will; the Japanese will, the Germans will. This is not only the opportunity to address that trade deficit but to meet the challenge of the future, to get it down.

I did not mean to get into all of this at this moment because I wanted to tell the Senator from Oklahoma that there are, in the main, answers to some of his concerns, that is residual risks and so on and so forth.

We could get into this a lot more, but we do not have time at the moment. But I urge the Senator from Oklahoma, in private conversation, to sit down and try to find out what the real facts are, not the scare facts. The Senator from Oklahoma is not doing

this, but, unfortunately there are some around here who come up to Senators with a lot of scare figures which are really not true once we get into it.

I thank the Senator for his constructive comments.

Mr. NICKLES. If the Senator will yield for just a quick question. He mentioned residual risks, that there is a drop dead provision, and if they do not meet that requirement, the 1 in 10,000, if they are not able to reduce below that level, that plant would have to shut down by the year 2005, I think you said, would be the first year. The year for the tier 2 reductions in auto emissions is 2003. My statement and my plea would be: Why do we not do the first part of this bill, pass a clean air bill, and then in 1997 let us look at tier 2 on auto emissions, let us look at residual risks, after we have had a chance to analyze a few years of experience for the maximum achievable controllable technology and the tier 1 tailpipe standards?

In other words, let us not pass in this bill what we do not really know how to define, what is going to happen on auto emissions by the year 2003 and residual risks by the year 2005. Let us pass what at least we think we can do now.

Basically this is the approach taken in the administration's proposal on emissions and on toxics, let us pass those phases now and let us take another look in 1997 or maybe 1996 and see what kind of progress we have made, see what is achievable. Why pass something now, my question is to the Senator, that is setting drop dead dates to firms if they cannot invent certain technology by the year 2005? Why set mandates now on the auto industry that are really expensive—estimates vary—or currently impossible to meet by the year 2003? Why do we not look at that again 6 or 7 years from now?

Mr. BAUCUS. The answer to the Senator from Oklahoma is quite simple. This is not easy stuff. I mean it is hard to know. We cannot predict the future with precision. Nobody can. I am sure the Senator from Oklahoma knows—and perhaps he does not—that there are about 960 toxic chemicals, about 960. The EPA, in the 19 years that it has tried to develop standards for regulating air toxics, has only developed standards for 7 out of the 960. In 19 years, EPA has only developed standards for 7 out of 960. EPA's record is poor. It has not been done.

Why is EPA's record so poor? Essentially, in my judgment, it is so poor because interest groups just bang away at the EPA and prevent the EPA from getting the job done. That is a large part of it. In addition, the standard under law is met. The standard of current law basically is the residual risk of one out of infinity. For all intents and purposes it is zero. And that is very tough to meet. That is part of the problem.

The alternative the administration suggests to residual risks, is what they call unreasonable risks. Well, the problem under unreasonable risks is it is the same standard used in TSCA an FIFRA and under those two statutes only one pollutant has been recognized in 14 years. Therefore, we are trying to find a standard which in fact will get the job done.

I submit it is reasonable. Twenty-eight States use this procedure; 28 States use residual risk. In addition, that 1 in 10,000 standard is a standard that is applied to Superfund today; that is, if a Superfund site results in 1 out of 10,000 risk of cancer, it has to be cleaned up.

So all I am saying in answer to the Senator's question why act today, act today because there has been inaction in the last 19 years. We have to get on with it. We have to find some way to get the job done. The standard which the administration suggests to get on with it is, for all intents and purposes, the current regime, the current framework. That is why the committee believes that the administration's approach is insufficient. There is just too much discretionary authority, too much discretion given to the EPA, and too many interest groups that prevent the agency from taking action.

Mr. NICKLES. My concern, if the Senator would yield for a final comment, my concern is we are going too far in these outyear reaches. These are really objectionable to industry groups, the administration and so on. I am concerned that we are going too far and we are going to find that out in a few years and have to come back and undo some of it.

Many of us are going to be here probably in 1997, I expect, with some institutional memory. Maybe we could learn from what we did right in the 1990 clean air bill and expand upon it and avoid some of the mistakes that we might be making by trying to write a bill that is going to go well into the next couple of decades.

Mr. BAUCUS. If I might say to the Senator from Oklahoma, the Congress enacted higher, tighter automobile emissions standards for automobiles, the Congress set high standards for hydrocarbons, for nitrogen oxides, and for carbon monoxide.

What happened? As I mentioned earlier, the auto industry met the standards, found out a way to meet the standards for hydrocarbons and for carbon monoxide, but came back and told the Congress that the standards for nitrogen oxides—they just could not meet them.

Congress agreed and rolled back that standard.

What I am saying is this: We have to make the best judgment we can to help move our country along to get air as clean as reasonably possible but as quickly as possible. We have to make our best judgments. We will make some mistakes when we pass this statute. No statute is perfect. But I submit if we pass legislation that takes effect in the outyears, in the main we are going to be on target. And, frankly, I think we probably will not have gone far enough.

As the Senator well knows, California now is enacting a still third round of tailpipe emissions. So the second round of this bill is really the middle position.

But, if we have gone too far—and I submit we will not have gone too far, in many cases not far enough—if in fact after several years it is clear we have gone too far, based upon past history the industry can come in and say we have gone to far. Based upon past history with nitrogen oxides of automobile tailpipe emissions, the evidence is the Congress will go back and correct it.

So I think that is what we have to do. Go as far as we reasonably can. I know that is the way the Senator conducts his office, conducts his life. He pushes himself as far as he can. If he goes too far, he backs off a little to adjust.

Mr. NICKLES. I might tell the Senator, I do not make decisions pending on the year 2003 and 2005, and I doubt that many people do, and I doubt that that many businesses do. I am afraid we are reaching a little far in years in mandates.

I appreciate the Senator's efforts. I knew that was his position. That is the reason why it is in the bill and supported by many.

But I also will offer this. The additional tier 2 standards on auto emissions and the residual risk provisions that go well into the next decade are a couple of the provisions that are causing major consternation amongst people who have really examined this bill, including the administration.

If Senators really want to get a bill through the Senate, and one that will be signed by the President, I think it would really behoove them to think in the context of "let us pass a reasonable bill now". Then, if we want to make further improvements later in this decade, I am sure we can do so at that time.

Mr. BAUCUS. The point I was making is the Senator, I know, sets the highest possible personal standards that he can for himself. I just suggest we, too, in the Senate, set the highest possible standards. I thank the Senator.

The PRESIDING OFFICER. The Senator from Rhode Island [Mr. CHAFEE].

Mr. CHAFEE. If I might make one point to the distinguished Senator

from Oklahoma, who has given this matter a lot of thought, as he does all legislation here? We have found, in dealing, for example, with the diesel engine manufacturers, they say to us: Do not give us a standard to meet in 1993 and another standard to meet in 1997. Tell us what the standard is you want in 1997. We believe it is better for us to make the double jump. Forget 1993. Let us know where we have to be in 1997, and that is where we would like to invest our money; achieving that goal, not having to meet something in 1993. The amount of money we have to invest to meet the 1993 one, we would prefer to sink to making the 1997 one. So drop the whole 1993 standard. Go strictly for 1997.

The point I am making here is they would like to know what we are going to set out for them, instead of giving them increments every 5 years, for example.

Mr. NICKLES. If the Senator will yield further, I agree. I do not have any problem with initial standards. Let us keep tier 1 tailpipe standards at 1997. But instead we have CAFE standards that do not stop at 1997 they go to 40-miles-per-gallon by 2000, and tier 2 standards take effect in the year 2003. Residual risk really hits the wall—you are going to have that drop dead date in the year 2005. We are making a lot of projections that maybe are attainable objectives, maybe not. But we will not know until 13 or 14 or 15 years from now.

I would like us to set the objectives for tier 1 in these phases. Let us set the objective under MACT or whatever, and then let us assess the results.

If we made achievable results and could improve upon them let us do that again in the year 1997 or 1998 or something, instead of trying to legislate for the next two decades. That really increases the uncertainty under the bill and with regard to the cost of the bill.

Mr. CHAFEE. If I could ask the Senator from Oklahoma one question. In his discussion he touched on the CO_2 emissions and its effects, reaching a so-called CAFE standard, the corporate fleet. The Senator himself mentioned his concerns about imported oil.

My question is, and I am not trying to put him on the spot, does the Senator from Oklahoma have any reasonable miles-per-gallon CAFE standard that he thinks we should strive for? I would be interested in his views on that particular issue.

Mr. NICKLES. I will be happy to answer the Senator's question. I do plan to have an amendment dealing with CAFE that would strike out the CO_2 section, just so the Senator from Rhode Island and the Senator from Montana will know.

I do not plan on proposing an increase in CAFE from the present 27.5. We have contemplated that, but for a lot of different reasons that is not my present intention. My intention is to try and strike the CO_2 standards which, again, are not in the House bill; they are not in the President's bill. They were added, maybe as an extraneous measure. But I hope very strongly that the CO_2 standards, really CAFE standards, will be deleted from this bipartisan package.

If not, I envision a great deal of consternation, debate, discussion, and in all likelihood a veto if it goes that far and if the bill gets to the President's desk.

We are talking about what is acceptable, to answer the Senator's question. It is not my intention to say that since we now are at 27.5; you went to 40; we will split the difference and go to 34 by the year 2000. That is not my intention.

I have some objections to doing that. Do not get me wrong. I hope we achieve greater fuel economy as a nation. I want to achieve greater fuel economy. My problem is I do not want to pass a law that says that automobile manufacturers, if they do not do such and such, are going to have to pay enormous penalties, or buy the cars elsewhere.

We have seen that happen a lot. I do not want to pass laws that encourage importing automobiles. I am afraid that is what we would be doing by increasing CAFE standards very much.

Mr. CHAFEE. I would refer the Senator to page 100 of the green volume, which I notice he has a copy of there, where there is a statement last November 19 by the Department of Energy wherein they say:

> For 1995, we estimate the domestic vehicle manufacturers could achieve 32 to 33-miles-per-gallon for new passenger cars if they modified product plans to make maximum use of available technology and returned to 1987 levels of vehicle size, performance, and luxury.

So that is a clue. I am not saying the gospel is provided by the Department of Energy, but it is an interesting comment from a part of this very administration dealing with the issue we are concerned with here.

The PRESIDING OFFICER. The Chair recognizes the Senator from Colorado [Mr. WIRTH].

Mr. WIRTH. Mr. President, I want to take this opportunity, the time before the President's State of the Union Message this evening, to express my own views on some of the key issues we are going to be deciding in the next few weeks on this extremely important piece of legislation, the Clean Air Act Amendments of 1990.

First, I want to congratulate the distinguished majority leader; Senator BAUCUS, the chairman of the committee; and the whole committee on reporting out this legislation, a very strong and absolutely workable bill. It holds, I think, very great promise for achieving our goal.

Everybody agrees on clean air for all Americans, but are we going to be willing to cast the tough votes to get from here to there? I hope we are, because I can think of no goal more broadly supported by the American people than that of assuring that the air we breathe will be clean air.

Cleaning our air is the task at hand, and we should not lose sight of that at any point during this debate. What Congress does on this issue will, to a large degree, determine how clean our air is going to be over the next two decades and beyond. The issues debated will affect all of us—because they will affect the very air we breathe.

We in the State of Colorado have done a great deal at the State and local levels to clean our air. We have made significant progress, thanks to cleaner cars, local inspection and maintenance programs, programs to reduce the total miles of cars and trucks driven in and around our cities, and a very aggressive and pioneering oxygenated fuels program. But every citizen of Denver knows only too well that we simply have not done enough. Our air is not clean.

In Denver, our fight for clean air focuses on two problems; the carbon monoxide pollution that plagues high-altitude cold-weather cities like Denver, and the particulate and nitrogen oxide pollution that we know as the brown cloud.

Seventy-five percent of the carbon monoxide emissions in the Denver metro area, and up to 50 percent of the brown cloud, comes from cars, trucks and buses. And vehicle use is growing. Coloradans now drive 30 million miles every day in the metropolitan area alone and our transportation planners tell us that figure could double by the year 2010, if our hopes for a growing economy are realized.

Aggressive transportation control measures, including major investments in rapid transit, can slow this growth. But that, by itself, will not be enough.

To reach the goal of clean air, Colorado needs help that can only be provided by tough new additions to the Clean Air Act. Unless we do all that we can to clean up cars, trucks and buses, we simply are not going to win the fight for clean air.

The Senate will debate and vote on this very issue—how much cleaner tomorrow's cars, trucks and buses should be. I believe we have to take strong steps to make tomorrow's cars as clean as possible. At a minimum, we need to take the following six steps to enable cities like Denver to clean up their air.

First, autos and trucks should be required to run clean in wintertime, as well as summer. In Denver, as much as 70 percent of carbon monoxide emissions during a winter's evening rush

hour come from starting and running cold cars. Today's cars will not run clean until they have warmed up. But we have the technology to make cars run clean right from the start at 20 degrees, and we should use it. Our local experts tell me that this is the single most effective step we can take to reduce future carbon monoxide pollution in Colorado. I have been advocating this measure for many years. After much resistance, the feasibility and desirability of taking this step has been broadly accepted, and it is found in both the President's bill and the Senate's bill, which is in front of us right now.

Second, auto manufacturers should be required to design their vehicles sc that they not only meet emission standards when they are built, but continue to meet them for 100,000 miles. Our State's local air planners tell me that this is the second most important measure for fighting carbon monoxide pollution in the Denver metropolitan area. Unhappily, the President's bill did not include this. Our bill does.

The argument is made that there is no way you can guarantee that the auto emission control devices will work for 100,000 miles, but the companies that make these devices tell us that, yes, they can be designed for that.

Third, we should set new, lower limits on how much carbon monoxide vehicles are allowed to emit. Will this be difficult? Yes, particularly if coupled with the requirement that it be sustained for 100,000 miles. But as I noted before we cannot be satisfied with today's technology. We must keep improving if we are to stay ahead of the curve. If we are satisfied with today's pollution control technology, we may find that 20 years from now we are right back at todays pollution levels. This tough second round of pollution standards, advocated in the committee bill, is not addressed by the President's bill, but it should be.

The argument against this is that the technology is not there or it would be too expensive. Those same arguments were made, Mr. President, when we debated the initial clean air legislation in the 1970's. The automobile companies claimed that the technology was not there and it would be too expensive, but, in fact, the technology now is there and it is on every new car built.

Fourth, we should put new limits on the sulphur and hard-to-burn compounds in diesel fuel. How many of us have followed diesel trucks and buses and have been overwhelmed by their exhaust? That can be cleaned up. Cleaner diesel fuel translates to instant reductions in the black smoke that comes out of those tail pipes, which is a major contributor to the brown cloud in Denver and a major pollution problem in every community. I am pleased that both the President's bill and S. 1630 agree on this measure.

Fifth, we must direct the Environmental Protection Agency to continue to test cars in Denver to ensure that they run clean in our thinner, high altitude air, as well as at sea level. Senator ARMSTRONG and I will be offering an amendment to see that this is done.

Sixth, we need to set up a program to require and encourage broader use of clean-burning alternative fuels. We need to break our addiction to foreign oil suppliers. The only way we can do it is to mandate broader use of alternative fuels, particularly by Government and corporate vehicle fleets. Vehicles running on compressed natural gas, propane, methanol, ethanol, electricity, or other clean, domestically produced fuels are good for our air, good for our economy, and good for our energy security.

The President's bill began the debate on this issue, which is left open in the bill in front of us today. I think we have enormous opportunities in this area, particularly through requiring commerical and government vehicle fleets and other vehicles to use clean alternative fuels. That may be the only way in which some communities, such as New York or Los Angeles, are able to reach the requirements of the bill.

Mr. President, I am very pleased to be able to cosponsor S. 1630, and I strongly support the tough and ambitious measures it proposes to require cleaner vehicles. These measures will be controversial, and there will be those in the Senate who will oppose them as too costly, as we heard this afternoon. But the cost of air pollution is far higher. The cost in health care alone is staggering, particularly for our children, the elderly, and the asthmatic—those most susceptible to health problems caused by air pollution.

Colorado's business leaders have recognized another cost—the fact that air pollution has diminished one of our State's most important economic assets—its attractiveness as a place to live, work and do business. The brown cloud is a cloud over our future. Protecting our State's attractiveness goes beyond our cities, into our mountains and our national parks. Recent research shows that much of Colorado's mountain country is vulnerable to the same sort of damage that acid rain is causing in the East.

The same pollutants that cause acid rain and snow also help create the haze that cuts us off from the breathtaking views we thought we had protected when we created our national parks. Controlling pollution in the West is essential to protect our future, and we are not doing nearly as well as we should. People come from around the world to see our mountains. We cannot let those majestic views fade away.

Mr. President, how to clean up acid rain is undoubtedly one of the most divisive issues in this bill. Last year, I and my Republican colleague, Senator JOHN HEINZ of Pennsylvania, published a report to the President which recommended a cost-effective, flexible approach to acid rain control. I am proud to say that the President adopted that approach, and that it has been included in S. 1630 as well.

I urge my colleagues to support that basic proposal, calling for a broad program of emissions trading to encourage the use of the most cost-effective means to lower acid rain emissions by 10 million tons. I say to my colleagues that I am more than willing to consider any reasonable amendments to that proposal to try to address specific regional concerns, and there are many. But I believe that our first and most important goal is cleaning up our Nation's air, and I hope that all of us will keep that in mind as we discuss and debate this issue.

Mr. President, there are many more issues in this bill that I would like to address. I am concerned about provisions of S. 1630 which compromise the ability of State governments to set higher environmental standards in several areas. There are literally dozens of other issues and potential amendments which have been brought to my attention, and which will undoubtedly be the subject of debate as we deal with this complex legislation. I look forward to this debate and to our accomplishing the reauthorization of a stronger, revitalized Clean Air Act.

Once again, I wish to commend the leadership of the Committee on Environment and Public Works on both sides for looking forward, looking to the future, and putting together an aggressive piece of legislation. It would be embarrassing for us to pass anything weaker than the bill they have reported. I hope that the amendment process will allow us to strengthen that legislation, so that every American can have clean air to breathe.

I thank the Chair. I yield the floor.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. FOWLER). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the Senator from Ohio be permitted to put us into a quorum call until such time that the majority leader seeks the floor for the purpose of offering a

unanimous-consent request and then immediately thereafter the Senator from Ohio be recognized.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Chafee amendment No. 1219 be laid aside until 5:30 p.m., and that a vote on the Chafee amendment occur at 5:30 p.m.; I further ask unanimous consent that no amendments be in order to the Chafee amendment or to the language proposed to be stricken by the Chafee amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I ask unanimous consent that immediately upon the disposition of the request that I am about to make Senator BAUCUS be recognized for the purpose of laying down another amendment to be considered to be the pending business in the interim.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I further ask unanimous consent that, following recognition of Senator BAUCUS and the laying down of another amendment to be the pending business, Senator METZENBAUM be recognized to address the Senate on the bill in general; and that following the completion of Senator METZENBAUM's remarks Senator SIMPSON be recognized for the same purpose.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I thank my colleagues for their cooperation. Accordingly, Senators should be on notice that at 5:30 the vote will occur on the Chafee amendment.

In the interim another amendment will be laid down, will become the pending business, and debate will continue on the bill itself and on the pending amendment.

I thank the distinguished Republican leader and all of my colleagues for their cooperation in permitting us to proceed with this matter.

I think now that we will be getting started on amendments to the bill. There has been a very lengthy and appropriate debate. I expect it will continue in view of the complexity of the matter. But I think we will now be able to proceed to a vote on substantive amendments.

Mr. DOLE. Mr. President, if the majority leader will yield, I think the RECORD might reflect that shortly after consent was granted we did have a call raising an objection. But it was not timely. So we will proceed as outlined by the majority leader.

Mr. MITCHELL. I thank my colleague.

CLEAN AIR ACT AMENDMENTS OF 1989

The Senate continued with the consideration of the bill.

The PRESIDING OFFICER. Under the unanimous-consent agreement, the Senator from Montana [Mr. BAUCUS] is recognized.

AMENDMENT NO. 1223

(Purpose: To require EPA to publish a control techniques or guideline for the aerospace industry)

Mr. BAUCUS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Montana [Mr. BAUCUS] for himself and Mr. CHAFEE proposes an amendment numbered 1223.

Mr. BAUCUS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 229, after line 5, add the following new subsection (c) and redesignate subsections (c) and (d) as subsection (d) and (e) respectively:

"(c) VIOLATILE ORGANIC COMPOUNDS EMISSIONS FROM AEROSPACE COATINGS AND SOLVENTS.—Within two years after the enactment of this subpart, the Administrator shall publish a control techniques guidelines for all aerospace coating and solvent applications (including military and commercial applications), after consultation with the Department of Defense, the Federal Aviation Administration, the National Air and Space Administration, and the affected industry. In evaluating VOC reduction strategies, the guidelines shall take into account the the applicable requirements of Section 112 and the need to protect stratospheric ozone."

Mr. BAUCUS. Mr. President, it is a very simple amendment. Under the unanimous consent request, the Senator from Ohio is to be recognized, but if the Senator will yield for less than a minute, I can explain the amendment.

Essentially, Mr. president, the amendment provides that specific control techniques guidelines be issued by the EPA to cover the aerospace industry. There presently is a control technology guideline covering a very broad category of metal coating and solvent applications, and many other industries, including the aerospace industry.

It has specific unique requirements because the military specifications that DOD requires are a lot different than other commercial applications of metal coatings. This amendment specifically requires EPA to, within 2 years of enactment of the bill, to promulgate the specific control technology guidelines for the aerospace industry.

That is the sum of the amendment, the narrowing of the amendment, that this CTG applies to.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio [Mr. METZENBAUM] is recognized under the agreement.

Mr. METZENBAUM. I thank the Chair.

Mr. President, before us lies an ambitious piece of legislation. The goals of the bill reported by the Environment and Public Works Committee are as laudable as any I can remember. I can think of precious little congressional business more important than preserving the environment and protecting the public heatlh.

I support the thrust of this bill. I support the concept of this legislation, and I am pleased that this Congress is moving toward enactment of major pro-environment bill.

But the problem is that the debate on the bill is not really about clean air. It is not about the health of our children. If it were that simple, the bill could pass this afternoon. But this debate is not about the net results of the bill. This debate is about how do we get there? Who pays? How much? For what reason? Under what terms? This is a debate about fairness and equity.

With regard to the acid rain provisions, this bill is both unfair and inequitable. My State of Ohio is being asked to shoulder a burden that is so heavy, so disproportionate that it defies any rational explanation.

Some will argue that this is a bill simply providing that the polluter pays, and it is a polluter pays policy. Why then is Ohio asked to pay for more than its actual contribution to the SO_2 emissions? Why the magic formula that socks it to my State and the Midwest, while letting other States actually increase their sulfur dioxide emissions?

This polluter pays scenario just does not hold up. You can pretend all you want that this bill will be paid for by some imaginary, greedy corporate polluters. But that is not the way it works out in the real world. There are not any villains to pin this on. Corporations will not pay for it. Utilities will not pay for it. The government will not pay for it. So who pays? It is simple. The ratepayers pay. The little guy, the little woman trying to keep their home warm, trying to provide electricity, light for their homes; the consumers of electricity will pay.

Ohio families who need heat in their homes will pay. Is that fair? Are Ohio consumers enjoying some artificially cheap electricity rate? No way. They pay rates which are well within the top 20 nationally. Did those Ohio consumers throw some party that they should be responsible for? No. They simply forged the steel that built our cities and manufactured the goods your constituents rely on and produced the automobiles you drive to work. They mined the coal to fuel the factories that meet the needs of Americans during war and peace.

Is this some crime for which they must pay? Did the mine workers who go down in those mines, way down deep underground, coming out with smeared faces, filthy, working long hours, mining this coal, Are they the ones who should pay as this bill would require? Should they suddenly be put out of work if the utilities do not make the necessary changes? Is it they who should see their entire communities decimated?

Do not kid yourselves. If you work in some of the mining communities of Ohio, and, yes, some of West Virginia and other States as well, if the mines do not operate, the city can close down. This is the industry of the community.

Let us fact it, the strategy here is to divide and conquer. Why else dump a national problem on Ohio and a few other Midwestern States? Ohioans are good citizens, good taxpayers, too. They help subsidize countless Federal programs, and in many cases, Ohioans do not see direct nor indirect benefit for their contribution.

According to the U.S. census, between 1981 and 1988, taxpayers in 5 Great Lakes States paid $221 billion, $221 billion more in Federal taxes than they received back in Government spending. What States did they affect and to what extent?

Illinois got back 69 cents for every dollar that they paid in taxes. They ranked 49th, as far as the return on the dollar is concerned.

Indiana got back 85 cents of every dollar the taxpayers paid. They ranked 44th.

Michigan got 75 cents back on every dollar that the taxpayers paid. They ranked 48th.

Ohio got back 87 cents for every dollar that the taxpayers paid. We ranked 43d.

I had available to me the figures for the Western States, and I was going to stand here and spell out how much the Western States get back on the Federal dollars that they pay in taxes, but I do not want to embarrass my colleagues, although they may not be embarrassed. They may be very proud of this fact.

I am sick and tired of it, and so are the taxpayers of Ohio, about the fact that we put so much out to take care of the other States of this Nation. And when we have problems, as we do in this instance, and we admit we have a problem with respect to coal and dirty coal. We make no bones about this. That is what is there, and we cannot change this. We are saying let us spread the burden and make it fair. Help us. We help you when you need it. When the savings and loans went under and they had to be bailed out of $300 billion, minimum, most of those savings and loans, where were they? In California and Texas.

We are not talking about bailing out Ohio savings and loans. There might have been a few, but they were small. The real bailout costs came from California and Texas. Ohio taxpayers are footing the bill to pay for those golf courses and the hotels and the resorts that were bought and paid for by those savings and loans.

Bailout with respect to the savings and loans will cost every American family at least $3,800 of their hard-earned dollars. We have instance after instance in this country where the taxpayers of one part of the country are subsidizing another part of the country. As far as the Western States are concerned we are paying the price.

Let me talk with you about some of those subsidization programs. Let us talk about the reclamation program and the Western water subsidies.

Since 1902 farmers out West have received subsidized water supplied by Government-built dams and irrigation systems. The projects have been financed by interest-free Government loans. Let me emphasize that. Interest-free. No interest. The Federal Government lends the money and no interest is paid on the money and the rest of the taxpayers in the country pick up the tab. In many cases the crops that are irrigated are subsidized again through Federal price support paid for by all the taxpayers of the country.

The cumulative value since 1902 of the interest subsidy, according to the Congressional Budget Office, exceeds $33 billion and may be as high as $70 billion. And we go along with it year after year.

I remember a few years ago here in the Senate we had a matter concerning the central Arizona project, and I remember I was tying up that legislation because I said it is not fair for the people served by the central Arizona project to be getting that kind of subsidy from the Federal Government, a 100-percent subsidy. Most Western States benefit from those kinds of programs.

In connection with the central Arizona project, we finally got it resolved. I had a magnificent victory after meeting with the Governor of the State and the Senators and many of my friends out in Arizona. I was very successful. I was able to get them to pay 15 percent of the cost of the subsidy while the rest of the taxpayers of this country pick up 85 percent.

I am told that before this session is over there will be coming to the floor something called the central Utah project which will have the same kind of subsidy as the Arizona project.

That is just one of them. Every day, every week, every month, the taxpayers of this country are subsidizing a number of Western States.

The Power Marketing Administration, the PMA's, which sell wholesale power from 127 Federal dams, received large subsidies from the taxpayers of the entire country. The Power Marketing Administration defers payment of principal and pays below-market interest rates. In other words, they do not pay the principal, and the interest they pay is less than what it cost the Government to borrow the money.

The Congressional Budget Office says $12 billion of the $16 billion in Federal investment in the PMA's has not been repaid, and it goes all the way back to 1937.

President Bush's budget says make the PMA's customers pay their way. The fiscal year 1991 budget recommends straight-line amortization of the debt at current interest rates. That would save the taxpayers of this country $4.6 billion over 5 years. Do not hold your breath until that passes, because my guess is that it will not pass regardless of the President's recommendation.

Now there is another area of subsidization about which we should speak, and that has to do with the national forest system where we sell timber at below cost. Over half of our national forests, most everywhere except Oregon and Washington, lose money on their timber sales. The CBO estimates that eliminating below-cost sales of timber would save the taxpayers of this country $255 million over the next 5 years.

The Bush budget recommends a phaseout of those below-cost sales. These timber sales only benefit local timber communities and they do so at the expense of the taxpayers throughout the country and, in addition to the cost, they waste valuable timber resources of this country.

Then there is a question about the timber receipts, timber receipts paid to the States. Only 25 percent of the receipts collected from timber companies are returned to the States in which the timber was cut. I said "only," but I mean it is an absurdity to have 25 percent of those receipts go back to the States. Why should the timber that belongs to all of the people of this country be given back to the States in which the timber was cut? It belongs to the taxpayers of this country.

In 1988, $285 million was distributed to the States under this program; 87 percent of that money went to 10 Western States: Arizona, Colorado, California, Idaho, Montana, New Mexico, Oregon, Texas, Washington, and Wyoming.

In 1988, an additional $108 million went to 18 Oregon counties under a separate Bureau of Land Management Timber Program.

Let us look at another area. Let us look at on-shore oil, gas, and coal receipts paid to the States. Fifty percent of the oil, gas, and coal receipts from those States are returned to the States in which the mining or drilling activity occurred. In 1988, $398 million was distributed to the States. And, again, six Western States received 93 percent of the money. Wyoming got $163 million; New Mexico got $92 million; Colorado got $31 million; Utah got $31 million; Montana got $26 million; California got $26 million.

There is no logic or reason. Those resources belong to the people, to the people of the country, not the people of any particular State. And it just is illogical for 50 percent of the gross receipts to be returned to a handful of States.

Then there is another one. Let us talk about payment in lieu of taxes. In general, States receive a 75 cent per-acre revenue-sharing payment based on the acreage of federally owned land that is within their own State. In 1989, $103.8 million was distributed and 11 Western States received 81 percent of the money: Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, and Wyoming.

So we find time in and time out that the people who live in Ohio and the other people who live in Midwestern States are subsidizing the Western States of this country.

We have a problem. We are not asking for subsidy. We are asking for some burden sharing for us helping to bear the burden of these costs.

In another instance, another item called grazing subsidies, ranchers in the West benefit from low- or no-cost grazing rights. Now, those grazing rights are worth money. According to the General Accounting Office, the BLM, and the Forest Service spend approximately $40 million more on the grazing programs than they recover in fees from ranchers. Grazing fees do not even cover the cost of maintaining range in decent condition.

Let us go to a different subject. Disaster assistance. Every time we have a disaster in this country 100 Members of this body—and I am one of them—say what can we do to help? What we normally do to help is we write a check, we pay the bill. Hurricane Hugo and the San Francisco earthquake were tragedies. There was not one American who did not empathize. Here were millions of people throughout the world who were concerned and empathized with the loss and feeling about the loss of life and the economic harm that was done by the San Francisco quake.

Congress enacted two special appropriations bills totaling $3.95 billion. Almost all of it went to South Carolina and California, not alone for the earthquake but for the hurricane loss as well.

When you talk about Hurricane Hugo, and the San Francisco earthquake, you feel for the people in that part where that strikes. We see what is happening on TV and every one of us wants to help. And almost with no exception we do not even conduct hearings on these issues. We pass the bills. When the $1.3 billion went through in connection with the hurricane, I remember saying why did we pick out that number? I did not say it in a floor debate. I said it to myself. Why do we pick out that number?

How did anybody know within 2 or 3 days that that was what was needed? But nobody wanted to stop the legislation—certainly, I did not—because we felt that when there is a problem in a community, we all stand up, we are all willing to be counted, we all want to show that we share the concern.

In connection with those bills, certain special exceptions were made in eliminating State cost-sharing requirements and permitting the expenditure of funds on items that typically would not have been eligible for Federal funding, like the San Franciso-Oakland toll bridge.

Let us talk about another subject which relates not alone to the Western States, but to some of the New England States, the Federal Aid Highway Program. Since 1957, the States of this Union have contributed $190 billion to the highway trust fund. All of that money, plus $30 billion more in interest, has been given back to the States for highway projects.

But 10 States—Ohio, California, Florida, Indiana, Michigan, North Carolina, Oklahoma, South Carolina, Texas, and Wisconsin—received back $8.6 billion less than they put in—88.7 percent of their contribution. And the other States, how did they do? The other States average a 134-percent return on their contributions.

In connection with my own State, Ohio received back $698 million less than it paid.

The combined six New England States—Maine, New Hampshire, Vermont, Massachusetts, Connecticut, and Rhode Island—received back $3.6 billion more than they paid.

Now, why did I recite some of these facts here today? I recited them not because we are going to do anything about it, although this Senator thinks maybe we should. And if we are to proceed forward on this bill, this Senator would certainly offer amendments indicating some elements of equity and fairness that should be achieved. But I would hope that would not happen. I hope we can work out some formulation that would not require that.

There is not much question about the fact the inequities are there. The unfairness is there. I am going to stop for now.

Mr. President, we are faced with a national problem. The basic calculations of burdens and benefits must be factored in a national context. Regional finger pointing and blame laying might make for stimulating debate, but I do not think it will make for good public policy on acid rain.

I come to this position uncomfortably. I am proud of my record in the Senate on environmental issues and on health matters. I have great respect for the Democratic leader, who has championed this issue for so many years, and I salute him for that leadership. And I am proud of the fact that the Senator from Montana has taken the time and effort to put together this package that is before us today. They are doing their job and they are doing them well.

But the truth is the acid rain provisions of the bill ask far too much from Ohioans. I am hopeful that the proponents of the bill will remain open to amendments that will result in a bill that is both fair and equitable.

I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. president, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I understand the order is to recognize the distinguished Senator from Wyoming, Senator SIMPSON. He has agreed that I might use some of my leader's time at this point.

The PRESIDING OFFICER. The Republican leader is recognized.

DEMOCRATIC FOREIGN AID PLAN

Mr. DOLE. Mr. President, I am pleased to read in this morning's Washington Post that my democratic friends—Senators PELL, BIDEN, and SIMON—have now joined me, and President Bush, in pointing out the need to help the emerging democracies of Eastern Europe.

As the Senate knows, 2 weeks ago I proposed that we make a very modest, 5 percent across-the-board cut in earmarked foreign aid programs—in part, to find money to help the emerging

democracies. Since then, of course, the President has submitted his budget, which includes several hundred million dollars in new money for the same purpose.

So I welcome the fact that these key democratic Senators have now taken up this issue. I would like to comment briefly on their proposal.

First, I am disappointed that they have chosen, in knee-jerk fashion, to propose a raid on the defense budget to fund their initiative.

Yesterday's rumors of Gorbachev's possible demise apparently are premature. But they point up again how risky it is for us to start spending a peace dividend based on a fundamental change in Soviet behavior—when the Soviets are still sorting out fundamental questions of their own political system and leadership.

As my proposal indicated, we ought to start by making sure we are getting maximum bang for the buck from our existing aid budget.

I am pleased that some major organizations such as the Polish-American Congress and various Greek-American organizations have endorsed my proposal—despite the fact that, in the first instance, it would mean small cuts in aid for both Greece and Poland. I ask unanimous consent to have printed in the RECORD letters I have received from these groups, endorsing my proposal.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

POLISH AMERICAN CONGRESS, INC.,
January 19, 1990.

Hon. ROBERT DOLE,
Hart Office Building,
Washington, DC.

DEAR SENATOR DOLE: We applaud your remarks which appeared in the New York Times on January 16, 1990.

If 1989 is to prove to be the watershed year in political democracy, when Poland was the first country to have democratic elections and the first with a non-Communist government, then economic reform must succeed.

We agree—America can make no better investment than to support the new democracies. We only need to consider the historial fact that the emerging democracies did not use Marshall Plan funds, nor foreign aid throughout these years.

As you currently observed, Senator Dole, the foreign aid "pie" must be re-examined—not only the amount and the nations that comprise the "pie", but also the flexibility to conduct foreign policy. Being practical and pragmatic, funds authorized by Congress take several months before they are received. Poland and other emerging democracies would wait until 1991 before funds would be utilized. Fledgling democracies need the critical financial support and foreign aid to support change. Time is crucial. If we wait too long, opportunity may pass us by.

A statistic which we find incomprehensible was provided by Representative Lee Hamilton, who heads the House Foreign Affairs Subcommittee on Europe and the Middle East. Mr. Hamilton noted that Israel receives about $1.2 billion a year in aid, most of which is immediately used to repay the United States for past loans. Isn't there a more efficient method for debt service?

We support a total review of U.S. foreign aid. We support economic aid to Poland and urge that Congress address these issues when it returns on January 23.

Sincerely yours,

EDWARD J. MOSKAL,
President.

AMERICAN HELLENIC INSTITUTE PUBLIC AFFAIRS COMMITTEE, INC.,
January 22, 1990.

Hon. ROBERT DOLE,
Office of the Minority Leader, U.S. Capitol,
Washington, DC.

DEAR BOB: Congratulations on your recent initiative, as set forth in your op-ed page article in the New York Times on January 16, 1990, regarding the reallocation of 5 percent of certain foreign aid amounts to democracy building in Eastern Europe, Panama and elsewhere.

First, this letter confirms may comments by telephone to Al Lehn of your staff (Deputy Director, Office of Classified National Security Information) on Friday, January 19, 1990 expressing support generally for your initiative and specifically supporting in the interests of the United States the 5 percent reduction in aid to Turkey and proposing that it be coupled with a 5 percent reduction in aid for Greece.

As mentioned to Mr. Lehn this position is supported by the American Hellenic Institute Public Affairs Committee, whose Chairman is Dr. Dean C. Lomis, and the Order of AHEPA Cyprus and Hellenic Affairs Committee, whose Chairman is Michael Savvides, and a number of Greek American leaders throughout the country who were contacted.

I have no doubt this position would be supported by the overwhelming majority of Greek Americans as in the best interests of the United States. I am also confident it would have the support of the majority of all Americans.

Second, we propose in the interests of the United States and support of the rule of law a further reduction in aid to Turkey by the amount it costs Turkey to maintain in Cyprus its 35,000 occupation troops and 60,000 colonists illegally in Cyprus, plus the amount it allocated to the Turkish Cypriot administration.

Former Under Secretary of State William Schneider, Jr., stated in testimony on February 21, 1984 before the House Foreign Affairs Subcommittee on International Security and Scientific Affairs that it costs Turkey $9,000 annually to maintain and equip one Turkish soldier. Thus the cost to Turkey in 1984 for its 35,000 occupation troops in Cyprus was $315,000,000.

According to the International Institute for Strategic Studies (London) the Turkish Cypriot administration's total budget for 1988 was $138,000,000 of which Turkey provided $75,900,000. This consisted of $46,000,000 of direct aid and $29,900,000 in credits.

Third, we recommend in the interests of the United States a further reduction in aid to Turkey by the amount it costs to maintain Turkey's Army of the Aegean and landing craft aimed at Greece's Aegean islands. That army consisting of an estimated 125,000 men is not part of NATO's forces and was created specifically to threaten Greece.

Thus all U.S. military aid to Turkey of $500,000,000 (plus $3,000,000 IMET) and economic aid of $60,000,000 goes to support Turkey's illegal occupation of northern Cyprus and to finance (in part) Turkey's Army of the Aegean which threatens Greece's Aegean islands.

But this is not all. A substantial portion of Turkey's remaining armed forces of approximately 490,000 (650,000 minus 35,000 in Cyprus and the 125,000 Army of the Aegean) is used to suppress Turkey's 10,000,000 Kurdish citizens.

Fourth, Turkey by its actions in Cyprus and in Turkey is in violation of the human rights sections 116 and 502B(a)(1) of the Foreign Assistance Act of 1961, as amended, and therefore is ineligible for assistance.

Fifth, in view of the above and the momentous events in Eastern Europe and the Soviet Union, and the arms reduction talks, we urge a critical review of United States-Turkey relations. Whatever value Turkey was to NATO and United States interests before these events, which we believe was minimal, has been reduced to the vanishing point. Even Turkish newspapers and certain opposition leaders have acknowledged the reduction in Turkey's value to the defense of the West.

As mentioned to Mr. Lehn, the First position stated above stands by itself and is not conditioned on support of the Second through Fifth positions.

I am sending copies of this letter to the President, the Secretary of State and congressional leaders.

Warmest regards.

Sincerely,

EUGENE T. ROSSIDES.

Mr. DOLE. I would also note that the approach suggested by the democratic Senators will still leave up to 35 countries dangling in the wind as far as their own need for American aid is concerned. I am talking about important countries like those on the front lines in the war against drugs—Bolivia, Peru, and others; key countries in Africa such as Zaire, Kenya, Liberia, and many others around the globe.

We have longstanding and important relations with these countries. Because of excessive earmarking, they are in danger of being zeroed out this year. If we do not curb our appetite for earmarking in fiscal year 1991, if we do not curb that appetite, these countries are going to be right back on the chopping block in fiscal 1991.

So I hope we can find a majority in this Senate to join me in trying to help meet the needs, yes, of our friends who are now receiving aid, but also our friends who are countries that are now emerging democracies, not only in Eastern Europe, but in Latin America, Central and South America, and many countries in Africa which are being shortchanged because of huge earmarks.

I believe that the debate on this important issue will continue. The debate on this important issue should continue. Many of my colleagues say, "Oh, just make the pie bigger," Well, there is not any dough to make the pie bigger.

Foreign aid is not popular in this body. Many who are now saying "do not cut any from this country" would probably not vote to increase foreign aid. It is easy to say "take it out of defense," but I have not yet seen any peace dividend.

So I would ask my colleagues to keep in mind that there are a number of countries, 35, as I stated, that may be reduced or zeroed out because the President has no flexibility.

Eighty-two percent of the economic, so-called ESF, funds are earmarked by the Congress. Nintey-two percent of military funds are earmarked by the Congress. The net result this year is the President ended up about $950 million short and, therefore, does not have the money. The Secretary of State told me about a country today where he is trying to scrape up $5 million to help one country and he has not found it yet. So, we can give billions to other countries, billions after billions, and maybe we should. But it does seem to me there has to be a better way.

If anybody here thinks they can go back to their constituents where we are cutting programs or in the President's budget and say it is all right to cut Medicare, cut agriculture, cut your programs, but we are going to increase foreign aid—it is not a very popular thing to do.

We have the obligation in Eastern Europe. We have the obligation in South America, particularly in those countries that are on the front line in the war on drugs.

So I want to commend the President. I know the Secretary of State will be testifying tomorrow morning, I think on the Senate side, where he will be laying out some of these problems and asking us for help. This is not a partisan issue. If somebody has a better idea, I would certainly be willing to listen to that idea.

I know one of my friends on the House side, Congressman OBEY, said, "Well, where was Senator DOLE all winter long?" After Congress left, all these things happened, all these countries emerged. And they all need our help.

I know there are a number of my colleagues in both the House and Senate and on both sides of the aisle who have much more expertise in this area than I do, but I think we would all agree we need to take a look at our aid program, take a look at what we are doing, and, I believe, if we do take a look at it in an objective way, we can find a solution.

Mr. President, I reserve the remainder of my leader time, and I thank the Senator from Wyoming.

The PRESIDING OFFICER (Mr. KERREY). The Senator from Wyoming.

Mr. SIMPSON. I thank the leader. I certainly agree with his remarks on the issue of foreign aid.

I was in Jamaica with several of our colleagues on a Soviet-United States seminar. It was paid for by a private group, I might add—fine members of the Carnegie Foundation and the Aspen Institute. The new Prime Minister of Jamaica is asking for a minimal amount of money, and they have zeroed him out. Or that is the attempt. It is absurd. It cannot be, as to what we are doing with foreign assistance.

I never hestitate to tell my constituents they have distorted the issue. This year, in this budget, it is $20 billion out of a total budget of $1.1 trillion, and that is to preserve our relationships with people who critically need our assistance.

Anyway, I am not going to go further on that, but at a later time I certainly will because I think the leader is absolutely correct as to what we just do there. It does not have anything to do with hurting one to make it tough on somebody else.

CLEAN AIR ACT AMENDMENTS OF 1989

The Senate continued with the consideration of the bill.

Mr. SIMPSON. Mr. President, in accordance with the unanimous-consent agreement, my remarks are about acid rain. I listened to the remarks of my friend from Ohio. I said years ago, "This is an interesting game in the Environment and Public Works Committee, and I know you are all having fun." Because the committee consists of westerners and northeasterners. We do such remarkably creative work there. Staffs cook stuff for us and we have ignored, in essence, what will happen to five, six, or seven States in the heartland of America.

We can come right down through there—Ohio, Indiana, Missouri, Illinois, perhaps coming on into Pennsylvania—there they are. It is going to be a very contentious debate. And yet it must be had. We must have it here. It certainly cannot be had in the Environment and Public Works Committee, and we proved that beautifully by sending a bill to the desk for 8 years, three times, and having it go nowhere.

But one swift comment about the good Senator from Ohio's remarks about Western power subsidies. I see him here on the floor. I was going to wait and ensure he was present. He feels strongly about that, I found through the years. But in this situation I think there is a great difference.

I understand what he says about that. He has a feeling about water subsidies in California and other parts of the West and other subsidies, grazing and so on. But those things pale in regard to what is obtained in other States as compared with the West with regard to clean coal technology, the various rounds of the Department of Energy grant system.

But I think there is one key difference, and I share that with my friend from Ohio. The key difference between what he is saying there and about the acid rain cleanup issue is this. Certainly the West does receive assistance for some programs, as other States receive. But when we are talking about acid rain, we are talking about pollution. And when we hear requests for subsidies for acid rain cleanup, we are talking about subsidizing utilities in States that have not cleaned up their pollution as swiftly or to the same extent as other States. That is the key difference.

This was a sense-of-the-Senate resolution in the Environment and Public Works Committee markup, that there be no cost sharing. There will not. However, we in a sense do some cost sharing with the emissions trading and the allowance trading. I do not have any objection to that. I think we must recognize that.

But those who would have us subsidize in an open way the Midwestern scrubbers would have us abandon the one thing we have done with all environmental laws of any worth in the past years, and that is, "the polluter pays." The polluter-pays approach is what we have taken in every single environmental bill we have ever passed out of the Senate. And I think that is a very critical distinction, and we will deal more on that later.

The Senator from Ohio will be a player. I said many years ago, "You are forgetting the intent and intensity of those from these States of Ohio, Illinois, Indiana, Missouri, Pennsylvania. You are missing it." Now we will have that debate and that is good. It is going to take us a while to do this, and I am ready to go forward, I promise my colleagues that.

But I wanted to talk about one or two of the arrogant environmental groups. In my opening statement a few days ago I talked of what I described as arrogant environmental groups and how they have acted in the past and how they have been part of a problem that has helped to cause legislative gridlock. I do not think we should let them get away with that again because nothing we ever do is pure enough for them, just as there are utilities and nothing we ever do for them is pure enough for them.

I said at the time I hoped they would be more moderate this year and that would be a constructive thing. But I certainly hoped too much. Because I have seen recent activities which lead me to believe that the extreme environmental groups are up to their same old tricks. They like to throw bombs into the ammo shed and oversimplify issues in order to arouse

emotions about various acid rain issues. And they are doing it again.

I would like to note, it was the Environmental Defense Fund—I do not always agree with them but I tell my colleagues they did, and I watched that with great interest—that broke ranks with the clean air coalition and worked with the administration to craft a bill, a good, honest acid rain bill, that provides flexibility and least cost by allowing emissions trading and other innovative procedures. Yet now there are individual members of the Environmental Defense Fund that are out here today about their work trying to undermine the work this organization itself did with the White House. I think they ought to get their act together. I am going to help them.

I do not know what their chosen hammer thrower, Bob Yuhnke, is up to now, but perhaps he is trying to increase the membership rolls by exciting the troops. That is not going to sell on this trip.

Yesterday, I received a letter from the Sierra Club. It cited several allegations the Environmental Defense Fund had been making about Western SO_2 emissions.

It seems there is one extreme member of the EDF who lives in Denver and is constantly agitating for more and more SO_2 reductions in the West, even though our emissions are on orders of magnitude less than any other areas of the United States. We really do not need preaching from those kinds of people.

I was in the Wyoming Legislature with a remarkable man named Ed Herschler, a Democrat, who was our Democrat for 12 years, a highly respected and remarkable gentleman, a marvelous legislator and a lot of fun to do business with. He is very ill. We should keep him in our prayers.

Ed Herschler and I, while we were in the legislature, put on the books legislation with names at the top such as mine land reclamation bill, plant siting legislation, Clean Air Act, Clean Water Act—we did that. We had decided we did not want to be another one of what had occurred in the East.

So we have been at it a long time. We have been at it in the State legislature, and I am here in the Environment and Public Works Committee. I have been involved in it, and I have attended dozens of hearings and heard hours of testimony about acid rain. I think reasonable men can conclude from all of this information that we do not have a serious acid rain problem in the Western United States. Do not lob anything in. We do not. We could. Yes, indeed we have some sensitive high mountain lakes that we will have to keep an eye on, and I helped to assist that they monitor those lakes.

The Forest Service has done quite a good job, in my mind, in monitoring the pH of these lakes in Wyoming. We find they have a pH of 7, which is absolutely neutral. We have lakes in the Midwest that are alkaline and can absorb almost pure vinegar without changing the pH.

So it is quite disturbing, and I have trouble with understanding why one would receive a letter from the Sierra Club saying the Senate committee bill does not do the job. I received a letter yesterday that said, "S. 1630's acid rain program cleans up the East but dirties the West." I believe that type of rhetoric and babble is unnecessarily inflammatory and is factually incorrect.

If you read this letter carefully, you will find the Sierra Club then admits we do not have an acid rain problem in the West. That is what we said. But that is not what it says in the glaring introduction in all of those great big capital letters. Maybe the ploy there is to raise money or keep the executive director in business to juice up the troops and raise his salary. I do not know that, but they really pine over Jim Watt. They miss him. They loved to tack his old pelt on the wall and raise the dues. It is difficult for them to keep struggling now when he has disappeared from the scene. We have a fine person in the role of the EPA Administrator.

So there we are. I think the tone of the letter suggests that we are doing a great disservice to the country by passing the Senate clean air bill and the West will become filthy if we do not. I find that type of rhetoric disgusting. But the President's bill and Senate Environment Committee bill call for a 10-million-ton reduction. I guess that is not enough for the more extreme environmental groups. The Senate bill places a cap on emissions. I guess that is not enough either. And then the Sierra Club piously states "that unless loopholes are removed, S. 1630 will provide little protection for the West." That is really offensive, paternalistic, puerile.

I come from the State of Wyoming that has an SO_2 standard six times more stringent than the Federal Government. We do not need little instructional papers and missives from the Sierra Club. I was in the legislature when the standard was passed. It was done with some good, thoughtful Republican and Democratic help. That is why it troubles me—and I have a great admiration for that club and what it does and have been in the membership of it—to oversimplify this issue to the point where their description bears no resemblance to the real world. The simple fact of the matter is, we have very low emissions in the West, relatively speaking, and we will continue to have emissions that are significantly less than the East for decades to come.

The Sierra Club and some members of the EDF do not tell about the smelters that have already been shut down in the Southwestern United States and about the emissions reductions that came about from the shutting down of industry.

I find these overblown allegations by EDF and the Sierra Club absolutely fascinating since I received a letter from the Environmental Defense Fund back in 1987 that had the following quote included:

> Together, final compliance at these last two uncontrolled smelters in the U.S. and the completion of emission controls at the Nacozari will reduce SO_2 emissions in the Rocky Mountain West by about 1 million tons per year, or about 55 percent regionwide. Based on our research at EDF, we believe that this reduction should avert any major regional threat of acid rain damage to high country watersheds. It should also provide enhanced visibility in the national parks in the Southwest.

Nacozari is a smelter in Mexico.

How soon they forget. I have often said that everyone is entitled to their own opinion, but no one is entitled to their own facts. The Environmental Defense Fund representative from the Rocky Mountain region has attempted to baffle the public and the press with his own inaccurate interpretation of the facts. The Senate Environment Committee report does state that the clean plants amendment will increase SO_2 emissions by 650,000 tons nationwide. However, very few of those tons would be in the West. As a matter of fact, no more than 120,000 of the 650,000 could be contributed by the entire 11 Rocky Mountain States.

The EDF states that the clean State exemption would result in an increase of 951,000 tons of SO_2 and would be devastating to the air quality and visibility in the West. That is simply an irresponsible analysis on the part of EDF, and I do not know what the reasons are. It may be they sent their press releases and letters to the Rocky Mountain States while 340,000 tons of the predicted emissions increases comes from two States—Kansas and Minnesota—which are neither generally considered to be Western States. We do not consider them as Western States, nor as responsible for visibility degradation in any of the Western national parks. Another 60,000 tons of the 451,000 tons are predicted to come from North Dakota, which is not considered a Rocky Mountain State.

EDF projects that Minnesota alone would increase its emissions by 200 percent. I find it ludicrous that EDF would suggest that the State with one of the toughest acid rain laws in this country would double its emissions under Federal policy. We have a name for that stuff in Wyoming.

In addition, EDF does not take into account the reductions the Western States have made and are continuing to make with regard to SO_2. EDF failed to point out emissions would ac-

tually go down in Wyoming under the clean State provisions. Wyoming's largest utility, Pacific Power and Light, a fine corporate citizen, will make a 50,000 reduction in the Wyoming plant by the year 2000. This decrease is simply ignored by the wizards at EDF.

EDF's analysis was intellectually dishonest because it assumes that the clean States will increase their emissions merely because they are given additional allowances. This ignores the fact many of these States have State implementation plans which do not allow such an increase. You cannot do it.

In addition, EDF and the Sierra Club imply the environmental impact of emissions are the same regardless of where they occur. That is simply not true. We find that there are visibility problems in the Grand Canyon, and everybody likes to trot out the photographs of the Grand Canyon. I have seen all sorts now: shaded ones, unshaded ones, light ones, dark ones, deep ones—I have seen all those—filtered ones, unfiltered ones. Who wants to do anything to the Grand Canyon? Nobody I know on this floor. We have problems. However, there are no major visibility problems elsewhere and, if there are, we can target specific plants in specific air corridors to deal with that. Who wants to ruin the vista of Grand Teton National Park? Nobody, Not a soul. So do not get the old filters out and show the scoop shovels up on the north slope of the Grand Teton. We all get tired of that one, too, with the oil and gas rigs up on the face of Mount Moran. That is not what happens in real life. As these things come up, we deal with them specifically and responsibly and honestly without the hype and the hurrah.

So now we are being told by these groups the Senate is creating unnecessary loopholes and that the West will become dirty. My only response to those charges is that the Senate should have come up with a 31-State acid rain bill to begin with because we do not need major SO_2 reductions in the West, and we could have done that. That is a lot of horses. That is 62 votes in here. We did not want to do that. That is irresponsible. Citizens of the West have paid through the nose for the installation of pollution control equipment on powerplants that use low-sulfur coal. We are scrubbing plants that use low-sulfur coal, not high-sulfur coal. What an absurd situation when the result is finally the same one you reach if they had done scrubbers on high-sulfur coal. We have been through that ritual, and we have paid big bucks. That is why we do not want cost sharing. We are willing to go for some kind of emissions trading, allowance trading. I am willing to do that. Other things we can talk about: retraining. It is going to be a fascinating debate and we are going to all be in it.

But let us—and I conclude—take a look at the distribution of utility scrubbers. If we look at regional distribution of currently operating SO_2 scrubbers, we find that about half of the scrubbers in this country are in the West—that is 72 out of 148—and that these scrubbers are actually being used to remove, as I say, remove SO_2 from low-sulfur coal plants.

For example, New Mexico—and that is why you hear the Senators from New Mexico speaking with such intensity—is scrubbing low-sulfur coal at every one of its 10 powerplants and the public service of New Mexico has electric utility rates that are 33 percent above the national average. Why did not EDF and the Sierra Club tell that part of the story? The rest of the story, as my friend Paul Harvey calls it in his program. And meanwhile some of the utilities in the Midwest have utility rates that are 33 percent less than the national average.

The bloodbath on this floor, which will never really appear too visibly but it will be the undercurrent that takes us all down the stream like a cork, is utility rates. That is the kicker.

When we get into that, it is the one that can do something to a politician that really is exciting. That defeats people. Your utility rates go up and they say this is the guy that did that. It went up $2. Why? An acid rain bill. They did it in the Senate. Who did it? That amendment. It is a good 30-second spot. That is what this debate will be about when we get down to the nub of things, and meanwhile we will be driven by these irresponsible groups that ask purety from us.

I would ask why did not these groups tell us about the prevention of significant deterioration program under the Clean Air Act which helps to keep the air clean in the West? Why did they not say anything about that? Why are we beginning to see these crude little letters that oversimplify the arguments and overstate the issue when they were players not long ago? That is exactly, Mr. President—and I am concluding—the type of thing that has prevented us from getting a clean air bill in the past 10 years. Why do you think we do not have one when everybody talks about it for 10 years? We should have taken the work product of Senator Gary Hart of Colorado called the Clean Air Act and just passed that baby 9 years ago. It was up front, honest, direct, but it was not pure enough. It was not pure enough.

Gary Hart called this kind of activity "Mau-Mau politics," it is still "Mau-Mau politics," and it is repugnant. If these radical groups had shown more moderation in the past, we probably would have reduced emissions by twice what they are now. Ask them that. Ask them while they have been diddling around with America for 10 years what we could have done with an acid rain bill but never were able to because of their dazzling purety.

So I would call on groups on all sides of the issue to refrain from this type of activity. We have come a long way toward getting a good clean air bill with a solid 10-million-ton acid rain reduction. It would be sad to see it derailed right now in this arena because of greed or egotism on the part of the special interest group leaders.

So let us stop talking the talk and start to walk the walk. Let us be intellectually honest about our differences and not practice what is really in every sense "Mau-Mau politics" because the real losers are the citizens of America, and second, the members of those organizations are the real losers because they are going to lose all credibility in further debates on these tough issues; we are going to have some terribly, terribly tough issues on this bill in these coming days.

Thank you, Mr. President.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I regret that I cannot support the Chafee amendment. The reason is simple: We should not act unilaterally. Instead, we should work within the framework of the international Montreal protocol.

The problem of substances depleting the Earth's stratospheric ozone layer is one that requires a world-wide solution.

Unfortunately, the Chafee amendment would force the United States to act unilaterally to phase out methyl chloroform. The parties to the international Montreal protocol are already considering the idea of phasing out this chemical.

It seems logical that we should act in concert with the international community. It will do little good for us to eliminate this chemical if other countries refuse to do the same.

The PRESIDING OFFICER. Under the previous order, the question is on agreeing to amendment No. 1219. The yeas and nays are ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. INOUYE] are necessarily absent.

Mr. SIMPSON. I announce that the Senator from Colorado [Mr. ARM-

STRONG] and the Senator from Wyoming [Mr. WALLOP] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 95, nays 2, as follows:

[Rollcall Vote No. 3 Leg.]

YEAS—95

Adams	Fowler	McClure
Baucus	Garn	McConnell
Bentsen	Glenn	Metzenbaum
Biden	Gore	Mikulski
Bingaman	Gorton	Mitchell
Bond	Graham	Moynihan
Boren	Gramm	Murkowski
Boschwitz	Grassley	Nickles
Bradley	Harkin	Nunn
Breaux	Hatch	Packwood
Bryan	Hatfield	Pell
Bumpers	Heflin	Pressler
Burdick	Heinz	Pryor
Burns	Hollings	Reid
Byrd	Humphrey	Riegle
Chafee	Jeffords	Robb
Coats	Johnston	Rockefeller
Cochran	Kassebaum	Roth
Cohen	Kasten	Rudman
Conrad	Kennedy	Sanford
Cranston	Kerrey	Sarbanes
D'Amato	Kerry	Sasser
Danforth	Kohl	Shelby
Daschle	Lautenberg	Simon
DeConcini	Leahy	Simpson
Dixon	Levin	Specter
Dodd	Lieberman	Stevens
Dole	Lott	Thurmond
Domenici	Lugar	Warner
Durenberger	Mack	Wilson
Exon	Matsunaga	Wirth
Ford	McCain	

NAYS—2

Helms	Symms

NOT VOTING—3

Armstrong	Inouye	Wallop

So the amendment (No. 1219) was agreed to.

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SIMPSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1223

Mr. BAUCUS. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending question is the amendment proposed by the Senator from Montana, amendment No. 1223.

Mr. BAUCUS. Mr. President, this is a very simple amendment. The amendment essentially requires the EPA to set up a specific separate category issuing controlled technique guidelines for the aerospace industry that would apply only to that industry.

Today guidelines for metal paint, and so forth, are generic, very broad-based. The aerospace industry has especially unique requirements because of its defense commitments and because of the specifications that it must work under in meeting its DOD requirements.

This amendment simply carves out controlled technique guidelines in the nonattainment section of the bill in the aerospace industry. It is not a tightening amendment or loosening amendment. It is an amendment more specific for that industry. I do not think that amendment has much objection. In fact, I do not know anyone who objects to this amendment. I urge its adoption.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KOHL). Without objection, it is so ordered.

Is there any further debate on the amendment? If not, the question is on agreeing to the pending amendment.

The amendment (No. 1223) was agreed to.

Mr. LIEBERMAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. FORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LIEBERMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that there be a period for morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

B-2 OPPOSITION IS GROWING

Mr. CRANSTON. Mr. President, last week, I introduced legislation to stop new procurement of the B-2 bomber. At that time, Senator LEAHY and I made detailed statements outlining our opposition to funding for further procurement of this overpriced weapons system. We have been encouraged by the support and interest in our efforts.

In the short time since I came to this Chamber last fall to declare my opposition to this program, a number of key members of the defense community have joined us in questioning the merits of proceeding with new production on the B-2. It seems that the tide is beginning to turn.

In testimony before the Senate Budget Committee last month, Robert McNamara, Defense Secretary in the Kennedy and Johnson administrations and Lawrence Korb, an Assistant Defense Secretary in the Reagan administration called for the end to further production of the B-2.

Noted defense analyst William Kaufmann, presently with the Brookings Institute, concurred in his alternative defense budget, calling on Congress and the administration to "halt the rush to produce a next generation of weapons."

And, Jeffrey Record, of the more conservative Hudson Institute, echoed these sentiments in the Baltimore Sun, scoring the Air Force for its willingness to "junk five entire wings of perfectly good tactical aircraft in order to spare a bomber that is not only a budgetary turkey but is also still on the assembly line and largely untested."

I will ask that a copy of Mr. Record's op-ed appear in full in the RECORD at the conclusion of my remarks.

Even retired Adm. J. Crowe, Jr., former chairman of the Joint Chiefs of Staff, in an interview with the Washington Post earlier this month, questioned the need for expensive new weapons systems, singling out the B-2.

At the same time that Senator LEAHY and I were declaring our intention to achieve a majority to terminate the B-2 program, Director of CIA William H. Webster was testifying in the Senate Armed Services Committee about the changing Soviet threat. It comes as no surprise that our intelligence community is concluding that the Soviet threat is diminishing substantially. As a member of the Senate Intelligence Committee, I am pleased that our intelligence agencies are finally willing to go on the public record with these assessments.

In light of these developments, I am extremely dismayed that the President has sought to go ahead full force with the B-2 program. In his budget for fiscal year 1991, the President has requested the outrageous sum of $5.5 billion to procure five more B-2 bombers. This at a time when we are trying to make meaningful cuts in our defense budget. I urge my colleagues to study the defense budget carefully and to question this and other proposed increases in strategic programs. President Bush notes in his budget that "remarkable changes have occurred" in the world affecting national security and prospects for peace. Yet, the fiscal year 1991 defense budget request for the Pentagon is a truly business-as-usual document.

Mr. President, I urge my colleagues to join us in halting the B-2, the billion dollar plane we do not need and cannot afford.

I ask unanimous consent that the article to which I referred be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Baltimore Sun, Dec. 20, 1989]

DESIGNING AN AIR FORCE FOR WARS THAT WON'T BE FOUGHT

(By Jeffrey Record)

WASHINGTON.—Secretary of Defense Dick Cheney, bowing to grim budgetary realities, has directed the armed services to cut a total of $180 billion in planned expenditures for the years 1992 to 1994, with each service apparently free to choose what it will eliminate. Though granting the services freedom of choice has been criticized as inviting continued strategic incoherence at lower force levels, it provides an excellent means of testing each service's priorities.

The Air Force, for example, has chosen to take its share of the $180 billion cut largely in the form of eliminating five of its current 24 tactical fighter wings. The remaining 19 wings would amount to less than one-half of the 44 wings sought by the Air Force during the defense-budget bonanza of the early 1980s.

Even more interesting than what the Air Force has chosen to get rid of is what it has chosen to keep. Most prominent among the items to be preserved is the B-2 bomber, on which the Air Force has already spent $25 billion and plan to spend at least $60 billion more.

The decision to sacrifice substantial quantities of its tactical aviation in the hope of saving the B-2 reflects a clear Air Force choice between the strategic nuclear bombardment mission and the multitude of missions performed by tactical non-nuclear aviation. By according the former greater priority, the Air Force is once again sacrificing readiness for the kinds of wars which have engaged the United States since 1945 (and may continue to do so) in favor of preparation for a kind of war that has never occurred and almost certainly never will.

The reason for this has nothing to do with the B-2 itself, but rather with the mission it is designed to perform. Strategic bombardment is the soul of the Air Force. Unlike other missions, such as aerial interdiction and close air support, the purpose of which is to assist friendly ground forces, strategic bombardment lays claim to winning wars autonomously (i.e. irrespective of ground and naval actions) via a direct assault on the enemy's capacity to make war.

It was this claim that formed the rationale for establishing the Air Force as an independent service in 1947. At the time, the Air Force had a monopoly within the U.S. military of both nuclear weapons and their means of delivery (long-range bombers). To be sure, since the late 1940s the other services have acquired nuclear weapons and ballistic missiles have largely displaced manned aircraft as a means of intercontinental nuclear bombardment. But the Air Force retains its monopoly of long-range bombers. A bomber-less Air Force would therefore be an air force lacking, at least in terms of manned aircraft, a capacity to perform the sole autonomous mission upon which it staked its case for independence.

Moreover, despite over four decades of formal independence, the issue of autonomy has not been completely extinguished. Though prospects for disestablishment seem unlikely, there is sentiment in the Congress for transferring the close air support mission from the Air Force to the Army, and some commentators have actually called for the Air Force's outright abolition.

Certainly the Air Force has always felt, and continues to feel, that it must pay great attention to providing up-to-date justifications for its independence. A recent Rand Corporation study observed that the "Air Force, as the newest of three services and the one whose separation from the others had to be justified within living memories, has always been the most sensitive to defending or guarding its legitimacy as an independent institution. The fight for autonomy was long and hard; and the victory not total: The Navy retained control of its aviation, and the Army has periodically threatened encroachments. If aviation in support of navel operations is controlled by the Navy, why should not aviation in support of ground operations be controlled by the Army? If the Air Force is not a decisive and independent instrument of warfare, the reasons for having a separate service to wield aerospace power evaporate."

Thus whenever the Air Force has been compelled to sacrifice either strategic nuclear bombardment capabilities or tactical air power, it has invariably chosen to place the latter on the chopping block. In the 1950s and early 1960s, Air Force infatuation with strategic bombardment was so pronounced that it led to the near starvation of U.S. tactical aviation. The result was that the United States entered both Korea and Vietnam with tactical aircraft and tactical air doctrines utterly ill-suited for the demands of non-nuclear air operations. Even today, the Strategic Air Command (SAC) remains the largest, in terms of personnel, of all of the Air Force's 13 commands.

Yet, present and foreseeable budgetary and strategic environments strongly discourage major investment in yet another bomber designed almost exclusively to deliver nuclear weapons inside the Soviet Union. Leave aside, for the comment, the B-2's cost, which alone is likely to torpedo the program far short of its objectives. (Congress has already directed the Air Force to submit two alternative proposals for a B-2 force 75 percent and 50 percent, respectively, of the currently planned fleet of 132 planes, and there is now talk on Capitol Hill of canceling the program after only 15 planes are built, which would be enough to form one SAC bomber wing.)

Even were money no object, however, it would still be difficult to justify so immediate a successor to the just procured B-1B in the face of what appears to be a fundamental transformation of the Soviet Union from an expansionist, confrontational adversary into an externally benign and internally preoccupied country. Even the Pentagon concedes that the Soviet threat is eroding and that the chances of a U.S.-Soviet war are at an all-time low and likely to remain so indefinitely.

On the other hand, there has been no decline in non-Soviet, non-nuclear threats to American security interests overseas—the very threats to which tactical air power is relevant and strategic nuclear bombardment capabilities are not. Indeed, during the past decade there has arisen a new threat that constitutes a far more clear and present danger to the United States than the Soviet threat: loony Third World states (*e.g.*, Iran Libya) armed with munitions of mass destruction (poison gas) and their long-range means of delivery (ballistic missiles).

The anticipated geo-strategic environment of the 1990s calls for, if anything, more U.S. tactical air power, not less, However, in choosing to junk five entire wings of perfectly good tactical aircraft in order to spare a bomber that is not only a budgetary turkey but is also still on the assembly line and largely untested, the Air Force has once again revealed the paramountcy of its own parochial service interests over all other considerations.

Fortunately, the Air Force will not have the final say on this matter. Secretary Cheney, President Bush, and ultimately the Congress will render their judgments.

Jeffrey Record, a senior research fellow at the Hudson Institute, comments on military affairs for The Sun.

STATE OF THE UNION—MESSAGE FROM THE PRESIDENT—PM 81

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States; which was ordered to lie on the table:

To the Congress of the United States:

Mr. President, Mr. Speaker, members of the United States Congress: I return as a former President of the Senate, and former member of this great House. Now, as President, it is my privilege to report to you on the State of the Union.

Tonight, I come not to speak about the state of the government—not to detail every new initiative we plan for the coming year, nor to describe every line item in the budget. I'm here to speak to you and to the American people about the State of the Union—about our world—the changes we've seen, the challenges we face. And what that means for America.

There are singular moments in history: dates that divide all that goes before from all that comes after. Many of us in this chamber have lived much of our lives in a world whose fundamental features were defined in 1945. The events of that year decreed the shape of nations. The pace of progress. Freedom or oppression for millions of people around the world.

1945 provided the common frame of reference—the compass points of the post-war era we've relied upon to understand ourselves. That was our world. Until now. The events of the year just ended—the revolution of '89—have been a chain reaction—change so striking that it marks the beginning of a new era in the world's affairs.

Think back—just twelve short months ago—to the world we knew—as 1989 began.

One year ago, the people of Panama lived in fear, under the thumb of a dicatator. Today, democracy is restored—Panama is free.

Operation "JUST CAUSE" has achieved its objective. The number of military personnel in Panama is now close to what it was before the operation began. And tonight, I am announcing that—well before the end of

February—the additional numbers of American troops—the brave men and women of our Armed Forces who made this mission a success—will be back home.

A year ago in Poland, Lech Walesa declared that he was ready to open a dialogue with the communist rulers of that country. Today, with the future of a free Poland in their own hands, members of Solidarity lead the Polish Government.

A year ago, freedom's playwright, Vaclav Havel, languished as a prisoner in Prague. Today, it's Vaclav Havel—President of Czechoslovakia.

And one year ago, Erich Honecker of East Germany claimed history as his guide. He predicted the Berlin Wall would last another hundred years. Today—less than one year later—it's the Wall that's history.

Remarkable events—events that fulfill the long-held hopes of the American people. Events that validate the long-standing goals of American policy—a policy based on a single, shining principle: the cause of freedom.

America—not just the nation—but an idea, alive in the minds of people everywhere. As this new world takes shape, America stands at the center of a widening circle of freedom—today, tomorrow and into the next century.

Our nation is the enduring dream of every immigrant who ever set foot on these shores—and the millions still struggling to be free. This nation—this idea called America—was and always will be—a new world. Our new world.

At a workers' rally—in a place called Branik on the outskirts of Prague—the idea called America is alive. A worker, dressed in grimy overalls, rises to speak at the factory gates. He begins his speech to his fellow citizens with these words—words of a distant revolution:

"We hold these truths to be self-evident. That all men are created equal, that they are endowed by their Creator with certain unalienable rights, [and] that among these are life, liberty and the pursuit of happiness."

It's no secret that, here at home, freedom's door opened long ago. The cornerstones of this free society have already been set in place: Democracy. Competition. Opportunity. Private investment. Stewardship. And of course, leadership.

Our challenge today is to take this democratic system of ours—a system second to none—and make it better.

A better America, where there's a job for everyone who wants one.

Where women working outside the home can be confident their children are in safe and loving care—and where government works to expand child care alternatives for parents.

Where we reconcile the needs of a clean environment and a strong economy.

Where "Made in the U.S.A." is recognized around the world as the symbol of quality and progress.

Where every one of us enjoys the same opportunities to live, to work, and to contribute to society. And where, for the first time, the American mainstream includes all of our disabled citizens.

Where everyone has a roof over his head—and where the homeless get the help they need to live in dignity.

Where our schools challenge and support our kids and our teachers—and where all of them make the grade.

Where every street, every city, every school and every child is drug-free.

And finally, where no American is forgotten. Our hearts go out to our hostages—our hostages who are ceaselessly on our minds and in our efforts.

That's part of the future we want to see—the future we can make for ourselves. But dreams alone won't get us there. We need to extend our horizon—commit to the long-view. Our plans for the future start today.

In the tough competitive markets around, America faces great challenges and great opportunities. We know that we can succeed in the global economic arena of the 90's, but to meet that challenge we must make some fundamental changes—some crucial investments in ourselves.

Yes—we are going to invest in America. This Administration is determined to encourage the creation of capital—capital of all kinds. Physical capital: everything, from our farms and factories to our workshops and production lines, all that is needed to produce and deliver quality goods and quality services. Intellectual capital: the source of ideas that spark tomorrow's products. And of course, our human capital: the talented workforce we'll need to compete in the global market.

And let me tell you: if we ignore human capital—we lose the spirit of American ingenuity—the spirit that is the hallmark of the American worker. And the American worker is the most productive worker in the world.

We need to save more—expand the pool of capital for the new investments that mean more jobs, more growth. That's the idea behind a new initiative I call the Family Savings Plan, which I will send to the Congress tomorrow.

We need to cut the tax on capital gains—encourage risktakers—especially those in our small businesses—to take those steps that translate into economic reward, jobs, and a better life for all of us.

We'll do what it takes to invest in America's future. The budget commitment is there. The money is there. It's there for Research and Development, R&D—record high. It's there for our housing initiative—HOPE, to help everyone from first-time homebuyers to the homeless. The money's there to keep our kids drug-free: 70% more than when I took office in 1989. It's there for space exploration—and it's there for education: another record high.

And one more thing: last fall at the Education Summit, the Governors and I agreed to look for ways to help make sure kids are ready to learn—the very first day they walk into that classroom. I've made good on that commitment—by proposing a record increase in funds—an extra half a billion dollars—for something near and dear to all of us: Head Start.

Education is the one investment that means more for our future because it means the most for our children. Real improvement in our schools is not simply a matter of spending more. It is a matter of asking more—expecting more: of our schools, our teachers, of our kids, and our parents and ourselves. That's why tonight I am announcing America's education goals—goals developed with the nation's Governors:

By the year 2000, every child must start school ready to learn.

The United States must increase the high school graduation rate to no less than 90%.

And we're going to make sure our schools' diplomas mean something: in critical subjects—at the 4th, 8th and 12th grades—we must assess our students' performance.

By the year 2000, U.S. students must be first in the world in math and science achievement.

Every American adult must be a literate worker and citizen.

Every school must offer the kind of disciplined environment that makes it possible for our kids to learn—and every school in America must be drug-free.

Ambitious aims? Of course. Easy to do? Far from it. But the future's at stake. This nation will not accept anything less than excellence in education.

These investments will keep America competitive. And I know this about the American people: we welcome competition. We'll match our ingenuity and energy—our experience and technology—our spirit and enterprise—against anyone. Let the competition be free—but let it be fair. America is ready.

Since we really mean it—and since we are serious about being ready to meet that challenge—we're getting our own house in order. We've made real progress. Seven years ago, the federal deficit was 6% of our Gross National Product. In the new budget I sent up two days ago—the deficit is down to 1% of GNP.

That budget brings federal spending under control. It meets the Gramm-Rudman target. Brings that deficit

down further. And balances the budget by 1993—with no new taxes.

And let me tell you, there's still more than enough federal spending. For most of us, 1.2 trillion dollars is a lot of money.

And once the budget is balanced, we can operate the way every family must when it has bills to pay. We won't leave it to our children and grandchildren. We will start paying off the national debt.

And there's something more we owe the generations of the future: stewardship—the safekeeping of America's precious environmental inheritance.

As just one sign of how serious we are, we will elevate the Environmental Protection Agency to cabinet rank. Not more bureaucracy, not more red tape—but the certainty that here at home, and in our dealings with other nations, environmental issues have the status they deserve.

This year's budget provides over $2 billion in new spending to protect our environment, with over $1 billion for global change research. And a new initiative I call "America the Beautiful"—to expand our national parks and wildlife preserves and improve recreational facilities on public lands.

And something else: something that will help keep this country clean, from our forestland to our inner cities, and keep America beautiful for generations to come—the money to plant a billion trees a year.

And tonight, let me say again to all the members of Congress: The American people did not send us here to bicker. There's work to do—and they sent us here to get it done. And once again, I offer my hand to all of you. Let's work together to do the will of the people. Clean Air. Child Care. The Educational Excellence Act. Crime and Drugs. It's time to act. The farm bill. Transportation policy. Product liability reform. Enterprise Zones. It's time to act together.

And there's one thing I hope we'll all be able to agree on. It's about our commitments. I'm talking about Social Security.

To every American out there on Social Security, to every American supporting that system today, and to everyone counting on it when they retire: We made a promise to you—and we are going to keep it.

We rescued the system in 1983—and it's sound again. Our budget fully funds today's benefits—and it assures that future benefits will be funded as well. The last thing we need to do is mess around with Social Security.

There's one more problem we need to address. We must give careful consideration to the recommendations of the health care studies now underway. That's why tonight, I am instructing Dr. Louis Sullivan—Secretary of Health and Human Services—to lead a Domestic Policy Council review of recommendations on the quality, accessibility and cost of our nation's health care system. I am committed to bring the staggering costs of health care under control.

The "state of the government" does indeed depend on many of us in this very chamber. But the State of the Union depends on all Americans. We must maintain the democratic decency that makes a nation out of millions of individuals. I have been appalled at the recent mail bombings across this country. Every one of us must confront and condemn racism. Anti-semitism. Bigotry and hate. Not next week, not tomorrow, but right now.

The State of the Union depends on whether we help our neighbor—claim the problems of our community as our own. We've got to step forward when there's trouble—lend a hand, be what I call a point of light to a stranger in need. We've got to take the time after a busy day to sit down and read with our kids. Help them with their homework. Pass along the values we learned as children. That's how we sustain the State of the Union.

Every effort is important. It all adds up—it's doing the things that give democracy meaning. It all adds up to who we are—and who we will be.

And let me say, that so long as we remember the American idea—so long as we live up to the American ideal—the State of the Union will remain sound and strong.

And to those who worry we have lost our way—well, I want you to listen to parts of a letter written by James Markwell—PFC James Markwell, a 20-year old Army medic of the 1st Battalion, 75th Rangers. It's dated December 18th—the night before our Armed Forces went into action in Panama. It's a letter servicemen write—and hope will never be sent. Sadly, Private Markwell's mother did receive this letter. And she passed it on to me.

Here is some of what he wrote: "I have never been afraid of death, but now he is waiting at the corner. . . . I have been trained to kill and to save, so has everyone else. I am frightened of what lays beyond the fog, yet. . . . Do not mourn for me, revel in the life that I have died to give you. . . . But most of all, don't forget that the Army was my choice. Something that I wanted to do."

"Remember I joined the Army to serve my country and insure that you are free to do what you want and live your lives freely."

Private Markwell was among the first to see battle in Panama, and one of the first to fall.

He knew what he believed in. He carried the idea we call America in his heart.

I began tonight speaking about the changes we've seen this past year. There is a new world of challenges and opportunities before us. And there is a need for leadership that only America can provide.

Nearly forty years ago, in his last address to the Congress, President Harry Truman predicted such a time would come. He said: "As our world grows stronger, more united, more attractive to men on both sides of the iron curtain, then inevitably there will come a time of change within the communist world."

Today, that change is taking place.

For more than forty years, America and its allies held communism in check, and ensured that democracy would continue to exist. Today, with communism crumbling, our aim must be to ensure democracy's advance. To take the lead in forging peace and freedom's best hope—a great and growing commonwealth of free nations.

To the Congress and to all Americans, I say it is time to acclaim a new consensus at home and abroad—a common vision of the peaceful world we want to see.

Here in our own hemisphere, it's time for all the people of the Americas—North and South—to live in freedom.

In the Far East and Africa, it is time for the full flowering of free governments and free markets that have served as the engine of progress.

It is time to offer our hand to the emerging democracies of Eastern Europe. So that continent—for too long a continent divided—can see a future whole and free.

And it's time to build on our new relationship with the Soviet Union—to endorse and encourage a peaceful process of internal change toward democracy and economic opportunity.

We are in a period of great transition, great hope, yet great uncertainty. We recognize that the Soviet military threat in Europe is diminishing, but we see little change in Soviet strategic modernization. Therefore, we must sustain our own strategic offense modernization and the Strategic Defense Initiative.

But the time is right to move forward on a conventional arms control agreement to move us to more appropriate levels of military forces in Europe—a coherent defense program that ensures the U.S. will continue to be a catalyst for peaceful change in Europe. I've consulted with leaders of NATO—and in fact, I spoke by phone with President Gorbachev, just today.

I agree with our European allies that an American military presence in Europe is essential—and that it should not be tied solely to the Soviet military presence in Eastern Europe.

But troop levels can still be lower. So tonight, I am announcing a major new step—for a further reduction in U.S. and Soviet manpower in Central and

Eastern Europe to 195,000 on each side.

This number reflects the advice of our senior military advisors. It is designed to protect American and European interests—and sustain NATO's defense strategy. A swift conclusion to our arms control talks—conventional, chemical and strategic—must now be our goal. That time has come.

Still, we must recognize an unfortunate fact: In many regions of the world tonight, the reality is conflict—not peace. Enduring animosities and opposing interests remain. Thus the cause of peace must be served by an America strong enough—and sure enough—to defend our interests and ideals. It's this American idea that for the past four decades helped inspire the Revolution of '89.

Here at home—and in the world—there is history in the making—and history to be made. Six months ago, early in this season of change, I stood at the gates of the Gdansk Shipyard in Poland at the monument to the fallen workers of Solidarity. It's a monument of simple majesty. Three tall crosses rise up from the stones. Atop each cross, an anchor—an ancient symbol of hope.

The anchor in our world today is freedom. Holding us steady in times of change—a symbol of hope to all the world. And freedom is at the very heart of the idea that is America.

Giving life to that idea depends on every one of us. Our anchor has always been faith and family.

In the last few days of this past momentous year, our family was blessed once more—celebrating the joy of life when a little boy became our 12th grandchild.

When I held the little guy for the first time, the troubles at home and abroad seemed manageable—in perspective.

Now, I know you're thinking: that's a grandfather talking.

Well, maybe you're right. But I've met a lot of children this past year—across this country, and everywhere from the Far East to Eastern Europe. All kids are unique. Yet, all kids are alike. The budding young environmentalists I met this month, who joined me exploring the Florida Everglades. The little leaguers I played catch with in Poland—ready to go from Warsaw to the World Series. Even the kids who are ill or alone—God bless those boarder babies, born addicted to drugs—coping with problems no child should have to face. But, you know, when it comes to hope and the future: Every kid is the same. Full of dreams. Ready to take on the world. All special: because they are the very future of freedom. To them belongs this new world I've been speaking about.

So tonight I'm going to ask something of every one of you. Let me start with my generation—with the grandparents out there. You are our living link to the past. Tell your grandchildren the story of struggles waged, at home and abroad. Of sacrifices freely made for freedom's sake. And tell them your own story as well—because every American has a story to tell.

Parents: Your children look to you for direction and guidance. Tell them of faith and family. Tell them we are one nation under God. Teach them that of all the many gifts they can receive, liberty is their most precious legacy. And of all the gifts they can give, the greatest . . . the greatest is helping others.

And to the children and young people out there tonight: with you rests our hope—all that America will mean in the years and decades ahead. Fix your vision on a new century—your century. On dreams we cannot see. On the destiny that is yours—and yours alone.

And finally, let all Americans—all of us together here in this chamber, the symbolic center of democracy—affirm our allegiance to this idea we call America. And let us all remember that the State of the Union depends on each and every one of us.

God bless all of you. And may God bless this great nation, the United States of America.

GEORGE BUSH.

THE WHITE HOUSE, *January 31, 1990.*

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 2:02 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the bill (S. 1521) to amend Public Law 91-34 relating to the police force of the National Zoological Park of the Smithsonian Institution, and for other purposes; with an amendment, in which it requests the concurrence of the Senate.

The message also announced that pursuant to Public Law 453 of the 96th Congress, as amended, the chairman of the Committee on Merchant Marine and Fisheries appoints the following members of the Committee on Merchant Marine and Fisheries to serve as members of the Board of Visitors to the U.S. Merchant Marine Academy for the year 1990: Mr. HOCHBRUECKNER, Mrs. LOWEY of New York, Mr. LENT, and Mr. JONES of North Carolina, ex officio.

The message further announced that pursuant to Public Law 301 of the 78th Congress, the chairman of the Committee on Merchant Marine and Fisheries appoint the following members of the Committee on Merchant Marine and Fisheries to serve as members of the Board of Visitors to the U.S. Coast Guard Academy for the year 1990: Mr. TAUZIN, Mr. HUGHES, Mr. DAVIS, and Mr. JONES of North Carolina, ex officio.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. GLENN, from the Committee on Governmental Affairs, without amendment:

S. 535. A bill to increase civil monetary penalties based on the effect of inflation (Rept. No. 101-240).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. REID:

S. 2045. A bill to amend the Comprehensive Drug Abuse Prevention and Control Act of 1970 to add methyl ethyl ketone as a listed essential chemical, and for other purposes; to the Committee on the Judiciary.

By Mr. BURDICK (for himself, Mr. MOYNIHAN, Mr. BAUCUS, Mr. LAUTENBERG, Mr. WARNER, Mr. MITCHELL, Mr. BENTSEN, Mr. REID, Mr. LIEBERMAN, and Mr. BREAUX):

S. 2046. A bill to establish a National Infrastructure Council and for related purposes; to the Committee on Environment and Public Works.

By Mr. THURMOND:

S. 2047. A bill to temporarily suspend the duty on p-tolualdehyde; to the Committee on Finance.

By Mr. SARBANES:

S. 2048. A bill to provide for cost-of-living adjustments in 1991 under certain Government retirement programs; to the Committee on Governmental Affairs.

By Mr. BOSCHWITZ (for himself, Mr. MOYNIHAN, Mr. D'AMATO, Mr. MITCHELL, Mr. DOLE, Mr. PELL, Mr. HELMS, Mr. METZENBAUM, and Mr. WILSON):

S.J. Res. 246. Joint resolution calling upon the United Nations to repeal General Assembly Resolution 3379; to the Committee on Foreign Relations.

S.J. Res. 247. Joint resolution relating to emergency aid to Panama; to the Committee on Foreign Relations.

39-059 O-91-31 (Pt. 1)

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MITCHELL:

S. Res. 238. Resolution authorizing the taking of a photograph in the Chamber of the United States Senate; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. REID:

S. 2045. A bill to amend the Comprehensive Drug Abuse Prevention and Control Act of 1970 to add methyl ethyl ketone as a listed essential chemical, and for other purposes; to the Committee on Finance.

CERTAIN CONTROLS ON METHYL ETHYL KETONE

Mr. REID. Mr. President, as I speak here now on the streets of Boston, Chicago, Atlanta, Los Angeles, on the streets of Las Vegas and Reno, and even on the streets of small-town Nevada, a poison called cocaine is being sold at an alarming rate. It is the same poison sold to young children in the communities of your own States. It is the same poison that is destroying lives in the neighborhoods within walking distance of the United States Capitol where I stand now.

Cocaine is not something you just pick off the trees and ingest. It has to be processed. The first step in the process entails soaking coca leaves with lime in kerosene or gasoline to extract the cocaine.

This highly impure extract is then put through several additional steps until, in the final step, methyl ethyl ketone is used to refine the deadly narcotic known as cocaine.

The United States exports millions of pounds of this solvent every year. About 12 percent of our exports of this chemical, methyl ethyl ketone, is purchased by a small country in South America. That country is none other than Colombia.

On December 5, 1989, an article appeared in the Los Angeles Times with the headline: "Cocaine Has A Made-In-U.S.A. Label."

The headline is graphic, and the headline is true.

The subject of the L.A. Times article was Exxon Chemical Co.'s shipments of methyl ethyl ketone [MEK] to Colombia. MEK is an industrial solvent used for the production of compounds such as rubber cement. But in Colombia, it is not used as an industrial solvent; it is used to make cocaine.

Thirteen million pounds of American-made MEK were imported by Colombia last year. The Central Intelligence Agency warned, in a classified report, that normal economic activity in Latin America could not possibly absorb the solvents off-loaded at its ports each year. It is believed that over 90 percent of the MEK Colombia imported was diverted to cocaine laboratories in Colombia.

On December 7, 1989, almost 2 months ago, I wrote to drug czar William Bennett asking him to investigate this serious matter. Mr. Bennett, after more than 6 weeks, had not responded to my inquiry, causing me to initiate another letter to him. Finally, on January 26, I received his reply.

Mr. Bennett's reply was woefully inadequate. He used a lot of words, but he did not say anything. Neither MEK nor Exxon Chemical were even mentioned in the letter. What I received was nothing more than a robo letter—in other words, a letter with no content. The usually outspoken drug czar had spoken softly, carried no stick and dodged responsibility.

In fact, a spokesman for Mr. Bennett is reported in a Nevada newspaper as saying of me and my letter that "he isn't the only Senator or Member of Congress who's been writing Secretary Bennett. This is one of many letters we receive on any day."

The arrogance. He is taking the title "Czar" a little too seriously. My inquiry was not just an annoying letter to which Mr. Bennett's office should have addressed a meaningless form letter. My letter involved Exxon—the same company that defaced Alaska—a company shipping millions of pounds of MEK to Colombia where it is used to make cocaine. It was a serious inquiry from the United States Senator on the gravest of issues facing this Nation—the war against drugs. Apparently, Mr. Bennett has forgotten that there is a war. A war in which we all believed he held a major command. Instead of finding real answers in Mr. Bennett's reply, I was instructed on the Chemical Diversion and Trafficking Act of 1988, which established a system to identify, monitor and control chemical shipments which might be diverted to the illegal drug trade.

What the czar evidently does not know is that the Chemical Diversion and Trafficking Act of 1988 lists 20 precursor and essential chemicals, and MEK is not one of them. But it should be.

In September and October of 1987, the Committee on the Judiciary in the House of Representatives held hearings on the control of precursor and essential chemicals. The Drug Enforcement Agency [DEA] provided the following information at these hearings:

> Methyl ethyl ketone [MEK], a chemical analog of acetone, has similar properties and is a good substitute in cocaine hydrochloride manufacture. * * * [MEK is] used in the final step of processing coca leaves to cocaine hydrochloride as a pure white powder.

There were two other solvents mentioned in this testimony—acetone and ethyl ether—which were included in the Chemical Diversion and Trafficking Act.

But when I wrote to Exxon Chemical for an explanation, they answered that they complied with the law. In fact, they stated that they worked closely with the DEA on the draft legislation that led to the act.

I think that poses more questions than it answers. What was their influence in excluding MEK from the law? Was there a conflict of interest?

I would answer that their influence, obviously, was great. And, yes, there was a conflict of interest.

Mr. President, I rise today to introduce a bill to add methyl ethyl ketone to the list of essential chemicals cited in the Chemical Diversion and Trafficking Act of 1988.

A good first step in thwarting the production of cocaine is to adopt this legislation, which will list MEK as a chemical that must be reviewed and approved before we allow it to be exported and sold to other countries.

Since the drug czar refuses to question Exxon, the polluter of Alaska, our legislation will force him to stop the sale of MEK, and also force him to investigate companies associated with the drug cartels that produce these deadly chemicals.

We must send a message to Exxon, and to other chemical companies, that poison for profit will not be tolerated. It is difficult enough to fight the drug war on the streets of America, but to be forced to fight it in the board rooms of corporate America should not be necessary.

By Mr. BURDICK (for himself, Mr. MOYNIHAN, Mr. BAUCUS, Mr. LAUTENBERG, Mr. WARNER, Mr. MITCHELL, Mr. BENTSEN, Mr. REID, Mr. LIEBERMAN, and Mr. BREAUX):

S. 2046. A bill to establish a National Infrastructure Council and related purposes; to the Committee on Environment and Public Works.

NATIONAL INFRASTRUCTURE COUNCIL ACT

Mr. BURDICK. Mr. President, on behalf of Senators MOYNIHAN, BAUCUS, LAUTENBERG, WARNER, MITCHELL, BENTSEN, REID, LIEBERMAN, BREAUX, and myself I am introducing today the "National Infrastructure Council Act of 1990.

In February 1988 the National Council on Public Works Improvement issued its report on the fragile foundations of our infrastructure. Since that time much has been said about the Council report, particularly with regard to its recommendation for a large increase in the national investment in capital improvement projects by all levels of government. But this was not the only recommendation of the Council, and the funding of capital investments was not the only infra-

structure policy which the Council investigated.

In reality Mr. President, the Council focused its attention on the complete lack of a coordinated infrastructure policy, on the serious need for technological innovation in engineering and construction, on the lack of information on infrastructure matters, and the serious need for technical assistance in small and rural communities to manage modern sophisticated physical systems.

Mr. President, these are not problems which require costly solutions. These are problems which require only the will to address them.

This legislation would simply establish a permanent National Infrastructure Council composed of the Secretaries of the Interior, Commerce, Transportation, and Army, and the Administrator of the EPA. The Council would function independently and have its own staff. The Council would coordinate, prioritize, and analyze infrastructure, something which is not done today in the executive branch.

The Council would coordinate a program of cost shared technical assistance to communities in need of advice on complex systems questions. The Council would serve as a clearinghouse and information center on all infrastructure issues. And the Council would conduct a one time program of research on technological innovation.

The cost of operating the Council, conducting technical assistance and an information clearinghouse would be $11 million annually. The proposed research program would be carried out over a 5-year period at a cost of $20 million.

Mr. President, infrastructure policy is not just another term for public works programs. It is a term which is meant to convey the integration and coordination of all capital investment decisions. Today the Federal Government is incapable of having an infrastructure policy because the necessary permanent mechanism to focus on this problem does not exist. It should.

In his inaugural address President Bush drew a line between having the wallet versus having the will to address the Nation's many needs. I believe this legislation satisfies the majority of the recommendations of the National Council on Public Works Improvement, making it one of the most cost effective proposals ever passed by the Senate. I hope the administration has the will to work with the Congress on this legislation this year.

Mr. President, I would ask unanimous consent that a copy of the "National Infrastructure Council Act of 1990" be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2046

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Bill may be cited as the "National Infrastructure Council Act of 1990".

SEC. 2. Definitions.—

(a) The term "Federal agency" means any department, agency, or independent agency of the Federal Government, or any instrumentality of the Federal Government, including any corporation owned or controlled by the Federal Government.

(b) the term "infrastructure" includes the following:

(1) Highways; Roads; Streets; Bridges; and Appurtenances to the above items;

(2) shoreline erosion protection facilities;

(3) navigation channels and facilities;

(4) ports and harbors;

(5) flood protection structures;

(6) water collection, treatment, and distribution facilities;

(7) sewage and drainage facilities;

(8) solid waste disposal facilities;

(9) hazardous waste disposal facilities;

(10) airports and airport facilities;

(11) mass transportation, railroad and intermodal transportation facilities;

(c) the term "local government" means a county, city, town, village, or other general purpose political subdivision of a state.

(d) the term "small disadvantaged unit of local government" means a unit of local government with a population of less than 50,000 and which has an impaired ability to obtain financing, based on its assets, tax base, bond rating, the absence of a bond rating, or other financial factors which the Council deems appropriate.

(e) the term "State" means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, the Commonwealth of Guam, and American Samoa; or an instrumentality thereof.

(f) the term "technical assistance" includes statistical and other studies and compilations, technical tests and evaluations, plans, engineering and design information and evaluations, technical information, financing information, legal assistance, and training activities.

SEC. 3. National Infrastructure Council.—

(a) There is hereby established the National Infrastructure Council (hereinafter referred to as "Council"), to be composed of the following members or their designated representatives:

(1) the Secretary of the Army

(2) the Secretary of the Interior

(3) the Secretary of Transportation

(4) the Secretary of Commerce

(5) the Administrator of the Environmental Protection Agency.

(b) The President shall appoint the Chairperson of the Council from among the designated members.

(c) The Chairperson of the Council shall request the heads of other Federal agencies to participate with the Council when matters affecting their responsibilities are considered by the Council.

(d) Powers and Duties.—The Council shall—

(1) develop and coordinate Federal infrastructure policy, evaluate roles for public and private entities in implementing this policy, and propose actions necessary to carry out the policy;

(2) prepare an assessment of national infrastructure needs and priorities on an annual basis;

(3) establish guidelines and procedures for the coordination and provision of Federal assistance to states and local governments on all infrastructure matters. In establishing such guidelines and procedures, the Council shall consider the findings of the study to be conducted pursuant to section 408 of this title;

(4) develop priorities and recommendations for Federal infrastructure investments to be undertaken based upon the needs assessment and application of the guidelines and procedures developed pursuant to subsection (d) (3) of this section;

(5) transmit its priorities and recommendations to the President and the Congress.

(e) Administrative Provisions.—For the purpose of coordinating Federal Infrastructure Policy, preparing needs assessments developing guidelines and procedures, and executing the responsibilities vested in it by this act, the Council shall:

(1) Hold such hearings, sit and act at such times and places, take such testimony, receive such evidence, and print or otherwise reproduce and distribute so much of its proceedings and reports as it may deem advisable;

(2) acquire, furnish, and equip such office space as is necessary;

(3) use the United States mails in the same manner and upon the same conditions as other departments and agencies of the United States;

(4) employ and fix the compensation of such personnel as it deems advisable, in accordance with the civil service laws and chapter 51 and subchapter III of chapter 53 of Title 5 of the U.S. Code;

(5) procure services as authorized by section 3109 of Title 5, at rates not in excess of the daily equivalent of the rate prescribed for grade GS–18 under section 5332 of Title 5 of the U.S. Code in the case of individual experts or consultants;

(6) purchase, hire, operate, and maintain passenger motor vehicles; and

(7) incur such necessary expenses and exercise such other powers as are consistent and reasonably required to perform its functions.

(f) To the extent permitted by law, all appropriate records and papers of the Council may be made available for public inspection.

(g) Upon the request of the Council, the head of any Federal department or agency is authorized:

(1) to furnish to the Council such information as may be necessary for carrying out its functions and as may be available to or procurable by such department or agency, and

(2) to detail to temporary duty with such Council on a reimbursable basis such personnel within its administrative jurisdiction as it may need or believe to be useful for carrying out its functions, each such detail to be without loss of seniority, pay or other employee status.

(h) The Council shall be responsible for—

(1) the appointment and supervision of personnel,

(2) the assignment of duties and responsibilities among such personnel, and

(3) the use and expenditures of funds.

(i) There are authorized to be appropriated to the Council $5,000,000 for fiscal year 1991 and for each succeeding fiscal year to carry out the purposes of this Section.

SEC. 4. INFRASTRUCTURE ASSISTANCE PROGRAM.—

(a) For the purposes of furnishing assistance to state and local governments, the

Council shall implement the Infrastructure Assistance Program.

(b) The Council shall establish procedures to coordinate, receive, and channel requests for assistance and information on infrastructure and infrastructure technology;

(c) The Council shall consult with appropriate Federal agencies, non-Federal and private entities on developing a program of infrastructure assistance;

(d) The Council shall establish administrative requirements necessary to carry out the provisions of this title;

(e) The Council shall prepare and submit an annual report to the Congress on the effectiveness of the programs established in this title.

SEC. 5. TECHNICAL ASSISTANCE PROGRAM.—(a) The Council is directed to establish a program to provide technical assistance upon the request of States and local governments for such assistance regarding the construction, improvement, rehabilitation, operation, or maintenance of infrastructure. In carrying out this program the Council is authorized to use the resources and facilities of Federal agencies.

(b) The non-Federal share of the costs of assistance provided under this section shall be 25 percent; except that assistance to a small disadvantaged unit of local government shall be provided at full Federal expense.

(c) There are authorized to be appropriated $5,000,000 for fiscal year 1991, and for each succeeding fiscal year to carry out the purposes of this section.

SEC. 6. TECHNOLOGY TRANSFER ASSISTANCE PROGRAM.—(a) The Council is authorized, in consultation with the National Technical Information Service, to provide a clearinghouse of requests from States and local governments, industrial organizations, public and private foundations, nonprofit organizations, or other persons, for technology programs and research and development programs relating to infrastructure.

(b) The Council shall refer the requests and inquiries directly to the appropriate Federal agency for response.

(c) There are authorized to be appropriated $1,000,000 for fiscal year 1991, and for each succeeding fiscal year to carry out the purposes of this section.

SEC. 7. RESEARCH AND DEVELOPMENT PROGRAM.—(a) The Council is authorized to carry out a five-year program to promote the use of innovative technology in the design, construction, improvement, rehabilitation, use, operation, and management of infrastructure. In carrying out the program, the Council is authorized to determine appropriate projects to undertake, and designate Federal agencies to carry out a project constructed pursuant to this program.

(b) Projects constructed pursuant to this program shall be at full Federal expense.

(c) There are authorized to be appropriated $20,000,000 to carry out the purposes of this program.

SEC. 8. (a) The Council is directed to conduct a study to determine the value and worth of infrastructure, and to develop and recommend alternative economic processes to determine the feasibility and viability of Federal infrastructure projects. In preparing this study the Council shall consider alternatives to traditional cost-benefit analyses.

(b) The Council shall report to the Congress on the results of its findings within one year after the date of enactment of this act.

(c) There are authorized to be appropriated $1,000,000 for fiscal year 1991 to carry out the purposes of this section.

Mr. WARNER. Mr. President, I am pleased to join the distinguished chairman of the Committee on Environment and Public Works, Senator BURDICK, as an original cosponsor of legislation introduced today to establish a permanent Federal Infrastructure Council.

This Council would coordinate Federal infrastructure policy, set infrastructure priorities, provide technical assistance to States and localities, act as a clearinghouse of information on infrastructure, and conduct a 5-year program to promote technology transfer and innovation.

I think many of my colleagues would agree with me that it is time to take a closer look at the way we prioritize and fund our Nation's infrastructure, particularly with respect to our interstate highways. It is also imperative to better coordinate the information and technology available throughout the United States.

The Federal Interstate System, which began in 1956, is nearly complete, and the current highway program is scheduled to end in 1992. Congress needs to take action now to look at the different alternatives which exist to address gridlock on our interstates, both in the short term and long term.

During this decade, certain areas throughout Virginia, from northern Virginia to Tidewater, face tremendous needs in the area of transportation improvements. I am certain similar problems exist in the rest of the country.

For this reason, on February 9, 1989, I introduced S. 410, a bill to help urban and suburban areas of the country cope with increasing levels of traffic congestion on the Federal Interstate System. My legislation is innovative in that in addition to widening interstates where traffic overloads occur daily during peak periods, it also encourages alternatives other than more asphalt, such as better use of mass transit and carpooling.

I see the legislation I proposed during the first session as the beginning of those solutions that Congress must consider closely. For the long term, it is important that we devise a more comprehensive plan to address all our country's surface transportation infrastructure. The bill introduced today is necessary in order to coordinate all available resources such that the best possible long-term plan can be subsequently initiated.

The gridlock on our Nation's highways and the deterioration of our infrastructure translates into reduced productivity, lost income, and time and money ill spent. This Council will provide us with the objective leadership necessary to formulate a new long-term national strategy.

By Mr. THURMOND:

S. 2047. A bill to temporarily suspend the duty on p-tolualdehyde; to the Committee on Finance.

TEMPORARY DUTY SUSPENSION

Mr. THURMOND. Mr. President, I rise today to introduce a bill which will temporarily suspend the duty imposed on p-tolualdehyde (p-Tal or 4-methylbenzaldehyde) until December 31, 1993. P-Tal is a raw material used in the manufacturing of dimethylbenzylidene sorbitol [MDBS]. MDBS is used to improve the clarity of polypropyene products.

The p-Tal used in Japan for manufacturing MDBS is of a special grade which helps the reactivity of the aldehyde in the MDBS production process. Currently, p-Tal is imported from Japan for use in the United States because no domestic supplier or substitute is available. Therefore, suspending the duty on this chemical would not adversely affect domestic industries.

Mr. President, suspending the duty on this chemical will benefit the consumer by stabilizing the costs of manufacturing the end-use products. Further, this suspension will allow domestic producers to maintain or improve their ability to compete internationally. I hope the Senate will consider this measure expeditiously.

I ask unanimous consent that the text of this bill be printed in the CONGRESSIONAL RECORD immediately following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2047

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. p-TOLUALDEHYDE.

Subchapter II of chapter 99 of the Harmonized Tariff Schedule of the United States (19 U.S.C. 3007) is amended by inserting in numerical sequence the following new heading:

"9902.30.07	p-Tolualdehyde (provided for in subheading 2912.29.50) ...	Free	No change	No change	On or before 12/31/93".

SEC. 2. EFFECTIVE DATE.

The amendment made by this Act shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the date that is 15 days after the date of enactment of this Act.

By Mr. SARBANES:

S. 2048. A bill to provide for cost-of-living adjustments in 1991 under certain Government retirement pro-

grams; to the Committee on Governmental Affairs.

COST-OF-LIVING ADJUSTMENTS IN CERTAIN GOVERNMENT RETIREMENT PROGRAMS

● Mr. SARBANES. Mr. President, today I am introducing legislation which would protect Federal civilian and military retirees, as well as other retirees, from the loss of their fiscal year 1991 cost-of-living adjustments [COLA's] as proposed in the President's budget submitted to the Congress on Monday. Federal civilian and military retirees are threatened each year with the loss of their cost-of-living allowances when budget time comes around, and each year I oppose the cuts. In my view the elimination of the cost-of-living allowances is an unfair and unwarranted reduction.

I realize that at a time when we are under intense pressure to reduce the Federal budget, cuts have to be made somewhere, but I do not think that COLA's and other retirement benefits should be available as revenue for other Government spending. Mr. President, I am also disturbed about the President's recommendation to place a permanent CPI-1 ceiling on the annual cost-of-living allowance after 1991. It unfairly singles out one small group of older Americans for an inequitable cut in their income. Federal civilian and military retirees have seen a disproportionate share of their benefits erode in recent years.

If we accept the President's recommendations to eliminate the COLA for fiscal year 1991 and then to subsequently decrease retirees' cost-of-living adjustments to 1 percent below the rate of inflation, we will, in effect, be taking away benefits previously promised. There is a very basic question of fairness and equity involved here and this proposal fails the fairness test. The cost-of-living adjustment merely substains the original annuity value which has decreased over time because of inflation.

Mr. President, I am introducing this legislation because I strongly believe that we have a responsibility to ensure sound and secure retirement benefits for all of our citizens and I urge my colleagues to join me. I ask unanimous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2048

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. BENEFITS PAYABLE FROM THE CIVIL SERVICE RETIREMENT AND DISABILITY FUND.

(a) IN GENERAL.—Subchapter III of chapter 83 of title 5, United States Code, is amended by adding at the end the following:

"§ 8352. Benefits during calendar year 1991

"(a) Any benefits payable from the Fund during calendar year 1991, including any increase in those benefits which is scheduled to become payable during such calendar year as the result of an adjustment under section 8340 or 8462 of this title, shall not be subject to reduction or suspension, either pursuant to statute (other than applicable provisions of this chapter and chapter 84) or Presidential order, during such calendar year.

"(b) For the purpose of this section, 'benefits payable from the Fund' shall be determined solely in accordance with applicable provisions of this chapter and chapter 84.".

(b) CHAPTER ANALYSIS.—The analysis for chapter 83 of title 5, United States Code, is amended by adding after the item relating to section 8351 the following:

"8352. Benefits during calendar year 1991.

SEC. 2. MILITARY RETIREMENT AND SURVIVOR BENEFIT PROGRAMS.

(a) IN GENERAL.—Any percentage adjustment provided by law to be made in amounts payable under military retirement and survivor benefit programs to take effect during fiscal year 1990 shall take effect in accordance with the law providing for such adjustment.

(b) CONSTRUCTION.—During fiscal year 1991, an adjustment described in subsection (a) shall not be subject to reduction or suspension under any provision of law (other than applicable provisions of title 10, United States Code) or any Presidential order.

(c) MILITARY RETIREMENT AND SURVIVOR BENEFIT PROGRAMS DEFINED.—For purposes of this section:

(1) The term "military retirement and survivor benefit programs" means—

(A) the provisions of law creating entitlement to, or determining the amount of, retired or retainer pay for members of the uniformed services; and

(B) the programs providing annuities for survivors of members and former members of the uniformed services, including chapter 73 of title 10, United States Code, section 4 of Public Law 92-425, and section 5 of Public Law 96-402.

(2) The term "uniformed services" has the meaning given that term in section 101 of title 37, United States Code.

SEC. 3. FOREIGN SERVICE RETIREMENT BENEFITS DURING CALENDAR YEAR 1990.

Section 826 of the Foreign Service Act of 1980 (22 U.S.C. 4066) is amended by adding at the end the following:

"(h)(1) Any benefits payable from the Fund during calendar year 1991, including any increase in those benefits which is scheduled to become payable during such calendar year pursuant to subsection (a), shall not be subject to reduction or suspension, either pursuant to statute (other than applicable provisions of this subchapter) or Presidential order, during such calendar year.

"(2) For the purpose of this subsection, 'benefits payable from the Fund' shall be determined solely in accordance with applicable provisions of this subchapter.".

SEC. 4. BENEFITS UNDER THE CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM.

The President shall, pursuant to the authority granted in section 292 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note), extend the prohibition contained in section 8352 of title 5, United States Code, on reduction or suspension of certain benefits payable from the Civil Service Retirement and Disability Fund, to apply with respect to benefits payable from the Central Intelligence Agency Retirement and Disability Fund.

SEC. 5. RAILROAD RETIREMENT TIER II COLAS.

Section 3(g)(1) of the Railroad Retirement Act of 1974 (45 U.S.C. 231b(g)(1)) is amended by inserting ", shall not otherwise be prevented from taking effect, with respect to benefits paid during calendar year 1991, by any provision of law other than this Act," after "shall not be deferred".

SEC. 6. FEDERAL EMPLOYEE DISABILITY COMPENSATION DURING CALENDAR YEAR 1991.

Section 8147 of title 5, United States Code, is amended by adding at the end the following:

"(d)(1) Any compensation payable from the Fund during calendar year 1991, including any increase in those benefits which is scheduled to become payable during such calendar year pursuant to section 8146a, shall not be subject to reduction or suspension, either pursuant to statute (other than applicable provisions of this subchapter) or Presidential order, during such calendar year.

"(2) For the purpose of this subsection, 'compensation payable from the Fund' shall be determined solely in accordance with applicable provisions of this subchapter.".●

By Mr. BOSCHWITZ (for himself, Mr. MOYNIHAN, Mr. D'AMATO, Mr. MITCHELL, Mr. DOLE, Mr. PELL, Mr. HELMS, Mr. METZENBAUM, and Mr. WILSON):

S.J. Res. 246. Joint resolution calling upon the United Nations to repeal General Assembly Resolution 3379; to the Committee on Foreign Relations.

URGING REPEAL OF U.N. GENERAL ASSEMBLY RESOLUTION 3379

Mr. BOSCHWITZ. Mr. President, today, along with my colleagues Senators MOYNIHAN, D'AMATO, MITCHELL, DOLE , PELL, HELMS, METZENBAUM, and WILSON I offer a joint resolution calling on the United Nations General Assembly to repeal its infamous "Zionism is racism" resolution.

It is very fitting that this joint resolution be considered this year. Nineteen-ninety marks not only the 45th anniversary of the founding of the United Nations, but also the 15th anniversary of the adoption of the "Zionism is racism" resolution by the General Assembly. When viewed together, these two anniversaries remind us both of the high hopes accompanying the founding of the world organization in the aftermath of history's most destructive war and the despair and frustration with which it was viewed by many in the aftermath of its attack on the very foundation of one of its member states, Israel.

There are few actions the General Assembly has taken that are as odious as the one of November 10, 1975 when it passed a Resolution 3379, declaring that Zionism is a form of racism. By coincidence, the passage of this resolution occurred on the 37th anniversary of the infamous Crystal Night. On that date, November 10, 1938, Jews

throughout Germany were attacked and books and synagogues were burned in an orgy of hate-inspired violence. By its timing and content, Resolution 3379 served both as a reminder of the dark events of the Nazi era and a link between those events and the efforts of those in modern times who would deny the legitimate right of the Jewish people to a state of their own.

Mr. President, by citing Zionism as a form of racism, the U.N. resolution perverted Zionism's true meaning. Zionism most emphatically is not racist. It is, quite simply, the modern manifestation of the Jewish people's ancient longing for their homeland in the land of Israel. This longing was most eloquently expressed over 2,500 years ago by the Jews in Babylon who had, in their time, been exiled from Israel: "If I forget thee, O Jersualem, let my right hand lose its cunning, let my tongue cleave to the roof of my mouth."

There is no doubt that Resolution 3379 was one of the most egregious errors in the history of the United Nations. In addition to its biased and unwarranted attack against Zionism, the resolution also served to fan anti-Semitism by providing it with a degree of completely undeserved international respectability.

The General Assembly's action in 1975 was greatly responsible for damaging that body's own reputation and usefulness. The continuing existence of Resolution 3379 is one of the major reasons that there is justified doubt about the General Assembly's ability to act in an impartial and unbiased manner in the search for peace in the Middle East. The General Assembly cannot have any credibility on the issues involved when it so brazenly attacks and distorts the very foundations of one of the major parties in that search.

I want to take this opportunity to express my thanks to the President and, in particular, to Vice President QUAYLE for their commitment to work for the repeal of the "Zionism is racism" resolution. Their actions, along with those of Congress, symbolize the unity that Americans properly feel on this subject.

I ask unanimous consent that several articles discussing the proposed repeal of General Assembly Resolution 3379 be entered into the RECORD at the end of my remarks.

Mr. President, I urge that my colleagues strongly support this joint resolution.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 11, 1989]

U.S. SEEKING REPEAL OF U.N. TEXT ON ZIONISM

(By Ethan Schwartz)

UNITED NATIONS.—Vice President Quayle said today that the United States will campaign for a new General Assembly resolution nullifying a 14-year-old assembly text equating Zionism with racism.

"We feel this is the right time to pursue the resolution," Quayle told reporters during his first U.N. visit. "We feel this would send a positive signal to the Middle East peace process," adding that "you can't move forward when you have these types of resolutions."

Quayle made the remarks after a 45-minute meeting with U.N. Secretary General Javier Perez de Cuellar, at which he presented the U.N. chief with a $65 million check toward back dues the United States owes the organization. The United States still owes more than $400 million in dues through 1989.

Quayle said eliminating the Zionism-racism equation would "send a very positive message to Congress," implying that it might free funds for the world body.

"It will help reestablish the stature and moral authority of the United Nations," Quayle said. He told reporters that U.S. chief delegate Thomas R. Pickering will begin talks with Soviet and other envoys to try to win their support for repeal of the Zionism text, though officials at the U.S. mission said it will be a long effort.

Perez de Cuellar's spokesman said the secretary general will follow the wishes of the General Assembly on the Zionism text.

On other topics, Quayle said he discussed with Perez de Cuellar U.N. efforts to negotiate peace in Central America and monitor upcoming Nicaraguan elections. Quayle said he reiterated the administration's view that Nicaragua's government has "unilaterally violated" a regional peace plan by arming Salvadoran rebels.

[From the New York Times, Dec. 19, 1989]

THIS INFAMOUS ACT

(By A.M. Rosenthal)

On Nov. 10, 1975, the General Assembly of the United Nations adopted an Arab-inspired resolution defining Zionism as a "form of racism and racial discrimination."

The vote was 72 to 35 with 32 abstentions.

After the vote the Israeli delegate, Chaim Herzog, said it was fitting that the resolution had been adopted at the time of the anniversary of Kristallnacht. He said Hitler would have been at home in the United Nations during the debate.

Daniel P. Moynihan, the delegate of the United States, rose to say the United States would never "acquiesce in the infamous act."

Fourteen years and one month later, Vice President J. Danforth Quayle stood before an audience at a Jewish university, Yeshiva in New York, to announce and begin a political and diplomatic crusade to repeal that resolution.

The campaign will last at least a year. It will take that much time to get the full weight of the Congress of the United States and the American public behind it, fight for international support and count capitals to see if a repeal resolution can win at the United Nations.

In the end it may not work. The support of the Soviet Union, which voted for the original resolution, is needed to help win third-world votes for repeal. Moscow has refused.

Mr. Quayle stated the purposes of that resolution with simple, honest directness, rare as a diamond in the murky fields of diplomacy.

"First to delegitimize the state of Israel and lay the groundwork for its expulsion from the United Nations and the world community.

"Second, to provide anti-Semitism—thinly disguised as anti-Zionism—with the appearance of international approval and respectability."

Isreal still stands. Mr. Herzog is its President.

But every year there is a nasty United Nations ritual of trying to expel her. It fails largely because the United States has said it would leave the United Nations if Israel is thrown out.

Mr. Quayle also said the promotion of anti-Semitism under the guise of attacking Zionism a synonym for a Jewish homeland, was faltering. From his mouth to God's ear—but that is not really so.

Every Israel-hating government, every anti-Semite in office around the world has used that resolution to spread fear of Jews among their own people and, more important, among people who never saw a Jew and hardly every heard of them before.

To hundreds of millions of people, "racism is a curse word meaning exploitation of and contempt for people exactly like themselves—black, brown, Latin, Oriental or just newly independent.

Through constant, obsessive, vicious Zionism-is-racism propaganda wrapped in a United Nations cloak, racists and Jews were connected in the minds of people all over the world—and still are.

Mr. Quayle said "new thinking" in the Soviet Union was beginning to move away from anti-Zionism. But that was before the Soviet delegate said a repeal movement would just cause trouble and "we have no need for this kind of thing."

Maybe somebody in the Soviet foreign office looked up the Soviet-Syrian Friendship Treaty of 1979 and found that it calls on both parties to struggle against a linked chain of evils—racism, imperialism and Zionism.

Perhaps Moscow will think it over during the year ahead.

In the meantime, there are a couple of things the Soviet Government might do to repair a little of the damage caused by the 1975 resolution and the years of hate propaganda it officially encouraged.

Mikhail Gorbachev did not hesitate to tell opponents on the left like Andrei Sakharov to sit down and be quiet. He might do the same for organized Soviet anti-Semites on the political right.

Another thought: Moscow could change the regulation about line 5 in the official identification papers Soviet citizens must carry.

On that line all Soviet citizens are identified by nationality—Russian, Uzbek, Ukrainian, whatever—all but Jews. They are identified always as Jews, a clear statement to all Soviet people that their Government regards Jews as outside and separate, where anti-Semitism needs them.

Whatever the Soviet Union or any other country decides about repeal, Vice President Quayle has dragged into the open the dirty story of the use of the United Nations machinery to spread bigotry and try to destroy Israel.

In so doing he has honored his country, himself, the supportive Bush-Baker diplomacy—and given the nations a chance to undo a great wrong.

REPEAL "ZIONISM EQUALS RACISM"

(By William Korey)

Nothing has damaged the moral image of the United Nations in its nearly 45-year history as much as the "Zionism equals racism" equation of November 10, 1975. With "Zionism" as a code word for Jews, bigots everywhere could give expression to their Jew-baiting and derive legitimacy from the infamous UN General Assembly resolution.

What reinforces the overt threat to Jews is the fact that the "racism" of the equation has been formally determined by the world body to be not merely evil incarnate, but illegal as well. In a key UN treaty, "racism" has been held to be beyond the pale of civilized society. Contracting parties are called upon to ban it and its manifestations. Thus "Zionism," too, can be considered as an illegal excrescence, to be excised from the body politic.

Andrei D. Sakharov, quite rightly, has called the General Assembly resolution an "abomination," but the international community has made little effort to reverse the resolution. Nonetheless, a growing number of countries, including a number in the Third World, recognize the provocatory equation violates the spirit and purpose of the UN Charter. With next year marking the 45th anniversary of the Charter, it is high time to move toward a reversal.

A move to rescind the resolution will present an excellent opportunity to test the Arab and Muslim states' professed interest in Middle East peace. Unwillingness to support removing this blight from the UN books would eliminate any pretense that these countries are prepared to live in peace with Israel.

Critical to the success of such an initiative is the attitude of the Soviet Union. Moscow played a crucial, if not the central role, in pushing through the defamatory resolution. Its client states in the Third World were in the forefront of the lobbying effort. And the Soviet Union, more than any other country, used the resolution to justify a virulent internal anti-Semitic propaganda campaign masquerading as anti-Zionism.

That campaign ended in 1986. Mikhail Gorbachev's "new thinking" treats the primitivism of the propaganda with contempt. A prominent ideological champion of Soviet glasnost like the Party ideological journal, Sovietskaia kultura, recently exposed the propaganda of the "stagnation era" as bordering on Hitlerism. Comparison was made between Mein Kampf and the works of a notorious anti-Zionist writer who had been earlier hailed by the Kremlin. Only the substitution of the word "Zionism" for "Jewry" (in Hitler's book) kept the Soviet writing from being plagiarism.

Moreover, Moscow has carefully eschewed earlier anti-Israel hostility. A deepening diplomatic relationship has been accompanied by widening commercial and cultural exchanges. At the UN, the vulgarity of Soviet broadsides in a previous epoch has been replaced by, for example, a vote of abstention on the perennial question of Israel's credentials.

Still, anti-Zionism appears to remain a component element of Soviet ideology. Very recently, after a Jewish group in Moscow announced the formation of a "Zionist Union," Pravda responded with a blistering assault which included the charge that "Zionism is racism." As legitimization for this dangerously incendiary blast, the Communist Party organ referred to the infamous UN equation.

For Pamyat and other populist anti-Semitic elements in the USSR, Pravda's comments on Zionism could only serve as a welcome cue to continue their propaganda outrage. They, too, mask their anti-Semitic bigotry by targeting the enemy as Zionism, not Jewry. It is precisely the broadening aspects of this populist anti-Semitism that help spark today's great Jewish exodus.

Will the Soviet President continue with anti-Zionist ideology that undermines his "new thinking," especially on UN matters? Or will he, in the spirit of glasnost, dump an obscene equation that provides comfort only to the bigoted? How Moscow responds can well determine whether the initial image of the UN itself can be restored.

By Mr. KENNEDY:

S.J. Res. 247. Joint resolution relating to emergency aid to Panama; to the Committee on Foreign Relations.

RELATING TO EMERGENCY AID TO PANAMA

Mr. KENNEDY. Mr. President, shortly after the United States invaded Panama over a month ago, President Bush stated his intention to lift the sanctions imposed against the corrupt, drug-running regime of Manuel Noriega. Yet today they remain in place.

While I have made clear my reservation about the United States invasion of Panama, I believe we have a deep responsibility—and that it is in our own fundamental interest—to move as quickly as possible to restore economic and political stability in Panama. And yet, our sanctions remain in place while we debate the appropriate level and type of aid to the new Endara government.

Today, I am introducing a joint resolution that will immediately lift all current sanctions against Panama and I hope it will gain swift and unanimous passage.

The United States should move quickly to implement a generous and well-designed package of aid to repair the damage wrought by the Noriega regime and to reconstruct the Panamanian economy. The first step toward this end—the step that I am proposing we undertake immediately—is to lift all sanctions imposed against Panama during the Noriega regime. It has been more than a month since the United States invaded Panama and toppled its corrupt dictator. Yet a variety of sanctions still remain in place for no reason other than the slow pace of our bureaucracy. We must first lift these sanctions before we can begin to consider serious proposals to rejuvenate Panama's economy.

The Endara government has requested emergency economic aid and negotiations to reduce trade barriers and the Bush administration is currently discussing this package with the Endara government and the Congress. I hope that a generous package will be agreed upon. It is important the assistance we ultimately offer be carefully designed to build a healthy and independent economy. Handouts won't work. The creation of jobs will. Our assistance must be designed to put the Panamanian people to work, encourage United States investment, and increase trade between our nations.

In the meantime we can move to help Panama begin to rebuild itself in a simply way—by lifting of sanctions immediately. The current legal requirements for the lifting of sanctions by the United States against Panama and other restrictions on United States assistance are complex and have already resulted in unnecessary delays of United States assistance to Panama. Right now there are emergency moneys and supplies that could be being used for the Panamanian people but for the existence of the sanctions. Time is precious for people who have lost their jobs and homes and there is no reason for them to wait any longer for the assistance they deserve.

Accordingly, the bill I am submitting today removes these restrictions immediately without the need for complex and lengthy findings. First, the bill waives with respect to Panama for a period of 24 months that provision of the Anti-Drug Abuse Act of 1986 regarding tariff treatment of products of uncooperative major drug-producing or drug-transit countries.

Second, the bill waives with respect to Panama for a period of 24 months that provision of the Anti-Drug Abuse Act of 1986 terminating the sugar quota for any country which has a government "involved in the trade of illicit narcotics or is failing to cooperate with the United States in narcotics enforcement activities."

Third, the bill waives with respect to Panama for a period of 24 months the Brooke/Alexander amendment, which prohibits assistance to countries 6 months or more in arrears in payments to the United States.

Fourth, the bill waives with respect to Panama for a period of 24 months those provisions of the International Narcotics Control Act prohibiting United States assistance to any country listed as "major illicit drug producing country or drug transit country."

Last, the bill repeals those provisions of the Foreign Operations, Export Financing, and Related Programs Appropriations Act of 1990 which directly restrict United States assistance to Panama including, for example, such assistance as Commodity Credit Corporation financing and Export-Import Bank financing.

If Congress will pass this bill it will save itself and the administration considerable time in making the findings necessary to lift the sanctions under current law.

The prompt termination of sanctions against Panama and the waiver of restrictions on aid to Panama will advance Panama's political, economic,

and democratic reforms, and in so doing fulfill our responsibility to and recement our friendship with this important Central American neighbor.

United States interests are vast in Panama. We should lose no more time in moving swiftly to restore economic prosperity and stability to the Panamanian people who have suffered for so long.

I urge my colleagues to join me in passing this resolution as soon as possible and help put Panama back on the road to prosperity in the post-Noriega era.

ADDITIONAL COSPONSORS

S. 16

At the request of Mr. CRANSTON, the name of the Senator from Colorado [Mr. WIRTH] was added as a cosponsor of S. 16, a bill to require the executive branch to gather and disseminate information regarding, and to promote techniques to eliminate, discriminatory wage setting practices and discriminatory wage disparities which are based on sex, race, or national origin.

S. 397

At the request of Mr. DIXON, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 397, a bill to provide assistance to small communities with ground water radium contamination.

S. 713

At the request of Mr. LOTT, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of S. 713, a bill to provide for establishment of a revolving loan fund for the development of wayports and to establish a commission to propose areas suitable for the location of such wayports.

S. 814

At the request of Mr. DOMENICI, the names of the Senator from Minnesota [Mr. DURENBERGER] and the Senator from Washington [Mr. ADAMS] were added as cosponsors of S. 814, a bill to provide for the minting and circulation of one dollar coins, and for other purposes.

S. 1006

At the request of Mr. LEAHY, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 1006, a bill to encourage innovation and productivity, stimulate trade, and promote the competitiveness and technological leadership of the United States.

S. 1330

At the request of Mr. HELMS, the names of the Senator from Texas [Mr. GRAMM] and the Senator from Nevada [Mr. REID] were added as cosponsors of S. 1330, a bill to provide protections to farm animal facilities engaging in food production or agricultural research from illegal acts, and for other purposes.

S. 1430

At the request of Mr. KENNEDY, the name of the Senator from Louisiana [Mr. BREAUX] was added as a cosponsor of S. 1430, a bill to enhance national and community service, and for other purposes.

S. 1600

At the request of Mr. FORD, the names of the Senator from Louisiana [Mr. BREAUX] and the Senator from Alaska [Mr. STEVENS] were added as cosponsors of S. 1600, a bill to enhance the safety of air travel through a more effective Federal Aviation Administration, and for other purposes.

S. 1664

At the request of Mr. HEINZ, the names of the Senator from Iowa [Mr. HARKIN] and the Senator from Michigan [Mr. LEVIN] were added as cosponsors of S. 1664, a bill to establish a congressional commemorative medal for members of the Armed Forces who were present during the attack on Pearl Harbor on December 7, 1941.

S. 1752

At the request of Mr. HEINZ, the name of the Senator from Indiana [Mr. COATS] was added as a cosponsor of S. 1752, a bill to exclude the Social Security trust funds from the deficit calculation and to extend the target date for Gramm-Rudman-Hollings through fiscal year 1997.

S. 1823

At the request of Mr. BENTSEN, the names of the Senator from Nebraska [Mr. EXON] and the Senator from Michigan [Mr. RIEGLE] were added as cosponsors of S. 1823, a bill to amend the Social Security Act to increase the amount of earnings exempt from reduction under the retirement test under title II of such act.

S. 1893

At the request of Mr. LAUTENBERG, the name of the Senator from New York [Mr. MOYNIHAN] was added as a cosponsor of S. 1893, a bill to reauthorize the Asbestos School Hazard Abatement Act of 1984.

S. 2006

At the request of Mr. GLENN, the name of the Senator from Nevada [Mr. REID] was added as a cosponsor of S. 2006, a bill to establish the Department of the Environment, provide for a global environmental policy of the United States, and for other purposes.

S. 2019

At the request of Mr. SYMMS, the names of the Senator from Georgia [Mr. FOWLER], the Senator from Oregon [Mr. HATFIELD], the Senator from North Carolina [Mr. HELMS], the Senator from South Dakota [Mr. PRESSLER], and the Senator from Wyoming [Mr. SIMPSON] were added as cosponsors of S. 2019, a bill to amend title XVIII of the Social Security Act to eliminate the reimbursement differential between hospitals in different areas.

S. 2035

At the request of Mr. BINGAMAN, the name of the Senator from West Virginia [Mr. BYRD] was added as a cosponsor of S. 2035, a bill to establish a Commission to examine the advisability of lengthening the school day and school year in U.S. public elementary and secondary schools.

S. 2041

At the request of Mr. SYMMS, the names of the Senator from North Dakota [Mr. BURDICK] and the Senator from North Carolina [Mr. HELMS] were added as cosponsors of S. 2041, a bill to amend title XVIII of the Social Security Act to provide uniform national conversion factors for services of certified registered nurse anesthetists.

SENATE JOINT RESOLUTION 212

At the request of Mr. DANFORTH, his name was withdrawn as a cosponsor of Senate Joint Resolution 212, a joint resolution designating April 24, 1990, as "National Day of Remembrance of the Seventy-Fifth Anniversary of the Armenian Genocide of 1915–1923."

SENATE JOINT RESOLUTION 229

At the request of Mr. CRANSTON, the names of the Senator from New York [Mr. D'AMATO], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Kentucky [Mr. FORD], and the Senator from Idaho [Mr. SYMMS] were added as cosponsors of Senate Joint Resolution 229, a joint resolution to designate April 1990 as "National Prevent-a-Litter Month."

SENATE JOINT RESOLUTION 231

At the request of Mr. GRASSLEY, the names of the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Rhode Island [Mr. PELL], the Senator from Montana [Mr. BURNS], the Senator from Nebraska [Mr. EXON], the Senator from Mississippi [Mr. COCHRAN], the Senator from North Dakota [Mr. BURDICK], the Senator from New Hampshire [Mr. HUMPHREY], the Senator from Oklahoma [Mr. BOREN], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Illinois [Mr. SIMON], the Senator from Idaho [Mr. MCCLURE], the Senator from New Jersey [Mr. BRADLEY], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Nebraska [Mr. KERREY], the Senator from Idaho [Mr. SYMMS], the Senator from Arkansas [Mr. BUMPERS], the Senator from New Mexico [Mr. DOMENICI], the Senator from South Dakota [Mr. DASCHLE], the Senator from Utah [Mr. HATCH], the Senator from Louisiana [Mr. BREAUX], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Wisconsin [Mr. KOHL], the Senator from Pennsylvania [Mr. HEINZ], the Senator from California [Mr. CRANSTON], the Senator from Washington

[Mr. GORTON], the Senator from Michigan [Mr. LEVIN], the Senator from California [Mr. WILSON], the Senator from Colorado [Mr. WIRTH], the Senator from Hawaii [Mr. INOUYE], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Louisiana [Mr. JOHNSTON], the Senator from Montana [Mr. BAUCUS], the Senator from Arkansas [Mr. PRYOR], the Senator from Maryland [Ms. MIKULSKI], the Senator from Alabama [Mr. HEFLIN], the Senator from Vermont [Mr. LEAHY], the Senator from Alabama [Mr. SHELBY], and the Senator from Connecticut [Mr. LIEBERMAN] were added as cosponsors of Senate Joint Resolution 231, a joint resolution to designate the week of June 10, 1990, through June 16, 1990 as "State-Supported Homes for Veterans Week."

SENATE JOINT RESOLUTION 235

At the request of Mr. HUMPHREY, the name of the Senator from Idaho [Mr. SYMMS] was added as a cosponsor of Senate Joint Resolution 235, a joint resolution proposing a constitutional amendment to limit congressional terms.

SENATE JOINT RESOLUTION 238

At the request of Mr. SARBANES, the names of the Senator from Nevada [Mr. REID], the Senator from Michigan [Mr. LEVIN], the Senator from Maine [Mr. COHEN], the Senator from Utah [Mr. GAIN], the Senator from Iowa [Mr. GRASSLEY], the Senator from Alaska [Mr. MURKOWSKI], the Senator from New York [Mr. D'AMATO], the Senator from Oklahoma [Mr. BOREN], the Senator from Arkansas [Mr. BUMPERS], the Senator from Arkansas [Mr. PRYOR], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from North Dakota [Mr. CONRAD], the Senator from Delaware [Mr. ROTH], the Senator from Virginia [Mr. WARNER], and the Senator from California [Mr. CRANSTON] were added as cosponsors of Senate Joint Resolution 238, a joint resolution to designate the week beginning March 5, 1990, as "Federal Employees Recognition Week."

SENATE JOINT RESOLUTION 241

At the request of Mr. D'AMATO, the names of the Senator from Pennsylvania [Mr. SPECTER], the Senator from California [Mr. WILSON], the Senator from Oregon [Mr. PACKWOOD], the Senator from New Mexico [Mr. DOMENICI], and the Senator from Alabama [Mr. SHELBY] were added as cosponsors of Senate Joint Resolution 241, a joint resolution to designate the week of April 29, 1990, through May 5, 1990, as "Jewish Heritage Week."

SENATE CONCURRENT RESOLUTION 34

At the request of Mr. BREAUX, the name of the Senator from Mississippi [Mr. COCHRAN] was added as a cosponsor of Senate Concurrent Resolution 34, a concurrent resolution confirming that it is the responsibility and the desire of Congress to develop a comprehensive telecommunications policy, which includes determining the extent of participation of regional Bell holding companies in providing advanced telecommunications services and equipment.

SENATE RESOLUTION 238—AUTHORIZING THE TAKING OF A PHOTOGRAPH IN THE SENATE CHAMBER

Mr. MITCHELL submitted the following resolution; which was considered and agreed to:

S. RES. 238

Resolved, That paragraph 1 of rule IV of the Rules for the Regulation of the Senate Wing of the United States Capitol (prohibiting the taking of pictures in the Senate Chamber) be temporarily suspended for the sole and specific purpose of permitting the National Geographic Society to photograph the United States Senate in actual session on a date and time to be announced by the majority leader after consultation with the Republican leader.

SEC. 2. The Sergeant at Arms of the Senate is authorized and directed to make the necessary arrangements therefor, which arrangements shall provide for a minimum of disruption to Senate proceedings.

AMENDMENTS SUBMITTED

CLEAN AIR ACT AMENDMENTS

BAUCUS (AND OTHERS) AMENDMENT NO. 1223

Mr. BAUCUS (for himself, Mr. CHAFEE and Mr. BREAUX) proposed an amendment to the bill (S. 1630) to amend the Clean Air Act to provide for attainment and maintenance of health protective national ambient air quality standards, and for other purposes, as follows:

On page 229, after line 5, add the following new subsection (c) and redesignate subsections (c) and (d) as subsection (d) and (e) respectively:

"(c) VOLATILE ORGANIC COMPOUNDS EMISSIONS FROM AEROSPACE COATINGS AND SOLVENTS.—Within two years after the enactment of this subpart, the Administrator shall publish a control techniques guideline for all aerospace coating and solvent applications (including military and commercial applications), after consultation with the Department of Defense, the Federal Aviation Administration, the National Air and Space Administration, and the affected industry. In evaluating VOC reduction strategies, the guidelines shall take into account the applicable requirements of section 112 and the need to protect stratospheric ozone."

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BUMPERS. Mr. President, I would like to announce for the public that a hearing has been scheduled before the Subcommittee on Public Lands, National Parks and Forests of the Committee on Energy and Natural Resources.

The hearing will be held on February 22, 1990, beginning at 2 p.m. The purpose of the hearing is to receive testimony on two measures currently pending in the subcommittee. The measures are:

S. 1578, to provide for the creation of an independent Historic Preservation Agency and a National Center for Preservation Technology, and for other purposes; and

S. 1579, to amend the National Historic Preservation Act, the Historic Sites Act, the Archaeological Resources Protection Act, the Abandoned Shipwreck Act, and certain related acts to strengthen the preservation of our historic heritage and resources, and for other purposes.

The hearing will be held in room SD-366 of the Senate Dirksen Office Building in Washington, DC. Because of the limited time available for the hearing, witnesses may testify by invitation only. However, anyone wishing to submit written testimony to be included in the hearing record is welcome to do so. Those wishing to submit written testimony should send two copies to the Subcommittee on Public Lands, National Parks and Forests, SD-364, Washington, DC 20510.

For further information regarding the hearing, please contact Beth Norcross of the subcommittee staff at (202) 224-7933.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Wednesday, January 31, at 10:30 a.m., for a hearing on the nomination of George W. Haley, to be Commissioner, Postal Rate Commission.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Wednesday, January 31, 1990, at 10 a.m. to conduct oversight hearings on the Resolution Trust Corporation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet in executive session on Wednesday, January 31, 1990, at 2

p.m., to discuss the nomination of Victor Stello, Jr. to be the Assistant Secretary of Energy for Defense Programs.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

PRESERVING AMERICA'S HERITAGE

● Mr. BUMPERS. Mr. President, I rise today to congratulate the Bureau of Land Management's Eastern States Office on its tremendous success in implementing a project to modernize the Federal lands and minerals records.

Few people are aware of how many lands records, including patents and tract books, have accumulated since the beginning of westward expansion. Keeping track of land boundaries and ownership was essential to the development of this country. The Eastern States Office maintains these records and makes the information available to the public.

Constant use of the books containing the land titles resulted in rapid deterioration of these valuable and historical records. In 1988, the Eastern States Office initiated a study to determine the best possible method for preserving the information for future generations. "Preserving America's Heritage" is the records project which will enable the Bureau of Land Management to store information on discs, each of which will hold 36,000 patents. Information which at one time would take hours to retrieve will be immediately accessible once the records conversion project is complete.

As chairman of the Public Lands Subcommittee, I am particularly interested in maintaining the original patents and title documents of historical land exchanges. Access to these historic records is needed to determine the Federal Government's claim to lands and minerals.

I am pleased to report that Arkansas land records are being used for the prototype in this project. In a matter of weeks, 323 volumes of Arkansas patents—163,000 documents—will be fully automated.

I congratulate Curt Jones and his staff on their fine work. Not only is this new system saving valuable time and money, it is also preserving our past. Future use of the automation system will provide efficient and equitable management of our public lands.●

MOSCOW MONITOR PROJECT

● Mr. GRASSLEY. Mr. President, dramatic and historic changes in United States refugee policies concerning Soviet refugees greeted fiscal year 1990. This is the year the doors to Soviet emigration opened and the doors to the United States closed.

When the administration announced the new U.S. refugee policies on September 18, Congress had only 15 days notice of the very serious changes in our refugee policies. There were a myriad of unanswered questions and unaddressed issues, and still today the same questions remain unanswered and issues unaddressed.

Therefore, in conjunction with the Union of Councils for Soviet Jews, I have established the Moscow monitor project wherein the preeminent Soviet refusnik, Leonid Stonov, will provide first-hand information on the workings and effects of the new policies.

Since our first contact in mid-December, Mr. Stonov has informed me of very serious problems concerning Moscow processing. In response to these contacts, I have forwarded a letter to Counsel General Max Robinson, of the American Embassy in Moscow, which discusses these problems.

I would like to thank my colleagues who have already expressed interest in this project and again invite further participation. It is my hope that with our continued vigilance, these problems will be addressed and freedom will speedily arrive for those still trapped in the Soviet Union.

I ask that the letter I referred to be printed in the RECORD.

The letter follows:

U.S. SENATE,
COMMITTEE ON THE JUDICIARY,
Washington, DC, January 26, 1990.

MAX N. ROBINSON,
Counsel General, American Embassy Moscow.

DEAR GENERAL ROBINSON: I am writing to advise you of a program I have implemented to monitor the effects of the recent changes in United States policy regarding Soviet refugees for fiscal year 1990.

When the Administration announced these new policies on September 18, Congress had only 15 days notice of what I consider to be serious changes in our refugee policies. There were and are too many unanswered questions and unaddressed concerns surrounding the policies. Therefore, in conjunction with the Union of Councils for Soviet Jews, I established a formal monitor project wherein the preeminent Soviet refusnik, Leonid Stonov, will provide first-hand insight and information on the effects of the policies. I have invited other Senators to join me in this effort.

Mr. Stonov has formed a committee to monitor and report on Moscow processing as well as the condition of human rights in the Soviet Union—particularly the rising tide of anti-semitism. To date, Mr. Stonov and the Committee have reported the following areas of concern:

1. Because the Soviets will not allow non-governmental organizations to operate in Moscow, refugees have no source of guidance or information on the adjudication process or resettlement in the United States. As a result, applicants are helpless as they attempt to understand the interview process and those granted refugee status must wait months while the Counselor Department searches to secure sponsors in the United States. Reports indicate that at least a six-month backlog has been created and is increasing. To date, there is no indication that volunteer agencies will be allowed to operate in Moscow.

2. Refusal rates are reported to be between 23-50 percent. These rates were not acceptable for Vienna processing and are no more acceptable for Moscow processing. Further, there is a great inconsistency in the adjudication process. When even the most outspoken and visible activists are being denied refugee status, it is impossible to discern any logic or consistency in the process.

3. There is a proliferating anti-semitic movement throughout the Soviet Union. With the growing instability in the country, Jews and other religious minorities are in greater danger and are even more vulnerable to persecution. Moreover, President Gorbachev has taken no action to condemn this growing movement.

These issues are the cause of great concern to me and we must work to solve these critical problems. As a member of the Judiciary Committee, I have pledged to maintain vigilance over the new U.S. policies. It is my hope that by sharing my concerns with you, we can work together in order to maximize freedom during this volatile time.

Sincerely,

CHARLES E. GRASSLEY,
U.S. Senator.●

PRESERVING AMERICA'S HERITAGE

● Mr. PRYOR. Mr. President, recently the Eastern States Office of the Bureau of Land Management at the Department of the Interior unveiled its new land records automation project.

This project, entitled "Preserving America's Heritage," marks the beginning of the automation of almost 9 million Federal land conveyance documents maintained by the Eastern States Office—the largest land title office in the world.

I am proud that the land records of my State were selected for the prototype for this project. Former Arkansas Land Commissioner Bill McCuen, now our secretary of state, as well as our current commissioner of lands, Charlie Daniels, were actively involved in this project from the outset.

The land title records housed at the Eastern States Office in some 10,000 huge books have been extensively utilized over the years by Federal and State agencies, title insurance companies, industry, and by citizens tracing their genealogies. These books, many of them years old, have been literally loved to death. Automation will both preserve these important documents and make them even more readily available for use.

Mr. President, not only am I proud of the fact that my State was chosen to be the "pioneer" in this effort, but I am also proud of the work of scores of dedicated Federal employees at the Eastern States Office, as well as the

Office of Scientific and Technical Information at the Department of Energy who have lent their expertise to the project.

Recipient of one of only 15 awards given in June 1989 by the President's Council on Management Improvement, the Eastern States Office is evidence of the caliber of individual that Federal service continues to draw today.

As chairman of the Senate Governmental Affairs Subcommittee on Federal Services, Post Office and Civil Service, I am daily apprised of performance throughout the Federal Government workplace. The Interior Department can be especially proud of this team of Federal employees.

I know Arkansas is now the envy of other States who wish to have their land records—such an integral part of our heritage—automated for future use. Let me assure my colleagues that they could ask for no better group than Kurt Jones and the Easter States Office to undertake this important mission.●

IN RECOGNITION OF THE GRAND OPENING OF THE INDOCHINESE YOUTH CENTER IN GARDENA

● Mr. WILSON. Mr. President, I rise today to recognize the opening of a new center that will go a long way in our efforts to steer our young people away from the specter and scourge of drug and alcohol abuse.

The Indochinese Youth Center is a noteworthy addition to the overall efforts of the Los Angeles-based Asian-American Drug Abuse Program. Not only will this center enhance our efforts to halt drug and alcohol abuse, but it also seeks to address and stabilize the problems that result from stress generated by culture, family, and school.

The Indochinese Youth Center is part of the further development of the Asian Pacific Youth Project which involves other important community groups such as the Korean Youth Center, Search to Involve Philippino Americans and the Asian Youth Project. These community organizations have joined forces to address the growing, unique problems that are facing Asian youth today.

Mr. President, Asian immigration is not unique to our shores. Over the past two decades, we have seen a phenomenal growth in the number and diversity of new citizens in our Nation; be they Chinese, Japanese, Korean, Philippino, Cambodian, Vietnamese, these individuals and families have come to seek a better life in the United States.

Consequently, their immigration has also presented them with a unique set of problems that we have not seen before, especially among the children of these new immigrants.

As the children of these families learn English and become more proficient in the language, they are soon called upon by their parents and families to represent, interpret, and even mediate for the family in their newly adopted culture. In this scenario, the decisionmaking process within the family shifts in focus to the children as the family becomes more dependent on their language proficiency. This is a formidable challenge and obstacle for any child or young adult, especially in family structures that are usually hierarchial in nature, presenting the family with role reversals.

Sadly, Mr. President, the resulting stress can often lead to deterioration within the family structure and result in a situation whereby the children can easily fall prey to involvement in crime and drug and alcohol abuse.

Frequently, these pressures can disrupt their school lives, and push these students off this primary track of school and education that is so critical to their social development. The stresses involved in school with stark cultural differences, peer pressure and basic language difficulties combine to lead to poor performance and dropouts.

This is why the activities of the Indochinese Youth Center represent a positive step toward addressing these problems and treating the root causes by stressing early intervention—and thus prevention—in young people's lives.

The program targets the community it serves through outreach projects, after school drug free activities, and peer support groups.

Moreover, the program offers parental support groups, family counseling services, and cultural awareness activities to help family members cope with the various stresses and conflicts affecting them. It is through programs like these that we will win our war against drugs and put our children on a path that is drug free and crime free.

Mr. President, I commend the leadership of the Indochinese Youth Center and urge all Americans to take heart in this one, bright example of partnership and cooperation and to work to duplicate the fine work of these caring people.●

BE KIND TO ANIMALS AND NATIONAL PET WEEK

● Mr. D'AMATO. Mr. President, I rise today in support of Senate Joint Resolution 236, introduced by my distinguished colleague Senator WILSON to designate the week of May 6 through 12, 1990, as Be Kind to Animals and National Pet Week. I commend my colleague for leading this effort to highlight the importance of being kind to animals and pets and to recognize the contribution of veterinarians and humane organizations to animal health and welfare.

The passage of this resolution is significant, as the week of May 6 marks the 75th anniversary of American Humane Association's Be Kind to Animals Week and the 10th anniversary of National Pet Week.

Animals and pets share the homes of nearly 50,000,000 individuals and families in the United States. They offer not only companionship and pleasure, but also provide numerous benefits to children and the elderly. Animals and pets also aid the blind, deaf, and physically disabled in many daily activities.

Mr. President, the American public has an obligation to promote responsible care of animals and pets and to guard against irresponsible treatment. It is essential that we teach kindness and respect for all living animals through education in schools and communities.

I encourage my colleagues who have not done so to join in cosponsoring this worthy resolution. Its prompt passage will lend vital support to such organizations as American Veterinary Medical Association [AVMA], the auxiliary to the AVMA and the American Animal Hospital Association as they endeavor to promote greater respect and more humane treatment for all pets and animals.●

JON D. MARTIN, LAYTON, UT, HONORED

● Mr. HATCH. Mr. President, I rise today to let my colleagues know of a gifted young man from my home State of Utah. Jon D. Martin, of Layton, UT, is the 1989 grand prize winner in the 11th grade and up category in the Paul R. Koch/Scottish Rite Essay Contest. This contest is sponsored by the Ancient and Accepted Scottish Rite of Freemasonry, Southern Jurisdiction, U.S.A.

Jon's essay, entitled, "Rights v. Responsibilities—What the Constitution Means to Youth," is not only an example of inspirational prose, but it makes me proud to know I represent such talented young people.

With the permission of my colleagues, I would like to reprint his winning work:

RIGHTS V. RESPONSIBILITIES—WHAT THE CONSTITUTION MEANS TO YOUTH

(By Jon D. Martin)

It is common knowledge to most young Americans that the Constitution of the United States guarantees certain inalienable rights to the citizens of our great democracy, basic rights which one will not find in many oppressed societies. Yet most young Americans do not understand that along with those rights comes certain responsibilities. If these responsibilities are properly impressed upon the minds of the youth of America, and those young citizens begin to

practice their duties at an early age, then perhaps by the time they reach the years of adulthood, when they are endowed with all the rights of citizenship, they will be able to perform those duties and thus reap greater benefits to themselves while also contributing to their Country. It should be known by every American, young and old, that no privilege can be acquired without also accepting the responsibilities accompanying it. In other words, "Freedom is not free."

The Constitution was signed and ratified in 1787. Now, after 200 years, it is the oldest surviving national Constitution in existence. It consists of a Preamble, 7 Articles, and 26 Amendments; and establishes "delegated powers" for the national government, "reserved powers" for the state governments, and "concurrent powers" by which either level of government may act, thus establishing a "separation of powers." In 1791 a set of amendments was proposed by James Madison, and these were added before any of the remaining states would ratify it. These amendments as a whole are called the Bill of Rights, and their purpose is to protect the liberties of the people against possible unjust rule by the national government.

Through the years, the Constitution has been broadened to meet the changing needs of all Americans. In the words of James Madison, "In framing a system which we wish to last for ages, we should not lose sight of the changes which ages will produce." Also, as the World Book Encyclopedia puts it, "The Constitution was designed to serve the interest of the people—rich and poor, Northerners and Southerners, farmers, workers, and businessmen."

A citizen of the United States is granted many rights by the Constitution. Most of the Constitution pertains to the rights and responsibilities imposed on our national government. The rights of the people themselves are generally located in the Bill of Rights, which also forbids the government to violate these rights. Citizens are guaranteed such rights as freedom of religion, speech, and press; the right to petition; the right to protection against unreasonable searches and seizures; the right of an individual to live where he chooses; the right to assemble; the right to a trial by jury; and the right, and the responsibility, to vote. These rights may be appreciated by all citizens, young and old, but without the acceptance of certain responsibilities, they would be unattainable.

The responsibilities of the United States citizen are few in number, but they are paramount in importance. These responsibilities include voting; obeying the laws, not only of the Nation, but of one's city and state; paying taxes; serving on jury duty when called; demonstrating loyalty to one's Nation; helping to change things which are detrimental to society; and most important of all, respecting the rights and responsibilities of others. All good citizens who perform these duties with diligence and loyalty can expect the rights and privileges guaranteed them as an American citizen. It is common nature to desire a reward without performing the required work, but the result of that work demonstrates the value of dutiful service.

With the United States Constitution a little over 200 years old, it would seem obvious that the relationship between the rights and responsibilities of citizenship is as important today as it was at the birth of our Nation. Perhaps it should not be a question of rights v. responsibilities, but rather one of rights and responsibilities, a sense of coexistence of duties and privileges. As to the impact of the Constitutional rights and responsibilities on the American youth, their importance should be understood and accepted so that in later years, as adult citizens, they will carry a greater respect for those duties and privileges.

The Order of the DeMolay enhances an understanding of these values through the virtue of patriotism. The hope is that these young men will develop into adults with a sense of loyalty towards their Country and the rights and responsibilities which they receive through their citizenship. They will be the leaders of tomorrow, and the better they understand today that no one can expect liberty without first accepting, as necessary, their obligations as a citizen, then they will become responsible adult citizens of our great Country. In the words of Will Durant, "Man became free when he recognized that he was subject to law."●

COMMEMORATIVE RESOLUTIONS

● Mr. KOHL. Mr. President, earlier today I asked Senator HOLLINGS to allow me to cosponsor his legislation, S. 2003, which would bring to an end the current practice of requiring congressional action on so-called commemorative resolutions. I agreed with Senator HOLLINGS. His legislation would save money and save the Congress from the embarrassment of considering legislation establishing things like National Snow White Week.

Now I recognize that some commemoratives are intrinsically valuable. They can call public attention to real issues and they can give legitimate groups an organizational tool of substantial significance. Nothing in this legislation prevents those goals from being achieved—they just allow them to be achieved without congressional action.

Mr. President, in the past I have routinely cosponsored commemorative resolutions. I want to announce to my colleagues that I am changing that practice as of today. I want S. 2003 to be adopted and I suspect that one incentive for action would be created if each Member of the Senate started to withhold their support for commemoratives.

This is not an issue of cosmic significance, Mr. President. But I am afraid that the longer we spend our time, and taxpayer's dollars, acting on commemoratives, the less seriously we will be taken as an institution and the less effective we will be at addressing the substantial challenges facing the Nation? A lot of the commemoratives we pass are serious—things like National Clean Water Month, Working Mother's Day, World Population Awareness Week are worthwhile and they can still be recognized under this bill. But I suspect that a lot of the groups that care about clean water would rather have us pass the Clean Water Act than have a week in their honor; working mothers would rather have a child care bill than a day of recognition; and we would do more to deal with population problems by debating the United Nations Family Assistance Program than we can by declaring a week of awareness.

Mr. President, I am delighted to cosponsor Senator HOLLINGS' bill, I encourage my colleagues to do so as well. And, until we do act on this legislation, I would encourage my colleagues to join me in reversing the current policy of almost routinely supporting commemoratives.●

TRIBUTE TO THE TENACITY OF THE UKRAINIAN PEOPLE

● Mr. LEVIN. Mr. President, 72 years ago last week the Ukrainian people reestablished an independent and sovereign nation. By 1922, after a difficult struggle, the Soviets had established control over Ukraine.

Ukraine has been a free and independent nation at various times through history. Because of an unremitting determination to secure their independence, the Ukrainian people have won respect and support from freedom-loving people throughout the world. While the Ukrainian people have had an independent, free, and sovereign nation only intermittently in recent centuries, the Ukrainian people have never lost their unique and rich culture, their religion, their identity, and their pride of being Ukrainian. Through the years of foreign domination, most recently by the Soviets, the Ukrainian people have succeeded in their stuggle to maintain their identity. With inspiring determination and tenacity, Ukrainians have never lost their desire for freedom.

On this anniversary, Mr. President, we should take special note and pay tribute to the men and women who maintain the struggle for Ukrainian freedom, identity, and dignity. At great personal cost they have struggled and suffered for fundamental human rights, and the right to live as free Ukrainians.

As Americans we should be relentless in our insistence that the Soviet Union honor its commitments, and respect the fundamental, universally recognized human rights of the people of Ukraine.

Mr. President, the resilience and unending determination of the Ukrainian people to achieve freedom will not die. The flame has never been extinguished, and burns with increasing intensity.●

ONE HUNDRED PERCENT VISION FOR FOREIGN AID, NOT 5 PERCENT CUTS

● Mr. DECONCINI. Mr. President, earlier this month, our colleague, the distinguished minority leader Senator DOLE, suggested in a New York Times

editorial that aid to the five largest United States foreign assistance recipients be cut across the board by 5 percent in order to provide needed assistance to the emerging democracies in Eastern Europe and to the rebuilding of Panama. He stated last week that his purpose in writing the editorial was that he wanted to start the debate on foreign aid programs.

I believe that Senator DOLE is correct in saying that Congress needs to fully and completely debate the direction of our foreign aid programs. A detailed examination of these programs is justified and necessary. There is a great need for a massive infusion of aid to assist in stabilizing the democracies we see struggling for life in Poland, Hungary, Czechoslovakia, East Germany, Bulgaria, and Romania. Additionally, following our invasion of Panama, we have a responsibility to rebuild that poor country and aid in its economic and political recovery.

At the same time, the path proposed by Senator DOLE is not the right route for us to take. We should not take aid from other struggling democracies with underdeveloped economies and a desperate need for our assistance and give to other, new democracies with higher standards of living.

Senator DOLE would take a 5-percent cut in aid from Israel, Egypt, Turkey, Pakistan, and the Philippines in order to assist the new democracies. There are, however, very real reasons why these countries are the largest aid recipients. A consensus has developed that aid to each of these countries achieves many of our foreign policy goals and has far-reaching applications.

Israel, for example, is our only democratic ally in the Middle East and one who faces a ring of hostile neighbors. Notwithstanding some of the PLO's rhetoric from Tunis, these nations remain committed to the forceful elimination of the State of Israel. Only one of the countries in the Middle East, Egypt, has made peace with Israel while the rest remain at war. They persist at war when peace is breaking out throughout Eastern Europe.

An added benefit of this peace, and one which will have a severe impact on Israel, is the wave of Soviet Jewish refugees which have already started arriving in numbers higher than at any time since the mid-1970's. The number of refugees entering Israel over the next few years may be as high as one-half million Soviet Jews. Since the United States has significantly reduced the number of Soviet Jewish refugees allowed entry into this country, this will add a burden to an already troubled Israeli economy and will only increase Israel's reliance on United States aid. This is aid which has actually decreased in real terms in the past few years.

Senator DOLE would also cut aid to Egypt, a close friend of the United States and the only country in the Middle East which had the courage to make peace with Israel. Egypt took this risk for peace and was ostracized by its Arab brethren for its foresight. It also paid the ultimate price—the loss of President Anwar Sadat to an assassin's bullet. Under the leadership of President Mubarak, Egypt has stayed the course and was readmitted last summer to the Arab League while continuing its peace with Israel. Egypt is an extremely poor nation, which faced economic isolation for its acts of peace. U.S. aid is vital to the health of its fragile economy. Furthermore, Egypt is presently playing a major role in the Bush administration's Middle East peace efforts; a cut in Egypt's aid would send the wrong signal at a sensitive time.

There is a new democracy in Pakistan. The government of Prime Minister Benazir Bhutto is a good example of a government where democratic institutions and policies are beginning to take root after years of dictatorship. Pakistan is a country which has bravely taken under its wings thousands of Afghan refugees, oftentimes at risk to Pakistani security. On numerous occasions the Afghan Government has bombed the refugee camps in Pakistan. This is another nation for which—if times were different and coffers were full—a convincing case could be made for more aid, not less.

Senator DOLE would also target Turkey, our only Moslem NATO Ally, for cuts in foreign aid. This strategic ally on NATO's southern flank currently faces a virtual civil war on its border as Soviet Armenia battles Soviet Azerbaijan. It has strained its internal budgets by accepting thousands of ethnic Turkish refugees fleeing the policy of forced Bulgarization of minorities ruthlessly pursued by the Zhikov government. Sadly, this policy appears to be favored by many Bulgarians—even after the fall of the Communist government. This is not the time to reduce our aid to this important, developing ally.

Finally, my colleague from Kansas would reduce the aid we provide to the government of President Aquino in the Philippines. Her democratic government faces challenges from anti-democratic forces. As we work to stabilize the situation within that troubled country, to aid Mrs. Aquino as she tries to nurture democratic institutions in her country, and to reach an accord on our military presence in that country, should we simply cut 5 percent off the top without careful consideration? I do not think that action would be wise.

Clearly, a simple across-the-board cut is not the way to approach the issue of revamping our foreign assistance policies. The President complains about Congress' constant earmarking of foreign aid to favored countries. There is, however, a reason for the earmarks. Often, the President is too cautious and lacks a grand foreign policy scheme. The best example of this is last year's aid package for Poland and Hungary.

After his historic visit to these new democracies last summer, President Bush offered his plan to assist these brave countries in their transitions to democracy. His initial aid package consisted of a paltry $10 million.

After I returned from witnessing the swearing in of Poland's first non-Communist prime minister since the end of World War II, I, along with a number of my colleagues, submitted a proposal to increase the aid package for these two countries to approximately $100 million. Ultimately, my colleagues on the Foreign Operations Appropriations Subcommittee and I developed, passed, and had enacted an aid package of $533 million for the current fiscal year for Poland and Hungary—far exceeding the President's original request. Had Congress not earmarked the funds and abided only by the President's request, these countries would be facing problems greater than those before them today.

Unfortunately, the fiscal year 1991 budget President Bush submitted recommends only $300 million for all of Eastern Europe. This is $200 million less than the aid package he signed into law for only two emerging Eastern European democracies in fiscal year 1990.

Senator DOLE only recommends approximately $350 million for all of Eastern Europe and Panama. Panama's President Endara had estimated that his country would need at least $1 billion to rebuild Panama and get its economic house in order. The administration's supplemental appropriations request for Panama includes at least $500 million for this purpose. It seems that the administration does not comprehend the magnitude of the problem our foreign aid programs face.

Obviously these nations need a massive infusion of investment, aid, and capital. This is the problem which faces the United States. Senator DOLE is correct to raise the entire issue. We need perestroika, or new thinking, in our foreign aid programs. We also need vision in our policies to aid these new democracies. A 5 percent cut or $300 million in next year's budget does not demonstrate this vision.

Each and every foreign aid program should be examined and ineffective ones should be discarded. There may be countries to which aid could be reduced. There may be international institutions to which our aid could be

trimmed to free aid for the Eastern European democracies.

Congress does not want to tie the President's hands, but Congress has a constitutionally mandated role to play in the foreign aid arena. I look forward to the debate in the authorization and appropriations committees on these issues as the fiscal year 1991 foreign aid budget process begins.●

UNANIMOUS-CONSENT AGREEMENT—RECESS UNTIL 8:35 P.M.

Mr. MITCHELL. Mr. President, I ask unanimous consent that upon the conclusion of our business this evening, the Senate stand in recess until 8:35 p.m. this evening; that upon reconvening, the Senate assemble as a body and proceed to the House of Representatives at 8:40 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZING THE TAKING OF A PHOTOGRAPH IN THE CHAMBER OF THE U.S. SENATE

Mr. MITCHELL. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 238) authorizing the taking of a photograph in the Chamber of the United States Senate.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to, as follows:

S. RES. 238

Resolved, That paragraph 1 of rule IV of the Rules for the Regulation of the Senate Wing of the United States Capitol (prohibiting the taking of pictures in the Senate Chamber) be temporarily suspended for the sole and specific purpose of permitting the National Geographic Society to photograph the United States Senate in actual session on a date and time to be announced by the majority leader after consultation with the Republican Leader.

SEC. 2. The Sergeant at Arms of the Senate is authorized and directed to make the necessary arrangements therefor, which arrangements shall provide for a minimum of disruption to Senate proceedings.

Mr. MITCHELL. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, I inquire of the distinguished Republican leader whether he has any further business?

Mr. DOLE. No.

Mr. MITCHELL. Mr. President, I would like to just say, before asking that the Senate stand in recess, that I am pleased that we were able to begin voting on the clean air bill today. Two amendments were adopted, one by rollcall vote and one by voice vote. We have had a number of productive discussions among many Senators, representatives of the administration and affected States and industries. I believe that we are now making some significant progress toward final action on this legislation.

I know this has been one of the President's highest priorities. He has so stated on many occasions. I hope and anticipate that he will make reference to it again this evening. While the bill is complex and controversial and while many Senators have understandable concerns about many aspects of it, it is my hope that the Senate will soon be able to complete action on the legislation as requested and urged by the President and that we will be able to see final enactment of such legislation this year.

I thank the distinguished Republican leader for his cooperation in this regard.

Mr. DOLE. Let me just indicate, in meeting with the President this morning, he did underscore the very thing the majority leader has mentioned: early action on this bill, willingness of the administration to work with us where we can, and, where we have differences, work those out the best we can. I share the majority leader's view.

ORDERS FOR TOMORROW

RECESS UNTIL 9:30 A.M.; MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that at the conclusion of this evening's joint session that the Senate stand in recess until 9:30 a.m. tomorrow, Thursday, February 1, and that following the time for the two leaders, there be a period for morning business until 10 a.m., with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

SCHEDULE

Mr. MITCHELL. Mr. President, the Senate will resume debate on the clean air bill at 10 o'clock tomorrow morning with the possibility of votes on amendments throughout the day tomorrow.

RECESS UNTIL 8:35 P.M.

Mr. MITCHELL. If the distinguished Republican leader has no other business and if no other Senator is seeking recognition, I ask unanimous consent that the Senate stand in recess as under the previous order.

There being no objection, at 6:24 p.m., the Senate recessed until 8:35 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. WIRTH].

JOINT SESSION OF THE TWO HOUSES—MESSAGE OF THE PRESIDENT OF THE UNITED STATES

Thereupon, at 8:41 p.m., the Senate, preceded by the Secretary of the Senate, Walter J. Stewart, and the Sergeant at Arms, Henry K. Giugni, proceeded to the Hall of the House of Representatives to hear the address by the President of the United States.

(The address by the President of the United States, this day delivered by him to the joint session of the two Houses of Congress, appears in the proceedings of the House of Representatives in today's Record.)

RECESS 9:30 TOMORROW

At the conclusion of the joint session of the two Houses, and in accordance with the order previously entered, at 9:46 p.m., the Senate recessed until Thursday, February 1, 1990, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate January 31, 1990:

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

MICHAEL LORNE MOODIE, OF MARYLAND, TO BE AN ASSISTANT DIRECTOR OF THE U.S. ARMS CONTROL AND DISARMAMENT AGENCY, VICE LYNN MARVIN HANSEN, RESIGNED.

THE JUDICIARY

DONALD L. IVERS, OF NEW MEXICO, TO BE AN ASSOCIATE JUDGE OF THE U.S. COURT OF VETERANS APPEALS FOR THE TERM OF 15 YEARS (NEW POSITION).

IN THE AIR FORCE

THE FOLLOWING OFFICERS FOR APPOINTMENT IN THE RESERVE OF THE AIR FORCE TO THE GRADE INDICATED, UNDER THE PROVISIONS OF SECTIONS 593, 8218, AND 8373, TITLE 10, UNITED STATES CODE:

To be major general

BRIG. GEN. DALE R. BAUMLER, [redacted]FV, AIR FORCE RESERVE.

BRIG. GEN. SHIRLEY M. CARPENTER, [redacted]FV, AIR FORCE RESERVE.

BRIG. GEN. GLENN W. REDMOND, [redacted]FV, AIR FORCE RESERVE.

BRIG. GEN. JAMES E. SIMON, [redacted]FV, AIR FORCE RESERVE.

BRIG. GEN. RAYMOND B. STEWARD, JR., [redacted]FV, AIR FORCE RESERVE.

To be brigadier general

COL. ALMON B. BALLARD, [redacted]FV, AIR FORCE RESERVE.

COL. GERALD F. CRUMP, [redacted]FV, AIR FORCE RESERVE.

COL. JIMMY G. DISHNER, [redacted]FV, AIR FORCE RESERVE.

COL. RAY F. GARMAN, [redacted]FV, AIR FORCE RESERVE.

COL. DAVID C. GILDART, [redacted]FV, AIR FORCE RESERVE.

COL. JAMES W. HART, JR., xxx-xx-xxxx FV, AIR FORCE RESERVE.
COL. JOHN F. HARVEY, xxx-xx-xxxx FV, AIR FORCE RESERVE.
COL. WILLIAM H. LAWSON, xxx-xx-xxxx FV, AIR FORCE RESERVE.
COL. DAVID R. SMITH, xxx-xx-xxxx FV, AIR FORCE RESERVE.
COL. WILLIAM D. TRACY, xxx-xx-xxxx FV, AIR FORCE RESERVE.
COL. FRANK D. WATSON, xxx-xx-xxxx FV, AIR FORCE RESERVE.
COL. WALLACE W. WHALEY, xxx-xx-xxxx FV, AIR FORCE RESERVE.
COL. WALTER L. WINTERS, JR., xxx-xx-xxxx FV, AIR FORCE RESERVE.

IN THE ARMY

THE FOLLOWING-NAMED OFFICER FOR APPOINTMENT TO THE GRADE OF BRIGADIER GENERAL WHILE SERVING AS DEAN OF THE ACADEMIC BOARD, U.S. MILITARY ACADEMY, UNDER TITLE 10, UNITED STATES CODE, SECTION 4335(C):

To be brigadier general

COL. GERALD E. GALLOWAY, JR., xxx-xx-xxxx U.S. ARMY.

EXTENSIONS OF REMARKS

HELPING GORBACHEV DISCARD A BROKEN IDEA

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. CRANE. Mr. Speaker, one of the best ways for Mikhail Gorbachev to restructure his economy and improve the Soviet standard of living is to stop financing Communist revolution throughout the world. Cuba, Nicaragua, Ethiopia, Cambodia, Libya, and North Korea all receive large shipments of Soviet weapons and aid packages every year. The rubles used to produce this foreign-aid-to-dictators program could better be spent improving the lives of Soviet citizens by improving their economy at home.

Gorbachev has a staggering task before him—the restructuring of a failed centrally planned economy. If the Soviet Union continues to place a high budgetary emphasis on defense production and weapons exports, the Soviet economy will continue to lose vital capital necessary to rejuvenate domestic production and provide enough quality consumer goods for the Soviet population. If Gorbachev insists on financing foreign ventures, his heralded perestroika program may all be for naught, and the Soviet people will have lost their best chance in 73 years for a better way of life.

Mindful of this, I commend to your attention the following article entitled "Helping Gorbachev Discard a Broken Idea," by Richard Perle, from the November 20, 1989, issue of U.S. News & World Report.

[From U.S. News and World Report, Nov. 20, 1989]

HELPING GORBACHEV DISCARD A BROKEN IDEA

(By Richard Perle)

When Secretary of State Baker suggested the other day in New York that he is ready to give Mikhail Gorbachev a little technical assistance to help restructure the Soviet economy, I wondered what he might have in mind. Perhaps we could send a team from the Department of Housing and Urban Development to Moscow to help them with their housing shortage. Better yet, why not a group of savings and loan regulators to give the Kremlin a little advice on running a banking system? Baker was vague about how we might help perestroika, but he was clear in expressing the administration's hopes for its success. So what should we think?

Most important, we should be clear about what we mean when we say we favor perestroika and glasnost, by which Gorbachev hopes to encourage change. We do not mean blanket approval for everything the Soviets are doing.

Surely we don't mean to smile upon continuing Soviet arms shipments to Afghanistan, Cuba, Nicaragua, Ethiopia, Cambodia, Libya and North Korea. A policy of aid to countries that menace their neighbors while repressing their own people is hardly what we have in mind when we cheer for Gorbachev's reforms. Yet from the near empty coffers of a failing economy the Soviets, even under Gorbachev, have managed to find billions for six of the world's most unsavory regimes.

They have also managed to keep up massive investment (20 percent or more of their gross national product, more than three times what the U.S. spends) in maintaining their military power. That is not perestroika.

Recent signs that Soviet military spending may be declining are welcome. But the decrease has been insignificant so far. And it has been consistent with consolidation and modernization of a bloated military establishment.

BOOS AND CHEERS

It is right to applaud glasnost. Who isn't moved by the remarkable rejection of so much of the inhumanity of Soviet history that now appears daily in the Soviet press? But it is also right to boo and hiss when Soviet editors are fired or censored because someone has written something that is not to Gorbachev's liking. Or when political prisoners like Oleg Mikhailov, Alexander Goldovich, Bohdan Mimchak, Rusian Ketenchiyev, Leonid Lubman and others languish in the notorious Perm Labor Camp 35. That is not glasnost.

"O.K.," you say, "we don't approve of everything Gorbachev is doing, but he is trying to do the right thing and we want him to succeed." So what can we do to help?

First, we can help the Soviets understand that their system, a centrally controlled economy operating within a totalitarian state, is beyond repair. I was reminded of it the other day when the Sears repairman came to fix the family washing machine.

"Can it be repaired?" I asked. "Oh yes," the man said. "I can fix it up so it'll run for another year."

"And then?" I asked. "Then," he said, "you will have to get a new one."

The Soviets need a new economic, social and political system, not a repair job that will squeeze out another year or two before the machinery is reduced to scrap. That new system must be a market economy operating within a democratic, pluralist state. Anything less and it is bound to fail. As Baker put it in New York, "Freedom works! Communism doesn't!"

This seemingly gratuitous advice may not seem like much help, especially to those in Congress who keep telling the President that he is missing an opportunity by not doing more for the Soviets. But the damage the Soviets have done to themselves by building a society on a wrong idea, Communism, can only be reversed by doing away with that idea and replacing it with a good idea, capitalist democracy. If they continue to believe that tinkering, or even radical surgery, on the existing Marxist-Leninist system is going to be enough, they will fail for sure. When it comes to our helping perestroika, words can mean more than deeds, ideas more than cash.

Second, we can hammer away at the idea that curtailing military spending and aid to the dirty half dozen is fundamental to the success of perestroika. Gorbachev will never make it if he continues to ship desperately needed capital abroad to sustain regional conflicts. Jim Baker spoke in New York of "points of mutual advantage." Here is an important one: It is advantageous to us both if Moscow spends less to sustain regional wars and insurgencies. The same is true of its military spending.

So among the things we can do to support perestroika is to drive a hard bargain on regional issues and disarmament. This goes against the grain of those who believe we are helping Gorbachev when we abandon our negotiating positions and soften our demands.

Time is on our side. As things worsen in the Soviet Union, the pressure on Gorbachev to finance perestroika by reordering Soviet priorities away from adventures abroad and massive military spending will increase. We'll get a better arms-control deal a year from now than we can get today as the full scope of the failure of the Soviet economy comes to be understood by the opponents of perestroika.

And if circumstances change and the Soviets once again embrace military power as the solution to their problems, treaties signed hurriedly now will mean little then. Foreign Minister Shevardnadze's admission that the Soviets have been violating the Anti-Ballistic-Missile (ABM) Treaty for nearly a decade should remind us how vulnerable we are to treaty violations—and how little we do to respond to them.

So our consultants are not what Gorbachev needs. A few good ideas, vigorously argued and backed up at the negotiating table, are the best we can do.

TED AND CASEY DANSON, THE AMERICAN OCEANS CAMPAIGN, AND THE ENVIRONMENT

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. LEVINE of California. Mr. Speaker, people often wonder what they can do to help their communities and their country. I am pleased today to call attention to the accomplishments of Ted and Casey Danson, who have demonstrated that personal involvement is the best way to improve the quality of life in one's community and who have become leading voices in the campaign to protect our environment.

Mr. Danson is best known for his starring role in the television series "Cheers." He is also, however, the sponsor and cofounder of the American Oceans Campaign, a not-for-profit group working to preserve America's oceans and coasts. I have worked closely with the Dansons and American Oceans Cam-

paign since its formation and have been very impressed by the depth of their personal commitment to our environment and the effectiveness of the organization they have founded.

I am pleased to share an article from the Santa Monica Outlook, which describes the activities of American Oceans Campaign, its committed staff led by Bob Sulnick, and the Dansons. I commend it to the attention of my colleagues and ask them to join with me in recognizing the accomplishments of American Oceans Campaign and Ted and Casey Danson.

[From the Santa Monica Outlook, Jan. 21, 1990]

STARRING ROLE—IN FIGHT FOR ENVIRONMENT

(By Laura Accinelli)

In Hollywood, as elsewhere, money makes things happen. Sometimes it happens that a star is born. Sometimes it happens that an activist is made.

Sometimes both happen. The television hit "Cheers" made Ted Danson a star. It also made him an environmentalist committed at an unusual level—as unusual in Hollywood as elsewhere in the world.

Danson and his wife, Casey, had written checks here and there for assorted causes. He'd volunteered his time to help publicize issues, most notably for the group No Oil, which works against offshore drilling in Santa Monica Bay.

Then with the success of "Cheers" the Santa Monica couple came into a sack of dough—the sort of money you have to take seriously, said Danson. They decided to experiment.

"My wife and I sat down and decided we needed to focus all of our energy and time and money in one area to see how much of a difference we can make. The question was, how can we use money to make something happen?"

The answer was the not-for-profit American Oceans Campaign, created a couple of years ago in Santa Monica with the help of Robert H. Sulnick, an environmental lawyer who once served as president of No Oil. Today AOC is one of the few groups advocating nationally for the ocean.

It's evolved into one of the "key players" on environmental issues, said Rep. Mel Levine, D-Santa Monica. "Ted Danson is having an effect on public policy. He's helping demonstrate to Congress how strong public opinion is on these issues," Levine said.

REPUTATION . . . ON THE LINE

"This is something Ted Danson doesn't have to do. He's willing to put his reputation and resources on the line."

With a staff of seven including Sulnick, another lawyer and a Washington, D.C., lobbyist and three major programs directed against offshore drilling, driftnets (fishing nets up to 30 miles in length) and coastal pollution, AOC's budget this year hits half a million dollars. Ted and Casey Danson foot the bill for all of the organization's operating costs.

As a cause, the environment was a natural, said Danson. At heart, his message is that everyone must be involved.

"I don't think anyone can just not get concerned. It's no longer an option in life," Danson said in an interview on the Paramount lot in Hollywood. His unassuming production office is decorated with photos mostly from his film career and native American art (Danson also sits on the board of Futures for Children, which helps American Indian and South American kids stay in school).

"We're at risk of losing what our parents gave to us, and we may not be able to pass it on to our children," said the father of two daughters, ages 10 and 5. "We stand to lose a great deal on this planet. It's not even a '60s thing. It's something very real in our lives."

Meaning, he said, the sea and its resources are dying, assaulted by municipal and industrial run-offs, ocean dumping, oil spills, driftnets, helter-skelter shoreline development. The work of Danson's group is to publicize this plight and to foster a national policy for ocean protection.

AOC has been involved in fights on both coasts and in Alaska to institute moratoria on offshore oil drilling. It helped Alaskan fishermen after the Exxon-Valdez oil spill. It made a movie with the National Audubon Society on pollution threats to coastal waters. It wrote the ocean section of California's proposed environmental initiative. It worked with Levine and Rep. Barbara Boxer, D-Marin, to draft the National Ocean Protection Act of 1990, slated for committee consideration in February.

At that time, low-key, prosaic, earnest Danson will do his bit as a celebrity to garner attention and support.

"The public has already made up its mind that the environment needs to be restored and preserved. What Ted does is reinforce people's commitment, tell them how they can help and provide leadership," said AOC's executive director Sulnick, who left a tenured post at Loyola Law School and an environmental law practice to put all of his energy into the organization.

IS DANSON INFORMED?

As conventional wisdom goes, politicians have always loved movie stars, especially when it's campaign time. They know the value of a celebrity to draw cameras, reporters and crowds. After all, communication and enticing packaging is the business of Hollywood.

But can they really talk about the scientific and economic ins and outs of complicated environmental issues? Sure, Danson knows how to memorize a script, mix a drink and kiss Isabella Rossellini, but what does he know about toxic waste disposal and sewage systems and the needs of farmers?

Yet, lawmakers like Republican Rep. James H. Saxton, who worked with Danson to stop sludge dumping in the Atlantic Ocean, praise the actor for his knowledge.

"Ted Danson is well-respected. His name recognition is great. Everybody knows who he is. People watch 'Cheers,'" the New Jersey congressman said. "He is a tremendous help in promoting a cause, curing a perceptual problem, drawing attention to an issue. He also provides a positive impetus to people to do something about them."

If there was ever a credibility problem, it was Danson's own.

"Maybe because I'm an actor, or especially because I'm an actor, you first learn the issues in pep-rally terminology and sound bites. Then as you learn more and more, suddenly it's, 'Dear God, how complicated the situation is.' Who am I kidding?" said Danson. He often stops midsentence to ask if he sounds flaky.

"I had to get over this idea of who am I to do this. I'm 42, I have two kids, I live here. That's what gives me the right. That's what gives anyone the right."

SON OF AN ARCHAEOLOGIST

The son of an archaeologist attached to the Museum of Northern Arizona in Flagstaff, Danson says locals there didn't consciously rally "round the environment. Instead, they lived it, steeped in an appreciation of the out-doors, hopping on horses to take in the region's beauty.

It was at Stanford University that Danson "fell head over heels in love with acting" and missed the first round of consciousness many folks his age experienced. He left Stanford for Carnegie Technological Institute and concentrated on his acting career.

When the Dansons moved to Santa Monica a few years ago, they got a notice from No Oil, the group working to prevent Occidental Petroleum from drilling for oil along the Pacific Palisades coastline. The couple sent a check. They attended a talk by No Oil's Sulnick. About six people showed. Danson left a check. Eventually the Dansons became more and more involved in the issue. Along the way Danson and Sulnick became friends.

One night, on the way home from the Hollywood Bowl, the environmental lawyer and the TV year star conceived the idea for AOC. It was a powerful combination, and, Danson concurs, without Sulnick, there would be no American Oceans Campaign.

Today, he said, the group is just hitting its stride. It took a couple of years for it to discover its identify and for Danson to define his most effective role in it.

Admittedly, he felt noble at first, he said, "like a guy on a white horse charging into the fray." Now he feels overwhelmed by the depth of the problem and the time tug-of-war of family, career, political involvement.

EFFORTS AT HOME

All along it's been Danson and his wife, Casey, who sits on AOC's board of directors, too. The Danson household recycles, conserves water and uses no plastics or toxic cleansers. "We wanted to affect people and not be show-bizzy. We're not Hollywood. We're Earth-bound and family-bound and responsibility-bound," said environmental designer Casey Danson. "I guess that makes us boring."

The group's biggest problem is money, even with the large infusion of Danson cash. AOC also receives grants from the cities of Santa Monica and Los Angeles and such private funds as the Streisand Foundation and the Northern California CS Fund supporting ecological work. Still, each project requires several hundreds of thousands of dollars to launch effectively. A broader base of financial support is an immediate goal, said Danson.

"It's got to happen, or else it's not going to work. We've got to go way beyond what we put in," he said. "Otherwise, it's just an exercise in making Casey and me feel good."

The work does give him a great deal of satisfaction, he said. "We don't need to tell each other horror stories anymore. You don't feel victimized if you're part of the solution. It was a change for me. I don't want to feel like a victim anymore."

He predicts success on the tough battles against offshore drilling and driftnets. The hardest task ahead is to spur a national will to change people's approach to the planet, their day-to-day behavior. That's an amorphous notion for an organization to sell.

"We're all in this together—and that's a spiritual thought."

TRIBUTE TO THE CHILDREN'S EXPERIMENTAL THEATRE

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. PANETTA. Mr. Speaker, I rise today to pay tribute to the Children's Experimental Theater of the Monterey Peninsula on the occasion of the 30th anniversary of the founding of the institution.

The theater was founded by Marcia Gambrell Hovick, whose commitment and sacrifice, along with that of the entire staff, have made the Children's Experimental Theater a valuable asset to Monterey County and neighboring Santa Cruz and San Benito Counties.

For 30 years the Children's Experimental Theatre has provided a source of joy for both the many children who have participated over the years and for two generations of children and adults fortunate enough to have seen them perform. For the participants, the theatre has instilled a sense of self-esteem and confidence through discipline and study of the theater.

The students, from 6 to 18 years old, bring live theater to 25,000 elementary school children annually, free of charge. Through the theatre these children learn creative expression, speech, pantomime, and improvisation, as well as history, literature and social mores.

Mr. Speaker, I ask my colleagues to join me now in congratulating the Children's Experimental Theatre for its continued contributions to the people, and especially the children, of Monterey County and the surrounding area. It is with great pride and respect that I pay tribute to the staff and members of this fine institution.

UNITED REHABILITATION SERVICES, INC., COMPETITIVE SUPPORTED EMPLOYMENT PROGRAM PROVIDES VALUABLE JOB TRAINING TO DISABLED

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. KANJORSKI. Mr. Speaker, I rise today to pay tribute to the United Rehabilitation Services, Inc., Competitive Supported Employment Program [CSEP] in Wilkes-Barre, PA.

The United Rehabilitation Services was established as a result of the Wyoming Valley United Way's Community Services Study Commission report. It is a comprehensive vocational rehabilitation center providing services to the disabled adult population of northeastern Pennsylvania. With a daily enrollment of over 500 persons, this is one of the Nation's largest populations of handicapped persons under one administration.

One of its most successful programs, the Competitive Supported Employment Program, which serves Luzerne and Wyoming Counties in Pennsylvania, was designed to unite local businesses with adults who have severe disabilities and are seeking employment.

The staff of the CSEP is responsible for recruiting persons with disabilities who are anxious to become contributing members of society. In addition, the CSEP provides a comprehensive training program, beginning with one-on-one instruction. The disabled worker then begins on-the-job training which leads to working independently and assuming increasing responsibility. The CSEP staff continues with followup visits with the employee and the employer to ensure that both parties are satisfied and well-suited for each other. For many of these disabled people, this is a tremendous first step toward working and living as an independent and contributing member of society.

The CSEP Program provides employers with necessary personnel, and CSEP training reduces costs for the business. The CSEP Program is beneficial not only to businesses but also to the disabled individuals and the communities in which they live. For the disabled worker, this program and training provides integration into society. In doing this, the disabled individual becomes more self-sufficient and confident, willing to take on greater challenges. Finally, communities benefit because citizens who were once supported by society become contributing, tax paying residents.

The URS/CSEP can be proud of one of its most successful programs. It is important that groups such as this work to integrate disabled people into our communities. These programs help create a greater understanding about disabilities and that they can be overcome. I know my colleagues in the House of Representatives will join me in saluting the Competitive Supported Employment Program and the great work they have done.

ARTICLE ON MEDICARE CATASTROPHIC COVERAGE ACT FROM COLUMBIA JOURNALISM REVIEW

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. DONNELLY. Mr. Speaker, I am submitting for the RECORD today an excellent editorial from the Columbia Journalism Review on the misleading, inaccurate reporting surrounding the Medicare Catastrophic Coverage Act last year. This article points out that some of the reporters covering the debate over repeal of the Catastrophic Program had no idea of how the Medicare Program works or worked and were quick to assume that elderly opponents of catastrophic were the greedy elderly.

Of course, nothing could be further from the truth. This article points out that the elderly understood the program full well and opposed it for sound reasons. The article notes that most news reports on the Catastrophic Coverage Act "left out the essential information that the elderly * * * saw no reason to pay the surtax because most of them already had medical insurance." In fact, close to 80 percent of the elderly already had most of the benefits which the Catastrophic Program provided and they justifiably opposed the program and supported repeal.

Hopefully, on reading this article and reflecting on its message, reporters—especially television reporters—will realize that future news reports on controversial issues should provide a more balanced, intelligent insight to Americans:

NOT CATASTROPHIC BUT BAD ENOUGH

(By Jim Sibbison)

Angry men and women surrounded an automobile in Chicago last summer, and an NBC-TV news team was there. Many viewers will recall the scene: The men and women—all "senior citizens"—waved picket signs, pounded on the hood, and shouted at Representative Dan Rostenkowski, who sat stoically inside. He had angered them by sponsoring a new catastrophic health insurance law for the elderly that, among other things, called for a surtax on their income tax.

"The elderly," congressional correspondent Andrea Mitchell explained, "have been whipped into action by powerful lobbying groups. The result: millions of letters and postcards to Congress. They're not against the new benefits—unlimited hospital care, new at-home benefits, prescription drug coverage. They just don't want to pay for them."

Mitchell was by no means the only reporter to portray the millions of elderly who opposed a catastrophic-care surtax as would-be-free-loaders in league with powerful lobbyists. Many Washington reporters—quoting members of Congress or anonymous sources or simply expressing their own opinion—made the protesting elderly appear interested only in their own well-being. A survey of early coverage suggests that most reporters never understood those provisions of the law that caused the outcry—a failure that led to conspicuously unbalanced coverage of an issue that NBC's Tom Brokaw called "one of the most explosive issues of the year."

On June 17, 1988, two weeks before President Reagan signed the catastrophic health care bill into law, one journalist provided the kind of information that, for a long time, would be absent from coverage of the controversy surrounding this important piece of legislation. The journalist was L. Gordon Crovitz, assistant editorial page editor of The Wall Street Journal, a paper that has a somewhat unusual policy: editorial writers are expected to do their own reporting as they go about gathering the facts to support their positions. Crovitz talked to his contacts in the Reagan administration and was, he recalls, "stunned" by what they told him. In his unsigned editorial Crovitz reported that the legislation contained a massive tax increase for retirees sixty-five or older. The tax would pay for benefits that most of them already had from private insurance, former employers, or Medicaid, the government's low-income health insurance program. Starting in 1989, Crovitz noted, a retired person who paid an income tax of $150 or more would be obliged to pay a 15 percent surtax on his income tax—and this percentage would rise by 1993 to 28 percent, and was expected to go right on rising. In 1989 no individual would pay a surtax exceeding $800, but this ceiling, too, would rise. "The couple who pay $1,600 [in 1989] will pay an extra $2,100 a year by 1993," Crovitz wrote. "The Treasury estimates that, by 2005, couples will pay closer to $8,000 a year."

On the day after Reagan signed the bill, coverage by Washington-based reporters emphasized the benefits of the law but downplayed the costs and seemed unaware

that most beneficiaries would be getting duplicate coverage. The July 2 piece by Spencer Rich of The Washington Post was typical. Rich quoted Reagan as saying that the new legislation would protect the elderly from "a choice between bankruptcy and death," and in the final paragraph of his fourteen-graph piece he gave the surtax the following brushoff: "The law will be financed by increasing the Medicare monthly premium and by imposing an annual 'income-based' supplemental premium on the two-fifths of the elderly with the highest incomes." Rich made no mention of duplicate coverage and his shorthand summation of the law was misleading: while it is true that more than two-fifths of the elderly would be paying for the program, this group included people with incomes as low as $13,000—which is hardly suggested by the phrase "highest incomes."

Following a spate of early-July coverage, the subject was more or less dropped—by the press, if not by the lobbying organizations. The biggest of the "elderly lobbies," the American Association of Retired Persons, backed the bill. While AARP officials conceded that a new funding formula was needed, they insisted that the legislation would provide essential benefits to "the oldest, the poorest, and the sickest." The National Committee to Preserve Social Security and Medicare, on the other hand, opposed the bill. Two of the main points made in the National Committee's mailings were that the surtax could be expected to rise steadily over the years and that the reason the surtax was high was that only the elderly were paying it. This, the committee said, was comparable to taxing only the parents of schoolchildren for public education or only veterans to pay for veterans hospitals. That's when retired people started raising hell and sending off those millions of letters and postcards to Congress.

The response of the bill's principal sponsors—Representative Fortney "Pete" Stark of California and Senator Lloyd Bentsen of Texas—was to attack the protesters. Bentsen was quoted in The Washington Post as saying at a January 1989 press conference, "What you have is wealthier people not wanting to pay the additional premium." And then there was Representative Rostenkowski who, on October 4—the day the House repealed the bill—assailed the "wealthy few." The term was never defined, but presumably any retired person with an annual income of $36,000 or more was to be considered wealthy. (It is that group that would pay the maximum surtax of $800 per person during the first year of the program.)

The rich-versus-poor story played well on network television. On ABC, CBS, and NBC the "rich" were never sick. Viewers were shown footage of robust, smiling elderly men and women playing golf or working out in exercise classes. The poor were always in a hospital or nursing home, some walking slowly with the aid of a walker, others being pushed in wheelchairs.

People who opposed the surtax had to be rich. If they weren't, they were made to look so. Thus, for example, one seventy-two-year-old widow who opposed the tax was shown playing golf, and using a golf cart to get around the course. She certainly wasn't rich, though: her annual income—as ABC correspondent Sheilah Kast explained on the September 18, 1989, World News Tonight—was $20,000, and her starting surtax would be $350. She already had private insurance, the widow said, so "catastrophic care, as far as I'm concerned, will give me nothing, except that I have to pay for it."

The Stark-Bentsen attitude toward the protesting retirees was reflected in the print press as well. These elderly people were, it seemed:

Spoiled—In late November 1988, Martin Tolchin of The New York Times explored the possibility that the elderly "might be taking more than their fair share [of government benefits], depriving their children and grandchildren." An accompanying photo showed two elderly men in swimming trunks happily posing for the camera at that favorite playground of the retired rich, Miami Beach. Tait Trussell, a Florida-based syndicated columnist and former member of The Wall Street Journal's Washington, D.C., bureau, examined the evidence and came to the conclusion that the government was "soaking" the elderly. "Ironically," he wrote in the Leesburg, Florida, Daily Commercial, "while most Americans have been the beneficiaries of tax relief in recent years, older Americans have been slapped with three increases." In 1983, he explained, Social Security income became taxable; then, in 1986, some changes in the regulations increased the income tax of the elderly; and, finally, in 1988, there came the catastrophic-care surtax.

And selfish—Jodie T. Allen, The Washington Post, October 11, 1989: "October 4, 1989 [the date the House repealed the surtax] may be remembered as the day we finally admitted, right up front, that we don't care very much about each other. At least not enough to pay each other's medical bills. . . . While the elderly were glad to accept a nice new benefit, they, or at least the most vocal among them, were not ready to have to pay for it. . . ." This is the old charge that leaves out the essential information that the elderly protesters saw no reason to pay the surtax because most of them already had medical insurance.

Some reporters gave the protesters a more sympathetic hearing. Mike Causey of The Washington Post described some of the nasty surprises contained in the bill as far back as January 1989 in his column about federal employees. Robert Rosenblatt of the Los Angeles Times was another reporter who did not automatically dismiss the protesters' case; an aide to Senator Pete Wilson of California told Rosenblatt that "there is a genuine out-pouring of grass-roots opposition" to the bill.

What reporters like Tait Trussell were saying—and what Washington reporters seemed reluctant to face up to—was that there was something wrong with the law, not with the elderly protesters. Many members of Congress were openly admitting as much during the debate that preceded repeal in early October. One such congressman was Representative Brian Donnelly of Massachusetts, who told his colleagues: "What we did not see a year ago, those of us who were authors and conferees. . . . were the fatal flaws that thirty-two million beneficiaries saw. . . . The real fundamental flaw in this legislation is that over half the beneficiaries already had some or all of the coverage. They had already paid for the coverage before we came along and said to them, 'You take this coverage even though you already have it, and you pay an additional fee.' They objected to that, and rightly so."

That simple insight—so clear early on to so many elderly people—seemed beyond the reach of many reporters.

CALL FOR DEFENSE CUTS URGED BY MASSACHUSETTS PEACE GROUPS

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. MARKEY. Mr. Speaker, yesterday a coalition of Massachusetts lawmakers and peace groups called on Congress to cut President Bush's proposed defense budget and redirect this funding to meet urgent domestic spending needs. I applaud their initiative in calling attention to the misplaced priorities in the President's proposed budget. With the end of the cold war, it is time we extracted a substantial "Peace Dividend" from the Pentagon and reinvested it in programs and activities that will enhance America's economic strength.

I would like to call to my colleagues' attention an article which appeared in the Associated Press wire service today which reports on the press conference this coalition held yesterday in Boston:

MASSACHUSETTS PEACE GROUPS CALL FOR DEFENSE CUTS, DOMESTIC SPENDING HIKES

(By Daniel Beegan)

BOSTON.—Congress should trim President Bush's proposed military budget and redirect the money to domestic programs, peace groups and some Democratic state officeholders say.

Secretary of State Michael Connolly told a news conference Tuesday the federal government should revive revenue sharing to cities and towns and states and use money that formerly went for military troops and hardware to pay for it.

"It is a real problem how they are spending our money in Washington, D.C., and it is creating real problems for us here in Massachusetts," Connolly said.

Kevin O'Connell of the peace group Massachusetts SANE-Freeze said the easing of tensions between Eastern Europe and Western Europe no longer justify a military budget in excess of $300 billion a year.

"This administration continues to go along the same path as if none of these changes had happened," O'Connell said.

He said the military spending practices of the Reagan and Bush administrations had led to cuts in domestic programs that have cost Massachusetts billions of dollars in federal aid.

"Obviously this is a great part of our state fiscal problems," he said.

O'Connell called for a 10 percent cut in military spending this year, leading to an eventual 50 percent reduction in defense spending over five years.

"Transfers should go to civilian needs, not to tax cuts for the rich," he said.

Several Democratic legislators joined in the call for lowered defense spending and increases in federal aid for social programs.

Rep. David Cohen, D-Newton, advocated a bill he filed to help businesses, especially smaller companies, convert from military-related products to consumer goods.

Rep. Barbara Hilt, D-Amesbury, said the Bush budget is unrealistic in the current era of eased tensions between the United States and the Soviet Union.

"The budget that President Bush has released is a fantasy budget. It is not relevant to the real world," she said.

When, and how deeply, defense spending should be cut is expected to be a major issue as Congress opens debate on the Bush budget.

Bush and his defenders have argued that while growth in military spending can be curtailed, defense cannot be cut too deeply because of the uncertainty of change in Eastern Europe and the fact security threats don't just come from the Soviets and their allies.

HUNGER IN AMERICA: AN URGENT NEED FOR RELIEF IN OUR NATION

HON. TONY P. HALL
OF OHIO
IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. HALL of Ohio. Mr. Speaker, in recent years, Congress has developed a network of programs designed to assure that all American citizens have access to a nutritious diet. Nevertheless, hunger and malnutrition remain prevalent, as documented in numerous reports which confirm the seriousness of the problem. Hunger strikes millions of American citizens annually and continues to affect our society as a whole. As chairman of the Select Committee On Hunger, I feel it is our responsibility to monitor the efficacy of these programs. Our Nation has more than enough resources to provide all Americans with an adequate diet. However, Mr. Speaker, the Food Stamp Program, the WIC Program, and other food security programs must be updated and modified, and made to better respond to the needs of the populations they are designed to serve.

I would like to share with the House an article by Robert J. Fersh, the executive director of the Food Research and Action Center, which appeared in the January 1990 issue of Focus magazine. This article clearly illustrates the magnitude of the hunger problem in America, and the inadequacy of various programs in providing relief to malnourished low-income people. I urge my colleagues to investigate this issue in greater detail.

[From Focus, January 1990]

HUNGER IN AMERICA: A NATIONAL SHAME THAT CAN BE ENDED

(By Robert J. Fersh)

Beneath the daily newspaper headlines and past the claims of prosperity, one can hear these voices across the country:

"The children always had something to eat. Sometimes I didn't."

"For two and a half days in November I had nothing to give them."

"I had three apples one day. The next day I let the kids eat the lettuce."

"We eliminate fresh fruit and vegetables and cut down on milk."

"We have people lining up at 7 a.m., to get food bags at 1 p.m. and we are out of food by 2:30. And this is an area that is supposed to be in good shape economically."

Too many Americans believe that hunger exists only in Third World countries like Ethiopia or the Sudan. But hunger also strikes millions here at home. In this country, we do not see the distended bellies and emaciated frames of starving children that are a common sight in less developed nations. Here, hunger's victims are sick or malnourished children failing in school because they cannot concentrate; they are undernourished mothers giving birth to weak and sickly babies; they are senior citizens, living on fixed incomes, whose inadequate diets leave them vulnerable to premature death from pneumonia.

A preponderance of evidence confirms the pervasiveness of hunger in the United States today. The U.S. Conference of Mayors and dozens of other organizations report that the demand for food at private soup kitchens and church food pantries has reached levels unmatched since the Great Depression.

These reports are consistent with what official government statistics on poverty tell us. According to the latest Census Bureau data, 31.9 million Americans, or 13.1 percent of the population, live in poverty. Nearly six million more people live in poverty today than at any time in the 1970s, including recessionary periods. The poverty rate for blacks, at 31.6 percent, is three times that for whites. And perhaps most alarming of all, the highest poverty rates are among children. One in five American children is poor, including nearly half of all black children under age six and over 43 percent of all Hispanic children in that age group.

Indeed, the poor are getting poorer. Nearly 40 percent of those in poverty today have incomes below half of what is considered a poverty income—the highest proportion in 15 years. When one considers that the government defines the poverty line based upon the ability of a household to afford a minimally adequate diet, it is clear that anyone living below the poverty line faces a real risk of going hungry.

These conditions have been confirmed by the preliminary results of a major research survey conducted by our organization, the Food Research and Action Center (FRAC). Our survey, the Community Childhood Hunger Identification Project, or CCHIP, is the centerpiece of FRAC's campaign to end childhood hunger. CCHIP was developed by the Connecticut Association for Human Services with the help of child health researchers, nutritionists, and survey methodology experts during the mid-1980s, largely in response to the Reagan administration's repeated attacks on the methodology of hunger reports coming out at that time. The survey is now being conducted in nine states across the country.

The first statewide CCHIP survey, conducted in three Washington State sites (Pend Oreille County, Seattle, and Yakima) during the winter of 1987-88 by the Governor's Task Force on Hunger, painted a grim picture. In Washington State, the survey of 789 low-income urban and rural families revealed that up to 40 percent of lower-income families with children were experiencing severe monthly food shortages. Children from hungry families were more than twice as likely as other children to suffer from fatigue, headaches, inability to concentrate, and unexpected weight loss, and were more likely to have higher rates of school absenteeism.

These results are consistent with the results of the original 1987 CCHIP pilot survey in New Haven, Connecticut, and with the results from Minnesota released in January 1990. FRAC conservatively estimates that if these findings turn out to hold true nationwide, two to five million American children currently face severe hunger, and eight to 10 million American children are at risk of hunger.

OUR NATION HAS MORE THAN ENOUGH FOOD

One reason the hunger problem is so tragic is that much of it could be resolved quite rapidly with resources already available. We possess more than enough food to provide all Americans with an ample diet. The United States is fortunate to have an infrastructure of federal food-assistance programs capable of meeting the needs of most of those at risk. These include the Food Stamp Program; the Special Supplemental Food Program for Women, Infants and Children (WIC); the National School Lunch and Breakfast Programs; the Summer Food Service Program; the Child Care Food Program; and the elderly feeding programs.

In recent years, admirable and even heroic work has been done by privately operated food banks and soup kitchens to meet the burgeoning hunger problem. But, even though these programs are necessary to address short-term emergency needs, those who operate them have stated repeatedly that emergency food is inherently too unreliable, inconsistent, and limited to ensure even a minimally adequate diet over the long terms for the millions of Americans who face chronic hunger. To put it another way, a thousand points of light do not hold a candle to well-managed and adequately funded public programs. Federal nutrition programs are the key to a long-term solution because they offer people food security—the ability to buy food through normal channels.

The main argument for not improving these programs and stamping out domestic hunger is a financial one—that priorities must be set for government spending in the face of the budget deficit. Yet total spending on food assistance only makes up about two percent of the federal budget. The needs of the hungry are modest compared to expensive military weapon systems and other budgetary demands. This year, Congress will have the opportunity to attack hunger by improving two critically important nutrition programs, food stamps and WIC (the program for Women, Infants, and Children).

THE FOOD STAMP PROGRAM

The Food Stamp Program, established in 1964, will face reauthorization by Congress this year for the first since 1985. This program, the nation's single best line of defense against hunger, serves about 19 million people a month at an annual cost of about $15 billion. About half of all participants are children. Senate Republican leader Robert Dole, a long-time champion of the program, has called it "the most significant federal social legislation since Social Security. It has more impact and does more good than any other program."

During the Food Stamp Program's 1981 reauthorization and again in 1982, the Reagan administration and the Senate Agriculture Committee's then-chairman Sen. Jesse Helms (R-N.C.) convinced Congress to slash its budget. The Congressional Budget Office has since estimated that the program was cut by $7 billion (or 13 percent) between fiscal years 1982 and 1985.

Although these losses have been partly recouped since the mid 1980s, the Food Stamp Program today has two major defects: benefits remain woefully inadequate and participation is low. Despite a recent modest increase, the maximum benefit for families with no outside source of income or food re-

mains about 90 cents per person per meal. Average benefits are far lower. Moreover, recent studies by the General Accounting Office (GAO), the Congressional Budget Office, and the U.S. Department of Agriculture (USDA) conclude that only 40 to 60 percent of eligible households are participating. Since 1980, average participation has actually declined by one million persons, while during the same period, poverty has grown by almost three million persons.

Various studies show that this decrease in participation cannot be explained solely by the 1981 cutbacks. Several GAO reports indicate that when the Reagan administration raised a series of barriers to participation—ostensibly to eliminate waste, fraud, and abuse—millions of eligible people were wrongly denied their benefits and discouraged from applying. Application forms for food stamp benefits run as long as 40 pages in some states and frequently require advanced reading skills. The cumulative effect is that access to food stamps, which was never easy, is even more difficult now.

With the Food Stamp Program up for reauthorization this year, the time is ripe for Congress to expand this essential program's benefits and ease access. In addition, several of the program's features need to be eliminated, including those that contribute to homelessness by limiting the deductions families can claim for high shelter costs and by reducing benefits for relatives forced to live together to afford housing; those that discourage lower-income youth from attending college by eliminating benefits unless they work at least 20 hours a week, even if they are searching for work; and those that discourage absent fathers from providing child support by counting all such support as income to the mother, thereby reducing her family's food stamp allotment.

Several key congressional leaders have indicated that they hope to introduce a bill early this year to address many of these issues, as a memorial to the late Rep. Mickey Leland. While Congressman Leland's death is a great loss for the anti-hunger movement, there is hope that Congress will enact such legislation as a fitting tribute to him.

THE WIC PROGRAM

As it does every year, Congress also will renew funding for the WIC program in the FY 1991 appropriations process. WIC provides nutritious supplements to pregnant and post-partum women and to infants and children up to age five. A multitude of studies, including a major report funded by the USDA, attest to WIC's effectiveness in averting low birthweight and infant mortality and in encouraging lower-income women to receive prenatal care from existing health services. This is an indispensable program for the United States, which ranks 19th in the world in infant mortality (behind practically all industrialized nations) and has a black infant mortality rate double that for whites.

In June of this year, FRAC issued a study under the title, "Feeding the Other Half: Women and Children Left Out of WIC." The study documents that only about half of all those eligible for WIC are being served, and that for children ages one to five the participation rate is below 40 percent. The primary reason for these dismal rates is insufficient federal funding. Real increases of only five to seven percent over the next five years (or roughly a $150 million increase each year) would likely make WIC benefits available to all who are eligible and wish to participate. Congress can take additional steps to strengthen other child nutrition programs and the several programs that provide food for the elderly.

Fighting domestic hunger cannot be a short-term, band-aid effort. Hunger has permanent effects, and working to end it, especially among children, is an investment in the future. Infants of well-nourished mothers are healthier and less likely to require expensive medical care. Well-fed children are better able to learn and more likely to become productive members of our society. Adults too are more productive if they are well-fed rather than hungry. For these pragmatic reasons, and even more for humanitarian reasons, it is essential that America make a bigger investment in the development and well-being of its own people.

THE PLO AS AN IMAGE MAKER

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. CRANE. Mr. Speaker, Israel is a small nation, surrounded by the sea and hostile neighbors many times its size. Yet recent television coverage seems to paint Israel as the oppressor and aggressor in the region. This coverage is the product of a Palestinian propaganda campaign, a slickly packaged advertisement for the PLO's agenda. Far from the conciliatory overtures accepted by former Secretary of State George Shultz, the PLO's goals appear to remain the same as they always have—to eliminate the State of Israel.

Israel is one of our staunchest allies and our most dependable friend in that troubled region. Our two nations share a relationship that stretches back to the birth of Israel in 1948. We must always remember that Israel is constantly threatened by enemies much more numerous than she, threatened by irregular forces from within as well as by powerful armies from without. We must not allow this central fact to be obscured by transient propaganda as we strive to create a lasting peace in the Middle East.

With this in mind I commend to your attention the following article entitled, "The PLO as an Image Maker," by Mortimer B. Zuckerman, from the January 22, 1990, issue of U.S. News & World Report.

[From U.S. News & World Report, Jan. 22, 1990]

THE PLO AS AN IMAGE MAKER

(By Mortimer B. Zuckerman)

The American people are being brainwashed. It has been a long and subtle process, principally through the medium of television. Now, the consequences are discernible: The public mood is being conditioned to accept actions that would jeopardize the national security of the democratic state of Israel.

Secretary of State James Baker will bridle at this description of his policy, but that is what it amounts to when, in his most important speech on the subject, he apparently abandons the essential condition of U.N. Resolution 242, that there should be a settled, secure peace with the other states in the region before Israel is asked to withdraw from the West Bank and Gaza. How Israel's oldest ally has come to this point is a paradox of the electronic era. Cordell Hull, in the age of print, observed that a lie goes halfway around the world before truth has time to get its trousers on. With television today, truth never catches up with half-truth.

This is not a deliberate plot but happens because TV venerates action and inflames emotions. It has little time or patience for context, for history and character. Forgotten is the history of Israel as a small, beleaguered, newborn state of refugees being attacked by its larger Arab neighbors. Syria, Egypt and Jordan were then seen, correctly, as the bullies trying to liquidate a state that had provided sanctuary to the survivors of the greatest liquidation the world had known. Israel was the liberal democracy resisting feudal tyrannies, a gallant repository of moral right.

Turn on your TV's and contemplate the stories on the Middle East today. They are not framed in terms of the survival of Israel, nor of the security of the states of that region, but of self-determination for the Palestinian Arabs. It is Israel that is seen as the bully, the colonial military power oppressing the underdog. The pictures are monotonously familiar. There are the occupier and the occupied, the soldier and the child, the well-dressed Israeli and the tattered Gaza refugee, the cocky Tel Aviv politician and the homeless Arab. The questions the images imply are natural emotive reactions: "Why doesn't Israel do something for these people? Wouldn't you hate the Israelis if you were a displaced Palestinian? Surely, America should do something for the victims of Israeli arrogance?"

The images of the *intifada* have transformed the perception of Israel, and of reality, because the Arabs have succeeded brilliantly in shifting the ground of debate. They no longer present themselves as trying to destroy Israel, but as merely trying to secure the rights of a small minority of dispossessed Palestinian Arabs. The map has shrunk to the lethal alleys of Gaza and the West Bank. Arab states the physical size of the United States encircle and threaten Israel (which is smaller than New Hampshire), but you would never guess that from the nightly footage. The Arabs have a population advantage of 50 to 1, and larger armies, but because of the knee-jerk focus of the cameras it is not the Jews who are seen as threatened. It is the Arabs. The focus has shifted from national security in the region to human rights—that is, Israeli violations of Palestinian rights and not the human rights of a people under siege in their homeland for 40 years.

How did the Arabs, with the unwitting aid of TV, accomplish this reversal? By presenting the Palestinian Arabs to the world as if they were Jews. The cycle of cynicism is instructive. Using the U.N. as their pulpit, they accused the Jews of racism for denying Arabs their rightful place in the Middle East, bringing about an Arab-inspired U.N. resolution defining Zionism as a "form of racism." Having refused a Jewish state in what they consider an exclusively Arab and Moslem region, they accused Israel of refusing to accept Arab people in that region. Having mounted successive wars against Israel, they accused it of aggression for defending its territory against attack. Having constrained their fellow Arabs in refugee camps so that they could be used to increase the pressure on Israel, they defined Israel's Law of Return, which gave impoverished, abandoned Jewish refugees a home, as a racist plot.

Vice President Dan Quayle recently put this U.N. Zionism-as-racism resolution in its appropriate context. Its purposes, he said, were quite simple: "First, to delegitimize the state of Israel. . . . Second, to provide anti-Semitism—thinly disguised as anti-Zionism—with the appearance of international approval and respectability." The attempted delegitimization of Israel is the ideological expression of Arab refusal to accept a Jewish state in the Middle East. Talk about the big lie: The Arabs have sought to place the blame for their own rejectionism on the Jews of Israel. Blaming Israel means the problem is potentially soluble because Israel can be coerced or persuaded to give up land so that there will be peace. Forgotten is the long history of Arab violence toward Jews that began a century ago and continues to this day, a condition that has resulted in 1 of every 7 families in Israel with at least one relative killed or wounded over the years.

For Israelis, the basic fact is that the Palestinians are waging a war, no less a war for being pursued by teenagers and women who are being put out front by the Palestinian opposition to throw rocks and gasoline bombs, at little risk, given the relative restraint of the Israelis. Tear gas, curfews, demolition, detention and deportation are less onerous than massive shootings and deaths by which the Arab states suppress their own insurrections. Israel is portrayed as immoral for thus acting in self-defense, but no country faced with comparable threats, internal and external, has ever accorded the human rights to those who oppose it as Israel has to Palestinians during the intifada.

To insist on moral perfection is not a higher standard, but a double standard. Yes, if Israel proves to be 10 percent ethically superior to the rest of the world, it will be a "light unto the nations." Yes, if it proves to be 25 percent superior, it will bring the Messiah. But if it is 50 percent better, it will be dead.

The menace is as great as ever, despite Yassir Arafat's new user-friendly image and the PLO's so-called dialogue with America:

Witness the 30 PLO attacks against Israel since Arafat supposedly renounced terrorism in December, 1988.

Witness the PLO acts of terrorism against West Bank Palestinians to prevent local leaders and public figures—euphemistically called collaborators—from moving in the direction of peaceful dialogue with Israel. One hundred and forty have been killed in a year, many by the "Revolutionary Eagles" under explicit PLO instruction, as a warning not to deviate from the PLO's line. How can the Israelis trust the PLO if the Palestinians who cooperate in any way with Israeli authorities are executed as traitors?

Witness the recent statement of the Grand Mufti of Jerusalem, Sheik Sa'ad al-Din al-Alami, who was quoted in a Kuwaiti newspaper repeating a famous Islamic hadith: "Kill the Jews until the stone shall cry, 'Oh, Moslem, if this Jew is hiding behind me, come and kill him.' "

Witness Farouk Kaddoumi, head of the PLO's political department, in a BBC interview last April: "The rifle will remain in our hands until we regain our land. . . . We will pitch our tent in those places which our bullets can reach. The extent of the Palestinian people's might will determine the location of this tent, which will then form the base from which we will later pursue the next phase."

Witness Mr. Kaddoumi in the Danish newspaper Politiken, responding to a question on Arafat's public declarations of renouncing terrorism and recognizing Israel. Q: "Does this mean that the words that made Shultz begin a dialogue are null and void?" Kaddoumi's answer: "Shultz can go to hell. I suppose he is already on his way there."

Witness on April 23, 1989, a PLO march through one of the West Bank towns. There, in perfect military formation, row after row of Palestinian youth, their eyes showing through the slits in their checkered kaffiyehs, marched through the streets under PLO flags to the cheers of their community. This was the new Palestinian army. These are not the children of the intifada throwing rocks, but a disciplined paramilitary force. To the Israelis who watched it on Israeli TV, this is the enemy in their next war.

Appropriate weight must be given to what the PLO leadership has said in Arabic to its own people—namely, that any territorial settlement achieved through the intifada will be used as a staging ground for future attacks on Israel. So Israel's presumption that the Arabs are trying to destroy it and not just free the West Bank is the proper policy guide. Israel remains a country that will be wiped out if it loses a war.

MAYOR SARANN KRUSE STEPS DOWN

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. LEVINE of California. Mr. Speaker, I rise today to recognize the achievements of Sarann Kruse, mayor of the city of Lawndale, CA. Mayor Kruse recently announced that she would be stepping down from the post she has held for nearly 14 years.

When she was elected to the city council in 1976, Mayor Kruse became the first woman on the council. After 8 years with the city council, she became the city's first elected mayor in 1982.

During her tenure with the city government, Lawndale has witnessed a tremendous increase in vitality. Perhaps her greatest achievement comes from her role in securing funding for the Galleria at South Bay. The mall has been a great success and has brought new businesses to the city. In addition, when the city sold its stake in the mall last year, the small city became one of the most cash-rich in the State, enabling it to continue to improve community services for years to come.

Although the Galleria was certainly the largest project in which the mayor was involved, it was by no means the only one. Thanks to Sarann Kruse's leadership, the city of Lawndale is able to provide free city bus service to its residents, has significantly expanded its services for senior citizens, and has obtained funding for a handy worker program.

The city has changed dramatically under her leadership, and, hopefully, will continue on the path which she has laid out for it. Mayor Kruse's decision to step down in the fall will be a great loss to the city of Lawndale. Those of us who have worked closely with her will miss her.

Mr. Speaker, I ask my colleagues to join me in congratulating Sarann Kruse on her outstanding career in public service, and in wishing her the best success in her future endeavors.

PAY-AS-YOU-GO BUDGET PROCESS REFORM

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. PANETTA. Mr. Speaker, today I am introducing budget reform legislation that would establish a rational and effective pay-as-you-go process to replace the current Gramm-Rudman law. If my proposal were enacted now, it would balance the Federal budget, without counting the Social Security surplus, by 1998, or years sooner if the administration's economic forecast proves accurate.

My proposal—the Budget Process Reform Act of 1990—would use a relatively simple formula which would produce both 1-year and long-term deficit reduction and require new spending increases or tax cuts to be paid for by either offsetting spending cuts or tax increases.

Between now and 1993, the process would achieve real deficit reduction of at least $28 billion annually, about the same rate as required by the Gramm-Rudman law, and significantly more real deficit reduction than has actually been achieved under Gramm-Rudman. After 1993, it would reduce the remaining non-Social Security deficit at a rate of about $18 billion each year until a balanced budget is achieved.

As my colleagues know, Gramm-Rudman law was designed to overcome the political deadlock over the deficit issue. Unfortunately, it is no longer part of the solution; it is part of the problem. It encourages accounting gimmicks and tax and spending measures which may cost little or even reduce the deficit in the short run but whose costs balloon in later years. Finally, and most significantly, it has produced little real deficit reduction.

I think my colleagues agree with me that we need to encourage budgetary discipline so that we can truly reduce deficits and restore this Nation's resources. If we do not, we will never be able to confront the serious long-term problems we face as a nation.

Pay-as-you-go will provide that discipline. The message it sends to both the President and Congress is simple and clear. If we want to increase spending or cut taxes, then we'll have to find a way to pay for it.

The basic principles of the pay-as-you-go plan are: First, most programs are assumed to be held to the previous year's level, without adjustments for inflation; second, the deficit declines because revenues continue to grow due to economic growth while spending is restrained; third, program increases beyond the previous year's levels or tax measures which would reduce revenues must be paid for with offsetting spending cuts or tax increases.

The measure establishes a new budget timetable and eliminates many of the accounting gimmicks that have prevailed under Gramm-Rudman. It also replaces sequestration—the across-the-board spending cuts that

Gramm-Rudman imposes as an enforcement tool—with rules that prevent consideration in the House and Senate of any budget resolution that violates the pay-as-you-go limits and any bill that violates an approved budget resolution.

My bill also requires that budgets reduce deficits over a 5-year period, not just 1 year, to discourage spending and revenue measures which provide short-term savings while imposing substantial long-term costs.

Under the bill, the first step in writing a budget for the following year would be to establish an expenditure base tied to the previous year's program levels. The spending base would be calculated by taking the amount needed to maintain current services and subtracting the inflation increases for most programs.

With annual inflation at 4 percent, the resulting spending base would be about $18 billion less than the current-services baseline.

The revenue base would be the amount of revenues expected to come into the Treasury under current tax laws.

Social Security taxes and expenditures would not count as part of these calculations.

The difference between the spending base and the revenue base would be the deficit target, and the deficit in the President's budget could not exceed that target. Any proposed spending increase above the spending base or any tax measure that would reduce expected revenues would have to be specified and paid for with offsetting spending cuts or tax increases. The congressional budget resolution would also have to meet the deficit target, with offsetting revenues or spending cuts included where necessary.

In addition to the first-year deficit reduction, the President's budget and the congressional budget resolution would also be required to include deficit reduction over 5 years averaging 120 percent of the first-year requirement.

Both the President and the Congress could reduce the deficit further than the deficit target.

The pay-as-you-go budget plan would be enforced in the House and Senate through points of order. Essentially, a budget resolution which violated the pay-as-you-go rules and appropriations, entitlement, or tax bills which violated the budget resolution would be subject to a point of order on the House or Senate floor.

Economic assumptions, such as those involving economic growth, inflation, and interest rates, which affect congressional budget calculations would be based on forecasts provided by the Congressional Budget Office.

The bill would also establish a new budget timetable. The congressional budget resolution would be completed by May 1, budget reconciliation would be accomplished by August 5, and separate House and Senate action on appropriations bill—though not necessarily final conference reports—would also be completed by August 5.

Shifts of pay dates, other timing shifts, and asset sales that have been used by the President and the Congress to reach the Gramm-Rudman deficit targets would not be counted in budget calculations.

Pay as you go is simple, it eliminates smoke-and-mirror gimmicks, and it provides real deficit reduction. It is my hope that the Rules and Government Operations Committees will begin the process of holding hearings on my proposal at the earliest opportunity.

Following is a point-by-point description of the Budget Process Reform Act of 1990:

SUMMARY OF THE BUDGET PROCESS REFORM ACT OF 1990

DEFICIT REDUCTION

Pay-As-You-Go-Plus requires about $28 billion of deficit reduction annually through 1993.

After 1993, the basic Pay-As-You-Go plan requires about $18 billion of deficit reduction per year until the operating budget is balanced.

PAY-AS-YOU-GO BUDGET PROCESS

Establishes an enforceable budget process which sets one-year and five-year deficit targets for the President's budget and the Congressional budget.

The deficit targets are set by calculating the difference between expected revenue levels and last year's spending levels for most programs.

Any additional spending or tax cuts which would increase the deficit must be paid for by spending reductions or tax increases.

Targets are enforced through points of order under a strengthened Budget Act, not by sequestration.

The Social Security Trust Fund is off budget and not included in the pay-as-you-go deficit target nor subjected to pay-as-you-go spending restraint.

DEFICIT TARGET

The deficit target for the coming year (budget year) calculated as follows:

(1) The deficit for the budget year may not exceed the difference between the spending base and expected revenues. Pay-As-You-Go reduces the deficit by an additional $10 billion in each year through 1993.

(2) A "spending base" is established to determine a projected level of spending for the budget year. The spending base is calculated by taking a current-services baseline similar to that used now and subtracting from it the inflation increases for most programs. When inflation is about 4%, the resulting spending base should be about $18 billion less than the current services baseline.

(3) Determine expected budget year revenues under current law.

(4) Congress must use CBO assumptions in determining the spending base and expected revenues. (The President may use OMB assumptions.)

PRESIDENT'S BUDGET

The President's budget must specify each spending increase above the spending base and each tax measure that would reduce expected revenues, and specify each offsetting spending cut or tax increase.

MULTI-YEAR ENFORCEMENT

In addition to the one-year deficit target, the President's budget and the Congressional budget resolution must meet a five-year deficit-reduction target.

Deficit reductions over the next five years, computed from the current services baseline, must average at least 120% of the first-year deficit reduction. Thus, if the first-year figure is $28 billion, the five-year total is based on an average of almost $34 billion each year, or about $168 billion over five years.

Five-year reconciliation targets are required for all assumed deficit-reduction legislation in the budget resolution (except discretionary appropriations).

TIMETABLE

A revised budget timetable is established: the budget resolution is to be completed by May 1; the House is to pass appropriations bills by June 30; the Senate is to pass appropriations bills by August 5, and Congress is to complete action on reconciliation by August 5.

TRUTH IN BUDGETING

Timing shifts and asset sales are not scored.

Other accounting rules and definitions are revised, clarified, or added to make the process more rational and comprehensible.

The budgetary treatment of credit programs is reformed to reflect more accurately the true cost of credit programs to the federal government.

EFFECTIVE DATE

The Budget Process Reform Act of 1990 would take the effect for the budget cycle immediately following its enactment.

HON. WILLIAM D. FORD, CHAIRMAN OF THE POST OFFICE AND CIVIL SERVICE COMMITTEE CELEBRATES 25TH YEAR IN THE U.S. HOUSE OF REPRESENTATIVES

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. KANJORSKI. Mr. Speaker, it is with great pride and honor that I rise today to extend my congratulations to Representative BILL FORD on his 25th year of service in the U.S. House of Representatives.

During Representative FORD's 25 years of exemplary service, he has been one of the strongest advocates in the U.S. Congress for the working men and women of America, he has been on the forefront for improving our Nation's educational institutions, and he has been a great leader for the people of the 15th Congressional District of Michigan.

As a Member of Congress and a member of the Committee on Post Office and Civil Service, it is with great pride that I am able to serve under BILL FORD'S leadership, and have the honor to call him my chairman. I can attest to his staunch support of American worker's rights, educational reform, and programs which give the weakest and neediest of our society a new chance on life. It is people like Bill Ford that make public service such an honorable and noble profession.

I want to especially thank the people of Michigan's 15th Congressional District for sharing with the Nation a man with the courage, convictions, and foresight of BILL FORD.

Once again, congratulations to BILL FORD on his 25th year of service in the U.S. House of Representatives. I look forward to serving with him in Congress for many years in the future, and to work with him to carry on his tradition of hard work and dedication to improving the quality of life for all Americans.

TAIWAN: THE DEMOCRATIC CHINESE SYSTEM

HON. CLAUDE HARRIS
OF ALABAMA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. HARRIS. Mr. Speaker, last week this House sent a message to the leaders of the People's Republic of China. By our overwhelming vote to override the veto of H.R. 2712, we reaffirmed our commitment to America's historic role as both a supporter of all those who seek freedom and democracy and a place of refuge for those who flee the heavy hand of dictatorship. Our votes served as an example to the Chinese students now in our country, to the citizens of the so-called People's Republic and to its blood-spattered leadership.

Fortunately for the Chinese people as a whole, a clear illustration of an alternative future exists. On the island of Taiwan, all the world can see a formerly authoritarian, one-party political system transforming itself into a more pluralistic, truly democratic form of government. Elections have been conducted under international scrutiny, and the long-time ruling party has accepted major political defeats, surrendering important offices it held for more than 40 years. When contrasted with political developments and attempts at reform in Korea, the Philippines, or elsewhere in Asia, the accomplishments made by the Government and people of the Republic of China in Taiwan appear even more remarkable.

On November 24, 1989, during our winter recess, President Lee Teng-hui, the first native of Taiwan to serve as head of state, set forth his thoughts on these changes and the prospects for Chinese reunification in the Asian Wall Street Journal. President Lee notes the differences in the economic and political experiences of these two Chinese systems, and frankly admits the challenges his government still faces in meeting the aspirations of its own population. However, President Lee also makes clear that the Taiwan model offers the best hope for a free, prosperous, and democratic united China. I believe my colleagues will find his comments to be of interest, and therefore, his article appears in full in the RECORD following my remarks.

[From the Asian Wall Street Jounal, Nov. 24-25, 1989]

CHINA CAN LEARN FROM OUR SUCCESS

(By President Lee Teng-hui)

TAIPEI.—Over the past 40 years, the government of the Republic of China on Taiwan has actively engaged in political and economic development to establish the most prosperous era ever known in Chinese history. The steps toward greater political democratization, broader economic liberalization, and increased social pluralism have been especially rapid during the past few years.

As a result of these achievements, the people and the government of the ROC have produced a significant model of national development that is applicable to mainland China and is a useful reference for developing nations around the world.

It has always been the goal of the ROC to make the "Taiwan experience" a beacon of hope as well as a blueprint for the reconstruction of all China after reunification. We firmly believe that the Chinese people on the China mainland can learn and will be able to repeat our experience, for we are all Chinese in terms of race, history and culture. The only major difference between Chinese in Taiwan and those in mainland China lies in their recent developmental experience. While we have been practicing constitutional democracy in Taiwan, the mainland has been controlled by communism. We remain convinced that whenever the mainland adopts the system implemented with such success in Taiwan, then all of China will be reunified under one system. What has been achieved in Taiwan can be extended to the mainland.

The many reasons for Taiwan's political and economic successes are local self-government, agricultural reforms, timely strategies for economic development, universal education and the well-known Chinese work ethic.

Decades of experience with local self-government have educated everyone in the structure and activities that make up constitutional democracy. Since Taiwan's retrocession to Chinese sovereignty in 1945, village and township heads, county magistrates, mayors, county councilors, city councilmen, and provincial assemblymen have all been elected directly by the people. These elections have provided important channels for political participation. At the same time, they have cultivated talent for government service and established a firm foundation for political stability. Decades of election experience have also prepared the ground for the multi-party environment for elections that has been possible since the approval of the Civic Organizations Law in January 1989.

REASONS FOR SUCCESS

Taiwan's economic development has flowed from careful planning. In the 1950s, for example, surplus labor was channeled from the agricultural sector into labor-intensive import-substitution industries. The strategy for the 1960s to the mid-1970s called for expansion of exports in order to replace import-substitution industries and earn foreign exchange. After the mid-1970s, the ROC's economic development entered into a second phase of import substitution, one geared to help industries make the transition from labor-intensive to capital-intensive and technology-intensive industries.

Other successful economic measures include the ROC's privatization of public corporations and assistance in the development of small- and medium-sized enterprises. Closely related to these developments has been the emergence of an educated, sophisticated and politically aware middle class, which has helped ensure greater social order and political stability.

The ROC on Taiwan is moving rapidly to the point where it can be considered part of the developed world. In this process, the government faces a number of problems that urgently await solutions. These include upgrading the industrial infrastructure, expanding domestic investment, retraining the labor force, upgrading technological levels and more creative use of the ROC's substantial reserves of foreign exchange.

At the same time, we must deal with the emergence of international protectionist sentiments and the continuing threat of a military attack by the Chinese Communists. To deal with these problems, the ROC government has adopted a number of political, economic, diplomatic and cultural measures.

Politically, the ROC has been promoting democratization and social pluralism by steadily improving its system of party politics and enabling the various partisan forces to compete fairly on the basis of constitutional democracy. In time, the ROC on Taiwan will be as noted for its political achievement as it is for its "economic miracle."

Economically, the government will continue its established policies of economic liberalization and internationalization by actively participating in the world economic community and carrying out its international duties. A number of steps must be taken, however, before the ROC realizes its goal of a truly prosperous society. These include correcting problems in the areas of environmental protection, business regulations and trade barriers, as well as encouraging further improvements in public investment, the financial system, public and private R&D investment, and production and marketing systems. In fact, progress already has been made on all these fronts, but much still needs to be done.

In the area of foreign relations, the ROC government will remain firmly in the democratic world, doing its utmost to protect world peace. At the same time, for reasons of its continued survival and future development, the ROC will continue to adopt pragmatic and forward-looking measures to improve its relations with the other countries of the world.

Culturally, the government is putting its full efforts into finding better ways to reconcile and combine the "traditional" with the "modern." It is a momentous challenge to build a modern society with international standards of thought and values upon the foundations of an ancient tradition and culture. The process takes time, but we hope that Taiwan can be a showcase for China's 5,000 years of history—a society rich in tradition, but cast in the spirit of the times.

Regarding relations between the two sides of the Taiwan Strait, the ROC government always has advocated a peaceful solution to the issue of reunification. In the process of peaceful competition, Taiwan will continue engaging in indirect exchange with the Chinese mainland in various areas in order to eliminate hostility between the two sides and to disseminate the "Taiwan experience."

In November 1987, the ROC government opened travel to the mainland for Taiwan residents desiring to hold family reunions. The decision was made by the late ROC President Chiang Ching-kuo and was based on humanitarian concerns. Since then, with the same considerations for the welfare of all Chinese, we have allowed residents of the mainland to come to Taiwan to visit seriously ill relatives and to attend funerals of loved ones. We also have allowed those Taiwanese of the ROC Nationalist Army stranded on the mainland to come back to Taiwan to live.

To help those on the mainland understand the achievements made in Taiwan, we have invited outstanding mainland personalities and students studying abroad to come to Taiwan to visit. To further stimulate freedom of the press, academic freedom and freedom of artistic expression, we also have allowed teachers, reporters, film makers and television and radio personalities and personnel to go to the mainland for family visits, news gathering, and production of films and TV and radio shows. We believe these contacts between people on both sides of the Taiwan Strait will help Chinese on

the mainland to accept our social, political and economic ways of doing things.

All of these developments have already had some influence. The pro-democracy movement this year in Beijing is an example. In response to the call for basic democratic freedoms, the ROC government adopted various measures to support the democracy fighters on the mainland. These included using all available means to break through the mainland's news blackout and to provide aid-in-kind to mainland students and scholars abroad who might have had their passports or financial means of support revoked because of their anti-communist activities. These and other measures demonstrated our sincerity and our resolution to support our mainland compatriots.

The scope and pace of liberalization of the ROC's mainland policy has been creative and far-reaching, but there has been little positive reaction from the other side of the Taiwan Strait to indicate their good intentions. The Chinese Communists still refuse to rule out the use of force as a means of unification and they still hold to their so-called Four Cardinal Principles (the leadership of the Chinese Communist Party, adherence to Marxism-Leninism-Mao Tse-tung thought, the people's democratic dictatorship and the socialist road). As a result, they refuse to make any democratic reforms or engage in free economic practices.

In addition, the Chinese Communist leaders still try to exclude the ROC from the international community. But the ROC, as a sovereign country, must have full rights to participate in international organizations and to enhance its friendly relations with foreign countries. The ROC's social, political and economic success makes such participation in the international community a fair and just expectation.

CLOSING THE GAP

It is our position that it will be possible to realize the reunification of all China only if the communist authorities make some significant changes in all of the above matters, and only when the gap between the political and economic systems on both sides of the Taiwan Strait narrows and an atmosphere of mutual trust develops.

I am confident that one day this will be accomplished. I am also confident that the establishment of a free, democratic, prosperous, reunified China with an equitable distribution of wealth is more than the great hope of all Chinese people—it is also an international goal because it will contribute significantly to world peace and stability.

KATURA TRAPP: WHY EDUCATION IS IMPORTANT

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. LEHMAN of Florida. Mr. Speaker, recently nearly 20,000 fourth graders from around the country participated in the Kodak/Alan Page Challenge essay contest. The topic was, "With an education, the future is yours. What does that mean to you?" Forty-one national winners were chosen by a panel of elementary school educators, and one of those winners was Katura Trapp of Myrtle Grove Elementary School in Miami, whose mother, Patrice, is the manager of my district office.

I think Katura's comments express with simple beauty why education is so important, and I would like to share her essay with my colleagues:

WHY EDUCATION IS IMPORTANT

(By Katura Trapp)

Education is the most important thing in the life of a child today. Education can take you anywhere you want to go. If you don't have an education, you're on your own, everything starts falling apart like an old broken down car that hasn't been used in years. After all, to keep that car running and in good shape you must keep the engine tuned. And since a mind is a terrible thing to waste, I, too must keep my brain sharp and alert. If my mind goes like that car, I'll be on a one-way street to nowhere. So don't you see, an education is everything to me—what more is there?

An education is my key to making the future awesome. With my knowledge, I may just solve some major world crisis. I may take off into space or explore the deep blue seas. Or I might even discover the cure to some dreadful disease. So you see, with an education I can achieve whatever I believe.

STATE REPRESENTATIVE CLYDE WEBB RETIRES AFTER 20 YEARS

HON. JOHN J. DUNCAN, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. DUNCAN. Mr. Speaker, State Representative Clyde Webb of Athens, TN, has announced that he will not seek reelection this year, following 20 years of service.

Representative Webb is one of the finest State legislators, not only in the State of Tennessee, but in the Nation. He has faithfully served the people of McMinn and Meigs Counties in the State legislature for the last 20 years. Representative Webb has conducted himself in a dignified, professional, and ethical manner during that time.

Representative Webb has always made his constituents' needs a top priority. He has always closely attended to the needs and desires of all his constituents who have called on him for help.

Mr. Speaker, I personally know Clyde Webb and believe that he is one of the finest public servants in the country. Although I share his satisfaction in a job well done, I am sure he will be missed by the people he has served these many years.

I ask that the newspaper article and the editorial announcing his retirement which appeared in the Athens Daily Post-Athenian be reprinted in the RECORD.

WEBB ENDING LEGISLATIVE CAREER

(By David Stone)

State Rep. Clyde Webb, who has represented McMinn and Meigs County in the state General Assembly for the last 20 years, said Friday he will end his legislative career when his tenth term ends.

"It has been a tremendous honor and huge responsibility to represent the people of the 23rd District for the past 20 years as their state representative," Webb said. "I have enjoyed it. It has been a tremendous experience, one of which many people don't get to do.

"The demands and work load of serving in the Legislature is more than I can handle and still perform my job as president and chief executive officer of the City and County Bank of McMinn County," Webb said. "It's time for some new blood, fresh ideas and boundless energy."

Webb, a Republican, said the work load was the only reason for his decision not to seek re-election. In addition to heading the bank where he has worked for the last 30 years, Webb also is the incoming president of the Athens Area Chamber of Commerce, a vice president with the Economic Development Authority, a member of the Tennessee Wesleyan College Board of Governors and a board member of Athens Community Hospital.

"The work load in the Legislature has increased tremendously in the last 10 years," Webb said. "I have attempted to represent this area to the best of my ability. Hopefully, I have made some attempt to repay, through my service, the people in this area for the opportunities they have given me in the past."

At 56, Webb said he has no plans to seek other political offices.

"I plan to stay active politically in the local community," Webb said.

"I think everyone should. I've had a good political career. Everyone has been kind to me from both the Republican and Democrat parties and the independents."

His career at the state Capitol began in 1970 when Webb was elected to the seat vacated by former Rep. G.L. Aberhold, who was also a veteran House Republican who chose not to seek re-election. Webb has been re-elected continuously to two-year terms—most of the races uncontested—and has served during the administrations of four governors.

His 10 consecutive terms have earned Webb the distinction of having served longer in the General Assembly than any other person in McMinn County's history, according to a statement issued by the House.

Webb currently serves on the Finance, Ways and Means and the Commerce committees in the House, and the joint Legislative Services Committee. Throughout his tenure, though, Webb has shied away from leadership posts.

My only desire has been to represent this district the best I could," Webb said. "I chose not to accept positions of leadership, especially positions in the Republican caucus, and remain as non-partisan as possible. I think this district has benefitted from that."

Webb does serve as the vice chairman of the House Republican Caucus Policy Committee and is chairman of the Caucus' Rules Committee.

"Rep. Webb has been an absolute model of a stated representative, who conscientiously represents his constituents on Capitol Hill," said House Republican Leader John Chiles. "Not only will the House Republican Caucus miss representative Webb's leadership, but the Tennessee House of Representatives will be losing one of its finest members."

The decision by Webb not to seek re-election has not been a secret, and several potential candidates already are preparing for the upcoming race.

The crop of replacements "did not and will not" influence his decision to retire from the House, Webb said.

"The people in this district will be the ones who make the selection of who will

represent them, and that's just how it should be," Webb said.

A SOLEMN THANK YOU FOR REPRESENTATIVE CLYDE WEBB

Clyde Webb has made it official: he won't be returning to Nashville next year to serve in the state House of Representatives as he has for the past 20 years.

While his planned retirement from the Legislature was hardly a secret, we couldn't help but to feel a bit sad upon hearing the official confirmation of his decision not to seek re-election.

Mr. Webb was only 37 years old when elected in 1970 and in the 20 years he has been our representative his concern always has been that he fulfill his first campaign promise to serve his constituents. He has lived up to that pledge, never discriminating against a constituent whether they were a fellow Republican, rival Democrat or an independent. All that mattered to Mr. Webb was that a constituent needed his help.

"My only desire has been to represent this district the best I could," Mr. Webb said. "I chose not to accept positions of leadership, especially positions in the Republican caucus, and remain as non-partisan as possible. I think this district has benefitted from that."

Following his first election, Mr. Webb has been reelected continuously to two-year terms, usually with no opponents either in the GOP primary or in the general election. His 10 consecutive terms have earned Mr. Webb the distinction of having served longer in the General Assembly than any other person in McMinn County's history.

We salute Mr. Webb for his many years of unselfish devotion to his community, which has benefitted greatly from his legislative experience and his personal compassion for others.

But Mr. Webb's service to his community actually only begins with this legislative success. He is the incoming president of the Athens Area Chamber of Commerce, a vice president with the Economic Development Authority, a member of the Tennessee Wesleyan College Board of Governors and a board member of Athens Community Hospital. In past years, he has served civic and community organizations too numerous to mention. And, that's all in addition to his time-consuming job as president and chief executive officer of the City and County Bank.

"Rep. Webb has been an absolute model of a state representative, who conscientiously represents his constituents on Capitol Hill," said House Republican Leader John Chiles. "Not only will the House Republican Caucus miss representative Webb's leadership, but the Tennessee House of Representatives will be losing one of its finest members."

We couldn't agree more and we're sure the residents of McMinn and Meigs counties join with us as we say, "Thank you, Clyde."

AMERICANS NEED ADEQUATE HEALTH CARE

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. CRANE. Mr. Speaker, in opposition to the recent surge of approval for the Canadian Health Care Program, I would like to emphasize the resulting loss of quality care for patients in need of immediate attention. The illusion in Canada, that theirs is essentially a free system, is driving both doctors and patients to the borders. I believe any cost-effective program orchestrated by the Government is realistically going to be more concerned with meeting the guidelines and restrictions set forth on paper rather than caring for the needs of a particular patient.

The following article by Leona Rubin Krasnow, " 'Free' Health Care Doesn't Mean Quality Health Care," illustrates the frustration and cost of coping with the faulty Canadian system. Her experience with childbirth in Canada began with overcrowded clinics and not being able to see a doctor, and ended after she had endured 57 hours of labor, a Caesarean section, and five different doctors. Not only was she lacking information about prenatal care and counseling, but she later came to the United States where she was diagnosed with having anemia. The difference between our two systems, it seems, is not merely financial. Our health is a dear price to pay for what some call a cost-effective government health plan.

FREE HEALTH CARE DOESN'T MEAN QUALITY HEALTH CARE

(By Leona Rubin Krasnow)

The U.S. media are stressing the advantages of the Canadian health-care system. Those who have received medical care in Canada know that the media are mistaken.

A segment of a recent MacNeil/Lehrer NewsHour dealt with a comparison of health care in the United States and Canada. The program seemed to stress that U.S. health care is not cost-effective. Meanwhile, Canadian patients interviewed for the show were happy to receive "free" and, in their opinion, adequate medical care from their government.

I lived in Canada for a year-and-a-half and had my first child there. The Canadian system was inadequate in several areas, including prenatal care and counseling, management of labor and delivery, and postnatal followup. I saw a physician only twice in nine months; first to confirm that I was pregnant and later so medication could be prescribed to combat swelling in my hands and legs.

The common procedure in Canada was for a pregnant woman to visit a clinic once a month. The clinics always were crowded, and waiting periods of three to four hours were common. I got the impression that the doctors and other medical personnel were not personally involved in my welfare. To them, I was just a number in the waiting room.

When I went to the hopsital to have my baby, I was wheeled into the delivery room and back into the labor room three times. During the 57 hours I was in labor, I was attended by five different physicians; whoever was on call was my doctor.

My care was not totally free. My husband received a phone bill for $3.57 because he called an obstetrician in Sudbury to ask his advice. The specialist recommended a Caesarean section. When I awoke from the anesthetic, hospital personnel wouldn't allow me to see my baby. They said I couldn't be moved yet and that the infant was in an incubator. I was sure that he had died until they brought him to me the next day.

Two weeks later, I went to the clinic. My baby and I spent five or six minutes with the surgeon, who checked us briefly and gave me a pamphlet about baby care. That was our final visit. If I had problems or questions, I could call a doctor, but only between 4:30 p.m. and 5 p.m. Since everyone tried to call during that time period, it was practically impossible to get through. In an emergency, I was to go to the hospital emergency room. However, as a first-time mother, I sometimes had a simple question about diaper rash or some other common problem; it would have been nice just to have someone knowledgeable to talk to.

I was extremely tired for weeks, but I assumed that my fatigue was caused by my difficult labor and Caesarean section. When ny son was five months old, we took him to New York to meet his grandparents. My mother said I looked terribly pale and took me to her doctor. He found that I was anemic, and he was shocked that none of my Canadian doctors had done a blood test or prescribed iron pills for me. He also was surprised that none of those physicians told me that I might need a Caesarean section because my pelvis was small. Indeed, my mother and older sister had required Caesarean sections for the same reason.

I realized the difference between the U.S. and Canadian health-care systems when I had my second baby in the United States. I didn't have to wait three hours every month to see my obstetrician. He was patient, reassuring and understanding; he made me feel like a special person. I knew he would be there for me when my time came. I also had a wonderful pediatrician whom I could call any time to ask questions about the baby.

Next week, I have to go to the hospital for a cervical biopsy. My doctor apologized for delaying this procedure one week because he was going on vacation. I would have had to wait much longer if the United States had a socialized medical-care system similar to that in Canada. I have every confidence in my doctor and in the care I will receive. I never will return to Canada's nightmarish health-care system, even if it is free.

MILITARY TRASH INTO CASH

HON. RON PACKARD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. PACKARD. Mr. Speaker, I want to recognize the success of a Federal statute, section 2577, title 10, United States Code, which provides incentives for military bases to establish effective waste recycling programs. That law, passed by the 97th Congress, allows a military installation to keep the proceeds from the sale of waste materials. The revenues generated from such sales may be spent by the base commander on: Morale, welfare, and recreation programs; pollution abatement; energy conservation; and occupational safety and health activities.

Since this law's enactment many bases have improved their recycling efforts reducing our waste stream, preventing pollution, and conserving natural resources. One example of the program's success is in my district at Marine Corps base, Camp Pendleton, CA. Under the leadership of Brig. Gen. Richard H. Huckaby the marines are recovering and selling tons of metal from the base's range impact areas and generating much needed

revenue. The details of this effort were described by Ray Tessler in a December 24, 1989, Los Angeles Times article:

[From the Los Angeles Times, Dec. 24, 1989]

MARINES SEEK PROFIT IN WAR SCRAP

(By Ray Tesller)

For nearly half a century, the Marine Corps has ambitiously bombed, strafed, shelled and rocketed a vast and otherwise pleasant area of Camp Pendleton to practice for war.

Now, in a modern variation of swords into plowshares, the Corps is discovering that the generations of exploded metals might be recycled to make money for such peaceful activities as child care and environmental efforts at the base.

For the past two weeks, 86 Marines have combed a firing range with excruciating caution while detonating dud ordnance and gingerly collecting tons of bent and twisted metals that are a virtual archive of military munitions since World War II.

"We're trying to catch up to the 1940s," said Capt. Jack Bell, who is supervising the field operation as Camp Pendleton's senior officer from Explosive Ordnance Disposal. "I've got 10 years' worth of work here."

For all the labor and danger involved, the unusual recycling effort may provide the Marines with something they want as much as weapons in these days of dwindling military budgets—money.

Amy Duncan, a civilian recycling specialist at the base, said the Marine Corps has high hopes that gathering used ordnance will become a profitable part of a broader recycling program that earned about $1.5 million for the base since fiscal year 1988. "We hope it's going to be a money-making project. I don't see how it can't be," Duncan said.

The Marines have diligently collected brass cartridge casings from the rifle and pistol ranges for 20 years, but Camp Pendleton's enormous firing area for heavier weapons has been largely unculled for material since the base opened in 1942.

Every year, demolition experts mince through the three parts of the remote firing range, euphemistically termed the "impact area," to find and blow up anything that didn't explode upon delivery. Last year, more than 7,000 dangerous dud rounds were set off, and 6,480 have been handled so far this year.

It was only last year that Marines actually began harvesting an assortment of dead ordnance from the range. But the yield was only 12 tons, and the material fetched a meager return because it was left in the remote area for buyers to pack up and transport.

This year promises to bring the first real bumper crop of aluminum and steel as the Marine Corps gleans far more material and prepares to do a more aggressive job of marketing it.

Since Dec. 11, the Marines have gathered 69 tons of aluminum, a figure estimated to reach 90 tons by the end of the cleanup. They also have collected tons of recyclable scrap metal, but a figure wasn't immediately available.

The Marines won't know how much the material will sell for until early next year, when bids are sought. But, according to the Escondido Recycling Center, a ton of aluminum can fetch about $1,250, depending on where it's sold.

The range, a flat area overlooked by hills, is laden with remnants of bombs that weighed up to 500 pounds, rockets from planes and helicopters, artillery and mortar shells, and some projectiles even Bell has been unable to identify yet. Much of the stuff was fired from gun positions 12 miles away.

Thinking back to last year's exploratory salvage venture, Bell said, "We didn't realize the significance of what could be done" with recycling.

In addition, the enterprise has turned into a chance for Bell to gather a team of demolitions experts like himself and train with a seemingly limitless supply of explosive devices. Bell is confident their expense will be defrayed by proceeds from recycling.

"I brought in (demolition) technicians in from all over the States for this," Bell said.

Because of what Bell calls the "extreme element" of risk, a detail of 54 Marines ventures into the firing range with his 32 demolition experts, who first find and explode the duds.

"Anybody who goes downrange gets a safety class before they go in," Bell said.

Dust-covered Marines pick through the fields of fallen projectiles from 7:30 a.m. until 2:30.

"It gets tiring," said Staff Sgt. Brent Benson. "You're handling a lot of 155 (millimeter artillery) rounds that weigh about 100 pounds."

Besides the earnings and training aspects, Bell sees the operation as simply the right and sensible thing to do.

"We're in fact cleaning up after ourselves finally, and we're paying ourselves to do it. We're the ones to benefit," he said.

Camp Pendleton isn't the only base to accept the age of environmental concern and limited resources. But, with 35,000 people on base and extensive training with a variety of arms, it is one of the largest military sites of reusable metals in the nations.

"Camp Pendleton is the most active training base" in the military, said Lt. Patrick Gibbons, a base public affairs officer.

Some other bases have had trouble with scavengers sneaking in search of recyclable materials. At Camp Pendleton, though, the firing range is remote, watched around the clock, and would offer intruders only peril.

"There's a tremendous amount of unexploded ordnance in these areas," said Bell, warning that the slightest touch can detonate a round that may look harmless.

The metals are taken to the base Defense Reutilization and Marketing Office, which will seek bids on the material. Eventually, it will be melted into ingots and recast for other uses that now can only be guessed at.

Once program overhead is paid, profits from recycling will be split. Half will go for on-base child care and recreation, the other half for environmental programs.

Duncan is trying to expand recycling, which already takes in a broad assortment of materials to someday include curbside recycling and more.

The progress so far has delighted Lt. Col. Tony Pack, who, as deputy chief of staff for facilities, has put a stronger emphasis on recycling. "I think no one had realized the potential of the program," he said.

For Bell and his men out on the firing range, the future seems to have unlimited potential for training and recycling. He has only begun to clean up one of the range's three big firing areas. And, as long as Camp Pendleton belongs to the Marines, there always will be ordnance to recover.

THE SOVIET THREAT: 14 WAYS IT HAS DECLINED

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. FRANK. Mr. Speaker, it becomes increasingly clear that events in Eastern Europe give us the opportunity to shift some of our scarce resources out of defense and into other areas of our economy. While we are unsure as to the eventual outcome of political trends in the Soviet Union, and questions remain concerning the shape of the successor regimes to the Communist governments in Eastern Europe, some facts have so clearly been established that we can base sound budgetary decisions upon them.

A recent paper prepared by the Council for a Livable World documents the bases on which we should make significant reductions in military spending in the budget we will adopt this spring.

The Council for a Livable World does first-rate work on matters of national security, and this carefully prepared, specific and well-documented summary of recent events among the nations of the Warsaw Pact deserves very careful consideration from our colleagues:

THE SOVIET THREAT: 14 WAYS IT HAS DECLINED

A significant portion of the $300 billion annual U.S. military budget is being spent to counter a threat that has dramatically declined, particularly in Europe.

The Pentagon estimates that 60 percent of its total budget—about $170-$180 billion—is used to support NATO.[1]

There are at least 14 ways in which the Soviet threat has declined:

1. Estimates of invasion warning time increased from 10-14 days to 33-44 days.—Previously, U.S. and NATO military strategy and deployments were based on estimates that the West might have no more than 10-14 days advance warning about a Soviet invasion. Even before the recent dramatic changes in Eastern Europe, the intelligence community produced new estimates that the West would have from 33-44 days of warning time.[2] These changes mean that the U.S. has ample time to fly reinforcements to Europe in case of conflict there.

2. Soviet military spending is declining.—The Defense Department, citing a U.S. intelligence community consensus judgment, concluded in a May 13, 1989 classified study that the Soviet Union "has decided to reverse a 20-year pattern of growth in Soviet military spending and force structure in order to boost the civil economy and Soviet foreign policy." The study determined that the Soviet promises of cuts in defense spending by 15 percent and new weapons outlays by 20 percent over the next two years "will take place and are likely to be followed by additional unilateral retrenchments."[3] A CIA estimate confirmed Soviet claims of a 1.5 percent reduction in overall Soviet military spending in 1989; the Soviets have promised further reductions of 7 percent in 1990 and 5.7 percent in 1991. State Department spokesperson Margaret Tutwiler confirmed on November 14, 1989

Footnotes at end of article.

that "It does appear that Soviet defense spending this year is less that it was last year."[4]

3. 500,000 unilateral Soviet troop reduction.—On December 8, 1988, Soviet leader Mikhail Gorbachev announced in a U.N. speech a unilateral reduction of 500,000 Soviet troops by 1991, including 50,000 from Eastern Europe and 190,000 from the European part of the USSR.[5] The withdrawals and reductions announced at that time are in fact being carried out, according to House Armed Services Committee Chairman Les Aspin (D-WI).[6]

4. 10,000 unilateral Soviet tank reduction; slowing of tank production.—On December 8, 1988, Soviet leader Mikhail Gorbachev announced in a U.N. speech a unilateral reduction of 10,000 Soviet tanks, including 5,300 from Eastern Europe. This reduction is in fact being carried out. Soviet Marshal Sergei Akhromeyev has stated that the USSR is reducing by one-half its annual tank production, down to around 1,700 per year.[7]

5. Unilateral reduction of some Soviet offensively oriented forces.—On December 8, 1988, Soviet leader Mikhail Gorbachev announced in a U.N. speech a unilateral reduction of some assault river-crossing units, air assault and tank divisions most useful in an invasion of the West. This reduction is in fact being carried out.

6. Unilateral reduction of other Soviet equipment.—On December, 8, 1988, Soviet leader Mikhail Gorbachev announced in a U.N. speech a unilateral reduction and destruction of 800 aircraft from the European part of the USSR and Eastern Europe, 8,500 artillery systems and some short-range nuclear systems. These reductions are in fact being carried out.

7. Soviets slow strategic weapons programs.—The Soviet Union has slowed the modernization of strategic nuclear weapons, including their principal nuclear submarine, the Typhoon, two new ballistic missiles, the SS-18 and SS-24, and its most sophisticated strategic bomber, the Blackjack. "A senior U.S. official said yesterday that the Bush Administration accepts the reports of these slowdowns are accurate." [8]

8. Polish forces can no longer be counted to support a Soviet invasion.—In a conflict with the United States and Western Europe, the Soviet Union can no longer count on the 440,000 Polish military personnel.[9]

9. Hungarian forces can no longer be counted to support a Soviet invasion.—In a conflict with the United States and Western Europe, the Soviet Union can no longer count on the 116,000 Hungarian military personnel.

10. Czech forces can no longer be counted to support a Soviet invasion.—In a conflict with the United States and Western Europe, the Soviet Union can no longer count on the 210,000 Czechoslovakian military personnel. The new Czech government has further requested the Soviet Union to consider withdrawing all its forces from that country.

11. East German forces can no longer be counted to support a Soviet invasion.—In a conflict with the United States and Western Europe, the Soviet Union can no longer count on the 240,800 German Democratic Republic military personnel.

12. Romanian and Bulgarian forces can not be counted to support a Soviet invasion.—For geographic and political reasons, the Soviet Union can not count on the 191,000 Bulgarian and 248,000 Romanian military personnel.

13. Declining Soviet chemical weapons threat.—The Defense Intelligence Agency has lowered its estimate of Soviet chemical weapon stocks from 300,000 tons to 75,000 tons. The C.I.A. is estimating an even slightly smaller stockpile.[10]

14. Soviet naval activity dropped.—According to the Pentagon, Soviet naval activity outside home waters has dropped by 15 percent; further cuts are likely.[11]

HAMILTON'S WASHINGTON REPORT

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, January 31, 1990, into the CONGRESSIONAL RECORD:

THE 1990 LEGISLATIVE AGENDA

The 101st Congress has returned to face a whole new set of challenges because of changes in the world. In the two months since the last session ended, communist regimes have fallen in Eastern Europe, the United States invaded Panama, the Pentagon announced reductions in defense spending, talk of a peace dividend has sprung up, and a proposal has been made to cut Social Security taxes. Last year the Congress put itself in position to make 1990 a productive year. A number of old issues are still around—capital gains, child care, clean air, drugs—but a host of new issues have greatly expanded the agenda. Here is a quick review of the major items on the 1990 agenda.

Budget: The biggest task for the Congress will be to remove the almost decade-long fiscal deadlock over taxes, spending, and the budget deficit that has smothered action on a variety of international and domestic matters. Reconciling the demand for increased spending with the deficit will be the central dynamic of the session. By law the 1991 budget must reduce the projected federal deficit to $64 billion. Current government estimates of the 1991 deficit range from $100 billion to $138 billion.

Defense: In this year's budget debate we will begin to reshape the military budget in response to a reduced Soviet threat and changes in Eastern Europe. While there will be cuts in defense, my judgment is that they will not be as large as the peace-dividend talk might suggest. The Congress will also have to decide how to use the savings. My own inclination is to have a major portion of the savings go to deficit reduction.

Taxes: The President's pledge to enact a capital gains tax cut and the proposal for a Social Security tax cut are sure to be hotly debated. Some capital gains reduction appears likely, although it is far from clear exactly what form it will take. Another tax issue that will be considered is expanding user fees.

Ethics: Ethics will be a major battleground. The Senate will consider whether to follow the House lead in banning honoraria. Ongoing ethics investigations of several Members for influence peddling underscore the problems with the current system of campaign finance. Several reforms will be considered to reduce the influence of outside money on the Congress, including alternative financing, restrictions on the amount candidates can spend, and limits on special interest campaign contributions.

Farm Programs: Most major farm programs are due for their five-year renewal this year. Although major changes are not expected in farm support programs, they will continue to feel deficit reduction pressures. Increased attention will be given to food safety, the environmental effects of agricultural chemicals, and rural development.

Foreign Aid: The key problem on the foreign aid agenda will be how to find additional resources for the increased needs in Eastern Europe and Panama. The Congress will also take up assistance for the democratic forces in Central America, sanctions on China and South Africa, and food assistance for impoverished nations. Decisions will have to be made on which trade restrictions on Eastern bloc nations should be removed.

Environment: Progress is likely on a host of environmental issues. A top priority is strengthening federal clean air laws to reduce urban smog, acid rain, and hazardous air emissions. The Congress is near completion of a tough oil spill cleanup and prevention measure, and will address the growing solid waste disposal crisis. Increased attention will also be given to the activities suspected of contributing to global warming—such as coal burning and tropical deforestation. The President and the Congress will likely elevate the Environmental Protection Agency to cabinet-level status.

Education: The Congress will consider implementing goals to restructure and improve elementary and secondary education. It is also likely to target more funds for vocational education programs for disadvantaged students.

Drug and Crime: Measures to be considered to assist in the war against drugs and crime include establishing a federal death penalty, strengthening firearms regulations, and improving methods to combat drug money laundering.

The Family: The Congress will act on several family-related issues, including a child care bill considered last year. The Congress must decide the proper federal role in providing child care and what approach—tax credits to families or grants to local governments and organizations—is most effective. A family medical leave bill guaranteeing parents the right to return to their jobs after taking time off for the birth or adoption of a child or a serious family illness will also be considered.

The Poor: High levels of poverty despite years of economic growth, and a growing gap between rich and poor assure that the

poor will receive attention. Last year the Congress increased the minimum wage and that may be supplemented by expanding the earned income tax credit and the food stamp program. And, after a decade of neglect and abuses at the Department of Housing and Urban Development, the Congress will try to break the long stalemate over housing for the poor.

Civil Rights: The Congress will examine measures to protect the civil rights of the disabled and to restore protections against discrimination that were narrowed by recent Supreme Court rulings. An immigration bill is likely to be passed that will allow more people to immigrate into the country—especially those who are family members of U.S. citizens or who have skills needed in our economy.

Regulation: Legislation may be considered to strengthen congressional oversight in several areas, including commodity futures trading, the content of children's television commercials, cable television, and leveraged buyouts of airlines. The savings-and-loan bailout and other government guarantee programs will be reexamined for their fiscal soundness.

CONFESSION OF AN ALARMIST

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. CRANE. Mr. Speaker, I have served in the House of Representatives for two decades, and over those years I have seen legions of issues enter and exit our Nation's conscience. America's latest preoccupation lies in global warming. While I respect the concern that many Americans have with the "threat of global warming," I have difficulty heeding their warning. I prefer instead to follow other words of caution: "You can't always believe what you hear." Indeed, I would expect my colleagues will agree with me after reading the following excerpt from Paul Harvey News.

CONFESSION OF AN ALARMIST

(By Paul Harvey)

Stephen Schneider works for our government as a climatologist.

He has been appearing before committees of the Congress warning that the world is overheating.

Schneider has been the featured speaker at environmental conferences, warning that the world is warming up.

He has written a book called "Global Warming."

He writes and talks of a dread "greenhouse effect of catastrophic proportions."

Stephen Schneider has been everywhere on TV and radio promoting his book and proclaiming his gospel of fear: The world is overheating!

For perspective: This same Stephen Schneider, just 20 years ago, was making the rounds warning that the world is growing cold; he was then predicting "a new ice age."

Whatever worries you most, hot of cold, environmental extremists can keep you supplied with more than enough anxiety.

Interesting, in Discover magazine October of this year, Schneider exposed himself, described his own technique for purposely scaring people.

He said, "* * * we have to offer up some scary scenarios, make simplified dramatic statements with little mention of any doubts one might have. Each of us has to decide what is the right balance between being effective and being honest."

Confession of an alarmist.

Respected researchers at Massachusetts Institute of Technology, Reginald Newell, Jane Hsiung, and Wu Zhongxiang, have conducted a survey of the world's ocean temperature data since the mid 19th century.

In the current Technology Review they offer this conclusion: "There appears to have been little or no global warming over the past hundred years."

The MIT study confirms parallel research by the National Oceanographic and Atmospheric Administration that "there has been no warming trend in the 49 contiguous states over the past century."

What you hear and read on the subject is most always from environmental fanatics more interested in "dramatic statements" than in being honest.

Serious climatologists, such as Andrew Solow of Woods Hole, report "absolutely no hard evidence" of any enhanced greenhouse effect.

And Mr. Solow represents 81 leading climatologists who comprise the International Climate Trends Panel.

What is further sobering is the fact that Mr. Schneider, willing to play fast and loose with the truth in order to manipulate the public psyche, is himself completely funded by taxpayer dollars through the National Science Foundation.

The Detroit News, after a careful examination of Mr. Schneider's premise, suggests that we of the media are going to have to take a harder look at scientific reports underwritten by government bureaucrats who have a vested interest in keeping us frightened.

RECOGNIZING EXCELLENCE IN THE NATION'S OLDEST VA FACILITY

HON. JOSEPH E. BRENNAN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. BRENNAN. Mr. Speaker, I would like to bring to the attention of my colleagues an article in this month's VA Practitioner magazine profiling the Togus Veterans Administration Medical and Regional Office Center in Togus, ME.

Togus is the oldest health care center in the VA system. In 1866, it became the first branch of the national asylum for disabled volunteer soldiers, housing union veterans who fought in the Civil War, but who had no loved ones to take care of them. Today, Togus provides comprehensive medical, surgical, psychiatric, and nursing home care with plans to deliver more services to Maine veterans, not only within its facility but across the entire State of Maine.

In these days of tight Federal budgets, the efforts made by the talented staff at Togus, with both the maintenance of current health care services and expansion of innovative services top priorities, is a tribute to the Department of Veterans Affairs. Veterans today require a whole range of care, from war wounds to drug and alcohol abuse to post traumatic stress disorder, and the efforts of the Togus staff combine both a sense of professionalism and idealism in the performance of their duties.

It is with sincere appreciation for their efforts that I respectfully submit the text of the VA Practitioner article for my colleagues' review.

RECOGNIZING EXCELLENCE IN THE NATION'S OLDEST VA FACILITY

(By Nina Tobler)

One hundred and fifty years ago, a summer resort opened in Togus. The locale for the spa was chosen for its proximity to a natural spring that was thought to have healing properties.

Twenty-six years later, continuing in the restorative mode, the hotel and 500 acres of land became the first branch of the National Asylum for Disabled Volunteer Soldiers. The earliest residents of the home were injured Union veterans and immigrants who had fought in the Civil War but had no families locally to care for them.

Medically, the facility was a modest operation; at one point, just a single surgeon was on hand to look after 2,000 veterans. In truth, however, what most of the residents needed more than medical care was food, shelter, and clothing. Their war injuries had left them unfit for manual work and thus unable to support themselves. Veterans went to Togus and subsequently to other national homes in order to live out the rest of their lives there.

In 1930, the newly created Veterans Administration took over the site, continuing to offer domiciliary and health care to Maine's veterans. Today, sixty years later, the tertiary care facility is about as far from an old soldiers' home as it possibly could be. One of seven medical and regional office centers combined under single management, the Togus VAM&ROC provides comprehensive medical, surgical, psychiatric, and nursing home care. A $24 million clinical improvements project will not only double the center's size but will also further insure its ability to deliver the highest quality of health care.

What do you do when your hospital is the only VA medical center in the state? Add to that the fact that the state in question is, in square miles, almost as large as the other five New England states put together. It's a situation with all the earmarks of a heavy burden, but Thomas A. Holthaus doesn't view it that way. "Not at all," remarks the director of the Togus VAM&ROC for the past three and a half years. "I look upon it as a wonderful challenge because in many cases, if we don't take care of the veterans in Maine, they may not get any health care at all. That's especially true in a number of the outlying areas where there simply are not a lot of alternatives in terms of obtaining treatment."

One of those regions is Aroostook County in northern Maine. For more than a dozen years, veterans' service groups had lobbied for VA coverage in that area. "Finally," says Holthaus, "we received the necessary funding to open an outpatient clinic in Caribou in June 1987. That's worked out wonderfully, but it's also made us more keenly aware of unmet needs in other remote areas. And, in fact, one of our current initiatives is for a mobile clinic operating out of Togus to fill in the gaps. Additionally, we'd like to expand into the Portland and Bangor areas

with chemical dependency outreach centers."

Being the only game in town also means keeping services on the home front well rounded. "We're it" remarks Holthaus. "We really have to be almost everything to all veterans. We can't just specialize in certain areas and rely upon a sister hospital to supply the rest; that facility simply doesn't exist. So, for example, we must have surgery here. The department is small and compared with hospitals that do a greater volume, expensive to run, but we need to provide the service.

Short of highly specialized procedures such as transplantation or open-heart, Togus provides just about the entire range of health care. But because the hospital has been a fixture for more than a century, much of the local citizenry think of it in its former guise—as an old soldiers' home. "When I talk to people in the community about all the high-tech equipment that we have and the scope of medical and surgical care that we deliver, most are quite surprised," acknowledges Holthaus. "It's been an ongoing public relations effort to inform them that, as a tertiary care center, we're a far cry from the original hospital. As our patient population has evolved, so have we."

Initiatives for the future, therefore, are predicated upon the current and projected needs of the aging veteran. "We're becoming increasingly involved with geriatrics in general and geropsychiatry in particular," says Holthaus. "In terms of chronic care, we've received approval to expand our existing nursing home care unit from 60 to 100 beds. As for acute care, our needs are twofold: to keep those services current and without further reductions."

Having the kind of staff he has certainly eases the demands, observes Holthaus. "Not only are these people committed to providing excellent service to our patients, but they're dedicated to providing excellent service to one another, and that's of critical importance. The veteran is obviously our prime concern, but we have to recognize that we're a service organization in the broadest sense of the word and as such, we serve one another, too."

What has pleased George H. Miller, Jr., MD, chief of staff, since he came to Togus 13 years ago is the relative absence of internal politics. "A certain amount of competition for progression is inevitable in any institution," notes Miller. "But by and large, we tend not to have the big turf problems that exist at the larger medical centers, and that factor lets us get a lot more work done.

Miller, who was previously chief of staff at the Gainesville VAMC in Florida, is also impressed by the extent of service that Togus offers. "What makes us unique is not that we do as much as we do, but that we do it all in spite of the fact that we're not affiliated. Maine has no medical school, and the Boston ones are just a little too far away. Nonetheless, we've been extraordinarily lucky with the caliber of staff we've been able to recruit and maintain.

"Danielle Mutty, MD, for instance, our chief of laboratory services, has developed one of the best labs in the state and, in fact, is recognized as an outstanding person in that field in northern New England. Her husband was in practice in town before he joined us as chief of psychiatry. In surgery, we have four general surgeons, three with specialty training—two in thoracic and one in vascular surgery—making them essentially double-boarded, giving us a good, solid nucleus. We also have two fine orthopedic surgeons. When I first came here, hernias and such comprised the bulk of the surgical workload. That's clearly not the case now; we're doing a lot of peripheral vascular work, joint replacements, and chest surgery."

As well endowed as the Togus center is in terms of breadth, the same cannot be said for depth of specialty coverage. "That, of course, is the one major drawback about not being an affiliated institution," concedes Miller. "There, if you're thin in an area you can always rely on the medical school for backup."

KEEPING WHAT MATTERS IN MIND

Anyone who has been in the VA system for a while learns not to ask for too much, so Miller—like the director—would like to see the acute medicine, surgery, and psychiatry programs kept at least at current levels. "But we do have to expand our long-term and chronic care efforts," insists Miller. "All figures indicate a significant overlap between geropsychiatry and long-term medicine-surgery; from 20 to 80% of the chronically ill elderly—in addition to multiple medical problems—have some kind of concomitant psychiatric disorder. Obviously, unless there's a huge change in the way this country finances health care delivery, these areas will be of increasing importance for the Department of Veterans Affairs."

In a very real sense, the Togus center has already addressed the overlap between psychiatry and medicine by creating a special post, that of assistant chief of psychiatry for medical affairs, a position now held by internist Stephen Sokol, MD. "Steve has overall responsibility on the psychiatry service for the *physical* health of the veterans, whether they are in geropsychiatry, chemical dependency, PTSD, or whatever," explains Lawrence Mutty, MD, MPH, chief of psychiatry service.

"Our own experience, confirmed by data in the literature, tells us that psychiatric patients with medical illnesses have some special problems," continues Mutty. "Their responses to a given symptom of pain, for instance, may be atypical. These patients also are at somewhat of a disadvantage because their psychiatric history tends to give their physical complaint less credibility. As a consequence, diagnoses of significant medical problems have been missed. And that's why we created this special post."

Most of the patients on the geropsychiatry unit have organic brain dysfunction, such as Alzheimer's, arteriosclerotic brain disease, or Huntington's chorea. "Many had been transferred from one nursing home to another," observes Mutty, "finally referred here for diagnostic evaluation, skilled management, and medication to make them more adaptable to community resources.

"At the same time, we try to enlighten the nursing homes. For example, rather than locked doors, these facilities may use rigid 'gerry' chairs to prevent elderly, disoriented patients from wandering. Immobility, however, sets the stage for thrombophlebitis and possible emboli. Restricted movement also means shallower breathing, less coughing, and a perfect setup for pneumonia. So we promote mobility here, both inside and outdoors. Instead of restraints, an electronic device that activates a beeper keeps the veterans from wandering off."

One other patient group with special medical needs are the PTSD victims. Says Mutty, "The public image of the Vietnam-era veteran stems from the Rambo movies. He's a muscular guy who, armed with an M-16, leaps tall buildings in a single bound. How far from that image are the men we see here. Twenty years after Vietnam, they're not in very good physical shape at all—smoking, drug and alcohol abuse having taken its toll. Many have major medical problems, but trying to sustain the macho image has disinclined them to seek professional attention. We've found an unexpectedly high proportion of PTSD victims with significant health problems, and, again, Steve Sokol has helped enormously in that respect."

Another outlet for veterans suffering from PTSD has been the Outward Bound program. Togus is one of just three VA sites used for this unusual treatment approach.

"By creating a high degree of 'perceived' danger," says Mutty, "the wilderness experience encourages interdependence. That's the key ingredient missed in Vietnam. The continual turnover meant that the men could never really coalesce into a whole or trust one another. Here they have to, and we'd like Outward Bound to become an even greater part of our PTSD unit. It's an invaluable treatment modality and should be recognized as such."

A PREFERENCE FOR PREVENTION

Preventive medicine is certainly an invaluable component of any health scheme, but convincing some physicians of that can be tough, according to Eugene M. Beaupré, MD, chief of the medical service at Togus. Under Beaupré's guidance, a "fitness" clinic has been instituted, and so far, the results have been most encouraging.

"I can't take credit for the concept," comments Beaupré, "just for pulling the elements together. The pieces were there and very good people were doing them, but they felt isolated. I guess I provided the spark."

The "pieces" consist of programs in exercise physiology, smoking cessation, diabetes diet, hypertension control, and cholesterol reduction. The figures achieved in the last one may have the most impact on convincing his colleagues that behavior modification can work in the veteran population. Says Beaupré, "Although some of the staff pay lip service to prevention, they feel that nothing they say will persuade veterans to change their lifestyles. But I think that we found the ammunition we needed to alter that mind-set when a group of 27 patients had an average reduction of 50 points in cholesterol levels."

Togus is Beaupré's first VA experience, and although he acknowledges the ample bureaucratization both institutionally and extra-institutionally, it's "not as bad as Medicare was in private practice," he quips. An oncologist himself, Beaupré—together with his colleagues—made the conscious choice to hire subspecialists who also do some general medicine. "The option was to bring on a bunch of general internists without particular expertise," he says, "and we decided to go the subspecialty route."

Either way, the medical service is stretched. A total of 10.5 physicians, two physician assistants, and six technicians make up the service. Given the opportunity to hire one more, Beaupré would opt for another specialist in pulmonary medicine who would also do some intensive care medicine. "At present, besides a cardiologist and pulmonologist, we have one nephrologist who's comfortable in the ICU, and that's not enough."

Among Beaupré's goals is the establishment of what he calls the "geriatrics long-term care division," a geriatrics spin-off that

would be headed by an ACOS. "The time that I'm willing and able to spend in that area isn't enough to do what has to be done," claims Beaupré. "It's only done as well as it has is because the people there are so good, but it should be created as a special position."

Some VA medical centers structure ambulatory care under the aegis of the chief of the medical service, but Beaupré is more than happy to have that area in the capable hands of Alice M. Savage, MD, PhD. With 100,000 annual patient visits, says ACOS Savage, ambulatory care cup's "runneth over."

"We're seeing more patients and with more complex problems than ever," notes Savage. "Fortunately, when I arrived here from the Nashville, VAMC in 1986, it was at a time when a number of physicians were ready to retire. That gave me the opportunity to recruit people with my philosophy down here, and that was good. I added some internal medicine specialists, who were really needed to handle the complex situations, as well as a family practitioner who—in addition to contributing a different flavor—also is responsible for the women's health clinic."

Ambulatory care at Togus is organized along two lines: the outpatient physician staff and the consultative component. The physical separation of the two, concedes Savage, is somewhat problematic. "That's why the new building is critical. The communication will be so much better; my folks can just grab one of their docs and say, 'Look, I've got this problem,' which will cut down on the consults. That's a real concern, the long wait until the next available appointment. A pulmonary follow-up clinic, for instance, lists 134 days until the next appointment; a new GI consult is 131 days. That's not good."

An ambulatory care committee that Savage set up has solved some of the problems. "As it turns out, some of the difficulties we have down here are also difficulties in the inpatient clinics, and our multidisciplinary committee addressed those. For example, we were having trouble with getting lab results back. The lab would enter them in the computer but never know if they were received, and so that was corrected. The committee also keeps track of the numbers of clinics, letting the service chiefs know what their individual providers are doing."

Savage's other hat is in infectious diseases, and one of her functions in that field was to mount a strong education effort on AIDS. "No question about it," asserts Savage, "AIDS is coming to Maine. What we did right at the outset was to get our policies in place. Once the new protocol on body substance isolation was initiated, I did in-service essentially for the whole hospital. I did that for two reasons. One was to present the disease as I know it and to avoid the panic factor; the other was to open up lines of communication with individuals who were worried about AIDS so that they could come and talk."

Organizing people and talks is what his jobs is all about. Kenneth S. Russell, DEd, is director of the Cooperative Health Education Program (CHEP), a consortium-based concept and one of 30 such programs in VA. The educational climate in Maine B.C. ("Before CHEP") was a rather dismal one, recalls Russell. "Hospitals, rural health centers were all in competition to provide education but no one was doing a really good job.

"Little by little, we were able to convince people that if they worked with us we can achieve what they want and they won't risk any loss. It took a while to assure others that we were a cooperating rather than a competing agent." The Togus VAM&ROC is the largest member of the consortium, which has, on the average, 40 to 50 participants. "A number of other large hospitals are also involved," remarks Russell, "but we also have professional groups—such as dental associations—which have four or five conferences a year, most of them right here, which is great for us. It's just a nice marriage."

In 1989, CHEP ran about 100 programs, averaging seven hours per program. "That came to approximately $1.5 million worth of education in the state of Maine," announces Russell, "and as the brochures on the wall indicate, we cover just about every aspect of education."

The brochures themselves speak to the professionalism of the entire operation. They are printed on station in what Russell proudly describes as "VA's best equipped reproduction department. Everything is automated. The mailing labels are computerized, and, in fact, people come from throughout the state to negotiate with us for our mailing lists. Of course, all the equipment purchased by the consortium and housed here is available to the rest of the staff, which increases their efficiency enormously."

Russell shines as a proselytizer. "I think the cooperative idea is an incredible one. It ought to be system-wide; all VA centers should be doing cooperative education in their communities. It just makes better sense to share. For an investment of less than $200,000, this hospital gets all of its ACOS/E-type needs met and, as I mentioned, well over a million dollars in education delivered right here for virtually no extra cost than registration."

ON THE SAME BRAIN WAVE

If Russell is searching for converts, he can skip Cecil E. Munson, ACSW, CSW, chief of social work service. Munson and his staff rely heavily on CHEP not only for continuing education but also for networking.

"We're strongly committed to building community linkages," says Munson. "They're the resources for referrals, providing continuity of care and case management," and so forth. Maine has a lot of real estate; some areas are pretty well off in terms of resources, others are very undeserved. We've taken on the whole state and tried to provide service as uniformly as possible.

"This has been the whole thrust from Central Office, too, with every hot line underscoring the need for care coordination. Listening to all the exhortations, I became concerned so I asked, 'What more should we be doing?' And the answer was, 'Nothing. You're the model. You're doing what we want.' And that was very reinforcing."

Going about their task can be a time-consuming and expensive proposition for the social work staff. As Munson explains, the distances between cases is long. "Sometimes you have to travel 30 or 40 miles from one place to the next, and in this era of acountability, and productivity, the time spent on the road doesn't compute. It's been a struggle for us but we've been able to defend ourselves successfully on the basis of the fact that we need outreach, we need to make sure that we offer a broad range of services to as many people as possible."

Electronic mail and laptop computers are streamlining the operation, Munson says. "Our field workers can hook into the DHCP and find out about pharmacy refills, for example. It's efficient all the way around. The data are accessible and it saves pharmacy's time on the phone."

As great as the distances are, it helps that people in Maine are looking out for others. "It's an interesting state," observes Munson. "I'm amazed at the number of individuals who phone in to alert us to veterans in need. One such call was to rescue a man who was living in cardboard boxes in a dump in northern Maine—not unlike the street people in large urban areas, only without the advantage of a steam grate."

Most of social work's caseload, however, comes from inpatient discharges. "If there are resources needed that we can't provide but the community can, we help families marshal them," says Munson. "It's not a perfect art that we perform. There are a lot of shortfalls, services that aren't available and things that we just can't do. But our aim is to make sure that the convalescence period goes well and the veteran makes the best adjustment possible."

If convalescence after discharge is social work's prime concern, the veteran's recovery in the hospital is nursing's. "We get a lot of positive feedback from the patients," says William M. Harness, RN, chief of nursing service. "The nursing care here is excellent and compassionate. For example, we had a female veteran with AIDS who had been admitted for an inflammation and infection of the brain. Although she was quite difficult to handle, the staff worked hard with her. No one said, 'Don't assign me to that patient.' She comes in now on an outpatient basis, and her progress has pleased us all."

Since he arrived at Togus five years ago, Harness has pressed hard for staff advancement whenever possible. "We changed the boarding process here to be in step with other VAMCs, i.e., to give credit for non-VA experience. We work with the staff on qualification requirements for promotion. When I first came here, only three individuals were senior grade; now there are 12. Of our 150.4 nurses, nearly 30% have specialty certification. I also encourage authorized absence for attendance at CHEP functions to keep the staff as updated as possible."

Flexibility is a key element in the nursing service to keep it fully staffed. "We do have quite a number of part-time employees here," Harness points out. "Although there was some initial resistance, the pool was out there and it's worked well. Per diem people have also eased the situation. We thought the hourly wage might pose a problem for our full-time staff, but they were just relieved to have some additional help."

One of the things that Harness is most enthusiastic about at Togus is the nursing representation on all of the major committees. "And I don't mean the chief nurse either. We have staff nurses, instructors, and some head nurses on committees such as pharmacy and therapeutics or commodity standards—groups that historically would include only a nursing supervisor or higher."

That suits his management philosophy well, Harness says. "I've always emphasized decentralization, defining that as decision-making at the lowest possible level at which it can happen. Solve the problem where it occurs."

A PRODUCTIVE PARTNERSHIP

A particularly effective liaison has been between the nursing and pharmacy services. "I can't take any credit for that because it

antedated me," says Stephen P. Boykin, RPh, MS, chief of pharmacy. "In addition to myself and my assistant chief, the nurse-pharmacy committee is comprised of head nurses from the different specialties, a nurse educator, and the assistant chiefs of medicine, surgery, and psychiatry."

One of the recent developments that really put the committee to the test was the introduction of a new line of IV products. "The logistics had to be coordinated not only with nursing and pharmacy, but also with supply, which had brought these devices in," comments Boykin. "Nurses on every shift had to go through an orientation process so that we could troubleshoot any problems that occurred and get back to the manufacturer, if necessary.

"The committee also worked out a low-dose geriatric formulation for one of the psychotropic agents used in the nursing home care unit. We were able to reduce the medication for those patients to one-tenth the average adult daily dose, with excellent results. It was strictly a matter of creating a dosage more appropriate to the elderly patient, which in turn improved the quality of life."

Although Boykin's staff currently consists of 22 people, the completion of the clinical improvements project will nearly double that number, as the service is transformed from an on-demand ward stock operation to a unit-dose one. About 80% of the workload is outpatient, with approximately 1,200 prescriptions per day. And finally, a figure about which Boykin can be justifiably proud: the average waiting time for a prescription is just 13 minutes. "These veterans have been in the hospital for hours. We're their very last stop, and they shouldn't have to wait one more minute than necessary."

A CONGRESSIONAL SALUTE TO DR. SEYMOUR ALBAN

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. ANDERSON. Mr. Speaker, I rise today to pay tribute to, and acknowledge my deep respect for, Dr. Seymour Alban. Dr. Alban will be honored on February 4, 1990, by the Temple Israel in Long Beach. This date commemorates both the temple's 66-year anniversary in Long Beach and Sy's 66th birthday. In honor of his special gala event, I would like to share with my colleagues some of the reasons why he is so well respected.

Two words that describe Dr. Seymour Alban are giving and caring. It is apparent that Sy, a prominent Long Beach practicing orthopedist, has given back to his Nation, State, and community, as much, if not more, than he has received. For example, his early dedication to his country was evidenced from his military record. During World War II, he served in the U.S. Army, and later, in 1947, he worked as a flight surgeon in the U.S. Air Force. While Sy has continued his armed service through participation in the Army Reserves, it was in 1953, after his active duty, that he settled with his wife, Reva Steinberg, in Long Beach.

There are few members of the community who are not touched by Dr. Alban in some fashion. In addition to his professional orthopedics practice, he has compiled an impressive community service list. He has been a member of the Los Angeles County Sheriff's Department Reserve Force, a past board member of the Long Beach Heart Association, a past board member of the Long Beach Symphony. In addition to his past board memberships, he has also participated as a member of the California State University Long Beach [CSULB] Fine Arts Affiliates, CSULB President's Associates, St. Mary's Medical Center Hospice Auction Committee, St. Mary's Medical Center Board of Trustees, Long Beach Museum of Art Director's Circle, Drug Advisory Committee to the California legislature, and honorary trustee of the California Pools for the Handicapped. While I have only mentioned a portion of the organizations Sy is involved with, his community involvement goes much further.

Dr. Alban is also a religious man. He has been a member of the Temple Israel for 37 years. His involvement in the synagogue has led to an array of related activities. He was a member of the Young Leadership Israel Mission, chairman of the United Jewish Welfare Fund, a visiting professor at Hadassah Hospital in Jerusalem, chairman of the Israel Bond Drive, as well as chairman of the Mission to Israel for Long Beach non-Jewish leadership.

Although dedicated to the community and his profession, neither can take the place of his wife of 36 years, Reva, and their four wonderful offspring, Jill, Joe, John, and Julie. It is only fitting that a man who has provided so much assistance to so many others would be blessed with a lovely wife and four beautiful children. On this special occasion, I thank Sy, and the Temple Israel, for allowing me to take part. My wife, Lee, joins me in extending our congratulations to this caring and giving individual. We wish Sy and his family all the best in the years to come.

RICO AND THE RIGHT TO PROTEST

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. LaFALCE. Mr. Speaker, I am pleased to share with my colleagues an insightful column by Nat Hentoff, a staff writer for the Village Voice. Mr. Hentoff has described how the Racketeer Influenced and Corrupt Organizations Act [RICO] has once again been used against people conducting a social or political protest.

An antipornography organization in Florida was accused of extortion, a crime included in the list of acts which can legally be considered racketeering. By using RICO, publishers, magazine sellers and, ironically defendants of free speech can sue for triple damages and attorney fees as well as label these protesters as racketeers.

What were these acts of extortion by the antipornography group? They were certainly not the shakedowns by gangsters that we imagine. These alleged racketeers sent letters and postcards, picketed, threatened a boycott, and threatened to hold a press conference.

As Mr. Hentoff states, this misapplication of RICO threatens our essential right to free speech. It is Congress that must act to rectify this situation, for the courts have stated that RICO will continue to be broadly interpreted until Congress limits the scope of the statute. The careful examination and clarification of RICO must be a priority of this session of the 101st Congress.

[From the Tonawanda News, Dec. 20, 1989]

WHEN RICO JOINED THE GOOD GUYS

(By Nat Hentoff)

That the RICO (Racketeer Influenced and Corrupt Organizations) act can be a clear and present danger to First Amendment rights is increasingly evident. The American Civil Liberties Union has testified against RICO on that score, and various newspapers have editorialized on the damage done to protesters by stigmatizing them as "racketeers."

Yet, a phalanx of paladins of the First Amendment has enlisted RICO to smite the American Family Association of Florida in retaliation for the anti-pornography group's attempts to get certain "sexually explicit" magazines off the shelves of convenience stores and other outlets.

Among the "patterns of racketeering" employed by the defendants—according to the RICO lawsuit filed by the First Amendment lawyers—have been letter writing, boycotts and threats of boycotts. (Cesar Chavez is lucky the good guys approve of his letter writing, boycotts and threats of boycotts.)

Among the sometime champions of free expression who have not been able to resist RICO's lure of triple damages, attorneys' fees and that immediate "racketeer" brand on the defendants are: Burton Joseph, representing Playboy Enterprises; Maxwell Lillienstein, counsel for the American Booksellers Association; and Michael Bamberger, counsel to Media Coalition and lead lawyer for all the plaintiffs, who include Playboy, Waldenbooks and the Council for Periodical Distributors Association.

In the complaint filed in federal court in Florida, the American Family Association is charged with acts of "extortion" in trying to get magazine and book retailers, wholesalers, distributors and publishers to stop "selling certain materials protected by the First Amendment."

These acts consisted of sending "numerous" letters and postcards; picketing the home of an officer of a wholesale distribution company; and threatening to hold a press conference to expose to the public and to law enforcement authorities certain stores. These were accused of acting "illegally" under Florida law by selling magazines that carry ads for obscene videos.

The American Family Association, as it admitted, was wrong on the scope of that obscenity statute, which actually applies to publishers and not stores. However, making a mistake is not the same as being a racketeer.

And although the American Family Association itself threatened RICO action against carriers of certain magazines, suppression of those who would suppress is hardly the mark of civil libertarians.

Also part of the complaint against AFA is the charge that, as a result of the defendants' other actions, 1,400 convenience stores jettisoned the offending magazines. But is boycotting—a protected First Amendment activity—to be penalized because it's successful?

The American Family Association of Florida is a particularly tempting target for those who believe that only the right wing

can be guilty of threats to free expression. The director of the national AFA is the Rev. Donald Wildmon of Tupelo, Miss. As head of Christian Leaders for Responsible Television, he has urged the boycotting of advertisers of television programs that he considers "antifamily."

Surely—some summer soldiers of the First Amendment say—James Madison did not intend to have the likes of Wildmon and his minions protected by the First Amendment.

Indeed, Oren Teicher, executive director of the grandly titled Americans for Constitutional Freedom—to which several of the plaintiffs in the Florida suit belong—says of Wildmon and his ilk:

"If they dislike a TV show or magazine, they want to drive it out of the market. That's un-American, and we're going to stop them."

Punitive definers of true Americanism are not limited to the political right.

Max Lillienstein, ordinarily the very model of a Brandeis-Douglas-Brennan approach to free speech, told me that using RICO in the Florida case was "a difficult decision to make, but strong medicine was needed."

"If all of you believed actual extortion was going on," I said, "you could have gotten a local district attorney to file criminal charges."

"You couldn't get a local Florida D.A. to do that," Lillienstein told me. But when I asked him if anybody had checked to see if that was true in all of Florida, he said nobody had checked.

So, these attorneys and the organizations they represent—which chime the First Amendment as regularly as a clock—have now given RICO a respectability in cases brought to punish speech that it never had before.

As Gara LaMarshe, program director of PEN's Freedom to Write Committee points out: "These are powerful institutions with many means at their disposal to counter the AFA—without lending legitimacy to an extremely repressive tool like RICO. What they've done will come back to haunt them. And all of us."

THE DAVIS BROTHERS DO ANOTHER GOOD TURN

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. BENNETT. Mr. Speaker, Mr. J.E. Davis and A.D. Davis are able businessmen who did much to put the Winn Dixie stores in the top bracket of grocery stores throughout our country, and they deserve credit for their business acumen. They also deserve great credit for many philanthropic things; one of recent date. It is discussed in the enclosed editorial from the Florida Times-Union, January 23. Their idea was and is to reward State government workers who contributed to better productivity, and the editorial hereunder pays them and the recipients well deserved honor.

PRAISE IS DUE WHEN EMPLOYEES OF GOVERNMENT SAVE TAX MONEY

Everybody, including us, blames bureaucrats when things go awry in government. But if bureaucrat bashing is justified, bureaucrat praising also should be justified.

Today, local recipients of the Davis Productivity Awards will be honored at the Omni Hotel.

Jacksonville can be proud of them, and of the Jacksonville businessmen, J.E. Davis and A.D. Davis, who made the program possible.

The idea is to reward state government workers who contribute to better productivity. It is part of the Partners in Productivity initiative, a cooperative effort of Florida TaxWatch, the Florida Council of 100 and the state of Florida.

Winner in the distinguished category is Patrick Chuhran of the Finance and Accounting Department in Northeast Florida State Hospital at Macclenny.

Chuhran, called "a detective who always gets his money," helped funnel $170,000 worth of federal benefits to hospital patients, decreasing cost to the state and helping them return to the community.

Work units honored include the staff of the Construction Industry Licensing Board, Department of Professional Regulation; the District 4 child support enforcement units of the Department of Health and Rehabilitative Services; and the Lake Apopka restoration demonstration project design team of the St. Johns River Water Management District.

Other individuals recognized were August Scheuzinger, a vocational rehabilitation counselor at the Department of Labor and Employment Security, and Russell Plummer and Janet Henley of the Northeast Florida State Hospital pharmacy. The Duval County Public Health Unit of HRS also won a plaque. In all, 165 awards were made statewide.

Outstanding work by these state employees saved Florida taxpayers $77 million last year, TaxWatch said. In effect, they cut our taxes by doing their jobs better.

TRIBUTE TO SILVER CROSS HOSPITAL

HON. GEORGE E. SANGMEISTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. SANGMEISTER. Mr. Speaker, it is with great pride that I rise to pay tribute to an important institution in my district, Silver Cross Hospital, for its achievements in my district.

The Joliet Chamber of Commerce and Industry has selected Silver Cross Hospital in its Salute to Industry Program. This program recognizes the major industries in the Joliet region in terms of economy, human resources and service to the community.

Silver Cross opened its doors in 1895 when the Will County Union of King's Sons and Daughters recognized the need for a hospital in the booming city of Joliet. The hospital's name was derived from the organization's emblem—the silver Maltese cross, which was the insignia of the original King's Daughters who nursed the Crusaders in the Middle Ages.

From its humble beginning as 33-bed facility, Silver Cross has grown more than tenfold to become one of the premier health car facilities in northern Illinois. In addition, Silver Cross has been a major employer in the Joliet region for 95 years, employing more than 1,300 people.

The last two decades have been especially important for the hospital as it has added many facilities, programs and state-of-the-art equipment.

In the 1970's, Silver Cross added a hemodialysis center, the only kidney disease treatment facility within a 50-mile radius. Four years ago, the hospital compiled the Hoffman Cancer Center, which features the new linear accelerator to help fight the dreaded disease anywhere in the body.

Silver Cross is also in the forefront of emergency medical care. The hospital was designated as a trauma center by the State of Illinois in 1988. Last summer, Silver Cross broke ground for a $5 million emergency wing.

The hospital also reaches out beyond its walls to the community through educational programs, support groups and volunteer services.

Silver Cross offers classes in nutrition, stress management, exercise and other health related topics. There are support groups sponsored by the hospital for victims of diabetes, cancer, Alzheimer's disease, and related tragedies.

In 1986, the hospital began its home health service in which hospital nurses work with physicians to develop care plans for homebound patients. The hospital also reaches out to the community through its affiliate health centers, including its newest health resource center, Gateway, located in the Jefferson Street Mall in Joliet. Gateway provides up-to-date information on overall health, fitness, and nutrition.

Mr. Speaker, the residents of our community have been fortunate to have an institution like Silver Cross Hospital to aid in their physical well-being. I am pleased to have the opportunity to honor Silver Cross for the tremendous contribution it has made to the many communities that it serves.

NATIONAL MINERALS MANAGEMENT AWARD

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. RAHALL. Mr. Speaker, I would like to acknowledge two outstanding Federal employees, Mr. James Shelden and Mr. Kenneth Mitchell.

Forest Service Chief F. Dale Robertson recently presented the 1989 Forest Service National Minerals Management Award to Mr. Shelden and Mr. Mitchell. The Forest Service National Minerals Award is presented annually to individuals who have demonstrated initiative, innovation, and a positive working relationship with the public to encourage and facilitate the orderly exploration, development, and production of minerals within the National Forest System.

Mr. James Shelden is a geologist for the Forest Service's regional office in Missoula, MO. He has continually demonstrated leadership, innovation, and an ability to work with industry, other regulatory agencies and the public. Mr. Sheldon's professional expertise and his ability to explain complex alternatives in terms that nontechnical personnel can un-

derstand were largely responsible for the development of the Beal Mountain gold deposit.

Mr. Kenneth Mitchell is the monument manager for Admiralty Island, AK. His longtime involvement, leadership, and professionalism helped Greens Creek, the first major gold lode mine in the State of Alaska since 1944, come on line and into production. Mr. Mitchell's work on Greens Creek was culminated in the Forest Service's accomplishment of a seemingly impossible task, developing a major operating mine in what many Alaskans regard as one of their States' crown jewels, the Admiralty Island National Monument. The mine was able to open due to the atmosphere of special trust and confidence that Mr. Mitchell established.

Both Mr. Shelden and Mr. Mitchell recognize that the only way to encourage and facilitate mineral exploration and development on the National Forest System is to ensure the cooperation of the minerals industry, the environmental community, the State, other Federal regulatory agencies, and the local community. They also recognize that it is beneficial to the Forest Service, the minerals industry, and the Nation to assure that mining activities are done in an environmentally sound manner.

This Nation is thankful that it has dedicated civil servants like Mr. Mitchell and Mr. Sheldon who use their initiative and resourcefulness to help maintain a safe, clean environment and a strong, vigorous mining industy.

NEW JERSEY HONOR ROLL: JEAN STUMBERGER

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. GALLO. Mr. Speaker, we are reminded every day that the cornerstone of freedom is the right of self-government. As we witness the momentous changes occurring in Eastern Europe, we are reminded that our form of government, the longest lasting constitutional democracy in history, serves as a model for other freedom-loving people everywhere.

We must also realize that the free people of many nations now must face the difficult task of rebuilding their societies to establish governments based upon the principles of constitutional democracy.

It is difficult to fully appreciate our own great accomplishments without an understanding of the fundamental principles and values of our democratic institutions and of the need, in each generation of Americans, to preserve, protect and defend the Constitution of the United States, the blueprint which makes our form of government possible.

Our celebration of the Bicentennial of the Constitution and its ratification by the States has brought about a renewed commitment by educators to keep our democracy healthy by teaching the importance of understanding and participating in our form of self-government.

Many educators and community leaders have participated in this rebirth of civic education and they deserve our thanks for their many efforts.

In particular, I am most pleased to commend the efforts of Ms. Jean Stumberger, who coordinates the "We the People . . . Bicentennial Programs on the Constitution and Bill of Rights" within the 11th Congressional District of New Jersey.

Through the dedicated and voluntary efforts of Ms. Stumberger thousands of elementary, middle school, and high school students have studied a curriculum that introduces students to the philosophical ideas of the Founders of our Nation, the historical background of the Philadelphia Convention, and the issues and debates that shaped the writing of the Constitution.

Students also learn how our Government is organized and how it protects the rights and liberties of a constitutional democracy. And, most important, students learn of the responsibilities that accompany the rights of citizenships in a democracy.

In addition to classroom materials, this innovative curriculum has included participation in the National Bicentennial Competition and the National Historical Pictorial Map Contest.

I am proud to add that the Parsippany-Troy Hills, NJ, School District was one of seven districts nationwide to develop the "We the People . . ." curriculum as a pilot program the year before it was used throughout the country.

Jean Stumberger and her team of dedicated volunteers should be equally proud that they have seen this important national educational effort through from the very beginning.

The only way that we will lose our cherished way of life and system of self-government is through apathy and lack of involvement in the process.

Mr. Speaker, the exercise of freedom is literally an exercise in participation.

Jean Stumberger and all of the educators who have taken part in this important effort to keep democracy alive deserve our heartfelt thanks, as well as a challenge for the future—keep up the good work.

HOME REPAIRS FOR THE ELDERLY

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Ms. OAKAR. Mr. Speaker, today I am introducing legislation to provide minor home repairs to low-income older Americans. The Home Repairs for Older and Disabled Homeowners Act of 1990 will improve the living environment of older and disabled homeowners. Congresswoman LLOYD, chairwoman of the Select Committee on Aging's Subcommittee on Housing and Community Development, is the major cosponsor of the bill.

Mr. Speaker, a great deal of research and careful consideration went into this home repair package. Beginning in 1980, the Office of Policy Development and Research at the U.S. Department of Housing and Urban Development developed a demonstration project in seven cities across the Nation in order to test the feasibility and cost effectiveness of home maintenance programs for the elderly. The demonstration essentially provided Government support and guidelines for a concerted effort between local government agencies and existing community outreach groups qualified to provide minor home repair services. An independent study of the demonstration revealed that it was an unequivocal success. The report goes on to state, "There is a very real need for a program of this nature. Over 80 percent of those surveyed would not have been able to make repairs were it not for the home repair program."

The legislation is desperately needed by older homeowners in every State of the Nation. We know that 75 percent of older Americans are fortunate enough to own their homes and many will age in place in their homes. Unfortunately, older homeowners have the highest level of substandard housing compared to other age groups.

Mr. Speaker, this home repair legislation is modeled after the seven cities demonstration project and meets a real need of older Americans who wish to live independently, comfortably, and safely in their own homes for as long as possible. The bill establishes 2-year competitive grants through the Department of Housing and Urban Development [HUD] to local governments, nonprofit organizations, and Indian tribes for the purpose of providing home repair services to older and disabled homeowners. Eligible repairs include preventive repairs, security-related measures, accessibility and suitability repairs, and general repairs. Grantees are required to serve a minimum number of households based upon the amount of the grant.

While it is true that several existing Federal programs may provide various levels of home repair services, none is designed specifically to meet this need. Allocation of resources to home weatherization or home repairs under the Community Development Block Grant Program is discretionary at the local level. And while other programs are currently authorized to furnish some home repairs, only one program, the section 504 program of the Farmers Home Administration, focuses exclusively on older homeowners, and this program primarily finances major renovations and repairs. The other programs are ineffective as they do not emphasize home repairs, are underfunded, or have complicated administrative procedures that in effect preclude their use. We need this separate, coherent program to provide repairs and modifications for older and disabled homeowners.

My bill also addresses the fact that older and disabled individuals may have social service needs in addition to the need for home repair services. The legislation requires grantees to supply, upon request of the homeowner, information on assistance in the community such as nutrition, health care, employment, and other services. And to remedy the lack of accurate, comprehensive housing data, the legislation requires the standardized collection of data by grantees.

Mr. Speaker, I believe that housing programs and home repairs can play a key role in the related issue of long-term care. Unfortunately, entitlement programs such as Medicare and Medicaid are focused primarily on institutional medical services rather than on the long-term supportive noninstitutional environments that are just as vital and relevant. Our

current approach is shortsighted and must be changed. Difficulties associated with the upkeep of homes are a primary reason compelling older adults to move from their current residences.

I would like to incorporate this bill into comprehensive housing legislation to be considered this Congress. Current legislative proposals recognize in part the need for supportive services for senior citizens in federally subsidized housing, but do not address the needs of the elderly and disabled homeowners. This legislation fills a gap by confronting the shortage of safe, secure, and decent housing for older Americans, the tragedy of premature institutionalization, and the lack of long-term care alternatives. The American Association of Retired Persons [AARP] supports this legislation and has generously assisted in its development.

In conclusion, I emphasize the importance of providing a wide range of housing options for older Americans. The Federal Government currently provides many forms of housing assistance, including the building and subsidization of units, insurance of mortgages, and the provision of private sector incentives.

Mr. Speaker, I strongly urge my colleagues to support the Home Repairs for Older and Disabled Homeowners Act of 1990.

HONORING DR. GEORGE W. ELLIS

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Ms. ROS-LEHTINEN. Mr. Speaker, I am here today to pay tribute to Dr. George W. Ellis who is being honored this evening in Miami for his many years of service to the Dade County school system and the greater Miami area. I'm sure you all know of an individual in each of your communities who stands out as a shining example for their efforts in a noble cause. An individual who has beat the odds and has risen to success, who has then offered his talents and convictions to assist others who are against the odds. Mr. Speaker, in my community, Dr. George Ellis is such an individual. Dr. Ellis has been a tremendous asset as an educator to the students within Dade County, serving as a role model and leader. His invaluable contributions also extend into the ethnic communities of Florida. Dr. Ellis' outstanding service to the field of education and his unending dedication to his community make Dr. Ellis most deserving of this special honor.

Dr. Ellis has spent four decades of his life helping others and promoting the importance of education and family values. He has been emulated for his many principal and coaching positions throughout the years, being recognized as an individual who has positively influenced education, especially in ethnically diverse communities. As a professional man Dr. George Ellis has been a distinguished educator in four Southern States, beginning in the days when segregation was the rule, and continuing today when integration is the law. He has served well in difficult and troubled times. His leadership was clearly seen as he dealt with declining enrollment and economically strapped communities. In his commitment to education, Dr. Ellis realized the importance of a quality education and the benefits which it can bring. He has also been instrumental in directing community organizations such as the Alternative Programs Incorporated which offers legal assistance, job search service, temporary shelter, and counseling to low-income families. For 15 years he has assisted Cuban and Haitian refugees as they sought to establish themselves in this land of hope and freedom. His tireless dedication and creative ideas have had a tremendous impact in the greater Miami communities.

Administrators, parents, students, and citizens of the greater Miami area have the utmost respect and admiration for this outstanding individual. Mr. Speaker, I am very pleased to join in honoring Dr. Ellis for his commitment to excellence in education and community involvement. We are all grateful to him and to all individuals who have devoted their lives to helping fellow men develop their fullest potential.

HELSINKI COMMISSION NOMINATES VACLAV HAVEL FOR 1990 NOBEL PEACE PRIZE

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. HOYER. Mr. Speaker, last week, I, along with the majority leader, had the welcome opportunity to meet with two visiting Czechoslovaks, Ivan Havel and Martin Palous. They were in our country as representatives of Civil Forum, which, along with its Slovak counterpart Public Against Violence, has emerged as the living embodiment of Czechoslovakia's velvet revolution.

These men, longstanding activists in the Charter 77 citizens' initiative, have earned their places as leaders in the movement for democracy. Each of them has contributed to the progress we are seeing throughout Czechoslovakia today, and done so at great personal sacrifice. It was an honor meeting them. But perhaps the greatest moment of our meeting came when I was able to discuss with them the Helsinki Commission's nomination of their President—Ivan's brother—for the 1990 Nobel Peace Prize.

Vaclav Havel has been an extraordinary figure in Czechoslovakia's human rights movement for almost two decades. As a writer, he has won praise and awards for his plays and essays throughout Europe and North America. As a human rights activist, he has won years in prison, repeated detentions, house searches, and confiscation of his personal property.

Yet constant harassment has not diverted Vaclav Havel from his course. Havel not only continued his work with Charter 77, but joined emerging human rights organizations in 1988. As a result of his reinternment in 1989, Havel became a cause célèbre of the CSCE human rights meeting held in Paris last June, where I raised his case in a bilateral meeting with the Czechoslovak delegation.

Vaclav Havel is now President of his country. As such, he speaks with a moral authority that few political leaders enjoy. That authority, Havel's selfless dedication, and his exemplary role in leading his people in a peaceful transition to democracy deserves the unique recognition that only the Nobel Institute can bestow: the 1990 Nobel Peace Prize.

LANGLEY HIGH SCHOOL HONORS DISTINGUISHED EDUCATOR DR. ELAM K. HERTZLER

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. WOLF. Mr. Speaker, I rise today to call to the attention of my colleagues a man who has devoted most of his adult life as an educator with distinction—Dr. Elam K. Hertzler of McLean, VA.

On Sunday, February 11, Dr. Hertzler will be honored at Langley High School when the Vocational Wing of Langley will be named "The Elam K. Hertzler Wing" and Langley Hall will be named "Hertzler Hall." The Fairfax County School Board has adopted a resolution calling for this honor "in tribute and grateful recognition to a man whose devotion to education and community has enriched not only our own school system and community but those of others as well."

Serving in the Fairfax County, VA, public school system, Dr. Hertzler taught mathematics at McLean High School and served as assistant principal at James Madison High School. He has also served as principal at George Marshall High School and from 1965–71, was principal at Langley High School. In addition, he was chief of staff to U.S. Secretary of Education Terrell Bell and also served as a district superintendent of schools in the State of Oklahoma and as an assistant superintendent of education for the State of Illinois.

The school board's resolution, citing Dr. Hertzler's service at Langley High School, describes his "significant role in emphasizing self-expression and individual worth, which helped Langley High School gain a reputation which continues to bring national recognition for academic excellence."

Dr. Hertzler is now serving the Federal Government on the strategic planning and policy staff of Labor Secretary Elizabeth Dole, who will join Dr. Hertzler's friends and admirers on February 13 at Langley High School for the dedication ceremony for the "Hertzler Wing" and "Hertzler Hall." My colleagues might note that this event comes during the national commemoration of "Vocational-Technical Education Week" which has been designated through congressional resolution.

Mr. Speaker, on behalf of northern Virginians who have benefited from Dr. Hertzler's devotion to education in our community, I send best wishes to Dr. Elam Hertzler and his wife Lois and their three children, all graduates of Langley High School, and express gratitude for his professional commitment to the education of American youth.

READ MY LIPS WHILE I PICK YOUR POCKET

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mrs. SCHROEDER. Mr. Speaker, we have all heard of the Stealth bomber. It is supposed to sneak up on an unsuspecting enemy and drop its payload without ever being detected by radar. The Stealth bomber costs billions of dollars to build, but doesn't work too well.

Now we have the stealth tax. It sneaks up on American taxpayers and picks their pockets while they are busy reading the President's lips. The stealth tax costs the taxpayer billions of dollars and works just fine. In fact it works so well it was raised seven times in the last 10 years, and it just jumped again this month.

The stealth tax that I am talking about is the Social Security tax. And it hits lower- and middle-income earners the hardest. It accounts for the 6-percent increase in total Federal taxes most Americans have paid since 1980.

The stealth tax's real purpose is hidden as well. We are told that it goes into a trust fund to be used for Social Security benefits. It's not. It is being used to buy things like the Stealth bomber. Only in Washington would we use a stealth tax to pay for a Stealth bomber.

It's time to ground the stealth tax and return the money to the American worker. Support H.R. 3857, legislation to roll back the Social Security tax, and put an end to pickpockets.

ESPY SALUTES MISSISSIPPI GUARDSMEN

HON. MIKE ESPY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. ESPY. Mr. Speaker, I would like to recognize the outstanding contribution that 90 Mississippi National Guardsmen made when our country took military action in Panama on December 20, 1989. As usual, the Mississippi guardsmen were well prepared.

The American military invasion helped advance democracy, human rights, and justice and helped to combat the flow of drugs out of Panama. We must be proud of our dedicated soldiers who accomplished this achievement. Mississippians are proud that 90 of our guardsmen participated in making history.

Mr. Speaker, please recognize these State guardsmen who served as flight engineers in the Panama invasion: James W. Taylor of Jackson; Jim E. Wade of Brandon; Michael T. Welch of Magee; Frank W. Brewer of Brandon; Michael L. Brown of Pearl; Billy J. Johnston of McCool; William M. Nipper of Brandon; Daryl E. Smith of West Point; Johnny D. Gressett of Decatur; Walter C. Chapman of Newton; Bryan N. Wigginton of Haleyville, AL; John P. Winfield of Brandon; Wendon P. Moore of Flowood; David B. Easterling of Ridgeland; Ricky R. McCraw of Jackson; Lawrene J. Bleakney Jr. of Brandon; William T. Thornhill of Jackson; Don C. Miller of Flowood; Ramon D. Canada of Cleveland; Michael W. Jones of New Hebron; James D. Mobley of Jackson; Anthony B. Best of Utica; Charles H. Lee of Pearl; Michael L. Holcombe of Jackson; Robert H. Palmer of Jackson; Jeffrey W. McFall of Florence; Larry E. Brantley of Forest; William R. Findley of Cleveland.

Also, recognize these guardsmen who served as pilots in the military invasion: Cross A. Harold of Brandon; Brady W. Swinney of Jackson; Michael J. Connery of Brandon; John S. Turnage of New Hebron; Robert E. Sessums of Jackson; Normer L. Gill of Madison; Thomas G. Smithhart of Jackson; Robert A. Cain of Brandon; Stanley D. Papizan of Crystal Springs; David W. Floyd of Jackson; Robert A. Cox of Jackson; Jonathon T. Wall of Decatur; William T. Clayton of Vicksburg; Robert S. Matthews of Madison; Thomas M. Wallace of Jackson; William B. Jernigan of Brandon; Steven P. Joy of Jackson; William J. Lutz of Ridgeland; Charles M. Decker of Jackson; George F. Fondren of Clinton; James N. Jones of Jackson; Lawrence V. Beall of Jackson; Robert A. Barron of Jackson; Thomas N. Sledge of Cleveland; Dwight W. Sisk of Jackson; James A. Conway of Jackson; Robert S. Fince of Memphis, TN; Charles D. Brooks of Brandon; Hugh W. Stevens of Florence; James E. Hearon of Jackson; Mary D. Orr, of Cordova, TN; Brady Tonth, Jr. of Vicksburg; Curtis L. Kennedy of Metairie, LA; Virginia E. Thomas of Pasadena, TX; Calvin L. Allen of Euless, TX; Theodore A. King of Brandon.

These guardsmen served as loadmasters. Please recognize: Larry B. Herrington of Pearl; Earl W. Winterstein III of Jackson; Robert E. Owens of Pelahatchie; Robert M. Dent III of Bolton; Jerry F. Kilgore of Ridgeland; John L. Blakeney of Pearl; Hollis K. Burton of Terry; George M. Gandy of Mize; Lloyd A. Burton of Tougaloo; Gregory C. Barnes of Jackson; Gregory A. Lindsey of Jackson; Jeremiah F. Hammond, Jr. of Brandon; James C. Hansford of Decatur; Billy G. Dockery of Brandon; Patrick R. Kelley of Jackson; Harry J. Burnham of Florence; Alan C. Dorris of Ridgeland; James D. Reeves of Jackson; James M. Bishop of Brandon; Richard B. Davis of Jackson; Robert E. Evans of Pearl; Edsel J. Brown II of Ridgeland; Carlton G. Fagan of Pearl; Charles B. Moody of Clinton.

Lastly, please recognize the flight surgeon and photographer who served with the flight engineers, pilots, and loadmasters: Ronald P. Krueger of Brandon and Robert D. Mason of Brandon, respectively.

I congratulate these fine service men and women, and I remind them that all Mississippians are proud of their contribution to our country's efforts in Panama.

THE TRAGEDY OF KOSOVO

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. BROOMFIELD. Mr. Speaker, there has been a sea change in most of Eastern Europe. In those once-closed societies, this is the year of the people. The masses there want democracy, freedom, and respect for human rights. Change is in the air.

Yugoslavia seems to be an exception to these historic times. The young ethnic Albanians in the Province of Kosovo are peacefully demanding free elections. They want hundreds of political prisoners released and the lifting of martial law.

Their demands, however, are being answered with tear gas, bullets, and clubs. Blood is again flowing in the streets of Kosovo. The voices of young ethnic Albanians cannot be heard over the sound of gunfire. Already, 13 innocent demonstrators have been killed. Scores more were murdered in similar protests last year. Their demands have been answered with crushing force. There is no change in Kosovo. So much for justice in Yugoslavia.

TRIBUTE TO FRANK GRUNGO

HON. JIM SAXTON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. SAXTON. Mr. Speaker, I rise today to ask my colleagues to join with me in paying tribute to a constituent of mine who is being honored this week for many years of community service. On Friday, February 2, 1990, a dinner will be held to mark the culmination of the distinguished public career of Frank V. Grungo.

Over 30 years ago, Frank Grungo began his service on the planning board for the township of Tabernacle, NJ. While on the board, Frank's foresight and acumen contributed greatly to the continued orderly development of the township.

After his election to the township committee in 1966, Frank Grungo served as a member of the board of health and the local assistance board. He was chosen to serve as mayor of the township on seven separate occasions in 1980, 1981, 1982, 1983, 1986, 1987, and again in 1989.

Although much of Frank's time is spent at the town hall, he has always found the energy to help out the local Boy Scout troop, the Little League baseball team and the Catholic Church where he served on the committee to build the first Catholic Church in Tabernacle.

Mr. Speaker, Frank Grungo is one of the great citizens of this country who never fail to answer the call to serve their neighbors. I know my colleagues in the House join with me, and the people of the great State of New Jersey as we thank Frank Grungo.

RANCH HOPE CELEBRATES ITS 25TH ANNIVERSARY

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. HUGHES. Mr. Speaker, I rise today to salute one of New Jersey's exceptional resources, Ranch Hope. This organization, founded by the Reverend and Mrs. David

Bailey, has been helping homeless boys for the past 25 years. On May 6, 1989, I had the privilege of attending the 25th anniversary celebration of Ranch Hope in Alloway Township, Salem County, NJ.

Ranch Hope was just a dream of Reverend Bailey and the congregation of the Fourth Methodist Church of Bridgeton back in 1962. They set out to make a change in the shattered lives of homeless boys in our area. Some of these young men, growing up without the love and care of parents, had experienced just about every type of problem possible. They were often well on the way toward lives of crime and despair.

Reverend and Mrs. Bailey had faith that they could make a difference in these youngsters' lives. They bought an old farmhouse, renovated it, and opened their doors for troubled boys to live with them. The provided the love, stability, and spiritual guidance which the boys lacked. At the same time, they provided educational opportunities and training in a beautiful environment. The boys were educated in everything from math to milking. Under the firm but gentle, loving care of the Baileys, they learned responsibility. Moreover, the boys helped to earn their keep by doing chores around the farm.

Their story is not only a tribute to the Baileys and Ranch Hope, but to all those who have devoted their time and energy to helping those who are less fortunate. Since Ranch Hope opened its doors 25 years ago, more than 500 boys have lived at the ranch. It was very gratifying for me to see many of these successful young men in attendance at the anniversary celebration. It made me realize just how important the work at Ranch Hope is, and how much more we have to do to help those children not so fortunate in finding a home like Ranch Hope.

Mr. Speaker, this record of accomplishment and true service by Reverend and Mrs. Bailey and their many workers and supporters at Ranch Hope is most impressive and deserves recognition. I'm pleased to join with so many others in expressing my gratitude toward the Baileys and Ranch Hope, and in praising their mission of love and caring. I hope that you will join me in wishing Ranch Hope congratulations on their 25 years of public service as well as best wishes for continued success in the years ahead.

THE JUDICIAL INTEGRITY AND INDEPENDENCE ACT OF 1990

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. HYDE. Mr. Speaker, yesterday I introduced H.R. 3907, the Judicial Integrity and Independence Act of 1990. This legislation would provide a quicker and less burdensome means than impeachment for Congress to remove a Federal judge from office. Under the act, a Federal judge would have to step down from the bench if the Attorney General alleged and was able to prove to a three-judge panel appointed by the Chief Justice of the Supreme Court that the judge had violated the constitutional standard of good behavior—article III, section 1—by committing a felony.

In the 200 years since the adoption of the Constitution, only seven Federal judges have been impeached and removed from office. Judges Claiborne, Hastings, and Nixon, however, have been removed in the last 4 years alone. Their cases demonstrate the inadequacy of relying on the impeachment process to ensure the integrity of our 761 Federal judges.

Something needs correction when Judges Claiborne and Nixon are convicted of felonies in criminal trials and sent to prison and then continue to receive salaries for more than 2 years until they are removed from office. And something is wrong when 8 years pass between the time of Judge Hastings' alleged offenses, and his removal.

The impeachment process has proven too slow and cumbersome. And it consumes an inordinate amount of legislative time. It took months of inquiry for the House Judiciary Subcommittee on Criminal Justice to reach the point of voting on the impeachment resolution for Judge Hastings. His case then was before the Senate for 14½ months. Senator TRENT LOTT has aptly pointed out that "except in situations involving the highest public officials, the U.S. Senate should [not] be required to lay aside its legislative duties and don the robes of a judicial tribunal. Rather, it seems to me that the responsibility for determining whether Federal judges have misbehaved can be handled best by the judicial branch itself."

The act would not threaten the interests of any branch of the Federal Government. The House of Representatives would retain the prerogative of initiating impeachment proceedings at any time. The independence of the judiciary would be fully protected since three Federal judges would have to vote for removal.

H.R. 3907 is identical to legislation [S. 1851] introduced by Senator TRENT LOTT. It is similar to procedures enjoyed by most States and to legislation approved by the House in 1941 with the support of the Justice Department and the American Bar Association. I invite my colleagues to join me in supporting this measure.

TRIBUTE TO DR. BERNARD J. CULLEN

HON. PAUL E. GILLMOR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. GILLMOR. Mr. Speaker, it gives me great pleasure to pay tribute to Dr. Bernard J. Cullen of the Medical College of Ohio. Dr. Cullen, a tremendous asset to the medical profession in the State of Ohio, has retired after many years of service.

Dr. Cullen, a pediatrician, has been a nationally recognized leader in the fight to wipe out one of the most tragic forms of violence of our time—child abuse. Prior to his recent retirement, Dr. Cullen was director of the Ohio's Regional Child Abuse and Neglect Prevention Program, which has been acclaimed for its important work. Mr. Speaker, as a former State legislator who supported the creation of this program, I am most appreciative of the leadership and strength that Dr. Cullen brought to this Child Abuse Program.

In fact, it was because of his nationally acclaimed work in child abuse prevention and treatment that the program was established at the Medical College of Ohio by the Ohio General Assembly. Over $1.1 million has been allocated by the State of Ohio for Dr. Cullen's pioneering work.

Whether it is as a diligent pediatrician, or as a conscientious community servant, or as an undying friend to the abused child, Dr. Cullen has won the respect of all who know his work, and has certainly gained the admiration of this Congressman. I wish this medical leader a happy and healthy retirement.

TRIBUTE TO JOE CANNON

HON. C. THOMAS McMILLEN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. McMILLEN of Maryland. Mr. Speaker, I rise today to pay tribute to a very special member of my constituency and to one of my dear friends in recognition for his years of dedication and commitment to both government and community. Joe Cannon, who is retiring this week, is a well-respected member of Anne Arundel County to which he serves as a symbol of leadership, unselfish devotion, and success.

Joe's history of service began as a member of the U.S. Air Force and later for the U.S. Government Printing Office, where he worked for 27 years. During that time Joe distinguished himself for a number of achievements, including a special letter of commendation from President Jimmy Carter for his development of a cost-cutting system for accounting.

When Joe moved to Maryland City in 1964, he began an equally impressive career as a community leader by volunteering his services to improve recreation facilities and programs in Anne Arundel County. This began a 25-year-old relationship with the county which saw such major accomplishments as the formation of the Maryland Recreational Council, the affiliation of the Maryland City baseball program with the national program in Williamsport, PA, and the development of a plan by Joe, his wife Rachel, and the local volunteer fire department to provide emergency medical service at all home football games. He also served many years as chairman of the Anne Arundel County Recreation Advisory Board, planning and promoting recreation and sports throughout our county.

We cannot begin to repay Joe for his years of service to his government, his neighbors, and his community. And so I ask my colleagues to join me in saluting this citizen for his solid accomplishments and dedication for many years.

A TRIBUTE TO THE NORTHERN NEW JERSEY BLACK NURSES ASSOCIATION

HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. PAYNE of New Jersey. Mr. Speaker, on February 2 we honor the contributions of a very special group of professionals as we celebrate National Black Nurses Day.

I would like my colleagues here in the House of Representatives to join me in paying tribute to the Northern New Jersey Black Nurses Association, a chapter of the National Black Nurses Association.

We in New Jersey are very fortunate to have such an outstanding community-oriented organization of dedicated health-care professionals. The New Jersey chapter is collaborating with Big Brothers/Big Sisters organizations to develop substitute parenting roles. In May, the group conducts an annual hypertension screening clinic. In addition, a Future Nurses Club has been started on the elementary level to prepare inner city students for a career in nursing.

The New Jersey chapter will hold a reception in East Orange honoring black nurses this coming Sunday. The theme of the event will be the "The Black Nurse: Celebrating the past, creating the future of Nursing in the health-care delivery system."

Mr. Speaker, I know my colleagues join me in expressing our gratitude for a job well done and our best wishes for continued success to the Northern New Jersey Black Nurses Association.

CENTENNIAL OF FRIENDSHIP MISSIONARY BAPTIST CHURCH, CHARLOTTE, NC

HON. J. ALEX McMILLAN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. McMILLAN of North Carolina. Mr. Speaker, I would like to take this opportunity to recognize one of the great institutions in my home community of Charlotte, NC.

For 100 years now, Friendship Missionary Baptist Church has been a guiding light of inspiration for several generations of Charlotteans. Through those years, Friendship Missionary has been unwavering in its devotion and steady in its commitment, not only to its congregation, but to the Charlotte community as a whole.

It was 1890 when 40 families came together to build a church on the rock of their faith and belief, despite few resources upon which to build. For a while, founders such as Sallie Miles and Napoleon Houser organized services and Sunday school in various homes until a permanent location could be found. At the same time, the church searched for a name, until an early founder suggested "Friendship" after the historic Friendship Baptist Church in Atlanta.

A century later, Friendship Missionary Baptist Church in Charlotte has a membership of more than 2,000 members. But its ministry goes far beyond the sanctuary and the families who have called it home for so many years. Friendship provides outreach to those less fortunate. It cares for the young through a progressive day care facility and has provided scholarship money for students wanting to attend college.

Beyond the city limits of Charlotte, Friendship has touched the lives of families in Zaire, where a missionary program has provided resources for new housing. The success of that mission is prompting the church to investigate a similar program in Haiti.

And so, truly in many ways, Friendship Missionary embodies everything that its name implies. It is a friend to many hundreds of people in Charlotte and the surrounding area. And it is a mission carrying that friendship to others many miles from home.

Charlotte is proud of Friendship Missionary Baptist Church. And I am proud to be here this morning to give recognition to the church's centennial.

ASHLAND CITY TIMES MARKS 100TH ANNIVERSARY

HON. DON SUNDQUIST

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. SUNDQUIST. Mr. Speaker, a few days ago, the Ashland City Times marked its 100th anniversary, a milestone I wish to call briefly to the attention of my colleagues.

The Ashland City Times is a weekly publication, serving Ashland City, TN, and surrounding Cheatham County with the kind of hometown coverage most folks still appreciate. Not only that, the Times periodically publishes community guides, which provide lifelong residents and newcomers alike with useful information about their city and country.

Publisher Luther Thigpen and editor Olivia Hitt continue to produce a readable and informative newspaper that serves as a genuine resource for a growing, changing community. I salute their service and join them in marking this proud and important anniversary for their newspaper.

KILDEE HONORS GENESEE FEDERATION OF THE BLIND

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. KILDEE. Mr. Speaker, I rise today to celebrate the 45th anniversary of the Genesee Federation of the Blind.

Organized in January 1945 to improve the social and economic conditions of the visually impaired in Genesee County, the federation has continued to provide outstanding assistance to meet the needs of the blind. The volunteers offer a multitude of services including counseling, education, distributing food, and serving hot lunches at the Federation's headquarters on 5701 North Saginaw Street in Flint.

As the parent organization of the Service Center for the Visually Impaired, the federation works with the service center to ensure that the blind and visually impaired of Genesee County are given every opportunity to function in a seeing world. This mission of altruism has lead to eliminating barriers for the blind and educating the larger community about the talents and skills of the visually impaired.

Mr. Speaker, as I rise today 45 years after the founding of the Genesee Federation of the Blind, I celebrate the goals and acomplishments of this important organization. The individuals who make up the federation are all true public servants whose work to improve the community for the blind stands as a shining example of the volunteer spirit in the 7th Congressional District. I commend everyone associated with the federation, the staff, volunteers, and clients. I am proud to have this opportunity to recognize and salute their work with the visually impaired.

A TRIBUTE TO DONALD MACMANUS

HON. HANK BROWN

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. BROWN of Colorado. Mr. Speaker, I rise today to pay tribute to the late Don MacManus, a resident of Denver, CO, and a former Colorado State senator.

Born September 10, 1928, in Des Moines, IA, Mr. MacManus moved to Colorado in 1946. He joined the Army and served 2 years in South Korea.

Before his election to the senate in 1968, Mr. MacManus was a salesman, manager, and later a lobbyist and public relations representative for the food industry. He worked as executive director of the Rocky Mountain Food Dealers Association and was, at the time of his death, director of western operations for the Food Marketing Institute here in Washington.

A State senator for 16 years, Don MacManus had a reputation for voting his conscience, even if it meant opposing his party. A colleague of Don's in the senate was quoted as saying, "His legacy to present and future legislators is: Don't be afraid to stand behind the issues you believe in." MacManus was also a long-time member of the senate judiciary committee and served as assistant senate minority leader.

Following a 2½-year battle with leukemia, he died an untimely death on December 10, 1989, at the age of 61.

He is survived by his wife, LaVerna; two sons, Jon and Chris MacManus of Denver; two daughters, Marge Emerling and Lynn Callison of Denver; his mother, Thelma MacManus of Denver; and six grandchildren.

The State of Colorado and the food industry, among numerous other organizations and people with whom Don MacManus associated, are lucky to have been the beneficiaries of the hard work and dedication of such an exceptional man. He will be missed.

SILVER SPRING FIRM MARKS 20TH YEAR

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mrs. MORELLA. Mr. Speaker, I rise today to commemorate the 20th anniversary of a constituent company, the Orkand Corp., headquartered in Silver Spring, MD. With offices throughout the United States and West Germany and over 500 employees, the Orkand Corp., has made contributions in the area of information system services.

The Orkand Corp., has played a significant role in assisting Government agencies. Its clients include the departments of Army, Navy, Labor, Energy, Housing and Urban Development, the Office of Personnel Management, and the National Institutes of Health.

It is a great pleasure for me to congratulate the Orkand Corp. on its 20th anniversary and wish the company many more years of success.

VOTES MISSED DUE TO EARTHQUAKE

HON. TOM CAMPBELL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. CAMPBELL of California. Mr. Speaker, last fall it was necessary for me to return to California after the Loma Prieta earthquake. Consequently, I was not able to cast a vote on four issues which came before the House. It has recently come to my attention that my preferences on those bills had not been recorded. Hence, I would now like to clarify, for the record, how I would have voted had I been present.

The first vote was rollcall 292, pertaining to H.R. 3299, the budget reconciliation bill. I would have voted in favor of the Frenzel motion to instruct the House conferees to recede from the House position on provisions that would lose revenue, increase spending, or have no budget effect. The repeals of the Catastrophic Coverage Act and section 89 employee-benefits were excepted. I believe that the Frenzel motion would have been good budgeting and a positive step toward achieving the budget reconciliation goal.

The second vote, rollcall 293, was passage of H.R. 2494, international development and finance authorization. I believe that the bill provided for too great a potential for simple dole-kind of aid to foreign nations with no requirement for adequate economic infrastructure. My vote would have been no.

The third vote, rollcall 294, pertained to the cargo preference requirements in H.R. 3402, aid to Poland and Hungary. I would have voted for the substitution to the Grandy amendment. The substitution would have resulted in a reduction in the percentage, from 75 to 50, of United States food-aid shipments to Poland required to be shipped on United Stated flag-merchant ships. Cargo preferences have the dual effect of increasing the cost of the aid and lessening the amount of money which can be used for the actual aid. The beneficiaries of such a policy are a very small group of U.S. shipowners and their employees. The provision is anticompetitive and in a very real sense takes food money away from hungry people who need it.

The last vote, rollcall 295, was passage of H.R. 3402, aid to Poland and Hungary. I would have voted yes for the bill. However, I would have preferred less money for direct governmental subsidy and more for capitalistic incentives.

ROSA PARKS—AMERICA'S FREEDOM CHAMPION

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. DELLUMS. Mr. Speaker, on this Sunday, February 4, the Nation will pause to celebrate the birth and life of a gentle spirit, one who demanded her right to sit down on a bus in order that this Nation might stand up for freedom and justice. Her name is Rosa Parks, and we share today with the people of this Nation our tribute, as the Congressional Black Caucus, to one whose very existence demonstrates that ordinary people can be catalysts for extraordinary change. We, the members of the CBC, AUGUSTUS HAWKINS, JOHN CONYERS, WILLIAM CLAY, LOUIS STOKES, RONALD V. DELLUMS, CHARLES B. RANGEL, WALTER E. FAUNTROY, CARDISS COLLINS, HAROLD FORD, JULIAN C. DIXON, WILLIAM H. GRAY, GEORGE W. CROCKETT, MERVYN M. DYMALLY, GUS SAVAGE, MAJOR R. OWENS, EDOLPHUS TOWNS, ALAN WHEAT, CHARLES A. HAYES, MIKE ESPY, FLOYD H. FLAKE, JOHN LEWIS, KWEISI MFUME, DONALD M. PAYNE, and CRAIG A. WASHINGTON, are 24 of only 66 black Americans who have been elected to the U.S. Congress since the founding of this Nation. As we reflect upon the moments, events, and individuals to whom we owe a continuing debt of gratitude for the honor of serving America and the world community in the global struggle for justice, equality, and political representation—we are uniquely aware that in large measure we are here because of the legacy of Rosa Parks.

For those who have come before, and for the members of the CBC today, this democracy has allowed our advocacy a venue because of noble men and women demanding that this Nation live out the precepts upon which it was founded.

Mrs. Parks, you have graced our history with your presence and challenged and empowered our people through your conviction. The words "We, the people of the United States, in order to form a more perfect union, establish justice * * * promote the general welfare, and secure the blessings of liberty to ourselves and our posterity * * * " appear in the Preamble to the Constitution. By your deeds you have transformed this vision into reality. The Congressional Black Caucus joins in this tribute to you and pledges our trust to the flame you have kindled.

AIDS IN THE YEAR 2000

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 31, 1990

Mr. STOKES. Mr. Speaker, last November, I was appointed to serve on the Harvard AIDS Institute Advisory Council. The council is composed of concerned leaders who will be actively supporting the work of the institute in its effort to bring AIDS to the forefront of national attention and to provide new perspectives on the AIDS crisis. The goals of the institute include the development of an AIDS vaccine, the prevention of the further spread of the epidemic, and helping developing countries respond to the epidemic.

During the advisory council's initial meeting, Dr. June E. Osborn, who serves as chairman of the National Commission on AIDS and also as dean of the University of Michigan School of Public Health, delivered a thoughtful and insightful speech entitled, "AIDS in the Year 2000." Dr. Osborn's remarks addressed the cultural, social, and political aspects of the AIDS epidemic. Her comments on our country's health care system and the social consequences of the growing AIDS epidemic seem particularly relevant as we begin our legislative session.

I am pleased to share Dr. Osborn's remarks with my colleagues and hope they will take a moment to consider her analysis:

AIDS IN THE YEAR 2000

(By June E. Osborn, M.D.)

I am not much of a futurist, and the charge to anticipate vistas of the year 2000 has caused me considerable unease in the past. It still does—but the peculiar traits of the human immunodeficiency virus make it unpleasantly easy to offer some predictions. As our insight sharpens, the median interval between onset of infection and advent of AIDS keeps growing longer. For a while there, during the past couple of years, the consensus about average time elapsed from infection with HIV to diagnosis of AIDS seemed to have settled at 7 years. The fragility of that figure was intuitively obvious, since the epidemic has been recognized for only 8 years; but I clung tightly to it, taking heart from modelers who seemed to reinforce the epidemiologists, and hoping that ongoing studies would soon show curves to be peaking or leveling off (or whatever).

I am afraid my optimism had the better of me, for recently it is becoming clear that the likely interval is 10 or even 11 years. Since that is the median interval, there will be many people who will take longer to become ill; indeed, there is good news from the AZT front that suggests that we may be able to extend the duration of asymptomatic HIV infection even further. And if all that is true, we aren't really being futurists when we discuss people who will be caught up in the epidemic by the year 2000. In point of fact, we are talking about people who became infected last week!

Of course, there is not as much information as one would like, ideally, to tell us how many of them there are. We have only general descriptive clues about who they are. On the positive side, we have the knowledge that might allow us to stop further spread next week, which would surely help mat-

ters. But what we know and can surmise warrants our collective anxiety that a decade may be barely enough time to prepare for the storm that lowers over the landscape of our society. AIDS is a photograph, a snapshot that takes at least 10 years to develop; and dark clouds already dominate the mood of the picture that has been taken.

Since you have had extensive discussion of medical care and preventive considerations, I want to talk about cultural, social and political features of the epidemic. I will focus remarks on the United States, but I want to point out that it should serve usefully if not admirably as a source of examples for countries around the world that are caught up in the same pandemic crisis, for we are reaping the whirlwind of our multicultural experiment. America was of course conceived as a haven for cultural diversity and was so brash a century ago as to reiterate its welcome to tired, poor, and huddled masses. They came and most of them prospered, but not all. More recently it has become even more complex, only now the dynamics are those of boat people or refugees or so-called illegal aliens. By these various routes the experiences of America's people with HIV and AIDS are as diverse as humanity itself; and it has been the epicenter, the "trailblazer" in epidemic experience.

Unfortunately diversity is a looming fact of American life in economic as well as ethnic terms. Individualism and enterpreneurial energy characterized not only our industrial growth but also the development of our health care system. The best of that system is very good indeed, but at its weak spots it had already become patched and tattered before AIDS. In between the very rich and the very poor, arrangements for care were problematic, and the financing of care between those extremes depended to an overwhelming extent on employment-related health insurance. That is not necessarily a bad idea in times of full employment, but these are not such times, and we have seen AIDS threaten to complete the investiture of an "underclass" in our once-proudly class-less land of opportunity.

Furthermore, the fact that the medical care arrangements are better for the very poor has meant that HIV-infected members of the middle-class have had to "spend down into poverty" as they become ill, in order to qualify for grudging government programs that might finance the many months of care required in the twilight of their lives. This "rich-man, poor-man" tension in our health care system is about to be exacerbated still further, of course, as recommendations for use of AZT are pushed earlier and earlier in the course of HIV infection, and as such costly but effective clinical gambits as prophylactic pentamidine are added to our potential armamentarium. The clinical advances are wonderful news and the prospect that much can be done to improve the lives of HIV-infected persons is a remarkable advance from earlier desolate times; but the promise could be only a cruel tease for many people if we don't adjust our systems of care and financing to facilitate their access.

But back to social diversity for a bit longer: culturally, it has become unfashionable—even unwise—to refer to American society as a "melting pot"; for cultures don't seem to melt. Persons whose exploration of their roots unearth the tangled traces of slavery are just beginning to dig further to find taproots of a sustaining ethos. Better preserved and defined cultural identities are cherished by many of the peoples who contribute distinctively to our population. Well-meaning "anglos" are learning that sensitivity to one sort of Hispanic background may not serve well in dealing with another; and Americans whose personal histories trace far back into ancient Chinese or Japanese cultures find their collective grouping as "Asian Americans" to be startlingly superficial. Indeed, we stand to benefit greatly if we can learn to celebrate our diversity; but in the meantime there is serious social trouble, for some of the immiscible elements of our multicultural population are sinking in a morass of poverty, illiteracy, hopelessness and heightened risk of drugs and HIV, and the extent to which that continues will go far to describe AIDS in the year 2000. It is in approximately that year that the so-called "majority" will become the minority in America.

What else can we say about the place of HIV in the social landscape of 2000? Well, there will be no further argument about whether AIDS is a disease of restricted "groups"; we will know that it is a sexually transmitted disease to which men, women and (above all) adolescents are susceptible and vulnerable. The apparent variations in efficiency of transmission that have received so much attention in our press will long since have scattered like straw men before the fact that with sexual activity, inefficiency doesn't matter since people do so much of it. Any kind of sexual intercourse seems to work when it comes to transmitting HIV; and so the focus will have turned, appropriately, to numbers of sexual partners and to self-protection against the virus, by use of condoms, spermicides or other measures yet to be devised.

[As a parenthetic aside, if one fails to mention sexual abstinence at the head of a list of preventive measures in the U.S., there is trouble, for the American Moralist is a ubiquitous species. But I find that a depressing and curious iteration. Proposing sexual abstinence in early adolescence is a family ethic; but proposing it as a durable solution to anything is rather astonishing to a biologist. I suppose, with fanciful enforcement proposals, universal abstinence could be entertained as a cataclysmic approach to overpopulation, but short of that it has little to do with the AIDS problem.].

As heterosexual spread becomes increasingly dominant, there will of course be greatly increased representation of women among the HIV-infected, and as surely as night follows day, there will be children. That is certain to force a rather dramatic shift in the dynamics of health care and social welfare in those epidemic areas where the initial preponderance of gay men masked the true universality of the virus. The dominance of men among the HIV-afflicted had been so striking in some areas of the U.S.—the west coast and parts of the South, for instance—that when the first wave of bisexual cases appeared, it had impact out of all proportion to their numbers. It is a thorny enough problem to arrange for the employment, housing, social support and medical needs of single men in their twenties or thirties. The mournful fact of their episodic rejection by their "childhood" families has been mitigated by the loving care of their adult family, and inspiring new meaning has been given to the word "community" in the unfolding of the AIDS tragedy within the gay community. The underlying inadequacy of care and treatment options has often been masked by volunteerism and mutual support.

Single adult men are challenge enough; but when illness and death pervade a whole multigenerational family unit it is a far different matter! and that is what is coming. In the parts of the U.S. where the virus has been present the longest the male:female ratio is approaching one-to-one. The AIDS snapshot is already in the developer and last year 1 in every 77 births in New York was to an HIV-infected mother. Where there are two parents in such a household, one or both may be ill, and employment-related health insurance becomes a frail source of care as chronic disease manifestations emerge. As often as not there is only one parent—the index case, already so ill that she is no longer a care-giver, much less a provider. New York is the scene of some horrendous vignettes: older children, unaffected because their birth order preceded maternal infection, left standing like lone surviving trees in a burned-out forest after parents and younger siblings have sickened and died. There are not many of these yet, but there are enough to warn—and it is a spectre to be conjured with in the future. Already we are groping for new terms to serve as synonyms for "orphanage" since the archaicism of that kind of institution is hard for us to accept, despite the growing need.

Of course all that means that there will be infected infants too, and pediatric AIDS is a horror that defies imagination. Anyone who has delighted at first-hand in the miraculous flowering of neurologic skills in a healthy infant must recoil at the very concept that developmental milestones once attained might yet be reversed and recede. The tortuous illness and death of a child must rank with the most profound of grievous losses. Yet by the end of the next two years AIDS (in our country) will begin to match, annually, the toll formerly exacted on children by congenital rubella. Some die fairly quickly, to be sure; but some seem to share the tedious fate of older infected persons, and the equivocation of their future is brutal in itself.

[Parenthetically I have come to believe that, in this epidemic, even that intensity of tragedy is matched or exceeded slightly by the loss that we have been suffering to AIDS of trained talent among young men and women who once were children but who have somehow lost their status in our affections, and with it, their claim to unqualified compassion. They seem to be excluded in the common mind from the groups referred to as "innocent victims"—which exclusion seems to be a tacit, fetid condemnation of sick people that could sicken society itself if it were allowed to fester for another decade.]

Neurologic and systemic disease of children is not the only harm; in our experience in the U.S., even when the children born to an HIV-infected mother have escaped infection themselves, they may be doomed by stigma, for the social ramifications of participation in this epidemic, however indirect, have such force that an awful fraction of the 62,000 families in our country thus far suffering losses from AIDS have had to do even their grieving in secret! What a horror! And what a future to offer a child! I do not know how to avoid completely the occurrence of pediatric AIDS in the year 2000, for that is horrid graffiti that already may have been carved in stone. But at the very least we must protect those children from the ravages and pervasive costs of unwarranted fear!

I have yet to mention illicit drugs and all they portend for the future of the epidemic. If you accept my premise that—when we conjecture about AIDS in the year 2000—we are talking about infections that happen now, then we know to expect trouble. In the U.S. the "just-say-no-or-else!" approach to the drug epidemic continues to prevail in the face of years of failure. To paraphrase my admired colleague Michael Kirby, we probably will not make headway against addictive drugs—or even slow their progress into the society—until we learn to approach that epidemic as a public health problem rather than a matter for the national guard, the courts and the police.

Our borders are too vast! We cannot build prisons fast enough! We cannot keep people in prison, drug-free, long enough! and our politicians cavil about the fact that needle-exchange trials will give us the appearance of "condoning" the use of illicit substances. But look what we are condoning instead! Suffice to say that present needle-sharing for intravenous heroin use is exceeded only by intravenous cocaine use—and soon perhaps both of those by sex-for-crack-cocaine—as conduits to a luxuriant future for the virus of AIDS. It will afflict the users and their non-using sexual partners and their children. It will afflict not only the addicted but the occasional user as well * * * and we have several million of those. The toll could be horrendous and will sweep up with special fury those who are now disadvantaged adolescents and children * * * especially those for the odds in life's game are so bad already that a 50:50 chance sounds like the best hand they've ever been dealt, when the "down" side relates to obscure events a few years hence! We must learn much about such kids that we do not presently know in order to intercept the virus along this pathway—and we will have to use sensitivity to communicate with people within those desperate communities if they—and we—are to have a chance of interrupting the inexorable spread of HIV. I was hopeful that a fresh look at the drug epidemic could provide new impetus to deal with the "demand side"; but the interface between drugs and AIDS is very poorly attended to in the current executive proposals, and the National Commission on AIDS felt impelled to re-state the urgent recommendation of the Presidential Commission—that the availability of drug treatment on demand for addicts who seek it is fundamental to progress in the HIV epidemic.

Let me make a few more comments about culture and then a few about politics. We must take special care to assign to cultural diversity its proper value as this epidemic progresses, or the road taken to the year 2000 could be not only grim but bleak. I do not care to predict the outcome, for my anticipation depends on my mood—instead I will simply focus for a moment on some of the vector forces that will determine the ultimate direction.

Repressive reactions to AIDS have already been notable for their ability to distract the public from more useful efforts. It seems far easier to think about cordoning off peripheral segments of the population than to face squarely the implications of the facts of limited transmission and their corollative message about need for behavior change. A trivial but useful example may illustrate my point: there are so-called "singles" clubs in the United States where unattached adults can meet and "swing." With the advent of the HIV antibody test, some began to charge hundreds of dollars a year for a membership that included 6-monthly testing and issuance of certificates for negativity. Sort of like a service warranty, I guess. What an extraordinary combination of naivete and panache!

But the outcome of such simplistic thinking is not trivial, and it sometimes takes much more pernicious forms. The same mentality cordons off HIV-positive persons in Cuba. It threatens the testing of international travelers before entry into a country even without commensurate attention to returning nationals. It creates barriers to human commerce and cultural exchange, and blights even our national approach to matters such as workplace safety. [For instance, even if every HIV-positive person were neurologically blighted—as they are not—their removal from industrial posts would account for only 1% of the safety-related hazards posed by illicit drugs and alcohol. And yet it is proposed—to quote one airline hell-bent on screening—that they will test for HIV "to assure absolute safety"!] The cultural pall threatened by repressive reactions to AIDS could indeed darken a future landscape.

Sometimes politicians complain that we are making an awful fuss over "just one disease" and that we are distorting priorities in the process. But it is terribly important to realize that the only thing really new about AIDS is the virus and the awful diseases it provokes; all the rest of the problems with which we are grappling is familiar turf revisited; and perhaps we can devise fresh approaches to practical problems and can learn better ways to celebrate the diversity of humanity as we struggle together against the virus-enemy. I have been personally intrigued with the discovery that there are so many cross-cultural universals. The more divergent a culture is from my own, the more I am struck by common chords to which the human family resonates.

For instance, love of children is universal, as is some form of the perception that they embody our hopes for immortality. What differs is how readily we may sometimes forget that we feel that way; and there I think the so-called "developed" cultures might profit from the experience of other, less cluttered societies. We are also prone to forget that others feel at least as strongly as we do about children—resulting, for instance, in blithe assumptions and blind fiats that an HIV-infected woman should never get pregnant!—as if that were sufficient to settle the matter! In this epidemic it has been intriguing to watch public figures hug small children with AIDS in their effort to convey understanding and compassion—as I watch, I have pondered about what is the statute of limitations on childhood? When do we begin to revoke the permit for potential childishness and imperfection that stays with us, nevertheless, life-long.

The need for dignity is another feature that I think is absolutely universal, and in proportion to the extent that it is given or taken away, so waxes or wanes our capacity to help—and especially to educate. A stranger who strips away one's dignity at the very outset surely cannot safely be considered a friend. As we design interventions for health care and social support of persons who are progressively hampered by this awful virus and its diseases, the very feasibility of our innovations will rest on the remembrance of dignity as a determinant force. Again quoting Justice Michael Kirby, it makes little sense to refer to someone addicted to illicit substances as a "drug abuser" if we are trying to persuade them to let us into their lives.

Loyalty to loved ones is a complex, interesting universal. It can inspire wonderful feats of human courage and endurance, but it is also a force that drives men to war and causes people to lie, cheat and steal. In fact, it is protean in its perversions but, nonetheless, too strong to forget in our planning. I was fascinated by a complaint, registered recently by a colleague from a country in which frequent patronization of female prostitutes was a cultural force to be reckoned with. He noted with some despair that seropositive men were willing to follow through with partner notification when it came to extramarital partners and yet refused to notify their wives! How complicated that is!—and yet we must not underestimate, or fail to learn the meaning of, the powerful twisted loyalties that are expressed in such a quixotic distinction, if we are going to be able to deploy our knowledge to stop this epidemic.

All of these social and cultural forces that will help to determine in the tasks of the year 2000 will be collated by the political process, so it is important before closing to pay due respect to what is involved there. To do so I will revisit a talk I gave to the Conference of (U.S.) Mayors meeting on AIDS that was held in New York City in October 1987. (In fact, it was at lunch on Black Monday, and I was Mayor Koch's luncheon partner—talk about memorable!) I was trying to convey my awareness that most of my listeners were politicians and that I didn't envy them their tasks with respect to AIDS . . . as follows:

"The projected magnitude of the AIDS epidemic makes it an extraordinarily important matter for politicians to address; and yet as political problems go it is hard to imagine how things could be worse—just look at the array of potent emotional issues which interfere with efforts at derivation of thoughtful policies and programs!

"To list just a few of those confounding elements: the AIDS epidemic has stimulated an astonishingly virulent homophobia. It thrives on illicit drug use and begs politically awkward questions as to the merits of methadone maintenance and facilitation of needle access. It comes on the heels of a strident anti-drug campaign [that] did not address treatment but rather wrapped users and pushers and entrepreneurs alike in the same cloak of hostile rejection. It has uncovered ugly evidence that the world has not changed with respect to prostitution and the unflagging double standard that perpetuates it as a profession. And almost worst of all, it speaks aloud the forbidden name of bisexuality and provides unwelcome evidence of its universality across the myriad human cultures that are struggling to maintain their identity in our pluralistic society.

"Its restricted patterns of transmission allow the virus to thrive in as medium of alcohol excess or drug-obscured judgment . . . The epidemic is swelling the growing army of the destitute, adding progressive neurologic deterioration to the appalling mix of chronic alcoholism, chronic mental illness, homelessness and helplessness. And finally, it fuels a right-wing flair which in turn nourishes a public taste for conspiracy and serves as a convenient substitute for common sense and hard work. Common sense would tell us that authoritarian approaches have never served to govern human sexual behavior, that drug use is flourishing in the face of pre-existing legal sanctions, and that voluntary change in personal and private risky activities is what is

needed to stop the spread of the AIDS virus; but the ideologues imply with their categorical solutions that such change can be accomplished by fiat and decree . . . .

"[But] we are by no means alone with this problem . . . It is a global problem and will never again be gone! The world changed with the appearance of the virus of AIDS: a new microbiological bomb has been detonated in our midst, and, like the advent of Hiroshima, the human immunodeficiency virus is a fact of life now for the whole human family, and we must learn to deal with it for the sake of our children's children."

At the end of that speech I used a quotation from Camus' The Plague that must, by now, have become almost tiresomely familiar to toilers in the fields of AIDS—but it serves well here: the conclusion of the doctor that "what we learn in time of pestilence [is] that there are more things to admire in men than to despise." The first years of the AIDS epidemic have underscored that, and the shadows of grief have been relieved by flashes of great humanity. It is the fate of many generations never to recognize greatness in their midst, or to do so only vaguely. By contrast we have had the privilege of knowing in the thick of social battle that we are in the company of heroes of our time—my friend Jonathan Mann, Director of the Global Program on AIDS at the World Health Organization, is a wonderful case-in-point, and a number of others are here today—and the common themes of myriad cultures give us new ways to learn to admire, and not despise! I am an inveterate optimist, and so you will forgive me if I conclude that way. The counterpoint of that heroism assures that the landscape of 2000 will not be desolate, that the dreadful AIDS snapshot already taken could turn out to be the ugliest of them, the tragic denouement of a rigorous twentieth century lesson in hubris and humility. At least there is a lot to be done—and perhaps, just barely, enough time to do it.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, February 1, 1990, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

FEBRUARY 2

9:00 a.m.
Armed Services
To resume hearings on the implications of changes in the Soviet Union and Eastern Europe for Western security.
SH-216

9:30 a.m.
Joint Economic
To hold hearings on the employment-unemployment situation for January.
SD-106

10:00 a.m.
Finance
Medicare and Long-Term Care Subcommittee
To hold hearings to examine issues relating to Medigap insurance policies.
SD-215
Judiciary
To resume hearings on the national drug control strategy program.
SD-226

10:30 a.m.
Joint Economic
To resume hearings to examine the economic outlook for 1990.
SD-106

FEBRUARY 5

10:00 a.m.
Budget
To resume hearings in preparation for reporting the first concurrent resolution on the fiscal year 1991 budget.
SD-608
Energy and Natural Resources
To hold hearings on the nominations of John Wesley Bartlett, of Massachusetts, to be Director of the Office of Civilian Radioactive Waste Management, and Robert H. Gentile, of Ohio, to be an Assistant Secretary of Energy for Fossil Energy, both of the Department of Energy.
SD-366

2:00 p.m.
Finance
To hold hearings on proposed legislation to reduce Social Security taxes.
SD-215

FEBRUARY 6

9:30 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Production and Stabilization of Prices Subcommittee
To hold hearings on proposed legislation to strengthen and improve U.S. agricultural programs, focusing on crop insurance.
SR-332
Armed Services
To resume hearings on the implications of changes in the Soviet Union and Eastern Europe for Western security.
SR-222
Energy and Natural Resources
Water and Power Subcommittee
To hold oversight hearings on S. 1554, to implement water rights settlements involving the Pyramid Paiute Tribe, the States of California and Nevada, and other parties with respect to the waters of the Truckee and Carson Rivers and Lake Tahoe in Nevada and California.
SD-366
Governmental Affairs
To hold hearings on S. 2006, to establish the Department of the Environment, and to provide for a global environmental policy of the United States.
SD-342

10:00 a.m.
Appropriations
Labor, Health and Human Services, Education Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1991 for the Department of Labor, focusing on the Office of the Secretary of Labor and the Office of Inspector General.
SD-138
Commerce, Science, and Transportation
Foreign Commerce and Tourism Subcommittee
To hold oversight hearings on chemical exports to Central and South America.
SR-253
Judiciary
To hold hearings on the nomination of Clarence Thomas, of Virginia, to be United States Circuit Judge for the District of Columbia.
SD-226

2:00 p.m.
Agriculture, Nutrition, and Forestry
Domestic and Foreign Marketing and Product Promotion Subcommittee
To hold hearings on proposed legislation to strengthen and improve U.S. agricultural programs, focusing on export and market development programs.
SR-332
Commerce, Science, and Transportation
To hold hearings on the nomination of Edward J. Philbin, of California, to be a Member of the Interstate Commerce Commission.
SR-253

FEBRUARY 7

9:00 a.m.
Armed Services
To hold hearings on the military strategy and operational requirements for NATO defense.
SH-216

9:30 a.m.
Agriculture, Nutrition, and Forestry
To hold hearings on proposed legislation to strengthen and improve U.S. agricultural programs.
SR-332
Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings on S. 1643 and S. 1660, to provide protection to consumers in connection with telephone services.
SR-253
Governmental Affairs
To continue hearings on S. 2006, to establish the Department of the Environment, and to provide for a global environmental policy of the United States.
SD-342

10:00 a.m.
Appropriations
Labor, Health and Human Services, Education Subcommittee

SD-366

HOUSE OF REPRESENTATIVES—*Thursday, February 1, 1990*

The House met at 11 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Give us, we pray, O God, the full blessing of Your spirit that whatever our task, or whoever we are, or whatever our deepest concern or need, we will not walk alone through the paths of life. We are grateful, merciful God, that Your Word of faith and hope and love abides with us always. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. The Chair will ask the gentleman from Texas [Mr. PICKLE] if he would come forward and lead the membership in the Pledge of Allegiance.

Mr. PICKLE led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

SUNDRY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Kalbaugh, one of his secretaries.

THE PRESIDENT'S SPEECH

(Mr. McNULTY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McNULTY. Mr. Speaker, I think the President gave a very good address last night. I was especially pleased with his proposal on troop reductions in Europe which will bring the levels down to 195,000 on both sides, which means that we will have to reduce by about 65,000, but the Soviet Union by over 300,000 or almost 5 to 1.

When he got onto the subject of domestic policy, Mr. Speaker, I thought he got hold of an advanced copy of the Speaker's statement to the Nation, because he basically outlined the Democratic program. He talked about clean air and the environment. He talked about child care, the Americans with Disabilities Act, which we hope to enact very soon, education programs in general, and drug education in particular, which we think is a priority.

I hope that in the weeks and months ahead the President's actions match his rhetoric, and I hope he continues to advocate the provisions of the Foley plan, and if he does that, we are going to have a very productive year in 1990, indeed.

MONEY LAUNDERING BILL

(Mr. SAXTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SAXTON. Mr. Speaker, I rise today to discuss the drug war. Specifically, the gas in the engine of the drug trafficking machine—money laundering.

In the past, the Congress and the Treasury Department have done an admirable job attempting to stop money laundering in banks.

But just like cockroaches, these drug thugs have run from the light focused on the banks—to the darkness of the largely unregulated world of nonbank financial institutions.

Many times, these check cashing businesses, and other storefront currency exchanges, exist purely as fronts for drug peddlers to clean tainted money.

Primarily, the oversight responsibilities in this area have been left to the States. Quite frankly, the States are not doing the job.

Well, now is the time to give the States the incentive to shut down these drug "laundermats."

Today, I am introducing legislation which will require States to do a better job policing nonbank businesses. The bill also calls for the Treasury Department to monitor the States' progress, and recommend penalties against States which fail to act.

I urge my colleagues' support in plugging this hole in the circulation of dirty money. Money which is facilitating the death of thousands across this country and the world.

KEEP OUR COMMITMENT TO CIVIL SERVICE AND MILITARY ANNUITANTS

(Mr. PARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PARRIS. Mr. Speaker, in what has become an annual ritual, the administration has proposed the elimination of the cost-of-living adjustment for civil service and military annuitants. The President's fiscal year 1991 budget also proposes the permanent modification, beginning in fiscal year 1992, of the COLA formula for most civilian retirees. The revised formula, based on the Consumer Price Index minus 1 percent, would ensure the methodical erosion of civilian annuities—even without COLA cancellations.

Year after year, we continue to witness administration disregard for civilian and military annuitants in the form of such cuts. The Federal Government has never attempted to match private sector salaries across the board. Instead, for years it has successfully attracted talented individuals with the promise of important and fulfilling work in the public interest and with fair benefits. Now, these benefits are being tampered with after the fact for individuals who have already devoted years of service to their fellow citizens. In my mind, Federal annuities represent a commitment by this Government of equal weight to that made to Social Security recipients and must be preserved and protected.

This analogy is not lost on civilian and military retirees, who did not participate in the Social Security Program during their years of public service, and instead relied upon their Federal pension to provide old-age income security. As my colleagues know, CPI-based cost-of-living adjustments are guaranteed by law for Social Security annuitants, but unfortunately not for Federal and military annuitants.

Mr. Speaker, I suggest that it is time to extend this principle of fair treatment and honest commitment to our public sector retirees. Let us end once and for all the annual tinkering with annuitant COLA's, and restore cost-of-living adjustments to the fiscal year 1991 budget.

REPORT ON PROGRESS IN AERONAUTICS AND SPACE DURING 1987—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore (Mr. PICKLE) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Science, Space, and Technology.

(For message, see proceedings of the Senate of today, Thursday, February 1, 1990.)

REPORT ON GENERALIZED SYSTEM OF PREFERENCES—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Ways and Means.

(For message, see proceedings of the Senate of today, Thursday, February 1, 1990.)

□ 1110

SAVINGS AND ECONOMIC GROWTH ACT OF 1990—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 101-145)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Ways and Means and ordered to be printed.

(For message, see proceedings of the Senate of today, Thursday, February 1, 1990.)

THIRD BIENNIAL REPORT OF INTERAGENCY ARCTIC RESEARCH POLICY COMMITTEE—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Science, Space, and Technology.

(For message, see proceedings of the Senate of today, Thursday, February 1, 1990.)

THE TRAGEDY OF ARMENIA

(Mrs. JOHNSON of Connecticut asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. JOHNSON of Connecticut. Mr. Speaker, the Azerbaijan Liberation Front has declared war on the Armenian people and the Soviet leadership has responded by dispatching the largest number of troops it has ever used inside its own borders.

As Soviet Ambassador Yuri Dubinin said yesterday army units and security forces were sent to Azerbaijan only to stop what he termed "an orgy of killings."

While widespread bloodshed has apparently been arrested, Armenians continue to suffer. And while order may return to the region in time, allowing Soviet Army troops to leave, the Armenian people will still face persecution until an agreement over the disputed Nagorno-Karabakh territory is reached.

I rise today to commend the Baltic nationalists, who have their own disagreements with Moscow, for offering to sponsor talks between the Azeris and Armenians. It is significant that the Latvians and other Baltic nationalists have seen the importance of settling these matters peacefully and, for the sake of Armenians now living in fear of further persecution, we must hope the Latvians prevail in their call for peaceful negotiation.

RESPONSE TO THE STATE OF THE UNION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri [Mr. GEPHARDT] is recognized for 5 minutes.

Mr. GEPHARDT. Mr. Speaker, it is my pleasure to submit for the RECORD the remarks of the Honorable THOMAS S. FOLEY, Speaker of the House, who last evening delivered an eloquent response to the President's State of the Union Address. His comments outline the unmet needs of this nation and an aggressive approach for meeting them.

REMARKS OF HON. THOMAS S. FOLEY, SPEAKER OF THE HOUSE, ON THE STATE OF THE UNION, JANUARY 31, 1990

Good evening. I'm Tom Foley, the Speaker of the House. Earlier tonight, you may have seen me sitting behind President Bush as he delivered his address.

The first time I was present for a State of the Union message, I was a young staff member working here in the Capitol for one of the giants of the United States Senate, Scoop Jackson of Washington State. It was the cold winter of 1962—a few months after the Berlin Crisis—and President Kennedy spoke eloquently, to the Congress and the country, of the "burden and the glory of freedom."

Today, as we begin a new decade, we join together to celebrate the glory of a new era of freedom. This new era is not a coincidence or an accident. Its coming is due in large measure to those who carried the burden for nearly half a century—Presidents and people alike; defenders and dissenters; Congresses and Administrations from Harry Truman to George Bush.

In a special way, the credit goes to successive generations of young Americans, the 25 million who have served in the Armed Forces since World War II and the 350 thousand who have been wounded or lost their lives.

In the end, the credit goes to all the American people, who have paid the costs and stayed the course of a Cold War that was the longest conflict in American history—and perhaps the most fateful conflict of modern history.

Some doubted that it could ever be ended except in defeat or in flames. But we as a nation met John Kennedy's challenge to "persevere, [to] look beyond our own shores and ambitions"—and so we have helped, in Ronald Reagan's words, "to turn the tide of history away from the totalitarian darkness and into the warm sunlight of human freedom."

The events are still unfolding, and the old world's new revolution of hope is still unfinished. But this is a time of honor and pride for America—and for free men and women everywhere.

We have a continuing obligation to fulfill—an obligation to those who struggle on, from South Africa to China. Who could ever forget the bravery of one Chinese student who stood all alone in front of a tank near Tiananmen Square and stopped it? We Democrats believe that it was wrong for the Bush Administration to yield to pressure from a communist dictatorship in Beijing; it was wrong for the President to veto a bill that would have safeguarded Chinese students in America from being sent back to their homeland's reign of repression. One lesson of the past forty-five years is that no Congress and no President should be timid in the defense of freedom.

There's another underlying truth in the ferment sweeping the globe. We are perhaps near the end of a great struggle, but we are certainly not at the end of history.

The 1990s will be a period of profound and continuing change. This new decade marks more than a division of time—and it will lead to more than a new century. For there are new realities to be grasped, new challenges to be met, and very different battles to be won.

In the 1990s, and well into the next century, the central challenge for America will be economic, not military. The greatest test of our strength will be in our classrooms, not our missile silos. The gravest threat will come not from any nation's attempt at world domination, but from every nation's complicity in the worldwide destruction of the environment.

This period of vast change will be a period of fundamental choice. Much of what the President said tonight I agree with. Some of what he said, I disagree with.

But my purpose here is not to debate point by point. I'm here to tell you where we as Democrats stand, the values we hold—the vision we have—the choices we believe in.

First, we believe that we must renew our economic capacity and regain control of our economic destiny.

Today, the America that invented the computer chip and the VCR has seen its market share shrink or vanish in both products.

We are falling dramatically behind in new technologies such as high definition television.

As Democrats, we're not satisfied with a trend that has seen this nation drop from first to sixth in standard of living. We're not satisfied to be told that within ten years, the average West German worker may earn 150% as much as the average American worker. We're not satisfied to have American students rank near the bottom of the industrial nations in math and science.

We will set a national goal of making our schools once again the best in the world by the year 2000. On this issue, the President's words seem to agree with us, but his actions say something else. You can't become the education President, with all the problems we face in this area, by proposing a meager 2% increase in the education budget. That's a fact. And for all the talk, that's exactly what the President proposes to do.

We also believe that American corporations have a responsibility and should have the opportunity to re-invest in America. We believe that the wave of corporate mergers and leveraged buy-outs is a waste of resources. It leaves Wall Street raiders with large sums of money in their pockets—and it leaves our companies overburdened with debt and weakened in competing for world markets.

This issue represents another real difference between us and the Republicans. For too many years, their policies have encouraged debt and quick profit instead of investment and long-term growth. The result: the amount of private resources put into research and development has fallen in real dollars.

It's imperative to reverse the trend—and to secure America's place on the frontiers of enterprise and invention.

At the same time, we must demand that nations trading with us give our products an equal chance in their markets—products ranging from innovations in the service sector to the abundant harvests of American agriculture.

Make no mistake about it. We favor expanded trade, but we reject the idea of one way free trade. We believe this nation should be in the business of exporting the goods our workers make, not the jobs our workers need.

We also believe in encouraging a rise in savings, which have collapsed to a record low during the 1980s. The Republicans say they want to do this in part by cutting the capital gains tax, a cut which would give 80 percent of the benefits to the richest 1 percent of Americans. Instead, we are fighting to restore IRAs—so middle income families can save as much as $2,000 a year tax-free—and then use the money for their own retirement, or as a down payment on a first home.

We took on the struggle against the capital gains proposal when the odds were against us. We won last year—and this year we will do all we can to make sure that the greatest part of any tax cut, of any kind, goes to those of you who live on a paycheck—not just the few who have the highest incomes, the largest stock portfolios, and, by the way, the potential for the biggest tax shelters.

This issue goes to the heart of the reason we are Democrats: Above all else, we stand with you, the people who go to work and pay the taxes. It is your cause to which we are committed, and your side on which we fight.

So we will also fight for the most effective Clean Air Bill—even though that may offend entrenched and powerful interests.

We will fight for child care—so that working parents don't have to choose between their family's standard of living and their children's standard of care.

We will fight for campaign finance reform. We disagree with the Administration's opposition to limits on campaign spending. Let's be blunt about it. Don't we all know there is simply too much money being raised and being spent in American politics?

And there is another issue on which we have only just begun to fight: this Administration's practice of misusing the Social Security trust fund to hide the size of the federal budget deficit.

Social Security involves more than a trust fund; it involves the basic bond of trust between our people and our government. From the beginning, Social Security has been the Democratic Party's proudest achievement. We reject the suggestion of some Republicans to privatize the system. They say that's a new idea. We think it's the same old bad idea, another version of the repeated Republican attempt to undermine Social Security.

Finally, as Democrats, we believe that there are areas where the government simply does not belong. We will continue to defend a women's right to choose—for we are convinced that politicans cannot and should not attempt to make the choice.

But we also believe government can have a positive role—not to dominate, but to help people improve their own lives.

The reason we have so many homeless in America today is not because government has cared too much, but because government has cared too little. We have to do better than that—on a whole range of issues.

We will seek to secure the right of all our children to learn in better schools and to earn a better life.

We will seek to secure the civil rights of all our people. We can't celebrate freedom abroad and then deny freedom at home.

We are also committed to the strongest possible attack on the drugs that are attacking our society and our families. On this we are all united. Narcotics destroy the children of Democrats and Republicans alike.

One of my first jobs was as a deputy prosecutor in my hometown of Spokane, Washington. I believed then and I believe now in enforcing the law—not in legalizing drugs. We won't win this struggle overnight, or in a few months, or even over a year or two. But together we can begin to reclaim our streets and our schools and our neighborhoods.

Let me say it again. We will work with the President wherever and whenever we can. On some issues, we will have differences because we care deeply about certain principles—and about the people who have been the abiding concern of the Democratic Party. Today, we Democrats stand, as we have before, for working families. We stand for both economic justice and economic opportunity. For protecting the environment. For senior citizens and the soundness of Social Security.

And where we must, we will disagree with the Administration. We will stand our ground when that is the only way to stand for you.

Above all else, we have high ambitions for America in the 1990s. We cannot be content to be bystanders, riders on the storm of history. For we are living in one of those rare seasons of change that come to few generations. We are being challenged by countries who say America is in decline—that we can never again be the best in the world marketplace. We do not accept that. We reject those who assume that Americans aren't smart enough, or disciplined enough, or tough enough to rise to the moment.

We were in the 1940s—and we saved the post-war world. Now we must strengthen our own country. The time has come for America to help herself, to rebuild, to re-energize, to reinvigorate our hopes, to gather together our talents and to reclaim our place in the world.

In the most span of this decade, we have a long way to move as a nation. Let us resolve that on that day when America enters the twenty-first century, we shall be first—first economically, first in education and science, first in human decency and human rights.

Thank you, God bless you, God bless our country.

Goodnight.

PRESIDENT BUSH'S STATE OF THE UNION ADDRESS AND THE MAY 19 AMERICAN OPPORTUNITIES WORKSHOP

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. GINGRICH] is recognized for 60 minutes.

Mr. GINGRICH. Mr. Speaker, I will not take all of my time. I am going to take a little while to talk about President Bush's State of the Union Address and the May 19 American Opportunities Workshop that I have been talking to my colleagues about over the last 2 weeks.

Last night's State of the Union Address I thought was a historic speech, a speech which clearly lays out for the 1990's a way of thinking about the future of the United States, the future of the American people, and frankly, because of the nature of the modern world, a way of thinking about the future of the entire human race.

President Bush I thought clearly outlined his vision of the future, the values that he believes matter, and the direction he hopes America and, through American leadership, the world, will take.

I think it is very important to understand the context of this speech. I want to talk about it at three levels. First what are the vision, values and direction which are unique to President George Bush and to the movement that he is the leader of, and how do they differ from our friends on the left and the kind of response we got at one point last night when literally one-half of this Chamber was standing and applauding and the second half was sitting and staring, and what does that tell us about the choices ahead for America and the choices involved in American politics.

Second, the President's call for a decade of invention, for a period of involvement, of activism, of finding new and better ways of doing things, in particular his emphasis on education, but in fact a call that comes up again and again, both in his speech, and I am going to refer briefly also to his budget proposal, both his own statement and the very fine statement by Budget Director Darman in talking about the need for change.

The third, some specifics. I was very struck last night when I went out and talked to the Press Corps after the speech that some of my Democratic colleagues felt the speech lacked specifics, that there were not enough specifics, when in fact, as I think I will prove in the next few minutes when I walk through it, there are some very significant specific challenges to the Congress and specific requests for leg-

islation and for activism on behalf of the left branch.

Let me first start with vision, values and direction. One of the things which seems to be the most confusing to our friends on the left and to the Democratic leadership is the fact that President Bush, like President Reagan, represents a particular set of ideas and values, a particular vision of how America works and what America is all about; that President Bush in a sense represents the second phase of a movement which was begun in the 1950's by Bill Buckley and Barry Goldwater and Ronald Reagan; that President Bush represents the transition from the opposition conservatism, which between 1955 and 1980 won the intellectual fight with the American left in terms of popular opinion, and the emergence under Bush's leadership of governing conservatism which takes those basic values, those basic beliefs, as articulated by Bill Buckley and Barry Goldwater and Ronald Reagan, and begin to evolve them for the 1990's, for the baby boom generation, into a philosophy and a vision of governing, of solving problems, of in fact making things work.

Let me point out some very specific differences between what a President McGovern or a President Mondale or a President Dukakis might have said representing the values of the left and the national Democratic party and what President Bush in fact said, representing the vast majority of Americans.

First of all, he talked at the very beginning of the speech:

Tonight, I come not to speak about the "state of the government"—not to detail every new initiative we plan for the coming year, nor to describe every line item in the budget. I am here to speak to you and to the American people about the State of the Union, about our world, the changes we have seen, the challenges we face.

The point I would make is, if you start with a broadly left wing view of the world, if I can use that term, you start from a tradition of socialism, a tradition of bureaucratic welfare state, a tradition of Government being important.

From the standpoint of the left, the President's job is to talk about the state of the Government. That is why when you listen to the left talk they measure proposals in terms of how much more bureaucracy, how much more Government, how much more taxes, how much more are we going to spend in Washington.

But if in fact you represent a center right coalition in the broad values of the conservative movement, your concern is for the entire country. You start and say not just is the Government better off, but are the American people better off? Not just is there more money in Washington's Government Treasury, but is there more money in the family budget, is there more money available for charity, is there more money available for nonprofit activities, is there more money for local government and for State government?

So in a sense you have a larger world view in terms of the conservative movement that starts by talking about the state of the Union, not the State of the Government.

That is the very first striking difference. You see that translated, I might suggest, when you look at the budget of the U.S. Government as presented by President Bush and Director Darman, and you then look at how the liberal Democrats reacted to that budget with their focus on why aren't we raising taxes, their focus on how much more are you going to spend in Washington, when in fact one of the major drives of President Bush and of the Bush administration is to create more opportunity for private initiative, more opportunity for the thousand points of light, the individual volunteer, more opportunity for local government and city government and State government, more opportunity for voluntary nonprofit activities.

In fact, one of the reasons we are so opposed to raising taxes is that we think America and the Union are better off by having more money in the family pocketbook so families can make decisions, where our friends on the left and in the national Democratic leadership think that America is better off if Government has more money. Therefore, as you saw last night when the President promised to get to a balanced budget without raising taxes, there were very few of the Democrats who stood and applauded. Because from their legitimate value system and their ideology, a balanced budget without a tax increase is a smaller Government, and from their standpoint, a smaller Government is by definition a less helpful America.

□ 1120

From our standpoint, because of our belief in entrepreneurial free enterprise, our belief in private charities and private initiatives, and our belief in State and local governments we think it is very possible to have a Federal Government that balances the budget without a tax increase, and to have a stronger, more dynamic and more innovative America. Part of that difference occurs again as a base of values.

President Bush continued an emphasis that Ronald Reagan began when he said the recent remarkable—

* * * events * * * validate the longstanding goals of American policy—a policy based on a single, shining principle: the cause of freedom.

America—not just the Nation—but an idea, alive in the minds of people everywhere. As this new world takes shape, America stands at the center of a widening circle of freedom—today, tomorrow and into the next century.

Our Nation is the enduring dream of every immigrant who ever set foot on these shores—and the millions still struggling to be free. This Nation—this idea called America—was and always will be—a new world. Our new world.

Notice what President Bush is saying here, that America is not a geography, America is not a racial background, America is not a birthplace. He said "this idea called America."

What is the idea? It is the idea which he goes on to quote later, interestingly quoting a Czech worker, and I notice that when he was here Lech Walesa used the same quote, and I want to repeat the quote, of course, from the Declaration of Independence: "We hold these truths to be self-evident. That all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty and the pursuit of happiness."

In that quote that is the emphasis which almost all conservatives would agree with, and most Americans I believe would agree with. The emphasis is on the right to the pursuit of happiness. It is not on the redistribution of wealth, it is not on class warfare, it is on envy of the successful, it is not on setting up some system to guarantee that everyone has a minimum opportunity, or everyone has a minimum guaranteed result. It is a focus instead on maximum opportunity rather than minimum result. It is a focus on saying that the unalienable rights include life, liberty and the pursuit of happiness, and I think that is an important distinction.

Our friends on the left often sound as though they have created a bureaucracy of happiness, they would give out happiness stamps, and of course, in a sense, President Carter in his "malaise speech" virtually offered equality of misery and ensured that as America decayed that we decayed equally. We are talking different philosophies, one of taking risks, of the right to fail, and a philosophy of the right to go out there, and the right to try to live out your dream, a philosophy of encouraging new energy and new investment and new commitment and new entrepreneurship.

President Bush went on to say:

It's no secret that, here at home, freedom's door opened long ago. The cornerstones of this free society have already been set in place: Democracy. Competition. Opportunity. Private investment. Stewardship. And of course, leadership.

Notice the cornerstone as described by George Bush: Democracy. Every person has a right to play. Competition. That is an important point. Our friends on the left went through a period which has virtually crippled American education in which they said let us not grade students in a way that

will hurt their feelings. If Johnny cannot read, let us promote him anyway. If Sally cannot do math, let us promote her anyway. As a result, children lost the excitement and the vigorous intensity of competition. Getting an A no longer meant anything. Graduating with honors no longer meant anything. We had social promotions without achievement and it cheapened the whole process of education, because on the left the idea of competition is very risky. In a very real sense, if the left had controlled the recent Super Bowl, every team would have been allowed to play one quarter and win that quarter. Somehow they would have distributed evenly what the San Francisco 49'ers won by merit and hard work.

So we represent a commitment to how do we have a more competitive inner-city, how do we increase competition. I will give my colleagues one simple, dramatic example. Young black, Hispanic and Asian entrepreneurs ought to have a right in New York City to have a taxicab. They ought to have the right to open up a taxicab as a small business. It is today legally impossible for persons in the minority in New York City to compete with the monopoly of the taxi guild that in fact guarantees that unless you can afford to buy the taxi medallion you cannot play.

We want to encourage competition. We want more competition in schools, we want more competition in the delivery of services, we want more competition in health care, we want more competition in the private economy

The third word President Bush used after democracy and competition was opportunity. Again notice the difference. Our friends on the left emphasize problems and they emphasize welfare. They always have a new problem to worry about. They always have a new reason to set up another bureaucracy in the welfare state.

We are suggesting something else, that America is a land that grows fastest when it focuses on opportunity and success, that if we can encourage young people to focus in a positive way on the opportunities in their lives, if we can get young people to focus in a positive way on what they could be doing with their time, that we could get further ahead.

Let me give a couple of examples. I might mention, by the way, intellectually this is not a small idea. Abraham Maslow was a very famous psychologist who studied successful people, and he got into the habit and developed an entire psychology of healthy lifestyle and healthy self-worth, because he said most of modern psychology had arisen by studying pathologies. Psychologists, after all, tend to spend time with people who are sick enough that they want to pay to go to a psychologist. Maslow said wait a second, most people are more interested in how to be healthy than they are in what kind of sicknesses are available. So he studied people who were achievers, people who were successful, and we are making the same suggestion. It is important to study the young black entrepreneur who is in fact opening a successful business. It is important to study the young Hispanic immigrant who is getting his Ph.D in math. It is important to study the young Asian who is becoming a community leader and creating a better neighborhood. It is important to go out and encourage young people to focus on success.

This is, frankly, a great challenge to our news media, not the challenge to report good news, to be syrupy and create a Disneyworld effect on page 1, but the challenge to say look, most of America most mornings is a success story. If the focus is only on the failures, people are being misinformed and the media is giving them a very destructive and one-sided view of reality.

What young people need to learn is how to succeed, not how to study the pathology of failure. So we emphasize opportunity. We want to ask the question of the bureaucratic welfare state: how can we create more opportunities for people, how can we create more opportunities for health care, how can we create a better chance for people to succeed?

The fourth thing President Bush suggested was private enterprise. This is a very core difference. Our friends on the left and the National Democratic Party leadership love public investment. They love public jobs programs. They love things like the old CETA Employment Program where the bureaucracy is set up and the bureaucracy will hire somebody for 3 months, and the bureaucracy creates jobs.

If a Member came here on the floor and said I am going to recommend 500,000 bureaucratic jobs, most of our friends on the left would have stood and applauded. We, however, in the center right coalition that President Bush leads, we believe that the best way to train people, the best way to employ people is through entrepreneurial free enterprise. We believe what Gorbachev and the Communists are already discovering, that state controlled bureaucracies, whether it is the American model, the European socialist model, or the Communist model, that state controlled bureaucracies are not good at investment. They do not pick the winners very intelligently. We believe that the marketplace is a smarter way of choosing how to invest in the future. If we want to create permanent jobs, as a general rule it is better to create them through entrepreneurial free enterprise.

That means, for example, we believe in a capital gains tax cut because we know it will create several hundred thousand new jobs. I saw one estimate that the capital gains tax cut would create 500,000 new jobs.

If went to our friends on the left and said: "Would you like a government jobs program of 500,000 new jobs?" They would at least pay attention. They would consider it seriously. They would try to find a way to do it.

□ 1130

But when we go to them and say, "What if we increase private investment, private saving, what if we encourage young people to save to buy a home and their savings in the interim were used to create jobs, what if we could create 500,000 private jobs," somehow on the left that is seen as a bad thing because class warfare and envy of the successful is a value so deep in the left that it cuts off opportunity and private investment.

Stewardship, President Bush introduced a word which we have not talked about for a long time, a very old-fashioned word and yet a word which I think I think will become a hallmark of the 1990's. He talked about stewardship, he talked about the idea that, you know, you have an obligation to care for what you have inherited. We have inherited a great country and a tremendous continent with enormous natural resources. We have inherited wonderful national parks, we have inherited an opportunity to extend democracy and to create an even better system among a free society, and we must learn to be stewards.

I once had a friend who learned the hard way about stewardship of his car. When he first bought a car, he did not understand why you had to change oil and he did not understand why the red light came on. The result was one day he went out and started his engine and it seized up and he ruined the car. He learned a very expensive lession, that if you do not do maintenance, if you do not take care of things, they break.

I think that is what President Bush is talking about, stewardship; democracy and free enterprise and the rule of law are only one generation long. If that generation does not teach its children the basic principles, if it does not create good citizens, then we do not have democracy and the rule of law and free enterprise in the next generation.

Civilization in the sense that we mean it in America is only as good as the generation that is teaching its children because it is not automatic, it is not natural, it is not the way of the jungle.

And so if we want to have in the inner city, if we want to have on the New York subways, if we want to have across America a sense of what entre-

preneurial enterprise, the justice of the rule of law and the concept of democracy is all about, we have an obligation to reestablish stewardship as a responsibility.

Again I think that is a little different than our friends on the left, who would basically say you cannot really ask private citizens to be stewards; instead you ought to establish a bureaucracy of stewardship.

That is why, for example, on child care there is such a dramatic difference between President Bush and those of us in the conservative movement who believe that child care should focus on strengthening parents, should focus on giving parents the resources to educate their children and to choose the kind of child care they want, and those of our friends on the left who believe that the only good child care is through a public bureaucracy, preferably one that has a unionized staff.

Finally, President Bush talked about leadership. He said basically, as his sixth cornerstone, you have to have leadership for a free society to survive.

I think in a sense what we are seeing in Gorbachev is proof that leadership in America is working, that an America which is willing to take on the project of making democracy and free enterprise work is an America strong enough that other political leaders will decide they want to be more like our system, and that is part of why we are seeing communism disintegrate.

President Bush went on to say another key value, I think, and this is a challenge for all of us.

> Our challenge today is to take this democratic system of ours—a system second to none—and make it better. Better America where there is a job for everyone who wants one.

Now I think this is very important as a concept. What President Bush is saying is that we should not be complacent. I think it is important to recognize here is a man who is apparently the most popular President in history of polling, he is not coming in here saying, "Let's rest on our laurels," he is saying, "Our challenge is to make things better. Our challenge is to improve things." And he goes through a series of steps of improvements that I will come back to, but I want to stay for a moment on his concept of where we are going and what we are trying to do at the values level.

I think it is very important to recognize again what President Bush is saying. He talks about the need to invest in America, he talks about investment occurring at three levels: physical capital, intellectual capital, and human capital.

Again I think the contrast with the left is very great. In the first place, it is very hard to imagine a Dukakis or a Mondale or a McGovern, one, that they ever would have had a paragraph on capital; that they would have even talked about the idea that capital is a necessary part of prosperity.

One of the tragic problems with our friends on the left is that they love jobs but they hate job-creaters; they love the idea of success but they hate to think about people who are successful; that they are much more into envying success than they are in studying it and emulating it.

President Bush's point is simple: You get physical capital in part with things like a capital gains tax cut. And that is very important. But you also need intellectual capital. You only get that by encouraging science, research and development, engineering, entrepreneurship, educational reform.

You also need human capital. Human capital has to come through three basic changes in the way we, America, currently exist. First of all, the emphasis on human capital, as he put it:

> The talented workforce we will need to compete in the global market. And let me tell you: If we ignore human capital—we lose the spirit of American ingenuity—the spirit that is the hallmark of the American worker. The American worker is the most productive worker in the world.

There are three threats to human capital in the United States today. The first threat is drugs and violent crime. A drug-addicted 15-year-old is a lost hope for the future. A drug-addicted 20-year-old is a lost worker. And we have to confront the fact that winning the war on drugs and violent crime is a first step toward saving and liberating human capital.

I think it is a disgrace, something that the Democratic leadership of the Congress has to confront, that President Bush sent his package on drugs and violent crime last June and we still have not gotten it out of committee and brought it to the floor, that we stand here today in February with proposals to save our children by passing strong proposals from President Bush on drugs and violent crime and today we still have not acted in the Congress. I think that is a failure of the Congress.

But in addition, there is a second challenge. That is the tragedy particularly in the inner cities of our prenatal program and the number of our young children who are born with very, very severe problems. President Bush made mention of that very serious problem when he talked about asking Secretary of Health and Human Services Lou Sullivan to work on the problem of health care and of how we rethink health care and of how we help those young children.

President Bush emphasized the importance of those children. He said, and I quote:

> All kids are unique, yet all kids are alike. The budding environmentalist I met this month who joined me in exploring the Florida Everglades, the Little Leaguers I played catch with in Poland, ready to go from Warsaw to the World Series, even the kids who are ill or alone, God bless those boarder babies born addicted to drugs, coping with problems no child should have to face. You know, when it comes to hope in the future every kid is the same, full of dreams, ready to take on the world, all special because they are the very future of freedom. To them belongs this new world I have been speaking about.

Those are the children, the children born in some of our inner city hospitals already addicted to crack, already a victim of AIDS, children born with malnutrition, children born with severe problems; those children have to be saved because if you are not healthy, if you are born with a health defect, if you are born already faced with a challenge either mentally or physically, then it is harder for you to be the human capital on which we must build America's future.

So our second challenge, in addition to winning the war on drugs and violent crime, is to rethink health care, particularly for the very poor and particularly in the inner city. I am delighted that the Secretary of Health and Human Services, Lou Sullivan, has been asked to work on this very problem which is the key to human capital for America.

But there is a third requirement for human capital. And that is to recognize the scale of change we need in American education. President Bush spent a significant part of the State of the Union talking about change in education. He said, "Education is the one investment that means more for our future because it means the most for our children. Real improvement in our schools is not simply a matter of spending more. It is a matter of asking more—expecting more—of our schools, our teachers, of our kids, and our parents and ourselves. That is why tonight I am announcing America's education goals—goals developed with the Nation's Governors. By the year 2000 every child must start school ready to learn. The United States must increase the high school graduation rate to no less than 90 percent and we are going to make sure our schools' diplomas mean something. In critical subjects—at the 4th, 8th, and 12th grades—we must assess our students' performance.

□ 1140

By the year 2000, U.S. students must be first in the world in math and science achievement. Every American adult must be a literate worker and citizen. Every school must offer the kind of disciplined environment that makes it possible for our kids to learn. And every school in American must be drug free. Ambitious aims? Of course. Easy to do? Far from it. But the future is at stake. This Nation will not

accept anything less than excellence in education.

There are 2 points to be made about President Bush's commitment in education. The first is, it is exactly the right commitment. It is a level of excellence, a level of achievement, and level of reform that every American should be able to applaud and support. The second is, it simply cannot be achieved within the current structure of education. There is no hope for the New York City schools with their 45 percent dropout rate, their massive bureaucracy, their unionized work rule, their incredibly archaic approach to decisionmaking, the massive levels of corruption which grand juries are finding in the New York City schools. All of the problems, the New York City schools as they are currently structured, are not going to achieve the goals President Bush has set out for the year 2000. Period.

Therefore, one of the challenges to Members has to be to say, how will we rethink education. How will we challenge the entire society to achieve? Notice President Bush said, and clearly stating this as a society problem, not a school problem. He says as his very first goal, "By the year 2000 every child must start school, ready to learn." That puts it right back at preschool environment. How do we have neighborhoods encouraging learning? How do we have parents encouraging learning? How do we rethink the welfare system to encourage learning? We have an obligation to start at the beginning, starting with prenatal care, starting with learning how to parent, starting with how we have rewards.

I think we have to be fairly daring. One of the things that I am working on, is to take some of the money I am earning from speeches, and this summer I will go to public housing projects and I will pay some third-graders $2 a book for every book they read. Basically, have an earning-by-learning program that says to the poorest children in our community, we have a way for these poor children to buy the new bicycle, to buy the new blue jeans, to take your parents to Six Flags Over Georgia or Stone Mountain for a weekend. The way is to earn money by learning. If the child in that public housing project who has the most money has earned that money by reading the most and learning the most and doing the most, maybe that will work. I am not convinced that is the answer. I am not convinced it is the kind of new approach and new experiment and new incentive that we have to be prepared to develop.

One of the reasons we are doing an American Opportunities Workshop on May 19 is to try to encourage every person who wants to participate across the whole country to recognize that achieving the values, achieving the goals that President Bush has outlined, is not just a question of the Federal Government; that parents, nonprofit groups, local schools, private schools, businesses, communities, all people are going to have to rethink how we function, in order to achieve the goals President Bush has described.

Let me emphasize this: Our friends on the left look at those goals, that ambitious statement of the need for change in education, and look at the budget of the U.S. Government, and having totally misunderstood President Bush's point about the State of the Union and the obligation of all Americans to be involved, they measure his commitment by dollars in the Federal Department of Education. That is simply, flatly, a philosophical difference. It is not that they are necessarily right and he is wrong, but they are two different philosophies. If a person is a left-wing American, as most of the national Democratic leadership is, if your value structure is that all good starts with the bureaucratic welfare state, and that all good can be measured by how many Government employees we have, and the only way to prepare kids is to make sure that as they leave the hospital they go straight into a public bureaucracy so that the way we prepare them to go to school is to set up a preschool bureaucracy like the schools they will go to, then by definition all good is measured by the yardstick of taxes and money. That is why last night in what I thought was the most revealing moment of the evening, when the President offered to balance the budget with no new taxes, it was legitimate for most Democrats to not applaud. Given their presumption that the only good America is a bureaucratic welfare state America, that the only good future is a big government high-tax future, what he was suggesting was terrible. That is not a sign that they are bad people. It is simply their value system, based on European socialism and the idea that command bureaucracies are good, and private enterprise and private initiative and voluntarism are irrelevant at best, and bad at worst. From their standpoint, it is always better for a bureaucracy to do it.

See how different fundamental arguments over values and approaches are? In fact, I found it fascinating last night, imagine a President of the United States would come here and say to the Congress:

> We are serious about being ready to meet that challenge. We are getting our own house in order. We made real progress. Seven years ago, the Federal deficit was 6 percent of our gross national product. In the new budget I sent up 2 days ago, the deficit is down to 1 percent of gross national product. That budget brings Federal spending under control. It meets the Gramm-Rudman target, brings that deficit down further, and balances the budget by 1993 with no new taxes. Let me tell you there is still more than enough Federal spending for most of us, $1.2 trillion is a lot of money.

Now, there are two key points to understand about the difference between liberal Democrats, and George Bush and the conservative movement. First of all, the President suggests that the phrase, "brings Federal spending under control" is a good phrase. The President said that phrase as though most Americans think it is a good idea to bring Federal spending under control. However, if a person is a true left-wing American, if your core value is a bigger, better, bureaucratic welfare state, more money in Washington, more power in the Government, that is a terrible concept. Nothing could be further from the values of a leftwinger than the idea of bringing Federal spending under control, because where we who are conservatives want to liberate the family pocketbook, we want to liberate the family budget, we want to liberate the small business, we want to encourage the local government. We think it is wonderful if Berkeley, CA, decides to do whatever they want to, however liberal they are, as long as they do it with their own money; from a standpoint of a true liberal, that is wrong.

Leftwing Democrats believe if we leave all that control back there in private pocketbooks and in private businesses and in family budgets, they will make dumb decisions. Whereas, if only we hire them and employ them in a bureaucracy, they will get smarter. Therefore, I think it is a very important value difference, and that is why so few Democrats applauded it. None of them stood last night when the President went to his second point, no new taxes.

Those Members who are conservative believe President Bush is right to promise no new taxes. We think when we look at the kind of corruption we see in the Washington, DC, government where we had one of the drug counselers go to the hospital the day before yesterday with a drug overdose, we do not think we should pay our tax money to hire a drug counseler who OD's, on drugs. If we look at the New York Times about the principal in New York City who is corrupt, we do not think we should pay tax money for corrupt principals. Yesterday, when the Detroit City Council decided they have a budget crunch, they took away Mayor Coleman Young's private jet and decided maybe the mayor could not afford private jets with that much proverty in Detroit. That is a rational decision. Why should the mayor have his own private jet? We do not think your taxes should be raised to send money from Washington to a city government to supply a jet for the mayor. That is fundamental value difference.

On the other hand, as we saw with Walter Mondale's policy pledge in 1984, he said he would raise taxes. As we saw with the absence of applause last night, as we saw last week when Senator HOLLINGS proposed a 5-percent national sales tax, there is a deep underlying passion on the part of liberal Democrats to find one more excuse to raise taxes.

There was a third point President Bush made on which there is a fundamental value difference. The third point, $1.2 trillion is a lot of money. Let me emphasize, trillion is a big number. When I was young, Everett Dirksen used to say, "A billion here, a billion there, pretty soon it adds up to real money." Now we are at a point we cannot just say that. A million dollars is a lot of money. For most American private citizens, a million dollars is the stuff of lotteries. We are all impressed that Joe Montana earns several million dollars. That is a big amount of money. If a person had a small business that someday would get to be successful enough to sell it for a million dollars, a person would feel real successful. There are a million million dollars in a trillion. So, think about what we are talking about.

We in the Congress have been sent his budget. This budget proposes $1,233,000,000,000 in spending. If we had a million dollar bill sitting here, we would have 1,233,000 in order to represent the spending in this budget.

□ 1150

Now, those of us who are conservative think that that is a lot of money—$1,233,000,000,000.

Let me put it this way: the Federal Government is bigger than any economy in the world except the United States, Japan, and Russia. That is our Federal Government. The Federal Government will spend the equivalent of the entire West German economy. We who are conservatives and President Bush believe that is probably enough money, that we should be able, for the size of the entire West German economy, to find a way to educate people, to find a way to lock up drug dealers, to find a way to defend America, and to find a way to provide commonsense health care.

That does mean change. It means that we cannot stay with the bureaucratic welfare state, we cannot afford the red tape, and we cannot afford the dump procurement ideas. We cannot afford the things that are out there that are not working. We have got to actually apply common sense. We have got to apply new, innovative approaches.

But we think, if you apply innovation, if you apply information technologies, if you use entrepreneurial free enterprise principles, probably, for $1,233,000,000,000 we can get the job done.

Our friends on the left do not agree. First of all, because they represent the bureaucratic welfare state and their union allies of the welfare state, they do not want to change. They do not want innovation, they do not want new ideas, they do not want new approaches.

In the second place, they think that the West German national economy is not enough. They want to add Spain or Italy; they want to add some other amount. They think if only we had a little more, it would work.

Let me give an example. The New York City budget is $25 billion. The city government of New York spends $25 billion. One would think that for a city that is a lot of money. We think that for $25 billion the No. 1 challenge to Mayor Dinkins would be to rethink city government, to apply commonsense principles, to cut out redtape, to rethink the union work rules, and to apply practical small business ideas to allow the city to function. We think that tomorrow morning, if they would apply commonsense, New York would work better than it would if they would stay with the bureaucratic welfare state and revise the principles on the left.

Our friends on the left just do not agree, and it is a legitimate intellectual argument. Our friends on the left say that we cannot ask New York City to apply common sense. They believe instead that we need a few billion more. They believe that the city does not quite work at $25 billion, but if they sent us, say, $3 billion more, with $28 billion it would probably work better.

The classic statement on that was by John Kenneth Galbraith, who said 20 years ago that there is nothing wrong with New York City that doubling its taxes would not cure. I think anybody who believes that should have voted for Mondale and Dukakis and they should have sat on their hands last night and not applauded. That is a legitimate value difference.

But there is a fourth point made in these two paragraphs. The President pointed out that 7 years ago the Federal deficit was 6 percent of our gross national product. In the new budget that deficit is down to 1 percent of the gross national product. Now, there are two ways to do that. One is to shrink the deficit; the other is to grow a bigger economy.

One of the secrets that our friends on the left do not want to talk about is that Reaganomics worked and supply side economics worked. Cutting taxes and encouraging entrepreneurship, encouraging investment, encouraging the building of new factories, and encouraging more new jobs meant that the pie is bigger. There are more people at work in America today, and we have the longest period of job creation in American peacetime history, and the result is as more people go to work to create more goods and services and earn bigger incomes, they pay more in revenue to the government and the deficit shrinks.

So we have two effects. By controlling spending, we have brought the deficit down. But much more importantly, by accelerating growth in the economy, we have increased the size of the gross national product and the deficit has shrunk.

Let me put it this way: if you owe $1,000 and you are only earning $20,000, you owe 5 percent of your annual income. One way to shrink that to 1 percent would be to cut the amount you owe to $200; the other way would be to increase your income to $100,000. Either technique works.

What President Bush and the conservative movement stand for is the deliberate focus on economic growth as a primary value of this country. He is saying over and over again every year, "How do we create the most new jobs? How do we create the most new ideas? How do we create the most new products? How do we encourage young people, men and women of all backgrounds, black, white, yellow, brown, red, people from all regions of the country, from the inner city to the smallest town? How do we encourage them to start the small businesses of the future?"

One of the differences between President Bush and President Reagan and the conservative movement and supply side economics and the old conservatism is that our interest is not in defending General Motors or the Ford Motor Co. or McDonald's. Our interest is in inventing the next McDonald's, inventing the next IBM, inventing the next Xerox. We believe that if we can encourage the inventions of the 21st century, if Americans are creating the millionaires of the future, if we are creating the success stories of the 21st century, the sheer momentum will carry us a long way down the road. We believe that if in inner-city America there were 3,000 future millionaires inventing the new jobs that are going to work, they will hire all of their relatives and all of their neighbors and we will mop up poverty with success. We think that works infinitely better than the bureaucratic welfare state and its system of encouraging people to stay on welfare and its pattern of raising taxes and creating regulations so that they discourage precisely entrepreneurship.

Let me point out that President Bush, like President Reagan, once again proposed free enterprise zones and once again asked, "Why do we create an incentive in the inner city?" I think frankly, as Jack Kemp has said for many years, that there ought to be a zero capital gains tax, that if we build factories in the poorest precincts

of Chicago and New York, we ought to create the greatest possible incentive to build factories and create jobs where they do not exist, because in the long run America will be so much better off if we help poor people find jobs. And the way to do that is to take the jobs into the neighborhoods where poor people live. Yet this Congress, with all of the Democratic talk about compassion and with all of the Democrats concerned for the poor, has not in 9 consecutive years of being asked to pass an enterprise zone bill brought one to the floor and given it a chance to get through.

One of our challenges, one that we think represents a clear difference in vision, is that we think the Democrats owe it to the American people to bring to the floor an enterprise bill that creates, after all, an opportunity, and that does not cost a dime unless it works. The only way the Treasury would lose a penny in revenue would be if in fact there were lots of factories being built in poor neighborhoods. Otherwise nobody is going to take advantage of the capital gains break if they do not invest, and it seems to me if we could build 5,000 new factories and new centers of employment and create in those 5,000 new centers 10,000 new jobs—and they would be in neighborhoods that are currently very poor and in neighborhoods where black and Hispanic and Asian Americans and other Americans need the work—America would be better off.

First of all, we would get back more than the money we would lose in capital gains just from the income tax payments from people who now have jobs. The property tax value would go up. The new opportunity to create a healthy city, to mop up crime by creating work, would be there.

But there is a difference in values between President Bush and the conservative movement and our good friends on the left.

Let me also emphasize something else that the President said that I think is very, very important, something that all of us have to confront. He said, and I quote:

> The "state of the government" does indeed depend on many of us in this very Chamber. But the State of the Union depends on all Americans. We must maintain the democratic decency that makes a nation out of millions of individuals. I have been appalled at the recent mail bombings across this country. Every one of us must confront and condemn racism, anti-Semitism, bigotry and hate. Not next week, not tomorrow, but right now.

You cannot have the right to pursue happiness if your home has a cross burned in front of it, if your child is killed by a letter bomb, if you are in danger of being beaten if you go into a store or a bar or a restaurant. We have an absolute obligation in America to guarantee personal security. Those of us who care about national security, that is, protecting citizens from foreign danger, have an equal obligation to care about personal security, protecting people from domestic dangers. And I think it is very important in that context that we look at how totally wrong the Federal judge was recently in basically prohibiting the right to pursue security in the New York City subways. There is no right for some able-bodied panhandler to frighten, to threaten, to intimidate, and to disrupt the daily traffic of citizens who are simply going about their business.

□ 1200

Mr. Speaker, we are not going to have decent cities if we are not allowed to protect the decent from those who would prey upon them, and I think all of us have an obligation in the Congress to absolutely oppose any form of racism, any form of violent threat, to be prepared, whether it is the mugger or the racist, whether it is the demagog or the racist, to engage the full force of our absolute contempt to say, "That is not a behavior we will tolerate in decent society," and, where necessary, to be prepared to provide the police forces and the prisons to block those who would prey upon their fellow human beings.

Let me say this in closing, Mr. Speaker. I think that President Bush gave us a framework, a framework of freedom, a framework of hope, a framework of enterprise and entrepreneurship and understanding of the importance of physical capital, human capital and intellectual capital, but he also called us to an enormous challenge. He called us to the challenge of inventing for the 1990's the kind of changes that will be necessary in America if we are going to be successful and Americans are going to be successful in the 21st century.

Let me just say in closing for my phase of this that on May 19 we are going to have an American opportunities workshop available on television by satellite to anyone who wants to get involved by getting a downlink satellite receiver so that anybody in America can participate in this process of invention, this process of discovery, this process of focusing on applying common sense to areas to success and opportunity, because I think the key point of President Bush's speech was to distinguish between the state of the Government, which is of great fascination to our friends on the left, and the state of the Union, which is of concern to all of us, and President Bush's point was to invite all of us to be involved, all of us to be good citizens, all of us to express stewardship and leadership by being committed.

Mr. Speaker, I yield to the gentleman from California [Mr. ROHRABACHER].

Mr. ROHRABACHER. Mr. Speaker, there has been a lot of discussion about the National Endowment for the Arts, and the budget and last year's maneuvering, and, Mr. Speaker, I would like to say that I am personally upset that my name has been attributed to some of the characterizations on last year's vote on the National Endowment for the Arts, and these characterizations were harsher than I would have made, and I know that many of my colleagues are upset by these characterizations as well.

Let us not forget, however, that there are millions of Americans who are also upset with the way their hard-earned tax dollars continue to be flushed down the sewer of fetishism, depravity, and pornography.

My colleagues have probably never heard of Annie Sprinkle. I cannot say I have heard of her before last week, but I am assured she is a bona fide star of pornographic cinema. She is also now the recipient of taxpayer funds for her live sex act show in New York.

Yes, my colleagues heard me correctly, Mr. Speaker. Ms. Sprinkle is manipulating herself with toys and selling opportunities for the audience to participate in her sex act with tax dollars generously provided by the New York State Council for the Arts which receives half a million dollars in unrestricted funds annually from the National Endowment for the Arts.

Mr. Speaker. while there have been some mischaracterizations, unfortunate mischaracterizations, of words that were attributed to me, and let me add that I wrote no article for the magazine in question, but some of the points made in the characterizations were accurate themselves. I think it is about time that we end the nonsense of having the Government involved in the arts in the first place. It is time that we set reasonable standards for the National Endowment for the Arts or to get the Federal Government out of the arts business altogether. But let me apologize because some of the Members are concerned about statements that I may or may not have made or some characterizations that I may or may not have made, and the fact is that I wrote no article for a journal, which they are concerned about, and I apologize for the concern that this may have caused by fellow colleagues.

Mr. GINGRICH. Mr. Speaker, before the gentleman from California [Mr. ROHRABACHER] sits down, let me ask, because I am fascinated. President Bush made the point that $1,200,000,000,000 is a lot of money, and our friends on the left did not applaud that opportunity. Instead they seem to want to raise taxes. Is the gentleman from California [Mr. ROHRABACHER] suggesting that part of that

$1,200,000,000,000 ended up in New York City in a live sex show?

Mr. ROHRABACHER. The gentleman from Georgia [Mr. GINGRICH] is correct.

Mr. Speaker, the National Endowment for the Arts grants a half a million dollars in unrestricted funds to the New York State Council for the Arts which then transferred some of that money to a program which included the most triple-X-rated type of pornography that one can imagine.

In fact, Mr. Speaker, Annie Sprinkle, the pornographic film star that was involved in this live stage act, at one point noted to the audience, "I usually get paid a lot of money, but tonight it's government funded."

Mr. GINGRICH. Does the gentleman from California [Mr. ROHRABACHER] happen to know how much the taxpayers paid her to perform this live sex act?

Mr. ROHRABACHER. I am not certain as to what exactly the amount of funds are, but the fact is that those people are working out in the hinterland trying to struggle to make the ends meet and, I think, can be justly upset that some of their tax dollars have ended up supporting this kind of trash.

Mr. GINGRICH. Mr. Speaker, I think for those of our friends on the left who want to know why the no-increase tax pledge has been so popular, the idea that those of us in the conservative movement think, "If you want to use private pocket, and you decide you want to go see Annie Sprinkle"; is that her name?

Mr. ROHRABACHER. Annie Sprinkle.

Mr. GINGRICH. "If you want to go see Annie Sprinkle, that's your private right, and we're not going to stop you from going to see her, if you want to pay for it yourself, but the idea that we ought to raise your taxes, to ship more money to pay for live sex acts," I say to my colleagues, "strikes me as irrational."

Mr. Speaker, I think that is part of the fundamental philosophical difference. We think priorities can be set, we think we can find a way with $1,233,000,000,000 to do what is necessary, but maybe, if we are setting priorities, paying Ms. Sprinkle to perform live sex acts may not be among the things that make the priority list.

Mr. ROHRABACHER. Mr. Speaker, as the gentleman from Georgia [Mr. GINGRICH] knows, I personally oppose Federal Government involvement in the arts whatsoever. I think that should be left to the private sector, and there is legitimate debate then to whether or not Federal involvement in the arts is a legitimate part of what the Government should be doing especially at a time when we are struggling to come up with funds for prenatal care and some of those other programs that the President has included in his budget that are absolutely necessary and for which and on which our people depend.

However, Mr. Speaker, that debate notwithstanding of whether the Government should be involved in the arts in the first place, certainly there should be standards to prevent tax dollars from flowing to this type of trash. Last year there was a major parlimentary fight on this issue, and I am afraid that a journal reporting on this wrote an article which was not totally inaccurate. It just went on and was harsher than I would have done, and it attributed the article to me, and it actually was written by one of their own staffers about what was going on on the floor.

Mr. GINGRICH. Mr. Speaker, I appreciate the effort of the gentleman from California [Mr. ROHRABACHER] to be very accurate and his willingness to come forward and talk about these things.

Mr. Speaker, it is difficult, and it does get emotional, because part of what is at stake here is a fundamental difference in values, and I think it is a legitimate debate, and I think we have to handle it in a pleasant and positive way.

Mr. Speaker, we have to recognize that the freedom and democracy we are urging on Eastern Europe, when exercised in the U.S. House and Senate, do lead at times to heated exchanges, but they ought to be heated exchanges among colleagues rather than arguments that lead to any lack of collegiality.

Mr. Speaker, I thank the gentleman from California [Mr. ROHRABACHER] for being involved.

PERSONAL EXPLANATION

The SPEAKER pro tempore (Mr. LAFALCE). Under a previous order of the House, the gentleman from Illinois [Mr. SAVAGE] is recognized for 30 minutes.

Mr. SAVAGE. Mr. Speaker, I rise gratefully because on yesterday the bipartisan Committee on Standards of Official Conduct of this House discontinued consideration of charges brought against me last July by three Members of Congress despite admitting that they knew absolutely nothing about the case other than allegations in a Washington Post newspaper story.

□ 1210

The Washington Post newspaper story by a white reporter, Jim McGee, claimed that an unnamed woman accused me of offensive advances toward her in Zaire last spring where she served in the Peace Corps. The alleged statement was solicited and unsupported.

As a result of the alleged encounter, McGee contended that the woman had to leave her assignment and was then in an undisclosed place in the United States undergoing psychiatric treatment for victims of sexual assault.

Unfair assumptions of truth and sensational exaggerations of the story immediately exploded on white television and in white newspapers across this Nation and continued for weeks to sub-explode like the 4th of July fireworks.

I was even deceived into appearing on CNN's "Crossfire," a nationally televised, crude by popular interrogation, by a fraudulent white liberal and a belligerent white conservative.

I had been invited actually to discuss racism in the white mass media, since I was an award-winning journalist and newspaper editor for 20 years before my election to Congress in 1980; however, just before the cameras began to roll the two hosts admitted their deceit and focused the show on the same unfair assumptions and sensational exaggerations about the Post story, over my on-air protest.

So I protest the growing acceptance, acceptance of unsubstantiated newspaper and television stories as probable cause for government investigations.

I especially protest such ill-based investigations of African-American leaders, because the selective reporting of the white mass media is too often biased against blacks. Mass media is one of America's most racist institutions in ownership, management, and in employment.

Furthermore, the study of journalism and employment by white media does not in itself insure that a reporter or editor will suddenly become less prejudiced or instantly overcome a childhood in a lily white neighborhood, attendance in a lily white classroom, worshiping in a lily white congregation, and belonging to some lily white social group.

Even if an unfairly initiated investigation turns up the commission of some wrong, such a finding still could be unfair, because the authority to investigate is so powerful that people need to be protected by fairness and even-handedness in its use, especially the more militant and outspoken African-American leaders.

Unfair assumptions of truth and sensational exaggerations of the story about me immediately exploded on white television and in white newspapers across this Nation, as I have said.

The Ethics Committee after a preliminary examination of witnesses, apparently decided that the evidence was insufficient even to warrant further investigation, not even a slap on the wrist nor even a mild rebuke.

Because the truth is that initially the woman herself requested not to testify before the House Ethics Com-

mittee. Other testimony was that her medical condition predated my mission to Zaire, and that at no time during the evening in question did she appear offended by me or anyone in our party of six, which included, incidentally American Embassy personnel. And if you recall, this is exactly what I stated publicly when the false story first broke.

If anyone was honestly offended by my mission to Zaire, or during it, it was probably the American State Department, because I have persuasively, I hope, opposed our neocolonialist foreign policy all over Africa and in many other Third World nations, where I have been privileged to privately and honestly advise heads of state. That is why I suspect that McGee was illicitly tipped off about the woman and her secret whereabouts by an instructed Government agent.

Moreover, it seems that McGee was specially assigned last year to investigate black national political leaders by the Washington Post. And that is a serious matter. The Post published McGee's damaging and unfair reports at especially sensitive times about three African-American Members of Congress in 1 year; WILLIAM GRAY of Philadelphia, MERVYN DYMALLY of Los Angeles, and me in two separate instances.

For the past 6 months, let me admit that I have been hurt financially by legal fees, and distressed psychologically as a result of the racism, unaccountability, and concentrated private power of white television and newspapers.

In addition, my only son, daughter, and daughter-in-law, and possibly even my two little grandchildren, have been made to suffer innocently. Fortunately, my one wife of 34 years has been spared, by an excruciating death, this lonely pain.

Even now the Chicago Tribune newspaper and a white Chicago broadcaster on radio station WBBM are attempting to maltranslate the Ethics Committee's no-decision-of-guilt.

Moreover, since my primary election is only 7 weeks away, harm to my reelection bid could have been a purpose of some culprits in this matter. After all, I was one of the 10 Democratic Congressmen on the reported "hit list" of a congressional leader of the other party last year, according to syndicated newspaper columnists Evans and Novak.

Thus, some may for partisan or personal reasons, seek to extend this controversy beyond the case-closing action of the bipartisan Ethics Committee.

Yet, in a poetic way, there is ennoblement in experiencing even a bit of the racist viciousness that Marcus Garvey, Paul Robeson, Elijah Muhammed, Malcolm X, Martin Luther King, and other African-American leaders have suffered at the hands of the white American mass media, the Justice Department and the FBI.

□ 1220

Because of the extreme racist resentment of any influential African American man defying white authority and opposing our Government's neo-colonialist foreign policy and upside-down domestic priorities, I expect even further persecution of me by white media and coconspiring Government agents, but, regardless, I shall never, never relent in my long life and active commitment to international equality and intranational justice and peace and prosperity for all.

As in the cases of other African American leaders now under attack, the most egregious racism, and let me explain, is to be found not so much in the facts disclosed or the verdict rendered out of an investigation but, rather, in who is investigated, the who and the how the investigation is conducted, because in frequency and determinancy, African American leaders are investigated by the U.S. Government as instigated by the white mass media disproportionately to white American leaders of comparable political power and connections. African American elected public officials are five times more likely to be investigated than are their white counterparts. Yet, African Americans hold less than 2 percent of all elective public offices in our Nation today.

I would suggest two main reasons for this disproportionate investigation and prosecution, if not persecution, of black elected officials, two. First, the powers to instigate and to investigate are unduly concentrated in the hands of whites in the media and government with unjustly little accountability to blacks due to white prejudice and black poverty. Second, the predominantly white constituency of these powers has little appreciation for blacks due to malinformation and minimal personal association.

Thus, prominent African Americans are less protected than prominent white Americans against allegations and more safely can be subjected, you see, to investigations with less probable cause. This results in unfairly selective prosecutions, and such prosecutions amount of persecution. It is of this that I vehemently complain today.

Less than 2 percent of the television and radio station licenses have been issued by our Government to the 12 percent of Americans who are of African origin, and we are less than 1 percent of the management. Thus, it is not surprising that almost all of the programs and personalities, even the African American ones, are by and for white Americans and reflect their cultural values and satisfy their racial prejudices. Because of this plus the extreme concentration of private control of the most pervasive sorts of public information ever to exist, civil liberties and freedom of speech are more in jeopardy than ever before in our great Nation under a President, mind you, who is brutal in his domestic policies and belligerent in his foreign policy.

I urge you, I urge you do not merely read his lips but, rather, check his actions. In recent weeks, for instance, he has invaded Panama, raided a Nicaraguan embassy, and fired on a Cuban ship in international waters, and while in his State of the Union Address just last night he expressed concern for education and social security, his budget proposes cuts in student loans and in Medicare. He preached glorious destinations but proposed no means of transportation. Indeed, in proposing to decrease taxes for the wealthy but increase military spending, he sounds as through he is still Ronald Reagan's Vice President. However, regardless of his popularity and his power, I particularly urge my colleagues to stand up to present racist attacks on black leadership in order that our white colleagues who choose to can stand with us.

No one can stand up with you if you are not standing yourself. Fear that if you do stand up you may become the next victim may only ensure that you will become the next victim, and to my white colleagues who cherish democracy, I say to the extent that the unaccountable media and executive branch of our Government are permitted to intimidate the legislative branch or any segment thereof, freedom and justice are fundamentally threatened for all Americans.

□ 1230

But win, lose, or draw, I shall remain true in the fight for more aid to education and to unemployment as the most effective way to reduce drug abuse and crime; for increased Medicare and Medicaid; and to protect our Social Security trust fund; to provide for the homeless and for more Federal funds to heal, and less to kill. Because to me, people are far more important than private profits.

Nonetheless, I wish to forgive those of guilt in my case, though never shall I forget. And, yes, still keep in my heart the belief that the oppressed of the world shall overcome one day, that right shall not ever remain on the scaffold, while wrong sits upon the throne, because that scaffold sways the future. And in the dim unknown standest God within the shadows, keeping watch above his own.

THE 200TH ANNIVERSARY OF THE SUPREME COURT

The SPEAKER pro tempore. (Mr. LAFALCE). Under a previous order of

the House, the Chair recognizes the gentlewoman from Louisiana [Mrs. BOGGS] for 30 minutes.

Mrs. BOGGS. Mr. Speaker, as we approach the 200th anniversary on February 2, of the first meeting of the Supreme Court in 1790, it is appropriate for the House of Representatives to recall Congress' role in the founding of the Court and the Federal judicial system in the Judiciary Act of 1789. The Court was the last branch of government to go into operation, almost 11 months after the House convened, and was more a product of congressional deliberation than the decisions of the Federal Convention. We should take this occasion to remind ourselves of one of our earliest and most important acts, one that endures as the fundamental outline of the judicial branch of Government.

When the First Congress set about the daunting task of putting the new Federal Government into operation and giving substance to the outline of the Constitution, the Representatives and Senators found few guidelines for the creation of the Supreme Court and the Federal judiciary. In its provisions for the three branches of Government, the Constitution was nowhere so spare in its instructions or vague in its intent as in article 3, establishing the judicial branch. Congress was bound only by the requirement for some kind of Supreme Court and permitted, though by no means required, to create whatever lower courts it found necessary.

The delegates to the Federal Convention had been far more specific in their design of the national legislature and the authority of the President. These were issues that engaged the public mind throughout the period of the American Revolution and were at the center of the movement to strengthen the national Government under the Articles of Confederation. The Federal Convention worked out agreements on the structure of the House and Senate and created a new kind of national executive, but it left for the First Congress the difficult choices concerning the Federal courts.

Almost everyone agreed that a supreme court should serve as part of a federal government, but that is where agreement ended. Should, as Madison, Hamilton, and other nationalists argued, a system of lower Federal courts support the new government, or should, as Roger Sherman and John Rutledge suggested, the State courts serve as the district courts. The ratification debates provided no further resolution. Anti-Federalists warned that an all-powerful Federal judiciary would undermine the authority of the States and threaten the civil liberties of individuals. Many of the constitutional amendments proposed by the State ratification conventions sought to limit the reach of the Federal courts and protect individual liberties.

When Congress got down to work in the weeks and months following the first quorum in early April 1789, the principal task was to complete the plan of government outlined by the Constitution. Congress carried out the election of Washington as President, created the executive departments, passed and sent to the States a bill of rights, and provided for the revenue to operate the new Government. In those busy months of the spring and summer of 1789, the House, usually under the leadership of James Madison, dominated the business of the Government. On one occasion, however, the Senate took the lead.

While the House worked out the plans for the executive departments and the Federal revenue and debated Madison's proposed Bill of Rights, the Senate took up the planning of the Federal judiciary. The Judiciary Act of 1789 was largely the work of a committee led by Oliver Ellsworth of Connecticut, with the assistance of William Paterson of New Jersey and Caleb Strong of Massachusetts. When the House received the Senate bill, Members revisited the debate on the relations between Federal and State courts but made few changes in the structure of the proposed courts.

The three-tiered system of a supreme court with circuit and district courts reaffirmed the essential Federal character of the new Government. The Federal judiciary, with authority to decide on appeals from the State courts, held ultimate authority. But Congress denied the Federal courts the broad authority the Constitution would have allowed. Each State maintained its distinct system of law and courts and reserved jurisdiction in many cases.

The Judiciary Act, signed into law by President Washington on September 24, 1789, was a compromise that, like most compromises, pleased few people at the time. Advocates of a strong central government were disappointed in the continued authority of State courts, while anti-Federalists continued to believe the Federal courts should be more restricted in their jurisdiction. Even the early Supreme Court Justices complained about an act that required them to serve on the circuit courts as well and thereby endure the hardships of travel in the early republic.

The Judiciary Act, however, proved to be one of the most enduring achievements of the First Congress. The system of courts remained essentially unchanged for more than 100 years, and the divided jurisdiction of Federal and State courts remains the guiding principle of our judiciary. The creation of circuit and district courts also had the unintended benefit of carrying the Federal Government to people in all areas of the Nation. When citizens first dealt with the new Government, it was more likely than not to be through the judiciary.

Mr. Speaker, it is my pleasure to serve on the Commission on the Bicentennial of the United States Constitution, along with my distinguished colleague from Illinois, PHIL CRANE. The Chairman of the Commission is the distinguished and beloved former Chief Justice Warren E. Burger, who retired from the Supreme Court in 1986 in order to lead the Nation in the celebration of the bicentennial of the Constitution. At this time, Mr. Speaker, I would like to submit for the RECORD some remarks Chairman Burger has prepared on the early history of the Court, and ask that they be included with the other remarks made during this special order.

Mr. Speaker, I quote now from the concluding paragraphs of Chairman Burger's remarks:

In its 200 years the federal judiciary has compiled a distinguished record, one that—though not free of controversy—reflected the honest efforts of many dedicated jurists to "establish justice." From a branch of government created only in the barest outline has emerged a national judiciary that is the envy of the world. In commemorating the anniversary of its beginnings, we should remember the labors of those who did so much to make it what it is.

As we take note of this important anniversary of this Court—and of the country—it comes at the close of a decade when people all over the world are demanding the kinds of freedom this Court has protected for 200 years. Our history is their hope, and our hope for them must be that whatever systems they set up in place of the tyranny they have rejected will include a judiciary with authority and independence to enforce the basic guarantees of freedom, as this Court has done for these two hundred years.

As the gentleman from California [Mr. EDWARDS] says in his submitted remarks.

The Supreme Court has the precedents, the ability and the duty to fulfill that hope and justify that pride.

THE BEGINNING OF THE FEDERAL JUDICIARY UNDER ARTICLE III OF THE CONSTITUTION

(By Warren E. Burger)

The delegates to the Federal Convention in Philadelphia in 1787 did not spend as much time on the federal judiciary as they did on Congress and the Presidency. In Article III the Constitution provided for "one Supreme court," and left its structure and the question of providing for other courts to Congress. In commemorating the Bicentennial of the Supreme Court, we must therefore begin by acknowledging the crucial role of Congress in shaping the federal judiciary. Congress had to decide how many members the Supreme Court should have, their qualifications for appointment, and what other federal courts were needed and the jurisdiction of those courts while the Constitution gave the President the authority to appoint federal judges "to serve during good behavior," with the "advice and consent of the Senate."

On September 24, 1789, four months after President Washington took office, the Judiciary Act of 1789 became law. The Act created 13 federal districts—one for each state—and a judgeship for each, as well as three circuit courts but provided no judges for those courts which was to be constituted by two Supreme Court Justices and one District Judge. District courts were the base of a pyramid; circuit courts were empowered to review appeals from District Courts.

The Judiciary Act also provided for a six-member Supreme Court consisting of a Chief Justice and five Associate Justices to serve as a final reviewing court. During the first decade of the Court, the Justices' major work was to ride circuit as trial and appeallate judges. The burden of circuit riding made it difficult for President Washington to find qualified men willing to serve on the Court. The idea of "one Supreme Court" and its national role had not taken shape or fully registered in the minds of the people—or even in the legal profession. Although the Supreme Court was established, it remained for it to prove itself as a truly co-equal branch of government.

On the day set, only three of the six Justices who had been confirmed were present. There being no quorum they met the following day when the fourth Justice arrived. The fifth did not make it at all and the sixth, Justice Harrison, declined the appointment partly on the grounds of health and probably influenced by the reality that riding circuit, with the primitive conditions of travel in that day, was a burden that only a Justice in robust health could undertake.

The Justices wore black robes with a wide scarlet facing and gold piping and 12 or 14 inch scarlet cuffs. Some years ago we tried to find out when and why the Court abandoned that beautiful scarlet robe, but we were not able to trace that history.

During the first decade of government under the Constitution the Justices' case load in federal trial and appeals courts was much heavier than there were in the Supreme Court. The published reports contain fewer than seventy opinions of the Court from 1790 to 1800. "Riding circuit," stage coach, and later steamboat, was arduous and debilitating.

To meet twice a year in Supreme Court sessions and to travel circuits led Justices to have serious objections. In letters to family and friends they recorded their difficulties in traveling great distances through all sorts of weather, over poorly marked and badly made roads. They lodged at taverns or other public houses that were often crowded, dirty, and disease ridden. The quality of food and habitation was occasionally very good but often very poor.

Early in 1791, Justices James Iredell protested to Chief Justice John Jay his reappointment to the Southern Circuit; he had ridden 1,900 miles in 1790—a great deal of traveling in that day. He was willing to have his salary reduced in Congress would relieve them of circuit riding. Chief Justice Jay tried to placate him and wrote, "The circuits press upon us all." The Chief Justice replied that only an act of Congress could rescue the Justices from the ordeal. Chief Justice Jay and President Washington urged Congress to provide judges for the Circuit Court of Appeals.

In 1792, Chief Justice Jay joined the Justices in urging President Washington "in strong and explicit terms," that relief be given from circuit riding.

"That the task of holding twenty-seven circuit courts a year, in the different states . . . besides two sessions of the Supreme Court in Philadelphia, in the most severe seasons of the year, is a task which, considering the extent of the United States and the small number of judges, is too burdensome."

The President transmitted the complaint to Congress, urging Congress to give the Justices "relief from these disagreeable [circuit] chores." But Congress did not act. Senator Truman Lacock insisted that if Justices were allowed to linger in the capital they would become "completely cloistered within the City of Washington, and their decisions, instead of emanating from enlarged and liberal minds, would assume a severe and local character." Not until one hundred years later, in 1891, did Congress ("with all deliberate speed") provide judges for the Circuit Courts.

The system of circuit riding, despite its hazards and inconveniences, also was not wholly without beneficial effects. It enabled the Justices to become acquainted with local conditions and customs in those days of greater regional isolation. Riding the Southern Circuit in May and June, 1790, one Justice wrote that he was shocked for, "I scarcely thought there had been so much barren land in all America." In September, 1792, when Justice Iredell temporarily secured a transfer to the Eastern Circuit, he praised New England for its "regularity and decency" but added that there "are the most stones that I ever saw."

Circuit riding also enabled the people to become more aware of the federal government at first hand. The appearance of a Supreme Court Justice on circuit was always regarded as a great event. The Justices used the occasion to explain the new federal government. When they met with grand juries the "charges" or instructions given by the Justices often included appeals to patriotism, honor and duty; some were informal discussions—civics lessons—of the role of the new federal government and the concepts of Federalism. The Justices were well aware of the parochial attitudes, and occasional tensions, between regions and states; they knew that if the new federal government was to work, the people had to become attached to the United States as well as to their home states.

With the advent of Chief Justice Marshall in 1801, the Court began to shape the "building blocks" our system rests on: *Marbury* v. *Madison* in 1803, *McCulloch* v. *Maryland* in 1819 and *Gibbons* v. *Ogdon* in 1824. The holding in *Marbury* confirmed the Supreme Court's power, implicit under Article III, Section 2 of the Constitution: "The judicial Power shall shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority . . ." if necessary, to declare an act of Congress or the Executive Branch invalid if contrary to the Constitution. The *McCulloch* decision helped to clarify the relation between the federal and state governments, establishing that within the sphere of its granted powers the federal government was supreme. The *Gibbons* case defined the power of Congress under the Commerce Clause, the Framer's vision of the United States as a "common market."

The great decisions of the Marshall court were controversial; the *Marbury* case in particular aroused the fury of Jeffersonians in Congress against the largely Federalist judiciary. In the ensuing campaign of intimidation, Judge John Pickering of New Hampshire was impeached and removed from office. The Jeffersonians then moved against Justice Samuel Chase, who was known for his outspoken Federalist views. By one vote, the Senate decided against Chases's removal; to this day he remains the only Supreme Court Justice ever impeached. Thirty years after the *Marbury* case, the Jacksonians had replaced the Jeffersonians as the dominant party, and Andrew Jackson was no more friendly to John Marshall's reading of the Constitution than Thomas Jefferson had been. In 1835, Jackson appointed Roger Brooke Taney to succeed Marshall. Taney was an able lawyer whose record is marred by the opinion in the *Dred Scott* case of 1857. The Court, for the first time since *Marbury*, held an act of Congress unconstitutional, in holding that a slave was property and could not become a citizen by residing in "free" territory, Taney nullified the Missouri Compromise of 1820. The result aroused great public emotions, and possibly hastened the coming of the Civil War. Historians mark the later years of the Taney Court (1857-64) as the lowest point of Supreme Court prestige and standing.

In the early years the Court often would announce the judgment in a case and sometime later read the opinion from the Bench without issuing a copy of its opinion. [In those days, an "opinion day" was announced in advance and it became something of a social event. Legend—with some support—tells of an occasion when a Justice, reading an opinion over a period of an hour or more, observed a favored friend enter the Courtroom, whereupon he began reading the opinion all over again.]

Many changes have been made in the methods and procedures of the Supreme Court over its 200 year history. For the first 100 years or more, there was unlimited time allowed for oral arguments in the Supreme Court, a practice which prevails to this day in England. Because it heard only a few cases, no briefs were filed and the Court had time to allow up to a whole week for a single argument. Gradually, as the volume increased, changes were made. From a handful of cases in the first ten years of the Court's history we find 200 years later the Court hears four cases a day, three days each sitting, with 150 or more signed opinions annually. The growth of the Court's work can be illustrated by the growth in the number of cases on its docket. In 1953 there were 1,463 cases on the Court's docket and 65 signed opinions were issued; and in recent years that has grown to more than 5,000 cases on the docket and as many as 150 signed opinions annually.

In its 200 years the federal judiciary has compiled a distinguished record, one that—though not free of controversy—reflected the honest efforts of many dedicated jurists to "establish justice." From a branch of government created only in the barest outline has emerged a national judiciary that is the envy of the world. In commemorating the anniversary of its beginnings, we should remember the labors of those who did so much to make it what it is.

As we take note of this important anniversary of this Court—and of the country—it comes at the close of a decade when people all over the world are demanding the kinds of freedom this Court has protected for 200 years. Our history is their hope, and our hope for them must be that whatever systems they set up in place of the tyranny they have rejected will include a judiciary with authority and independence to enforce the basic guarantees of freedom, as this

Court has done for these two hundred years.

Mr. EDWARDS of California. Mr. Speaker, I want to thank the distinguished gentlewoman from Louisiana and our colleague from the other side of the aisle, the distinguished gentleman from Illinois for organizing this special order today. Congresswoman BOGGS and Congressman CRANE have served admirably as members of the Commission on the Bicentennial of the U.S. Constitution, and I congratulate them.

On this 200th anniversary of the Supreme Court, I cannot help but reflect—as chairman of the Judiciary Committee's Subcommittee on Civil and Constitutional Rights—on the historic role the Court has played in protecting the individual rights and liberties of all Americans.

Throughout its history, the Supreme Court has been charged with enforcing the promises of the Bill of Rights. There have been proud moments when the Court literally has shone in carrying out that solemn charge. School desegregation cases, right of privacy cases, freedom of speech and religion cases, protecting the right to a fair trial, reining in the unconstitutional excesses of Government, and protecting the rights of minorities against the overbearing caprice of the majority—all these and more easily comes to mind.

Today, the winds of freedom are circling the world and the U.S. Supreme Court remains a symbol of hope, both here and abroad. Despite occasional missteps in heeding the call for freedom, our Supreme Court has a history of which it can be proud and in which all Americans can find hope in their quest for justice.

The Supreme Court has the precedents, the ability, and the duty to fulfull that hope and justify that pride.

Mr. BROOKS. Mr. Speaker, as chairman of the House Committee on the Judiciary, I am pleased to participate in this special order commemorating the 200th Anniversary of the creation of our Federal court system in the Judiciary Act of 1789. While the courts were created by the Constitution, it was the enactment of the Judiciary Act that actually gave life to our judicial system.

The history of our Nation is in no small measure the history of the courts. Overwhelmingly, the courts have been the vehicle by which the rights granted in the Constitution are guaranteed to all of our citizens. Brown versus Board of Education is one prominent example. By giving meaning and substance to the freedoms enumerated in the Bill of Rights, our courts have played a crucial role in advancing the individual liberties that are the hallmark of our system of Government.

No less important is the role of the judicial system in ensuring that no individual will "be deprived of life, liberty, or property, without due process of law." Americans' faith in the fundamental fairness of our system of government is the glue that holds that system together.

All of us know that, even though we might be locked in a legal stuggle against powerful political and economic forces, the due process clause of the Constitution will be upheld by an independent judiciary and will provide scrupulous protection of individual rights.

This element of independence and insulation from forces outside the legal system has enabled the judiciary to serve as a bulwark between individuals' rights and the exercise of undue power. We do not choose our Federal judges through the political process of election; we give them life tenure and guarantee in the Constitution that economic pressure cannot be brought to bear on them by reducing their salaries. We place the judicial system above the political fray so that they can carry out their decisionmaking responsibility in a way that they might do the right thing, even when the right thing may not be the popular thing.

It must be noted with sadness that these protections for our Federal judges do not always shield them from the passions of the times. The recent tragic death of Judge Robert Vance, who apparently was the target of an attack based on his discharge of his judicial responsibilities on questions of public controversy, underscores the dedication and the selflessness with which the members of the judiciary have carried out those responsibilities for the past two centuries, even in the face of unpopularity and, at times, personal danger.

Mr. STOKES. Mr. Speaker, this year we celebrate the 200th birthday of our Nation's Supreme Court. In 1787, the delegates to the Federal Convention in Philadelphia provided in the U.S. Constitution that "the judicial power of the United States, shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish."

The first Supreme Court was not named until 1789, 5 months after President Washington took office. John Jay of New York was the first Chief Justice. The first session of the Supreme Court met in New York City on February 1, 1790.

During those times, there was no ivory tower in which the Justices sat and opined on the law and its relevancy only. In addition to their Supreme Court responsibilities, they had to ride circuit. Oftentimes the arduous demands of traveling took their toll. In 1792, they wrote to President Washington:

We cannot * * * reconcile ourselves to the idea of existing in exile from our families, and of being subjected to a kind of life on which we cannot reflect without experiencing sensations and emotions more easy to conceive than proper for us to express * * * that the task of holding 27 circuit courts a year, in the different States * * * besides two sessions of the Supreme Court at Philadelphia, in the two most severe seasons of the year, is a task which * * * is too burdensome.

Despite their complaints, Supreme Court Justices had to ride circuit for another 100 years.

Like the Constitution which created the Court, our Nation's highest tribunal has evolved with time. When I think of the Supreme Court and its 200th anniversary, I am reminded of a statement made by Justice Thurgood Marshall in 1988 in reference to the bicentennial celebration of the Constitution.

Justice Marshall has earned a place in the Court's history not only because he is the first black ever appointed to sit on the Court, but because he has played an indispensable role in making law an effective instrument in protecting and advancing the rights and freedoms of all American citizens.

He stated that like many celebrations, the bicentennial celebration—

Takes particular events and holds them up as the source of all the very best that has followed * * * this is unfortunate—not the patriotism itself, but the tendency for the celebration to oversimplify, and overlook the many other events that have been instrumental to our achievements as a nation. The focus of this celebration invites a complacent belief that the vision of those who debated and compromised in Philadelphia yielded the "more perfect Union" it is said we now enjoy.

Justice Marshall took particular issue with the fact that the framers deliberately excluded Negro slaves and women from many constitutional protections. He noted that the "Supreme Court reaffirmed the prevailing opinion of the framers regarding the rights of Negroes in America." He made specific reference to the Dred Scott case. In that case, Chief Justice Taney wrote:

We think they are not, and that they are not included, and were not intended to be included. * * *

They had for more than a century before been regarded as beings of an inferior order, and altogether unfit to associate with the white race * * *; and so far inferior, that they had no rights which the white man was bound to respect; and that the negro might justly and lawfully be reduced to slavery for his benefit.

Accordingly, a negro of the African race was regarded * * * as an article of property, and held, and bought and sold as such * * * no one seems to have doubted the correctness of the prevailing opinion of the time.

In holding that slaves were property, and could not become citizens by residing in free territory, Justice Taney nullified an act of Congress, the Missouri Compromise of 1820. Some believe his ruling helped to precipitate the Civil War.

Yes, the Supreme Court like our Nation has evolved with changing social, cultural, and political patterns. Who would have thought, or accepted the notion 200 years ago, that a black and a women would 1 day sit on the Court. Rather than being shocked or appalled by such an occurrence, today, many of us are appalled by the fact that more minorities and women have not been appointed to the Supreme Court, or other Federal courts.

When we look at the progress of the disadvantaged and disenfranchised what is truly remarkable is the sometimes anomalous role legal principles have played in assisting, as well as impeding this progress. When we look at the condition of blacks in America, for example, we see, as Justice Marshall points out, that:

They were enslaved by law, emancipated by law, disenfranchised and segregated by law; and finally, they have begun to win equality by law. Along the way, new constitutional principles have emerged to meet the challenges of a changing society. The progress has been dramatic, and it will continue.

In reflecting on the Supreme Court's bicentennial celebration, I realize that people like Thurgood Marshall have helped it to carry out

the principles set forth in our Constitution. In many ways, I, too, am a beneficiary of his efforts. I am thankful for the contributions he and so many others have made on behalf of equality. They have helped to make our Nation's Constitution a living document. Hopefully, those who follow will share a similar vision and commitment to providing equality and justice under the law.

Mr. BUECHNER. Mr. Speaker, I rise today in tribute to an institution which, by its very existence, manifests one of the central themes upon which this Republic was molded. The Supreme Court is the pinnacle of a system of justice based on the supremacy of the rights of people and the subservience of the rules of States. In 200 years this principle has remained untarnished, while its example has spawned many similar systems the world over.

Over 100 years before John Marshall handed down the decision in Marbury versus Madison, Thomas Hobbes wrote "All laws, whether written or unwritten, have need of interpretation." John Adams was the first to call for "a government of laws and not of men," and wisely so. Yet laws must be implemented by the very men from whom they are kept distinct. Thus we see the genius in our establishment of the system of judicial review; it at least unifies the interpretation of the laws that we as a Congress enact, and keeps constant watch that we might never stray from the basis of all American law, our Constitution.

Over the years, we also have shown an amazing recognition of our own fallibility, and this is reflected in the appeal process. From the smallest municipal courtroom to the Supreme Court of the United States, a meticulous system of reevaluation protects against possible judicial error. Admittedly this system does not lend itself to expedient justice, nor to inexpensive justice, but it was never intended to do so. The early framers of our judiciary recognized that deliberation is an important characteristic of true justice, and that speed cannot be a priority as one man or several men judge another.

Mr. Speaker, as we celebrate the 200th anniversary of the U.S. Supreme Court it is worth noting that we may have created the perfect system for imperfect men to impart imperfect justice in an imperfect world. I firmly believe that the next 200 years will bear this fact out and find our Supreme Court as it is today: a monument to the sovereignty of individuals and the subservience of government.

Mr. CRANE. Mr. Speaker, as we all know, the United States of America is a Republic. In order to maintain this Republic, we rely upon the three branches of our Government and the contract which created them, out Constitution. Perhaps, of the three branches of our Government, the Judiciary is least understood or appreciated by the American people. Therefore, it is important that we, as Members of Congress, pay tribute to 200 years of the Federal Judiciary, and take some time to examine the judiciary's role in our Government and its historical development.

The system of governance established at the Constitutional Convention in 1787 bore superficial similarities to the three branch system of government in England. However, in contrast to the British system, the Constitution provided for checks and balances among the three separate branches. Over the years we have found this system to be integral and essential in ensuring the rights and responsibilities of our citizens.

One of the key components of our check and balance system is judicial review, a principle rejected in great Britain early in the 17th Century. Judicial review describes the Supremem Court's ability to determine the constitutionality of actions taken by other branches of the Government. Initially, the concept of judicial review was not so firmly established as it is today. It was the 1803 case of Marbury v. Madison in which the Supreme Court laid claim to its powers of judicial review.

After losing the Presidential election in 1800 to Thomas Jefferson, President John Adams appointed William Marbury, a Federalist, as justice of the peace before Adams officially left office in 1801. However, Marbury's necessary commission had not been delivered before Jefferson and the Republicans took office. Jefferson refused to recognize Marbury's appointment. Marbury then asked the Supreme Court to order Jefferson's Secretary of State, James Madison, to deliver the commission. On February 24, 1803, Chief Justice Marshall delivered the opinion of the Court which reprimanded Jefferson nothwithstanding the fact that on a technical point it avoided responsibility for a decision in the case. Nevertheless, it was the first assertion of the principle of judicial review which continues to this day.

The judiciary is truly a remarkable branch of our Government. Its responsibility is to ensure that the rights, guaranteed to each of us as Americans, are upheld—it is a safeguard of our liberty. Though we may not agree with the outcome of every judicial review, we are nonetheless blessed that we do have such a system. Our Constitution, which was drafted as a contract ensuring the rights of all people in our Republic, would mean much less than it does today were it not for the judicial branch of the Federal Government. I join in paying tribute to the bicentennial of our judiciary—we are truly privileged.

Mr. GILMAN. Mr. Speaker, I am pleased to rise today in commemoration of the 200th anniversary of the first sitting of the Supreme Court. I would also like to take this opportunity to commend Chief Justice Warren Burger for all of his efforts in honoring the bicentennial of both the Supreme Court and our Constitution.

Mr. Speaker, the United States of America is a unique Nation for myriad reasons. Specifically, our Supreme Court sets the United States apart from most nations, and from most democracies. Even as the last of the Federal Government trinity to be created, by the Judiciary Act of 1789, the Supreme Court is by no means the weakest branch of government balancing the forces within our commonwealth.

The Supreme Court was in flux during its early years. Its home was moved from New York City to Philadelphia, and then to numerous locations within Washington. All the while, the Court's role was adapting and evolving. Initiary, there was much skepticism about what, if any, significant role the Court would play.

The Court's first Chief Justice, John Jay, resigned from his position on the Court and later declined an offer to return as Chief Justice stating the Court:

> Would not obtain the energy, weight and dignity which are essential to its affording due support to the National Government, nor acquire the public confidence and respect which, as the last resort of justice in the Nation, it should possess.

John Jay was a great man, an extraordinary statesman and a brilliant legal mind. But as we stand here today, nearly 200 years later, I am pleased to note that he was not a prophet. In the two centuries since the first session, the constitutionality of our laws and the constitutional protection of our people have been ensured by the Court. Today, the Court is often viewed as the most solemn, distinguished and revered branch of our Government.

From Chisholm v. Georgia to Marbury v. Madison to Brown v. Board of Education, the Supreme Court has reverently carried the burden of fair, equitable, constitutional administration of justice.

The Supreme Court has not been without its own scandals. Fortunately, as an institution, the Court has proved peculiarly immune to reproach. Perhaps it is the scrupulous nomination and confirmation process, or perhaps it is a certain austerity that is assumed as a justice dons his robes; for whatever reason, both the Court and the justices have for 200 years balanced the scales of justice with sobriety and dignity.

As a Member of Congress, and as an attorney, I will always respect the vital, indispensable function of the Court. We bear witness to the 200th anniversary with pride and appreciation. I believe that if our Founding Fathers were here today, a tear would come to their eyes. For they truly have succeeded in constituting a strong, viable government to "establish justice * * * and secure the blessings of liberty to ourselves and our posterity."

Mr. KASTENMEIER. Mr. Speaker, today Members are gathered to recognize the 200th birthday of the Supreme Court of the United States. It is entirely appropriate that we do so.

In reality, a celebration has been ongoing since September 1987 as we have engaged in activities dedicated to the memory of the Founding Fathers and the Constitution that they drafted in Philadelphia during the summer of 1787. Specific historic events have been recognized and identified as having contributed to the more perfect society that we enjoy today. The establishment of a Supreme Court is one such significant event. So was the establishment of the Congress, enactment of Judiciary Act of 1789 by the very First Congress, and the submission that same year of a Bill of Rights to the States.

Our Constitution creates a structure of political power, and specifically provides for the establishment of one Supreme Court. The miracle of this document—which you can carry in your pocket—is that the basic text, even before the ink was dry, was not hard and chafing but supple and soft. Designed to be long lasting, it has endured. Its resilience, in large part, can be attributed to the Supreme Court of the United States.

Article III of the Constitution—the judiciary's guiding light—simply states that the

Judicial power of the United States, shall be vested in one Supreme Court, and in such inferior courts as Congress may from time to time ordain and establish.

The Constitution specifically confers authority on the policymaking branch—Congress—to decide the size and composition of the Supreme Court, as well as the structure and organization of the inferior courts. It contemplates a partnership between the legislature and the judiciary, with most issues of court reform becoming public policy questions, not one reserved to judges and lawyers.

As chairman of the Subcommittee on Courts of the Committee on the Judiciary, I consider the relationship between the Congress and the courts to be analogous to a family relationship. As such, political representatives and judges need to understand each other, develop channels of communication, and work hard to promote mutual respect.

This special order gives us an opportunity to show congressional respect for the Court. Last Congress we took advantage of a similar opportunity. When it became apparent that the Court was suffering from a calendar crisis of congested cases, we enacted legislation to eliminate the Court's mandatory appellate review authority. As author of that legislation, with the ranking minority member of my subcommittee, Mr. MOORHEAD, I was pleased to have recently received some feedback from Chief Justice Rehnquist about the success of the legislation:

I can speak for all the Justices and report their unanimous opinion that the removal of mandatory appeal is beneficial to the proper functioning of the Court.

Over the past 200 years, from Chief Justice John Jay to Chief Justice Rehnquist, our constitutional principles have proved resilient enough to provide for order and societal stability, and flexible and responsive enough to meet the demands of a constantly changing society. As Justice Thurgood Marshall has appropriately noted, the meaning of the Constitution was not forever "fixed" at the Philadelphia Convention. It has several notable defects that required the almost immediate passage of a Bill of Rights, and several notable amendments that were added.

The first three words in the preamble, "We the People," had a profoundly different meaning in 1787 than today. A majority of America's citizens—including Negro slaves and women—were not even granted the right to vote. Today, "We the People" no longer enslave and the credit should not go to the framers. It belongs to others—citizens, legislators, judges and justices, and others—who have refused to acquiesce in antiquated notions of "liberty," "justice," and "equality" and have struggled within the confines of society to better them. One of the things that characterizes the U.S. Supreme Court, now and in the past and in the future—I hope, is a recognized commitment to satsify our aspiration to "form a more perfect Union."

The true miracle was not the birth of the Constitution and the Supreme Court, but their long life and future. Let us pledge to engage in cooperation between the branches of government and to participate in a continuing celebration, one that does not last only today but one that goes on during the months and years ahead.

Mr. TOWNS. Mr. Speaker, today I rise to pay tribute to the Supreme Court of the United States.

As the Court celebrates its bicentennial we must pause to pay tribute to the unique role the Court has played in the promotion and preservation of the American experiment in democracy. As the only court formally created by the words of the Constitution, the Supreme Court holds a unique trust in the hearts and minds of the American people.

As a coequal branch of government responsible for adherence to the Constitution, traditionally the Court has found a way to protect the discrete and insular minorities from the tyranny of the majority. It is this role which lead the Court to gain the respect of the American people. If the legislative branch finds itself swayed by the political passions of the era, the Court must rise to protect the people who find solace in no other quarter. If the executive branch turns its back on the rights of the political minority, the Court must rule to keep their voices from becoming silent. When the Court fails, the unheard are silenced and the unprotected are made vulnerable.

I salute the Court for its dedication to protect and defend the Constitution. I applaud the Court for its decisions which have furthered the pursuit of equal justice for all.

Mr. CONTE. Mr. Speaker, of our wonderful Constitution it has been said that, "Here was the document into which the Founding Fathers had passed their wisdon as into a vessel." Among our Founders greatest contribution to us is the principle of checks and balances. They foresaw the healthy interaction of three separate but equal branches of Government: The executive, the legislative, and the judiciary.

It is the judicial branch that we honor today in this bicenntennial celebration of the first Supreme Court session.

The founders perceived the importance of an equal judiciary but, in reality, our first Supreme Court Justices suffered many indignities. The first Supreme Court Justices were always the odd men out when it came to getting Federal office space. In the early years, they would meet above a fish market, in the unfinished basement of the Senate, in a corner of the House library, and, happily for them, often in a tavern across the street from the Capitol. It would not be until 1935, that the Supreme Court would occupy a building of its own befitting the stature of the Court. And, Mr. Speaker, I might add that they finished construction of the Supreme Court under budget, actually returning $100,000 to the Treasury. That's what I call judicious.

Fortunately for us and our posterity, the efforts of great Justices such as John Marshall, Oliver Wendell Holmes, and Louis Brandeis assured the Supreme Court an equal place beside the other two branches long before it finally received its own building. In the historic Marbury versus Madison decision of 1803, Chief Justice John Marshall's court took the dramatic step that established the Court's right to declare any law contradicting the Constitution as unconstitutional—null and void. It was the courage and foresight of this great justice that established the concept of judicial review as the right of the Supreme Court. The Supreme Court can appropriate no funds, it can marshall no armies, but its place in our history and its role in our Government is certain.

And so, Mr. Speaker, it is a great institution and the great men who served on its benches that we honor in this bicentennial tribute today.

□ 1240

GENERAL LEAVE

Mrs. BOGGS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore (Mr. LAFALCE). Is there objection to the request of the gentlewoman from Louisiana?

There was no objection.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. DUNCAN) to revise and extend his remarks and include extraneous material:)

Mr. PARRIS, for 5 minutes on February 6.

(The following Members (at the request of Mr. SAVAGE) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GEPHARDT, for 5 minutes, today.
Mrs. BOGGS, for 30 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. DUNCAN) and to include extraneous matter:)

Mr. CAMPBELL of California.
Mr. MICHEL.
Mr. BROWN of Colorado.
Mr. BEREUTER.

(The following Members (at the request of Mr. SAVAGE) and to include extraneous matter:)

Mr. SLATTERY.
Mr. DWYER of New Jersey.
Mr. TALLON.
Mr. MAZZOLI in two instances.

ENROLLED JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled joint resolution of the House of the following

title, which was thereupon signed by the Speaker:

H.J. Res. 149. Joint resolution designating February 16, 1990, as "Lithuanian Independence Day."

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 130. Joint resolution designating February 11 through February 17, 1990, as "Vocational-Technical Education Week."

ADJOURNMENT

Mrs. BOGGS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 41 minutes p.m.), under its previous order, the House adjourned until Monday, February 5, 1990, at 12 noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2400. A letter from the Acting Administrator, Agency for International Development, transmitting a report on development assistance program allocations for fiscal year 1990, pursuant to 22 U.S.C. 2413(a); to the Committee on Foreign Affairs.

2401. A letter from the Chairman, Board for International Broadcasting, transmitting the Board's annual report on its activities, as well as its review and evaluation of the operation of Radio Free Europe/Radio Liberty for the period October 1, 1988 through September 30, 1989, pursuant to 22 U.S.C. 2873(a)(9); to the Committee on Foreign Affairs.

2402. A letter from the Director of Administration and Management, Office of the Secretary of Defense, transmitting a report on the consolidation of the military departments' fiscal year 1989 unit exchange of training and related support between the United States and foreign countries; to the Committee on Foreign Affairs.

2403. A letter from the Chairman, Advisory Commission on Intergovernmental Relations, transmitting the Commission's 31st annual report, pursuant to 42 U.S.C. 4275(3); to the Committee on Government Operations.

2404. A letter from the Chairman, Federal Communications Commission, transmitting a report of actions taken to increase competition for contracts, fiscal year 1989, pursuant to 41 U.S.C. 419; to the Committee on Government Operations.

2405. A letter from the Chairman, Nuclear Regulatory Commission, transmitting a report of actions taken to increase competition for contracts, fiscal year 1989, pursuant to 41 U.S.C. 419; to the Committee on Government Operations.

2406. A letter from the Chairman, Securities and Exchange Commission, transmitting a report of actions taken to increase competition for contracts, fiscal year 1989, pursuant to 41 U.S.C. 419; to the Committee on Government Operations.

2407. A letter from the Director, Close Up Foundation, transmitting the semiannual report on the Civic Achievement Award Program covering the period July 1, 1989 through December 31, 1989, pursuant to Public Law 100-158, section 3(b) (100 Stat. 897); to the Committee on House Administration.

2408. A letter from the Director, Bureau of Land Management, transmitting a report on the proposed administrative boundaries for 14 rivers that were added to the National Wild and Scenic Rivers System, pursuant to 16 U.S.C. 1274; to the Committee on Interior and Insular Affairs.

2409. A letter from the Assistant Secretary for Government Affairs, Department of Transportation, transmitting an informational copy of factsheets on the highway and aviation trust funds and on the history of funding for the Department; to the Committee on Public Works and Transportation.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mrs. COLLINS (for herself, Mr. HYDE, Mr. WAXMAN, Mr. MILLER of California, Mr. SCHEUER, Mr. WALGREN, Mr. WYDEN, Mr. SIKORSKI, Mr. BATES, Mr. BRUCE, Mr. TOWNS, Mr. MARKEY, Mr. BOUCHER, Mr. DURBIN, Mr. BERMAN, Mr. MCDERMOTT, Mr. WILLIAMS, Mr. DE LUGO, Mr. CROCKETT, Mr. ACKERMAN, Mr. HAWKINS, Mr. FRANK, Mr. RANGEL, Mr. FAUNTROY, Ms. SCHNEIDER, Mr. PAYNE of New Jersey, Ms. PELOSI, Mr. WHEAT, Mr. JOHNSTON of Florida, and Mr. FOGLIETTA):

H.R. 3931. A bill to amend title XIX of the Social Security Act to reduce infant mortality through improvement of coverage of services to pregnant women and infants under the Medicaid program; to the Committee on Energy and Commerce.

By Mr. SLATTERY (for himself, Mr. WAXMAN, Mr. MILLER of California, Mr. SCHEUER, Mr. WALGREN, Mr. WYDEN, Mr. SIKORSKI, Mr. BATES, Mr. BRUCE, Mrs. COLLINS, Mr. TOWNS, Mr. MARKEY, Mr. BOUCHER, Mr. DURBIN, Mr. BERMAN, Mr. WILLIAMS, Mr. MCDERMOTT, Mr. FRANK, Mr. RANGEL, Mr. FAUNTROY, Ms. SCHNEIDER, Mr. PAYNE of New Jersey, Ms. PELOSI, Mr. WHEAT, Mr. JOHNSTON of Florida, Mr. FOGLIETTA, Mr. DE LUGO, Mr. CROCKETT, Mr. ACKERMAN, and Mr. HAWKINS):

H.R. 3932. A bill to amend title XIX of the Social Security Act to improve access to basic health care services to needy children; to the Committee on Energy and Commerce.

By Mr. WYDEN (for himself, Mr. WAXMAN, Mr. ROYBAL, Mr. RINALDO, Mr. SCHEUER, Mr. WALGREN, Mr. SIKORSKI, Mr. BATES, Mr. BRUCE, Mrs. COLLINS, Mr. TOWNS, Mr. MARKEY, Mr. ECKART, Mr. RICHARDSON, Mr. BOUCHER, Mr. SCHUMER, Mrs. BOXER, Mr. DURBIN, Mr. ESPY, Mr. DWYER of New Jersey, Mr. BERMAN, Ms. KAPTUR, Mr. FAUNTROY, Mr. LEVINE of California, Mr. MCDERMOTT, Mr. KOSTMAYER, Mr. MRAZEK, Ms. PELOSI, Mr. FOGLIETTA, Mr. MORRISON of Connecticut, Mr. HARRIS, Mr. LEVIN of Michigan, Mr. HUGHES, Mr. HERTEL, Mrs. SAIKI, Mr. RANGEL, Mr. EDWARDS of California, Mr. FORD of Tennessee, Mr. FAZIO, Mr. BROWN of California, Mr. PALLONE, Mr. ROWLAND of Connecticut, Mr. OWENS of New York, Mr. PAYNE of New Jersey, Mr. CLEMENT, Mr. MOLLOHAN, Mr. ENGEL, Mr. MATSUI, Mr. STAGGERS, Mr. WOLPE, Mr. GEJDENSON, Mr. DE LUGO, Mr. CROCKETT, Mr. ACKERMAN, Mr. HAWKINS, Mr. HYDE, Mr. FRANK, Mr. MILLER of California, Ms. SCHNEIDER, Mr. WHEAT, Mr. JOHNSTON of Florida, Mr. WILLIAMS, and Mr. WALSH):

H.R. 3933. A bill to amend title XIX of the Social Security Act to provide States the option of providing quality community care to the elderly under their Medicaid Programs; to the Committee on Energy and Commerce.

By Mr. WAXMAN (for himself, Mr. TAUKE, Mr. DINGELL, Mr. SCHEUER, Mr. WALGREN, Mr. WYDEN, Mr. SIKORSKI, Mr. BATES, Mrs. COLLINS, Mr. TOWNS, Mr. MARKEY, Mr. BOUCHER, Mr. DURBIN, Mr. BERMAN, Mr. FRANK, Mr. RANGEL, Mr. MILLER of California, Mr. FAUNTROY, Ms. SCHNEIDER, Mr. PAYNE of New Jersey, Ms. PELOSI, Mr. WHEAT, Mr. JOHNSTON of Florida; Mr. FOGLIETTA, Mr. WILLIAMS, Mr. DE LUGO, Mr. CROCKETT, Mr. ACKERMAN, Mr. HAWKINS, Mr. SMITH of Vermont, and Mr. HALL of Ohio):

H.R. 3934. A bill to amend title XIX of the Social Security Act to improve the provision and quality of services to individuals with mental retardation or related condition; to the Committee on Energy and Commerce.

By Mr. PANETTA (for himself, Mr. WAXMAN, Mr. GRADISON, Mr. SCHEUER, Mr. WALGREN, Mr. WYDEN, Mr. SIKORSKI, Mr. BATES, Mr. ROWLAND of Georgia, Mr. TOWNS, Mr. MARKEY, Mr. BOUCHER, Mrs. BOXER, Mr. DURBIN, Mr. BERMAN, Mr. GEJDENSON, Mr. MATSUI, Ms. PELOSI, Mr. DE LUGO, Mr. OWENS of New York, Mr. EDWARDS of California, Mr. BILBRAY, Mr. FRANK, Mr. RANGEL, Mr. FAUNTROY, Mr. MILLER of California, Ms. SCHNEIDER, Mr. PAYNE of New Jersey, Mr. WHEAT, Mr. JOHNSTON of Florida, Mr. FOGLIETTA, Mr. WILLIAMS, Mr. MCDERMOTT, Mr. CROCKETT, Mr. ACKERMAN, Mr. HAWKINS, and Mr. HYDE):

H.R. 3935. A bill to amend title XIX of the Social Security Act to require the coverage of hospice care under Medicaid plans; to the Committee on Energy and Commerce.

By Mr. CLAY (for himself, Mr. FORD of Michigan, Mr. KILDEE, Mr. HAYES of Illinois, Mr. OWENS of New York, and Mr. FOGLIETTA):

H.R. 3936. A bill to amend the National Labor Relations Act to prevent discrimination based on participation in labor disputes; to the Committee on Education and Labor.

By Mr. BROWN of Colorado:

H.R. 3937. A bill to amend the Social Security Act and related provisions of law to promote responsible financial management of the Social Security trust funds and to establish the Social Security Administration as an independent agency headed by an Administrator of Social Security; jointly, to the Committees on Ways and Means and Government Operations.

By Mr. MOAKLEY:

H.R. 3938. A bill to amend title 5, United States Code, to provide that Government employees who become subject to certain postemployment restrictions or who separate from Government service due to nonrecertification as a senior executive may obtain certain life insurance, health insurance, and retirement benefits, and for other purposes; jointly, to the Committees on Post Office and Civil Service and Rules.

By Mr. SAXTON (for himself, Mrs. ROUKEMA, Mr. MCCOLLUM, Ms. KAPTUR, Mr. COURTER, Mr. CHAPMAN, and Mr. HANCOCK):

H.R. 3939. A bill to express the sense of the Congress that States should establish uniform laws on the regulation of check cashing services, money order issuers, and other nonbank money transmitters for the purpose of preventing money laundering and protecting the payment system, to require the Secretary of the Treasury to conduct a study to make appropriate recommendations on such efforts, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SOLOMON:

H.R. 3940. A bill to amend the Public Health Service Act to establish Federal standards to ensure quality assurance of drug testing programs, and for other purposes; jointly, to the Committees on Energy and Commerce, Education and Labor, and Post Office and Civil Service.

By Mrs. VUCANOVICH:

H.R. 3941. A bill to ratify and implement water settlements involving the Pyramid Lake Paiute Tribe, the States of California and Nevada, and other parties regarding the waters of the Truckee and Carson Rivers and Lake Tahoe in Nevada and California, to provide for enhancement of endangered and threatened species, to preserve valuable wetlands, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, Public Works and Transportation, and Merchant Marine and Fisheries.

By Mr. FORD of Michigan (for himself and Mr. GILMAN):

H. Res. 316. Resolution providing amounts from the contingent fund of the House for expenses of investigations and studies by the Committee on Post Office and Civil Service in the 2d session of the 101st Congress; to the Committee on House Administration.

By Mr. ANNUNZIO:

H. Res. 317. Resolution providing for expenses of activities of House Information Systems in the 2d session of the 101st Congress; to the Committee on House Administration.

H. Res. 318. Resolution providing amounts from the contingent fund of the House for expenses of investigations and studies by the Committee on House Administration in the 2d session of the 101st Congress; to the Committee on House Administration.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 10: Mr. BOEHLERT.

H.R. 377: Mr. FAUNTROY, Mr. GEJDENSON, Mr. STUDDS, and Mr. MILLER of Washington.

H.R. 1180: Mr. BOSCO.

H.R. 1205: Mr. GRANDY and Mr. BOEHLERT.

H.R. 2549: Mr. EVANS.

H.R. 2617: Mr. CONYERS.

H.R. 2754: Mr. HARRIS, Mr. HUTTO, Mr. INHOFE, Mr. LEHMAN of California, Mr. LEHMAN of Florida, Mr. LENT, Mr. LIPINSKI, Mr. MCMILLEN of Maryland, Mr. PERKINS, Mr. QUILLEN, Mr. SCHUMER, Mr. SKAGGS, and Mr. WYDEN.

H.R. 2951: Mr. FROST and Mr. MFUME.

H.R. 2952: Mr. FROST and Mr. SENSENBRENNER.

H.R. 3587: Mr. DENNY SMITH, Mr. COSTELLO, and Mr. NEAL of North Carolina.

H.R. 3684: Mr. MCDADE.

H.R. 3735: Mr. REGULA, Mr. APPLEGATE, Mr. PEASE, Mr. LEWIS of Georgia, Mr. PERKINS, Mr. HUBBARD, Mr. SARPALIUS, Mr. MAZZOLI, and Mr. JACOBS.

H.R. 3736: Mr. SARPALIUS.

H.R. 3737: Mr. SARPALIUS.

H.R. 3893: Mr. COYNE and Mr. RANGEL.

H.R. 3899: Mr. TAUKE, Mr. SYNAR, and Mr. WHITTAKER.

H.R. 3906: Mr. FASCELL, Mr. NEAL of North Carolina, Mr. TAUKE, Mr. HUCKABY, Mr. SKEEN, and Mr. SCHUETTE.

H.J. Res. 369: Mr. BARNARD, Mr. BROWDER, Mr. BRUCE, Mr. CALLAHAN, Mr. CROCKETT, Mr. FORD of Michigan, Mr. GEJDENSON, Mr. GINGRICH, Mr. DERRICK, Mr. DARDEN, Mr. BOUCHER, Mr. JOHNSON of South Dakota, Mr. HENRY, Mr. HARRIS, Mr. HATCHER, Ms. KAPTUR, Mr. LEWIS of Georgia, Mr. MACHTLEY, Mr. MARTINEZ, Mr. MCCLOSKEY, Mr. MILLER of California, Mr. NEAL of North Carolina, Mr. OBERSTAR, Mr. OWENS of Utah, Mr. PAYNE of New Jersey, Mrs. PATTERSON Mr. JENKINS, Mr. RAY, Mr. ROBERTS, Mr. SABO Mr. SLATTERY Mr. SMITH of Vermont, Mr. SCHAEFER, Mr. SPRATT, Mr. SHUMWAY, Mr. TALLON, Mr. WEISS, Mr. WAXMAN, Mr. DYSON, Mr. ANNUNZIO, and Mr. PAYNE of Virginia.

H. Con. Res. 20: Mr. SOLOMON.

H. Con. Res. 172: Mr. FROST and Mr. LEWIS of California.

SENATE—*Thursday, February 1, 1990*

(Legislative day of Tuesday, January 23, 1990)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

The PRESIDENT pro tempore. Today's prayer will be offered by the guest chaplain, Rabbi Moshe Feller, Lubavitch House, St. Paul, MN.

Rabbi Feller.

PRAYER

Rabbi Moshe Feller offered the following prayer:

Almighty G-d, Master of the universe, the Members of this august body, the U.S. Senate convene here today in fulfillment of one of the Seven Universal Commandments which You issued to Noah after the great flood—the commandment that every society govern by just laws which are based in the recognition of You O G-d as the Sovereign Ruler of all men and all nations.

The recognition of Your sovereignty is the bedrock of our society as witnessed by the words "In G-d We Trust" engraved on the wall of this great portal of government in which we offer this prayer, and by the words with which we conclude our Pledge of Allegiance "one Nation, under G-d, with liberty and justice for all."

We thank you Almighty G-d for this "year of miracles," in which we witness an increasing number of nations beginning to govern their people with "liberty and justice for all" and beginning to recognize that the entire universe does indeed exist "under G-d."

Grant us, Almighty G-d, as You granted the ancient Israelites in the 40th year of their sojourn in the wilderness, "a heart to perceive, eyes to see and ears to hear" Your divine providence in all that is so rapidly transpiring before our eyes. May the perception of Your divine providence in the affairs of man forever guide the leaders of our country and may they govern accordingly with joy and gladness of heart. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the standing order, the majority leader is recognized.

THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. MITCHELL. Mr. President, this morning following the time for the two leaders, there will be a period for morning business until 10 a.m. with Senators permitted to speak therein for up to 5 minutes each.

At 10 a.m., the Senate will resume debate on the clean air bill. The Senate adopted two amendments to the clean air bill. I expect other amendments will be offered today. I encourage Senators who may wish to offer amendments to the bill to come forth with those amendments so that the Senate can proceed on this legislation.

The matter is complex and controversial. The pace has been slow because Senators wanted the opportunity to fully review and understand the bill. This is now near the end of the the second week of deliberation on the bill and I hope and expect that any Senator who has an amendment who wishes to have it considered will be prepared to come forward. It is anticipated by the managers that there will be rollcall votes today.

THE CONTINUED DELAY IN IMPLEMENTING THE WETLANDS PROTECTION AGREEMENT BETWEEN THE CORPS OF ENGINEERS AND THE ENVIRONMENTAL PROTECTION AGENCY

Mr. MITCHELL. Mr. President, a long-awaited wetlands protection agreement between the EPA and the Army Corps of Engineers was to have gone into effect yesterday.

Plans to carry out this landmark agreement have been suspended twice since it was signed on November 14, 1989.

Now, implementation of the wetlands accord has been postponed yet again.

The agreement between the EPA and the Department of the Army articulates the policy and procedures to be used in determining the type and level of mitigation necessary to comply with the environmental requirements for wetlands filling under section 404 of the Clean Water Act.

The Army and the EPA have disagreed for years over wetlands mitigation policy and procedures.

The agreement signed last November was the culmination of efforts that began with oversight hearings before the Senate Subcommittee on Environmental Pollution during 1985 and 1986.

At that time, the EPA insisted that the section 404 environmental criteria for issuing wetlands development permits required that adverse impacts to wetlands, must be first avoided if possible, then minimized and, as a last resort, compensated for through the creation or restoration of similar aquatic resources.

The corps previously had resisted this policy and instead had left its districts with broad discretion to negotiate mitigation requirements on a case-by-case basis.

Finally, late last year—due in large part to the efforts of EPA Administrator William Reilly and Assistant Administrator LaJuana Wilcher and the Assistant Secretary of the Army for Civil Works, Robert Page—the two agencies responsible for administration of the section 404 program agreed to the sequential consideration of avoidance, minimization and compensation of adverse impacts in reviewing permit applications for wetlands filling.

The agreement needs to be put into effect without further delay to ensure that the Clean Water Act is carried out uniformly in a manner that encourages the protection of wetlands in their natural state and helps prevent the net loss of these valuable aquatic resources.

The policy guidance agreed to by the corps and EPA last November preserves the integrity of the Clean Water Act's environmental criteria which permit wetlands filling only where it is the least damaging practicable alternative. Alternatives to wetlands filling are presumed to be less damaging and available for projects that do not require proximity to water.

This analysis of alternatives and rebuttal of presumptions must take place under the agreement regardless of any offer to restore, enhance or construct wetlands as compensation for the effects of the requested filling.

In this manner, the agreement ensures that section 404 of the Clean Water Act is not used as a means of providing for the orderly destruction of the Nation's wetlands.

President Bush repeatedly has supported the policy of no net loss of wetlands as a national goal.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

39-059 O-91-33 (Pt. 1)

The wetlands protection agreement between the Corps and EPA will not implement that goal. It is only one small, but important, step toward that goal.

The agreement does not set new policy. It only seeks consistent and effective implementation of the present Clean Water Act.

As such, the agreement addresses only those activities that require individual section 404 permits; that is, generally, discharges of dredged or fill material into more than 10 acres of wetlands. It has no effect on most wetlands destruction, which results from draining, clearing, flooding, and excavation.

The continued reluctance of the administration to put this limited wetlands protection agreement into effect raises serious doubts about the level of commitment to the President's oft-stated goal of no net loss.

The President can reaffirm his administration's commitment to stemming wetlands loss by directing the Corps of Engineers and EPA to implement their agreement without further delay. I hope that he will do so.

THE SUPREME SOVIET'S VIEWS ON THE IMPORTANCE OF A BAN ON NUCLEAR TESTING

Mr. MITCHELL. Mr. President, I ask unanimous consent that this appeal from the U.S.S.R. Supreme Soviet to the United States Congress be printed in full. I hope that my colleagues will find this statement an informative summary of Soviet parliamentarians' views regarding the importance of a comprehensive nuclear test ban.

There being no objection, the appeal was ordered to be printed in the RECORD, as follows:

To the U.S. Congress:

Esteemed colleagues, on August 1, 1989, the USSR Supreme Soviet addressed an appeal to the U.S. Congress regarding the issue of a moratorium on nuclear explosions and a cessation of nuclear testing.

Today, we are once again calling on you, proceeding from a clear realization of the vital need for taking measures to protect our own people, as well as all the peoples of the Earth against the risks of nuclear testing.

Our emphatic call for a ban or a moratorium on nuclear testing is prompted by the fact that underground nuclear tests continue to shake our planet, even as norms of new political thinking, humaneness, trust and mutual understanding are being affirmed in international relations. Underground experiments not only lead to the development of new sophisticated weapon systems, but pose another unpredictable threat that must be dealt with today. It is the potential environmental consequences of nuclear testing, the damage being done to the population of the testing sites areas, their wildlife and flora. It is no coincidence that this issue is no longer the exclusive concern of politicians, lawmakers and scientists. It has become a broad public concern, which is attested to by the demand of Soviet citizens to close down the nuclear test sites in Semipalatinsk and on the island of Novaya Zemlya, as well as the US citizens demand with regard to the Nevada test range.

We, parliamentarians, cannot turn a deaf ear to the voice of our constituencies. The USSR People's Deputies reaffirm the Soviet Union's willingness to introduce, any day and any hour, a mutual moratorium on all nuclear explosions, which could bring us closer to concluding an agreement on a verifiable and comprehensive nuclear test ban. Even today, we could noticeably reduce the nuclear threat by ratifying the treaties of 1974 and 1976, by encouraging the achievement of Soviet-US agreements on radical reductions in their nuclear arsenals, and seeking a prompt, fair, and meaningful consideration of the problems involved in a complete nuclear test ban.

The time to act is now! We propose creating a US-USSR interparliamentary group to study the whole range of military-technical, political, and environmental aspects of nuclear testing and to develop agreed recommendations to our parliaments and governments. May there be quiet at our countries' nuclear test ranges for the duration of the work of this group, at least a temporary moratorium would thus be in effect. Our Supreme Soviet and the USSR Government are ready for such a step.

Time is running out. One cannot miss a rare chance to demonstrate to the world community our ability to think and act in a new way, by doing away with nuclear rivalry and preserving and strengthening peace for all mankind.

We hope that the US Congress will promptly respond to this appeal and that we can together begin concrete work.

RESERVATION OF LEADERS' TIME

Mr. MITCHELL. Mr. President, I reserve the remainder of my time, and I reserve all of the leader time of the distinguished Republican leader.

The PRESIDENT pro tempore. Without objection, the unused portions of the two leaders' time will be reserved.

MORNING BUSINESS

The PRESIDENT pro tempore. Under the order there will now be a period for the transaction of morning business, for the introduction of bills, resolutions, petitions and memorials, and Senators are permitted under the order to speak for not to exceed 5 minutes each.

Mr. SANFORD addressed the Chair.

The PRESIDENT pro tempore. The Senator from North Carolina [Mr. SANFORD] is recognized.

THE PRESIDENT'S BUDGET

Mr. SANFORD. Mr. President, the President's budget is now before us, and it is not an honest budget. The deficit is over $300 billion, the largest deficit in the history of this Nation, and yet we are going to be telling people that we have it reduced to about $125 billion, and we are going to reduce it further to under $100 billion. Not true. We will not reduce it below $100 billion in fiscal year 1991. It will continue at a level in the neighborhood of $300 billion, because we are covering most of the real deficit up.

We are fooling the American public by covering up the true deficit. The Budget Director for the President explained to the Budget Committee yesterday that the law requires us to cover it up.

You might put it this way: We require ourselves by law to cover up the true size of our deficits. Congress makes the laws. So it is inexcusable that this Congress would require that we tell the public something that is not true. We need an honest budget. We need to change the law so we can have an honest budget. We need to quit misleading the American public about the true size of the deficits and the true size of the mounting debt.

Mr. President, I propose five steps that will require the White House, the Office of Management and Budget, and the Congress to play it straight with the American public and tell the truth about the deficits and about the debt. We cannot hope to solve this problem; we cannot hope to bring fiscal responsibility back to Government, unless we are willing to have an honest budget as the first step.

First we need to eliminate the gimmicks that allow us to cover up the true deficit. No accountant or CPA would deny that the bottom line, the true deficit of the Government, is the annual increase in the national debt. And that annual increase in the national debt, as shown by the budget released Monday, is over $300 billion.

Let us do away with all gimmicks. The biggest single gimmick, of course, the biggest coverup, is that we are taking the Social Security annual reserves and counting it as income, as free taxes to be used for general revenue purposes. But that is not all. The interest that is paid on the accumulating Social Security surpluses is counted as a receipt, not a payment. Treasury bonds purchased with Social Security reserves is supposed to be held in trust for the beneficiaries. That is not our money. But by law we treat it as a receipt, not as an expenditure, and that accounting practice covers up part of the real deficit. We do the same with the highway trust fund—and other trust funds. We use these reserves, even some we should be spending, to cover up the deficit. This not only is dishonest, but it is very, very bad Government, because our highways and bridges need that money.

We have various other ways of covering up the hidden deficit that now amounts to about $175 billion. We need to change the law to outlaw the use of gimmicks and coverups that

conceal the true deficit from the American public.

An honest budget also protects Social Security. The President said last night that we should not mess around with Social Security, and I agree. But we have been messing around with Social Security, and long enough. We need to protect Social Security trust funds from being squandered and spent for defense and other general Government purposes. Social Security is a trust for the future beneficiaries of Social Security.

I want to see us change the law, Mr. President, to insist that 1 full year of reserve, a 1-year cushion, be kept in trust all of the time. If we do that, incidentally, we can reduce the Social Security taxes. We can reduce taxes by about 18 percent. And we should, because it is not right to continue collecting money that we do not need for the security of Social Security, just so we will have more money to cover up the deficit.

Third, Mr. President, we should count gross interest and include it in a debt account. The big problem in balancing the budget, and the biggest part of the deficit is the interest we pay on the debt. We should do what any good banker would do and count interest as part of the debt. If we capitalize the interest, we then have a debt account we can clearly see and know is growing.

If we had one debt account to include debt increase, and interest-paid on the debt, we can see very clearly, and the public can see very clearly, that this annual increase in debt is the true deficit. We would then know what we were trying to reduce. I would require, as we change the law, Mr. President, that we reduce the debt each year until we get it under control.

Fourth, we need an operating budget that includes nonretirement reciepts—general taxes, and programs that involve setting the priorities of Government: How much do we spend for defense? How much do we spend for early childhood education? How much do we spend for transportation? How much do we spend for whatever. We can set the priorities.

If we include the interest where it should be, with deficit and debt, and if we separate Social Security and other retirement funds from the operating and debt accounts, separated, in order to protect those trusts, we more clearly layout the budget to reflect income and obligations of Government. We can then more clearly set priorities without all of confusion that comes from the kind of budgeting that we now require of ourselves by law.

The operating budget, Mr. President, can be forever kept in balance. We should require trust. We should have an honest budget, with a balanced operating budget, and a budget that requires constant reduction of debt to make us fiscally responsible.

The operating budget, without the gimmicks, without Social Security, without the interest—can be balanced. We can require this using the point of order which gives one Senator the chance to say, no, no, we are not going to get out of balance. We know that we can get that extra few billion one way or the other to keep it balanced, and sequestration can be the last resort. So we can have a balanced operating budget if we just change the law.

The fifth and final step involves rising debt. I propose that we give the President the option to either continue piling up debt or to reduce debt through a debt account. The President proposes the budget. He is responsible for the fiscal policy of the Nation. He can continue piling up more debt, issuing more bonds to pay the interest. Or he can recommend to a dedicated debt reduction tax solely dedicated exclusively for the purpose of reducing debt. This, combined with spending controls—reductions—will allow us to conquer the debt dragon with an honest appproach.

There you have it, Mr. President. Our present budget is not honest. We require that it not be honest. We need to change the law to have an honest budget, a balanced budget, and a budget that requires a systematic reduction of debt.

I think, Mr. President, that we can do this. I think we cannot any longer continue to require ourselves by our own laws to present to the public a dishonest budget.

Thank you, and I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll to ascertain the presence of a quorum.

The legislative clerk proceeded to call the roll.

Mr. ROTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Delaware is recognized for not to exceed 5 minutes.

Mr. ROTH. I thank the Chair.

(The remarks of Mr. ROTH pertaining to the introduction of S. 2049 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. ROTH. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that I may proceed as if in morning business.

The PRESIDENT pro tempore. Without objection, the Senator may proceed under the order as in morning business. For what length of time?

Mr. MURKOWSKI. The Senator from Alaska asks for 5 minutes.

The PRESIDENT pro tempore. Without objection, the Senator from Alaska is recognized for 5 minutes.

Mr. MURKOWSKI. I thank the Chair for his accommodation and wish the President pro tempore good morning.

JAPAN CONSTRUCTION TRADE

Mr. MURKOWSKI. Mr. President, I would like to review briefly for my colleagues the state of negotiations on a very important trade issue between our Nation and our friends in Japan. It is one of market access for U.S. construction firms, a subject in which I have had a longstanding interest and one which has troubled our trade relations for many years.

Mr. President, when I was in Tokyo in December, I had the pleasure of meeting with Minister of Construction Shozo Harada and also with Hajime Sako, who is both chairman of the Taisei Corp. and of the Japan Federation of Construction Contractors, similar to our Association of General Contractors of America. We discussed how we might approach the issue of entry of United States construction firms, as well as—architectural, engineering, and design firms—into the Japanese marketplace. We discussed how we can work together, putting behind us some of the acrimony of the past.

Minister Harada and Chairman Sako share my interest in setting our construction disputes in a manner that is mutually beneficial. They both emphasized to me that better communication between the Japanese private sector and the United States private sector would lead to a more satisfactory relationship.

Mr. Sako recounted to me the trouble United States and Japanese trade associations had experienced in trying to arrange a high-level meeting between the two industries. He asked me for my help. As a consequence, I agreed to host such a meeting in Washington upon my return. That meeting was held last Thursday.

The turnout was excellent. It included all the major United States participants in Japan's construction market. Deputy United States Trade Representative Linn Williams and Commerce Undersecretary Mike Farren provided the administration's perspective; and we heard the official views of the Japanese Government from the Embassy Economic Minister, Mr. Akao. It was significant that 13 of the

14 United States firms that are licensed to do business in Japan were represented at the meeting.

It is also significant that the Japanese have opened up the licensing process, which used to take as much as 2 years and now takes about 90 days. The fact that we now have four architectural firms licensed to do business in Japan, one already licensed this year, I think is indicative of the Japanese Government's response to our request that this market be opened. The licensed firms are major United States contractors that do business all over the world and certainly are interested in doing business in Japan, where the construction budget in both the private and public sectors is now greater, Mr. President, than those expenditures in the United States.

So there is clearly business to be done in Japan, attractive business, but we have had difficulty getting into that market.

One of the previous predicaments that we had was the requirement that previous experience be obtained before U.S. firms could be licensed. But if you could not get a license, it was pretty hard to get the previous experience. That has now been largely resolved, I am happy to report to my colleagues.

The real business of the meeting, of course, was the productive exchange between the representatives of two industry groups, the Japanese private sector and our private sector, through their respective spokesmen.

Mr. Fred Berger, head of the U.S. delegation, was very straightforward in identifying our industry's concerns. Their view is that so far the major projects agreement has been rather disappointing, and has not produced the appropriate results.

However, there is good news for a change—notably Bechtel's participation in the $800 million Haneda Airport contract. But still the trade is one-sided. United States firms are doing less than $200 million annually in construction business in Japan, while Japanese firms are doing about $2.2 billion in the United States. However, that is a substantial change in United States participation, as just a few years ago our involvement in Japan consisted of two Mrs. Field's cookie storefronts in Tokyo. Now we are up to $200 million. We are reminding our Japanese friends that we are very interested in increasing our share in the Japanese market even further—not equivalent necessarily to what the Japanese are doing in the United States, but clearly to a much higher level.

Another concern of the U.S. construction industry is that, for projects not covered by the agreement, there has been essentially no U.S. participation at all.

Mr. President, I ask unanimous consent to have printed in the RECORD a summary of the construction contracts and business involvement of United States construction firms in Japan, as well as a comparison of U.S. firms' participation in the Japanese market and Japanese firms' participation in the United States market.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. FIRMS IN JAPAN AND JAPANESE FIRMS IN THE UNITED STATES—A COMPARISON OF THE LEVEL OF CONSTRUCTION MARKET PENETRATION

[$U.S. 1 = Yen 140]

I. MARKET SIZE (CONSTRUCTION INVESTMENT)

U.S.A.: $400 billion (1987).
(Source: IE&CIC).
Japan: Yen 66,000 billion ($471 billion) (1988).
(Source: Kensetsu Keizai Kenkyujo, MOC.)

II. CONTRACTS AWARDED TO JAPANESE CONTRACTORS IN THE U.S.A.

Yen 286 billion yen (1987) (2.04 billion dollars).
(Source: Overseas Construction Association, Japan.)
Or $2.2 billion (1987).
(Source: IE&CIC.)

III. CONTRACTS AWARDED TO U.S. CONTRACTORS IN JAPAN

(A) MOC Estimate:
(1) Contracts awarded to U.S. contractors with MOC Minister's license: Yen 60.36 billion ($431 million). This figure denotes the amount of contracts won by U.S. affiliated companies with more than 50 percent U.S. capital and with construction business license from the Minister of Construction. (Figures are from contracts for each company's latest fiscal year.)
(Source: Ministery of Construction.)
(2) Contracts awarded to U.S. contractors (including machinery/equipment procurement) in 14 Designated Projects: Yen 12.02 billion ($8.6 million).
(Source: Information provided by MOC at the November 11, 1989 U.S.T.R. Hearings).
Total, MOC estimate: Yen 72.4 billion (1 + 2) ($517.1 million).
(B) USFCS/Tokyo Estimate:
(1) Contracts awarded to U.S. contractors (including machinery/equipment procurement) in 14 Designated Projects: Yen 8.8 billion ($62.8 million).
(Source: USFCS/Tokyo estimate.)
(2) Contracts awarded to U.S. contractors Non-Designated Projects: Yen 6.5 billion ($46.4 million).
(Source: USFCS/Tokyo estimate.)
Total, USFCS estimate: Yen 15.3 billion (1 + 2) ($109.3 million).
C. USTR Estimate:
(Note According to U.S.T.R., the total contracts awarded to U.S. companies in Japan amount to $65 million dollars USFCS Tokyo assumes they arrived at that figure in the following manner.)
(1) Contracts awarded to U.S. contractors (including machinery/equipment procurement) at Kansai International Airport (KIA): Yen 6.5 billion ($4.67 million) (November 1987–October 1988.)
(2) Tenders awarded to U.S. contractors (including machinery/equipment procurement) at other designated projects: Yen 2.6 billion ($1.8 million) As of May 1989.
Total, USTR estimate: Yen 9.1 billion ($65 million).

(Note: Figures do not include Bechtel portion of the $800 million contract for West Terminal of Haneda Airport.)

JAPANESE CONSTRUCTION PROJECTS

CONSTRUCTION COOPERATION AGREEMENTS

1. Bechtel/Taisei and Bechtel/Fujita.
2. Fluor Daniel/Ohbayashi.
3. Schal Associates/Dai Nippon.
4. Turner/Kumagai Gumi.
5. Parsons/Shimizu.
6. Tishman/Aoki.
7. Jones Group/Mitsui Construction.
8. Morrison Knudsen/Hazama Gumi.
9. Brown and Root/Chiyoda (see Construction Licenses)
10. Parsons Brinckerhoff/Nishimatsu.
11. McDevitt & Street/Japan Development & Construction (JDC).
12. Austin Company/Fudo.
13. Austin Industries/Nishimatsu.
14. Guy F. Atkinson/Toda.

JOINT VENTURES

1. TRW/Mitsui (security and engineering services).
2. Marriott In-Flite Services/All Nippon Airways and Sumitomo (food Service, duty-free concessions at Kansai airport).
3. Ellerbe Becket/Sato Kogyo (design/construction of medical facilities).
4. The Architects Collaborative (TAC/Takenaka (architecture, urban planning, engineering, interior design, landscape architecture)
5. Kaplan McLaughlin Diaz/Toda (design).
6. Leo A. Daly/Maeda (design) and Daly/Nihon Sekkei (design).
7. Daniel Mann Johnson & Mendenhall (DMJM)/Fujitsu (engineering).
8. Gensler and Associates Architects/Shimizu (design).
9. Pacific Telesis Int'l/Kajima (intelligent building).
10. Starnet Structures/Shimizu (aerospace construction).
11. Bell and Trotty/Shimizu (aerospace construction).
12. Marine Concrete Structures/Taisei (marine construction)
13. Enterprise Development Co/Shimizu (Waterfront development).

CONSTRUCTION LICENSES

1. PAE International (Building circa 1978).
2. General Electric Technical Services (Building, Steel Structure, Equipment Installation circa 1982).
3. Overseas Bechtel (Civil Eng. 9/25/87, Bldg 1/30/89).
4. Fluor Daniel Japan (Building 8/15/88).
5. Schal Associates (Building 9/14/88).
6. Turner Construction (Building 10/05/88).
7. Parsons Constructors (Civil Eng. & Bldg. 10/05/88).
8. Tishman Construction (Civil Eng. & Bldg. 10/05/88).
9. Brown and Root (Steel Structure 2/27/89).[1]
10. Morrison Knudsen (Steel Structure (BLDG?) 3/30/89).
11. Guy F. Atkinson (Civil Eng. & Bldg. 5/10/89).
12. Austin Company (Bldg. 5/10/89, Civ Eng. 12/5/89).
13. Austin Industries (Building 8/10/89).
14. Parsons Brinckerhoff (Civil Eng. & Bldg. 10/21/89).

---

[1] Brown and Root notified the Japanese on 6/16/89 that it was abandoning its license.

"FIRST CLASS" ARCHITECT LICENSES

1. PAE International (10/15/69).
2. Leo A. Daly (08/01/89).
3. Mancini Duffy Associates (08/16/89).
4. Hellmuth Obata & Kassabaum (01/05/90).

AWARDS TO U.S. FIRMS SINCE THE AGREEMENT

1. Otis Elevator announced a contract to build a $20 million "people mover" at Narita airport. *Japan Times*, 6/8/88.

2. Nihon Unisys won a contract (59,400,000 Yen or about $457,000) for mini-computers and software to process data obtained through meteorological and oceanic phenomena observations by the Kansai International Airport Corporation (KIAC). *USFCS Osaka Kobe, 8/31/88.*

3. Schal Associates in consortium with 8 Japanese contractors was selected for the construction of a $148 million convention center and hotel for the Minato Mirai 21 project in Yokohama. Schal's share of the contract reportedly is 6%. *ENR*, 12/8/88, p. 17.

4. Bechtel signed a letter of intent for the design review on a man-made island connecting the bridge and tunnel of the Trans-Tokyo Bay Highway project. The contract is worth about $1 million. *ICW*, 2/27/89.

5. Shuwa Corporation awarded a construction order to Turner and Kumagai Gumi to build an 18 story office building and a 14 story residential building in Tokyo. Turner's share is 10% of this $86 million project. (This project is not covered by the U.S.-Japan construction agreement). *ENR*, 3/30/89.

6. Tishman and Aoki will share a $200 million contract to build a 400 room Westin hotel in Osaka. According to Tishman, this project will also be the first to use U.S. "fast track" construction management techniques in Japan. (This project is not covered by the U.S.-Japan construction agreement). *Business Week*, 4/3/89.

7. Jetway Systems and Stearns have letters of intent to supply 13 and 5 boarding bridges respectively for the new terminal at Haneda airport. Nippon Otis will supply 13 moving sidewalks. The final contracts will be with the prime contractor, a consortium led by Taisei in which Bechtel is a participant. The U.S. portion amounts to about $11 million or around 30% of total procurement of boarding bridges, baggage handling systems, elevators, escalators, and moving sidewalks. *USFCS Tokyo*, 4/28/89.

8. Bechtel reportedly will receive a $300 million plus contract for engineering and construction of a $769 million project to build two 200-megawatt geothermal power plants on Kyushu. (This project is not covered by the U.S.-Japan construction agreement). *San Francisco Examiner*, 5/2/89.

9. Morrison Knudsen and Hazama Gumi were awarded a $47.9 million contract by Shuwa Corporation to build a 16-story office and residential tower in downtown Tokyo. Morrison Knudsen is a 30 percent partner in this joint venture. (This project is not covered by the U.S.-Japan construction agreement). *ENR*, 7/13/89.

10. Hellmuth, Obata & Kassabaum with Nihon Sogo Kinchikujimusho was awarded a $6.7 million contract for the architectural design of the $321 million telecommunications center for the Tokyo Teleport Center Co. *USFCS Tokyo*, 8/9/89.

11. AT&T International and Nippon Telephone and Telegraph were awarded a contract to design Kansai airport's passenger information system. Contract is estimated at $1.3 million with AT&T's share estimated at about 40 percent. *USFCS Osaka Kobe*, 8/24/89.

12. Austin Industries and Nishimatsu were awarded a $100 million contract by Northwest Airlines for an international hotel, flight catering and crew training facilities at Narita airport. Austin is a 30% partner in this joint venture. This is the first time a U.S. firm in Japan has hired a U.S. contractor. (This project is not covered by the U.S.-Japan construction agreement). *USFCS Tokyo*, 9/12/89.

13. Mancini Duffy Associates of New York with Nikken Sekkei won the design award for the large conference hall for the Minato Mirai 21 project in Yokohama. The basic design is worth $700,000 with follow on fees expected to reach $3 million or more. Mancini Duffy's share is not known. This is the first design award to a foreign firm on a public works project in Japan. *Kensetsu Tsushin Shimbun*, 9/30/89.

14. Mancini Duffy Associates was chosen as a joint venture partner by Nikken Sekkei for portions of the design of the $300 million World Trade Center at Technoport Osaka. The contract is worth about $8.5 million, and, while not yet decided, Mancini Duffy's share will probably be approximately 10%. *USFCS Osaka Kobe, 10/3/89.*

15. Rafael Vinoly Architects of New York won the design competition for the Tokyo International Forum. There were over 2,000 applicants from 68 countries and 395 submissions. This $700 million project includes four theaters, two cultural centers, a conference center and exhibition areas. The contract is still under negotiation. (This project is not covered by the U.S.-Japan construction agreement.) *USFCS Tokyo*, 11/17/89.

16. Bechtel will handle construction supervision for the $800 million new terminal building at Haneda airport. Bechtel is part of a 10 firm consortium led by Taisei and including four of the other five Japanese "majors". Bechtel's reported share is 10%. *Journal of Commerce*, 12/22/89.

Mr. MURKOWSKI. Mr. President, our United States firms are also concerned that Japan's official development assistance program—in other words, Japan's foreign aid—is administered in a manner that perhaps shows some discrimination against United States firms.

The Japanese view, on the other hand, is that the expeditious approval of construction licenses for United States companies has enabled United States firms to gain the necessary experience in the Japanese market.

In the meeting, Mr. Sako emphasized that once a firm gets a construction license it can participate in any project in the Japanese construction market. Well, I can assure you, Mr. President, the United States welcomes that statement. The Japanese agreed to consult with the United States industry on a continuing basis on participation in Japanese official development assistance.

We also had a brief discussion of the importance of United States firms developing a closer relationship with Japanese trading companies, so that United States firms can be involved early on in Japanese construction project planning in Third World countries. Japan expends much of its foreign assistance in those parts of the world.

These exchanges were useful for both sides. There was a better understanding of the respective expectations of the United States and Japanese industries, and identification of the key problems that I have outlined. The challenges identified, however, will not be easy to resolve, Mr. President.

This spring, there are a number of congressionally mandated deadlines that could trigger trade retaliation if the United States side determines that we are not making substantial progress in the Japanese market.

The trade barriers report goes to print in March. The following month, we must determine whether United States firms enjoy fair access to Japan's airport construction market and Government procurement market. By May, we will have reviewed the major projects agreement in detail.

To influence these decisions, results will have to be apparent over the next few months. We are moving in the right direction, but at last week's meeting, there were no guarantees that the desired results would materialize. We did, however, lay a very important groundwork for communications and success in the future.

Finally, Mr. President, I was especially pleased by the overall tone of the meeting. Both sides are prepared to let the past be the past and work toward a positive relationship, and that is the approach that is essential if we are to resolve these construction disputes and have access to an important Japanese market.

Both countries' industries were pleased with the meeting and plans are underway, Mr. President, for a second meeting to be held in Tokyo in the spring.

I hope we are about to enter a more positive era in our trade relations with Japan particularly in the construction trade and in the related fields of architecture, engineering, and design. I thank the President for his accommodation this morning and wish him a good day.

EXTENSION OF MORNING BUSINESS

Mr. MURKOWSKI. Mr. President, I ask unanimous consent morning business be extended until 10:30 under the same terms and conditions, to accommodate some of my colleagues who are about to come into the Chamber, I understand.

The PRESIDENT pro tempore. Is there objection? The Chair hears none. Morning business will continue until the hour of 10:30 a.m. today with Senators permitted to speak for not to exceed 5 minutes each.

The Senator from Nevada [Mr. BRYAN] is recognized for not to exceed 5 minutes.

THE PRESIDENT'S STATE OF THE UNION SPEECH

Mr. BRYAN. Mr. President, last night President Bush gave a good speech touching on many issues that confront this country. He is right when he says we must do better in education, that the Head Start Program should be a priority, that our environment must not be ravaged. All these things, and more, Americans can agree with, and support the President.

But the truth on the most important long-term issue facing the country today, the spiraling Federal deficit, was not addressed last night. The President said, "The last thing we need to do is mess around with Social Security."

His words are right, but his deeds are wrong. His budget recommends that every nickel and dime now in the trust fund will be spent to make his deficit appear smaller. Instead of our hard earned payroll taxes building up in the Social Security trust fund, President Bush will leave a $75 billion IOU.

The Bush deficit will add over $196 billion of direct debt under his budget. To be accurate and honest to our citizens, one should also include the $136 billion, the administration wants to borrow from the Social Security trust fund, and the other Federal trust funds. This means, if Mr. Bush has his way, he will have added over $332 billion in additional debt, and the deficit will actually grow not recede.

To those who say this mounting debt means nothing, I suggest they look at the financial pages. We are witnessing a new reluctance on the part of foreign central banks to continually fund our debt.

If Japan and West German central banks continue to raise their interest rates, the American Federal Reserve will soon have to raise interest rates so that our Treasury bonds will be competitive with Japanese and West German bonds. Make no mistake, the Fed will have to adjust interest rates, because we must sell those bonds to finance Mr. Bush's deficit.

With a fragile economy, a rise in interest rates will threaten a recession. So the deficit does and will matter, and maybe sooner than many would expect.

None of my colleagues are on the floor. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXTENSION OF MORNING BUSINESS

Mr. GORE. Mr. President, I ask unanimous consent that the time for morning business be extended by 5 minutes.

The PRESIDENT pro tempore. Does the Senator also ask permission be granted to speak within that time?

Mr. GORE. I so request.

The PRESIDENT pro tempore. Without objection, it is so ordered, and the Senator from Tennessee is recognized not to exceed 5 minutes.

IRS POLICY TO NOTIFY TAXPAYERS OF REFUNDS DUE

Mr. GORE. Mr. President, I would like to discuss this morning an important matter affecting taxpayers across our country. This is about fairness and honesty and paying what you owe and not more than you owe. It is also about getting a fair shake from the Internal Revenue Service.

Last year, thanks to some of my constituents in Memphis, and thanks, in particular, to one courageous employee of the Internal Revenue Service in Memphis, Linda Johnson, we exposed an IRS ripoff whereby some taxpayers were not being informed of deductions that they were entitled under the law to take. As a result, these taxpayers were paying too much. The IRS inspectors were actually being ordered by their superiors to not inform taxpayers when they had paid too much and let the overcharge stand. Of course, if somebody pays too little, they will be pursued to the ends of the Earth, but if they pay too much, according to the IRS handbook used as the basis for instructions to these employees, the employees were told, let the overcharges stand; do not inform the taxpayers.

At the time, after quite a bit of noise was made about these practices, after some of us tried to alert the taxpayers to what they were entitled to deduct from their forms, a job not being done by the IRS, I was pleased to receive some assurances by the acting IRS Commissioner in a private meeting in my office that agency policies were going to be changed and significant actions would be taken to notify the affected taxpayers. My colleague, Senator PRYOR of Arkansas, worked with me on this issue and shares my concerns.

Mr. President, I rise today to say that the IRS promises simply have not added up to the kind of action that I believe is both warranted and needed. Taxpayers are still being shortchanged by the one agency which sought to make fairness its hallmark about anything else.

Last March, as I mentioned, I was pleased when Michael Murphy, then acting Commissioner, responded positively and showed a real commitment to fix this problem. The IRS agreed to change the policy which prohibited the examiners from informing taxpayers when they were owed money because they failed to deduct withholding on pensions and what are called lump-sum distributions.

Equally important, the IRS agreed to identify those taxpayers who are owed money and then give them the refunds to which they are entitled.

As a backup, I introduced legislation last April to address this glaring inequity in the Tax Code and protect the rights of the taxpayers.

Well, the IRS plan and the agency's promises looked better on paper than they have in practice. That has now become clear to me over the past several months as I have continued to monitor the situation and the IRS effort.

Only a few weeks ago I received a letter from Mr. Murphy, now Commissioner of the IRS, notifying me of the agency's progress in identifying taxpayers about refunds they may be owed. The IRS has failed to work quickly enough to help taxpayers who may have paid too much in taxes. It is simply hard to believe the IRS figures on claims they are now giving out accurately reflect the number of people affected.

Mr. President, I strongly believe we must ensure taxpayers are treated fairly. There is simply no excuse for a rule saying public servants should not tell the public what they are entitled to know, especially when often confusing tax forms are involved.

Furthermore, this policy affects those who can least afford it such as retirees and people laid off from their jobs.

So I am now asking Commissioner Murphy to provide a statement of the agency's plan to reach those taxpayers who are due refunds. We need to contact an estimated 1.5 million taxpayers across this country who could be affected, and we need to give them time to check their returns and amend those returns if necessary.

Mr. President, our constituents are being shortchanged, and it is the people who need every extra penny the most, seniors especially, who are being hurt the most. We cannot just throw up our hands and say nothing can be done, and we cannot be satisfied with half efforts that move at a snail's pace. We have to move effectively and quickly to get the word out to taxpayers and to make sure they do not overpay.

In summary, Mr. President, what we found last year was a scheme by the IRS to order their examiners to remain silent when taxpayers were

overcharged, pursue them when they pay too little but keep quiet when they pay too much. When we exposed this abuse, the IRS promised to change the policy and then they also promised to reach out and find and contact those who had been overcharged as a result, notify them and give them a fair opportunity to file an amended return and get the overcharge back. The problem is the IRS efforts to contact those who have been overcharged have fallen far short of what is appropriate under the circumstances.

So I am calling on the IRS to make good on their promises, come up with a sensible plan that really identifies and contacts those who are due refunds, and then go about the task of getting the word to them and giving them a fair chance to get the money to which they are entitled.

I call on the IRS Commissioner to come up with such a plan, and I look forward to his report to this body in behalf of those taxpayers who have been overcharged.

Mr. President, I yield the floor.

Mr. President, I also make a point of order that a quorum is not present.

The PRESIDING OFFICER (Mr. KOHL). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BUMPERS. Mr. President, I ask unanimous consent that further proceedings under the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF MORNING BUSINESS

Mr. BUMPERS. Mr. President, I ask unanimous consent that that morning business be extended by 15 minutes so that I may speak on a non-clean-air issue.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATE OF THE UNION

Mr. BUMPERS. Mr. President, since I will never be President and get to deliver my State of the Union Address, I choose this morning to deliver my State of the Union Address, and it will be a very abbreviated one.

The President's State of the Union Address last night had many good features to it, and it was a reminder to all of us that a lot of very dramatic and interesting things are going on in the world. I tell high school students that they do not relate to what happened in Eastern Europe 40 years ago, and so therefore they do not really feel the exhilaration and scintillation that most of us feel about what is now happening.

The networks said that when they covered the events in Poland and what was going on in Hungary, Romania, and Czechoslovakia, they lost viewer audience, which indicates that not enough of us are my age and simply do not remember what happened in Eastern Europe 40, 45 years ago and therefore cannot relate to the unraveling of it now, something that I never dreamed would happen. And so when the President last night talked about how exciting these times are, he hit the nail on the head.

As I was about to say a moment ago, I tell all the high school kids that I find what is happening in the Soviet Union and Eastern Europe the most exciting thing that has happened in my life, and it may very well be the most momentous thing politically, economically, and militarily in the history of the world.

We politicians are prone to embellish and to exaggerate, but I say that with the utmost intellectual sincerity. I think this period may very well be the most important time in the history of the world, when you consider the magnitude of the weapons, the destructive capability, and the chance that all of this change offers us now for a durable peace, and a good night's sleep for most of the world.

So last night when the President said what was easily the most important thing in his speech, I rose and applauded with my colleagues from the other side of the aisle, and with my colleagues from this side of the aisle. It was an interesting thing. When he said he thought both the United States and the Soviet Union ought to cut their troop strength in Eastern and Western Europe to 195,000 each that almost everybody in the Congress instantaneously, and without being orchestrated, stood and applauded.

The really troublesome thing about that is if somebody had stood on the floor of the Senate as recently as 3 weeks ago and offered an amendment to reduce our troop strength in Western Europe to 195,000 in exchange for the Soviets responding in kind, he would not have gotten 30 votes.

That points out that the problems of this country must be addressed by the President. Congress cannot lead. Occasionally we have a high moment here when we can take the initiative and finally bring the President along. But the President must propose solutions to the deep-seated problems of this Nation, which is in decline.

So everybody agreed last night that this was a step in the right direction, a big money-saver. When you look at the savings of base closing the President has proposed, it is peanuts. I am parochial as anybody about military bases. It is tough. It is a very vital issue. But the proposals for cuts in Eastern and Western Europe troop strengths—that is where big money can be found, especially if we muster those extra troops out.

It was less than 5 months ago that I stood right here, Mr. President, and offered an amendment to reduce our troop strength in Korea, and there were 34 votes in favor. The logic for reducing our strength in Korea in my opinion was unassailable. Unassailable logic does not necessarily prevail around there, and did not on that occasion.

But having said that, I want to also say there are times when we can raise the issue like Korea and force the Pentagon and the White House to start thinking, knowing that that debate is not going to go away, that something as necessary as reducing our troop strength in Korea is going to have to be addressed at some point.

Mr. President, I did not find very many points of light in the President's speech last night. I found a lot of points of darkness. The points of darkness were the refusal of this President to address the really deep-seated issues in this country. If the President wants to maintain his approval rating of 79 percent, as the Washington Post reported the other day it was, I think he can probably do it. You know, I tell my people back home—and I do not say this to denigrate anybody—I know how to vote if I want to be carried out of the U.S. Senate in a pine box. I know what is popular and unpopular at any given moment. I do not have to have polls to tell me.

So if the President chooses to maintain his popularity with rhetoric, one liners, metaphors, he could do that. But I can tell you the problems of this country require boldness, and there was no boldness in that speech last night. There were no policy initiatives. The deficit has been, was last night, and for years has not been treated as an economic disaster. It has not been treated as a matter of a policy. It has become a political item. Each side wants to profess that they are for doing something about the budget deficit more than the other side. It has just become a political football, not a policy problem to be dealt with.

The President said last night we have now gotten our deficit under control. Mr. President, I cringed when he said that. We have a deficit this year that is going to be far in excess of the $100 billion deficit we thought we were voting for last fall. No. We did not think we were voting for it. There was nobody in the U.S. Senate deceived to the extent that he or she actually believed the deficit this year would be $100 billion. Everybody knew better than that. They voted for it so we could get out of here and go home.

So the deficit this year will not be $100 billion. It will be about $138 billion. The deficit the President proposed last night for 1991 will not be $64 billion. God knows what it will be. Add the $50 billion for the S&L bail-

out. Add $72 to $75 billion in Social Security surplus funds. Add the highway trust funds and the airport trust funds. Then you get some idea of the size, the true size, of that deficit.

The President says he wants us to become competitive. That statement followed the statement that people all over the world recognize the quality of American goods. That is a "Dr. Feelgood" statement if I ever heard one. It is not that we do not make anything of quality, because we do. We make a lot of quality products. But when Honda is the biggest selling car in America, and when we have a $140 billion trade deficit because the Japanese and the Germans and the Italians and everybody else make a product that the world wants a lot more than they want our products, what kind of a statement is that?

So he says to become more competitive we have to save more. I agree with that. That is an economic fact. So he says he has a plan. If you make $60,000 or less, a married couple, you can save $2,500. You have to pay the tax on the $2,500 on the front end, but next year if you make 10-percent interest on that $2,500, you have made $250 in interest, and that means you will save 28 percent of that amount, or roughly $70.

Do you think people are going to put away $2,500 this year when they can hardly make their house payments or their rent payments, in exchange for a $70 tax concession? I doubt it. But if you make $120,000, which virtually every Member of this body does, then you can put away $5,000 in a savings account. You have to pay the tax up front and you have to leave it there for 7 years. Is that going to encourage savings?

Driving in this morning, I was listening to virtually every economist they could drag up to address that issue. Not one said they thought it would address the problem.

I am with the President. I want to encourage savings. But I honestly, at this moment—I reserve the right to change my mind on this one—I am not sure that is a big enough incentive to get anybody to save.

I dare say, Mr. President, that the budget the President sent us last Monday requested five more B-2 bombers. The cost, including research and development: $5.5 billion; that's $1.1 billion per copy.

I would guess, and this is only a guess, that those five B-2 bombers will cost more than the President's savings incentive program will cause the American people to save. Are they related? You bet. Why do we want people to save? We want them to save so we can borrow the money to finance these huge deficits. They say we want people to save so business will have a bigger pool from which to draw, and we want them to save to drive interest rates down.

There is sort of a contradiction in here. We tell people we will not tax you on your interest. If you save enough, we will drive the amounts you get on your interest on that money down. Only, if the savings boom was as big here as in Japan, interest rates would not be 10, 12 percent across this country for business people. But it is this Government deficit that is the culprit when it comes to savings.

You go through this exercise, and there will be a very lengthy debate on this, and if you can cut $5.5 billion out of the Pentagon's budget and weapons procurement, you probably would do more toward dealing with the problem the President is talking about than you would with this savings plan. You would not lose the revenue that you are going to lose under this plan.

Why are the Japanese dropping out of the American financial market, and what does that mean? Because their interest rates are better than ours, when you consider inflation, and the Japanese treasury bonds are a better buy than American bonds.

So on Tuesday morning when Secretary Brady offers at the window down at the Treasury Department bonds of the security of the United States, why are the Japanese not showing up? Their bonds are a better buy than ours.

The Japanese have been financing 30 percent of our deficit. If they do not finance it, what does that mean? I will tell you. It means President Bush has to call Alan Greenspan, chairman of the Federal Reserve Bank, and say, "Alan, start the printing presses, and don't quit until I call you."

What does that mean? It means inflation. What else does it mean, as the Japanese pull out? It means when there is more competition for that money, interest rates go up and inflation goes up. And what does that mean? Loss of jobs, recession, unemployment.

Why could the President not say that last night? Why could he not say to the American people, "Folks, here is the problem, and here is the way I intend to deal with it"? And this is real—not a metaphor, not a one-liner. There is not a dirt farmer in Franklin County, AR, that would not understand precisely what I said. Education. The President said he is an education President. We had the subcommittee staff of the Health and Human Services Subcommittee on Appropriations, the subcommittee on which I sit, do an analysis of the President's education budget. It is a cut. Take the 4½-percent inflation rate, and subtract that from the figure in the President's budget, and you have a 2-plus-percent decrease in the education budget.

Mr. President, I heard a story the day before yesterday at lunch from a man who knew a rich oil man down in Louisiana. He went to this school, which was poor, I think mostly black, and he said, "How many of you kids in here plan to go to college when you get out of school?"

Six out of the class held up their hands. He was so appalled by that, he made the same generous offer that a gentleman in New York made several years ago to a class in school. He said, "If you all will stay in school and graduate, I will personally pay for your college education."

Only two kids dropped out before they graduated, and 90 percent of the remainder went to college. Is there a message in that? You do not have to be a rocket scientist to understand that. It means that children want to go to school.

Mr. President, I believe that there are some absolute values, and I believe in values. I did not agree with Michael Dukakis when he said down in Atlanta, "This election is not about philosophy and about ideology; it is about competence."

Mr. President, every election is about values and what you believe, not maybe ideology, but what your values are, how you cherish them, and how you meet them. I believe that one of the values is that no American ought to be deprived of an education if they want it, as much as they will take, and no American ought to be deprived of health care.

Quite frankly, no American ought to have to sleep on the streets because he does not make enough money to afford an apartment or a house. That is what makes a country great.

We are going to find, Mr. President, that how many tanks and planes and guns we have is not the strength of this Nation. It is about our judicial system, it is about our crime rate, it is about our institutions. It is about our democratic institutions, which Eastern Europe does not understand and is grappling with. It is about the preservation of our sacred Constitution.

Mr. President, I said I would be brief, and I have not been quite as brief as I intend to be. Last night the President said, "I want to extend the right hand of cooperation." That is wonderful. But you have to ask, cooperation on what? Just your agenda, your capital gains, your version of child care, your method of dealing with the deficit?

Mr. President, we want to cooperate, too, but we want to have some input into the agenda. I speak only for myself. I do not speak for the rest of the Democrats on this side of the aisle, and for none of the Republicans on the other side.

I speak from the heart about what has made this country great. It breaks my heart to have to stand here and say that we are broke, and we are in

decline, and we have chosen to ignore it.

The President quoted Vaclav Havel last night, the President of Czechoslovakia. Let me tell you what President Havel said in his inaugural address 4 weeks ago. He said,

For 40 years, we have been lied to, and for 40 years we have grown sicker, because we have been saying one thing and believing another.

He went ahead to say,

I assume that you did not elect me President to continue this 40 years of lying. We have to deal with our problems. Nobody else can solve our problems but us.

Mr. President, there is so much of that going on in the U.S. Senate and the Congress and in the White House—saying one thing and believing another. The first thing an alcoholic has to do is admit his problem before he can deal with it. The first thing we have to do is agree this is a serious problem, all of it. It goes right to the basic values of this Nation.

If you skirt it, use metaphors to conceal it, wrap yourself in a patriotic flag to distract people from it, you never deal with it.

Last May, coming back from Vienna, where an observer group from the United States Senate was returning to America, we landed in Iceland. We have a base there, Keflavik Air Base. I had never been to Iceland, a little island of 250,000 Scandinavians in the North Atlantic, a beautiful blue-eyed blond people, bilingual. They speak Icelandic and English. Everything is clean, everything is beautiful. I was absolutely stunned at the beauty of this place.

The Foreign Minister of Iceland came out to the airport, drove himself, to visit with six Senators. He is a graduate of the University of Edinburg and a very bright, articulate man, a man I would not want to run against.

So in a little give-and-take session at the airport—and we were only there 3 or 4 hours—I asked, "Mr. Minister, what kind of a crime rate do you have here?"

He said, "We have had one armed robbery in the last 1,000 years. I believe it was committed by an American tourist."

I said, "Do your policemen carry guns?" "Oh, no," he said.

"How much do you spend on defense?" "Nothing, Senator, zip."

I said, "You do not spend any money on defense?" "Not a dollar." I said, "But, Mr. Minister, you are a member of NATO." He said, "We like to give them our thoughts, our minds." He said, "Senator, we only have 250,000 people. We are not big enough to attack anybody. If anybody attacks us, we are not big enough to defend ourselves. So we just do not mess with it."

He said, "I will tell you what we do. We educate our children." He said, "We have the oldest living constitution in the world," the only one older than ours, Mr. President, and he said, "We have the highest literacy rate of any nation on Earth, 99.9 percent."

I could not help but think of our $300 billion for defense in this country, of our interest on the debt prepared to go beyond the defense expenditures and become the biggest expenditure in our budget, of our children finishing last in educational performance among Western nations. And, Mr. President, within 10 miles of where I am standing, in 1989 there were more murders than in all of Western Europe and Japan combined, and we call ourselves a civilized society.

So, Mr. President, to extend our hand of cooperation we will do the very best we can. But I hope that other Senators feel similarly as I do. I hope that this year the Congress will try to take some initiatives in those areas that are going to prove fatal to this country if we do not start addressing them. I certainly intend to do my very best.

Mr. President, I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, I ask also that I might proceed for 10 minutes as though in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, I am often asked, Is there any great debate left in the U.S. Senate? And I said, "well, you have to come and get that answer yourself." But I always use the example of the person who can probably best express what many of us feel, the senior Senator from the State of Arkansas, who has just spent much more time than he intended to spend in morning business because the depth of his feelings is so great.

I intend to make some remarks now about an expedition that we have been part of for some period of time which talks, to a degree, about the human spirit, and then I intend to use the remainder of my time in partial response to the Senator from Arkansas and particularly his characterizations of the remarks of the President last night.

THE ANTARCTICA EXPEDITION

Mr. DURENBERGER. Mr. President, I rise at this point with my map of Antarctica, a continent that I was not very familiar with until one of my good friends decided, after being the first in almost a century to go to the North Pole on foot, that he would be the first to go on foot across the 4,000 miles of Antarctica. He is joined by five other men from five other countries, dogsledding across Antarctica, a trip that began in August 1989, following this red line through the highest point in Antarctica, also the coldest point in Antarctica, about 4,000 feet, at Volstok. They are now about 3,000 miles from the place they began and about 1,000 miles from their destination in March of this year, their destination being the community of Mirnyy on the east Antarctica coast, right now traveling at a pace of about 25 miles a day, which will get them there in early March.

The terrain currently is flat, but the temperature is dropping as the Antactica winter comes. On Monday of this week the temperatures were somewhere between 30 and 44 below zero. But as team coleader Will Steger, from Minnesota, said, "Our team can handle the weather; it is a lack of visibility that will be a major problem. If we can't see the trail, we have to sit in our tents and wait."

This map will give the Senate some idea how tough the weather actually can be in Antactica as well as showing typical expedition life. You see the dogsled and the humans wrapped up on one of the sleds over here, another sled here with four of the members of the expedition there, and the dogs curled up in the snow. It is these kinds of blinding snowstorms packing up to 2 miles of depth in snow in this part of the world and circulating it that makes the trip so difficult.

The snow obviously cuts like glass, and special protection, both for the dogs and for the men involved, is important.

A lot of people have expressed concern about the dogs. I think there is something about humans, who can make decisions on trips like this, that tends us not to have the same sympathy, but a lot of sympathy for the dogs.

Let me reflect from our daily reports that it is really the enthusiasm of the dogs on this trip that picks up the enthusiasm of the men when they get down. As Great Britain's Geoff Somers said,

The coats that the dogs grow naturally are growing even more in Antarctica, and they are in beautiful condition. The dogs have put on weight. They look positively chubby. They are up and excited when we stop for rest, they frolic in snow, lie on their backs, feet in the air, or lie stretched on their stomachs and chests if they need to cool down.

Jeff continues,

The pace of 24 to 25 miles per day remains almost constant until the end of the day when, perhaps over the last hour, the pace increases because the dogs know it is near feeding time and their excitement grows.

Food is very important on the trek for both dogs and the men. They must get a balanced diet that provides them with energy. The food has to be light enough to carry on the sleds yet edible in the cold. For dogs it is easy. Each evening each dog gets a 2-pound block of specially prepared dogfood that they will gnaw on all through the night.

For the men food is more difficult. Each team member eats 36 ounces of food each day. Although the menu may vary, the staples include: for breakfast, a mixture of oatmeal and butter; for lunch, dried fruit, nuts, and energy bars; and for dinner, Pemmican, a lard and shredded meat mix, for hors d'oeuvre and peanut butter, soup, cheese, and noodles, rice, or potatoes for the main dish.

So, Mr. President, the team must not only overcome natural and meteorological challenges, but culinary monotony, too. How they do it I am not sure.

One thing I am sure of: the efforts of the six men from six different nations to dogsled across the bottom of the Earth is a historic and especially courageous feat and one that deserves our admiration. Their determination, cooperation, and their drive to overcome overwhelming odds is an example of the human spirit and an example for the world.

THE STATE OF THE UNION SPEECH

Mr. DURENBERGER. Mr. President, having the opportunity to come to the floor today to talk about the expedition and having the opportunity to listen to my colleague from Arkansas, I try to think of what it is that we have in common. I listened to the same speech he did, and I did not come away as depressed.

I think of a couple of things. No. 1, I think about the fact that we are all elected to solve problems, so we concentrate more on the problems than we do on the opportunities.

But I do think that that is part of the problem for those of us who are assigned the job of problem solver. If they are not clearly identified for us, and if somebody like the President does not suggest a solution, somehow or other we are not doing our job. You have to have something to be for or against around this place or the job becomes much more difficult. I found as much unease in a speech that did not have specific solutions to problems that I understand, we all understand, as the Senator from Arkansas. I also find, as he does, in our elections a depressing lack of instruction material.

The current occupant of the Chair recognizes from his own campaign how elections are run and won in this country. We were all here last year, I recall, when the Senator from Arkansas, in the midst of casting a very difficult vote and a vote that I recall he characterized as being somewhat of a political vote, saying this is going to get translated into a 30-second message and no one is going to understand what we are doing. That is why it is so difficult to get anyone to demonstrate some courage.

Mr. President, you and I both know the power of the 30-second message. That is the way we run our campaign. But not a thing that the Senator from Arkansas said here today can be converted into a 30-second message. Not a thing that the Senator from New York, Senator MOYNIHAN, said about the equity of generations in his statement about payroll tax can be translated into a 30-second message. It played well last night in a one-sentence line that said, "We will never mess with Social Security," and everyone jumped up and applauded.

But that one line missed the problem that the Senator from New York was trying to point out to us. It is a generational problem, not a tax problem, not a Social Security problem. But to try to say that in 30 seconds or to try to say that and cover education, child care and all the rest of these sort of things in a 20-minute State of the Union speech is incredibly difficult.

So I compliment my President for at least having said what we all think we know. But we want the assurance that things are different today than they were 10 years ago. When I came to this place we did not talk about the dificit. It was only $800 billion. Nobody worried about it. We talked about taxes, we cut the taxes, created a deficit. So, now we have a large deficit and whether it is under control or not I think is a state of mind more than anything else.

But things are different today than they were 10 years ago. I think that places a special burden on the President of the United States. Again, the Senator from Arkansas says he did not give us any specific solutions; he did not tell us how he intends to deal with these problems. I think that is wisdom on the part of the President of the United States. I think there is wisdom in helping us as a Nation to identify the nature of these problems and to work with us in trying to find solutions.

The toughest thing, I daresay, Mr. President, is finding in the human spirit in this country the solution to these problems. It is one thing for me to put up a little map here and talk to you about six human beings who are doing the impossible and quite another to try to instill that same spirit into kids who have to be raised in this community that he talks about—drugs, no family, murder, fear, peer pressure, all the rest of it.

But if the President stood up there with a program for the human spirit, I do not know how he would have conveyed it to us. How do you reach down inside somebody and instill in them whatever got instilled in Will Steger and the rest of these people?

America suffers from an excess of, not from a lack of, opportunity. There is so much opportunity in this country that I think that most of us take it for granted. When somebody like PAT MOYNIHAN stands up and says there is something wrong with the way we are doing this Social Security funding because the promise is that there is going to be something there 50 or 60 years from now, but the reality there is paying today's debt so that none of us really have to make sacrifices today, he is right.

And the response to that is not to denigrate either the Senator from New York or the statement that he made. Because all that does is feed all of those folks whose human spirit tells them, "I should not have to give up a little something here so that somebody can have something over there." All of the folks that said, "Hey, don't make me pay more for my catastrophic than somebody else"; all the folks that say, "Don't make me pay anything for my health insurance so that people without health insurance can have a little bit of health insurance."

I think there are too many of us in politics who play to the notion that each of us does not have to make some small sacrifice so that all in this country might have the opportunity that the Senator from Arkansas spoke of. Therein lies the quandry. We are the products of the 30-second television commercial.

It is much easier to knock PAT MOYNIHAN's idea with a one-line statement. It is much easier to attack catastrophic than it is to come to the floor of the Senate and defend it. It is much easier to say, "Do not tax my fringe benefits," than it is to stand up and say, "Nobody in this country is entitled to have the taxpayers buy them $600 a month worth of health insurance just because they work for a big company, when 37 million Americans have no health insurance at all." It is hard to say that in a 30-second message because there are more people that have that kind of subsidized health insurance than the 37 million who have nothing. And so that is the quandry I think all of us face.

My only disagreement with the Senator from Arkansas is, I wish he would not use my President or his message as part of the problem. I do not think it was. I think the President said times are different. They require different solutions. They require all of us to be involved in trying to find these solutions.

Resolving the Federal role in child care is not simple; resolving the national problem of $55 billion a year going into medical care when we have

border babies, we have AIDS, we have people going without health care because they cannot afford to get into a hospital or a doctor. We have the inequities in rural communities and cities. Put all our money into high tech and nothing into primary care.

So I think what the President is going to help us do, if we have the courage to respond, is identify the problems, try to find a way in which the human spirit can be applied to those solutions, find the ways in which more personal responsibility, not just political responsibility, is applied to these issues.

That is a long haul for all of us. It is going to take a lot of patience with our President and with each other.

As my colleague from Arkansas says, he is only speaking for himself. That is all I am doing. I am just speaking for myself here today. But I think I am also speaking for a lot of people out there who can get a little more courage from those of us who were their political leaders, a little less money spent on campaigns, and a little more of our rhetoric going into dealing with the realities of some of these problems.

Maybe those of us who are problem solvers could agree on the best way to resolve those problems. And when Will Seger and the boys come back from Antarctica, they are going to confront us with another opportunity, which is this country's attitude toward the environment of that continent. I hope at that time that all of us are going to respond to that particular challenge that they provide us as well.

Mr. President, I thank you for the opportunity of your attention. As one who just stands here not knowing whether anybody is watching television as everyone does at this point of the day, I appreciate very much the attention of the occupant of the Chair, who, I know, as a new Member of this body, appreciates the difficulty. You did not set out to be a politician in your life. That is sort of coming somewhere in the middle of things. I appreciate that there is hopefully something each of us has had to say about the State of the Union today, some opportunity for those of you who are just getting here and just recognizing the opportunities for you in this process, that special role that you are going to play in teaching those of us who have been here a lot longer how to do it better than we have been doing it previously.

EXTENSION OF TIME FOR MORNING BUSINESS

Mr. DURENBERGER. Mr. President, I ask unanimous consent to extend the period for morning business until 11:40 a.m. under the same conditions as previously ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE WARN ACT—AN ANNIVERSARY AND A HISTORY LESSON

Mr. METZENBAUM. Mr. President, I rise to commemorate an anniversary and to provide a valuable lesson on recent history to the Senate. Next week marks the 1-year anniversary of the effective date of the Worker Adjustment and Retraining Notification [WARN] Act. As we all know, that law requires an employer to provide workers with 60 days advance notice before ordering a plant closing or a mass layoff.

I am proud to have been the principal author of this legislation designed to help millions of American workers. The final product was a political compromise. While not all that I hoped it would be, the WARN Act is one of the very few significant worker protection laws passed in the 1980's.

And it has worked remarkably well. The doom and gloom predictions of the corporate lobbyists were completely wrong. Employers have had few problems complying with the law. Only a handful of lawsuits have been filed under the law. But most importantly, workers and communities are getting fair notice in advance of a plant closing or mass layoff. They can begin to plan and adjust for new circumstances.

The WARN Act was one of the most contentious issues addressed by the 100th Congress. We fought to include it as a part of the omnibus trade bill. We successfully defeated attempts to strip it from the trade bill. President Reagan initially vetoed the entire trade bill in large part because of the notification requirement. We fell just short of a veto override and we were forced to pass the bill again as a separate measure. Finally, President Reagan relented, in the face of overwhelming congressional and public support, and allowed the bill to become law, without his signature, on August 4, 1988. At the time, he termed the bill a "Ticking Time Bomb." The WARN Act took effect 6 months later on February 4, 1989.

Throughout the process, I maintained that President Reagan's assessment of the law was wrong, and history has proved that I was right. After 1 year, the verdict is in: The WARN Act helps workers and their communities, but does not place undue burdens on employers.

Mr. President, I must confess that I was surprised that the advance notification requirement created such controversy. I maintained then, as I maintain now, that requiring 60 days advance notice of a plant closing or mass layoff is a very modest provision. It is simple human decency to provide such notice to loyal, dedicated workers. They need some time to overcome the pain of losing a job and plan the next step in their lives. It is a matter of basic fairness to give advance word to a community that has bent over backward to attract and retain jobs. With fair warning, city leaders may begin to rebuild the local economy and cope with the increased demand for social services.

But others did not see it that way. A number of Senators on the other side of the aisle bitterly opposed the bill. They termed it a "Marxist economist's dream" and "garbage" legislation that "represents the worst of "America." They predicted that the bill would "create industrial paralysis" and would "prompt an avalanche of costly, wasteful litigation." Time has proven that these Senators were totally wrong.

Those Senators were not alone in their erroneous, dire predictions. The business community, led by the U.S. Chamber of Commerce and the National Association of Manufacturers launched a vitriolic lobbying effort to kill the legislation. For example, the NAM predicted that the 60-day notice requirement would, among other things, "cause the loss of jobs"; "discourage companies from hiring new employees;" and "invite costly, time-consuming and counterproductive litigation that could paralyze management decisionmaking." The Chamber of Commerce charged that the advance notification provision was "an anticompetitive measure imposing European-style government intervention in the marketplace" that would lead to "economic stagnation."

The lobbying effort also included a study conducted by Robert R. Nathan Associates. I have known and respected Robert Nathan for a long time. But recently, his organization has produced so-called objective studies that are little more than political broadsides paid for by the business community. Based on completely absurd assumptions, the Nathan study concluded that the 60-day notice requirement would cost up to $2 billion annually, including an average of $850 million per year in penalties.

Now that the law has been in effect for a year, not one of those dire predictions has come to pass. As reported recently in both the Wall Street Jour-

nal and in the National Law Journal, there has been no explosion of litigation under the WARN Act—less than a dozen cases have been filed so far. The Wall Street Journal reported that "few glitches have surfaced" in complying with the WARN Act in the first year of its operation. According to the National Law Journal a "vast majority of companies reportedly follow the Federal plant closing law with little problem." A spokesman for the NAM has admitted that employers "seem to be able to live with" the law.

Earlier this month a representative of the Cleveland Chamber of Commerce indicated to my staff that the WARN Act has actually been a growth tool because advance notice has spurred community efforts to save the threatened jobs or plan for new ones.

Moreover, as reported last week in the Youngstown Vindicator, there have been 124 notifications provided under the law in my State of Ohio, with no complaints from employers. One of the scare tactics used by the business opponents of the bill was to claim that once workers received notice they would destroy an employer's property. According to the Vindicator, not one incident of worker sabotage was reported in Ohio after an employer gave notice.

Mr. President, the business community and its supporters in this body were dead wrong about the impact of the WARN Act. I said that the advance notification requirement was a modest provision that would not create problems for business. I said that the new law would not open the floodgates of litigation because most employers would comply with the law. It appears that I was right. I have not taken the floor to gloat or to say I told you so. I am here because there is an important history lesson to be learned. Those who do not study history are condemned to repeat it. The WARN Act experience must teach the Congress and the American people to take the business community's dire predictions with a heavy dose of salt.

On any number of measures designed to help working people—be it the minimum wage increase, the regulation of excess pension assets, or the family leave bill to name a few—the business community continues to raise shrill objections. I am sure they will continue to commission so-called economic studies that have no basis in reality. Unfortunately, they will continue to label bills designed to help millions of hard-working Americans as anti-American and crippling to our economy.

But we should have learned our lesson. These are the same, tired arguments that corporate lobbyists have been relying on for over 50 years. By now, the Chamber of Commerce and the NAM must have a special computer program to produce these arguments. If you plug in legislation to benefit workers, the computer automatically spits out the same, emotional buzzwords: It is a mandated benefit that will lead to socialism and economic stagnation and should be called the Lawyers' Full Employment Act. These tactics have been applied over and over again like a broken record against Social Security, minimum wage and child labor standards, Medicare, antidiscrimination laws, and now WARN.

As we debate legislation to benefit workers in the coming session, I trust my colleagues will be more skeptical when corporate lobbyists, who claim to represent the employer community, make their wild predictions. The WARN Act should teach us that these predictions have nothing to do with the realities of business practice in our great country.

I am proud of my lead role in the enactment of the WARN Act. The law was designed to help millions of workers and their communities adjust to painful job losses. And I am pleased to report to Congress that in its first year of operation, the Worker Adjustment and Retraining Notification Act has been effective and has worked remarkably well.

Mr. President, I ask unanimous consent that the articles from the Wall Street Journal, the National Law Journal, and the Youngstown Vindicator be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Jan. 9, 1990]

LABOR LETTER: A SPECIAL NEWS REPORT ON PEOPLE AND THEIR JOBS IN OFFICES, FIELDS AND FACTORIES

Layoff-warning law proves little obstacle for retrenching employers.

Few glitches have surfaced in the nearly first full year that companies have been required by the Worker Adjustment and Retraining Notification (WARN) Act to give 60 days advanced notice of plant closings or mass layoffs. The Labor Department says it knows of less than a dozen civil suits filed by workers, unions or local governments claiming violations. General Motors Corp., echoing the position of large unionized employers, says it announces closings at least six months in advance. Many union contracts require the extended notice.

Attorney Ronald Green says employer anxiety about the act was lessened when a federal judge denied punitive damages for some workers who contended they were dismissed without proper warning. The law holds employers liable for up to 60 days back pay. But doubts persist about the law's effectiveness. An American Telephone & Telegraph Co. official says some workers refuse to acknowledge that a job is lost.

Adds a union leader: "Until we can keep manufacturing jobs in the U.S., advanced notice doesn't help much."

[From the National Law Journal, Jan. 22, 1990]

A FIZZLING "TIME BOMB"

(By Randall Samborn)

The threat of government interference in employers' affairs hovered over the Rust Belt factories of the Midwest and the Northeast Businesses—especially small and midsize employers—feared that the Worker Adjustment and Retraining Notification Act of 1988 would sharply limit their ability to restructure their production and work force. President Reagan, after vetoing a similar measure, refused to sign the bill, calling it a "ticking time bomb."

The law, however, went into effect Feb. 4, 1989, six months after it was enacted by Congress. After passage, lawyers predicted a wave of new business, advising managers how to comply with the new law, along with an avalanche of litigation every time a company turned out the lights at another aging factory or scaled back the ranks of its employees.

But there has been no explosion yet, in the year since WARN became law. A vast majority of companies reportedly follow the federal plant closing law, with little problem. And while only about a dozen WARN actions have been filed, some important ground rules have been established in recent months in the first court decisions interpreting the statute.

Surprisingly, the pretrial decisions rendered so far stem from employment actions affecting workers on Wall Street and on Atlantic City, N.J.'s Boardwalk—and only a few of the pending cases involve employees in Rust Belt factories.

One such case is unfolding in Chicago, where a Stewart-Warner Corp. factory stands like a dinosaur on the brink of extinction in the midst of a decrepit industrial area on the city's North Side. The plant will be closed in less than two years, and the 1,200 blue-collar jobs it provided a year ago gone, when the company completes moving its instrument gauges manufacturing division to Mexico.

Citing labor costs, the company announced the phase-out plan for the plant Nov. 3 and soon began laying off employees. Although the manufacturer and an employees' union are attempting to negotiate a severance package, the union filed suit Dec. 5 in federal court in Chicago, seeking 60 days' wages and benefits for some 600 employees already laid-off. *Local 1154 of the United Worker Association-United Electrical, Radio & Machine Workers of America* v. *Stewart-Warner Corp.*, 89 C 8983.

Experts agree that it will take some years to develop enough case law before the full impact of the act on labor-management affairs can be measured.

According to Ronald Green, head of the labor department at New York's Epstein Becker & Green P.C., one reason there has been no flood of litigation is because practitioners have learned during the first year that sound drafting of purchase agreements, coordinated with placement services and revised severance plans can help avoid suits against employers.

"It does seem as if the initial shock of the statute led to a basic level of education [among employers] that has made the risk much more manageable," says Mr. Green, who is defending employers in three WARN cases, but refuses to identify them.

A spokesman for the National Association of Manufacturers, which lobbied heavily against WARN, agrees the law apparently is

less burdensome than many companies had anticipated.

"If it is affecting [employers], they seem to be able to live with it," says Randolph Hale, the association's vice president and manager of industrial relations.

Organized labor and attorneys for non-union workers also express overall satisfaction with the law. But some plaintiffs' attorneys add that WARN lacks some of the enforcement teeth they had hoped it would have. (Others say that the statute has little applicability to large unionized employers, noting, for example that auto industry collective bargaining agreements commonly include provisions for up to six months' notice in advance of plant shutdowns or layoffs.)

"I think that having enacted the WARN Act is a definite plus for workers in America in terms of a plant closing, but it's more of a band-aid on a massive wound that is hurting the country," says Neil G. Burke, business manager of the United Workers Association Local 1154, which represents employees of the Stewart-Warner plant.

(Stewart-Warner officials referred questions to their attorney, Wade Mallard, name partner in Atlanta's Clark, Paul, Hoover & Mallard, who declined to comment on the WARN litigation except to say the company is preparing an answer.)

LAW'S PROVISIONS

WARN's key provisions are triggered when an employer with 100 or more employees fails to give 60 days advance warning before effecting a "plant closing" or "mass layoff" that results in an "employment loss." Under WARN, a plant closing occurs when 50 or more full-time employees at a single site or unit within that site lose their jobs during any 30-day period because of a permanent closing or temporary shutdown exceeding six months. A plant closing also occurs when such employees experience more than a 50 percent reduction in the hours of work during each month of any six-month period.

The same 60 days' notice must be given by covered employers who order a mass layoff creating an "employment loss" during any 30-day period for either 500 or more full-time employees or 50 workers who constitute at least one-third of the full-time labor force at a facility or unit. Under some circumstances, the 60-days' notice requirement also is triggered when a series of employment losses adds up to the requisite levels in a 90-day period.

The law requires employers to give written notice of such actions to employees or their representatives, state economic development officials, and the chief elected local government official. There are two major exceptions that allow the notification period to be shortened—"faltering business" and "unforeseen circumstances"—in addition to a number of other exemptions.

Failure to give adequate notice leaves employers liable for up to 60 days' pay and benefits for each affected employee and, in some situations (none of which has arisen so far), a $500 fine for each day that notice should have been given up to $30,000. The act allows fines to be imposed only in cases brought by local governments against an employer who fails to give adequate notice.

An important feature of the law is that the Department of Labor has no enforcement power, even though last May it issued six pages of non-binding regulations and more than 20 pages of comments interpreting the act. After two years, the government comptroller general is required to submit a report to Congress analyzing the effect of the law on employers, employees and the economy. Meanwhile, courts continue to shape and define the law as the ultimate arbiter of the statute's often confusing and ambiguous language.

FIRST CASES

Although few cases have been filed, lawyers who handle WARN matters on both sides agree that one conclusion that can be drawn is that the law's scope is not restricted to the industrial heartland, but applies to a much wider range of employment situations, such as brokerage firms, casinos and even law firms. (NLJ, 1-9-89.) Even though the first decisions stem from such unusual employment settings, the courts have addressed some issues—including the effective date of the statute, punitive damages, who is responsible for complying with the notice requirements, and class certification—that likely will apply in other WARN cases.

The first class action certification in a WARN case was granted Dec. 4, 1989 to at least 127 employees who were laid off with little or no notice beginning March 10, 1989, from L.F. Rothschild & Co. Inc., a New York investment banking, arbitrage and brokerage firm.

"The WARN Act seems particularly amenable to class litigation," wrote U.S. District Judge Pierre N. Leval of New York in his ruling, which the plaintiffs' lead counsel, Jeffrey G. Smith, of New York's Wolf Haldenstein Adler Freeman & Herz, hailed as paving the way for future class actions in similar cases. Requests for class certification are pending in at least four WARN cases in federal courts in Louisiana, Minnesota, New Jersey and North Carolina.

Although pleased at the class aspect of Judge Leval's ruling, plantiffs' attorneys in this case and others lamented the judge's rejection of a claim that the affected employees are entitled to punitive damages. *Finnan v. L.F. Rothschild & Co. Inc.*, 89 Civ. 2718.

"It isn't a bad blow to this case not to have punitive damages because here we have a number of high-paid employees and the potential damages are already high, but it is a serious blow to self-enforcement of the act if an employer acts in bad faith," Mr. Smith says.

In moving to dismiss the suit, Rothschild had argued that its layoff of employees in the mortgage-backed, fixed-income securities and high-yield securities departments did not invoke WARN's notice requirements because fewer than 60 days had transpired since the effective date of the act. Judge Leval rejected that argument as "specious," adding that the dismissal motion raised a "question of first and perhaps also last impression."

The case also provides a test of the "faltering business" exception, which permits managers to delay giving notice when they "reasonably and in good faith" believe that doing so timely would preclude them from obtaining capital or business that would avert an employment loss. Rothschild told its employees that it could not give them 60 days' notice because it was seeking capital that would have been unavailable if timely notice had been given. The plaintiffs counter that the exception does not apply because the financing was being sought from Rothschild's parent, Franklin Savings Association of Ottawa, Kan, and other affiliated companies.

WIDE APPLICATIONS

The only other judicial interpretation of WARN also may have wide application as far as determining who is responsible for following the notification procedures.

In two related cases involving the former Atlantis Casino Hotel in Atlantic City, N.J., Senior U.S. District Judge Mitchell H. Cohen of Camden ruled in November that the hotel's owners remained the employer for purposes of complying with WARN, even though the New Jersey Casino Control Commission had appointed a conservator to oversee the financially plagued operation. *Finkler v. Elsinore Shore Associates*, 89-2330, (D.N.J.), and *Hotel Employees Restaurant Employees International Union Local 54 v. Elsinore Shore Associates*, 89-2143, (D.N.J.)

In this case, as in several others, alleged WARN violations have spawned two separate suits—one filed by a union on behalf of its affected members, and the other brought as a class action by non-union employees.

The state commission first denied Atlantis' casino license renewal because of its poor financial condition and negotiations to sell the facility to New York developer Donald J. Trump. (The hotel now is the Trump Regency.) The commission later appointed a conservator pending completion of the sale. Last May it ordered all gaming operations to cease within a week, which resulted in the rapid layoff of hundreds of employees.

The *Finkler* case, filed as a class action by 27 non-union employees, was filed four days after the onset of the layoff. The hotel defendants argued that their WARN complaint was premature because six months had not yet elapsed. But Judge Cohen disagreed, ruling that because the owners had no intention of resuming business and rehiring the affected workers, the employees "reasonably expected" the layoff to last more than six months and did not have to wait until then to file suit.

A CATCH-22?

Several management lawyers say that the most difficult applications of WARN arise in the context of selling a business. Under the statute, the seller of all or part of a business meeting the law's threshold must provide notice of any plant closing or mass layoff through the effective date of the sale. After the closing date, the duty to provide notice shifts to the buyer. These attorneys say that many deals happen too quickly to allow 60 days' notice when it applies.

"A sophisticated buyer wants the seller to terminate employees on the closing date, and then rehire those it wants to keep," says Edward B. Miller, partner and senior labor counsel at Chicago's Pope Ballard Shepard & Fowle Ltd., and a former chairman of the National Labor Relations Board. "It is difficult to work out compliance under those circumstances," he adds.

Another problem with the statute, some experts say, is a Catch-22 in the fines provision because few municipalities want to sue employers at the same time that they might be offering incentives to retain jobs in their communities.

For example, the city of Fresno, Calif., considered filing a WARN action on behalf of some 270 employees who were laid off without notice from a turkey-processing plant in September, says Harvey Wallace, city attorney. Although the city believes it had authority to bring the action, the City Council voted against filing the suit. The city's interest was not to obtain fines, but to garner back pay and benefits for the workers, Mr. Wallace says.

"It does put municipalities between a rock and a hard place," he adds.

COMPLIANCE NOT DIFFICULT

Despite some puzzling features of the act which must be hammered out by the courts, most employers are "finding compliance is turning out to be less burdensome than they thought," says Prof. Neil N. Bernstein of the Washington University School of Law, and a labor arbitrator. And even though many employers fear their work force will depart soon after receiving notice of layoff or termination, says Professor Bernstein, "by and large, most people [employers] are being cautious to make sure they don't violate the act."

In fact, in some cases there is overcompliance, according to Daniel V. Yager, and associate at Washington, D.C.'s McGuiness & Williams, which is counsel to the Labor Policy Association, a management group. He says his firm is advising its clients to give 60 days' notice whenever possible.

"We may tell them they don't need to give notice, but will only know for sure if they are sued, and lose," says Mr. Yager, a former minority staff attorney for the House Education and Labor Committee. In many cases, he adds, the cost of defending a WARN suit probably would be greater than the amount of back pay and benefits owed under the statute.

"I think litigation is not so much impeded, but minimized by the remedy available to parties," Mr. Yager says.

Statistics compiled by the California Employment Development Department, the state agency designated to receive WARN notices from employers, confirms Mr. Yager's observation of overcompliance. Through Sept. 30, 1989, the agency estimates that some 16 percent of the notices it had received pursuant to WARN were not required under the law. The department reports that it had received 346 WARN notices of plant closings or layoff affecting more than 31,500 workers between Oct. 28, 1988, and Dec. 31, 1989.

Ironically, management, which had lobbled strongly against passage of the law, seems in most cases to have accepted the responsibility WARN imposes. And labor, which had pushed for the law's enactment, seems to feel it got less than it had hoped for.

Although it is still to early to fully evaluate WARN's impact and uncertainties remain that will be answered only after further litigation, the statute appears to work effectively in many situations without exposing employers to huge judgments, says David Cathcart, a partner in Los Angeles' Gibson, Dunn & Crutcher who represents employers. "It's not necessary to impose large liability and tort remedies to make a statute effective," he says.

But several attorneys representing affected workers harbor doubts about the law's overall effectiveness because, they argue, the incentives for abiding by WARN are not strong enough. Yet, even they concede that having some law is better than having none at all.

"Damages are limited to what the employer would have to pay if he abided by the statute. It allows them to wait and see what happens—without Labor Department involvement—whether there will be private action," says Mr. Smith, Plaintiffs' counsel in *Rothschild.*

Herbert V. Adams III, a sole practioner in Chicago who represents the union workers at Stewart-Warner, agrees that the law is beneficial in giving employees notice in advance of a shutdown. "Without it, the company would not have said anything and just gone and closed the door and left for Mexico as a fait accompli," he says.

"It may be more cost-effective [for employers] to pay wages and benefits than legal fees," he adds, "but I've never seen companies act too rationally on matters like this."

[From the National Law Journal, Jan. 22, 1990]

(By Randall Samborn)

RESULT: A HANDFUL OF CASES

Lawyers for labor and management and their clients are closely watching developments in lawsuits pending under the year-old Worker Adjustment and Retraining Notification Act of 1988. The following is a partial list of pending cases compiled by The National Law Journal. (Details of the first four appear in the accompanying story.)

Local 1154 of the United Workers Association-United Electrical, Radio & Machine Workers of America v. *Stewart-Warner Corp* 89 C 8983 (N.D. Ill. filed Dec. 5, 1989).

Finnan v. *L.F. Rothschild & Co., Inc.,* 89 Civ. 2718, (S.D.N.Y. filed April 21, 1989).

Finkler v. *Elsinore Shore Associates,* 89 2330, (D.N.J. filed May 26, 1989), and *Hotel Employees Restaurant Employees International Union Local 54 v. Elsinore Shore Associates,* 89-2143, (D.N.J. filed May 18, 1989).

Holcomb v. *Pilot Freight Carriers Inc.,* C-89-227-WS, (M.D.N.C. filed March 31, 1989), and *Kinton v. Pilot Freight Carriers Inc.,* C-89-390-WS, (M.D.N.C. filed June 5, 1989). Two related suits—one brought by a union and the other filed as a class action on behalf of non-union employees—covering more than 2,000 workers who lost their jobs after Pilot Freight Carriers was sold in December 1988. Both cases are stayed during the course of liquidation proceedings filed in June against Pilot Freight in Bankruptcy Court.

Solberg v. *Inline Corp.,* 4-89 Civ. 650, (D. Minn. filed July 28, 1989). A hearing is scheduled for Feb. 12 on defendants' motion to dismiss on grounds that affected workers were part-time employees and on plantiff's motion for class certification. More than 200 former workers for the packaging company claim they were hired as full-time employees and laid off without sufficient notice.

Carpenters District Council of New Orleans & Vicinity v. *Dillard Department Stores Inc.,* 89-3680, (E.D. La. filed Aug. 17, 1989), and *Plescia v. Dillard Department Stores Inc.,* 89-3751, (E.D. La. filed Aug. 23, 1989.) Also two related suits—one with a union plaintiff and the other a class action on behalf of more than 500 non-union employees. A class certification hearing is scheduled for Jan. 24. The plaintiffs' claims are against both Dillard and the former D.H. Holmes Co. Ltd., a regional department store chain that was bought by Dillard last May.

Jones v. *Kayser-Roth Hosiery Inc.,* 3-89-545 (E.D. Tenn. filed July 28, 1989). A class action covering some 900 non-union employees who allegedly suffered an "employment loss" without adequate notice during the phase-out of a hosiery plant. This case is expected to test the statutory defense of "unforeseen circumstances."

[From the Youngstown (OH) Vindicator, Jan. 26, 1990]

BOSSES COOPERATING WITH ADVANCE NOTICE

(By Don Shilling)

SALEM.—A state official said he is surprised how well employers have accepted a 1989 federal law that requires advance notice for some plant closings and layoffs.

Nearly half of the companies who have given advance notice of job losses have not been required to do so by the law, said Michael Hock, director of the state Rapid Response Unit.

The unit, which is a branch of the Ohio Bureau of Employment Services, was set up to administer the Workers Adjustment and Retraining Act, which Congress passed in February 1989.

Hock told about 30 people at a meeting Thursday of the Columbiana County Job Service Employer Committee that he had expected more resistance to the law. His unit began operating last July.

He gave the following reasons why it appears the law has been accepted:

Of the 124 notifications received, 57 have not been required. Notices have been made for as few as nine laid-off workers, when notice is required for no less than 50.

About 20 percent of the notifications have come with more than the 60 days required.

The response unit has heard no complaints from employers about the law.

No company has refused help from the unit even though the law requires only notification.

No violators of the law have been found, even though penalties are not that tough. A company in violation of not giving 60 days' notice can avoid a fine by paying the workers their daily rate, plus benefits, for the part of the 60 days they were not notified.

There have been no incidents of worker sabotage, as some had feared would happen with advance notice.

Hock said his five-person unit has focused on helping workers find other jobs because notification usually comes too late to come up with solutions that will save a firm.

The unit has had no success yet as saving companies from going under, he said. But negotiations for employee buyouts are ongoing at three companies who are on the brink of shutting down, he said.

The unit also will initiate action without being asked by those involved, he said. The unit's help was accepted by the Quaker Oat plant in Marion after the unit read in a newspaper that some workers might lose their jobs.

The company is working with the unit even though a potential mass layoff or closing is more than 60 days away, he said.

In most cases, the unit's work is limited to helping workers prepare for another job, he said. Workers are informed about Ohio Bureau of Employment Services (OBES) programs, such as retraining through the Job Training Partnership Act, he said.

The unit coordinates workshops, where workers are helped in preparing resumes and tips on finding a job, he said. Support groups can be established, and mock interviews can be held and videotaped, he said.

Information is provided about what jobs are available in the area, he said.

Hock said the law says the unit should make a visit to a plant within 48 hours after notification is received. A meeting is then set up with the employer, employees, OBES officials and community officials to talk about what the workers need, he said.

EXTENSION OF MORNING BUSINESS

Mr. KOHL. Mr. President, I ask unanimous consent that morning business be extended until 12 noon under the same conditions as previously ordered.

The PRESIDING OFFICER (Mr. DECONCINI). Without objection, it is so ordered.

The Senator from Wisconsin is recognized.

Mr. KOHL. I thank the Chair.

(The remarks of Mr. KOHL pertaining to the introduction of S. 2050 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. KOHL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ESCALATING OFFENSIVE IN ANGOLA

Mr. SYMMS. Mr. President, I am concerned about the press reports both this morning and yesteray morning regarding UNITA President Jonas Savimbi. As has been reported in the media, our good friend—the distinguished Presiding Officer also considers Dr. Savimbi a good friend—is the bastion of freedom, the example of a true Western democrat in the continent of Africa, with a remarkable record success in achieving freedom for parts of Angola against insurmountable odds. Yet now, the aid to UNITA has slackened some from the West. Unfortunately, westerners normally think that when the battle is over they can stop the fighting. However, the Communists are usually very patient and they think time is on their side and continue the aid.

Mr. President, Dr. Savimbi was forced to cancel his trip to Portugal. News indicates that the cancellation was because of the escalating offense against UNITA. The offensive was described by President Savimbi in the Washington Post as "the biggest air offense ever mounted in Angola's 16-year war." He also said that there has never been anything like this.

The article states the Angolan Government forces began an intensive bombing campaign Monday, launching several raids near the UNITA-held town of Maving's with 14 Soviet-built Mig-23's and other warplanes. It adds that the Government forces are using fragmentation bombs to attack the surrounding area where 11,000 UNITA civilians live. These fragmentation bombs are cluster bombs, as they are often called, which can raise havoc on civilian population. There is very little protection for people. It is a warm climate. The housing is very rudimentary, very basic. It is devastating to schools and to population centers.

The MPLA is deliberating targeting the schools and hospitals in UNITA civilian territory, hoping to panic the civilian population and demoralize UNITA supporters.

Mr. President, I have known President Savimbi since 1984—even before that, but I had the opportunity to meet him in Jamba in 1984 as the first Member of Congress to visit there. He is a very straightforward speaker. He told me then, when I asked him what those of us who wanted to help people who love liberty, could do, he told me to go back to the Congress and repeal the pro-Marxist Clark amendment; that he was not impugning the motives of Senators and Congressmen who had supported it, but he said it had turned out that it had had a very clear implication to help the Marxists in Angola and was detrimental to the forces of freedom in Angola.

The Senate wisely voted for my amendments, and later the House did, and I have appreciated the help in that effort of the distinguished Presiding Officer.

We felt we had made headway. We had made headway. I think we did the right thing. I think the Senate did the right thing, the House did the right thing, and it looked like we were making headway.

But in his own words today, he says UNITA's situation is seriously deteriorating in the face of Soviet escalation in Angola. It is interesting that all we hear about is glasnost, perestroika, and how we are now going to have Big Macs in Moscow.

I am delighted they are there, because I believe McDonald's will do more for capitalism and freedom in the Soviet Union than maybe any other diplomatic effort we could make because, one, they are going to show people how to run a fast-food business; two, they will teach people how to work, which is badly needed in the Communist bloc countries; three, they give people the opportunity to see there is a better life outside the Iron Curtain.

All of those things are good and positive. I welcome them. But while that is going on, we should not lose sight of the fact there is another face to the Soviet Union, and that face is there are still some people in the Soviet Union who are expanding their long-term goals since 1925, and that is to try to get across the central part of the African continent so they can have the treasure house of minerals in their warehouse in case of a confrontation with the West.

In his own words, Dr. Savimbi is saying UNITA's situation is deteriorating. I think the Senate needs to know why.

The President has promised UNITA they would be provided with "appropriate and effective" assistance, but it is clear that the deterioration of the situation points to a complete inadequacy with regards to our support.

I urge the President, and Members of the Senate and others to address this issue personally and immediately.

As long as the Soviets are directing the slaughter of innocent Angolan citizens, the United States should ask itself whether Mr. Gorbachev is really the true reformer he is portrayed to be. Do the Soviet weapons get shipped to the MPLA purely because of the bureaucratic inertia in the Soviet Union?

Are we supposed to believe that Mr. Gorbachev's low-level bureaucrats are deciding to transport Mig-29's to Cuba and SU-25's to Communist Angola?

Mr. President, I do not think we can be that foolish as to believe that somehow Mr. Gorbachev—Time magazine, incidentally, chose him as "Man of the Decade"—is not an accomplice of these shipments of weapons to the Third World. In such a highly centralized system of government, Mr. Gorbachev assuredly is aware of his foreign policies. While talking peace, he is pursuing the military extermination of UNITA.

While President Savimbi has been trying to revive the peace process, the MPLA has once again shown its true colors and is trying to annihilate its political opposition.

Mr. President, Mr. Savimbi is a man of peace. He sought to salvage the 1975 peace accords. He is now seeking to salvage the promises of the June meeting in Zaire with MPLA President Dos Santos, when Dos Santos promised national reconciliation talks and a cease-fire.

And Savimbi is pushing to fulfill his side of that pledge. But the pledge at Zaire proved to be just another broken promise by a regime in Angola which is backed by the Soviets that has never sought peace or reconciliation. They have only sought annihilation of those who disagree with their one-party rule of that country.

Several months ago, UNITA offered through Zairean President Mobutu, a cease-fire proposal to the MPLA. The proposal was flatly rejected. The MPLA Central Committee on January 22 of this year, reaffirmed the party's role as vanguard of the working people and endorsed continued one-party rule. Clearly, the message of Eastern Europe has not sunk in with the dictatorship in Angola. The MPLA dictator is presenting himself in the same light as the once leader of Romania, Ceausescu.

The State Department in January, issued a statement which acknowledged the role of 100 Soviet advisers in

the combat operations against UNITA's heartland. That statement was, to put it mildly, deficient. What is needed from the State Department is a strong, immediate and public criticism of the MPLA's aggression and a demand to the MPLA to accept the cease-fire bid and UNITA's call for direct talks.

Mr. President, it disappoints me, while so many good things are happening and so many things that our leadership and the administration are pushing to do that I approve of, that somehow some of these things they seem to be so passive on are in the face of an active disinformation campaign against UNITA.

In what appears to be abject complacency on the part of the State Department, the MPLA plans to host another summit with a handful of radical African nations who earlier called for President Savimbi's exile and political absorbtion of UNITA into MPLA forces. These countries have traditionally been hostile to UNITA and to the United States, yet the MPLA depicts them as representative of African opinion on the Angolan conflict.

The State Department must develop a program to recapture the negotiation initiative from this MPLA-orchestrated arrangement.

We must have our administration and our State Department officials get aggressive and informative to the press, the public, and to the world about this outrage that is taking place in Angola.

State Department officials have been quoted in the past as saying that it is not up to the United States to proscribe solutions for the Angolans. This is not what UNITA wants either. UNITA wants the United States to forcefully defend democratic institutions and to restate United States objectives for free elections in Angola.

While the State Department advocated free, internationally supervised elections in Namibia, they have oddly avoided endorsing elections in Angola. UNITA does not want the United States Government to write its constitution, but it does want us to endorse self-determination in Angola. I remind my colleagues that UNITA is the only political party in that country which supports free elections.

It is the only party in Angola that supports free elections.

Mr. President, I believe the United States must not shirk its responsibility. We must play a role in encouraging other friendly African nations to become involved in a peace process as a counter to the proposals of MPLA radical coalition.

Finally, the Angolan carnage in which the Soviets are participating must be raised during Secretary Baker's meeting with Soviet Foreign Minister Shevardnadze. The Soviet conduct in the Third World is a vital indicator of Soviet long-term intentions toward the United States. I think we have found out in the past 8 years that when we stand firm when the Soviets—prod with the bayonet, if they hit steel, they back up. If they hit softness, they push forward.

Nothing has really changed on the part of some of the hardliners, of the old Stalinists in the Soviet Union. But unless we stand firm, the Soviets are going to feel free to act with impunity in the Third World to the detriment of U.S. national security interests. While we are diverted watching what is happening in Eastern Europe and other places where there is so much excitement for the world, so much excitement and hope for mankind, for freedom, rights in Africa, they are pushing forward with their program.

So I fervently hope that President Bush will direct his personal attention to this urgent crisis in Angola. I have raised this matter with members of the Bush administration, and I urge my colleagues to do likewise. UNITA depends upon us in this critical time.

If we in the Senate, and we in the United States fail to fulfill our longstanding commitment to UNITA, Africa, and its people will pay a very, very heavy price. The Soviets have never inflicted anything upon Africa except misery, poverty, bloodshed, and death upon their African client states.

The United States cannot condone in Africa the government-imposed misery the East Europeans are trying to discard, we simply cannot accept that, Mr. President. It is unacceptable to those of us who believe in human rights. If we do accept it, then we are shirking our responsibilities.

The best course for us to take would be to decide that we should be on the side of freedom. I urge my colleagues to get briefings of what is happening. The reports are that the Soviet-inspired, and possibly led, troops, aircraft, armored columns are raising havoc near Jamba as we speak. The choice is very simple. It is a realization which will be our challenge. We must stand up for freedom in Africa at this time. I yield the floor.

If there is no other Senator seeking recognition, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SHELBY). Without objection, it is so ordered.

EXTENSION OF MORNING BUSINESS

Mr. DECONCINI. Mr. President, I ask unanimous consent that morning business be extended for 5 minutes.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

THE CONFLICT IN ANGOLA

Mr. DECONCINI. Mr. President, I want to focus the attention of the Senate today on a grave series of events occurring in Angola. A bloody and senseless struggle is being carried out, largely outside the view of television cameras or the press.

The Senator from Idaho [Mr. SYMMS] was just speaking on Angola and the conflict there between the MPLA and the UNITA forces. I urge the Senator to talk to the administration, as I recently have done. I think he will be satisfied that our resolve as a nation in support of Jonas Savimbi and the UNITA forces and the democratic process is certainly represented, and I say to those of us who have such a longstanding interest, as the Senator from Idaho does, that our resolve and our support continue.

I think what the Senator said this morning about the particular situation going on there is very important. Indeed, Mr. Dos Santos and the MPLA have launched what I believe may be a desperate effort to bring disruption and damage and death to the civilian population in an effort to demonstrate that they can commit a military effort when they are confronted with the peace process which they apparently feel is not going the way they want it to go.

That really is what is happening in Angola. There had been a cease-fire. There had been a tentative agreement to commence negotiations on power sharing. There had been an understanding that Jonas Savimbi himself would be willing to extract himself during this negotiation process, if necessary, understanding that he would have the right, as anyone should have, to ultimately participate in a true reconciliation and elections on a national level.

So I think we had the basis of a cease-fire and the basis of a reconciliation, nationally, in Angola before the MPLA decided they just did not like the way things were going, so they were going to once again, start a military action. I think that is deplorable, and I think it certainly bodes very poorly for the good intentions of UNITA in trying to reach a settlement there.

Secretary Cohen, our Assistant Secretary for African Affairs, has worked tirelessly, and I am satisfied, at least at this moment, that the U.S. resolve is still there and that we are prepared

to continue whatever assistance we have committed to see that the UNITA forces are not damaged or repelled by the MPLA.

In one sense, it is perhaps understandable that so little attention is being paid to what may become a large scale slaughter. We have all been caught up in the rush of recent world events. The people of Eastern Europe have toppled tyrant after tyrant. A cowardly dictator has been ousted from Panama. Yes, I believe we should celebrate the victories of democracy in recent months. But we must remember how sharply this contrasts with the 16 years of devastating civil war in Angola.

The promises of peace last summer have been replaced by a new MPLA military offensive in southern Angola. As noted by our State Department, the MPLA regime has committed armored vehicles, tanks, and several thousand troops in this attempt to impose a military solution on the Angolan opposition. These mechanized divisions are being supported by Soviet technicians and advisors.

The destruction caused by this offensive is being augmented by renewal of the air war against UNITA positions close to the UNITA-controlled town of Mavinga. Reports indicate that squadrons of modern MiG aircraft, flying at great heights to avoid UNITA missile fire, are carrying out indiscriminate bombing runs against guerrilla positions. These same reports claim that the large scale bombing include the use of fragmentation, or cluster-type, weapons. Unfortunately, it is the civilians living in the area who are suffering the most from this indiscriminate bombing.

An ominous recent accompaniment to the MPLA offensive was a statement last week by the Cuban Foreign Ministry that Cuba is suspending the withdrawal of its troops from Angola in response to the loss of four Cuban soldiers in an area outside the current fighting. If this is a signal that Cuba intends to break its commitments under the Tripartite accords, the implications for peace in the entire southern African region are troubling indeed. The Government of South Africa, which has been satisfied by the Cuban withdrawals to date, has expressed to our Government its great concern over the Cuban announcement and its possible impact on the Namibian independence process.

Perhaps the greatest tragedy of this latest MPLA offensive—an offensive that has left hundreds dead or wounded—is that it is pointless and unnecessary. Pointless, because it is clear that the war can only be ended by negotiation. MPLA hopes for a military solution are illusory. And supporters of the MPLA must ensure that this message is understood in Luanda. Unnecessary, because a ceasefire is the best alternative available.

Last fall, the African mediator of the Angolan peace process, President Mobutu of Zaire, made a second attempt to end the fighting. His proposal took into account the flaws of the original ceasefire, which rapidly evaporated because of a lack of agreement on methods to verify and enforce an end to the fighting. The United States endorsed this proposal and UNITA accepted it. Instead, the MPLA launched a massive military offensive.

Under these circumstances, it is a sad commentary that the world has remained so silent. The administration's condemnation of this outrage has been surprisingly mild, particularly when it had twice attempted to get the Angolan regime to agree to a ceasefire. Assistant Secretary of State for African Affairs Cohen has just returned from Luanda in an unsuccessful attempt to put an end to the killing. Those that argue that the MPLA is serious about peace and national reconcilliation have received a definitive answer. The MPLA remains committed to the military option.

It is alarming that one of the diplomatic triumphs of the past decade is now being threatened just as it begins to bear fruit. The Constitution of newly independent Namibia is one of the more democratic and liberal in the world. It ensures a multiparty parliament, protects basic human rights, and provides free elections. If the new government lives up to its early promises, we can expect stability and prosperity in this newest of nations.

New winds are stirring in other parts of the southern Africa subcontinent. Botswana, once one of the worlds poorest nations, is prospering under a democratic government and sound economic management. Mozambique is beginning to recover from earlier disastrous socialist policies and has improved its relations with the West. Even in South Africa, there are glimmers of hope that the white minority regime may be willing to talk about fulfilling the long suppressed aspirations of the blank majority. We will all watch closely President de Klerk's words and actions as the South African Parliament opens.

We hope that the blessings that are promised for Namibia, will prove an example to its neighbors both North and South. But in Angola, the conflict which has torn the country apart and caused so much suffering must first be ended. The steps necessary to do this are clear:

The administration, and for that matter the Congress, must clearly state that peace is the only viable solution to the Angolan civil war. We must issue an immediate call for the MPLA to stop its current offensive;

We must call on the Soviet Union to extend glasnost to Angola and to end its participation in the fighting and its shipment of arms to the MPLA;

Finally, the administration must make clear that it intends to maintain its support for UNITA until the MPLA agrees to a ceasefire, takes the steps necessary to begin talks on national reconciliation, and proceeds toward free elections.

It is for this reason that I will be submitting a resolution later today denouncing the military offensive in Angola and urging an immediate ceasefire.

MARTIN JOHNSON RETIRES AFTER 55 YEARS OF DEVOTED SERVICE TO THE SOCIAL SECURITY ADMINISTRATION

Mr. HEFLIN. Mr. President, this Nation retains its greatness through the efforts of men and women who are willing to devote their lives to serving others. One such person is Mr. Martin Johnson who recently retired as a district manager for the Social Security Administration in the Mobile, AL area. His 55 years of dedicated service to the Social Security Administration and the people of this country should serve as a shining example to us all.

Martin Johnson began his illustrious career with a short stint at the United States Steel Corp. before beginning his long tenure with Social Security in 1936. He served for 12 years with the old Social Security Board before becoming the longest serving district manager in the agency's history. On December 29, 1989, Mr. Johnson stepped down as the manager of the Mobile District Office after 43 years.

The Mobile community has benefited from Martin's involvement in numerous areas. He has played active roles in any civic groups and is recognized as a pillar of the community. Perhaps the greatest recognition of his involvement came when Martin was selected as the "Mobilian of the Year" in 1954. In addition to his extensive activities with the Mobile Area Chamber of Commerce, Martin has served many other charities and organizations.

Five years ago, I did a tribute to Martin Johnson after 50 years of faithful service to the Social Security. Little could I imagine that he would still be serving the needs of the Mobile area at the end of 1989. His talents have long been recognized by leaders such as President Eisenhower and Queen Elizabeth. Mobile is indeed fortunate that he plans to continue his civic activities. It is seldom that a man of Martin's caliber and drive spend their entire life serving others.

Mr. President, I congratulate Martin Johnson on his retirement and look forward to his continued success in any future endeavors. I ask unanimous consent that an article from the

Mobile Press Record describing his accomplishments be reprinted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JOHNSON GETS NEW ROLE IN SOCIAL SECURITY PROGRAM

(By Ron Colquitt)

After 55 years of handing out Social Security checks, Martin I. Johnson will soon be getting them.

Dec. 29, Johnson will retire as the Social Security Administration's southwest Alabama district manager. He began working for the federal government in January 1935.

Johnson has received many promotions and awards over the years, but he is most proud of being named Mobilian of the Year for 1951, an honor bestowed him for his civic work, particularly playing Santa Claus during six Christmases.

He said he has served as manager in one location longer than any other manager in social security history.

According to Johnson, he stayed with the SSA for 55 years because he enjoys the work. "I particularly like helping people and meeting people because I meet with every level of society."

The SSA was formed in 1937, Johnson said. There have been many changes in the SSA over the years, he said, but the biggest change was in 1940 when people began receiving monthly checks.

"Prior to 1940, when you became 65, you received a little lump sum of 3½ percent of the total earnings that you paid taxes on, and then you were wiped out," said Johnson. "We started the monthly benefits for retirement in 1940 and also paying death benefits to widows and children.

"Since then we have had the disability benefits and medicare and the extension of coverage. First it was only wage and salary earners in commerce and industry. That was about 26 million people. Now it is about 110 million people because it has expanded to self employed, farm labor, professional people and domestic service."

Today, 39 million people are getting SSA payments each month, he said. There are concerns the SSA will one day go broke, and payments will not be available to retirees. Johnson said people should not worry because the SSA has plenty of reserves.

"They never mention any figures, they just say it's going broke," said Johnson. "It just so happens that last year, for example, they took in $292 billion and paid out $247 billion. There is over $100 billion in reserves right now in treasury bonds, and it is expected to double within the next 12 months."

Over the years, Johnson has earned numerous awards from the city of Mobile and the Catholic Church.

He said he is most proud of being named Mobilian of the year and being named Knight Commander of the Order of St. Gregory the Great, Knight Commander of the Order of the Holy Sepulcher of Jerusalem and Knight of Malta.

The knighting ceremony was held at St. Patrick's Cathedral in New York City, in 1939. "You had to be nominated by the bishop of the diocese," Johnson said. "You have to have a complete resume of what you have done, what your outstanding achievements have been. That goes to Rome (Italy), and a committee there sends it to the pope. If he approves, he sends . . . a document naming you a knight commander."

Johnson said he was also proud of the citation he received from President Dwight D. Eisenhower. The citation was for promoting U.S. Savings Bonds in the Mobile area. Vice President Richard M. Nixon presented the citation to Johnson.

He said of Nixon, "I was certainly impressed with the man. . . . Any question you asked of him, he had the answer right then."

Johnson is married to the former Doris Lassetter and they have four children. His hobbies include reading, working in the yard and being involved in civic organizations.

He is still active in Friends of the Museum of Mobile, the Mobile Area Chamber of Commerce, the Mardi Gras Special Events Committee and the Catholic Maritime Club.

After retiring, Johnson will just take it easy and do nothing for the first three weeks, he said.

According to Johnson, after his three-week break, he plans to get busy with Mardi Gras activities.

Asked if he was ever going to play Santa again, Johnson, who didn't want to reveal his age, said no. "I'm too old for that job now," he said with a laugh.

HUFFMAN MIDDLE SCHOOL ANTIDRUG PROGRAM

Mr. HEFLIN. Mr. President, I rise today to pay tribute to the antidrug program at Huffman Middle School in Birmingham, AL. Much of the credit for this program must go to the students, but the school's principal, Albert Morton, also deserves high praise for his leadership.

During the 1987–88 school year the faculty decided to fight the growing drug problem among the 360 sixth- through eighth-graders. During the next fall, Morton began what has become a very successful antidrug program. He named the program after the long-time school mascot, the RAIDers. In this case, RAIDers is an acronym for resist actions involving drugs—even resist smoking.

Morton knew that having both parents and students involved was a key to this program's success. He started an advisory committee of students, parents, and teachers to help implement the program and most of the students signed personal pledges against drugs. In addition the parent-teacher association agreed to help implement the various projects.

During the first year 97 percent of the students signed the pledge against drugs. These students also promise to help keep their friends off drugs. All signs are that the program is working. After numerous drug-related incidents 2 years ago, Huffman had only one drug-related problem last year.

Albert Morton has been the principal for 25 years and was a basketball coach before starting as principal. Morton's initiative and drive have been credited with much of this program's success. He ordered red T-shirts printed with the RAIDers name. He also has paper napkins bearing antidrug messages in the school cafeteria. Cheerleaders lead antidrug use cheers in pep rallys. It is not just a "say no" program, it is an affirmative program.

Although we must fight the drug problem from both the supply side and the demand side, I am convinced that education will become the most important facet of this war on drugs. The RAIDers program represents an innovative approach to the problem and has been recognized as one of this year's State winners of the Alabama Department of Education and U.S. Department of Education's Drug-Free School Program. The RAIDers program is now in the national phase of the competition and it is my hope that this program will also fare well in this phase.

Again, I want to offer my congratulations to the participants in the RAIDers program. Principal Albert Morton, the parents, the faculty, and especially the students deserve our support and praise for their outstanding efforts to win the war on drugs.

TRIBUTE TO DR. THOMAS B. NORTON

Mr. HEFLIN. Mr. President, I rise today to pay tribute to my friend, Dr. Thomas B. Norton who died on January 5, 1990, at the age of 71. As the former mayor of Gulf Shores, AL, Tom Norton left a great imprint on this area of the State.

Before moving to Gulf Shores, Dr. Norton lived in York, AL, where he was a city councilman for 11 years. While in York, he also practiced as a general surgeon and obstetrician as well as serving as the hospital administrator. When he moved to Gulf Shores, Tom gave up his surgery and obstetrics and practiced medicine only part-time. He quickly gained acceptance in the community and was elected to the Gulf Shores City Council in 1972. He was elected for two terms and served until 1980.

In 1980, Dr. Norton was elected to his first term as mayor, serving for 8 years before stepping down in 1988. His tenure as mayor saw tremendous changes for Gulf Shores. He oversaw the incredible growth that Gulf Shores saw during the 1980's. He led the efforts which expanded the city boundaries, the city hall facilities, the sewer system, the public beach facilities, and the school. He oversaw the addition of new police facilities, an additional fire station with more equipment, the Erie H. Meyer Civic Center, and new beach cleaning and street sweeping equipment. In addition, he helped the city develop a comprehensive plan for future growth.

Gulf Shores is fortunate to have had someone with Dr. Norton's experience and abilities to run the city during

these years of growth. The knowledge he gained on the York and Gulf Shores City Councils helped make many of these transitions much easier.

Dr. Norton led a full life and made Gulf Shores a better place in which to live. He will be missed greatly.

HAPPY 77TH BIRTHDAY TO WINSTON BUSH McCALL

Mr. HEFLIN. Mr. President, I rise today to pay tribute to Winston Bush McCall who turned 77 on January 19, 1990. I want to wish him belated "happy birthday" wishes and many happy returns.

Winston Bush McCall, Sr., has long been one of Alabama's most outstanding citizens. Throughout his life he has found success in each of his varied endeavors. Perhaps the most telling aspect of Winston's character is that through all of his activities, he never failed to act with honor. He is a man of his word and a man of convictions.

Winston's intelligence and drive became obvious while at the University of Alabama. As a member of Delta Kappa Epsilon and a Phi Beta Kappa initiate, he went on to win the Ames competition in 1935 at Harvard Law School where he was later awarded a juris doctorate.

For over 50 years, Winston has served as a member of the bar of the Supreme Court of the United States, of New York and of Alabama. This service earned him much deserved recognition from a bar certificate acknowledging his "honorable, devoted and dedicated service to the community, State and Nation."

During World War II, Winston fought for this country in the Army. He was a lieutenant colonel at the end of the war and later retired. His 5 years of Active Duty service during the war earned him much deserved recognition from such diverse people as Lieutenant General Campbell and U.S. Treasury Secretary William E. Simon. Continuing his interest in military matters, Winston served as president of the American Defense Preparedness Association and the governor of the Alabama Society of Colonial Wars.

Perhaps the best description of Winston B. McCall, Sr., was made by Secretary Simon who called him "A southern gentleman and a devoted American." Again, I want to wish Winston a "happy birthday" and an exciting 1990.

TRIBUTE TO D. MITCHELL SELF

Mr. HEFLIN. Mr. President, I rise today to pay tribute to one of my dearest friends, Mitchell Self, who died recently in Colbert County, AL. Mitch was a great man and a great friend.

As a professional, Mitch was one of the best. A successful radio broadcaster, a pioneer in programming concepts that brought him State and national recognition among his peers. He served as president of the Alabama Broadcasters Association, the 1989 Alabama Broadcaster of the Year and as a member of the board of directors of the National Broadcasting Association.

As an enterprising businessman, he was selected to be the chairman of a new and successful bank. As a public spirited man who believed in improving his community, he served in many ways, including more than 20 years as chairman of the utilities board of his city.

As a church man with an unwavering belief in God, he rendered service to his denomination as a deacon.

As a family man, he was devoted to his wife, children, and grandchildren.

Few individuals had the friends that Mitch Self had. In thinking about Mitch, the trait that kept constantly coming back to me time and time again was his loyalty. He was a true friend. As I talked with many of his friends before his funeral, it came through that each of them had a relationship in which loyalty stood out.

Hundreds of friends gathered at the funeral home to pay their respects. I do not think I have seen as long a line of friends at a funeral home. As I stood in the funeral line, my thoughts went back to my friendship with Mitch and what he meant to me. I recalled numerous instances when he had befriended me. He was indeed my friend.

Many have told me about their feelings toward Mitch and his friendship. Let me repeat a few of the things I have heard:

If you needed him, he would be there.

He would stick with you.

If he told you something, you could go to the bank with it.

A younger friend said, "He was like a father figure to me."

These comments came from the heart because they reflect the love his friends had for him and the loyalty he had for his friends.

His devoted wife, Jimmie was ideally suited and matched for Mitch. Her quiet understanding ways helped Mitch in so many ways. She knew the right thing to say and to do at the right time. She knew how to bring the best out of him. I believe that his wonderful trait of loyalty was reinforced because of her loyalty to him. As I was thinking about Mitch and Jimmie's wonderful marriage, the words of Ruth to Naomi in the Old Testament came to mind:

> Entreat me not to leave you or to return from following after thee, for whether thou goest, I will go and where thou lodgest, I will lodge—Thy people shall be my people and thy God, my God.

Mitch was wise in his choice of Jimmie as his wife, and she never let him down. He loved each of his children dearly and was very proud of them. He also loved his grandchildren, and as they grow and learn more about Mitch, they too will be very proud of him.

Another part of Mitch that many people never saw was his love of his farm. He loved to put on his cowboy boots, his jeans, and cowboy hat and wander around in the countryside and on his farm. This provided great enjoyment to him and it brought him closer to things he loved. There seems to be something in the soil that brings out the best within us. While many of us were not raised on a farm, nevertheless, our association with rural life and particularly the soil seems to give us inspiration to acquire certain desirable values. Mitch had these values: hard work, patriotism, religion, and loyalty.

I speak today to celebrate the life of a wonderful friend and a wonderful family man whose values of life have been an inspiration to all who knew him.

We are all better because Mitch Self came our way.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,783d day that Terry Anderson has been held in captivity in Beirut.

EXTENSION OF MORNING BUSINESS

Mr. DECONCINI. Mr. President, I ask unanimous consent that morning business be extended until 12:30 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF MORNING BUSINESS

Mr. LIEBERMAN. Mr. President, I ask unanimous consent morning business be extended until the hour of 1:30 p.m. under the same conditions as previously ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LIEBERMAN. Mr. President, I ask unanimous consent I be allowed to

proceed now under morning business for not more than 15 minutes.

The PRESIDING OFFICER (Mr. WIRTH). The Senator from Connecticut is recognized.

THE COSTS OF CLEAN AIR

Mr. LIEBERMAN. Mr. President, addressing myself to the matter before the Chamber at this time which is Senate bill 1630, the Clean Air Act, in the last several days we have heard a lot of discussion about the costs of S. 1630, with estimates provided by various sources. The most alarming come either from the administration or industry; that is, they are alarming on the price they put on the direct expense of complying with S. 1630.

In my opinion, in at least two substantial respects, those cost estimates are not on target. I believe they are fundamentally flawed. Let me explain why.

It has been cited before but it is important to cite it over and over again. The direct cost estimates that are attached to this bill do not consider the health costs of not passing and complying with this bill. The American Lung Association in a recent report estimated that the health care costs from air pollution are $100 billion a year, which is greater than any of the cost estimates we have had for the direct impact of passage of the bill on the industries or individuals involved.

One study reported by the Lung Association said that the health care costs from mobile source alone, from the automobiles and light trucks we are talking about, costs $93 billion a year.

What are we talking about here? We are talking about the cost of illness. We are talking about the cost of lost wages and time, time lost by employers from their employees being out. And we are talking about the incalculable cost of the death of people who have been affected extremely by dirty air.

The second reason why I think these alarming cost estimates of the direct impact of the bill are flawed is the numbers presented to the Members of Congress are ultimately exaggerated. Today we received further evidence of that exaggeration in a report from our own Congressional Research Service. It reviews the estimates that EPA has put on title III of S. 1630, which is the air toxics provision of this bill.

The air toxics provision is one of the most controversial parts of the bill. I know many of my colleagues are concerned about the impact it will have on businesses and industries that are directly affected. Leaving aside for the moment the direct health consequences of air toxics on people who live in the vicinity of plants that emit these chemicals into the air, we have had plenty of testimony here on the floor about those consequences; which go even to death.

Let me come back to the CRS, Congressional Research Service's analysis which is just out today. Its conclusion is:

> CRS believes that EPA's analysis significantly overstates the costs of the Senate bill in several respects: in particular, the methods used and the conclusions reached with respect to utilities and residual risks (which account for about half the total costs of both bills) are flawed.

So, CRS finds significant overstatement in EPA's estimate of the costs of these sections of this bill.

CRS's discussion of the EPA's analysis of the section of the bill known as the residual risk section is particularly telling. Here again, I know many of my colleagues who have been contacted by businesses who fear they will be affected by the air toxics section of the bill, are most concerned about the residual risk section. What happens after the businesses achieve or attempt to achieve what is possible under the maximum available control technologies? How do we then measure what they should do about the residual risk?

The bill before the Chamber, Senate bill 1630, gives those businesses at least 15 years to deal with that residual risk. But still there is concern about what the cost of that compliance would be.

Let us go back to CRS. CRS notes that about half of the cost difference between the Senate's title III which guarantees that standards would be truly protective of the public health and environment, and the administration's title III which leaves the decision entirely to EPA's discretion, is accounted for by this one provision.

As just one example of EPA's flawed approach in these estimates, the Congressional Research Service notes that EPA estimated that certain costs which would not be incurred under the Senate bill until the year 2005, 15 years from now, are estimated in the costs for the year 2003. That reason alone, according to the CFR analysis, results in an overstatement of the impact of S. 1630 by $6 billion in the year 2003.

I am not a statistician. But when we get into the crevices, the interstices of this piece of legislation, and we try to sort out the varying estimates of its cost, which obviously are important to all of us, including those who strongly support the bill, we have to get into the numbers. To me, what CRS has said today about a $6 billion overstatement in the cost of this section of S. 1630 amounts to a pretty fundamental overstatement that I think goes to the heart of some of the worst fears about the impact of the residual risk section of this bill.

CRS also points out the EPA analysis assumes that plant closure and impacts on employment will result from the Senate bill. But the Congressional Research Service goes on to note EPA's analysis fails to consider that instead of closure of plants, new technology will be placed on these plants, to bring them into compliance with the requirements of S. 1630.

EPA's analysis points out that it is safe to assume that changes in technology will occur during the 15 years that plants have to meet these facilities. That, Mr. President, after all, is our experience here in the Senate, certainly, in regard to laws that force technological improvements in the makeup of automobiles, to make those cars cleaner for our environment.

CRS then says that EPA's analysis then goes on, based on the assumption that the technology will not change and that plant closings will inevitably occur.

That is not just a worst case scenario, it is, based on our experience, based on common sense, based on what I would have to say is an honest and optimistic view of the capacities of American industry, a gross overstatement of the cost.

To CRS, and I believe to anyone who studies this issue, EPA's approach on this critical question of plant closures versus new technology ultimately does not make sense. The history of the Clean Air Act demonstrates that strong and tough standards will result in the development of new technology. I am convinced and confident that American industry will view the requirements of this law as a challenge, not as a stimulus to fold their tents and go off meekly into the sunset; that they will meet this challenge head-on with new technology. The most recent and encouraging example of that is a statement made just 2 nights ago by the chairman of the Du Pont Co. in speaking to a National Wildlife Federation dinner when he said quite clearly that environmentalism is completely compatible with competitiveness. I think we cannot stress that enough. Two of the great challenges that our country faces today is to protect our environment and to protect our economy. There is simply no reason why we cannot have both.

I believe that the EPA cost estimates on the second round of tailpipe standards are equally exaggerated. The evidence before the Environment and Public Works Committee from the California Air Resources Board, which, after all, is the leading expert in this field, a necessity to be experts because of the poor quality of air in some sections of California, established that the cost of the second round of tailpipe standards would be about $130 to $132 per car.

EPA's analysis of $500 per car is based on a fundamentally flawed

theory which is that the catalytic converter will need to be replaced at 50,000 miles. That is a pretty basic assumption. But those who are in the position to know most about the inner workings of our automobiles, and particularly the catalytic converter and emission controls, namely, the people who make these parts, the manfacturers of emission controls and the California Air Board, disagree. They are confident that refinements of current technology and the ingenuity of the auto makers will result in a much cheaper way to comply with the standards, and the history of the last 20 years certainly does support this confidence.

Mr. President, I think all of us understand and, even more perhaps than we understand, the people of this country understand that we cannot continue to go about living the way we are living, doing business the way we have been doing business and still expect our natural environment to remain what we want it to be. We cannot keep doing what we have been doing and expect our children to grow up on a planet that will be healthful and safe for them and their children and the generations to follow.

We know that we have to change our ways. Change is reflexively resistant. It is not our nature. People will naturally go about their business in a way that is more customary to them, that is more convenient to them, that is less expensive to them. But here is where we, acting in this Congress with the power to make law, have to intervene in people's behavior. We have to express their best hopes for themselves.

One of the great roles of the law over all of time, and certainly in this country, has been to express the aspirations that people have for themselves, but in one way or another understand that they will not be able to achieve left to their own instincts. The law comes in and says here is the measurement, here is the standard, here is what we should do. That is what Senate bill 1630 is trying to do. Acknowledging that if we continue to go about our business—acid rain, air toxics, mobile sources—that the air is going to get dirtier and dirtier and our children are going to be sicker and sicker as a result of it.

That change will not come without cost; not just the inconvenience, not just the discomfort of doing things that are not customary; but it will come clearly with additional financial costs. I believe and those of us on the committee who reported out Senate bill 1630 believe very strongly that those costs are worth it. They are worth it actually in direct dollar terms, as the chairman of the subcommittee and manager of this bill, Senator BAUCUS, said the other day, comparing the estimates of health costs, if we do not pass the bill, to direct costs if we do pass the bill. We get about $4 back savings for every dollar we spend.

As we try to make this judgment about whether we are prepared to chance and whether we are prepared to incur some additional costs, I think it is critical that those of us here in this Chamber who have to make these tough decisions on these complicated questions make sure that we have the most solid facts in our possession before we reach a conclusion.

There are a lot of numbers flying around this Chamber about S. 1630, the Clean Air Act. A lot of them, in my opinion, of the direct costs to implement this act, are exaggerated. Today the Congressioanl Research Service in its report on title III, the air toxics section, makes clear in its own independent way, fact-based way, that it agrees that estimates of EPA, which are quite similar to the estimates of the industries that will be most affected by the air toxics provision, are exaggerated. I commend that report to my colleageus and to their staffs who are in the process of gathering information to reach judgment on this bill. I hope they will read it, and I hope they will decide that Senate bill 1630 is a good bargain financially and worth supporting.

I thank the Chair. Mr. President, I note that there is no one else about to speak, and I suggest the absence of a quorum.

The PRESIDENT OFFICER (Mr. ROBB). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that morning business be extended until 3:30 p.m. under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I ask unanimous consent that I now be permitted to speak for such time as I may require.

The PRESIDING OFFICER. The majority leader is recognized for such time as he may require.

THE STATE OF THE UNION

Mr. MITCHELL. Mr. President, 3 days ago, President Bush sent us his budget. Last evening, he outlined the priorities and choices that helped create that budget.

The President's words invoked the great hopes we all share at the changes our world has seen in the past half year. That changing world offers new opportunities as it presents new challenges.

The President's renewed and more aggressive proposal for American troop reductions in Europe is welcome. I commend him for that proposal. It is an initiative for which he will have our full support. A mutual reduction of American and Soviet troops in Central and Eastern Europe will be a stabilizing factor at the same time as it begins the process of adjusting our national security budget to the new challenges our national security faces.

For 40 years, our Nation carried the burdens and fulfilled the responsibilities of world leadership.

The patience of the American people was rewarded last fall; the peaceful world for which we have given so much blood and treasure is now within sight of being born.

Nothing more clearly vindicates the traditional Democratic reliance on American ideals as a model and a goal for other societies. The President quoted Harry Truman, who first predicted the ultimate collapse of communism. We Democrats take pride in knowing that Harry Truman has been proven right.

The President said, rightly, that the state of the Union ultimately depends on each individual American. But it also depends on how we work together to accomplish the goals that no individual can reach alone.

A family's well-being means more than the individual well-being of one member; America's well-being depends upon more than the good fortune of some individuals.

The President spoke of stewardship eloquently. We are stewards of the richest, most beautiful, most fertile land in the world. Our natural heritage is the envy of others.

So I applaud, commend, and strongly endorse the President's emphasis on the environment. He spoke of planting a billion trees a year for 10 years. I support that goal; I hope we can do even more.

If it is sustained, in 20 years time those trees will absorb 5 percent of the carbon dioxide that threatens our Earth with dramatic climate change. We cannot move too fast on this important initiative.

A billion trees are an inspiring symbol. The President's agreement to make the Environmental Protection Agency a Cabinet department also symbolizes a profoundly important idea: The Agency should have a voice at the highest levels of government because its work affects our highest priority—the health and well-being of the American people.

That priority should guide all our budget choices. But our priorities have to be backed by more than symbols alone.

A budget is a blueprint for the future. It tells us what and where we, as a nation, are planning to go, and the decisions and choices we will have to make to get there.

Judged by that standard, the President's budget, as opposed to the President's speech, is a disappointment. The speech says one thing. The budget does another. The gap between word and deed widens.

But this budget assumed an excessively optimistic growth rate; the national equivalent of winning a lottery. A family calculates on maintenance needs, gutters to be repaired, oil changes for the car. The budget for our Nation should do the same. But this budget does not maintain our basic investment in the roads already built, the bridges that span our rivers. The President is right when he says the national budget is a lot like the family budget, but he is not right when he suggests that his budget meets that test. It does not.

The future America this budget promises is a nation which does not make the investments it should be making in the skills of its people or the capacity of our economy. I believe we owe more to the American families of today and the families of tomorrow. Our Nation's economic prosperity and well-being ultimately rest on the prosperity and well-being of the American family, the fundamental unit of our society. The foundations on which American families depend for their own well-being are clear and straightforward—jobs, housing, health care, education, all in a safe and clean environment. The agenda of the American Congress should be dictated by the needs of American families. Government must help provide the conditions in which American families can secure their own well-being. By that standard this budget is a disappointment.

The budget increases Head Start funding by $500 million. That is a long-overdue increase and I welcome it and commend the President for the proposal. But without followthrough, early childhood enrichment is only the down payment on an educated citizen. It is not the full cost. But the total resources for education in the President's budget do not even keep pace with inflation. And the $500 million added is not a fair offset for the proposed cut of $460 million in child nutrition. Children must learn, but to learn they use be healthy and well fed.

So on the one hand the President proposes to increase Head Start by one-half billion dollars and on the other hand proposes to cut child nutrition programs by almost exactly the same amount.

To grow strong, to learn well, children must be healthy as babies. They need a good start in life. But the WIC nutritional supplement that helps low-income pregnant and nursing mothers to provide proper food for their babies does not grow at all in the President's budget, not even enough to equal inflation.

The President spoke of his goals for education in the year 2000 and he spoke eloquently. Today's babies will be students of the year 2000, the same students for whom the President outlined education goals last night.

The budget is disappointing as well for the priorities it ignores. The President spoke movingly last night of his 12th grandchild and of the importance for every working parent to have good child care. But his minimal tax credit does nothing to secure quality care, safe care, for the children of working Americans.

The President said he will appoint a commission to study the problem of 37 million Americans without health insurance. But the last thing we need is more studies. The problem has been clear for several years. Already our hospitals face demands on their charity from patients too ill to turn away and too poor to pay. In the meantime, three quarters of the budget's proposed $5.5 billion Medicare cut will come at the expense of these same hospitals. That is unrealistic and unwise.

The President spoke proudly, and justifiably so, of the return of democracy to Panama, but not one penny of his $500 million aid program for Panama is reflected in the budget, although it is certain that at least some of those funds will be spent in fiscal year 1991. Where is that money going to come from? Yet this, we are told, is a budget that should be taken seriously.

Like all its recent predecessors, the budget includes something the President did not speak of last night—$22 billion in higher revenues to the Government, essentially higher taxes and higher costs for Government services. A large chunk of those higher revenues that would help bail out the budget deficit this year is another $4 billion in Social Security taxes, an additional $13 billion in higher Social Security taxes over the next 3 years. But in the past decade working Americans have seen their Social Security tax burden rise by 22 percent, more than offsetting the very small decrease in their other Federal taxes. This budget maintains that imbalance. It maintains the same unbalanced reliance on massive Social Security surpluses to meet deficit goals.

The President's budget proposes to take Social Security surpluses out of the budget but not until 1993, safely after the next Presidential election. The surpluses that exist today, this year, and next year, will be used by the President's budget to shrink the deficit, really to mask the true size of the deficit. Throughout the last decade we have constantly been given budgets that would be in balance 2 or 3 or 4 years in the future. That, too, remains unchanged in this budget.

We have already spent the better part of a decade debating whether we can afford to house our homeless, teach our children, treat our sick, pave our highways. For a decade, we have accepted budget gimmicks and sleight of hand to preserve the fiction that taxes are going down.

But we are in a changed world, in a new decade. Our economy needs more than the recycled words of the past with which to meet the challenges of the future. Our people need more than goals and hopes, important as those are. They want to invest in their future and their children's future. That is one of the challenges our Nation must begin to meet in this decade. Sadly, the President's budget does not show us how.

Mr. President, I yield the floor and if no other Senator is seeking recognition, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ADAMS). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE PRESIDENT'S STATE OF THE UNION ADDRESS

Mr. SIMPSON. Mr. President, during this slight delay in the proceedings, as we go on with the Clean Air Act, a critical item of the Nation's business, I thought I would just take literally a few minutes to speak about the President's address last night. I have heard others speak on that, and I think we agree that the President indeed spoke eloquently on the important issues that confront this country. If they happen to be the issues that the President gets high marks on in the polls, it is only because that is what the American people are concerned about—education, environment, drugs, peace.

The President addressed those things in the way this President addresses everything in his life, in a most exceedingly thoughtful way. It was a very thoughtful address. I see some have indicated that they thought it was rhetoric or symbolism. Sometimes I think—what is wrong with symbolism? Rhetoric is something that is an art form in this Chamber, so we need not have any further review of that.

It has been a most curious thing to listen to the responses to the State of the Union Address. I thought Speaker FOLEY was very effective in his usual and steady way, when he addressed it.

So was the majority leader, Senator MITCHELL.

The American people know that we have a lot of work to do. They do not need to hear too much more of that from anybody. The game of one-upsmanship is not being accepted by the American people, but it happens every time we address an important piece of legislation. But, they are not buying that.

In education, they have been through the Roto-Rooter of "give us more resources and we will give you good, intelligent, articulate, literate people." Merely throwing money at the problem has not been successful. We owe the American people more than throwing money at national problems. And as the President said so beautifully last night, "We were not sent here to bicker, but to govern."

It will be very interesting to see, in these next months, what sorts of responses are made to the President's proposals. If it is simply going to be "It's not a bad plan, but it needs more money"—we have already been there. Every one of us voted on a debt limit extension of $3 trillion, one hundred twenty-two billion bucks. When somebody says that your country is not responding, well, chuckle them right off.

This year's budget is big, and both parties will play the most extraordinary game of hide the bucks, and the American people know that. They are not dull witted. We should never believe for a moment that Americans out there, the great unwashed do not know what is going on. They understand what is going on perfectly well. They understand partisanship, and they are saying, "Why do you not tone that down and get the business done, you bums." That is what they are saying.

I think all incumbents, including your loyal correspondent who is up for reelection, are in peril. The American people are saying to us, "Why do you not do something instead of just giving us this stuff?"

So it is not going to do any good to talk about the frustration that I know the majority party in this Congress must feel, as George Bush speaks of the issues dearest to their hearts in a way that the people can hear. That must be very frustrating to them. I understand that. But it is not becoming, simply out of frustration to just meet in cloistered places and say, "What are we going to do with this guy, George Bush? He has an 80-percent rating of approval, and he has taken every single issue near to our hearts, and he is trashing us with it, and he is getting the credit." That may be. He has his advisers too. But the American people do not care who gets the credit. They just want to see the job done.

So last night we heard some dramatic things, such as a proposal to reduce our forces in Europe. All Americans should have jumped up and clicked their feet. But, no, we have to be very cautious here, and those are the same people who tried to cut the forces before.

Years ago, it was my job in a mortar platoon to protect some kind of a weapon they had aimed into East Germany. I never figured out quite what it was. The local citizens that had relatives in the area where it was aimed were very concerned about it, and I do so understand that. That was during the conflict at the end of the war. I was not in combat, but I was there at the tail end of the army of occupation. This is a great move.

It must be frustrating to see this President present things like more spending on Head Start and new money on Even Start and new money on a Clean Air Act and to see that the policies he has advocated have brought greater peace in the world. But what is wrong with that? What is wrong with those things?

My friend Secretary Jim Baker this morning at the National Prayer Breakfast—and I hope all of you will get a copy of that most impressive, moving and remarkable message—talked about faith and friendship. There is nothing wrong with that. The President, last night, was talking about family and faith, and these are the things in our lives that bind us together, giving a helping hand, volunteerism. Those things are not corny. That may seem corny to some people out here, but it is not corny to the people of America. It is not at all corny.

So here we go, and I know the frustration level is high, and I can spot this. You almost get a sense of these staff members—not here on the Senate floor—but in the policy committees, in the Democratic councils—why they almost make a noise like a burned bushing on an engine. "What are we going to do with him?" Instead of letting the engine burn out, let us try to direct the engines into how do we get important legislation passed? There are some ways to do that.

If we really are talking about education, then why does not the House Education Committee have a hearing on George Bush's education bill? I know that is a terribly silly thing to bring up; nevertheless, the Senate will consider Senator KASSEBAUM's bill—that is the President's bill. Let us have a hearing on it in the House. If you do not like it, trash it. If you do not like it, put a substitute in, but let us have a hearing on education issues.

Let us make teachers more accountable rather than constantly talking about additional resources. We have all been there. "If we only had more money, we can teach these fine young people." Well, we have given them everything but the kitchen sink, and we get nothing back, and we will not get much back until we have accountability from teachers and administrators and we should get rid of tenure, which is a haven for the mediocre in the world. Let us start a constructive debate on education. We can do that.

The drug wars. I hope we do not go through the exercise again as to who wants to spend more money to get the druggies—the Republicans or the Democrats. That is such a useless exercise. Nobody even cares what is in the bill. It is just not enough money. We have been there on that one, too. We have all been there.

Capital gains—the fat cat versus the poor. Sixty-four Democrats at the other end of this building voted for that despite alarms that this bill trampled on the ancient Democratic constituency.

I would think those Democrats would be getting very tired of being donged on by their leaders and others, when those 64 Democrats voted with the President on the capital gains issue and we know there are 12 to 15 in this body who are of the Democratic faith who will vote favorably on that issue. That is not a partisan or a class issue.

I think that it is time to deal with child care. We did a bill here. I did not support the final product, but we did our work, and that is what we are supposed to do.

In the House, if they are talking about child care, then tell them not to report two bills at once out of committee. That is an irresponsible act of a legislature. Forget Democrats or Republicans. It is. Do a child care bill in each body and let us go to conference committee and get one passed. We all know we want to do it. We can solve the differences, whether it is parental choice or standards or whatever.

Do a clean air bill. That is certainly not a partisan issue. You ought to see the rich discussions that go on in our party.

Let us do a drug bill. Let us do these things that we know we have to do. Let us do it. Let us deal. Republicans aren't blameless. Some Republicans butchered up the HUD programs during the last administration. I was a little appalled by that one Republican Party chairman who said, "I thought that was what it meant when you had your party in power, that it was a vehicle to get in there with both hands and rip around in it." That is not my idea of politics. I was offended by that Republican chairman. I cannot remember where it was. That was the statement. He thought his job was to elect his party and then get his paws on all the jack that came by the window. That is not my idea of politics nor is it the American people's idea.

There are 535 of us here in this place and maybe 20 of our Members are in various stages of extremity and

alleged to have violated various ethical rules. That is very unfortunate and it is very difficult because we deal with them daily and we care about them. They are still allegations. That is the terrible part about it. None of these things have been proved, and yet those people have to deal with us and deal with their constituents on the basis that they are tarred and feathered before they ever get an opportunity. That leaves a tinge on us all.

But meanwhile, while there are 535 of us and 20 in these troublesome straits in their own lives. The rest of us are doing our business and they are, too. They are here. Others have been tried and convicted and gone to jail and that is what can happen in the process. But we do not need to have that happen, to come to premature conclusions while nothing formal has been brought against them.

I just hope that we will all pay attention here on the issues of whatever it is that confronts us and not just try for top dog, underdog, or one-upsmanship or to just get back in the back room and say, "Lord's sake, Bush has done it again. He has taken one of our issues and now they think it is his." The American people will decide that.

Last night I think I saw a President with a reservoir of good will, a very deep reservoir.

We all must start to take things seriously with this budget. When people hammer us flat on issues of Social Security, Medicare, Medicaid, and push and push and push us, just turn to them and say, "You know, we have work to do here and your grandchildren are going to pay the dearest price unless we do what we are supposed to do."

I just caution once again about frustration, simple frustration, with a very popular President. He is going to make some doozies of mistakes because he is just as human as you or I. When that time comes he will nevertheless have a reservoir of good will.

He has said that he wanted to reach out, and I think our majority leader tried to do that. However, there was a breakdown in that. The Chinese student issue was contentious. I hope we do not have to go through that kind of partisan exercise again.

I honestly believe that needn't have happened. The President shared this thought with us one morning. I think his question had an affirmative answer. He said, "What if I had gathered together all of the leaders of the Democratic Party"—and remember, he did not gather the Republican leaders together, either. "What if I had said 'What do you think of a secret mission to China which I think could have the result of lifting of martial law, the release of 561 people into an amnesty who were taken in as dissidents, reestablishment of the Peace Corps presence in China, opening that channel of communication, and also opening again the Fulbright scholarship channels and other cultural exchange avenues? Is this worth the risk?" I do not know but I think the answer might have been, "Yes, go ahead and try that." Of course he did and those things happened.

So it is not the substance of the Scowcroft toast or anything like that that matters. The matter is clear. Nothing is to happen to the Chinese students. It will be a case-by-case decision. It will be something done with complete compassion. No one will be returned unless it is safe. And yet we went through a brutal exercise and it became partisan. Everybody said, "where did it turn partisan?" I said, "I do not know." But when issues arise in which you never get a single vote on the other side of the aisle, you have to figure in a twisted way that that is partisan.

I have legislated for 25 years and when you cannot get a single vote on the other side of the aisle in either body, it is kind of silly to think it might not have a shred of partisanship to it. We need to do that sometimes. Well I guess we do. That is a legislature working or not working.

I am just saying I hope that the frustration with George Bush and his positions, and what he represents to the American people will not wash over into a continual exercise of one-upsmanship or "when he did get religion" or "I wonder when he sobered up on that one," or "that was our idea" and "we thought of it first." That is not helpful. If that is the way it will be—then that will be—and we will do what we usually do, which is kind of wrestle around, do a little mud wrestling, come up and whack each other on the back in camaraderie, and move on.

The people are watching this trip and it is a big agenda, and he has set it out. I think it behooves us to address this agenda in the most responsible way as we operate in this very partisan environment which is what this remarkable Government is about.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. FOWLER. Mr. President, I ask unanimous consent to speak as if in morning business for 5 minutes.

The PRESIDING OFFICER. The order already provides for morning business, and the Senator is recognized for 5 minutes.

PRESIDENTIAL LEADERSHIP

Mr. FOWLER. I thank the President.

With knees slightly shaking at the thought of either mud wrestling or dry wrestling with my great friend from Wyoming, who has far more holds legislative and athletic than I could master, I do want to say in the spirit of his remarks that all Americans and all American Members of Congress want their President to succeed.

Our country simply cannot succeed whether it be on the internal affairs of our Nation, the security of our people in their homes, the education and prosperity of our people or our leadership as expected of us in the world if we do not have a President who leads and who leads with foresight, integrity, and has the support and wellwishes of the people of our country. And we have that from George Bush.

I think I can say that with almost absolute authority from this side of the aisle. We worked with him, served with him in the Congress, and we wish him well. Differences with President George Bush, I say with great respect, should not to date be construed in partisan terms. There may come a time, as my friend from Wyoming observed, but to date that should not be the case.

I agree with the distinguished deputy minority leader that at this level, in the interest of the people of our country, there ought not to be Democratic solutions or Republican solutions but the best solutions to the problems that face our country.

But we have to respond to the words of our President and the observations of our President and the proposals of our President. Last night the President of the United States said, "The deficit is under control."

The President of the United States told the American people, "Our Nation's budget will be balanced in 3 years."

President Bush did not submit a balanced budget to the U.S. Congress. President Reagan, with all due respect, for 8 years never submitted a balanced budget to the U.S. Congress. And what we have been about, whether we are Democrat or Republican, a Senator or a Member of the House of Representatives, is to try to debate the priorities of the American people, to do for Americans what we need to do to ensure our progress in the economy, our progress as leaders, and fulfill our hopes and aspirations for both the children, of which Senator SIMPSON talked, or our guarantees for the elderly in our country.

But there are some proposals in the budget of the United States and reiterated by the President last night that are simply not accurate and are not credible. The deficit is not under control.

For many years, this Senator and many of us, both Democrats and Republicans, have proposed a law that required every President of the United States to submit a balanced budget in January, and then required of every U.S. Congress in December, at the end

of the year, to adopt a balanced budget.

Under the U.S. Constitution, it is only Members of Congress who are responsible constitutionally for setting those priorities and making changes in any President's budget to more nearly reflect the wishes and the aspirations of the American people. That is our constitutional job.

That is not partisan. That is our constitutional job, to debate how much money should be spent in education, what the threat assessment is, whether or not we can afford to move some money out of defense systems if we have a lessened threat, where we need to put money for research and development or Head Start.

When we make these observations, when we debate, that is not partisanship. That is our constitutional mandate, I humbly submit. Although I do believe that at the end of that process we ought to adopt a balanced budget and we ought to require a President to submit a balanced budget, which has not been done by this President and has not been done by his predecessors.

One final observation. The only frustration that this Senator feels, to use the word of my friend, is not any popularity of our President. I hope our President, faced with such enormous popularity, will use some of that political capital for genuine leadership to honestly get our deficit under control and not rely on any budgetary accounting methods to make something seem under control that is not under control. I hope our President will use that extraordinary popular acclaim that he now has to help our country achieve a balanced budget and not continue to run up this massive debt that we have seen.

When the administrations recommends we put $150 billion of the S&L bailout off budget, that is not counted in this document that was sent over yesterday. But I guarantee you all $150 billion goes to and is counted in the indebtedness of the United States of America that we now owe, and that my children and my grandchildren are going to have to pay regardless of whether they are Democrats or Republicans, or whether they come from the West or come from the South.

What would relieve more frustration than anything else is if we could all deal from the same deck, develop a spine, stand up to the American people and say, "All of us have spent more than we have taken in." All of us continue to borrow and try to hide it. And we will not bring our country back to fiscal integrity, bedrock economic strength, unless we put aside our games, admit that the deficit is not under control, admit that there are problems that we can solve if we work together, and join in the leadership of the Republicans and the Democratic Party together working with President Bush to see with clear eyes and try to work together in a new vision of clarity that will spell some progress to the American people, which will indicate, if we get together, that we will lead them.

I thank the President and my colleagues for their indulgence.

Mr. SIMPSON. Mr. President, I know the Senator from Wisconsin has been waiting.

Mr. President, I ask unanimous consent to speak in morning business for not more than 4 minutes, and then I will immediately yield to the Senator from Wisconsin.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. I thank Senator KASTEN very much. He has been very patient, and I thank him personally for that.

I could not agree more with so much of what my friend, Senator WYCHE FOWLER, is saying and I want to commend him. I noted in one of the recent national publications that he was described as a "rising star." That was funny to me because I thought he was already there, since I have been watching him and observing him. He is a very able legislator and he is a very sincere and articulate person. I have found that to be true, and he is a friend.

So I commend him on that. That is a nice honor.

I guess we all know what budget gimmickry is because we are all so good at it. Both sides of the aisle are magnificent at it. We continue to butcher Gramm-Rudman-Hollings in the most extraordinary ways, setting the payroll of the Defense Department aside for 12 hours so that it kicks in at some other time. We are all skilled beyond comprehension at that type of gimmickry.

I have supported the balanced budget amendment since I got here, but it does not go anywhere. We get the majority of votes, but you need to have the constitutional spread on that. When we talk about "off budget" and the savings and loan crisis, I am sure there are a lot of people on both sides of the aisle that are also going to vote to put Social Security off budget. We are going to put the Post Office off budget. We have already put the Federal Financing Bank off budget and moved it back.

What is the purpose of all that? The purpose is to hide bucks or get more. So I want to see what we are all going to do with that. I do not want to vote to put anything more off budget. I have gotten my somewhat sense of religion on that!

We are going to have to go do a farm credit program bailout of about $60 to $100 billion because we toodied up the bucks and did loans and guarantees and all sorts of things that do not even appear. We have unfunded pension liability with all of our Federal employees of $418 billion, and that does not appear anywhere. Social Security is a mess and we will not touch it with a stick.

And in the year 2030, that grandchild of mine and of Senator WYCHE FOWLER's will be picking grit with the chickens because we do not have the guts to do a single thing about it now.

So we ought to quit talking about all of this stuff and just do something. And remember, now—and do not throw a tomato from anywhere—the President of the United States never cast a single vote on the budget, not one. Neither did Carter; neither did Kennedy; neither did Reagan. The budgeteering is done, ladies and gentleman, by us.

Just because the President presents a budget does not add one whit to the national debt or the deficit. We do the dirty work. We do it. The President gets not a single vote.

I think that is what we have to keep in mind as we try to go forward with what I agree is a mission, one just as visionary as that of the one of my friend the Senator from Georgia. I am ready to try to help in any way I can and I pledge to try to do that.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. KASTEN. I thank the Chair.

(The remarks of Mr. KASTEN pertaining to the introduction of S. 2052 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. KASTEN. Mr. President, I suggest the absence of a guorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DODD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Connecticut is recognized.

Mr. DODD. I thank the Chair.

(The remarks of Mr. DODD pertaining to the introduction of S. 2054 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

IN SUPPORT OF THE ARMY'S LIGHT FORCES INITIATIVE

Mr. THURMOND. Mr. President, many highly significant events have taken place during the recess between the 1st and 2d sessions of the 101st Congress.

In the military arena, President George Bush ordered United States troops into Panama, a move which I fully support. This operation was executed in a professional manner and all

the forces involved are to be commended.

In Eastern Europe, we continue to see an evolution, and in some cases, revolutions, as the people of these countries repudiate Communist regimes which have ruled since World War II, almost solely on the strength of military force.

All of these events, and the appropriate U.S. response, must be analyzed as we move into a new decade in our ever changing world. In particular, I would like to commend the U.S. Army for steps already taken toward meeting future contingencies. This is evidenced by the Army's light force modernization plan, which is to be completed in early 1991.

While there has always been, and remains still today, a basis in the Army toward heavy forces, such as those positioned in Europe, we now see real interest in a more balanced force structure. The Army must be able to function effectively in a low as well as high-intensity conflict. Army Chief of Staff Carl Vuono has shown interest in this balance in the past, and now we are seeing leadership come from Gen. John Foss, commander of the Army's Training and Doctrine Command.

As a long time ranking member of the Senate Armed Services Committee, I have witnessed doctrine studies in the past, most of which came to nothing because they were drawn out and eventually embroiled in Army procedures and turf battles to protect the current force structure.

Mr. President, that is why I found of special interest the Army's initiative to test the Marine Corps light armored vehicle [LAV]. This step was most impressive in that the Army borrowed 16 LAV's from the Marine Corps rather than work through a lengthy paper drill or study. This type of action accelerates analysis of light forces equipment which may or may not meet the Army's needs.

The Army has also expressed in the past an interest in a light tank. However, for reasons unclear to me, such interest in the past has been short circuited rather than quickly pursued to a test phase. It now appears however, the Army is moving toward a prompt evaluation of candidates from combat vehicle producers.

Either or both of these programs, the light armored vehicle [LAV] and the armored gun system [AGS], may fit into the Army's future as it expands its light forces structure. The LAV is off the shelf and a number of companies have prototypes or candidates for the AGS requirement. It would behoove the Army to move rapidly on these investigations and cut through the redtape as they have done with the LAV test.

Mr. President, a number of articles on this subject have appeared in the press in recent weeks. The Army is to be commended for getting serious about light forces, and I believe the Congress will find these developments of interest.

Mr. President, I ask unanimous consent that the following articles be printed in the RECORD at the conclusion of my remarks: "Arm's New Warfighting Doctrine Calls for More Agile, Independent Brigades in Future," January 8, 1990, Defense News; "Army Proposal Outlines More Mobile, Flexible Force," December 11, 1989, Defense News; "Marine Corps Delivers LAVs to Army in Exchange for 11 Rocket Launchers," January 1990, Defense News.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From Defense News, Jan. 8, 1990]

ARMY'S NEW WARFIGHTING DOCTRINE CALLS FOR MORE AGILE, INDEPENDENT BRIGADES IN FUTURE

(By Caleb Baker)

WASHINGTON.—The quickening pace and increased violence of future battles will demand that the U.S. Army's heavy armored forces become more agile and able to operate free of traditional resupply routes, Army documents show.

Command of the Army's future maneuver forces must be streamlined to allow these forces to fight a lighter and quicker opponent. Smaller units must be able to win sustained battles without relying on the division for leadership or weaponry.

This is the consensus of top Army planners who are reviewing options to redesign the force as they put the finishing touches on the service's next comprehensive warfighting doctrine, Air Land Battle-Future. A 15-page summary of a Dec. 4 meeting of these planners was obtained by Defense News.

The brief report contains the guidance of Gen. John Foss, commander of the Army's Training and Doctrine Command, Fort Monroe, Va., who is leading the restructuring of the Army's force structure for the mid-1990s and beyond, officials say.

Most traditional functions of the division commander other than certain command missions will be transferred to a lower echelon such as the brigade or higher to the corps, the documents state. This would make the brigade more capable of independent operations and lighten the burden on the division. There are normally three combat brigades in a division—the Army's principal fighting units.

The Army's effort is the first indication that the service is looking to lighten its heavy forces, including those deployed to Central Europe, in view of the changing Soviet threat. The service is in the midst of a shift that would place emphasis on quick-strike forces based in the United States rather than forward-deployed troops.

For example, Foss has recommended taking mortars and possibly some tank-killing combat vehicles out of the heavy infantry, according to the summary of the Dec. 4 meeting. Foss has commanded the Army's Infantry Center, Fort Benning, Ga., and the 82nd Airborne Division, based at Fort Bragg, NC.

However, some officials caution that the Army is not willing to eliminate its heavy forces in favor of maintaining rapid deployment troops. Gen. Carl Vuono, Army chief of staff, has warned in recent months that changes in the Soviet Union will result in an improved Red Army.

In a draft white paper released last October, Vuono stated that defense against Soviet and Soviet-supported military action in Europe and Asia "will remain the most demanding challenges for the United States and its allies." The paper outlines the Army's roles and missions in the 1990s.

Top Army planners this week are expected to meet at Fort Leavenworth, Kan., to further evaluate the force structure required for Air Land Battle-Future.

"There is universal agreement that we need some heavy divisions: the disagreement is over how many we need. There is universal agreement that we need to lighten the force. The question is how far?" one Army planner says.

"Our warfighting doctrine will not change, but how we execute it will as the nature of the threat changes. We will see a more traditional force based on lighter and low-intensity conflicts, not tactical divisions slugging it out on the plains of Central Europe."

Air Land Battle-Future outlines a plan to fight wars in ever-larger spaces at an ever-quickening pace, but by fewer troops equipped with increasingly sophisticated weapons. A draft copy of the doctrine, in the final stages of completion, was made available to Defense News early last year.

In general, the new doctrine envisions a fast-moving war fought over large spaces and much greater depth than today's battlefield. Smaller units armed with high-tech weapons will fight in battles characterized by a stunning level of violence. Large-scale engagements will last only hours, and perhaps minutes.

The new field manual also will add endurance to a list of four basic tenets that make for success in battle—initiative, agility, depth and synchronization. Endurance means U.S. forces must be able to sustain a battle against numerically superior forces. A new emphasis will be placed on logistics and weapons that do not require frequent refueling or rearming.

[From Defense News, Dec. 11, 1989]

ARMY PROPOSAL OUTLINES MORE MOBILE, FLEXIBLE FORCE

(By Caleb Baker)

WASHINGTON.—The U.S. Army is crafting a modernization blueprint for its light infantry and special operations units in an attempt to improve the service's mobility without compromising its firepower, Army officials say.

In a Light Force Modernization Plan, Army officials are preparing chapters that will examine ways to equip the service's rapid deployment troops with lighter tanks, antiaircraft weapons, helicopters and artillery systems. These annexes will be compiled into an overall modernization plan to be completed before January 1991.

The Army leadership in the last six months has established a light force modernization task force that is trying to define existing and future weapon systems that can be used by light forces, says Army spokesman Barry Bomier.

One report prepared for the task force, titled "Air Defense Modernization for Light and Special Divisions," was obtained by Defense News.

It was completed by air defense officials at the Air Defense Artillery Center, Fort Bliss, Texas. However, Bomier cautions that the

plan is in the "embryonic stages of development."

Officials say the plan reflects an accelerated effort by Army leaders to restructure the service in anticipation of budget reductions and a future Conventional Forces in Europe (CFE) arms control agreement. Such an agreement will call for the withdrawal of a substantial number of troops from Central Europe, officials say.

"It's a cultural change," one top Army official says. Sources say the Army is in the midst of a revitalization of the light force first started in the late 1970s by Gen. Edward Meyer, then Army Chief of Staff. Meyer is credited with forming the Army light infantry division.

In response to the swift pace of CFE talks ongoing in Vienna, Austria, and budget cuts, the Army is proposing to pull approximately 40,000 troops and 600 tanks out of Central Europe by 1994. This is half of its armor and mechanized divisions now stationed in the Federal Republic of Germany.

Defense Secretary Dick Cheney last month directed the services to find ways to trim their budgets in an effort to cut $180 billion from the Pentagon's budget from 1992 to 1994. The Army's share is estimated to be $50 billion.

The combined effect of both factors will result in a fundamental shift in the Army's weapon deployment strategy, officials say. Modern warfighting equipment that was once first sent to forward-deployed troops will now first be fielded with contingency forces based in the United States such as the 82nd Airborne and 7th light infantry at Ford Ord, Calif.

In internal efforts to cut its annual budget, the Army has vowed to protect its light and special divisions as well as some weapon programs geared toward these forces, such as the Light Helicopter Experimental.

The Light Force Modernization Plan represents a firm belief in the Army leadership that the service can play a role in a future high-intensity or low-intensity conflict despite the withdrawal of a large number of troops, officials say. Officials say the service views itself in competition with the Marine Corps for quick response missions.

For example, the Army is eyeing the Marine Corps Light Armored Vehicle equipped with a 25mm cannon in a program that may spark the development of a new light tank, officials say. The 82nd Airborne division would deploy today with Vietnam-era M551 Sheridan tanks.

Army Secretary Michael Stone said in an Oct. 11 interview with Defense News that the service has started to look at ways to increase the mobility of its forces. He said the service was evaluating the McDonnell Douglas lightweight MD-500 as an additional helicopter for light and special forces.

In air defense, the Army will rely on the fiber-optic guided missile, the Avenger Pedestal Mounted Stinger weapon system, and the Stinger as a shoulder-fired missile to support its light and special units, according to service documents.

The air defense study is an adjunct to the Air Defense Modernization Plan, which outlines plans to upgrade the service's arsenal of antiaircraft weapons, according to Col. Zigmund Robuck, head of air defense in the Army's force development branch.

In a low-intensity conflict, the Army will be expected to gain complete control of the air with limited assets, according to the study. These forces will not have the close air support and jamming capability typically involved in a conventional war.

For this reason, air defense weapons fielded to light forces must be light enough to be transported and either set to deploy or already deployed within 24 hours, officials say.

"If in CFE negotiations there are proposals to limit air defense near the [forward line of troops] on both sides, there will be a greater burden on the light force," one industry official says. "The Army is responding to the reality of changing political times."

The fiber-optic guided missile, or Non-Line-of-Sight missile, and the Avenger are in the original air defense modernization blueprint. However, the Air Defense Antitank System, the service's frontline weapon, will not be deployed with light forces.

Instead, the Army has proposed the development of the Avenger for the Line-of-Sight-Forward-Light mission in low-intensity conflicts, sources say. The weapon will fire both Stinger and complementary missiles. The Army plans to conduct a competition for an off-the-shelf missile to complement the most modern version of the Stinger.

The Army also has proposed purchasing 60 Marine Corps Tactical Defense Alerting Radars (TDAR) as an interim ground-based sensor, the documents show. It would replace the venerable Forward Area Alerting Radar currently deployed to air defense units.

It would cost the Army an estimated $16.5 million to purchase 60 tactical radars at $250,000 each, with spares and associated equipment, according to the study. However, the cost of operating the existing radar is $540,000, while the operation and support cost of the new radar would be $25,000.

[From Defense News, January 1990]

MARINE CORPS DELIVERS LAV'S TO ARMY IN EXCHANGE FOR 11 ROCKET LAUNCHERS

(By Caleb Baker)

WASHINGTON.—The U.S. Marine Corps and Army this month are expected to sign two separate agreements that would allow the Marines to lend the Army 16 light armored vehicles in return for 11 battlefield rocket launchers, defense officials say.

In an unusual trade, top Army and Marine Corps officials are polishing two memorandums of understanding that will govern the independent lease agreements, officials say. In addition to the 11 Multiple Launch Rocket Systems (MLRS), the Marines will receive 50 BV206 small support vehicles.

The Marines early this month, delivered the 16 Light Armored Vehicles (LAVs) equipped with 25mm cannons to the Army's primary rapid deployment force—the 82nd Airborne Divison at Fort Bragg, N.C.

Service officials contend that the timing of the agreements is coincidental, and that they are not reciprocal. "They are two separate actions, but everybody is aware of the simultaneous conversations," says Army spokeswoman Paige Eversole. "It's pretty much business as usual."

However, other officials involved with the agreements concede that the Marines demanded something in return for loaning the Army the LAVs, which cost an estimated $1 million apiece.

"Ten years ago, the Army opted not to participate in the LAV program. Now they want it," one official says. "What's in it for us? We can use MLRS, and we can't get it budgeted."

The Marine Corps currently plans to procure up to 100 MLRS launchers beginning in 1995, but will continue to seek the weapons in the early 1990s, Marine officials say. A Marine fact sheet states that MLRS "is key to implementing . . . the objective to provide the increased mobility and firepower necessary for maneuver warfare."

The Marine Corps currently operates more than 800 LAVs, all built by London, Ontario-based General Motors of Canada. It weighs less than 15 tons and travels on land at speeds up to 62 miles per hour. In the water, it can travel 6.5 miles per hour.

The Army requested the LAVs after Maj. Gen. James Johnson, commander of the 82nd Airborne, expressed an urgent need for the vehicle "to meet pressing contingency requirements," according to a Dec. 15 Army information paper on the pending agreement.

Military officials say an Army willingness to evaluate the LAV reflects a shift in emphasis from the service's forwarded-deployed forces in Central Europe to contingency troops based in the United States. A forecast for reduced defense spending and a diminished Soviet threat are driving the effort to strengthen quick strike forces.

In the Dec. 20 U.S. invasion into Panama, an estimated five LAVs were taken to operate with Task Force Bayonet, a group comprised of an Army mechanized infantry battalion and Marine Corps LAV platoon that seized the Commandancia, the former headquarters of ousted Panamanian leader Manuel Noriega's defense forces.

One top Army official told Defense News last week that the LAVs were producing excellent results in Panama. The LAVs' performance in Panama convinced the Army "that we really ought to look at the [LAV]," the official said.

The 16 LAVs will be deployed to one of the 82nd Airborne's scout platoons for two years, and will conduct reconnaissance missions now performed by High Mobility Multipurpose Wheeled Vehicles—light trucks, officials say.

While the Army has not requested funding for LAVs, the service will conduct tests early this year at the Armor Center, Fort Knox, Ky., to determine its value. The Army may opt to purchase additional LAVs following the tests, according to the information paper.

The plan has led to speculation that the LAV will replace the airborne division's Vietnam-era M551 Sheridan light battle tank in the future. But one Army source cautions that it does not have the firepower or armor protection required for a tank battle, even if it is against light tanks or other armored vehicles.

Nevertheless, one Pentagon official said there may be a future requirement for as many as 400 LAVs, because M1 Abrams main battle tanks are too heavy to be deployed to engage in small-scale combat. "There is no threat to fight with M1s," the source says. "To do so would be showmanship and overkill."

SUPPORTING THE PRESIDENT'S ACTION IN PANAMA AND RECOGNIZING THE SACRIFICES OF OUR NATION'S SERVICEMEN AND SERVICEWOMEN

Mr. THURMOND. Mr. President, I rise today to recognize the valor and sacrifices made by the soldiers, airmen, and sailors who participated in Operation Just Cause.

Mr. President, by all accounts our Nation's military leaders did a superb job in planning and executing this operation. It was a massive undertaking which involved all aspects of our military establishment.

Not only was Operation Just Cause a demonstration of our Nation's commitment to democracy, but it also demonstrated a capability that I expect will be the blueprint for our Armed Forces into the 21st century. A military force that is light, swift-striking, and extremely mobile.

Enough has been said by the press and politicians about the purpose and result of this operation which restored democracy to Panama after 21 years of dictatorship. However, in my judgment, not enough attention has been focused on the brave men and women who so gallantly and willingly carried out their mission.

In the final analysis, the key to the successful outcome of Operation Just Cause was the U.S. soldier, whether male or female. Our soldiers demonstrated that they were exceptionally well trained, motivated, and dedicated. They performed their duties with bravery and skill, and were willing to make the ultimate sacrifice at the behest of their country.

Mr. President, 23 young men—some of them just old enough to vote—gave their lives in the service of a grateful Nation. Three of these men were from my State: WO Wilson B. Owens from North Myrtle Beach; Pvt. Philip F. Lear from Westminster; and Cpl. Garrett Isaak from Greenville.

Each of these men, as well as all the others, knew the danger that they faced, and yet they did not hesitate to do their duty. Corporal Garrett Isaak speaks to this dedication to duty in a letter he wrote to his family before his death. His family has consented to share the letter and I will ask that it be included in the RECORD.

Mr. President, I want to express my thanks to Corporal Isaak's family for sharing this very personal letter. My gratitude and deepfelt sympathy, as well as that of our entire Nation, go out to this family and all the families of the soldiers killed and wounded in Operation Just Cause.

General Patton is quoted as saying: "It is foolish and wrong to mourn the men who died. Rather we should thank God that such men lived." Mr. President, General Patton expressed my thoughts, and I believe the thoughts of my colleagues in the Senate, when he said those words.

Mr. President, our Nation is thankful that we have men and women who are willing to serve so bravely and with devotion to duty in the Armed Forces. As we begin this second session, let us be ever mindful of these men and women in uniform. Regardless of our political inclination, we owe these brave men and women our full support. They have the will and dedication to carry out an assigned mission; without question, we must provide the means.

I ask unanimous consent that the letter referred to earlier be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

LETTER WRITTEN BY CPL. GARRETT ISAAK TO HIS PARENTS, DR. AND MRS. ALBERT ISAAK, THE DAY BEFORE HIS DEATH IN PANAMA WHILE PARTICIPATING IN "OPERATION JUST CAUSE"

DECEMBER 19.

MOM AND DAD: If you receive this letter, you'll know that I died in combat protecting our country and the freedoms we hold so dear. Although we never did see eye to eye on most things, especially spiritually, I want you to know that I do believe Jesus is my Saviour, and I will be in Heaven to meet you.

I don't blame you in the least for anything I might have done wrong in my life. No one could have asked for better parents and examples to follow. I only wish I would have told you this more often and said I love you more often. So I'll say it now. I love you both very much and Sharlene and Lori too. You all made a very positive influence in my life, even though I might not have let you know. I love you all.

GARY.

Mr. DODD. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. CONRAD). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KERREY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATE OF THE UNION

Mr. KERREY. Mr. President, I have heard a number of people come to the floor today to speak of the President's description last evening of the state of the Union, this country of ours, have heard in particular the statements made about the need to cooperate. In fact, I applaud the President's willingness to work with Congress and I applaud the willingness of Democrats and Republicans in this Congress to work together. It seems to me, when we have important differences of opinion, particularly when they are strongly felt, it is important for us to identify those things we believe in strongly and to stand up for them.

I applaud the President's efforts in arms control, and I am enthusiastic about a recommendation to go further, the conventional force Europe negotiations, to a troop strength of around 200,000, as suggested several weeks ago in fact by the chairman of Armed Services, the Democratic Senator from Georgia [Mr. NUNN]. This proposal was put out several weeks ago and it is a worthy one.

All of us who have traveled to Eastern and Western Europe in the past 60 to 90 days have a growing sense that the changes in Europe are permanent and they afford us important opportunities.

I applaud as well the President's setting before the people of this country specific educational objectives. They will be difficult for us to accomplish. To say that the United States of America will be first among 17 industrial nations by the year 2000 will not be easy for us to do, for currently of our 17-year-olds 4 percent of them do multistep mathematics. We are 17 of 17 industrial nations and we have 9 years to go to hit the President's objectives.

If 90 percent of our students are to graduate from high school, we have a long way to go, and we have to come to the task not only committed to work together and to cooperate but to come with an urgency of action that says we have to act now, we have to move. We have to put in front of us the goals the President laid down last night and work hard to achieve them. I believe it will take structural changes in our schools as has been said by many people on the opposite side of the aisle, but I believe in the end as well it will take more money.

Today a teacher who teaches mathematics that might receive $25,000 to $30,000 a year is required to teach five 50-minute periods a day and is under increasing pressure to accomplish the job not only from the school but increased attraction from other job opportunities. To put it simply, Mr. President, we are going to have to compete to hold the best of our teachers, and we are going to have to pay them well. Otherwise, they will do other things in our growing economy.

I applaud the President's starting of the State of the Union Address with a call to enact child care this year. I am pleased that he is willing to see that there are women increasingly working outside the home, and they need assistance. It is a terrible dilemma in America today that the reimbursement received by the child care facilities is insufficient to hire the kinds of individuals to provide our children high quality care. Our title XX reimbursement is insufficient to reimburse those working mothers at the poverty guideline who are trying to work out of poverty and to work up the economic ladder.

I am pleased to see the President has continued to place emphasis on the environment. We all join with him. In fact, one of the reasons I am able to talk in morning business is because we are trying to work out the conflicts, real economic versus environmental conflicts. We are working to resolve them. I sense that in this Congress there is a great desire to pass a Clean

Air Act, and I believe in fact we will do it in this Congress.

I hope that the President does not slow things down, slow things down again, with such proposals to amend the Constitution to protect our flag. In all of our travels to Europe and with the tensions in Eastern Europe, I have not heard a single politician say to the people of Eastern Europe make sure that your constitution protects you against people who dare to burn the flag. We talked instead about the need to make sure you have economic and political freedom, make sure you have a fourth amendment that protects you against unreasonable search and seizure, make sure that you minimize the power of government to interfere with your lives.

I hope the President does not slow things down again this year with that kind of proposal. Fifty-five hours of testimony we had last year on a constitutional amendment to protect ourselves from flag burners, an unnecessary waste of time in my opinion, taking away from us time to be concerned about more meaningful things.

Mr. President, before I left on recess, I asked my staff to prepare a number of things for me upon my return. One of them was to try to give me a sense of what it is like today to live in the United States of America and earn $10,000 to $25,000 a year. We just debated a pay increase, many of us saying we could not live on $89,500 a year, and it occurred to me, since most of my people are in the $18,000 to $25,000 a year bracket, to get a sense of what it is like and what is happening to them in their lives.

One of the interesting things in the proposal by the Senator from New York [Mr. MOYNIHAN] to reduce the Social Security tax is that when you look at what has happened to middle-income America, not just in the 1980's—although I think it has gotten worse in the 1980's—but since 1973 you see something frightening, Mr. President.

When I heard the President of the United States describe the State of the Union last night, he inadequately described it. I describe it that way because my sense of it is he does not understand what is happening in middle America, because as I look at the numbers provided me by the Joint Tax Committee, I see today in America a tax system that says if you earn $10,000 a year, the next dollar you earn is taxed at 33 percent, and if you earn $10 million a year, the next dollar you earn is taxed at 33 percent. We have leveled the taxes in the United States of America. There is no longer progressivity in the taxes of the United States of America. They have been leveled as a consequence of action we have taken in the 1980's. Of all the people who need incentives in America today, it is not people who are earning $1 million a year or $300,000 a year. The people who need incentives, who need hope, are people who are earning $10,000 and $15,000 a year.

Mr. President, when you look at the Tax Code today, it does not seem we are providing those individuals with incentives. As I have looked at the information that I received from the Joint Tax Committee, I am even stronger in my opposition to the proposal to reduce the capital gains tax because in the 1980's what we have seen is Americans chasing noneconomic gain in the stock market, chasing mergers and acquisitions to produce larger and larger fees and not necessarily to be concerned about the quality of goods and services that those companies are producing. Instead of being concerned about productive output, they are concerned about the kind of fees they can get trying to chase some kind of shelter in our Tax Code.

Mr. President, when our taxes were changed in 1986, one of the most significant things we did was to equalize the tax on capital and the tax on labor.

To my friends who are saying that you must reduce the tax on capital, I say beware. You lower the tax on capital in 1990 and you break the neutrality, you run the risk of saying to working men and women that we are going to have for the first time inequality, not just neutrality and a flatness in our tax system, we are going to have gross inequality in our tax system.

Perhaps the most alarming thing that I found in exploring the proposal that the Senator from New York put before this Senate and this Nation was some information provided by the Census Bureau and the House Ways and Means Committee, showing that since 1973 the productivity rate of the United States of America has been in decline, saying essentially that when I graduated from college in 1965 I could look forward to doubling my standard of living in 20 years because our productivity was increasing at 3 percent a year.

In 1990, the product of the annual increase is 0.3 percent a year, so that the people who graduate today can look forward to doubling their standard of living in 120 years.

Mr. President, we have been watching the wrong number. We have been looking at the annual increase in the gross national product, and we all know that we can fund increases in the GNP if we are willing to continue to borrow the money we borrowed in the 1980's. But if we want to raise our standard of living, if we want our children to have a higher standard of living, Mr. President, we must increase our productivity.

To increase our productivity, Mr. President, we are going to have do an awful lot more; we are going to have to spend a little more here; we are going to have to spend a little more there. We are going to have to say to American corporate leaders we have to get to the marketplace with what the marketplace wants.

The President said last night that we have the capacity to compete. But if you do a poll and ask Americans, and say of the state of the Union, what is your favorite automobile, do they list the American car today? The answer is no. They list the Japanese car today and the automobile marketplace. We have to do an awful lot more to give the people of this world the kinds of goods and services they want or we are not going to see our standard of living increase.

Is the cost of capital a factor? Absolutely yes.

I am enraged that we can continue to go to the people of the United States and say we are decreasing our deficit when the President of the United States in his budget that he presented 2 days ago requires Americans to borrow $330 billion more. Three-fourths of all of our savings will be used not by people trying to build businesses, not by people trying to build homes, not by people trying to create quality products in the marketplace, but by the Government of the United States because we are pretending to reduce our deficit.

I have come to the conclusion, Mr. President, that in the 1980's one of the most terrible things we did was to say for the economic need of the deficit reduction we should lower the safety net for Americans in this Nation.

I believe, very simply stated, and I will elaborate on it further as this session goes further, we need to focus on two things: One, trying to increase the productivity of Americans in the marketplace. Do not pay attention so much to the increased GNP. GNP will increase if we increase our productivity. Second, try to raise that safety net, look at what people need in order to have hopes in America today. They need to have houses, transportation, health care, education; they need to have a sense that tomorrow is going to be better than today if they have faith and work hard.

Mr. President, it seems to me that our policy, both for economic reasons and for spending reasons, has been to not provide Americans with the hopes that they need. We indeed are a great people. The President spoke to it over and over and over. We are a great people with great economic and moral strength. We have the capacity, it seems to me, to stand 120 years from now and say we did the things necessary to set this Nation on a more prosperous course. But in order to do that we are going to have to consider what it is like for the working men and

women to do it, not just for us here in Congress making now $90,000 a year, but working men and women making $15,000 to $25,000 a year.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. KERREY. Then I will quit.

I yield the floor. Thank you.

Mr. HATCH addressed the Chair.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, I ask unanimous consent for 7 minutes to deliver a message.

The PRESIDING OFFICER. Under the order, Senators are to be given 5 minutes.

Mr. HATCH. I will take the 5 minutes. If I need more, I will ask for it.

The PRESIDING OFFICER. The Senator from Utah is recognized.

CLEAN AIR LEGISLATION

Mr. HATCH. Mr. President, we are here today to discuss one of the most important pieces of legislation this body will likely consider in this decade. This is morning business now but I would like to talk about the clean air legislation before the Senate.

We over the last week or so have been debating the proposals under which we will collectively spend billions of dollars for an important purpose—that is public health.

The costs of this legislation will be borne by the American economy and the American consumer. We must also recognize that we are spending this money for purposes on which many foreign economies are not willing to spend money. For these reasons, we must serve the American public and the American consumer by spending these monies in amounts, and for purposes, which yield public health benefits in the most effective way. We may really be taking positions here that will make us much less competitive in the world.

President Bush's plan for amending and improving the 1970 Clean Air Act is a bold proposal for addressing the problems associated with cleaning our air. The plan is a comprehensive, but balanced effort to bring about significant improvements in the air quality.

The President should be commended for his efforts. His legislation provides a flexible, market-driven approach to cleaning our air. It allows for specific environmental improvements to be implemented while still allowing and encouraging economic growth.

However, I am more than a little concerned about the clean air legislation that has come out of the Environment and Public Works Committee. While the bill addresses many areas that are important to the protection of public health and does so in a cost-effective way, certain provisions of the bill will impose substantial costs on the American economy and the American consumer with little if any impact on overall public health. I am also concerned that certain provisions of the bill are unnecessarily complex. For example, the permitting provisions of the bill as presently drafted may well delay timely achievement of the public health benefits we hope to achieve by passage of this legislation.

Each of us wants clean air. Nobody can be against the goal of having clean air. None of us or any of the people we represent are advocates of polluting the air. I believe we are all committed to protecting the public health and environment and I am certain that we each desire to perserve nature's beauty. However, we must spend the American public's money in a way that best achieves our public health objective. We will be faced with some difficult choices, but I believe as long as we are able to make decisions based on good scientific information and informed discussion rather than emotion, we will be able to craft a bill that recognizes that the environment can be protected without wasting the American consumer's money or unnecessarily burdening the American economy.

I have several concerns with portions of the bill, including the residual risks section of the air toxics title, the impacts on small business, and the effects the acid rain section will have on the area that I come from, the West. I intend to address each of these concerns in more detail over the next several days, and I want to make it clear that I am preparing a number of amendments to address those concerns. However, I also want to make it clear that I stand ready and willing to work with my Senate colleagues and the White House in resolving these important issues.

Mr. President, this is an important bill. I am concerned about whether we can achieve these clean air goals in more efficient and less costly ways. I am concerned about whether this country is going to survive the way the Environment and Public Works Committee has written this bill.

I think if we do not watch it we might find ourselves saddling the American people and the public with unnecessarily and difficult problems without really cleaning up the air any more than the President's program would do.

As I see it, the Environment and Public Works Committee's bill will cost at least double what the President's would on an annual basis and the President's proposal is estimated to cost $19 billion annually. How much more can we saddle the American people, industry, and small business with in order to satisfy some of the demands of those who may be extreme in some of these areas?

I have been told by what may be alarmists in the automobile community that we will not have the American automobile industry if the Environment and Public Works bill passes. I intend to study it enough to make sure that is not so. If it is so, I am going to vote against the bill. I have been told by the steel industry that the way that bill is written by the Environment and Public Works Committee we will actually destroy the coke creation business in this country, and we may destroy our steel capacity and our ability to make steel in this country. That would be catastrophic, especially if we can reach clean air standards without doing so.

I have been told that many, many small businesses are going to have to go out of business because they cannot meet the demands that are made by this bill. I have been told that there is discrimination between regions in this bill. I have been told that many of the provisions that are written by the Environment and Public Works Committee will not work in practice. If these things are true, we had better find them out.

This is not some little insignificant bill that we can pass just because people want to vote for the environment. We have to take into consideration all of these various concerns. I intend to continue my study, and to talk about it over the next number of days and months. Hopefully before we pass anything, all of us will arrive at a consensus that literally the Nation can afford, live with, and that will be in the best interests of everybody.

If we do not, I think we are going to have to regret for the rest of our lives as legislators having rushed to judgment on something like this without the insight and knowledge that we really ought to have.

I hate to say this, but I have chatted with some of the leaders on this bill in private, and they do not know what is in this bill. If they do not know, how in the world are the rest of us who are not on the Environment and Public Works Committee supposed to know it? Because of that, I am in the process of a very important study of this bill and intend to speak on it for a series of discussions.

Hopefully, it will help our colleagues to all look at it a little more carefully than we have up until now.

EXTENSION OF MORNING BUSINESS

Mr. HATCH. I ask unanimous consent, Mr. President, to extend morning business until 4 p.m. under the same conditions as previously ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. I thank the Chair and yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EL SALVADOR

Mr. GORTON. Mr. President, I recently ran across an interesting article in my hometown newspaper, the Seattle Times. The article addresses the problems in El Salvador from a perspective few of us in this distinguished body often have the opportunity to hear. The author, Omar Revelo, is a Salvadoran who now lives in my State.

Mr. Revelo does not take sides in this polarized debate, and from that perspective he shows great insight. He points out what should be obvious to all of us: Salvadorans want neither to be ruled by the Marxist forces of the FMLN, nor do they wish to be ruled by a small and corrupt oligarchy.

Mr. Revelo states that the Salvadoran people yearn for what many of us take for granted in our daily lives: a functioning, independent judicial system that will protect them from abuse by the military, and the opportunity to provide for their families and lead a dignified life.

I firmly believe that with continued assistance from the United States these goals can be achieved in El Salvador.

Mr. President, I ask unanimous consent that the text of Mr. Revelo's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Seattle Times, Jan. 29, 1990]

WHAT THE SALVADORANS LEAST WANT: VICTORY BY LEFTIST GUERRILLAS

(By Omar N. Revelo)

There has been a lot of talk about El Salvador recently: by North Americans telling one another what they think the people of that long-suffering nation want. As a citizen of El Salvador who emigrated to the United States in 1985 but who tried to stay in touch with events in my country, I offer some thoughts as to what the people of my native land want.

I am not from the wealthy classes, although I obtained a college degree in San Salvador. I own no condominium in Miami or anywhere else, and I work two jobs now: stocking shelves in a discount store, delivering pizzas at night.

While my earnings, and a little side income from a home industry (making pinatas), my wife and I are raising four children, one of whom now attends college. It has not been easy, but one of the main reasons we left El Salvador was the far more difficult economic conditions there.

The thing the people of El Salvador want least is a victory by the FMLN guerrillas (the Farabundo Marti National Liberation front).

An early document of the FMLN set out it plan of government. It included proposals to "nationalize the entire banking system . . . foreign trade . . . the refining of petroleum; expropriation of enterprises in industry, trade and services; carry out a deep-going agrarian reform; carry out an urban reform . . ."

In short, the FMLN seems to have in mind the same economic measures that have impoverished the people of the Soviet Union and Eastern Europe, not to mention political measures that many Salvadorans fear would be similar to Fidel Castro's in Cuba.

Salvadorans expect their economic conditions would worsen if the FMLN came to power; and they don't trust talk about human rights, pluralism, or democracy from guerrilla leaders who call themselves Marxists and occasionally fly to Cuba.

The second least popular force in El Salvador is the army.

For generations its officers' behavior has expressed the old Spanish saying: *"Autoridad que no abusa pierde su prestigio."* ("Authority that is not abusive loses respect.") In the absence of a functioning judicial system, this attitude led to gross human-rights violations and repression by the military.

Tying for third place in what the people of El Salvador least want would be: rule by the rich, rule by the U.S. Embassy, or rule by the church.

El Salvador is a working-class country with a large labor force that was once among the most productive in Latin America. The workers want leaders who understand how to make their income grow again, while reducing unemployment and improving the distribution of income.

They do not want leaders who use El Salvador as a laboratory for implementing discredited economic theories; leaders who use public office to line their own pockets and those of their cronies and relatives.

As for the U.S. Embassy, most Salvadorans are uneasy with the large influence the U.S. government exercises in our national affairs. For the time being some are prepared to tolerate the U.S. presence, believing the economy would collapse without it. But most Salvadorans look forward to the day the U.S. rule is much smaller than it is today.

The Roman Catholic Church is distrusted. Many North Americans have heard of the church's vigorous defense of human rights in our country. But the church has political and social ambitions of its own and is not as pluralistic as it might be.

In 1982, when the present Salvadoran constitution was being debated by an elected Assembly, the church tried to insert a clause that would have made Roman Catholicism the official religion.

This unnoticed gesture, supported by the Christian Democratic party, meant that any number of laws, perceived by the church to be contrary to Catholic doctrines, might have been declared unconstitutional. Fortunately, after heated debate, this proposal was overwhelmingly defeated by the Assembly.

The question most Salvadorans ask is, who can deal with these different forces in our society most successfully, while ending the war and bringing the economy out of a 10-year depression?

I'm not sure who this person is, but that is what the country's six elections were about. Our people did not believe Roberto d'Aubuisson was a proper choice; he is too closely identified with the army and policies of brutal repression.

Neither did the people want leaders of the socialist left. A party representing this view, the Democratic Convergence; contested the elections for the first time in 1989 and received less than 4 percent of the vote.

Few believe this poor result was attributable only to intimidation, fraud, or insufficient opportunities for the Convergence to campaign and organize.

What DO the people of El Salvador want?

First, they want a truly professional judiciary, independent of the army and executive branch, and egalitarian in its treatment of rich and poor, both rural campesinos and urban abreros, regardless of their political views or personal affiliations.

Without judicial reform, it is impossible to see how El Salvador can emerge from decades of injustice, abuse of human rights, and deep social division.

Second, they want jobs.

This means creating more industrial jobs, for employment growth in the long run is in the cities, in services and manufacturing, and not on the farm. But industry cannot grow without peace. For this, Salvadorans must first stop dealing with one another through the barrel of a gun.

The PRESIDING OFFICER. The Senator from Vermont.

EXTENSION OF MORNING BUSINESS

Mr. LEAHY. Mr. President, I have been asked to ask unanimous consent for the time for morning business be extended to 4:30.

The PRESIDING OFFICER. Without objection, it is so ordered.

LANDALE EDSON

Mr. LEAHY. Mr. President, Landale and Isabel Edson are two long-time and very special friends of the Leahys. They have known me, literally, all my life, and I have the fondest of memories of growing up with them and their son, George, and daughters, Carol and Jean. Landale and my father spent decades together as active leaders in the city of Montpelier and with the Montpelier Kiwanis Club. During the years my father was alive, the Edsons and my parents were always close and good friends, and I know my mother cherishes the friendship with them today.

As a boy growing up in Montpelier, and later as an adult, I have always had the highest respect and greatest affection for the Edsons, and have always considered Landale a good and special friend. Because of that I was very pleased to see an article recently in the Central Vermont Senior Citizen News by Debbie Strauss profiling him, and I ask unanimous consent to print that in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

G. LANDALE EDSON: WORKING HARD AT STAYING BUSY

(By Debbi Strauss)

Landale Edson describes himself as one of those "rare individuals" who is a native son of Montpelier and has never left the place. That is really the only fact that Edson thinks makes him stand out a bit in a crowd. In his humbleness, he would never admit that he is a shining star and guiding force for others. But he is.

Born on First Ave., Edson has switched homes between there, North St. and Liberty St. about five times, but has never had the desire to roam from his native city.

Even during World War II Edson served his country in Montpelier, running the C.H. Cross Baking Co., whose headquarters were where the City Center now stands. Edson's father bought the business in 1908 and in 1932, Edson entered the business, taking charge in 1942, when his father passed away.

"The draft board thought it was more important for me to feed the natives," he explains, adding that it was difficult at that time to get the machinery and materials he needed. There was a manpower shortage, as well.

"Anything that breathed, we hired," Edson states.

Over the years, Edson watched his company expand delivery from a 25–30 mile radius to eventually more than four states. He also began making products under the Grand Union label, as well as labels for other food chains.

After spending 45 years in the business of providing bread, rolls, donuts, cakes, English muffins, pastries and Cross crackers (now called Vermont crackers), Edson retired. Resting, however, is not in Edson's nature.

"I'm as busy now as if I was working for a living," laughs Edson. The activities that Edson finds to keep him busy are what make him an exceptional person.

First of all the names G. Landale Edson and the Kiwanis Club are practically synonymous. Edson joined the club in 1939, six months after its inception and served as its president in 1949. From 1985–86, he was the Lieutenant Governor of the Kiwanis Club, which covered an area of six different clubs.

He has also written the club's weekly bulletin for the past 30 years.

As a reward for all his efforts, although that is the last thing Edson sought, he was given a lifetime membership to the Kiwanis Club. These awards are only given to those members who have been in the service club for a long time and have been in several offices locally and regionally. Edson is the only member of his local club to have received this award.

Thinking he was going to have a relaxing evening attending the induction of new officers. Edson was "was shocked" when he saw both his son and daughter, who live in New Hampshire, as well as his daughter from California step into the room. Testimonials were then given in honor of all Edson's efforts as a member of the Kiwanis Club.

Chuck Haynes, who gave one of these testimonials thinks of Edson as a father figure.

"He guides and nudges us in the right direction without being overbearing, but then, he'll step back and let you go on your own. He's very sensitive to other people's situations," Haynes notes.

"He's always interested in everybody's business, but not in an obtrusive way," says Haynes. "He just sort of cares about people and has a genuine, sincere interest in them."

I have to mention at this point that while I visited with Edson, he probably learned as much about my life as I did about his. In the same light, it was not "nosy" conversation, but that of a person who had an interest in others. In the same way that Edson reminded Haynes of a father figure, he reminded me of my father, who had that same gift.

Described by Haynes as "just one of those magnetic personalities who always have done so darn much," Edson is well noted for keeping the club's archives "not because he was asked to, but because he felt it was important."

Another activity that takes up a portion of Edson's schedule is his involvement in the Bethany Church extended ministry, which helps disabled individuals. The group offers rides, delivers meals, and visits those who are unable to go outside. Besides the extended ministry, Edson has served on many of the church's committees.

He also was involved with Montpelier On the Move and the Montpelier Area Development Association, which encouraged National Life of Vermont to remain in Montpelier.

Probably above everything else, Edson is a family man.

"I've got the world's greatest family," he insists. He and his wife, Isabel, have been married for 53 years. They have one son, George; two daughters, Carol and Jean; two sons-in-law, Frank and Herbert; a daughter-in-law, Jill, 10 grandchildren, and one great-grandson.

"We gather every summer for a vacation at Lake Sunapee (N.H.)," Isabel says, adding that even her family in California makes the trip.

Edson's sister, who has recently become blind, also lives in Montpelier. He visits her daily and helps her adjust to her new situation.

Edson seems to make a business out of working hard to stay busy.

"I do the same thing as I did in business," he declares, explaining further, "I make a list of things that have to be done and I never get to the bottom of it." He plans to continue his agenda for as long as possible.

"I believe we're on the earth for more than just to indulge ourselves. I feel we should help other people," he states, adding that he remembers the words of a minister, "Don't give until it hurts. Give until it feels good."

RENEWAL

Mr. LEAHY. Mr. President, Father Wendell Searles is the pastor of St. Augustine's Church in Montpelier, the parish where I grew up and where my mother still attends mass today. I thought Father Searles wrote a most interesting piece that I would like to share with my colleagues.

Mr. President, I ask unanimous consent that the article be printed in the RECORD in its entirety.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Burlington (VT) Free Press, Jan. 6, 1990]

NEW YEAR OFFERS CHANCE FOR RENEWAL

(By Rev. Wendell H. Searles)

In Roman mythology, Janus is a god who has two faces that look in opposite directions. One face looks into the past and the other looks into the future. At some point in the history of calendar-making the first month of the year was named for the god Janus. And so the month of January, the beginning of a new year, is a time to look back and a time to look forward.

In recent weeks, the media have spent great time and energy in assessing not only the year just ended but also a decade. The '80's have been scrutinized and analyzed and summarized and all agree that we have lived through a time that can be described as historic in the best and most accurate sense of the word.

For most of us our year-end reflection will deal with matters on a smaller scale. We deal with things that have gone on in our personal lives, not because we are not interested in the global picture, but because we are called first to manage our own lives, not the world.

A review of the year might well lead us first to thoughts of thanksgiving. Every day could well be thanksgiving day but in a particular way the end of a year is a time to be grateful what has been. Think of the blessings that have been given to you: health, education, employment, freedom, faith, family and friends. The list could go on and on. How profoundly we ought to be.

Looking back also leads us to a desire to right the wrongs, correct the errors, erase the mistakes, and seek forgiveness of the sins. We all make mistakes. We fail. We fall. We sin. The life of faith is an continuing effort to rise above our human weaknesses and one of the greatest of gifts given us is the opportunity to leave past mistakes behind because of a God whose mercy is without limit.

And so we look back with gratitude for the good that has been and with trust in God's mercy for what has been wrong. This sets the stage for a new beginning. We proceed to look forward.

Louise Fletcher has an interesting little piece on new beginnings:

"I wish that there were some wonderful place called The Land of Beginning Again, where all our mistakes and all our heartaches and all of our poor selfish grief could be dropped like a shabby old coat at the door and never be put on again."

A new year invites us into that Land of Beginning Again.

We deal with this new beginning while still celebrating the Christmas feast and appropriately so because it is Christmas that makes it possible. Jesus comes saying, "You can begin again. You can come to know the life-enriching presence of God. Your life and your world are graced and visited by your God. I come as your savior. I am Emmanuel, which means that God is with you. I forgive and wipe away your past mistakes and call you to the land of beginning again."

With confidence and trust, then, we look forward to a new year of grace asking this blessing: May God grant us grace and every blessing and keep us safe throughout the coming year. May God grant us unwavering faith, constant hope and love that endures to the end. May God hear this prayer and help us to make this new year the land of beginning again.

THE PRESIDENT'S STATE OF THE UNION MESSAGE

Mr. LEAHY. Mr. President, I might just note I do not see any Senators seeking recognition at the moment. So, if I am not intruding on any other Senator's time, I have a couple of comments about last night's State of the Union Message.

I was rather pleased with it. I have spent 16 years here, and thus have heard 16 State of the Union Messages. Some I have enjoyed. For some I wished, perhaps, I was elsewhere. Last night I enjoyed it.

What I enjoyed was that I felt it was a State of the Union Message designed to bring people together rather than to divide them. I hope the President noted the strong bipartisan support for the vast bulk of what he laid out as themes.

I hope we all realize now the mark of leadership of the President, the mark of leadership of the Congress. This is how we work out the details of these broad themes.

None of us could question, for example, that we need to improve the educational system of the United States. It is abysmal. To think here we are, a wealthy nation like ours that has always prided itself as being the first of the first world nations—to find ourselves so far behind the European nations, Japan and others, in so many basic areas of languages and math and science and literacy.

We have to go back and develop some idea how far we are willing to work in the educational system, what we are willing to demand of our children. Do we want a homogeneous, lowest common denominator system or do we want to make it possible for children to excel in school, and to set the incentives and the stimulus to get them to do just that?

But that is expensive and it will require some very significant details to be worked out. I hope we will work them out. I see so much we can improve on in our school systems and our whole future in this country will be better.

I read an article in the New York Times the other day where somebody called one of the zoning offices in New York City. She had a particular issue involving the building she was in. Apparently the zoning code was different, whether the building was built after 1960 or before 1960. They asked the caller when was the building built.

She answered, "Well, it was the immediate postwar period."

They said, "No, but, when, because it makes a difference whether it was before or after 1960."

She said, "Well, it was built within a couple of years after World War II."

Again the person answering said, "Yes, but was that before or after 1960?"

The New York Times found this interesting enough to run a whole column on it. But I daresay that there are some who might read that and try to figure out what the point was. We have lost ground in history. We do not teach geography. We do not teach language. In fact many would argue we do a poor job of teaching our own mother tongue in schools.

We have given up on spending money in innovation and technology and research and development. Instead, we make overnight billionaires of youngsters working on Wall Street selling junk bonds for leveraged buyouts of everything from long-term department stores, which go belly up within a year after that, to the merger of airlines which spend so much money on debt reduction they cannot keep their planes flying adequately. They cannot keep their fares within reach of the average person. And it raises majority safety isues, and on and on.

For those who may be reading this, I am now 49 years old, so it was not that long ago, but when I grew up we lived in a generation where we thought we should make it better for the next generation. Each generation could look forward to something better: more accomplishments, better education, better jobs, more challenges, and so on.

I daresay, you might go around this country and ask if that is still so. Do young people who remember fondly growing up in their parent's homes even think they are going to afford a similar home themselves? Or give to their children the education which their parents were able to give them? I think not.

So while I completely concur with that the President said last night in goals for this country, I suggest for all of us, again, the mark of leadership is going to be how we work out the details in reaching those goals.

We have done and accomplished one very good thing, Mr. President. That is, President Bush has laid out goals that most, if not all of us, would agree on, in almost every instance. Let us build on that. Let us use the leadership to work out the details.

I am concerned, Mr. President, that if we do not, we come into the next century, just under 10 years from now, a greatly changed nation. A nation greatly changed from the one you and I knew as we were growing up and lacking one very significant thing, Mr. President: that sense of hope, that sense of always moving forward, that sense of always accomplishing something greater. I would hate to think of my children going into the next century or their children going into the next century without the same sense of hope, ambition, and accomplishment we shared when we were growing up.

Mr. President, I urge that all of us sit down and think: If we agree on the goals, how can we agree on the means? I urge the President and others to understand that is the mark of their leadership and a legacy to the office they hold. The President and all us have to show the leadership to attain those goals.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. GRAHAM). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HARKIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGE OF THE FLOOR

Mr. HARKIN. Mr. President, I ask unanimous consent that Mary Richardson, who is on my staff, be permitted to come on the floor during such time as I am introducing a bill and making comments thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, I suggest the absence of quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Senator from Iowa is recognized.

Mr. HARKIN. I thank the Chair.

(The remarks of Mr. HARKIN pertaining to the introduction of S. 2056 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

EXTENSION OF MORNING BUSINESS

Mr. HARKIN. Mr. President, I ask unanimous consent to extend morning business until 5 p.m. under the same conditions as previously ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

COL. JAMES N. ROWE: A HERO IS HONORED

Mr. HELMS. Mr. President, there have been suggestions that our country no longer produces heroes, a notion which I reject. Our history is filled with gallant deeds of men and women who probably never thought of themselves as heroes. Yet, monuments have been built to their memories; we have recorded their names in marble, bronze, and in our history books.

There are no fewer American heroes today. We may have to look a little harder to single them out because it is the nature of true heroes that they never herald their own deeds.

Mr. President, a hero will be honored on February 8 in North Carolina.

39-059 O-91-34 (Pt. 1)

Bob Cox and the Vietnam veterans he leads will dedicate a building at Fort Bragg in honor of Col. James Nick Rowe who served in Vietnam, where he was a prisoner of war for 5 years, 1963–68. He escaped and instead of retiring to the safety of his home, he remained in the Army and continued to serve his country.

Colonel Rowe, a graduate of West Point, was murdered in the Philippines last year, while in the service of his country.

Colonel Rowe was an author. His book, "Five Years to Freedom," is an inspiration and should be read by all who love America.

It is fitting that his Vietnam comrades are honoring his memory with the dedication of this structure at Fort Bragg.

Colonel Rowe was buried in Arlington National Cemetery and his widow, Mrs. Susan Whitford Rowe, lives in Durham. She too is a hero for having sacrificed as she has.

Mr. President, on May 3 of last year, I spoke of Colonel Rowe's tragic death. I ask unanimous consent that those remarks be printed again in the RECORD at the conclusion of my remarks today.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COL. JAMES N. ROWE: AN AMERICAN HERO LOST

Mr. HELMS. Mr. President, on May 1, Col. James N. "Nick" Rowe was buried in Arlington National Cemetery, the victim of a cold-blooded murder by Communist terrorists while driving to work at the Joint Military Advisory Group Headquarters in Manila.

Colonel Rowe had been sent to the Philippines to do what he had done so well throughout his life, advising free people how to defend themselves against those intent on destroying their liberties.

Mr. President, Nick Rowe was an American hero. After being sent to Vietnam with the Special Forces in 1963, he was captured by the Vietcong and left to rot in a cage for 5 years. He escaped execution only by pretending he was an engineer. However, an American "peace group" informed the North Vietnamese that Nick was a member of the Special Forces, which immediately marked him for death.

The Vietcong planned to shoot Nick Rowe, but he foiled their plans. At a moment when his executioners were briefly distracted by American helicopter gunships, he killed one of his guards and made a dash for the jungle. An Army chopper saw a man in VC pajamas running through the woods and locked him on target. When the man turned around the gunners noticed that he had a long beard and was shouting in English. The helicopter immediately landed and carried Nick Rowe back to freedom.

Mr. President, Nick Rowe was the only American officer to escape from the clutches of the Vietcong in South Vietnam.

In the years following his escape, Nick Rowe had many roles. He was an artillery officer, intelligence officer, and spokesman for "Operation Homecoming," the program for returning prisoners of war. He even retired from the Army for 7 years. He wrote several books and entered politics in his home State of Texas.

In 1981, Colonel Rowe returned to the Army as a special instructor at the Special Forces Schools at Fort Bragg. Prior to his last assignment in the Philippines, he commanded the 1st Special Warfare Training Battalion at the John F. Kennedy School for Special Warfare. While stationed in North Carolina, he worked tirelessly on behalf of Vietnam veterans and MIA's across the State.

Mr. President, Colonel Rowe died in the service of his country. This brief statement cannot do justice to his life. But I wanted to note the passing of a true patriot, a man of ideals and a dedicated servant of free men everywhere. The greatest tribute that can be paid to Nick Rowe would be for the rest of us to continue the fight against Communist aggression in the Philippines, in Nicaragua, in southern Africa, and anywhere tyranny prevails. A man of Nick Rowe's stamp will be greatly missed.

MIDDLE EAST MILITARY BALANCE

Mr. PRESSLER. Mr. President, the prospects for a lasting peace in the Middle East are uncertain. Although from time to time diplomatic pronouncements suggest that a resolution of the outstanding differences between Israel and its Arab neighbors may be at hand, in each such instance over the past several years those optimistic speculations have not borne fruit. I share the disappointment of most Americans and Israelis that this has been the case.

At the present juncture of Middle East diplomacy, what most concerns me is the eroding military balance in that vital region of the world. The plain fact is this: Israel is gradually losing ground in its efforts to stay on a level military playing field with its neighbors. This is an unacceptable and dangerous situation. There are several reasons why this erosion has occurred.

First, although United States aid to Israel remains high, inflation has eroded the value of that aid by more than $400 million since 1986. In addition, 40 percent of that aid is spent by Israel to repay its debts to the United States. This amounts to $1.2 billion this year. The practical effect of these factors is that Israel has less to spend on defense out of the United States assistance it receives. Incidentally, $2.6 billion, 87 percent, or current United States aid to Israel comes back to the United States in the form of debt repayments and military purchases. This creates at least 60,000 American jobs.

Second, Israel's Arab neighbors—many of whom are wealthy from oil export revenues, as Israel is not—continue to purchase foreign arms at a record rate. These purchases contribute greatly to the eroding Middle East military balance. Iran, Iraq, Libya, and Syria have acquired ballistic missile and chemical warhead capabilities. The Arab nations now own 30 percent more fighter aircraft than NATO, and Arab air forces outnumber Israel's by a 4-to-1 ratio. In addition, the tanks of Arab armies are far more modern than those used against Israel in the past, and Arab tanks at 17,000 are equivalent in number to NATO's tanks—a 4.5-to-1 ratio over Israeli tanks. In the past 16 years, the Arab nations most directly involved in the Arab-Israeli conflict have bought more than $170 billion in foreign weapons.

Third, the Middle East military balance continues to be afflicted by terrorism. Last year alone, 13 terrorist attacks were committed by Fatah inside Israel's pre-1967 borders. PLO-affiliated organizations conducted or attempted 17 border attacks and infiltrations last year. In other words, the military threat to Israel is more than just a theoretical possibility.

For these reasons, Mr. President, as well as the fact that democratic Israel is an essential strategic partner of the United States, it is my view that United States policy must avoid steps that might contribute to any further erosion of the Middle East military balance. Such steps could hurt not only Israel, but also United States fundamental interests in the Middle East region and elsewhere.

Mr. HARKIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GRAHAM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF MORNING BUSINESS

Mr. GRAHAM. Mr. President, I understand that the time for morning business has been extended until the hour of 5 p.m. I ask unanimous consent that morning business be extended until 5:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAHAM. Mr. President, I ask unanimous consent that I be allowed to speak for such time as is required during morning business.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Florida is recognized.

NICARAGUAN ELECTIONS

Mr. GRAHAM. Mr. President, on February 25, less than 4 weeks from today, Nicaraguans will vote in elections that could lead to a legitimate government and eventual reconciliation and peace in that country which has known war for too many years.

As much as we all would welcome that outcome, there is troubling evi-

dence that raises serious questions about the fairness of the electoral process now underway.

Too remain silent in the face of this evidence is to undermine the eventual credibility of the election. If the incoming government lacks legitimacy because of a fatally flawed election, the prospects for reconciliation and the prospects for peace will be that much farther off. That is something which none of us want to see.

That is why it is important that the United States and those who share our democratic ideals speak up now, and speak up forcefully. That includes the observers who have been in Nicaragua monitoring the election process.

If we are to do so intelligently and effectively, we must pay attention to what is going on. And not only on election day. Flawless voting on the day of the election by no means assures a free and fair election. The campaign leading up to the election is of critical importance.

I am concerned that because of momentous changes in Eastern Europe and the events recently in Panama, our attention has wavered. Nicaragua needs all the attention it can get. We will not soon have another opportunity such as that which is going to be available on February 25.

This impression, an impression of Nicaragua which has lost its position in our sense of priorities and concerns, is an impression I came away with after visiting Nicaragua in December. Since then, my views have been reinforced by the many troubling actions taken by the Sandinista government.

Mr. President, the campaign in Nicaragua has been replete with incidents of intimidation of the opposition.

Outright violent intimidation was the rule earlier in the campaign. The week before we arrived, on December 10 at a rally in Masatepe, a bipartisan delegation led by the Center for Democracy witnessed an attack by Sandinista-controlled young toughs known as Turbas on the supporters of UNO—the opposition coalition. Several people were injured seriously. At least one person died.

Since December 10, the Sandinistas have stepped up security at political rallies. Physical intimidation, however, continues. As recently as January 16, turbas threw rocks at the house of UNO's television producer, Carlos Briceno.

Earlier in the day, Sandinista police tried to arrest Briceno on the pretext that the car he was driving was similar to one that had been stolen. The police departed when Briceno's wife went to call the press.

Other types of intimidation are rife. The Organization of American States, in its most recent election report issued January 10, cites the threat of job loss, threatening anonymous phones calls and notes, damage to private property, and outright death threats.

Nearly 200 opposition candidates have resigned—97 from UNO, according to the OAS. The OAS expressed concern about the hidden causes. I hope that the OAS will vigorously investigate these causes.

Intimidation has been but one component of a general pattern of harassment. The Sandinistas also have prevented vital assistance appropriated by the Congress from reaching the democratic opposition.

According to the National Democratic and Republican Institutes, the two groups responsible for managing the program, the delaying tactics of the Nicaraguan authorities contradict earlier assurances that the institutes would be able to operate without such delays.

The result is that the Institute for Electoral Training and Promotion [IPCE], a nonpartisan civic organization charged with promoting election participation, has received only $233,000 of the $1.5 million it was due. And that $233,000 of the $1.5 million has only arrived within the last 48 hours.

UNO, the opposition party, has received just $228,000 from the $1.8 million allotted to it. Most of the balance has been spent on equipment, much of it badly needed vehicles. Sandinista custom officials reportedly are expected to release them today. I hope they do.

While the Sandinistas delay, the Sandinista newspaper Barricada tries to blame delays on the Washington bureaucracy. The paper's explanation included a totally outrageous and unacceptable anti-Semitic attack.

According to the National Democratic Institute, the author, Roberto Larios attributed the tight control of the program to Congress' traditional "Jewish style" of operating.

The article continued with repeated references to Ken Wollack, Mark Feierstein, NDI's project manager in Managua, and National Endowment for Democracy President Carl Gershman.

Although Barricada has since distanced itself from the anti-Semitic references, and Nicaraguan Foreign Minister D'Escoto wrote a critial letter to the paper, which was published, the unacceptability of these remarks is hardly diminished.

In the face of these gratuitous attacks and some unbelievable bureaucratic hurdles, the National Democratic and National Republican Institutes have performed a great service. They are to be commended.

Former President Carter returned last weekend from Managua with assurances from the Sandinistas that they would investigate and halt any intimidation by their supporters. The Sandinistas also said they would take steps to assure immediate release of the balance of the funds due to UNO and IPCE.

I hope that happens. But, Mr. President, the hour is late. Much damage already has been done to the campaign of the democratic opposition.

I sincerely hope in the few weeks remaining before the election the Sandinistas take the comprehensive corrective action that is needed to assure independent elections, that is needed to convince the international community that these elections deserve their credibility.

Nicaragua is at a critical juncture. Unless a new government is legitimately elected through credible democratic elections, reconciliation and peace are going to remain that much further out of reach.

If the Sandinistas should proclaim themselves the victor in an election which lacks credibility in the family of democrtatic nations, Nicaragua will endure further insolation and pariah status. I implore the Sandinistas to think very clearly about what kind of election they want to have and what kind of a future will Nicaraguans live in after February 25.

I thank the Chair.

FREE AND FAIR ELECTIONS IN NICARAGUA

Mr. McCAIN. Mr. President, I should like to thank my colleague and friend from Florida, Senator GRAHAM, who not only has an abiding interest in this issue but the depth of his knowledge and expertise and his commitment to freedom not only in Nicaragua but in El Salvador and throughout Central America adds enormously to this body.

I pay very close attention to his words, and on the occasions when I have traveled with him, I think he is a credible and, indeed, outstanding spokesperson for the principles we believe in in this body, and for that I thank him.

I know that he clearly reflects the desire of the people of his State to see freedom and democracy triumph throughout Latin America, for which the people in Florida obviously have a special affinity.

Mr. President, I want to voice my concerns about the Nicaraguan election scheduled for February 25. I fear the campaign has thus far been sufficiently corrupted by months of Sandinista abuses as to produce grave doubt about the fairness of this election, no matter how scrupulously correct procedures on election day are observed.

Mr. President, just today I found out that there has been an in-depth study conducted at the request of President Oscar Arias by a former President of Costa Rica, which has reached some rather disturbing conclusions concern-

ing the Nicaraguan voter registration process that took place on the four Sundays last October.

First of all, Mr. President, why would any regime that claims to support a free and fair election restrict voter registration to four Sundays several months before an election? We would never accept such procedures in the United States. Now this additional evidence provided by the former President of Costa Rica indicates that there were some extremely disturbing abuses taking place during those four Sundays. Busloads of soldiers, in fact reminiscent to some degree of the election in Panama, were taken from one polling place to another and registered to vote. Consequently, the authenticity of those voter registration rolls is now in question.

I am hopeful that some of this money that is finally—and I emphasize finally—finding its way to the opposition in Nicaragua, will be used to determine the integrity of these registered voter lists.

The only requirement for voter registration during those four Sundays was the word of two witnesses that that person was indeed a resident of the polling area where he registered. So it raises a serious question as to whether, very frankly, the election has already been corrupted by the Sandinista government during the voter registration period.

Election-related violence condoned, provoked, and ordered by the Sandinistas; the continuous harassment of the opposition, and the intimidation of their supporters have so adversely influenced the process that it is difficult to imagine how the election, if it were held today, could possibly be called fair.

Nevertheless, I do not believe that those abuses of the election process necessarily guarantee that Mrs. Chamorro and UNO will not win this election.

I am discouraged, of course, by the many instances of voter intimidation and heavyhanded attempts to undermine UNO's campaign, but I have confidence in the people of Nicaragua. More than a decade of Sandinista rule has left the Nicaraguan economy in ruins and Nicaraguans forlorn as their dreams of freedom and a better life are upset by the intolerance of their Sandinista rulers. Although I suspect the FSLN's distorted campaign and strongarm tactics have had their effect, I am hopeful the indignation of Nicaraguans and their determination to fulfill the promise of their revolution will compel them to risk Sandinista displeasure and vote for Mrs. Chamorro.

When I refer to Sandinista election abuses, I include under that heading use of the army and State security to intimidate and physically abuse UNO activists and supporters. I have in mind a number of specific instances of abuse like:

The incident near Pantasma on November 26, when Nicaraguan soldiers, after beating and detaining two UNO supporters, were ordered to open fire on UNO demonstrators;

Or the beating of UNO activist Francisco Mendoza by soldiers who after the beating, fired several shots at him;

Or the illegal arrests of UNO candidates Agustin Javier Sevilla and Miguel Angel Manzanarez.

Many observers have always assumed that the Sandinistas would use the Nicaraguan Army, which functions as the muscle of the FSLN, to subvert the election process from registration through election day. I am surprised by how frequently those observers are proved correct. Of course, I am also gravely concerned about the capabilities of the so-called turbas to disrupt the campaign. These Sandinista versions of Noriega's dignity battalions show no restraint in their determination to subvert the election:

On November 12, at an UNO rally, these young thugs attacked and stoned townspeople attending the rally. Four U.S. Congressmen witnessed the attack and were later shown threatening notes meant to discourage attendance at the rally.

On November 26, turbas attacked UNO Vice Presidential candidate, Virgilio Godoy with firebombs.

In Esquipulas, UNO activist Marcos Sanchez was shot and wounded by a Sandinista hoodlum.

On December 3 in Cofradia, turbas used bricks, clubs, pistols, and AK-47's against UNO supporters gathered in a private home. Sandinista police, called to the scene, helped the turbas to disrupt the gathering and a Sandinista-controlled health clinic refused to treat the wounded.

And on December 10, turbas attacked UNO supporters at a rally in Masatepe with nailed boards and machetes. Several people were seriously wounded and one person was murdered. A bipartisan delegation from the United States witnessed the violence and identified the Sandinistas as the perpetrators of the atrocity. Police refused to intervene in the massacre until repeatedly urged to do so by the delegation.

Given that these are just a few of the preferred campaign tactics that the Sandinistas have employed in this election, I am astonished by accusations that UNO and the U.S. Government have exaggerated Sandinista subversion of the election. I find it difficult to imagine how one can exaggerate the murder by machete of an opposition supporter. The instances of Sandinista intimidation and abuse are numerous and well documented.

Given the Sandinistas' reliance on violence, I find equally astonishing the campaign smear tactics that the FSLN employ as they seek to link UNO with acts of brutality and violence. Linking UNO to the National Guard or to criminal acts is more than heavyhanded slander. It is ludicrous and ironic, considering how readily the Sandinistas turn to violence to influence the outcome of the election.

We are, of course, frequently treated to Sandinista denials that they seek to subvert this election. And yet they are determined to limit the number of delegations from this country that could observe their campaign behavior. I have in mind specifically their refusal to admit into Nicaragua the Election Commission appointed by President Bush.

I find it hard to understand how the Sandinistas can expect international approval of the election if they seek to hide FSLN campaign practices from the analyses of an objective, bipartisan delegation of U.S. Members of Congress who only seek to ensure the integrity of this election.

Finally, I would like to add a word of advice to those election observers who have been allowed into Nicaragua. In their admirable desire to be fair and balanced witnesses, they should not discount the observable realities of the Nicaraguan political scene. Observers cannot discharge their responsibilities by forgetting that the Sandinistas are practiced liars who are determined to remain in power. We should appreciate that only one party to the election does not seek office as an end in itself but as a means to further promote democracy in Nicaragua. All observers are well advised to pay more attention to everyone's views rather than simply those of the Sandinistas.

Mr. President, I am not without hope. I believe that they can still have a free and fair election in Nicaragua. I am deeply disturbed about the information that we have about voter registration—the physical harassment and violent abuse, and the restriction of United States funds provided in perfect compliance with Nicaraguan law. But I believe in the Nicaraguan people. Their total dissatisfaction with the Commandantes who have ruined their economy and repressed their political rights will give them courage to participate in a free and fair election.

I believe it is our responsibility to do what we can as a nation that has supported freedom and democracy throughout the world to see that the people of this tiny nation also have that opportunity.

Mr. President, I yield the balance of my time.

Mr. ROBB addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. ROBB. Mr. President, I rise today to join my colleagues in saying a few words about the February 25 elections in Nicaragua.

In 24 days, the Nicaraguan people are going to have the opportunity to vote in elections. For more than a decade this country has been wracked by conflict, and the people have been denied their right of self-determination, fighting first for democracy against a dictatorship of the right, now fighting for democracy against a dictatorship of the left.

Free and fair elections are the best hope for bringing reconciliation to this country, and to enable the people of Nicaragua to move on and confront the pressing needs of economic development and reconstruction.

I am troubled, however, by irregularities in the electoral process. It is not enough that the people will be able to vote on election day. This, in itself, will not make a truly free election.

Before casting their votes, the people must be able to campaign vigorously, openly, without any fear of intimidation. If they are denied this right, the government that emerges out of the election will be perceived to lack legitimacy. As a result, Nicaragua's troubles could well be perpetuated. The process of normalizing United States-Nicaraguan relations will be hindered.

So I join my colleagues today in calling on the Sandinistas to end their acts of intimidation, and to let their people truly exercise self-determination, as others are finally doing in so many other corners around the world.

Consider one troubling report. The Organization of American States in its January 10 election report speaks of a pattern of intimidation. The threat of job loss, damage to individual property, even death, have led to massive resignation of opposition candidates—191 oppositon candidates all-told. The OAS speaks of "hidden causes." Other election observation groups have been blunter, concluding that the resignations occurred under pressure. This is but one example of the kind of irregularity that could tarnish a free election.

It is no secret that outright physical intimidation has been employed by the Sandinistas. The Center for Democracy's bipartisan election monitoring delegation witnessed one such event. On December 10, they saw the Turbas Divinas, the Sandinista gangs, attack UNO supporters at a rally. There was one death, and numerous injuries. Many other incidents have been reported by reliable sources.

Most recently, the Puebla Institute, a lay Roman Catholic human rights group, issued a January 25 report documenting flaws in the election process that threaten to undermine the legitimacy of the election. This report speaks of intimidation, lack of safeguards to ensure a clean vote, and an uneven playing field.

On this final point, the Sandinistas have prevented assistance from reaching the democratic opposition that we in this Congress appropriated to aid the election process.

UNO, and the Institute for Electoral Training and Promotion, have reportedly received only $200,000 of the approved $3.3 million that was slated to reach them, and this was released by the Sandinista authorities only last week. It is little wonder that the Sandinistas, who control the instruments of the state, have outspent UNO by at least 5 to 1.

Absent a level playing field, we will not witness a true expression of the will of the Nicaraguan people.

Many in this body already know that Members of Congress have been unable to witness the election process. I was one of many in the Congress whose visa was turned down.

Mr. President, this is an important moment in Nicaraguan history. It is reported that political prisoners are going to be released. This is a helpful step, but much damage to the process has already been done, and time is running out.

Nicaragua has the opportunity to move on to a new chapter, one marked by development and not civil war, and characterized by membership in the community of democratic nations rather than by international isolation. But to do so, the Sandinistas must take every step to correct the pattern of electoral violations that may deny the people of Nicaragua their just due.

In the remaining weeks, I hope that we can witness the open political process that all of us, on both sides of the aisle, and the Nicaraguan people themselves, have so long called for.

APPOINTMENT BY THE PRESIDING OFFICER

The PRESIDING OFFICER. The Chair, pursuant to Senate Resolution 382, 90th Congress, as amended by Public Law 100-696, announces that the following Senators, pursuant to the positions that they hold, are members of the Senate Commission on Art for the 101st Congress: the Senator from Maine [Mr. MITCHELL], Chairman; the Senator from Kansas [Mr. DOLE], Vice Chairman; the Senator from West Virginia [Mr. BYRD]; the Senator from Kentucky [Mr. FORD]; and the Senator from Alaska [Mr. STEVENS].

Mr. President, observing no other Senator requesting the floor, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BRYAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRYAN. Mr. President, I ask unanimous consent for time to proceed as if in morning business for a period of time not to exceed 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Nevada is recognized.

Mr. BRYAN. I thank the Chair.

(The remarks of Mr. BRYAN pertaining to the introduction of S. 2057 and S. 2058 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. BRYAN. Mr. President, if there is no one else who seeks recognition on the floor at this time, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. D'AMATO. Mr. President, is it permissible for the Senator from New York to proceed as if in morning business?

The PRESIDING OFFICER. The Senator may proceed.

A BOLD MOVE BY PRESIDENT BUSH

Mr. D'AMATO. Mr. President, last evening we were gathered together in the Congress and as a nation to hear our President. Various interpretations were made by Members of the Congress and by the media as to the content of our President's State of the Union Address.

I would like to just make an observation as it relates to what I feel was a bold move by our President. President Bush's call for a reduction of troop strength in central Europe to 195,000 on both sides was a bold step. It is one that sets the stage and it is important.

It is important for us to come to a realization and a recognition of whether or not the Soviets and Mikhail Gorbachev are capable of bringing about this kind of transformation.

We have heard a lot of talk about the peace dividend and the savings, hopefully, that we can make as it relates to the reduction of armaments. I hope there will be a peace dividend. But we have to have the courage to recognize whether or not it is realistic or just our hope, a dream.

I think by the President putting forth a proposal by which we can really begin to bring troops home, reduce costs, and give the Soviets that opportunity so more than both our nations can prosper, can indeed be a dividend, a dividend in the investment in mankind, an investment to see to it

that future generations will be given the opportunity to live in freedom.

I think it is time for President Gorbachev to join with President Bush not just in rhetoric, but in a timetable to complete this withdrawal. Indeed, I, for one, have heard a lot of rhetoric and people are hopeful that maybe the Soviet Union's best chance is Mr. Gorbachev's success, and it may be that it is ours.

But I think that President Bush struck the right note in saying let us bring home the troops, let us reduce the levels, let us see whether or not there is in reality the opportunity for that peace dividend.

We have people spending it. We need more for education. We need more as it relates to the battle against the scourge of drug addiction. We need to reduce our expenditures so we can get the deficit down. My God, we have got great challenges as it relates to the environment and how do we protect it.

So Mr. President, I hope that a check and a dividend will be in the mail next month or next year. And when we open that envelope, it will be a dividend that we can utilize for the various purposes, laudatory purposes, that so many of my colleagues and so many of mainstream America hope for.

That brings me to another point. I think all too often there are many who underestimate George Bush. Certainly Manuel Noriega did. He did not recognize that our President would take up the challenge in the bold and forthright way that he did.

I think George Bush understands the mainstream of America and his challenge was put forth to attempt to provide that peace dividend, which can only come about by action. I have not seen the Soviets to date take one tank or one division out of Poland, out of Czechoslovakia, out of Hungary. We hope that it will come to pass. I think our President's action is a bold one that will create the stimulation to make that possible.

I have to make this observation. I certainly hope that President Gorbachev is sincere in his rhetoric, in his proposals, and that he will have the ability and the strength to bring about that kind of reduction that will lead in the future to these kinds of actions that will make possible that so-called dividend.

Too many people are already spending it. I get reporters who talk to me, "Well, my gosh, we can dismantle the Army, we can reduce these large expenditures, and we can apply these moneys to various programs." But I think, as it relates to reality, we have an opportunity, but we also have an obligation to see whether or not there is reality behind these so-called dreams and these hopes and these aspirations.

I commend the President for putting forth his proposal in the manner and the way in which he did, and I do hope that President Gorbachev has the ability to follow through.

I yield the floor.

PROPOSING A $169 BILLION PEACE DIVIDEND OVER THE NEXT 5 YEARS

Mr. KENNEDY. Mr. President, the world has changed. Democracy is bustin' out all over Eastern Europe. The Soviet threat is not just walking to the exit—it is running to the exit.

In fact, it is already at its lowest point since World War II. The only thing that has not changed is President Bush's budget for defense.

The President of the United States has sent Congress a preposterous defense budget that pretends 1989 never happened.

In current dollars, the Bush defense budget is still going up—and I say it ought to be going down.

What America needs now is bold leadership on defense, not cold leftovers from the Right Wing's cold war kitchen. And if President Bush will not supply that leadership, Congress should.

True, the President's budget makes what economists call cuts in real terms in military spending. In other words, the President's budget for the Pentagon is going up—but it is not going up fast enough to keep pace with inflation. Pity the poor Pentagon.

These so-called cuts by the administration represent simply one more year of the same old path of slightly declining real military spending that Congress began in 1985. That was the year when we finally could no longer swallow the Reagan military buildup—and the Defense budget has been following this ever so gradually declining path ever since.

It is futile to debate whether that path was a mistake for 1986, 1987, 1988, and 1989. But it is a path to nowhere in 1990. Deeper reductions—much deeper reductions—in spending for defense are not only possible. They are necessary.

I want to say what virtually everyone else in Congress knows. There really is a peace dividend, unless we throw it away. Peace is at hand—and the peace dividend should be close behind.

Today, I propose a Democratic alternative to the Bush defense budget. I propose to cut military spending in real terms by 7 percent in 1991—and by 5 additional percent each year every year through 1995.

It is time to declare a major peace dividend for America and the American people. The peace dividend I propose will be worth a total of $169 billion in budget authority and $139 billion in outlays over the next 5 years.

If the cold war continues to thaw, if democracy continues to flower in Eastern Europe, if arms control and troop reductions continue to reduce the Soviet threat, we will be able to make even deeper cuts in defense spending farther into the future.

But even if we hold only to the same pattern of 5-percent cuts through the year 2000, the additional savings in that second 5-year period will be substantially larger than the savings through 1995.

The reductions I propose now will return us by 1995 to approximately the defense spending levels of the post-Korea and post-Vietnam years. We need to reach those levels as soon as possible—and it may turn out that we can reach them even sooner than 1995.

But given the dramatic and essentially irreversible decline in the Soviet threat, the proposal I am making today is a safe and entirely sufficient level for defense spending in the next 5 years.

Now is the year to begin. Each dollar we cut from the Pentagon in the current year will have ripple effects in the future, and bring larger peace dividends in the years ahead.

I am not here to deny President Reagan the credit he may deserve for the military buildup of the 1980's. Perhaps that buildup did hasten the end of the Soviet empire and the beginning of glasnost and perestroika. But America paid a high price here at home for that massive military buildup—and it is long past time for America to address the worsening challenge of our enormous unmet national needs.

All President Bush has offered is a warmed over cold war budget whose reductions are inadequate. We must begin—and begin now—to wage the real battles that matter most for our future—the battles to reduce the deficit, to educate our children, to win the war on drugs, to clean up our environment, to invest in our future, to provide decent health care for all citizens and long-term care for our senior citizens, and to reduce the excessive tax burden on millions of hard-working American families. The list of challenges goes on and on—it is time America got to work to meet them.

I ask that certain tables referring to this subject be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Defense Budget

Fiscal year:	*Billions*
1980	$143.9
1981	180.0
1982	216.5
1983	245.0

Mr. KENNEDY. I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BRYAN). The absence of a quorum having been suggested, the clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRESS IN AERONAUTICS AND SPACE—MESSAGE FROM THE PRESIDENT—PM 82

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

I am pleased to transmit this report on the Nation's progress in aeronautics and space during calendar year 1987, as required by section 206 of the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2476). Aeronautics and space activities cut across many sectors of our Federal Government, and this report highlights the major programs of the 14 contributing departments and agencies, with the National Aeronautics and Space Administration (NASA) and the Department of Defense (DOD) the major contributors.

In 1987, as furtherance of the recovery of our space launch capability, studies were completed concluding that a mixed fleet, consisting of the space shuttle and expendable launch vehicles, would be required for continued U.S. operations and access to space. Remote sensing capability continued to make impressive progress to further our understanding of the ozone depletion in the atmosphere, the impact of weather patterns on agriculture, and the damage to the forest ecosystem caused by acid deposition. A new initiative was launched to study the Earth system, including the oceans and the atmosphere, on a worldwide scale.

During the year, technology products continued to flow to the user industries. Results of aeronautics research reached a new level of application. The NASA-developed computational fluid dynamics techniques coupled with drag reducing concepts were applied to hull/keel design. Aircraft safety continued to receive priority, with requirements being levied for equipment to alert pilots of collision threat.

The defense of our country was enhanced by the successful demonstration of target interception in space. Great strides were made as the United States moved closer to agreement with its partners in the permanently occupied space station project. Bilateral and multilateral discussions on space arms control were held in Geneva. Because of advances made in worldwide communications, information on space technology and exploration is now reaching 134 countries and in 44 languages.

There is great promise in our Nation's vision to be at the forefront of advancement in aeronautics, space science, and exploration, for it is this advancement that ultimately makes a significant contribution to the quality of life on Earth. Our challenge is to continue on an aggressive course of exploration that will provide the international leadership and climate for cooperation for which this great Nation has become so well known.

GEORGE BUSH.

THE WHITE HOUSE, *February 1, 1990.*

SAVINGS AND ECONOMIC GROWTH ACT OF 1990—MESSAGE FROM THE PRESIDENT—PM 83

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Finance:

To the Congress of the United States:

I am pleased to submit for your consideration and passage the "Savings and Economic Growth Act of 1990." This legislative proposal would enact a permanent reduction in the capital gains tax rate, establish a new family savings program, and permit penalty-free Individual Retirement Account (IRA) withdrawals for first-time home buyers.

This proposal would encourage savings, investment, and economic efficiency, thereby creating jobs and providing other economic benefits to all citizens.

A permanent tax rate reduction for capital gains will lower the cost of capital and provide an incentive for long-term investment in the American economy that will create jobs and make American business more competitive in the international economy.

A new Family Savings Account will give most American families an opportunity to save through a simple and understandable tax-exempt savings incentive program. The resulting savings boost will also strengthen our economy and create jobs and opportunity for all Americans.

Permitting Americans to withdraw funds from their IRAs prior to retirement without penalty for the purchase of their first home will assist individuals in saving for that first home, while providing additional stimulus to the construction of affordable housing in our country.

I look forward to working with the Congress on these important matters.

GEORGE BUSH.

THE WHITE HOUSE, *February 1, 1990.*

REPORT ON GENERALIZED SYSTEM OF PREFERENCES—MESSAGE FROM THE PRESIDENT—PM 84

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Finance:

To the Congress of the United States:

I transmit herewith my report on the Generalized System of Preferences, pursuant to section 505(b) of the Trade Act of 1974, as amended (19 U.S.C. 2465(b)).

GEORGE BUSH.

THE WHITE HOUSE, *February 1, 1990.*

REPORT OF THE INTERAGENCY ARCTIC RESEARCH POLICY COMMITTEE—MESSAGE FROM THE PRESIDENT—PM 85

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

Pursuant to the provisions of section 108(b) of Public Law 98-373 (15 U.S.C. 4107(b)), I transmit herewith the Third Biennial Report of the Interagency Arctic Research Policy Committee (February 1, 1988, to January 31, 1990).

GEORGE BUSH.

THE WHITE HOUSE, *February 1, 1990.*

MESSAGES FROM THE HOUSE

ENROLLED JOINT RESOLUTIONS SIGNED

At 12:47 p.m., a message from the House of Representative, delivered by Mr. Hays, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolutions:

S.J. Res. 130. Joint resolution designating February 11 through February 17, 1990, as "Vocational-Technical Education Week"; and

H.J. Res. 149. Joint resolution designating February 16, 1990, as "Lithuanian Independence Day."

At 2:32 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 130. Joint resolution designating February 11 through February 17, 1990, as "Vocational-Technical Education Week."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2246. A communication from the Chief Financial Officer, Department of State, transmitting, pursuant to law, a report on certain violations of the Anti-Deficiency Act; to the Committee on Appropriations.

EC-2247. A communication from the Acting Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Army's proposed letter of offer to Egypt for defense articles estimated to cost in excess of $50 million; to the Committee on Armed Services.

EC-2248. A communication from the Chairman of the Consumer Product Safety Commission, transmitting, pursuant to law, the annual budget request of the Commission for fiscal year 1991; to the Committee on Commerce, Science, and Transportation.

EC-2249. A communication from the Administrator of the Federal Aviation Administration, transmitting, pursuant to law, a report of progress on developing and certifying the traffic alert and collision avoidance system for the period of September through December 1989; to the Committee on Commerce, Science, and Transportation.

EC-2250. A communication from the Secretary of the Interstate Commerce Commission, transmitting, pursuant to law, a report on an extension of the period of time for a decision in Intermountain Western Railroad Co.—purchase—Union Pacific Railroad Co., Boise Group Branch Lines; to the Committee on Commerce, Science, and Transportation.

EC-2251. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayments of offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-2252. A communication from the Deputy Associate Director for Collection and Disbursement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain overpayments of offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-2253. A communication from the Assistant Secretary of the Army (Civil Works), transmitting, pursuant to law, a report of the Chief of Engineers entitled "Local Cooperation Agreements Annual Report"; to the Committee on Environment and Public Works.

EC-2254. A communication from the Administrator of the Federal Highway Administration, transmitting, pursuant to law, the third status report on certain demonstration projects; to the Committee on Environment and Public Works.

EC-2255. A communication from the Assistant Secretary of the Army (Civil Works), transmitting, pursuant to law, a biennial report on projects or separable elements of projects, which have been authorized but for which no funds have been obligated for construction during the preceding ten full fiscal years; to the Committee on Environment and Public Works.

EC-2256. A communication from the Acting Administrator of General Services, transmitting, pursuant to law, an informational copy of a report of building project survey for Boston, MA; to the Committee on Environment and Public Works.

EC-2257. A communication from the Director of the Arms Control and Disarmament Agency, transmitting, pursuant to law, the fiscal year 1991 Arms Control Impact Statement; to the Committee on Foreign Relations.

EC-2258. A communication from the Secretary of the Treasury as Chairman of the National Advisory Council on International Monetary and Financial Policies, transmitting, pursuant to law, the annual report of the Council for fiscal year 1988; to the Committee on Foreign Relations.

EC-2259. A communication from the Chairman of the U.S. International Trade Commission, transmitting, pursuant to law, the annual report of the commission on competition advocacy for fiscal year 1989; to the Committee on Governmental Affairs.

EC-2260. A communication from the Archivist of the United States, transmitting, pursuant to law, the annual report of the National Archives on competition advocacy for fiscal year 1989; to the Committee on Governmental Affairs.

EC-2261. A communication from the Director of Communications and Legislative Affairs, Equal Employment Opportunity Commission, transmitting, pursuant to law, the annual report of the Commission under the Government in the Sunshine Act for calendar year 1989; to the Committee on Governmental Affairs.

EC-2262. A communication from the Chairman of the National Capital planning Commission, transmitting, pursuant to law, and annual report on the system of internal controls and financial management in place during fiscal year 1989; to the Committee on Governmental Affairs.

EC-2263. A communication from the Secretary to the Railroad Retirement Board, transmitting, pursuant to law, a report stating that there were no actions under the Program Fraud Civil Remedies Act during fiscal year 1989; to the Committee on Governmental Affairs.

EC-2264. A communication from the Administrator of the Small Business Administration, transmitting, pursuant to law, the annual report of the Administration on the system of internal controls and financial management in place during during fiscal year 1989; to the Committee on Governmental Affairs.

EC-2265. A communication from the Chairman of the Merit Systems Protection Board, transmitting, pursuant to law, the annual report of the Board under the Government in the Sunshine Act for calendar year 1989; to the Committee on Governmental Affairs.

EC-2226. A communication from the Vice Chairman of the Postal Rate Commission, transmitting, pursuant to law, the annual report on the system of internal controls and financial management in place during fiscal year 1989; to the Committee on Governmental Affairs.

EC-2267. A communication from the Assistant Secretary of State (Legislative Affairs), transmitting, pursuant to law, the annual report on the Foreign Service Retirement and Disability System for fiscal year 1987; to the Committee on Governmental Affairs.

EC-2268. A communication from the Secretary of Education, transmitting, pursuant to law, the annual report of the Department of Education on competition advocacy for fiscal year 1989; to the Committee on Governmental Affairs.

EC-2269. A communication from the Comptroller General of the United States,

transmitting, pursuant to law, a report entitled "Deficit Reductions for Fiscal Year 1990—Compliance With the Omnibus Budget Reconciliation Act of 1989"; to the Committee on Governmental Affairs.

EC-2270. A communication from the Chairman of the Copyright Royalty Tribunal, transmitting, pursuant to law, the annual report of the Tribunal for fiscal year 1989; to the Committee on the Judiciary.

EC-2271. A communication from the Executive Secretary of the national Security Council, transmitting, pursuant to law, the annual report of the Council under the Freedom of Information Act for calendar year 1989; to the Committee on the Judiciary.

EC-2272. A communication from the chairman of the board of directors of the Future Farmers of America, transmitting, pursuant to law, the annual audit report of the Future Farmers of America for the period ended August 31, 1989; to the Committee on Finance.

EC-2273. A communication from the Chief Justice of the United States, transmitting, pursuant to law, an amendment to the Federal Rules of Evidence; to the Committee on the Judiciary.

EC-2274. A communication from the Secretary of Veterans Affairs, transmitting, a draft of proposed legislation to waive the waiting period requirement of section 210(b)(2) of title 38, United States Code, for a planned administrative reorganization involving the Loan Guaranty Division at the Togus Veterans Affairs Medical and Regional Office Center; to the Committee on Veterans Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BIDEN, from the Committee on the Judiciary, with amendments:

S. 458. A bill to provide for a General Accounting Office investigation and report on conditions of displaced Salvadorans and Nicaraguans, to provide certain rules of the House of Representatives and of the Senate with respect to review of the report to provide for the temporary stay of detention and deportation of certain Salvadorans and Nicaraguans and for other purposes (Rept. No. 101-241).

By Mr. KENNEDY, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 845. A bill to amend the Federal Food, Drug, and Cosmetic Act to revitalize the Food and Drug Administration, and for other purposes (Rept. No. 101-242).

By Mr. BIDEN, from the Committee on the Judiciary, without amendment:

H.R. 150. A bill to amend the Immigration and Nationality Act to provide a procedure for an alien who dies while serving on active-duty with the United States Armed Forces during certain periods of hostilities to be considered a citizen of the United States at the time of the alien's death.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. BIDEN, from the Committee on the Judiciary:

Michael J. Norton, of Colorado, to be U.S. Attorney for the District of Colorado for the term of 4 years;

Walter J. Bamberg, of Alabama, to be U.S. Marshal for the Middle District of Alabama for the term of 4 years;

Donald E. Crowl, of Oklahoma, to be U.S. Marshal for the Northern District of Oklahoma for the term of 4 years;

Charles E. Healey, of New York, to be U.S. Marshal for the Eastern District of New York for the term of 4 years;

Craig L. Meacham, of California, to be U.S. Marshal for the Central District of California for the term of 4 years;

James Y. Stewart, of Michigan, to be U.S. Marshal for the Eastern District of Michigan for the term of 4 years;

Ronald Frank Ederer, of Texas, to be U.S. Attorney for the Western District of Texas for the term of 4 years; and

Robert F. Gilbert, of New Hampshire, to be United States Marshal for the District of New Hampshire.

By Mr. EXON, from the Committee on Armed Services:

The following-named officer for appointment as Chief, National Guard Bureau, under the provisions of title 10, United States Code, section 3040, and appointment to the grade of lieutenant general while serving in this position of importance and responsibility under the provisions of title 10, United States Code, section 601:

To Be Chief, National Guard Bureau

To be lieutenant general

Maj. Gen. John B. Conaway, 315-30-2700FG, U.S. Air Force.

By Mr. NUNN, from the Committee on Armed Services:

Mr. NUNN. Mr. President, from the Committee on Armed Services, I report favorably the attached listing of nominations.

Those identified with a single asterisk (*) are to be placed on the Executive Calendar. Those identified with a double asterisk (**) are to lie on the Secretary's desk for the information of any Senator since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of November 17, 1989, and January 24, 1990, at the end of the Senate proceedings.)

*In the Army Reserve there are 19 appointments to the grade of major general and below (list begins with Francis T. Donohue) (Reference No. 827).

*Lt. Gen. Herbert R. Temple, Jr., USA, to be placed on the retired list in the grade of lieutenant general (Reference No. 845).

*Maj. Gen. James W. Crysel, USA, to be reassigned in the grade of lieutenant general (Reference No. 886).

**In the Air Force Reserve there are 27 promotions to lieutenant colonel (list begins with William G. Bader) (Reference No. 904).

**In the Navy Reserve there are 203 appointments to the grade of captain and below (list begins with Paul Michael Bader) (Reference No. 905).

*Gen. Robert T. Herres, USAF, to be placed on the retired list in the grade of general (Reference No. 954).

*Lt. Gen. Richard A. Burpee, USAF, to be placed on the retired list in the grade of lieutenant general (Reference No. 958).

*Lt. Gen. Robert D. Beckel, USAF, to be reassigned in the grade of lieutenant general (Reference No. 959).

*Vice Adm. Charles R. Larson, USN, to be admiral (Reference No. 971).

*Vice Adm. Paul F. McCarthy, Jr., USN, to be placed on the retired list in the grade of vice admiral (Reference No. 973).

*Rear Adm. Robert J. Kelly, USN, to be vice admiral and to be Senior Navy Member of the Military Staff Committee of the United Nations (Reference No. 974).

**In the Air Force Reserve there are 61 promotions to the grade of colonel (list begins with Ronald R. Anderson) (Reference No. 986).

**In the Air Force Reserve there is 1 appointment to the grade of lieutenant colonel (Consolador C. Palad) (Reference No. 987).

** In the Air Force Reserve there are 12 promotions to the grade of lieutenant colonel (list begins with Anthony Augello) (Reference No. 988).

** In the Air Force Reserve there are 28 promotions to the grade of lieutenant colonel (list begins with Terry L. Anderson) (Reference No. 989).

** In the Air Force Reserve there are 17 appointments and promotions to the grade of colonel and below (list begins with David W. Becker, Jr.) (Reference No. 990).

** In the Air Force there is 1 promotion to the grade of major (Gary J. Moore) (Reference No. 991).

** In the Army there are 6 promotions to the grade of colonel and below (list begins with William J. McDougall) (Reference No. 992).

** In the Army there are 13 promotions to the grade of colonel and below (list begins with Calvin E. Mein) (Reference No. 993).

** In the Army Reserve there are 27 appointments to the grade of colonel and below (list begins with Thomas W. Allen) (Reference No. 994).

** In the Army Reserve there are 11 appointments to the grade of colonel and below (list begins with Larry T. Bourke) (Reference No. 995).

** In the Army Reserve there are 19 promotions to the grade of colonel (list begins with James C. Burke) (Reference No. 996).

** In the Army Reserve there are 24 promotions to the grade of lieutenant colonel (list begins with William B. Banks) (Reference No. 997).

** In the Naval Reserve there are 48 appointments to the grade of lieutenant (list begins with Susan K. Arnold) (Reference No. 998).

** In the Navy and Naval Reserve there are 40 appointments to the grade of commander and below (list begins with Kenneth P. Burns) (Reference No. 999).

** In the Navy and Naval Reserve there are 13 appointments to the grade of commander and below (list begins with T.A. Best) (Reference No. 1000).

** In the Navy there are 152 appointments to the grade of ensign (list begins with David A. Adams) (Reference No. 1001).

** In the Army there are 1,034 appointments in their active duty grade (list begins with Richard A. Akre) (Reference No. 1002).

** In the Air Force Reserve there are 271 promotions to the grade of colonel (list begins with Walter W. Adams) (Reference No. 1003).

** In the Air Force there are 2,020 appointments to the grade of captain (list

begins with Frank Abate) (Reference No. 1004).

** In the Army Reserve there are 616 promotions to the grade of colonel (list begins with Rafael A. Acevedo) (Reference No. 1006).

** In the Army Reserve there are 2,495 promotions and appointments to the grade of colonel and below (list begins with Donald R. Ellis, Jr.) (Reference No. 1007).

** In the Army there are 972 appointments to the grade of second lieutenant (list begins with Albert J. Abbadessa) (Reference No. 1009).

** In the Marine Corps there are 796 appointments to the grade of second lieutenant (list begins with Thomas B. Adair) (Reference No. 1010).

** In the Navy there are 73 appointments to the grade of lieutenant junior grade (list begins with Reynaldo L. Apontecestero) (Reference No. 1013).

Total: 9,007.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. ROTH:

S. 2049. A bill to authorize the Administrator of the Environmental Protection Agency to take action to encourage the removal of certain model year vehicles from use; to the Committee on Environment and Public Works.

By Mr. KOHL:

S. 2050. A bill to amend title XVIII of the Social Security Act to provide toll-free hotlines for individuals receiving benefits under such title and to provide increased protection against fraud and abuse with respect to the marketing and selling of Medicare supplemental policies to such individuals, and for other purposes; to the Committee on Finance.

By Mr. HEFLIN:

S. 2051. A bill to amend the Social Security Act to provide for more flexible billing arrangements in situations where physicians in the solo practice of medicine or in another group practice have arrangements with colleagues to "cover" their practice on an occasional basis; to the Committee on Finance.

By Mr. KASTEN:

S. 2052. A bill to amend the Internal Revenue Code of 1986 to reduce the OASDI tax rate, and to remove Social Security trust funds from Gramm-Rudman; to the Committee on Finance.

By Mr. DANFORTH:

S. 2053. A bill to amend certain provisions of title 5, United States Code to provide for an increased maximum rate of pay for specially qualified scientific and professional personnel, and for other purposes; to the Committee on Governmental Affairs.

By Mr. DODD (for himself, Mr. BRADLEY, Mr. ROCKEFELLER, Mr. HARKIN, Mr. D'AMATO, Mr. KOHL, Mr. CONRAD, Mr. LIEBERMAN, Ms. MIKULSKI, Mr. SIMON, Mr. METZENBAUM, Mr. SANFORD, Mrs. KASSEBAUM, Mr. KENNEDY, and Mr. BYRD):

S. 2054. A bill to amend the Public Health Service Act to authorize grants and contracts for projects providing primary pediatric care to disadvantaged children, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. MCCONNELL:

S. 2055. A bill to amend the National School Lunch Act to extend eligibility for reimbursement for meal supplements for children in afterschool care, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. HARKIN (for himself, Mr. HATCH, Mr. PELL, Mr. DURENBERGER, Mr. KENNEDY, Mr. COCHRAN, Mr. SIMON, Mrs. KASSEBAUM, Mr. BURDICK, Mr. KERREY, Mr. ADAMS, Mr. CHAFEE, Mr. GRAHAM, Mr. LEAHY, and Mr. HATFIELD):

S. 2056. A bill to amend title XIX of the Public Health Service Act to provide grants to States and implement State health objectives plans, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. BRYAN:

S. 2057. A bill to amend the Securities Exchange Act of 1934; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. BRYAN (for himself, Mr. RIEGLE, Mr. GARN, Mr. DODD, Mr. HEINZ, Mr. CRANSTON, Mr. SHELBY, Mrs. KASSEBAUM, Mr. KERRY, Mr. D'AMATO, Mr. WIRTH, and Mr. BOND):

S. 2058. A bill to amend the Federal Deposit Insurance Act to regulate certain marketing activities engaged in on the premises of deposit-taking facilities of insured depository institutions; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. BOSCHWITZ:

S.J. Res. 248. Joint resolution to designate the month of September 1990 as "International Visitor's Month"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. DECONCINI (for himself, Mr. DOLE, Mr. KASTEN, Mr. SYMMS, and Mr. GRAHAM):

S. Res. 239. Resolution expressing the sense of the Senate denouncing the military offensive in Angola and urging an immediate ceasefire; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ROTH:

S. 2049. A bill to authorize the Administrator of the Environmental Protection Agency to take action to encourage the removal of certain model year vehicles from use; to the Committee on Environment and Public Works.

REMOVAL OF CERTAIN MODEL YEAR VEHICLES FROM USE

Mr. ROTH. Mr. President, I rise to introduce a piece of legislation which could make a significant contribution to the Clean Air Act.

Mr. President, as we all know, some of the biggest polluters on our Nation's highways and byways are the pre-1980 model year automobiles. As a matter of fact, there are currently 22 million of these cars on the road—cars we often affectionately refer to as clunkers. In fact, according to CRS, using EPA data, there are 9 million pre-1975 automobiles on the road, which release about 600,000 tons of hydrocarbons into the atmosphere each year. On top of this, there are another 13 million 1976-to-1979 model automobiles on the road that emit another 500,000 tons of hydrocarbons—each and every year.

These statistics are important—very important, since every year we emit 20 million tons of hydrocarbons, and of these 20 million tons, 4 to 5 million come from cars. What's more, roughly 15 to 30 percent of the hydrocarbons emitted each year come from pre-model year 1980 automobiles. In fact, I have heard estimates run as high as 40 percent when one considers evaporative losses and other losses, and it has been stated that about 60 percent of the transportation-sector-hydrocarbon emissions in southern California come from clunkers.

The mobile source provisions of the clean air bill restrict the emissions of new cars—and much has been accomplished over the past years—but the provisions do nothing to get these older polluting cars, or clunkers, off the road.

Because I feel that the contribution to our air problems that comes from these vehicles is siginficant, my legislation proposes the following:

If an individual has a pre-1980 car and goes to a dealer to buy a new car, I suggest that we give the manufacturer of the new car a credit to its CAFE average.

The CAFE, or Corporate Average Fuel Economy Program, was enacted in 1975, and took effect with the 1978 auto model year. The program requires all car manufacturers to maintain certain minimum fuel mileage averages for their fleet of cars sold in the United States. If a manufacturer's average falls below the mandated average, a penalty is imposed. On the other hand, if the CAFE average exceeds the target figure a credit is granted.

Under my proposed legislation, credits could also be accumulated by the manufacturer as it actually replaces clunkers with new, fuel efficient automobiles. The credit would be based on the difference between the mile per gallon of the old car and the mile per gallon of the new car. The dealer, of course, must provide proof that the engine block and body of the traded-in vehicle are removed from the road permanently, and will never drive again. Those that intentionally do not comply with this provision, will be fined $2,000 per car. I also propose a sunset on this provision which terminates its operation by December 1993.

Mr. President, according to the California Air Resources Board, when they studied the value of a CAFE credit, in conjunction with the flexible

fuel vehicles, they determined that CAFE credits can be worth up to $2,000 per car in penalty avoidance costs and other incidentals. I can foresee a scenario where the owners of these clunkers become valuable customers when they drive onto the new car lot looking for a new fuel efficient, low-polluting car. For example the manufacturer could receive a CAFE credit of 30 miles per gallon if he permanently retires the clunker averaging 10 miles per gallon, and sells the customer a car that averages 40 miles per gallon. The low fuel economy of the clunker should also be worth additional dollars toward the downpayment on the new car.

The Congressional Research Service suggests that $500 to $1,000 per car could be transferred to the buyer, depending on the CAFE credit. Thus, an individual buying a car with a $1,000 rebate, and a $500 trade in value, could have an additional $1,000 toward the downpayment.

Consequently, the bill is good for everyone—for the manufacturer, the retailer, the owner, but most importantly, for the environment. We need to encourage more fuel efficient, safer, environmentally sound methods of transportation. This would be a very good beginning.

At the moment, I am not bound by hard and fast rules concerning the outline of my proposal and, consequently, I would appreciate the wisdom of my colleagues as we move forward with what I believe is the basics of an idea whose time has come.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2049

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) REGULATIONS.—Prior to the expiration of the 90-day period following the date of the enactment of this Act, the Administrator of the Environmental Protection Agency (hereinafter referred to as the "Administrator") shall issue such regulations as may be necessary to establish and implement a program encouraging the removal from use and the marketplace of motor vehicles manufactured prior to model year 1980.

(b) PROGRAM.—Such program shall include provisions pursuant to which any motor vehicle dealer who receives, as a trade-in on the sale by such dealer of a new motor vehicle, a motor vehicle of a model year prior to model year 1980, may remove such motor vehicle from use and the marketplace.

(c) CERTIFICATION.—Such regulations shall further provide that upon certification by the motor vehicle dealer to the Administrator that the engine block and the chassis of the motor vehicle removed from use and the marketplace have been destroyed in accordance with such program, the manufacturer of the new motor vehicle shall receive a credit to its corporate average fuel economy. Such credit shall equall the difference between the fuel economy of the new motor vehicle, and the motor vehicle removed from use and the marketplace.

(d) PROOF.—Regulations under this section shall require proof from the motor vehicle dealer that the motor vehicle was destroyed in accordance with the regulation, and that the vehicle's identification number was removed from the registration list of the appropriate State or States.

(e) VIOLATION.—Any person violating a regulation promulgated pursant to this section shall be subject to a civil penalty assessed by the Administrator in an amount not to exceed $2,000.

(f) EXPIRATION.—No credits shall be given pursuant to this Act on or after January 1, 1994.

By Mr. KOHL:

S. 2050. A bill to amend title XVIII of the Social Security Act to provide toll-free hotlines for individuals receivings benefits under such title and to provide increased protection against fraud and abuse with respect to the marketing and selling of Medicare supplemental policies to such individuals, and for other purposes; to the Committee on Finance.

MEDIGAP FRAUD AND ABUSE PREVENTION ACT

Mr. KOHL. Mr. President, I rise today to introduce legislation that I believe will help senior citizens purchase Medicare supplemental insurance policies which deliver real protection at an affordable price.

Representative OAKAR is introducing companion legislation in the House and we are hopeful, that with the assistance of the relevant committees, we will enact provisions of these measures during this session.

A recently released report by the AARP concluded that the selection of Medigap insurance is a difficult but necessary choice for the elderly.

In a recent special Committee on Aging hearing in Madison, WI, both consumer and industry witnesses testified to the increasing cost, confusion, and criminality in the current system of Medigap and Medicare supplemental insurance regulation.

I have discussed this with the distinguished chairman of the Senate Special Committee on Aging and Senator PRYOR has indicated his intention to pursue the issue in a March hearing. While part of the solution to this problem can be found in more rigid standards and tougher enforcement, other concerns must be addressed through better consumer education.

Senator ROCKEFELLER has also scheduled a hearing in the Finance Committee. And Congressman ROYBAL, through the House Select Committee on Aging, has conducted several hearings throughout the country, and will most likely be developing legislation.

I look forward to working with each of them to improve the consumer protections established under the 1980 amendments. I am hopeful that some action can be taken in this session that will check the uncontrolled costs and confusion in the Medicare supplemental health insurance industry.

I urge my colleagues to join me in that effort.

Mr. President, in a recent survey conducted by the American Association of Retired Persons, 82 percent of the respondents indicated that they rely on Medigap policies for protection against the costs of catastrophic illness. Other sources have indicated that, on average, this coverage costs a senior citizen $800 each year. But as I found out when I chaired an Aging Committee hearing on Medigap insurance in Wisconsin, too often older Americans pay too much and get too little for this coverage. We have not had a comprehensive Federal initiative to reform the $17 billion Medigap industry since 1980. Our colleague, Senator BAUCUS, led that effort and did an outstanding job of addressing some of the problems we faced then. The Baucus amendments were designed to increase and standardize State regulation of Medigap policies. In addition, his legislation created penalties for abusive Medigap marketing practices and set loss-ratio targets for policies.

Without question, the Baucus amendments significantly improved the quality of Medigap policies in our country and reduced the incidence of abusive insurance marketing. However, in recent years evidence has plainly shown that new problems have developed and we need new solutions to improve the Medigap system—and we certainly do need to improve it, particularly in light of the repeal of the Medicare Catastrophic Coverage Act.

Obviously, the most urgent problem is the constantly rising costs of Medigap policies. A survey by the House Select Committee on Aging revealed that Medigap rates increased anywhere from 9 to 133 percent in 1989—this, despite the expanded Medicare coverage provided by the Catastrophic Coverage Act. And with the repeal of catastrophic, premiums this year are expected to soar even further. As a result of these constantly rising prices, some senior citizens have no choice but to drop their coverage, a situation which more or less forces older Americans to play Russian roulette with their health. We cannot allow this to continue.

Just as importantly, we need to provide senior citizens with the information they need to make sound choices when buying Medigap insurance. Unfortunately, the current range of policy options is highly confusing to many older Americans. Some States have made strong efforts to help senior citizens cut through this confusion. Wisconsin, for example, has allowed the sale of only one type of Medicare supplement since January 1, 1989. All policies sold in the State pro-

vide a package of seven benefits, and insurers may offer any of six additional benefits as riders. While this change is certainly an improvement over the previous situation, this limited standardization of benefits has not eliminated the confusion among senior citizens, nor has it made it possible to purely compare "apples and apples." The State has developed a policy comparison chart that is supposed to make it possible to easily compare the different policies approved for sale in the State. Despite good intentions, the chart just doesn't work. It took one of my staff members 3 full days to break down the benefits offered by these policies and choose the best values. We have recognized a need, but we haven't developed a solution. It is clear that the vast price differential among various comparable policies results from a market that is not controlled by the consumers. To make more intelligent choices, consumers will need better and more comparable information.

We also must enact and enforce stiffer penalties to punish those insurance agents who use deceptive and fraudulent marketing tactics. I was horrified to learn of the abuses in the Medigap marketplace. In Wisconsin, the Medicare part B annual deductible of $75 is being sold as a rider for as much as $105. It seems to me that if a scrupulous agent informed a customer that the value of that rider was only $75, the customer wouldn't pay $105 for it. Representative WYDEN has indicated strong interest in this whole area of indemnity and dread disease policies and I am hopeful that something can be done in this area to curb abuses.

Another incredible practice in my State is the switching of policies by some independent agents. Agents are sometimes paid as much as 75 percent of the first year premium for selling a Medigap policy. After 6 to 9 months, because of pre-existing conditions terms, the agent returns to the same consumer and convinces the senior citizen to switch policies—not necessarily because the second product more appropriately addresses the health needs of that senior citizen, but rather because if the agent sells that new policy, he or she can again collect a 75-percent commission. The National Association of Insurance Commissioners has recently strengthened model standards in this regard, but I would hope that Congress would look very carefully at this issue and determine if there is an appropriate Federal role in curbing the financial incentive for unscrupulous agents.

I think the most disturbing testimony submitted at the hearing I held in Wisconsin concerned elderly women, especially those living alone in rural areas of the State. Many of them have as many as three or four overlapping policies. They are paying exorbitant sums of money for coverage they don't need. Why? Because they are easy targets for a visiting salesperson, who by taking advantage of the loneliness of an isolated elderly person, can almost always sell that senior citizen an unneeded product. This is outrageous. Since 1980, we have had penalties for fraudulent activities connected with the sale of Medigap policies. Nonetheless, it is estimated that senior citizens spend $3 billion each year buying duplicative or useless Medigap policies.

I realize that most insurance agents are responsible and make every effort to maintain high ethical marketing standards. However, those unscrupulous agents who violate the established Medigap marketing rules continue to drain the pockets of those who live on fixed incomes. Those agents prey on the fears of elderly Americans. Their crimes are unconscionable; and so are the lame efforts we put into investigating these abuses and the minimal punishments we impose when we do catch someone. The semantic loophole in existing law is big enough to let a barnyard of animals continue business as usual. It is time to state emphatically that the sale of duplicative policies will not be tolerated. Duplicative should be understood to mean duplicative in any way. Enough horsing around the edges of this debate.

In short, the current Medigap system in our country is plagued by costs, confusion, and criminality. What can be done to reform this industry?

First, we must do a better job of curbing the marketing abuses and enforcing existing law. The Medigap Fraud and Abuse Prevention Act would help to address the problems of rising Medigap premiums and fraudulent marketing practices. This legislation would amend the Social Security Act to increase the current loss-ratio requirement for individual Medigap policies from 60 to 70 percent. The loss-ratio of a Medigap product line measures the percentage of premiums returned to policyholders as benefits. According to a 1986 GAO study, most individual Medigap policies fell below the current Federal target of 60 percent. This measure would also call for a GAO study of the actual ratios of benefits-to-premiums collected and the effectiveness of State enforcement of minimum loss ratios. And it would make the Secretary's certification of a State's plan contingent on enforcement of the Federal loss-ratio standards. I do have concerns about the lack of precision of the loss-ratio measurement as a tool. At the same time, it seems to be one of the only mechanisms we have to help consumers get a fair return on the billions of dollars worth of insurance purchased each year.

To combat unethical Medigap marketing practices, this legislation would increase civil penalties for insurance agents who use fraudulent and deceptive practices to sell policies. Under current law, Medigap fraud carries a maximum fine of $5,000. My legislation would increase the maximum penalty to $25,000, providing a much stronger disincentive for agents to knowingly sell duplicative coverage. In addition, this legislation would tighten current law to forbid agents from knowingly selling policies that duplicate a beneficiary's current coverage in any way.

Finally, this bill would require States to either approve or disapprove premium increases and would make the deeming of a State's plan contingent on such process being in place. Two-thirds of the States already require approval of increases in individual plans. But the vast majority of States do not have such a plan in place. In fact many States do not even require notice of premium increases for group policies.

The second part of a comprehensive approach to Medigap reform must deal with the education of the consumer. Informed consumers are the key to a free and competitive marketplace. Wise shopping can keep prices down and reduce overall health care inflation. At the same time, there is no real value in reams of policy information provided after the purchase of policies. Additionally, we must question the power of such printed material in contrast to a one-on-one sales situation. In testimony submitted at the Madison field hearing, it was clear that one woman had four policies because she liked the company provided her by the salespeople. To counteract that, we will need to do a more effective job of providing one-on-one benefits counseling. In my own State of Wisconsin, there is a toll-free Medigap hotline administered by the State Board on Aging and Long Term Care. The Medigap hotline is a source of objective, unbiased information and individual counseling about Medicare supplemental health insurance. The toll-free number is printed on policy comparison and insurance advise brochures produced by the Office of the Commissioner of Insurance. Thousands of Wisconsin residents become aware of the existence of area agency on aging benefit specialist services through an original contact with the hotline. Each county agency on aging has a fully trained benefit specialist, or "tape-cutter", that counsels senior citizens on a wide-array of services, including Medigap and Medicare supplemental insurance policies.

The availability of counseling services is a critical component of any measure to protect consumers form the confusion in the Medigap indus-

try. This is an area in which the distinguished chairman of the Special Aging Committee has a special interest and I look forward to working with him and our colleagues in making such services universally accessible.

Mr. President, when Congress repealed the Catastrophic Coverage Act, it increased the reliance of older Americans on Medicare supplemental insurance. Given the problems with the Medigap industry today, we must take action to protect senior citizens from the costs, confusion, and criminality of this system. I urge my colleagues to support these timely and needed measures. Again, I would also like to thank Senator PRYOR for his leadership and interest in this critical issue. Without his assistance, and certainly his support of the Aging Committee field hearings, I would not have been able to introduce this proposal for consideration.

In closing, I ask unanimous consent that the text of this bill, as well as a recent summary of the issue prepared by the American Association of Retired Persons, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2050

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Medigap Fraud and Abuse Prevention Act of 1990".

SEC. 2. MEDIGAP FRAUD AND ABUSE PROTECTIONS INCREASED.

(a) CIVIL PENALTIES INCREASED.—Section 1882(d) of the Social Security Act (42 U.S.C. 1395ss(d) is amended by striking "$5,000" each place it appears and inserting "$25,000".

(b) PROTECTION AGAINST DUPLICATION OF POLICY INCREASED.—Section 1882(d)(3)(A) of such Act (42 U.S.C. 1395ss(d)(3)(A)) is amended by striking "policy substantially duplicates" and inserting "policy duplicates".

(c) MINIMUM BENEFIT TO PREMIUM RATIO INCREASED.—Section 1882(c)(2) of such Act (42 U.S.C. 1395ss(c)(2)) is amended by striking "60" and inserting "70".

(d) ENFORCEMENT OF BENEFIT TO PREMIUM RATIO STRENGTHENED.—Section 1882(b)(1) of such Act (42 U.S.C. 1395ss(b)(1)) is amended—

(1) by striking "and" at the end of subparagraph (D); and

(2) by adding "and" at the end of subparagraph (E); and

(3) by adding at the end thereof the following new subparagraph:

"(F) provides for strict enforcement of the percentage requirements described in subsection (c)(2) in place with respect to the actual ratio of benefits provided to premiums collected,".

(e) IMPLEMENTATION OF PROCESS TO APPROVE PREMIUM INCREASES.—Section 1882(b)(1) of such Act (42 U.S.C. 1395ss(b)(1)) is amended by subsection (d) of this Act, is further amended—

(1) by striking "and" at the end of subparagraph (E);

(2) by adding "and" at the end of subparagraph (F); and

(3) by adding at the end thereof the following new subparagraph:

"(G) provides for a process for approving or disapproving proposed premium increases with respect to such policies,".

SEC. 3. ESTABLISHMENT OF MEDIGAP TOLL-FREE HOTLINES.

(a) IN GENERAL.—

(1) GRANTS.—The Secretary of Health and Human Services (hereinafter referred to as the "Secretary") shall provide grants to States submitting applications to the Secretary which meet the requirements of this section for the purpose of establishing within such States a toll-free telephone hotline to provide individuals with information concerning medicare supplemental insurance.

(2) AMOUNT OF GRANT.—The amount of a grant awarded to a State under this section shall be determined by the Secretary in the manner as used by the Commissioner on Aging for determining the amount of allotments under section 304(a) of the Older Americans Act of 1965 (42 U.S.C. 3035 et seq.)

(3) MATCHING REQUIREMENTS.—A State receiving a grant under this section shall provide State funds for use in establishing a toll-free hotline in an amount that is equal to the amount of the grant made under this subsection to such State.

(b) TYPE OF INFORMATION.—Information to be provided through the use of the toll-free hotline established under subsection (a) shall include—

(1) policy comparison information for all medicare supplemental policies (as described in section 1882(g)(1) of the Social Security Act (42 U.S.C. 1395ss(g)(1))) and long-term care policies available to individuals within the State;

(2) information that will assist individuals in filing claims and obtaining benefits under titles XVIII and XIX of the Social Security Act (42 U.S.C. 1395 et seq and 1396 et seq.);

(3) information that will assist individuals in filing claims or obtaining benefits under a medicare supplemental policy;

(4) information concerning medicare supplemental policy problem resolution, or appropriate referral of such problems or complaints ot the State insurance commissioner or the State attorney general;

(5) information concerning the resources, information, and procedures that are available within the State to assist individuals with questions or complaints concerning health insurance; and

(6) any other information determined appropriate by the Secretary.

(c) TRAINING.—

(1) INDIVIDUALS ANSWERING HOTLINE.—The Secretary shall promulgate regulations to insure that individuals providing assistance through the use of the toll-free hotlines established under subsection (a) are adequately qualified to provide such assistance.

(2) VOLUNTEER ORGANIZATIONS.—States that receive a grant under this title shall provide training, educational materials, and technical assistance to volunteer organizations that are willing and able to provide medicare supplemental policies and medical assistance eligibility information and counseling to consumers.

(3) COUNTY BENEFIT SPECIALISTS.—States that receive a grant under this title shall conduct seminars to provide training to county benefit specialists in local welfare area agencies on aging concerning the toll-free hotline established under subsection (a) and the location and functions of State agencies and offices.

(d) EDUCATIONAL BROCHURE.—Not later than 180 days after the date of enactment of this section, each State that receives a grant under this title shall, through the State commissioner of insurance, develop and disseminate a medicare supplemental policy educational brochure that shall summarize the information described in subsection (b)(1). Such brochure shall be distributed with each medicare supplemental policy inquiry or application made to an insurance carrier within the State. The State toll-free number described in subsection (a) shall be clearly printed on the front page of the brochure.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated from the Federal Supplementary Medical Insurance Trust Fund to carry out this section, $5,000,000 for each of the fiscal years 1991 through 1993.

SEC. 4. GAO STUDY AND REPORT ON STATE ENFORCEMENT OF FEDERAL MEDIGAP REQUIREMENTS AND PENALTIES.

(a) STUDY.—The General Accounting Office shall conduct a study on State efforts in enforcing the standards and requirements set forth in section 1882(c) of the Social Security Act with respect to the issuance and marketing of medicare supplemental policies within each State. The study shall further evaluate efforts with regard to imposing civil or criminal penalties under section 1882(d) of the Social Security Act with respect to persons found guilty of violating any of the provisions described in such section. Such study shall further evaluate the ratio of benefits to premiums collected with respect to the supplemental policies described in section 1882, and the effectiveness of State enforcement of such ratios.

(b) REPORT.—The General Accounting Office shall no later than July 1, 1990, submit a report to Congress summarizing the findings of the study described in subsection (a), including legislative recommendations on strengthening and improving the enforcement of the fraud and abuse provisions provided for in section 1882 of the Social Security Act and recommendations on improving enforcement of benefit to premium ratio requirements.

CONSUMER AWARENESS OF MEDIGAP INSURANCE: FINDINGS OF A NATIONAL SURVEY OF OLDER AMERICANS

BACKGROUND

Medicare supplemental, or "Medigap," insurance is intended to cover certain hospital and other medical costs of older Americans that Medicare does not pay. However, increasing medical costs, complexities of the Medicare/Medicaid programs, and government regulation of the insurance industry have combined to make the selection of Medigap insurance a difficult but necessary choice for the elderly.

Given the changing marketplace and regulatory structure, rising medical costs, and continued reporting of sales abuses, the American Association of Retired Persons believed that additional research into the area of Medigap insurance was needed. Therefore, to investigate older Americans' current level of awareness, experiences, experience, and satisfaction with Medicare supplemental insurance, AARP's Consumer Affairs Section, in cooperation with AARP's Health Care Campaign, commissioned Market Facts to conduct a national survey of individuals

65 years and older, with supplementary samples from six selected bellwether states—California, Florida, Illinois, New York, Pennsylvania, and Texas. Qualified respondents were identified from a sample pool obtained from Market Facts' weekly, national omnibus telephone survey, TeleNation. Respondents for this study were questioned in a 20 minute telephone interview. Interviews were conducted in January and February 1989.

The information objectives of this survey have been:

To determine the types of health insurance coverage older Americans have.

To determinate the characteristics of Medigap insurance policies owned by older americans including the types of policies owned, the amount of premiums paid annually, and the extent of excessive or insufficient coverage.

To ascertain the circumstances surrounding the purchase of Medicare supplemental insurance including how the policy was purchased, the sources of information consulted before the purchase, important factors considered in the purchase decision and whether the respondent felt pressured to buy the policy.

To learn about consumers' experiences in filing insurance claims and measure their level of satisfaction with their policies.

To assess older persons' exposure to promotional efforts aimed at selling Medigap insurance policies.

To determine the consumers' knowledge and level of awareness of the changes in Medicare coverage due to the Medicare Catastrophic Act of 1988.

EXECUTIVE SUMMARY

I. Health Insurance Coverage

Sixty-two percent of the respondents in the national sample paid less than $200 out-of-pocket for prescription drugs and medical bills during 1988, about 22% paid between $200 and $499, and 16% paid $500 or more.

Eighty-two percent of respondents in the national sample said that they had a health insurance policy in addition to Medicare or Medicaid that would pay their doctor's or hospital expenses, 17% had no additional health insurance policy, and 1% did not know. Projected to the U.S. population 65 and older, an estimated 24.5 million persons have an additional policy. There appears to be a link between owning an additional health insurance policy and household income, sex of respondent and level of education.

Fifty-one percent of those surveyed who are covered by Medicaid, a government program which pays medical bills for low income persons who qualify, also purchase private health insurance. Nationwide, between 1.5 million and 2 million Medicaid recipients 65 and over are projected to have private health insurance.

More than 10% of those surveyed, an estimated additional 3.2 million persons, have no private health insurance and do not qualify for Medicaid coverage.

Respondents in the national sample have an average of 1.3 additional policies—a projected 31.8 million policies among persons 65 years and older.

Three-fourths of the respondents in the national sample who have an additional policy have a Medigap or Medicare Supplemental policy.

Twenty-four percent of those owning insurance in addition to Medicare own two or more policies.

Medigap policies are by far the most common type of supplemental health insurance. Of those owning insurance in addition to Medicare, 75% own Medigap policies. Of these, 7% own two or more Medigap policies.

Eleven percent of those owning insurance beyond Medicare own a hospital indemnity policy.

Nine percent of those owning insurance beyond Medicare own a "dread disease" policy.

Five percent of those owning insurance beyond Medicare belong to an HMO.

II. Factors Surrounding Purchase of the Most Recently Obtained Medigap Insurance Policy

About one-third of the respondents who have a Medigap policy purchased their current policy prior to 1980. Almost one-third (30%) more purchased their policy in 1987 (13%) and 1988 (17%).

Thirty-nine percent of respondents had a group policy sponsored by an employer, 18% had a group policy sponsored by another party such as a membership organization, and the remaining 43% owned an individual policy.

Medigap policies were most likely to cover expenses for hospital care and physician care in the office and hospital. Respondents were generally not knowledgeable about coverage of most other types of medical expenses.

Respondents paid an average of $705 annually in premiums for their Medigap policies.

Forty-three percent of respondents purchased their Medigap policy through the mail, and about one-third (34%) purchased their policy from an agent.

Material describing a specific policy (31%), family/friends (27%) and the insurance agent (22%) were the most commonly used sources for obtaining information about the policy purchased.

Nearly one-half (48%) of the respondents in the national sample reported that the coverage of items not paid for by Medicare was an important factor in the policy purchase decision, followed by one-third who mentioned the cost of premiums as an important factor.

III. Experience with Medigap Insurance Policy Coverage

About two-thirds (69%) of respondents in the national sample had filed a claim under their Medigap policy. Eighty-seven percent of respondents who had ever filed a claim under their policy filed one during the past year, with an average of 5.8 claims filed.

Ninety-five percent of the respondents who had filed a claim reported being satisfied with the handling of their claim(s).

Seven percent of Medigap policy owners, or an estimated 1.3 million persons, had never made a complaint about their policy. Respondents had complaints due to a variety of reasons.

IV. Exposure to Promotional Efforts for the Sale of Medigap Insurance Policies

Thirteen percent of respondents in the national sample had talked to an insurance agent about a Medigap policy during the past year. Most respondents (85%) had received material in the mail about Medigap coverage.

Most respondents did not request contact with an insurance agent or that material about Medigap insurance be sent to them. However, those who were contacted by an agent were more likely to have requested the contact (29%) than were those who were contacted by mail (5%).

Most respondents (73%) reported having seen or heard celebrity endorsements for Medigap policies. Ninety-two percent said they did not believe that a celebrity endorsement for a policy meant the policy is better than other similar policies.

V. Knowledge and Awareness of Changes in Medicare Coverage

Almost three-fourths (72%) of respondents in the national sample said they were aware that their Medicare coverage had improved as of January 1, 1989. However, the awareness was linked to income, age and sex of the respondent.

Respondents did not seem to be knowledgeable about specific changes in Medicare coverage. In response to a series of ten true/false questions, only one of the questions was answered correctly by more than half of the respondents and three additional questions were answered correctly by 40% or more of the respondents. Respondents were most knowledgeable about prescription drug coverage (55% answered correctly), coverage of stay in a hospice (45% answered correctly), and coverage of skilled nursing care in the home (43% answered correctly).

Twelve percent of respondents in the national sample, or an estimated 3.6 million persons 65 and older, reported that they had been contacted by an insurance company about either modifying a current Medigap policy or buying a Medigap policy due to the changes in Medicare coverage.

Just over half (52%) of respondents felt they were very well protected against high health care costs, 39% believed they had some protection, and 9% thought they were poorly protected. Feelings of being very well protected were linked to demographic characteristics such as income, sex of respondent and region of the country where the respondent lived, as well as other factors such as self-appraisal of their health, whether they had health insurance in addition to Medicare, and whether they were aware of the improvements in Medicare coverage.

Mr. PRYOR. Mr. President, I would like to take this opportunity to applaud Senator KOHL's ongoing efforts and commitment to address the complexities of health coverage for older Americans. We all have been exposed to the many problems and confusion surrounding the Medigap supplemental insurance market, but Senator KOHL has been a leader in developing ways to address the problem.

Senator KOHL was the first Senate Special Committee on Aging member to hold a field hearing on the problems surrounding Medigap. His hearing last December shed light not only on the skyrocketing cost increases that have followed the repeal of the Medicare Catastrophic Coverage Act, but also on the degree of marketing abuse that continues despite Federal and State regulatory efforts.

Senator KOHL's Medigap field hearing focused attention on the need for accurate information that is easily accessible to older Americans. More importantly, the hearing illustrated how a small investment in counseling on insurance programs can yield significant savings for elderly consumers. Though there has been some limited progress in establishing such programs in some

States, including the usually innovative State of Wisconsin, he is moving forward to assure that all elderly Americans have access to needed insurance information.

And just as we look to Senator KOHL for important leadership on this issue, we see it from his home State. The State of Wisconsin's Aging Network has found some promising solutions to deal with seniors' confusion. Their Aging Network, with a wide base of support within the State, has developed a commenable one-on-one counseling program and an 800 toll-free Medigap counseling service to help guide people through the maze of health care coverage.

The bill he is introducing today would provide funds for all States to provide an 800 toll-free insurance counseling service. It also attempts to address some marketing abuses in the insurance market that we are all concerned about. While I am not prepared to cosponsor the bill today, I do find it to be exceedingly promising and look forward to working with Senator KOHL on his legislation and on a bill I am currently working on to address this issue.

It is certainly rare that a first-term, first-Congress Senator take on such an active role in aging and health care issues. However, Senator KOHL is a uniquely committed individual and a significant asset to the Aging Committee.

As chairman of the Aging Committee, I will be holding hearings to address the confusion surrounding Medigap policies and other health care coverage. I look forward to continuing to work with Senator KOHL on creative and responsive approaches to these problems.

By Mr. HEFLIN:

S. 2051. A bill to amend the Social Security Act to provide for more flexible billing arrangements in situations where physicians in the solo practice of medicine or in another group practice have arrangements with colleagues to cover their practice on an occasional basis; to the Committee on Finance.

RECIPROCAL CALLS BY PHYSICIANS

● Mr. HEFLIN. Mr. President, I rise today to introduce a bill to provide for more flexible billing arrangements in situations where physicians in the solo practice of medicine or in another group practice have arrangements with colleagues to cover their practice on an occasional basis.

The Health Care Financing Administration seeks to eliminate the long-standing custom of cross-covering, whereby physicians make courtesy calls to patients for their colleagues. This has particularly been a long standing practice on weekends or other vacation days. This professional courtesy may take the place of a formal partnership and is especially necessary in smaller towns to allow independent physicians occasional off-duty time.

In a reciprocal call arrangement, a physician permits other members of his profession to see his patients on off-duty days, with the understanding that he will reciprocate in the same manner by making rounds for his colleagues when needed. It is agreed in such an arrangement that only the regular physician will bill for these services.

The Health Care Financing Administration plans to strictly enforce what it calls reassignment prohibition. This so-called reassignment states that a covering physician must hereafter bill his colleagues' patients for any services rendered, unless the regular physician is his employer. This new directive by the Health Care Financing Administration will certainly wreak havoc among those in the health care field. Administrative expenses for both physicians' offices and Medicare carriers will significantly increase due to the generation of extra bills and paperwork.

A doctor who visits a patient other than his own only once will have to create a file and process paperwork for that one visit. The administrative costs in such an instance may be greater than the cost of the visit itself. It seems much more sensible to have one bill and therefore one claim per patient.

Mr. President, not only is this reassignment prohibition procedure inconvenient to physicians, but to Medicare beneficiaries as well. Physicians have different ways of charging for their services, and their fees vary. It can be very confusing for patients to sort out bills that were submitted by various doctors. This new procedure by the Health Care Financing Administration is cumbersome, bureaucratic, and to my way of thinking, unnecessary.

I urge my colleagues in the Congress to join me in an effort to revoke this senseless directive by the Health Care Financing Administration. This directive seeks to abolish a time-honored tradition among physicians without justification, and will certainly increase the total cost of medical care. The custom of cross covering has existed among medical professionals for many years. Physicians, who are caring for our sick and elderly, should not be forced to change their practice as a result of his ill-advised Government ruling.

Mr. President, I ask unanimous consent that an article from the Alabama MD, the magazine for the Medical Association of the State of Alabama, as well the text of the bill I introduce be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2051

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PURPOSE.

The purpose of this Act is to permit physicians in solo practice and those in another group practice to "cover" Medicare patients for each other and to make it possible for the personal physicians of the Medicare patients to bill and receive reimbursement for professional services rendered by their colleagues who "cover" for them.

SEC. 2. ORGANIZATION.

(a) Section 1842 (b) (6) of the Social Security Act (42 U.S.C. Section 1395 u(b) (6)) is amended by inserting at the end of subsection (A) the following:

(B) payment may be made to a physician who arranges for services to be provided by a second physician on an occasional basis in situations where the first physician is unavailable to provide such services, the beneficiary has arranged to receive medical care services from the first physician, and the claim form submitted to the carrier indicates that the claim is for such "covered" services.

(b) Section 1842 (b) (6) of the Social Security Act (42 U.S.C. Section 1395 u (b) (6)) is further amended—

(1) By striking "(B)" and inserting "(C)" and

(2) by striking "(C)" and inserting "(D)"

SEC. 3. EFFECTIVE DATE.

The amendments made by this Act shall be effective for services provided on or after the date of enactment.

[From the Alabama MD, Dec. 28, 1989]

COVERING PHYSICIANS MUST BILL IN THEIR OWN NAME, HCFA ORDERS

(William H. McDonald)

MASA's Third Party Grievance Task Force, chaired by President Burt Taylor, M.D., urgently appeals to all Alabama physicans to contact their Congressmen and Senators to seek relief from a new HCFA directive on "reassignment prohibition."

Translated from bureaucratese, that is the Washington label for banning the time-honored practice whereby physicians cover for each other on vacations, holidays, weekends and off-days.

By established custom antedating Medicare by at least a century, the regular physician bills the patient for the coverage; he, in turn, reciprocates with the physician who covered for him.

Although the practice is deeply rooted in the history of professional courtesy, HCFA has now informed all carriers that the covering physician must bill in his own name and number, and that it is fraudulent for one physician to bill for services rendered by another, unless a valid employer-employee relationship exists.

The indignation of physicians nationwide was such that this issue was propelled into the forefront of the deliberations of the AMA House of Delegates at its interim meeting early in December.

The AMA Delegates fired off a resolution Dec. 6 calling on AMA to "pursue all appropriate legislative, regulatory, or administrative means to amend or eliminate the inappropriate enforcement of the Social Security Act and/or Medicare regulations in order to make it possible for physicians in solo or group practice to bill and receive payment for professional services to their Medicare

patients rendered by colleagues who provide them with traditional short-term coverage."

Bule Cross Blue Shield of Alabama officials meeting with the Task Force Dec. 19, confirmed that the carrier had been directed by HCFA's Region IV (Atlanta) to enforce the "reassignment prohibition" in Alabama.

Two letters from Alabama physicians on the Dec. 19 agenda referred to the "rumor" that the stricture would be applied in this state. One of these physicians had called his Medicare Provider Affairs Representative to inquire at to the validity of the report:

"I * * * was emphatically told that this represented fraud. I explained that as long as the work was done and was billed only once, I did not understand the basis for fraud. She explained that when a physician billed for a visit he did not make, that was fraud. The fact that another physician performed a service for which he did not bill seemed irrelevant.

"I felt a certain reticence about extending myself further in this direction. To press the issue and to further focus attention on my past billing practices or past coverage arrangements seemed to be a risky venture. * * *"

In view of the directives sent out to all carriers by HCFA's Acting Director of the Bureau of Policy Development, Kathleen A. Buto, his reticence was wise.

The Blues explained to the Task Force that in view of the HCFA mandate, they had no choice but to apply the reg.

Actually it all came to a head last summer when a Colorado physician was sanctioned for fraud because he billed for services rendered by a covering physician.

Robert D. McCartney, M.D., President, of the Colorado Society of Internal Medicine, wrote the Region VII (Denver) Medicare Administrator to express his concern, arguing forcefully for a reconfirmation of the traditional coverage arrangement.

Director Buto's responses to Region VII and to Dr. McCartney now form a memorandum file HCFA has sent to Medicare carriers to support the demand for rigid enforcement of the "reassignment prohibition."

Ms. Buto acknowledged in her policy directive to carriers that "bills are commonly submitted and payment made in the regular physician's name" and that "often the arrangement is reciprocal."

But, she directed, such billing will hearafter be acceptable "Only if the regular physican is the employer of the substitute in the strict sense of the word 'employer'." (She cited Medicare Carriers Manual Sections 3060ff and section 1842 (b) (6) of the Social Security Act.)

Alabama is, as it turns out, relatively late in being brought under the gun in this respect. The Alabama Blues received the get-tough orders in an Oct. 13 memorandum from the Atlanta office of the Region IV Medicare Administrator, who directed all carriers in the region in this fashion:

"If you have not reminded the medical community about the reassignment prohibition in the past 12-month period, please do so in your next bulletin, but in any case no later than three months from the date of this letter."

That would make the deadline for the reminder Jan. 13, 1990.

The Task Force's expressed concerns over the rule had already been made by Dr. McCartney in Colorado and already answered by Ms. Buto, to her own satisfaction if no one else's. Any physician desiring a copy of the HCFA file to carriers may have one for the asking by addressing the request to MASA Executive Director S. Lon Conner, PO Box 1900, Montgomery, AL 36102-1900, telephone, 1-800-392-5668.

Here are some excerpts from that advisory by HCFA's Buto:

"1. Whenever a physician is party to an arrangement permitting one independent physician to bill for the services of another, it would be extremely difficult to pursue cases involving program fraud. In these situations, it would be all too easy for the two physicians to claim that billings for services that were not actually rendered were unintentional errors resulting from poor communication between the two parties."

[Notice in this and the following commentary that Ms. Buto assumes criminal intent by physicians as the overriding rationale for enforcing the "reassignment prohibition."]

"2. Substitute billing arrangements that are intended to be reciprocal may in practice result in arrangements to abuse the Medicare program by manipulating reasonable charge profiles. For example, two physicians may enter into an agreement that permits the physician with the highest charge level to bill for the services rendered by the other physician, not only during vacations and holidays, but also at other times.

"3. In some cases, the regular physician may be required to compensate the substitute physician. It is reasonable to expect that, in some cases, the amount paid to the substitute will be less than the reimbursement received by the billing physician. However, if the billing physician refers his patient to the substitute physician and pockets the difference between the amount received from the program and beneficiary on the one hand and the amount paid the substitute on the other, there may be a violation of the antikickback provisions of section 1128B of the Act."

These concerns are not relevant, Ms. Buto said, if the substitute physician is a bona fide employee of the regular physician in the strictest sense of that relationship. In such cases, if indeed bona fide, the antikickback provisions would not apply.

Ms. Buto then proceeded to answer Dr. McCartney directly, thus making her response part of the policy directive. In doing so, she gave short shrift to his contentions that: the present custom is cheaper and more efficient administratively; that any limitation on the time-honored practice might deprive physicians of necessary leisure and recuperative time-off, with an adverse effect on patient care; etc.

Whatever merit such objections may have, Ms. Buto said, they are outweighed by the three concerns above, those directed at potential fraud and abuse.

Other situations are covered in the memorandum file but all to the same effect—that unless the substitute physician is a valid employee of the regular physician, he must bill for his coverage in his own name and number.

The hands of Blue Cross/Blue Shield of Alabama, in common with those of other carriers, have thus been tied.

If relief from this onerous stricture is to come, The Task Force concluded (as the AMA House of Delegates had concluded two weeks earlier), it must be done by pressure on Congress to demand that HCFA abandon or modify the regulation.

The Task Force urges Alabama physicians to make their appeals to Congressmen a top priority matter; this intrusion on a traditional professional amenity affects all doctors.

Additionally, you will have an opportunity to express your feelings face-to-face with the Alabama congressional delegation at MASA's 13th annual Washington meeting, Feb. 3-5, at the J.W. Marriott Hotel.

In other actions Dec. 19, the Task Force:

Was assured by Blue Cross that physicians may circumvent a query from the Medicare Secondary Payment Program, as to the physician's intentions to file a claim with the VA in the case of eligible veterans, by noting on the Medicare claim form, in the section for services provided, "I do not plan to file these charges with the VA." This should shortcut the Secondary Payer letters, part of an attempt by Medicare to get other agencies, public and private, to pay for services to Medicare patients.

Received from the carrier executives a brochure explaining how UCR is determined in Alabama, with further assurance that this information would be included in the next Provider Fax and, finally, might be published in the Alabama M.D., if there are no objections by legal counsel.

Was assured by the executives that the carrier would study a complaint to the effect that physicians performing office surgery should be reimbursed a "tray fee." ●

By Mr. KASTEN:

S. 2052. A bill to amend the Internal Revenue Code of 1986 to reduce the OASDI tax rate, and to remove Social Security trust funds from Gramm-Rudman; to the Committee on Finance.

SOCIAL SECURITY INTEGRITY AND TAX REDUCTION ACT

Mr. KASTEN. Mr. President, I rise today to address a fundamental issue of tax justice—an issue that goes to the heart of our economic future.

While we were all in our several States, meeting with our constituents, our distinguished colleague Senator PAT MOYNIHAN was leaving us a holiday gift here in Washington—the most breathtaking new economic proposal of our young congressional session.

His idea is that we ought to roll back the 1990 Social Security tax increase. This idea isn't really so new. Some might even call it an old GOP standard—but it's a good idea.

Two years ago, when then-Representative Jack Kemp and I proposed payroll tax cuts as part of an omnibus jobs-and-economic-growth package, our efforts were viewed with some suspicion. Some people were afraid that Jack and I had a hidden agenda, a desire to dismantle Social Security—even though we made clear our strong support for the Social Security system and our disinclination to privatize it or tamper with its basic structure.

No one suspects Senator MOYNIHAN of this kind of ulterior motive—he is a recognized champion of the Social Security system—and that gives the tax cut a great opportunity to move toward enactment. The case is compelling:

The working men and women of America need a tax cut.

A tax cut would help the economy.

And—after all—we're only using this money to hide the true dimensions of the budget deficit, not to provide for the future of America's retirees.

The regressive Social Security tax is now imposing a larger burden on the average taxpayer than the Federal income tax. A full 74 percent of all taxpayers pay more in combined payroll taxes than they do in income taxes. From 1955 to 1990, the basic payroll tax will have risen from 4 to 15.3 percent—a nearly fourfold increase. From 1955 to 1988, the tax burden on Americans rose twice as fast as their income. In 1955, a median-income family of four paid Federal taxes at the rate of 9 percent per year. In 1970, they paid 16 percent. In 1988, they paid 24 percent.

The maximum Social Security tax for working families is now a whopping $3,180. Some have argued that this regressiveness is the product of the Reagan tax cuts of 1981 and 1986—but the exact opposite is true. The Reagan cuts removed millions of low-income taxpayers from the income tax rolls—and that's why the payroll tax now accounts for such a disproportionate share of the tax burden borne by these Americans.

These payroll taxes hurt businesses and workers by increasing labor costs and reducing take-home pay. Because of international competition, American businesses are forced to reduce the number of workers they employ. And—as usually happens when bad economic policy is enacted—the chief victims are those at the bottom of the economic ladder.

According to a recent study by the Institute for Research on the Economics of Taxation, the Social Security tax hikes of 1988 and 1990 will increase the tax burden of working Americans by $500 billion over the next 15 years—costing the economy an estimated 500,000 jobs and reducing GNP and capital stock by $100 billion.

In short, the tax increase would have a devastating effect on economic growth. And today, with economic growth slowing to less than 1 percent, we need this economic stimulus more than ever. We need to give the Federal Reserve a helping hand. We have to cut payroll and capital gains taxes on the fiscal side, and allow the Fed to concentrate its monetary policy on the goal of price stability. Cutting the payroll tax would not only curb Congress' appetite to spend the Social Security surplus; it would leave today's young workers and families with more after-tax income to invest in the real economy.

So I agree on principle with the approach Senator MOYNIHAN has outlined. There are, however, numerous objections to his plan which we would do well to confront straightforwardly.

These objections have varying degrees of merit. Some are pure demagoguery; others contain a grain of truth; and still others are very serious indeed.

The loudest objection—that a payroll tax cut would reduce benefits to retirees—is simply false. In fact, some are trying to turn this into an issue of generational warfare, turning our young people against our senior citizens and vice versa. This is irresponsible—there is no excuse for misleading seniors about nonexistent benefit cuts.

Make no mistake: With or without this tax cut, Social Security will be solvent for at least three decades—according to Social Security Administration projections. So to those who wish to frighten our elderly citizens, let us be clear. No benefit cuts.

A more serious objection is that the payroll tax cut will result in a sizable increase in the deficit, completely throwing off the Gramm-Rudman deficit reduction process and leading to higher interest rates.

I'd like to put this deficit issue in perspective. The Congressional Budget Office projects that in fiscal year 1991, the deficit will be only 2.5 percent of GNP. The Moynihan tax cut proposal would increase the deficit by $42 billion on a fiscal year basis, or 0.76 percent of GNP—resulting in a deficit that is 3.26 percent of GNP.

As recently as 1983, the deficit was nearly twice that high—or 6.3 percent of GNP. While it's clear that we have to do more to bring the deficit down, we are in fact making progress.

The fears of high interest rates are unjustified by the evidence. A 1984 study completed by the Reagan-Bush Treasury Department concluded that there is little proven connection between budget deficits and high interest rates.

I think that study was correct.

I think nonetheless that there is substantial room for improvement in the Moynihan tax cut proposal. I would like at this point to introduce a bill that addresses this fiscal concern, as well as the concerns about potential benefit cuts and long-term Social Security solvency.

Today, I am introducing a bill that would cut the payroll tax; ensure Social Security solvency; and provide for an honest balanced budget by 1997. The bill is called the Social Security Integrity and Tax Reduction Act of 1990.

Mr. President, my bill would retroactively reduce the 1990 Social Security payroll tax on both employers and employees from 6.2 percent to 5.9 percent, and further reduce the rate to 5.6 percent in 1991 and 5.3 percent in 1992. The result is a tax cut of up to $154 for the American taxpayer this year, $326 per taxpayer in 1991, and $519 in 1992.

These tax cuts would reduce labor costs, increase job opportunities, and sharpen America's competitive edge.

And this is essential to the Social Security System, because its solvency depends on America's long-term productive capacity.

It is essential that the Social Security trust fund be made secure. My bill would exclude the Social Security trust fund from deficit calculations beginning in fiscal year 1991. Only by making Social Security truly independent can we guarantee its integrity, protecting current and future benefits and restoring discipline to the rest of the budget.

And we have to level with the American people about the true size of the deficit. My bill would raise the Gramm-Rudman targets to reflect the removal of the Social Security trust fund from the general budget.

The 1983 Social Security reforms raised payroll taxes in the expectation of a slow-growth decade. The opposite has occurred. The economy has boomed—and the result has been the excessive surplus which we are now diverting to hide the general budget deficit.

The tax reduction I am proposing—down to a 5.3 percent rate—would help reduce this burdensome payroll tax. And it would leave a substantial surplus to protect the solvency of the Social Security System in the event of a severe economic downturn.

And I think that's important. If economic disaster strikes, we should have a cushion in place to protect retirees.

The resulting increase in the deficit will be at least partially offset by increased economic activity, lower labor costs, and greater competitiveness.

But more importantly, the American people will have increased take-home pay to save and invest. Some have suggested that we ought to mandate the use of tax-deferred savings vehicles such as IRA's and 401(k) plans. I disagree; we shouldn't mandate them, but we ought to encourage all Americans to invest in them.

And I think that if we leave these economic choices to the people, they will do the right thing—and invest in our country's future.

Let's begin a national crusade for savings and investment. We should begin by enacting President Bush's proposed Family Savings Act, which would grant tax-free status to long-term deposits. We should continue by expanding that approach and building on it. And—most importantly of all—we should call on all Americans to teach their children the habits of thrift that are so essential to building our national destiny and their own retirement security.

The bottom line is this: The central choices about the Nation's economic future must be restored to the American family. That ought to be the goal of any intelligent and far-sighted economic policy.

That's why we have to reduce the payroll tax. It's also why we have to reduce the capital gains tax, which unlike a payroll tax cut would actually increase revenues to the Federal Treasury while also sparking economic growth.

Mr. President, let's cut the payroll tax—to boost the income of the average American. Let's take Social Security off budget—to protect benefits for America's retirees. And let's mandate a balanced budget by 1997—to restore fiscal responsibility to the Federal Government.

The Social Security Integrity and Tax Reduction Act of 1990 would be a great step forward for all three of these goals. We have a historic opportunity to strike a blow for today's middle- and lower-income Americans, and for tomorrow's retirees as well. This tax cut will create jobs, expand economic opportunities, and restore honesty in the Federal budget. That's who we should be thinking of—every step of the way—as we advance this proposal.

Mr. President, I ask unanimous consent that the text of the bill and supporting documents be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2052

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This bill shall be known as the "Social Security Integrity and Tax Reduction Act."

SEC. 2. FINDINGS AND STATEMENT OF POLICY.

(a) FINDINGS.—The Congress finds that:

(1) The Congress, in amending the Social Security Act in 1983, primarily intended to restore and ensure the solvency of the social security trust fund.

(2) Combined with the 1983 increases in the old-age, survivors, and disability insurance (OASDI) payroll tax rate, the robust economic expansion of the 1980s—with 18,000,000 new jobs created—generated a larger than expected surplus in social security payroll tax receipts.

(3) The social security surplus is invested in United States Treasury securities, enabling the Government to reduce Federal borrowing requirements and to finance the general Government expenditures.

(4) According to actuarial projections of the Social Security Administration, the social security system will be financially solvent for at least the next three decades with or without the excess social security payroll tax revenues.

(5) A reduction in the combined OASDI payroll tax rate would reduce labor costs of businesses, increase job opportunities for American workers, enhance America's international competitiveness, and increase the gross national product.

(6) Government policies that increase the Nation's productive capacity and the gross national product will help protect the solvency of the social security system in the next century and ease the potential tax burden on future workers.

(b) POLICY.—It is the policy of Congress that:

(1) The social security surplus should be reduced and returned to both employers and employees in the form of reductions in the OASDI payroll tax rate.

(2) The social security reserves should be removed from the calculations of the Federal budget deficit for the purposes of the Gramm-Rudman law.

(3) The social security trust fund should maintain a surplus equal to or greater than 100 percent of expenses after fiscal year 1991 in order to ensure the solvency of the social security program in the event of a downturn in the economy of the United States.

(4) A financially sound and independent social security system must be preserved in order to guarantee the provision of social security benefits for our Nation's senior citizens.

(5) The remainder of the Federal budget, excluding the social security tax surplus, should be balanced by 1997.

SEC. 3. REDUCTION IN FICA TAXES AND TAXES ON SELF-EMPLOYMENT INCOME.

(a) FICA TAXES.—

(1) TAX ON EMPLOYEES.—The table in section 3101(a) of the Internal Revenue Code of 1986 (relating to rate of tax on employees for old-age, survivors, and disability insurance) is amended to read as follows:

"In the case wages received during:	The rate shall be:
1990	5.9 percent
1991	5.6 percent
1992 and thereafter	5.3 percent."

(2) TAX ON EMPLOYERS.—The table in section 3111(a) of such Code (relating to rate of tax on employers for old-age survivors, and disability insurance) is amended to ready as follows:

"In the case wages paid during:	The rate shall be:
1990	5.9 percent
1991	5.6 percent
1992 and thereafter	5.3 percent."

(b) TAX ON SELF-EMPLOYMENT INCOME.—The table in section 1401(a) of the Internal Revenue Code of 1986 (relating to rate of tax on self-employment income for old-age suvivors, and disability insurance) is amended to read as follows:

"In the case of a taxable year		Percent:
Beginning after:	And before:	
December 31, 1989.	January 1, 1991.	11.8
December 31, 1990.	January 1, 1992.	11.2
December 31, 1991.		10.6"

SEC. 4. REMOVING SOCIAL SECURITY TRUST FUNDS FROM GRAMM-RUDMAN.

(a) EXCLUSION OF RECEIPTS AND DISBURSEMENTS OF SOCIAL SECURITY TRUST FUNDS WHEN CALCULATING MAXIMUM DEFICIT AMOUNTS.—

(1) DEFINITION OF DEFICIT.—(A) The second sentence of paragraph (6) of section 3 of the Congressional Budget and Impoundment Control Act of 1974 (2 U.S.C. 622(6)) is repealed.

(B) Section 275(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985 (2 U.S.C. 901 note) is amended by striking out "and the second sentence of section 3(6) of such Act (as added by section 201(a)(1) of this joint resolution)".

(2) SOCIAL SECURITY ACT.—Subsection (a) of section 710 of the Social Security Act is amended by—

(A) inserting after "Federal Disability Insurance Trust Fund," the following: "including interest received by the trust funds,"; and

(B) striking "shall not be included in the totals of the budget" and inserting "shall not be included in the budget deficit or any other totals of the budget".

(3) EFFECTIVE DATE.—The amendments made by paragraphs (1) and (2) shall apply with respect to fiscal years beginning after September 30, 1990.

(b) MAXIMUM DEFICIT AMOUNT.—Section 3(7) of the Congressional Budget and Impoundment Control Act of 1974 is amended by striking subparagraphs (F), (G), and (H) and inserting the following:

"(F) with respect to the fiscal year beginning October 1, 1990, $138,000,000,000;

"(G) with respect to the fiscal year beginning October 1, 1991, $113,000,000,000;

"(H) with respect to the fiscal year beginning October 1, 1992, $98,000,000,000;

"(I) with respect to the fiscal year beginning October 1, 1993, $75,000,000,000;

"(J) with respect to the fiscal year beginning October 1, 1994, $50,000,000,000;

"(K) with respect to the fiscal year beginning October 1, 1995, $25,000,000,000; and

"(L) with respect to the fiscal year beginning October 1, 1996, $0.".

(c) CONFORMING CHANGES.—

(1) DEFINITION OF MARGIN.—Section 257(10) of the Balanced Budget and Emergency Deficit Control Act of 1985 is amended by—

(A) striking "1992" and inserting "1996"; and

(B) striking "fiscal year 1993" and inserting "fiscal year 1997".

(2) EFFECTIVE DATE.—Section 275(b)(1) of the Balanced Budget and Emergency Deficit Control Act of 1985 is amended by striking "1993" and inserting "1997".

SEC. 5. CONGRESSIONAL INTENT.

The Congress is fully committed to protecting the independence, strength, and longevity of the social security system. No provision or amendment of this Act, taken alone or in conjunction with other provisions or laws, allows any reduction, either nominal or real, in the provision of social security benefits.

OASDI Reserves under the Kasten Plan (II-B)

THE SOCIAL SECURITY INTEGRITY AND TAX REDUCTION ACT OF 1990

OBJECTIVES

Reduce excessive Social Security payroll taxes for working Americans.

Protect the integrity of Social Security by creating a truly independent Social Security program and ruling out benefit cuts.

Balance the non-Social Security budget by 1997.

PROPOSAL

Tax reduction: Retroactively reduces the 1990 Social Security payroll tax on employers and employees from 6.2 percent to 5.9 percent. The tax is further reduced to 5.6 percent in 1991, and to 5.3 percent in 1992.

Social Security off-budget: Excludes the Social Security tax surplus from the deficit calculations beginning in Fiscal Year 1991.

Extension of Gramm-Rudman-Hollings targets: Raises deficit targets beginning in Fiscal Year 1991 (through Fiscal Year 1993) by the amount equal to the Congressional Budget Office's latest projections of the Social Security tax surplus. In the first three years, no added deficit reduction is needed. Extends targets in out-years through Fiscal Year 1997, in which a balanced budget is achieved.

BUDGET TARGETS

[In billions of dollars]

	Fiscal year—						
	1991	1992	1993	1994	1995	1996	1997
Current GRH targets	64	28	0				
SSITRA targets	138	113	98	75	50	25	0

BACKGROUND

Since the Social Security program began, the combined payroll tax has risen steadily—from 2 percent for the first $3,000 in earnings in 1937, to 6 percent of wages in the 1960s, to 15.3 percent on earnings up to $51,300 today. 74 percent of all taxpayers now pay more in combined payroll taxes than they pay in Federal income taxes.

The 1983 Social Security reforms are based on the implausible concept that the government can build up a huge reserve that can be drawn upon when it comes time for current workers to retire. The fact is that the tax surplus is invested in Treasury securities—and used to finance other programs of the Federal government. The Social Security Reserve is nothing but a stack of IOUs from the Treasury. Furthermore, if overly large reserves could truly be created, they are apt to be used for new benefit spending programs.

The 1983 Social Security reforms raised payroll taxes based on expectations of sluggish economic growth and job creation for the remainder of the decade. But the 1980s economic boom generated a larger-than-expected tax surplus. Excessive payroll taxes are now being used to mask the true size of the Federal budget deficit.

BENEFITS FOR AMERICA'S WORKERS AND ELDERLY

America's workers will receive up to $154 each in 1990, $326 in 1991 and $519 in 1992.

Social Security benefits will be protected by creating a truly independent Social Security system. Reducing the excessive Social Security tax surplus will prevent Congress from raiding the pension program. A 5.3 percent SS payroll tax rate will provide an adequate SS surplus to guarantee benefit payments in the event of a severe economic downturn.

DEFICIT REDUCTION

The deficit can be reduced without raising taxes—if we adjust the Gramm-Rudman deficit targets by the amount of the projected SS surplus in FY 1991-1993.

Lowering the Gramm-Rudman deficit targets to balance the non-Social Security budget by FY 1997 would require additional deficit reduction beyond what is mandated in current law.

ECONOMIC GROWTH AND JOB CREATION

According to a recent study by the Institute for the Research on the Economics of Taxation (IRET), the payroll tax hikes of 1988 and 1990 will increase the tax burden on working Americans by $500 billion over the next 15 years, costing the economy an estimated 500,000 jobs and reducing GNP and capital stock by $100 billion. By contrast, IRET estimates that every dollar of reduction in Social Security taxes would expand economic output by 68 cents.

Social Security tax cuts will reduce labor costs, enhance U.S. competitiveness, create new job opportunities and increase economic growth.

SOCIAL SECURITY: MASKING THE DEFICIT

By Mr. DANFORTH:

S. 2053. A bill to amend certain provisions of title 5, United States Code, to provide for an increased maximum rate of pay for specially qualified scientific and professional personnel, and for other purposes; to the Committee on Governmental Affairs.

INCREASE IN MAXIMUM PAY FOR CERTAIN SCIENTIFIC AND PROFESSIONAL PERSONNEL

● Mr. DANFORTH. Mr. President, last year, Congress approved a pay raise for the top scientists and engineers in the Federal Government. The increase is not enough, however, to bring the salaries for Government scientists, engineers, and other professionals in line with their counterparts in the private sector and academia. Consequently, the Federal Government is facing a personnel crisis in our premier scientific research agencies, such as the National Institutes of Health [NIH], the National Science Foundation [NSF], and the National Aeronautics and Space Administration [NASA], and in departments such as Defense and Energy. The pay caps on Senior Executive Service [SES] salaries prevent those agencies and departments from recruiting and retaining the highly qualified and specialized scientists, physicians, and engineers they need.

For example, at NIH, the highest paid scientists are earning less than half the average amount paid to chairmen of clinical science departments at American medical schools. During the last 5 years, senior scientists have abandoned NIH for positions in academia, industry, and independent research laboratories at salary increases ranging from 50 to 300 percent. Salary levels for existing NIH vacancies last year were less than candidates' current salaries by amounts varying from 20 to 263 percent. For example, the salary of an NIH Ophthamology Clinic director was $62,000. An ophthamologist at Washington Hospital Center earned $225,000.

At NASA, senior scientists and engineers have their pay capped at $83,600, while the peers they manage in the private sector are earning up to $250,000. For example, an Assistant Associate Administrator at NASA earns no more than $81,400. A scientist in a similar position at General Electric earns $150,000. The NASA Di-

vision Chief at Ames Research Center recently left his $71,910 per year job to take a position at Apple Computer paying more than double his NASA salary.

The bill I am introducing today establishes incentives for specially qualified scientific and professional personnel to accept employment with the Federal Government by permitting the President to exempt from the Federal salary cap certain employees, such as scientists, engineers, and doctors, who are difficult to recruit and retain. Under this proposal, the President would be required to publish a list of Federal Government employment requirements for highly specialized or skilled scientists, physicians, and engineers, who, in the President's judgment, cannot be recruited or retained for Federal employment because of substantial pay differentials between the private sector and the Federal pay ceiling. A listing of these employees would have to be submitted to the Congress no later than 30 days from enactment and, therefore, at the beginning of each fiscal year. Finally, the President would have the authority to set the salaries for these scientists, engineers, and physicians at whatever level is necessary to attract and keep them.

Mr. President, I ask unanimous consent that the text of the legislation and a summary of its provisions be included in the RECORD immediately following this statement.

Mr. President, the Federal Government cannot recruit and retain highly skilled and experienced scientists, engineers, and physicians. We've admitted to this problem for a number of years. The report of the White House Science Council, issued by David Packard, the distinguished chairman of Hewlett-Packard Corp., in May 1983, had this to say:

> The key to a laboratory's success is a high quality and properly motivated scientific staff. The inability of many Federal laboratories—especially those under Civil Service constraints—to attract, retain, and motivate qualified scientists and engineers is alarming. * * * There are many reasons for this difficulty, but the main one is non-competitive pay and benefits compared with industry and universities.
>
> It is important that Federal laws and regulations be modified to exempt scientific and engineering personnel * * * from the unduly regid hiring, salary, and promotion rules of the Civil Service system.

Mr. President, the situation has deteriorated since that 1983 report. My legislation accomplishes in a simple but comprehensive manner the salary reform recommended by the Packard Review Panel. This proposal reflects the recommendations of the panel, and the 1989 National Commission on the Public Service, chaired by Paul Volcker, that the pay ceiling be lifted for certain scientists, engineers, and physicians, and that the various agencies and departments be free to determine how to fit the salary priorities within the constraints of their appropriations.

We cannot expect to maintain America's preeminence in science and technology if we continue to pursue a penny-wise and pound-foolish Federal compensation policy. The legislation I am introducing today corrects this problem.

There being no objection, the bill and summary was ordered to be printed in the RECORD, as follows:

S. 2053

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

REPORT TO THE CONGRESS OF FEDERAL SCIENTIFIC AND PROFESSIONAL PERSONNEL NEEDS

SECTION 1. No later than 30 days after the date of the enactment of this Act, the President shall submit a report to the Congress that—

(1) states the employment requirements of the Federal Government for specially qualified scientific and professional personnel (such as scientists, physicians, engineers, and other professionals) who are most difficult to recruit or retain in Federal service;

(2) states the number of positions which would be established under section 3104 of title 5, United States Code (as amended by section 2 of this Act) to meet such employment requirements; and

(3) lists each such position and the proposed annual rate of pay for each such position.

EMPLOYMENT AUTHORITY

SEC. 2. Section 3104 of title 5, United States Code, is amended—

(1) in subsection (a)—

(A) in the first sentence—

(i) by striking out "The Director of the Office of Personnel Management" and inserting in lieu thereof "The President"; and

(ii) by striking out "(not to exceed 517)"; and

(B) in the second sentence by striking out "Director" and inserting in lieu thereof "President"; and

(2) by striking out subsections (b) and (c) and inserting in lieu thereof the following:

"(b) On October 1 of each fiscal year, the President shall submit a report to the Congress that—

"(1) states the number of positions that are established under the provisions of subsection (a);

"(2) lists each positon established under subsection (a) and the rate of pay for each such position; and

"(3) states the reasons for the necessity of maintaining each such position under the provisions of subsection (a).".

INCREASE IN MAXIMUM RATE OF PAY

SEC. 3. Section 5371 of title 5, United States Code, is amended—

(1) by striking out "the Office of Personnel Management" and inserting in lieu thereof "the President"; and

(2) by striking out "nor more than the maximum rate for GS-18".

ADJUSTMENTS IN RATES OF PAY

SEC. 4. Section 5308 of title 5, United States Code, is amended by inserting before the period at the end thereof "(except for a position that the rate of pay is fixed under the provisions of section 5371)".

EFFECTIVE DATE

SEC. 5. The amendments made by section 2, 3, and 4 of this Act shall be effective 90 days after the date of the enactment of this Act.

BILL TO PROVIDE INCENTIVES FOR SPECIALLY QUALIFIED SCIENTIFIC AND PROFESSIONAL PERSONNEL—SUMMARY OF PROVISIONS

Section 2 amends section 3104 of title 5 to require the President to establish, and from time to time revise, the maximum number of scientific or professional positions necessary for carrying out research and development functions which require the services of specially qualified personnel which may be established outside the General Schedule, and to submit a report to Congress each new fisacl year stating the number of positions that are established under this section, listing the positions established and the rate of pay for each, and giving the reasons for maintaining each position.

Section 3 amends section 5371 of title 5 to require the President to fix the annual rate of basic pay for scientific and professional positions established under section 3104.

Section 4 amends section 5308 of title 5 to exempt from a pay cap those positions for which the rate of pay is established by the President under section 5371.

Section 5 provides that the amendments made by sections 2, 3, and 4 will be effective 90 days after the date of enactment.●

By Mr. DODD (for himself, Mr. BRADLEY, Mr. ROCKEFELLER, Mr. HARKIN, Mr. D'AMATO, Mr. KOHL, Mr. CONRAD, Mr. LIEBERMAN, Ms. MIKULSKI, Mr. SIMON, Mr. METZENBAUM, Mr. SANFORD, Mrs. KASSEBAUM, Mr. KENNEDY, and Mr. BYRD):

S. 2054. A bill to amend the Public Health Service Act to authorize grants and contracts for projects providing primary pediatric care to disadvantaged children, and for other purposes; to the Committee on Labor and Human Resources.

PRIMARY PEDIATRIC OUTREACH AND CARE FOR DISADVANTAGED CHILDREN ACT

Mr. DODD. Mr. President, I rise today to introduce the Primary Pediatric Outreach and Care for Disadvantaged Children Act of 1990. I submit this legislation, Mr. President, in response to the dire needs of many American children who not only are without health care but who also lack the means to seek it.

For many children in our country, now is a time of want and peril. Many are homeless; others are neglected or functionally without parents; some are cruelly abused. No other segment of our population suffers more from the effects of poverty or drug abuse.

I cannot state, Mr. President, with certainly how many children are in such need. None of us know for certain. But I know that the problem is large and that the consequences of this problem are far reaching. The National Academy of Sciences estimated that in 1988, 100,000 children in this country go to sleep homeless every night. Disturbing as that number is,

those who are homeless at any one time are but a subset of a far larger total who have been or will be homeless, living marginally in substandard or overcrowded housing.

Concurrently, child welfare agencies have been overwhelmed by the cases of neglected and abused children. Many of them have addicted parents and receive attention only after extreme deprivation or harm. Others are discovered by accident in drug busts. These cases are now commonplace to local police and social workers. We can only guess at the figures nationwide.

The dramatically rising infant mortality rate in Washington, DC, and other urban centers linked to the use of crack cocaine are startling indicators of how children are often the principal victims of substance abuse. And then our children of children, born to teenage mothers, not only may the means such as health insurance be lacking, but also the knowledge, maturity and general wherewithal to properly look after a child's interest.

Add these pieces altogether and a frightening mosaic of a lost generation emerges. Children aging but not growing amidst dislocation, disorder and disease, and if they do make it to adulthood, Mr. President, what kind of adults will they be? Homelessness, for instance, deprives a child of security, privacy and consistency, thereby interfering with education and personality development. Children who are abused are often future child abusers. Likewise, substance abuse and criminal behavior are often learned along generation lines.

This legislation I am introducing this afternoon provides a start and only a start to help reach these children at risk and in need. It does not seek to solve their problem, but only identify and reach them. It authorizes the Secretary of Health and Human Services to make grants available for local agencies and institutions, public or nonprofit, to provide primary pediatric outreach care. Such care could be therapeutic or preventative and would include immunizations, acute care, health screenings and growth assessments.

The outreach programs would work in tandem, Mr. President, with community health centers and local hospitals. Children with special problems could then be identified and referred to a specialty, mental health and social services. These outreach programs could also track and follow up on children who might otherwise be lost in the system.

To be eligible, Mr. President, the programs would have to demonstrate the ability to actively reach disadvantaged children. Federal funds would match local funds, private or public. The inspiration of this legislation, Mr. President, and a potential model for other programs is the New York children's health project. Based in the Department of Pediatrics at the New York Hospital Cornell Medical Center, it delivers health care to homeless children via mobile medical vans. In its first year of operation with only one and a half vans in the city of New York, 3,000 homeless children were seen in 6,700 separate patient encounters. Over 2,000 children were immunized, children who would likely have remained—in fact, not likely, Mr. President, would have remained unvaccinated otherwise. The beauty of this program, however, goes beyond its numbers because the vans adhere to a fixed schedule; they create a reliable, structured health care service where none previously existed. The program remains accessible to families through a 24-hour telephone number. Problem cases are followed up.

Over 275 children have been referred to the medical center for special services. All children are entered into a computer system permitting follow-up and access to medical records regardless of where they may be found a week, a month or a year later. Each month more than 200 women, infant and children certifications for food supplementation are issued.

In addition, the New York children's health project operates a substance abuse prevention program. Its methods are innovative and superbly adapted to local conditions. The project serves immediate needs but perhaps more important, Mr. President, it acts as a crowbar to pry an opening to these children through which interventions and comprehensive services can flow.

This concept of reaching these children works in New York and I believe it ought to be feasible in other cities and rural areas throughout this country. Variations could be adapted to Appalachia and to migrant workers in the West. It certainly is a fact that these children have complex and urgent needs, and we all know that. They do not have the means to fend for themselves and too often do not have the family structure to provide the needed support. In this context, traditional passive health care, responding only when sought, is unable to provide the answer, Mr. President. The evidence could be found in statistics from the U.S. Immunization Service.

In 1985, a smaller percentage of children, age 2 and younger, were fully immunized against polio, measles, rubella, mumps and DPT than in 1980. Approximately 20 percent of all infants and 40 percent of nonwhite infants had not received the recommended doses of polio vaccine.

This legislation establishes no Federal bureaucracy. It simply fosters and encourages worthy local initiatives and the exchange of information and experiences among them. Language in this year's Domestic Volunteer Service Act, moreover, would permit the inclusion of VISTA volunteers in such a program as I have described. The Primary Pediatric Outreach and Care for the Disadvantaged Children Act of 1990 is endorsed, I might add, Mr. President, by the American Academy of Pediatrics, the National Association of Children's Hospitals and related institutions, the National Network of Runaway and Youth Services.

Mr. DODD. Mr. President, I also note, as I send this legislation to the desk, that this legislation is being cosponsored by Senators BRADLEY, ROCKEFELLER, HARKIN, D'AMATO, KOHL, CONRAD, LIEBERMAN, MIKULSKI, SIMON, METZENBAUM, SANFORD, KASSEBAUM, KENNEDY, and BYRD.

Mr. President, I ask unanimous consent that correspondence from the American Academy of Pediatrics, from the National Association of Children's Hospitals and related institutions, the National Network of Runaway and Youth Services be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2054

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Primary Pediatric Outreach and Care for Disadvantaged Children Act of 1990".

SEC. 2. PRIMARY PEDIATRIC CARE FOR DISADVANTAGED CHILDREN PROGRAM.

Subpart V of part D of title III of the Public Health Service Act (42 U.S.C. 256 et seq.) is amended—

(1) by adding after the subpart heading the following:

"CHAPTER 1—GRANT PROGRAM"; and

(2) by adding at the end thereof the following new chapter:

"CHAPTER 2—PRIMARY PEDIATRIC CARE FOR DISADVANTAGED CHILDREN PROGRAM

"SEC. 340A. PRIMARY PEDIATRIC CARE FOR DISADVANTAGED CHILDREN PROGRAM.

"(a) DEFINITIONS.—As used in this section:

"(1) PRIMARY PEDIATRIC CARE.—The term 'primary pediatric care' means—

"(A) preventive care including anticipating guidance, examinations and appropriate early treatment, immunizations, and other services designed to promote health and prevent disease;

"(B) acute illness care, including diagnosis and early treatment of illnesses in order to prevent complications or the development of chronic disorders;

"(C) evaluations conducted to detect physical abuse, sexual abuse, or neglect of children; and

"(D) continuing care of individuals suffering from certain chronic diseases or disabling conditions.

"(2) OUTREACH.—The term 'outreach' means—

"(A) the intensive identification of isolated and vulnerable children; and

"(B) the undertaking of comprehensive assessments and referrals for purposes of pro-

viding immediate direct care and access to health care systems.

"(b) AUTHORITY.—The Director may make grants to, and enter into contracts with, public and nonprofit private organizations, agencies, and institutions, and with individuals to pay part or all of the costs of establishing programs (such as the New York Children's Health Project) designed to provide high quality primary pediatric care to economically disadvantaged children and adolescents who, on the date of enactment of this section, do not have access to such care as a result of geographic, cultural, financial, and other barriers, for the purposes described in subsection (c), or for operating such programs, or both.

"(c) ELIGIBLE ACTIVITIES.—A recipient shall use funds available under this section to—

"(1) provide child adolescent outpatient facilities or, where appropriate, mobile medical units, staffed by physicians, nurse practitioners, and other health care providers to provide primary care services;

"(2) establish an extensive followup system to ensure maximum consultative and referral visits for comprehensive health needs;

"(3) provide, for adolescents—

"(A) prenatal care;

"(B) substance abuse detection and preventive and therapeutic counseling; and

"(C) other services designed to meet the particular needs of adolescents;

"(4) provide evaluation and treatment services for behavioral and emotional disorders either directly or through referrals to appropriate specialists;

"(5) establish a health service program for children in foster care;

"(6) establish a program to provide medical services and community referrals to runaway and homeless youth;

"(7) establish a program to provide continuous, comprehensive care for children with special medical needs, particularly children with disabilities and chronic illness;

"(8) establish programs for other underserved children;

"(9) establish formal linkages with facilities providing necessary referral or ancillary services, including hospital outpatient and inpatient care, educational institutions, Head Start programs, and social welfare and child abuse programs; and

"(10) devise methods of data collection, including statistics concerning children and families and the specifics of the health care needs of such children and families which should enable the tracking of families and promote a continuum of health care.

"(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section, $10,000,000 for fiscal year 1991, and such sums as are necessary for each succeeding fiscal year.".

THE NATIONAL NETWORK OF RUNAWAY AND YOUTH SERVICES, INC.,
Washington, DC, January 31, 1990.

Hon. CHRISTOPHER J. DODD,
Chairman, Senate Labor and Human Resources Subcommittee on Children, Family, Drugs, and Alcoholism, Washington, DC.

DEAR SENATOR DODD: The National Network of Runaway and Youth Services wishes to add its enthusiastic support to the Primary Pediatric Outreach and Care for Disadvantaged Children Act of 1990. We believe this bill is an important step in making health care services more available and accessible to disadvantaged children and youth.

The National Network represents over 900 youth-serving agencies across the country, which daily serve hundreds of young people who have become disconnected from community life—their parents, schools, churches and synagogues, and health care providers. These youth, many of whom have been abused and neglected, live without the adult support and guidance we want for our children. They are at risk for long-term homelessness, increased drug experimentation and dependency, exploitive sexual experiences, early pregnancy, and AIDS/HIV infection.

Dr. Robert Deisher, who is the Department Chair for Adolescent Medicine at the University of Washington in Seattle, often speaks of the fact that teenagers are less likely to receive basic health care services than any other age group. In his work with street youth in the Seattle area that has spanned over two decades, Dr. Deisher has consistently found that these young people are more likely to have chronic physical and mental health problems than their peers who are not runaways or homeless. Recent studies highlight some of the serious problems these young people are encountering.

Homeless youth are nearly twice as likely to suffer from chronic physical ailments as their non-homeless counterparts.

Thirty-one percent of the young women aged 16–19, who were seen in clinics for the homelsss in 19 cities, were pregnant, as compared to 9% of the control group used in the study. This was the highest pregnancy rate for any age group of homeless women.

Reported rates of substance abuse among homeless adolescents range between 70–85%.

Reported rates of clinical depression among homeless youth range from 29% to 84%.

Your bill, Senator Dodd, will help disenfranchised children and adolescents receive the very basic and preventive health services that they are currently denied, because of poverty or life circumstances which dictate that they are living without the protection of their parents or the State. The Primary Pediatric Outreach Care bill also provides another critical service for runaway youth—community referrals.

Noting the number of youth seeking shelter who had physical complaints, several of our member agencies in Boston, Portsmouth, R.I., and other cities pioneered the technology of mobile health care. They found that the promise of quality health care that was easily accessible attracted youth who typically avoided contact with adults and serviced providers. Their street outreach workers have successfully used the van as a base in urging youth to come in off the streets, enter emergency shelter, and begin the process of either reuniting with their families or finding other stable and safe living arrangements.

"Never in the history of this country has the importance of sheltering children from the risks and demoralizing atmosphere of street life . . . been less in need of argument." This statement was made in 1915 in a government report in England. It holds true for this country in 1990. We applaud your efforts to bring needed services to America's children and youth.

Sincerely,

JUNE BUCY,
Executive Director.

THE NATIONAL ASSOCIATION OF CHILDREN'S HOSPITALS AND RELATED INSTITUTIONS, INC.,
Alexandria, VA, January 25, 1990.

Hon. CHRISTOPHER J. DODD,
Chairman, Subcommittee on Children, Family, Drugs and Alcoholism, U.S. Senate, Washington, DC.

DEAR SENATOR DODD: NACHRI, the only national and voluntary association of children's hospitals, commends your efforts and the work of the Subcommittee on Children, Family, Drugs and Alcohol to address the needs of disadvantaged children and high-risk children for primary health care. The Primary Pediatric Care for Disadvantaged Children Act of 1990 will begin to fill the gaps in health care which impede poor, disadvantaged and at-risk children from receiving the basic health services they need.

By virtue of their special missions, children's hospitals are in a unique position to see, first-hand, emerging challenges to children's health and their access to care. Children's hospitals serve children who are very sick, children with the very specialized health care needs of chronic illness, and children who come from low income families. Indeed, nationwide 33% of their patients come from poor families—a level exceeded only by inner city public hospitals. Therfore, children's hospitals confront daily the inadequacies of our current system of health care financing and the resultant lack of access to the most basic primary care services, with its impact on the health status of our children.

The children's hospitals applaud this legislation as it addresses the immediate needs of a particularly vulnerable group of children—those without any access to routine health care—the "medically homeless". These children are at especially high risk for poor health status. The system of "mobile medical units" and "child health stations" that would be supported through this legislation will seek the children in need, giving them the opportunity to obtain needed services and to be integrated into established programs of care.

This legislation is one important step towards providing access to appropriate and adequate health care services to children in need. However, it should not be accepted as a panacea for the weaknesses of our health care system. What is truly needed, above and beyond this bill, is an enlightened social policy that includes much broader reforms of the ways in which health care is financed and made accessible to all children.

Such a social policy was embodied in your legislation—The Younger Americans Act of 1987. The Younger Americans Act would result in a national policy and commitment to our children and youth. The children's hospitals look forward to intensifying their work with you and others to achieve such a national commitment to all the needs of this nation's children.

Until that vision is realized, however, children's hospitals enthusiastically endorse initiatives such as those envisioned in the Primary Pediatric Care for Disadvantaged Children Act of 1990 which will provide much-needed services to the children who have suffered the most from the gaps of our current system.

Sincerely,

ROBERT H. SWEENEY,
President.

AMERICAN ACADEMY OF PEDIATRICS,
Washington, DC, January 31, 1990.

Hon. CHRISTOPHER DODD,
U.S. Senate,
Washington, DC.

DEAR SENATOR DODD: The Academy of Pediatrics is pleased to endorse the "Pediatric Outreach and Primary Health Care for Disadvantaged Children Act of 1990." The bill authorizes funding for projects which will provide primary care to economically disadvantaged children and adolescents who currently do not have access to care.

Access to health care, particularly pediatric preventive health care, is impaired for homeless families. Health becomes a lower priority as parents struggle to meet the daily demands for food and shelter. Families are so often on the move that there is no opportunity to develop an ongoing relationship with a health care provider. When there is an acute problem, hospital emergency rooms, visiting public health nurses, and clinics usually provide episodic and fragmented care. Continuity is nonexistent and care is rarely comprehensive.

Families with children represent more than one-third of the homeless population nationally and more than 50% of the homeless population in many cities. Homeless children have unique risks that compromise their health status and require creative approaches for the delivery of health care.

Ensuring access to health care is the Academy's top legislative priority. Approximately 11.6 million children are uninsured, which means that are without basic preventive health services, primary, acute and major medical services, and treatment of physical and development disabilities. While this proposal addresses an especially vulnerable portion of this population, all children's needs must be a priority of this nation.

The Academy applauds your efforts to address this critical need and is eager to work with you on behalf of children and families.

Sincerely,

BIRT HARVEY, M.D.,
President.

Mr. BRADLEY. Mr. President, I rise to join my colleagues, Mr. DODD from Connecticut and Mr. ROCKEFELLER from West Virginia, in introducing legislation authorizing $10 million for grants to localities and local health facilities to reach out to poor, disadvantaged, and homeless children in order to provide basic health care services.

Today, nearly one in five children under the age of 18 lives in poverty. This rate is 50 percent higher than in 1969. For many of these children, significant barriers exist for obtaining basic services that would allow them the hope of escaping the chains of poverty. Some are homeless, others neglected and abused. All are deserving of the opportunities that this land of plenty has to offer. But the grim facts show that we're not meeting their needs very well. A country that invented the polio vaccine should not lag behind 14 other countries in the rate of immunization of our children. A country that has one of the highest standards of living in the world should not lag behind 19 countries in preventing infant mortality. A country that can take people to the Moon ought to be able to get children to a doctor or doctors to children. The program we are introducing provides a way to reach children who are at risk, and to provide basic pediatric health services and access to a range of health services.

This program is modeled after a remarkable and unique program developed by Paul Simon and run by Dr. Irwin Redlener at the New York Children's Health Project. This remarkable project delivers health care to homeless children through mobile medical vans that reach out into the community. It provides children basic care for illnesses, immunizations, health screenings, and assessments as well as an important link for referrals to other medical and support services. In reaching squarely beyond the barriers with early and preventive interventions, programs like this one can make a difference to these innocent victims of poverty and neglect. And with the emphasis on tracking the children who are served, the program conveys the message to these children that they will not be lost again.

Earlier this year I met, Mr. President, with Paul Simon and Dr. Redlener to discuss this special program and its applicability for other areas. It is my belief that the program could be replicated in other parts of the country if sufficient financial resources can be marshalled.

It is my belief that programs such as this one could have a major impact in urban areas in New Jersey. Almost half of all poor children in my home State have no public or private health insurance. Many poor children, even those wih coverage, do not have access to quality and timely health services. Less than 3 children in 10 under the age of 5 in Newark have received the full recommended course of childhood immunization.

Mr. President, we simply must find better ways to reach out to very poor children to make sure that they receive basic services such as health care. As a nation, we cannot tolerate losing an entire generation of children to neglect and indifference. This legislation will support efforts to this end. I urge my colleagues to support it.

Mr. KOHL. Mr. President, I am proud to join my distinguished colleague Senator DODD in supporting the Primary Pediatric Care for Disadvantaged Children Act of 1989. In the fight to give all of our Nation's children the quality health care which they deserve, this legislation addresses an urgent and growing need.

Children are America's most valuable and vulnerable resource. Quality health care from the first day of their lives should be their birthright. However, millions of children are denied this birthright every day. As we all know, proper health care is critical for the development of our children. Without access to decent medical care, our Nation's children are at risk of falling into an unbreakable lifetime cycle of poverty, disease, pain, and despair.

We do have programs to help children living in poverty receive health care. But far too many poor and homeless children are not being reached by these worthy and effective programs. In 1986, less than one-half of all children in poverty under age 13 were covered by Medicaid. In 1986, over 12 million children had neither public nor private health insurance. And with the escalation of health care costs, coupled with our own failure to provide comprehensive access to health care, we can only expect those numbers to rise. Despite our past successes with immunizations, growing numbers of preschoolers who are not receiving immunizations against diphtheria, tetanus, pertussis, polio, mumps, measles, and rubella threaten a return of those communicable diseases. Preventive health care is still a luxury for millions of American families with children.

No one can deny that we need to expand outreach efforts to offer pediatric health care services to disadvantaged children. The question is how to accomplish this goal. This legislation offers a creative and flexible response and that response would reach beyond our limited abilities to serve those under the poverty line.

Under this bill, we would provide grants to local agencies and programs which have demonstrated their effectiveness in identifying and reaching disadvantaged children needing better health care. The funding would be Federal, but the help would be tailored to address local needs and conditions. This is an ideal way to meet the health care demands of all our Nation's disadvantaged children.

Until now, we have relied primarily on private sector funding to support pediatric health outreach programs. However, to keep existing programs strong and to foster similar projects, our Government must provide a solid, stable source of funding. There is a limit to the help that our Nation's thousand points of light can provide. The health of our children is far too valuable to risk should these lights ever flicker.

It's a simple investment, Mr. President. I urge my colleagues in joining us in redoubling our commitment to the health and well-being of our Nation's children.

Mr. D'AMATO. Mr. President, I rise today as an original cosponsor of legislation to bring basic health care to some of our Nation's most disadvantaged children. Inspired by a successful New York program that delivers health care to children in the city's welfare hotels and shelters, the Pedi-

atric Outreach and Primary Health Care for Disadvantaged Children Act will fund the establishment of similar outreach programs for children around the country.

The New York program—known as the New York Children's Health Project—relies on two mobile medical vans to deliver high-quality, comprehensive primary care to 5 to 6 thousand high-risk children. These mobile medical units are operated and maintained by the New York Hospital-Cornell Medical Center, and staffed by pediatricians, nurse practitioners, and nurses of the department of pediatrics.

In addition to primary care, the project provides an extensive followup system, and a variety of special services including adolescent and mental health services, as well as child abuse and substance abuse prevention.

In just over 2 years of operation, the project has brought previously unavailable services to countless children in need. In 1989 alone, project staff made approximately 9,000 medical and nursing visits and 2,000 followup contacts. They immunized more than 2,200 children, and referred over 450 children to backup hospitals for additional care.

The New York Children's Health Project represents a concept that works. I commend my colleague, Senator DODD for recognizing the merits of this concept, and for introducing the Pediatric Outreach and Primary Health Care for Disadvantaged Children Act to ensure its adaptation in regions across the country.

I encourage my colleagues to join in this effort to help meet the needs of our Nation's medically underserved children.

By Mr. McCONNELL:

S. 2055. A bill to amend the National School Lunch Act to extend eligibility for reimbursement for meal supplements for children in afterschool care, and for other purposes; to the Committee on Labor and Human Resources.

CHILD NUTRITION ASSISTANCE BILL

● Mr. McCONNELL. Mr. President, because of a growing number of dual-career and single parent families, there is an increasing need for child care. In 1968, Congress began the Child Care Food Program [CCFP] as an addition to the National School Lunch Act. Authorized under section 17 of the National School Lunch Act, the Child Care Food Program provides funds for food service to children in child care centers and family and group day care homes.

This has been an enormously successful and popular program. CCFP presently serves 1.2 million children of which nearly 120,000 are from low-income families. Major scientific studies have proven that children who participate in the CCFP benefit nutritionally. Furthermore, CCFP is the only Federal program which establishes nutrition standards for meals served to preschool children in family day care. CCFP among other child nutrition programs are not only nutritiously beneficial but also economically beneficial. According to the Committee for Economic Development, every dollar spent in early intervention saves $5 in remedial education, welfare, and crime control.

Mr. President, I believe that my colleagues will agree it is of utmost importance to ensure that our Nation's children receive proper nutrition. Unfortunately, certain inequities exist that prevent this from happening. Currently, students participating in after school programs are not eligible for the same benefits as their classmates who leave school and go to a child-care facility. Children enrolled in CCFP receive a nutritious snack between lunch and dinner, whereas kids in afterschool programs do not, and I do not believe this is fair. For this reason, I am introducing a bill to amend the National School Lunch Act to extend eligibility for reimbursement for meal supplements for children in afterschool care.

In May 1989, I introduced legislation intended to benefit millions of children nationwide by providing them with nutritious meals. This legislation, which was incorporated in a child nutrition bill that became law last fall, will begin to address the nutritional needs of our children. However, more can be done. In this wealthy and prosperous nation, it is an unacceptable tragedy that thousands of children are forced to go hungry.

The bill I introduced regarding the School Breakfast Program provides students with a nutritious breakfast thus increasing their academic performance. It is my intention that the legislation I am introducing today will further provide and enhance childrens' academic ability. By continuing these programs to furnish children with a steady, solid diet, we improve their performance in school, keep them healthy, and ultimately give them the chance they deserve to succeed in life.●

By Mr. HARKIN (for himself, Mr. HATCH, Mr. PELL, Mr. DURENBERGER, Mr. KENNEDY, Mr. COCHRAN, Mr. SIMON, Mrs. KASSEBAUM, Mr. BURDICK, Mr. KERRY, Mr. ADAMS, Mr. CHAFEE, Mr. GRAHAM, Mr. LEAHY, and Mr. HATFIELD):

S. 2056. A bill to amend title XIX of the Public Health Service Act to provide grants to States to establish and implement State health objective plans, and for other purposes; to the Committee on Labor and Human Resources.

HEALTH OBJECTIVES 2000 ACT

Mr. HARKIN. Mr. President, I rise today on behalf of myself, Senator HATCH, Senator PELL, Senator DURENBERGER, Senator KENNEDY, Senator COCHRAN, Senator SIMON, Senator KASSEBAUM, Senator BURDICK, Senator KERRY, and Senator ADAMS, Senator CHAFEE, Senator GRAHAM, Senator LEAHY, and Senator HATFIELD to introduce the Health Objectives 2000 Act.

Americans are far healthier now than 100 years ago thanks to a virtual revolution in public health and medicine during this century. We have seen life expectancy increase by some 29 years. We have made monumental gains in understanding the leading causes of death and disability and the means by which they might be prevented.

As a nation, we no longer measure our health solely by mortality rates and average longevity, but also by the quality of our life and the impact of illness on our economic productivity. Our next opportunity to make substantial gains in public health lies in health promotion, and the prevention of premature disability and death. Many are calling this the "second revolution" of public health in America.

However, there is a growing concern that as a nation we have lost sight of our public health goals—that our national commitment to public health is neither clearly defined, adequately supported, nor fully understood. We are failing to embark upon the "second revolution" and, at the same time, are at risk for losing the gains of the first.

Two years ago, the Institute of Medicine [IOM] published the most comprehensive assessment of public health in the Nation today. The IOM report conveys a sense of urgency to the Congress and to the American people. Public health is a vital function that is in trouble. The Institute of Medicine reports that the gains of our public health programs have been taken for granted, and public health responsibilities have become so fragmented that deliberate action is often difficult if not impossible.

It is time for action. Many major health problems remain unresolved. We are not the helpless victims of death and disease. We have it in our power to reduce significantly deaths and disabilities due to feared killers such as heart disease, stroke, emphysema, cancer, accidental injury, and other similar assaults on our health.

My colleagues and I are calling for a renewed national effort to prevent the most common and costly causes of disease, disability, and death. The Health Objectives 2000 Act, which we are introducing today, is far-reaching in its efforts to move toward a healthier America.

We are proposing an all-out effort to implement the Nation's health objectives for the year 2000. Many health-care professionals in America will have had their say in developing these objectives through a series of regional hearings jointly convened by the Institute of Medicine, part of the National Academy of Sciences, and the Public Health Service. When the Surgeon General publishes them in final form in July 1990, they will reflect the input of more than 200 national membership organizations and all the State and territorial health departments, some 7,000 individuals in all.

I am proud to be joined in this effort today by Senator KENNEDY, the chairman of the Committee on Labor and Human Resources. Senator KENNEDY is second to none in this body in his commitment to high quality health care that is affordable and available to all Americans.

It means a great deal to me, also, to be joined by Senator HATCH, the ranking member of the Committee on Labor and Human Resources, with whom I have worked closely on a number of important issues. Senator HATCH has done much to promote better health, including efforts to improve prenatal care, home care, and promote better nutrition.

Senator PELL, who has been a steadfast supporter of legislation promoting the health of Americans, joins with us also in introducing the Health Objectives 2000 Act. I look forward to working with Senator PELL on this important legislation, and with my other distinguished colleagues who join me in introducing this bill today.

I want to also express my appreciation to the Association of State and Territorial Health Officials who took a leadership role in developing this bill.

Americans want to be healthy. We try to be healthy. As individuals we are conscious of our own personal health status—our cholesterol levels, our ideal weight, how much exercise we need, what sort of diet is best for us. As a Nation, we are accutely aware of the need for a healthy workforce, in order to maintain our health levels of productivity, and our competitive stance in a world market.

Yet we are faced with growing concerns about low-level radiation, polluted air and water, and cancer causing chemicals in our food. Many of us fear that our standard of living has increased at the expense of our health, and many Americans are reporting higher rates of disability and dissatisfaction than in the past. Modern technology has created both real and potential health hazards.

Nevertheless, we have made impressive gains in the health status of Americans during this century. We have more opportunity to live longer, healthier, and more productive lives. As someone once said, "Modern life sure beats old fashioned death".

This legislation will help cut America's medical bills, too. Since the 1970's the cost of health care has skyrocketed. The Government now spends 25 times as much on health care as we spent 25 years ago. Total health care spending in the United States is more than a half-trillion dollars, with all but 3 percent going to treat rather than prevent disease and disability.

Americans spend nearly three times the amount that citizens of the United Kingdom spend on health care. Health care in America, as percent of gross domestic product, is greater than Sweden, France, Canada, The Netherlands, Germany, Norway, Japan, and the United Kingdom. Yet Americans aren't necessarily any healthier. Death due to heart disease is 40 percent higher in the United States than it is in France and Switzerland—and costs Americans more than $70 billion a year.

The societal costs of preventable disease cost Americans more than $680 billion annually. If more efforts to promote health and prevent disease and disability can result in even a 1 percent reduction, that means we can save more than $6.8 billion each year.

Our strained national pocketbook can no longer continue to support illness at the expense of wellness. The Health Objective 2000 Act represents a national commitment to support health in America, and at the same time, control our rising health care costs.

America has a proud history of public health which forms the basis for our renewed effort today. Our national public health system has, for many years, worked to prevent disease, and promote healthful environments, behavior and lifestyles. During our lifetime we have seen a substantial reduction in the death rate from infectious disease thanks to water purification, mass immunizations, and other public health measures. As a result, people live longer, and are more likely to succumb to chronic disease or become disabled. And much of that disease and disability is preventable.

Nationally, more than 1 million people die each year—nearly 52 percent of all deaths—as a result of stroke, coronary heart disease, diabetes, chronic obstructive pulmonary disease, lung cancer, breast cancer, cervical cancer, colorectal cancer, or cirrhosis.

We know what to do to prevent these killers. Cigarette smoking is responsible for about 30 percent of the nearly 500,000 deaths from cancer each year. Diet has been linked to cancer, heart disease, and stroke. We can prevent deaths due to cirrhosis by reducing the consumption of alcohol.

Far too many of our citizens, especially young people, die or experience disabilities as a result of vehicular accidents and work related injuries. Accidents are the leading cause of death during the first four decades of life. Injuries are the most common cause of death for children ages 1 to 14. We have it within our power to prevent this tragic loss of life.

Americans are living longer. We need to help them live healthier. My own State of Iowa has the highest percentage of the population over the age of 85. In so far as health care is concerned for our elderly citizens, there is a small number of people who require a great deal of expensive care and a much larger number of people who use few, if any health care services. By preventing disease among the elderly, postponing dependence, and promoting vitality, we can improve the quality of life of our senior citizens, many of whom reside in rural America, while reducing the cost of health care.

Iowa exceeds the national average of deaths due to work-related injuries and deaths due to smoking. In fact, injuries, followed by cancer and heart disease, are the leading cause of years of potential life lost in my state. Because we are a rural State, with a strong agricultural economy, farm-related injuries are a special concern of mine—and contribute substantially to the high rate of work-related injury in Iowa. We can improve the health of our rural citizens through better health promotion and injury prevention programs.

Our Iowa State health department is hard at work on many of these important issues. They are doing a great job with programs such as hypertension screening, through which they have identified 2,113 new cases, many among the elderly. I am committed to helping them do an even better job. Mary Ellis, the director of our Department of Public Health, commenting on the Health Objectives 2000 Act, wrote to me, "It is very important for Iowa citizens and for health care in the United States."

Mr. President, American health care—its quality, its availability, and its cost—are top concerns for us all. Too often, though, we react to bad news rather than plan for a healthier future. We tinker with parts of the system in trouble, and don't do enough toward accomplishing our own national health goals.

The bill my colleagues and I introduce today looks to the year 2000 and says, "These are our goals and these specific objectives will help us achieve them."

Five broad national goals are proposed:

Reduce infant mortality to no more than 7 deaths per 1,000 live births versus as compared to 10.4 per 1,000 live births in 1987;

Increase life expectancy to at least 78 years versus 74.9 years in 1987;

Reduce disability caused by chronic conditions to a prevalence of no more than six percent of all people instead of the estimated 8.9 percent in 1987;

Increase years of healthy life to at least 65 years rather than 60 years in 1987;

Decrease disparity in life expectancy between white and minority populations to no more than 4 years as opposed to 5.8 years in 1987.

More than 200 objectives in 21 categories aim toward these goals. They address priorities in health promotion, health protection, preventive services and system improvement. All of our citizens stand to benefit, but especially the very young, older Americans, and those who are most at risk of disease because of the lack of access to medical care.

The Health Objective 2000 Act offers an opportunity for us to improve the quality of our information and develop better methodolgy for attacking the problems that assail our health. We know a lot about the outcomes that result in death, but not as much about the outcomes that result in disability. We need to know more about how environmental noise affects hearing loss, for example. We know how many children die from drowning, but we don't know how many children there are who are substantially disabled as a result of near drowning.

The bill provides funding to designated official State public health agencies, based upon state plan target objectives which are consistent with the year 2000 objectives and yet tailored to State needs. These funds will help States carry out their objectives, and help them monitor and evaluate the impact of their efforts. In addition, funds are designated for the professional training of public health personnel and to provide assistance for research, and for pilot and demonstration projects and programs approved by the Secretary of the Department of Health and Human Services for the purposes of demonstrating the potential impact of regional or national efforts to improve the health status of American citizens as set out by the national health objectives.

States are encouraged to form partnerships with Federal, State, and local health agencies, voluntary health organizations, and other health groups in order to develop initiatives that are set out in the State plan, enabling them to address national health policy issues and assess the health status of the population in their State and nationally.

An advisory committee will be established by the Secretary of DHHS, known as the National Health Objectives Advisory Committee, to advise regarding national health priorities.

The act authorizes $300,000,000 for fiscal year 1991, increasing $25 million each year with a $400,000,000 authorization if fiscal year 1995. Ninety percent of appropriated amounts are to be used for allotments to the designated official State public health agencies. Allotments are to be used to develop and implement a State plan, develop and collect data to assess public health needs and status of individuals residing in the State; provide assistance and planning necessary to projects and programs described in the State plan; and provide for carrying out projects and programs described in the State plan. Ten percent of appropriated amounts are to be used for training, research, and the development of pilot and demonstration programs.

The Preventive Block Grant Program becomes part of this act, at the time it is due to be reauthorized, on October 1, 1992.

Mr. President, I ask unanimous consent that the list of organizations supporting this legislation be printed in the RECORD at this time, and I look forward to working with my colleagues on this important initiative.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Association of State and Territorial Health Officials.
American College of Preventive Medicine.
American Dental Association.
American Lung Association.
American Public Health Association.
Association of Schools of Public Health.
Association of State and Territorial Dental Directors.
Association of State and Territorial Directors of Nursing.
Association of State and Territorial Directors of Public Health Education.
Association of State and Territorial Public Health Laboratory Directors.
Association of State and Territorial Public Health Nutrition Directors.
National Association of County Health Officials.
U.S. Conference of Local Health Officers.
U.S. Conference of State and Territorial Epidemiologists.

Mr. HATCH. Mr. President, I rise today to cosponsor and support the introduction of the Health Objectives 2000 Act. I am pleased to join my colleagues in this bipartisan effort because we must place a greater emphasis on health promotion and disease prevention.

It is important to work together in Congress to facilitate efforts to prevent disease and promote a healthy lifestyle. As a nation, we spend approximately 12 percent of our gross national product on health care. Only a small fraction of that amount is spent on prevention efforts. We can no longer afford to emphasize only the treatment part of the health-care equation while putting so few resources into less costly prevention activities.

The Health Objectives 2000 Act builds upon a program that is already in place, the preventive health and health services block grants. States have been working on prevention efforts, and many have coordinated such efforts with 1990 health objectives that were developed by the Public Health Service in 1980. In my State of Utah, programs have been developed in the area of prevention for cardiovascular disease and hypertension control. These programs have been effective, because the death rate due to premature cardiovascular disease has decreased in Utah by 21.7 percent since 1981.

This bill would allow States to go beyond these efforts and, in partnership with local agencies, achieve the goals for improved public health that will be set by the health objectives for the year 2000 project. This bill will ensure a concerted national effort for the States, localities, and the Federal Government to work together in addressing the most pressing public health issues that face this Nation.

I am pleased to support this effort along with my colleagues and the Association of State and Territorial Health Officials who believe that this bill will provide the mechanism for increased interagency and intergovernmental cooperation. Coordination and cooperation are key objectives if we are to upgrade health promotion and disease prevention efforts in this Nation.

Mr. PELL. Mr. President, I am delighted to join Senators HARKIN and HATCH, my colleagues on the Senate Labor and Human Resources Committee, in introducing what I believe to be essential and comprehensive legislation to promote better health and prevent disease and injury.

For too long, Mr. President, health promotion and disease prevention activities have taken a back seat to other health concerns. We all agree that research is crucial; we all know that treatment is an absolute necessity. But we are now suffering the consequences of our unwillingness to take the third and crucial step of preventing, when we can, disease and injury.

Mr. President, today is a red letter day for public health. The introduction of this crucial legislation marks a turning point in our national health agenda. For too long, the Federal Government has been reactive—waiting for disease or injury to strike and take its toll on our families and on our society—before responding with the necessary alarm and action. Our legislation would guarantee the Federal Government's commitment to providing desperately needed resources to help prevent the illness, suffering, and cost of disease and injury.

Our bill would provide grant funds to State and territorial health agen-

cies to implement comprehenisve prevention activities in 21 areas: Reduce tobacco use; reduce alcohol and other drug abuse; improve nutrition; increase physical activity and fitness; improve mental health and prevent mental illness; reduce environmental health hazards; improve occupational safety and health; prevent and control unintentional injuries; reduce violent and abusive behavior; prevent and control HIV infection and AIDS; prevent and control sexually transmitted diseases; immunize against and control infectious diseases; improve maternal and infant health; improve oral health; reduce adolescent pregnancy and improve reproductive health; prevent, detect, and control high blood cholesterol and high blood pressure; prevent, detect, and control cancer; prevent, detect, and control other chronic diseases and disorders; maintain the health and quality of life of older people; improve health education and access to preventive health services; and improve surveillance data systems. The funds would also be used to ensure coordination between Federal, State, and local health agencies and other groups.

Mr. President, currently only about 3 percent of Federal health expenditures and less than one-half of 1 percent of total health care expenditures nationwide are used for prevention efforts. It seems to me that the Federal Government is not doing nearly enough for States like Rholde Island, which could benefit enormously from a commitment to health promotion and disease prevention activities. A recent report by the Federal Centers for Disease Control [CDC] found that in 1986, Rhode Island's death rate from nine major chronic diseases ranked ninth among all States. The CDC indicated in that report that many deaths from these diseases could have been prevented by changes in lifestyle. I would ask unanimous consent at this time to insert in the RECORD an article written by James M. O'Neill which appeared in the Providence Journal on January 21, 1990, entitled "R.I.'s Chronic-Illness Deaths Ninth-Highest in the Nation."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

R.I.'s CHRONIC-ILLNESS DEATHS NINTH-HIGHEST IN THE NATION

(By James M. O'Neill)

PROVIDENCE.—Rhode Island had the ninth-highest death rate in the nation in 1986 from nine diseases that caused more than half of all U.S. deaths that year, a federal report says.

The report notes that 5,748 Rhode Islanders died of chronic disease in 1988, the most recent year for which figures are available, compared with 2,817 in Hawaii, which had the lowest death rate in the study and has a population about the same as Rhode Island's.

Rhode Island's death rate per 100,000 population from these diseases was 490.99, greater than the national average at 457.6 and far higher than Hawaii's 326.80.

The nine chronic diseases included in the report, issued Friday by the federal Centers for Disease Control, in Atlanta, were stroke, heart disease, diabetes, chronic obstructive pulmonary disease, lung cancer, female breast cancer, cervical cancer, colorectal cancer and cirrhosis.

The report emphasizes that deaths from some of these diseases, including breast and cervical cancer, are largely preventable by life style changes.

The major factor in Rhode Island's high mortality rate in 1986 was its death rate from heart disease. The state ranked third nationally, with 3,346 heart disease-related deaths.

The rate of deaths from breast cancer in Rhode Island—the second-highest in the country—also contributed to the state's high mortality ranking.

And while the state's rate of cigarette smoking is now comparable to the rest of the nation. Rhode Island's smoking rate was significantly higher in the mid-1970s.

"How we used to smoke, not our current smoking patterns, is reflected in the lung cancer and heart disease death rates we see today," said Dr. H. Denman Scott, state director of health.

Health officials stressed the fact that eating habits and smoking are directly related to several of the chronic diseases, and the federal report noted that smoking alone is responsible for one-third of the deaths from all nine of the chronic diseases in the study.

They say proper diet, exercise and not smoking, can, in the long run, help prevent these diseases from occurring.

The state has made some efforts to help residents combat these diseases. In November of 1987, the Department of Health began a program to encourage breast cancer screening, the first such effort by a state.

And the Health Department proposed a cancer-fighting program last October with the goal of reducing cancer mortality by 33 percent by the year 2000. Jay Buechner, chief of health statistics for the Health Department, said that will include a smoking-prevention effort aimed at youths and work-site programs to help people quit smoking.

Rhode Islanders are more susceptible to the chronic disease because the state is largely urban. Health experts say that living in an urban area can lead to a lifestyle that will often cause chronic diseases to occur.

"There have been big differences between urban and rural areas since the 1950s, and before, that have an impact on how lifestyle patterns develop," Buechner said. "You're more likely to get fresh vegetables in a rural area and more likely to exercise. Rhode Island ranks high in the proportion of its population that leads a sedentary lifestyle. And in terms of occupations, you may have been exposed to more things through jobs in an urban area, especially in factories."

He said those in urban areas are more likely to smoke and use alcohol because there's a greater chance they'll be exposed to it by their peers.

The report released Friday is the last in a series that the CDC has issued over the past year on chronic diseases.

Mr. PELL. Mr. President, as we begin this new decade and look ahead to the 21st century, we have a clear picture of where our public health needs are, and very fortunately, we have the ability to achieve many of them. Now what is needed is a recognition among policymakers that disease prevention, in this era of spiralling health costs, makes good health policy and imperative fiscal policy.

In 1989, the Surgeon General recognized just that point. He reported that the societal costs of preventable disease are approximately $681.85 billion annually. Mr. President, if our prevention efforts can result in even a 1-percent reduction in these costs, this Nation could save some $6 billion annually. This is a prudent investment indeed, and one which promises a return on more than our health care dollar alone. Better health and increased worker productivity are only two of the many benefits we can expect.

I realize that in these times of severe budget constraints the bill's $300 million price tag is by no means insignificant. But it is small in comparison with the measurable cost of preventable disease, and it is surely small when compared with the devastating pain suffered by those afflicted with cancer, heart disease, and other chronic diseases that might have been prevented.

Mr. President, I am immensely pleased that our legislation has received support from numerous distinguished public health professionals and organizations. I know that Senator HARKIN, who has been a leader in public health and in the effort to bring this important legislation before the Senate, has already inserted into the RECORD a list of some of those groups. But I would be remiss if I did not mention the special role of the Association of State and Territorial Health Officials [ASTHO], an organization representing the health directors of every State and U.S. territory. Under the leadership of its president, Dr. H. Denman Scott, ASTHO has been the moving force behind this legislation. I am delighted that Dr. Scott, whom I know and respect enormously as the excellent director of health for the State of Rhode Island, has played a significant role in the development of this legislation, and I look forward to working with him to make this important legislation part of our national health agenda.

Mr. SIMON. Mr. President, I rise today as a cosponsor of the Health Objectives 2000 Act. This bill represents a commitment on the part of the Federal Government to allocate resources toward solving the major public health problems in our society.

This bill identifies 21 priority areas. Some of the critical areas to be addressed include smoking, alcohol and drug abuse, maternal and infant health and mental and behavioral disorders. The continued presence of

these problems has had a significant impact on our society. The direct health care and indirect productivity cost of smoking to society is between $38 and $95 billion. For alcohol abuse, estimates from 1983 indicate that it cost us $116.7 billion, while drug abuse cost us approximately $59.7 billion. These figures only represent the price associated with three areas. If we were to sum the costs associated with all the priority areas, the financial toll to our society would be staggering.

As the recent institute of Medicine report, The Future of Public Health stated, health is both a social responsibility as well as an individual responsibility. The reality is that we will never be able to eradicate the major diseases and illnesses by treatment alone. The incidence of diseases can only be reduced and eventually eliminated by prevention efforts, and until we face that reality head on, these diseases and illnesses will continue to drain our society.

Mr. BURDICK. Mr. President, I am pleased to be an original cosponsor of the Health Objectives 2000 Act.

Today, the United States spends 75 percent of its health care dollars on the treatment of heart disease, strokes, and cancer. All of these illnesses can be prevented by modifying an individual's behavior. Yet less than 0.5 percent of our health care resources are spent on programs of disease prevention.

Health Objectives 2000 is the result of a combined effort by the Public Health Service, over 200 national membership organizations, and all State and territorial health departments to create a single set of national health objectives to be met by the year 2000. These objectives will stress preventive health services, health protection, and health promotion. Funds will be available to State and territorial health agencies to focus on those objectives which most reflect the priorities of their State or territory.

In 1988, my home State of North Dakota joined seven other Western States in the Rocky Mountain Tobacco-Free Challenge, an unprecedented effort to reduce tobacco use in the Rocky Mountain region of the United States. To meet this challenge, the Dakota Department of Health developed a guide for establishing worksite smoking policies, a workshop for teachers on smoking prevention curricula, and a tobacco and smokeless tobacco prevention media campaign. North Dakota was declared overall winner of the challenge during its first year and also received awards in 5 out of 12 categories for outstanding tobacco control activities undertaken by individuals and organizations. This is one example of North Dakota's continuing interest in promoting health protection measures, and, with the implementation of the Health Objectives 2000 Act, we hope to do even more in the future.

This century has already seen substantial improvement in the health of Americans through public health measures such as epidemic disease control and increased efforts to assure a safe food and water supply. By stressing the necessity of developing and maintaining good health habits, we have the opportunity not only to further improve the health of the Nation, but to significantly reduce our health care costs as well. I urge my colleagues to support this important piece of legislation.

Mr. ADAMS. Mr. President, discussions surrounding the status of health care in our country paint a gloomy picture. Indeed, the problem is so overwhelming that one frequently comes away from such talks feeling that the current health care crisis is nearly insurmountable.

As we examine whether or not this crisis calls for a complete overhaul of our health care delivery system, we must recognize that every day an American who lacks health insurance gets sick and relies on the health care proivded through State and local health agencies and other organizations with Federal support from the Public Health Service.

In 1980, we established the National Objectives for 1990 setting forth public health goals this year, 1990. Unfortunately, these objectives have not been achieved and a stronger Federal commitment to these goals is mandatory.

For this reason, I am pleased to be a cosponsor of the Health Objectives 2000 Act, which Senator HARKIN is introducing today and will help State agencies prioritize the health care needs of their State. The Health Objectives 2000 Act implements the national health objectives for the year 2000 by requiring States to submit a specific list of health goals and detailed plans to achieve those goals, as well as a budget including State, local, and other organizations working to meet public health needs.

With 37 million Americans and 720,000 Washingtonians living day to day without any form of health insurance and millions of others who have inadequate coverage, the strain on public health agencies and organizations is already substantial and will continue to grow. With this in mind, it is of utmost importance that we act now to address our nationwide and State-specific public health needs and distribute scarce funds as effectively as possible.

Mr. KENNEDY. Mr. President, I am pleased to join my colleagues in introducing the Health Objectives 2000 Act. As we enter this new decade of the 1990's and move toward the year 2000, the benefits of health promotion and disease prevention are increasingly recognized by people around the country. Almost weekly, research results are released in the news media about the benefits of lower cholesterol, increased exercise, avoiding tobacco use, using seatbelts, getting medical screening tests, and changing other habits. Many individuals throughout the Nation are taking action in these areas to reap the potential benefits for themselves and their families. If the entire population could benefit from changes in diet, habits, and health care, the savings to the Nation—in years of healthy life and in dollars—would be enormous.

Several years ago, the Surgeon General and the Department of Health and Human Services realized the potential health benefits of mobilizing the country to improve our public health. These goals were summarized in 1980 in the first set of health objectives for the Nation for the year 1990. The original goals included reducing smoking, increasing seatbelt use, expanding the use of prenatal care, and many other well know objectives. Though progress has been made in many of these goals, greater effort is needed. The end of the 1980's provided The Department of Health and Human Services with an opportunity to look backward and forward, to reassess, to take stock of our progress, and to set new goals for the year 2000. Now that they have done this, we must address the question of how we will meet these goals.

Leadership is essential and the bill that we introduce today is one of many efforts to provide it. State health departments and local health departments are the focus of the bill. They serve on the front lines and are essential to moving the Nation toward the objectives for the year 2000.

Many health services are already highly organized into effective networks through specialized disease centers and academic health science centers. This is not true for health promotion campaigns and preventive health services. State health departments throughout the country are the best position to see that they are run efficiently and effectively.

Ten years a financial squeeze on the resources of public health departments has left many State health departments with no choice but to limit activity and focus resources on providing health services to the growing number of uninsured individuals, or responding to environmental and public health crises as they occur. The structure of public health departments makes them ideal to do much more than this, if they have additional resources and their roles can be expanded.

Our bill provides financial assistance and an incentive to such departments so they could expand their operations

and become the focus of leadership for achieving the Nation's health objectives for the year 2000. The bill proposes that each State devise its own plan on the national objectives most relevant to its own citizens. The bill proposes that State health departments conduct systematic campaigns to achieve these goals. A plan is required. Means of evaluation are required. And systematic reporting is encouraged in an effort to make them as effective as possible.

The benefits from this approach are large but they will not materialize overnight. Objectives for the year 2000 provides us with a 10-year period to move carefully and decisively to achieve our goals. State health departments and local health departments are the key to realistic progress. This bill puts them in a position to implement this most important mission for us. I hope my colleagues will join me in supporting this well-thought-out initiative.

By Mr. BRYAN:

S. 2057. A bill to amend the Securities Exchange Act of 1934; to the Committee on Banking, Housing, and Urban Affairs.

SMALL INVESTOR PROTECTION ACT

Mr. BRYAN. Mr. President, today I am introducing legislation entitled the Small Investor Protection Act of 1990. This legislation would grant the Securities and Exchange Commission [SEC] the powers to crack down on abuses in the penny stock market. It is estimated that penny stock fraud costs Americans $2 billion a year and is cleary the No. 1 threat facing small investors in the United States.

Penny stocks are low priced, usually trading under $3 per share and are not traded on any of the major exchanges. Therefore, it is extremely difficult for the small investor to obtain information on penny stock companies, and thus the stocks are ripe for manipulation.

While my legislation deals with problems associated with the penny stock market, I should note that the market does in some instances serve a legitimate and important purpose—the capital funding of small, entrepreneurial companies.

However, there is a growing concern about the decreasing participation of individual investors in the stock market. Small investors are now skeptical about participating in the stock market because they perceive it, perhaps rightly so, to be dominated by institutions and insiders and rigged against them. As small investors are driven from the stock market, it becomes harder for businesses to raise capital, and fewer and fewer individuals benefit when our economy prospers.

I applaud SEC Chairman Richard Breeden for his efforts to bolster confidence in the financial markets through protection of the small investor. The SEC's new antifraud cold calling rule which took effect in January should help curb many of the abuses. I believe this legislation complements this rule and will give the SEC the authority it needs to combat small investor fraud.

The legislation would take several important steps:

Eliminate blank check blind offerings;

Require enhanced and more meaningful disclosure of such circumstances as affiliations between the company and the selling broker-dealer;

Grant the SEC cease-and-desist authority;

Grant the SEC the authority to prohibit those who have been convicted of securities fraud from participating in the issuing or selling of penny stocks.

I am working on provisions to add to the bill at a later date that would require automated quotations for all publicly-traded securities.

On February 8, I will chair a hearing in the Banking, Housing, and Urban Affairs Committee on penny stock fraud. I welcome comments on this legislation and will work to refine it with interested parties.

I commend the work of the North American Securities Administrators Association. Their excellent work is the foundation for much of this legislation.

I am optimistic that this legislation will help eliminate fraudulent and abusive sales practices in the penny stock market.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2057

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Small Investor Protection Act of 1990".

SEC. 2. BLANK CHECK BLIND POOLS.

(a) REGISTRATION.—Section 12(a) of the Securities Exchange Act of 1934 (15 U.S.C. 781(a)) is amended—

(1) by inserting "(1)" after "(a)"; and

(2) by adding at the end the following:

"(2) The Commission is authorized to deny registration of a security if it finds that 80 percent or more of the net offering proceeds, as defined by the Commission, is not specifically allocated for the purchase, construction, or development of identified property or products, for the payment of indebtedness, for the payment of overhead expenses, or for other activities set forth in the issuer's business plan.".

(b) MARKET MAKING.—Section 15 of the Securities Exchange Act of 1934 (15 U.S.C. 78o) is amended by adding at the end the following:

"(g) No broker or dealer shall make use of the mails or any means or instrumentality of interstate commerce to effect any transaction in, or to induce or attempt to induce the purchase or sale of, any security that is denied registration under section 12(a)(2).".

SEC. 3. DISCLOSURE TO CUSTOMERS; DISCIPLINARY HISTORY.

(a) IN GENERAL.—Section 15 of the Securities Exchange Act of 1934 (15 U.S.C. 78o) is amended by adding at the end the following:

"(h) Each registered broker or dealer shall—

"(1) prepare and send to each customer an account statement for each month in which a transaction occurs involving that account;

"(2) when the bid/ask differential of any security offered exceeds 25 percent, disclose that fact on the confirmation delivered to the buyer of that security;

"(3) before opening a new customer account, disclose in writing any disciplinary action taken against the broker or dealer during the preceding 5 years resulting from an administrative or judicial proceeding in which a violation of securities laws was found; and

"(4) before taking a buy order on a security, disclose to the customer any business relationship between the broker or dealer and the issuer.".

(b) ACCESS TO INFORMATION.—Section 15A of the Securities Exchange Act 1934 (15 U.S.C. 78o-3) is amended by adding at the end the following:

"(i) A registered securities association shall establish and maintain a toll-free telephone listing to receive and respond to inquiries from customers and the public regarding disciplinary actions involving its members.".

SEC. 4. CEASE AND DESIST AUTHORITY.

Section 21 of the Securities Exchange Act of 1934 (15 U.S.C. 78u) is amended by adding at the end the following new subsection:

"(i)(1) If the Commission has reason to believe that any broker or dealer or person associated with a broker or dealer is engaged or is about to engage in acts or practices constituting a violation of—

"(A) any provision of this title or the rules or regulations thereunder,

"(B) the rules of a national securities exchange or registered securities association of which such person is a member or a person associated with a member,

"(C) the rules of a registered clearing agency in which such person is a participant, or

"(D) the rules of the Municipal Securities Rulemaking Board,

it may in the public interest and for the protection of investors issue an order described in paragraph (2).

"(2) An order is described in this paragraph if it is an order which—

"(A) terminates the employment of an individual employed by a broker or dealer,

"(B) prohibits an individual from participating in the conduct of the affairs of a broker or dealer,

"(C) suspends the operations of a broker or dealer,

"(D) prohibits the disposition or transfer of any asset owned or held by such broker or dealer, or

"(E) requires the cessation of any other act or practice which constitutes a violation described in paragraph (1).

"(3) An order issued pursuant to this subsection shall contain a statement of facts constituting the grounds therefor and shall fix a time and place at which a hearing will be held thereon. Such hearing shall be fixed for a date not earlier than 30 days nor later than 60 days after the date of service of such notice.

"(4) An order issued under this subsection may become effective prior to a hearing under paragraph (3) if the Commission has reason to believe that such action is necessary to prevent dissipation of assets or irreparable injury.".

SEC. 5. DISQUALIFICATION.

Section 15(b)(6) of the Securities Exchange Act of 1934 (15 U.S.C. 78o(b)(6)) is amended by inserting after "associated with a broker or dealer" each place it appears the following: "or acting as a consultant to a broker or dealer".

SEC. 6. PROHIBITION AGAINST SERVICE AS AN OFFICER OR DIRECTOR.

(a) AUTHORITY OF A COURT TO PROHIBIT PERSONS FROM SERVING AS OFFICERS AND DIRECTORS.—Section 20(b) of the Securities Act of 1933 (15 U.S.C. 77t(b)) is amended by inserting after the first sentence thereof the following: "In any proceeding under this subsection, the court may prohibit, conditionally or unconditionally, either permanently or for such period of time as it shall determine, any person found to have violated any provision of this title or any rule or regulation thereunder from acting as an officer or director of or consultant to any issuer that has a class of securities registered pursuant to section 12 of the Securities Exchange Act of 1934 or that is required to file reports pursuant to subsection (d) of section 15 of such Act.".

(b) AMENDMENTS TO SECTION 15(c)(4).—Section 15(c)(4) of the Securities Act of 1934 (15 U.S.C. 78o(c)(4)) is amended—

(1) by striking ", or" the first time it appears; and

(2) by inserting after "15" the following: ", or subsection (a) of section 16"; and

(3) by adding at the end thereof the following: "In such an order, the Commission may also prohibit, conditionally or unconditionally, either permanently or for such period of time as it shall determine, any person found to have failed to comply or to have been a cause of the failure to comply from acting as an officer or director of or consultant to any issuer that has a class of securities registered pursuant to section 12 of this title or that is required to file reports pursuant to subsection (d) of section 15 of this title, if the Commission finds that such prohibition is in the public interest.".

(c) INVESTMENT COMPANY ACT OF 1940.—Section 42 of the Investment Company Act of 1940 (15 U.S.C. 80a-41) is amended by inserting after the first sentence of subsection (d) the following: "In any proceeding under this subsection the court may prohibit, conditionally or unconditionally, either permanently or for such period of time as it shall determine, any person found to have violated any provision of this title or any rule, regulation, or order hereunder from acting as an officer or director of or consultant to any issuer that has a class of securities registered pursuant to section 12 of the Securities Exchange Act of 1934 or that is required to file reports pursuant to subsection (d) of section 15 of such Act.".

(d) INVESTMENT ADVISERS ACT OF 1940.—Section 209 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-9) is amended by inserting after the first sentence of subsection (d) the following: "In any proceeding under this subsection, the court may prohibit, conditionally or unconditionally, either permanently or for such period of time as it shall determine, any person found to have violated any provision of this title, or of any rule, regulation, or order hereunder or has aided, abetted, counseled, commanded, induced, or procured such a violation, from acting as an officer or director of or consultant to any issuer that has a class of securities registered pursuant to section 12 of the Securities Exchange Act of 1934 or that is required to file reports pursuant to subsection (d) of section 15 of such Act.".

By Mr. BRYAN (for himself, Mr. RIEGLE, Mr. GARN, Mr. DODD, Mr. HEINZ, Mr. CRANSTON, Mr. SHELBY, Mrs. KASSEBAUM, Mr. KERRY, Mr. D'AMATO, Mr. WIRTH, and Mr. BOND):

S. 2058. A bill to amend the Federal Deposit Insurance Act to regulate certain marketing activities engaged in on the premises of deposit-taking facilities of insured depository institutions; to the Committee on Banking, Housing, and Urban Affairs.

DEPOSITOR PROTECTION AND ABUSE PREVENTION ACT

Mr. BRYAN. Mr. President, I rise today to introduce the Depositor Protection and Abuse Prevention Act of 1990. I am pleased to announce that a majority of both the Democrats and Republicans on the Senate Banking Committee are original cosponsors of this legislation.

The act prohibits any federally insured depository institution from selling on its premises securities of an affiliated company. The legislation also gives the appropriate Federal banking agency the authority to restrict transactions which are likely to be confused by the general public with an insured deposit.

We have heard of too many cases where individuals intended to buy insured certificates of deposit, but were steered instead to buy high yield or so-called junk bonds. This is a blatant abuse of depositor trust.

In California alone, some 23,000 individuals bought more than $200 million in uninsured bonds. Many of these individuals were elderly and invested their life savings. These bonds are now worthless. If this problem is not addressed, thousands more individuals across the country may find themselves swindled out of their hard-earned money.

In early December, I wrote Secretary Brady asking him to immediately take administrative steps to curb this kind of activity. On Monday, I received his response which indicated that the Treasury Department is studying the matter. I again urge the Secretary to act swiftly to use his existing powers to curb this practice. Mr. President, I request that his letter be made part of the RECORD at the conclusion of my remarks.

American taxpayers will be spending billions of hard earned money to bail out the savings and loan industry. The sale of junk bonds and other uninsured products by S&L's seriously undermines the faith in these institutions and will only serve to exasperate the problem.

Mr. President, we cannot allow unsuspecting depositors to be put in a position where they are misled and confuse junk bonds with insured accounts. I am confident that this legislation will help protect the public from unscrupulous operators.

Mr. President, I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2058

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Depositor Protection and Abuse Prevention Act of 1990".

SEC. 2. REGULATION OF CERTAIN NONDEPOSIT MARKETING ACTIVITIES IN PUBLIC AREAS OF RETAIL BRANCHES OF INSURED DEPOSITORY INSTITUTIONS.

Section 18 of the Federal Deposit Insurance Act (12 U.S.C. 1828) is amended by adding at the end the following new subsection:

"(o) REGULATION OF CERTAIN NONDEPOSIT MARKETING ACTIVITIES.—

"(1) CERTAIN ACTIVITIES ON BEHALF OF AFFILIATES PROHIBITED.—No insured depository institution may permit any evidence of indebtedness of, or ownership interest in, any affiliate (of such depository institution) to be sold or offered for sale in any part of any office of such institution which is commonly accessible to the general public for the purpose of accepting deposits.

"(2) DISCRETIONARY AUTHORITY IN CONNECTION WITH INSURED DEPOSITORY INSTITUTIONS.—The appropriate Federal banking agency may, by regulation or order, prohibit or impose any condition with respect to any sale, or any offer to sell, by any insured depository institution of—

"(A) any evidence of indebtedness of such institution;

"(B) any ownership interest in the institution; or

"(C) any type of indebtedness or ownership interest referred to in subparagraph (A) or (B), in any part of any office of the institution which is commonly accessible to the general public for the purpose of accepting deposits if the appropriate Federal banking agency determines that such evidence of indebtedness of or ownership interest in the institution is likely to be confused by the general public with an insured deposit.

"(3) EXCEPTION FOR DEPOSITS AND CERTAIN MEANS OF PAYMENT TO 3D PARTIES.—Paragraphs (1) and (2) shall not apply with respect to any evidence of indebtedness which—

"(A) is a deposit in an insured depository institution; or

"(B) constitutes a means of payment to a third party, such as a traveler's check, cashier's check, teller's check, certified check, or money order.".

DEPARTMENT OF THE TREASURY,
Washington, January 26, 1990.

Hon. RICHARD H. BRYAN,
U.S. Senate,
Washington, DC.

DEAR SENATOR BRYAN: Thank you for your letter to Secretary Brady advocating a ban

on the sale of securities by banks and thrifts in the same offices that accept insured deposits. I understand that the Office of Thrift Supervision (OTS) is now drafting a regulation addressing this issue.

This regulation will be forwarded to Treasury for review prior to publication. Based on the experiences at Lincoln Savings and Loan, Treasury generally supports restrictions on the sale of such securities at financial institutions. At this time, however, it would be premature to comment further on the regulation.

I appreciate the opportunity to respond to your concerns.

Sincerely,

BRYCE L. HARLOW,
Assistant Secretary
(Legislative Affairs).

Mr. RIEGLE. Mr. President, I am pleased to cosponsor the Depositor Protection and Abuse Prevention Act of 1990.

The act prohibits any federally insured depository institution from permitting its lobbies to be used to sell debt or equity securities of an affiliated company. The depository institution is thus barred from selling or offering to sell such securities, or permitting others to sell or offer them. The goal is to ensure that retail depositors are not led to believe erroneously that the affiliate's securities are covered by Federal deposit insurance.

To avoid burdening legitimate transactions, the act provides exceptions for insured certificates of deposits and for any evidence of indebtedness that serves as a means of payment to a third party, such as a certified check, traveler's check, or money order.

The act provides an important safeguard against abusive practices, and I commend the Senator from Nevada for introducing it.

By Mr. BOSCHWITZ:

S.J. Res. 248. Joint resolution to designate the month of September 1990 as "International Visitors' Month"; to the Committee on the Judiciary.

INTERNATIONAL VISITORS' MONTH

● Mr. BOSCHWITZ. Mr. President, I rise today to introduce a joint resolution declaring September 1990 as "International Visitors' Month."

This joint resolution recognizes an outstanding program that brings foreign leaders to America to develop a more personal understanding of our people and culture. I believe, Mr. President, that this successful program and its accomplishments should be properly recognized by the Congress on behalf of the American people.

Administered by the U.S. Information Agency, this program: Helps strengthen support for American foreign policy; draws on an array of experts to examine current domestic problems; complements the curriculum of elementary and higher education programs nationwide; creates opportunities for international business ventures; brings money into American cities and towns; and introduces American people of all background to future world leaders visiting the United States.

American Embassies overseas select only the most promising mid-career professionals to participate in the month-long exchange program. Last year the program brought more than 5,000 visitors to the United States. Once the visitors arrive, members of the National Council for International Visitors [NCIV] and more than 800,000 American volunteers carry out the program in communities across the United States.

As you can clearly see, this important program relies on the support of American volunteers, acting as citizen diplomats, who meet the visitors and share their professional and personal experiences.

Mr. President, in its 30-year history, countless leaders including British Prime Minister Margaret Thatcher and Costa Rican President Oscar Arias have participated in the program. Alumni of the International Visitor Program include 123 current and former Presidents and Chiefs of State.

This is a worthwhile program that deserves our support. Today I urge my colleagues to join me in designating September 1990 as "International Visitors' Month."●

ADDITIONAL COSPONSORS

S. 400

At the request of Mr. PRYOR, the name of the Senator from Arizona [Mr. DECONCINI] was added as a cosponsor of S. 400, a bill to require that all amounts saved as a result of Federal Government contracting pursuant to Office of Management and Budget Circular A–76 be returned to the Treasury, that manpower savings resulting from such contracting be made permanent, and that employees of an executive agency be consulted before contracting determinations by the head of that executive agency are made pursuant to that circular.

S. 1430

At the request of Mr. KENNEDY, the name of the Senator from Colorado [Mr. WIRTH] was added as a cosponsor of S. 1430, a bill to enhance national and community service, and for other purposes.

S. 1761

At the request of Ms. MIKULSKI, the names of the Senator from Kansas [Mrs. KASSEBAUM] and the Senator from Illinois [Mr. SIMON] were added as cosponsors of S. 1761, a bill to establish a national center for information and technical assistance relating to all types of family resource and support programs, and for other purposes.

S. 1860

At the request of Mr. BOREN, the names of the Senator from North Dakota [Mr. BURDICK], the Senator from Vermont [Mr. JEFFORDS], and the Senator from Nevada [Mr. REID] were added as cosponsors of S. 1860, a bill to amend title 38 United States Code, to require the Secretary of Veterans Affairs to furnish outpatient medical services for any disability of a former prisoner of war.

S. 1873

At the request of Mr. HATCH, the name of the Senator from South Dakota [Mr. DASCHLE] was added as a cosponsor of S. 1873, a bill to amend title 38, United States Code, to repeal the termination of the Veterans' Educational Assistance Program and to extend the 10-year delimiting period for certain Vietnam veterans.

S. 1925

At the request of Mr. SPECTER, the name of the Senator from Oregon [Mr. PACKWOOD] was added as a cosponsor of S. 1925, a bill to amend the Higher Education Act of 1965 to require colleges and universities to establish and disclose campus security policies and to inform students and employees of campus crime statistics, and for other purposes.

S. 1974

At the request of Mr. HARKIN, the name of the Senator from Kansas [Mr. DOLE] was added as a cosponsor of S. 1974, a bill to require new televisions to have built in decoder circuitry.

S. 1991

At the request of Mr. DODD, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 1991, a bill to provide for eradication of drug production in certain foreign countries through debt-for-drugs exchanges.

S. 2006

At the request of Mr. GLENN, the name of the Senator from Washington [Mr. ADAMS] was added as a cosponsor of S. 2006, a bill to establish the Department of the Environment, provide for a global environmental policy of the United States, and for other purposes.

S. 2033

At the request of Ms. MIKULSKI, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 2033, a bill to amend title XVIII of the Social Security Act to provide for coverage of annual screening mammography under part B of the Medicare Program.

SENATE JOINT RESOLUTION 227

At the request of Mr. KASTEN, the names of the Senator from Michigan [Mr. RIEGLE], the Senator from Missouri [Mr. BOND], the Senator from Delaware [Mr. BIDEN], and the Senator from Virginia [Mr. WARNER] were added as cosponsors of Senate Joint Resolution 227, a joint resolution to designate March 11, through March 17, 1990, as "Deaf Awareness Week."

SENATE JOINT RESOLUTION 229

At the request of Mr. CRANSTON, the names of the Senator from Delaware [Mr. BIDEN] and the Senator from Missouri [Mr. BOND] were added as cosponsors of Senate Joint Resolution 229, a joint resolution to designate April 1990 as "National Prevent-A-Litter Month."

SENATE JOINT RESOLUTION 243

At the request of Mr. LAUTENBERG, the names of the Senator from Delaware [Mr. BIDEN], the Senator from New Jersey [Mr. BRADLEY], the Senator from Nevada [Mr. BRYAN], the Senator from Arkansas [Mr. BUMPERS], the Senator from North Dakota [Mr. BURDICK], the Senator from New York [Mr. D'AMATO], the Senator from Illinois [Mr. DIXON], the Senator from Tennessee [Mr. GORE], the Senator from Alabama [Mr. HEFLIN], the Senator from Pennsylvania [Mr. HEINZ], the Senator from Massachusetts [Mr. KERRY], the Senator from Michigan [Mr. LEVIN], the Senator from Rhode Island [Mr. PELL], the Senator from Nevada [Mr. REID], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Maryland [Mr. SARBANES], the Senator from Illinois [Mr. SIMON], and the Senator from California [Mr. WILSON] were added as cosponsors of Senate Joint Resolution 243, a joint resolution to designate March 25, 1990, as "Greek Independence Day: A National Day of Celebration of Greek and American Democracy."

SENATE CONCURRENT RESOLUTION 88

At the request of Mr. GRAHAM, the names of the Senator from New Jersey [Mr. BRADLEY], the Senator from Iowa [Mr. HARKIN], and the Senator from Illinois [Mr. DIXON] were added as cosponsors of Senate Concurrent Resolution 88, a concurrent resolution expressing the sense of the Congress that a postage stamp should be issued in honor of Claude Denson Pepper.

SENATE RESOLUTION 239—DENOUNCING THE MILITARY OFFENSIVE IN ANGOLA

Mr. DECONCINI (for himself, Mr. DOLE, Mr. KASTEN, and Mr. SYMMS) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 239

Whereas on June 22, 1989, in the presence of 18 African heads of state, the President of the MPLA, Jose Eduardo dos Santos, and the President of UNITA, Dr. Jonas Savimbi, shook hands and agreed to negotiate a peaceful solution to the 14 year Angolan civil war;

Whereas the Agreement, known as the "Gbadolite Declaration," mediated by the President of Zaire, Mobutu Sese Seko, calls for a general ceasefire and the establishment of a commission comprised of UNITA and the MPLA, under the mediation of Zaire, for the negotiation of peace and national reconciliation in Angola;

Whereas the Catholic Bishops of Angola have publicly urged the MPLA to sign a cease-fire and begin direct negotiations with UNITA;

Whereas the prospects for peace in Angola have deteriorated because the MPLA has repudiated its Gbadolite commitment to a direct dialogue with UNITA, rejected a ceasefire presented by the mediator, President Mobutu Sese Seko of Zaire, and has resumed a military offensive; and

Whereas the United States has repeatedly urged the MPLA to agree to a ceasefire and a negotiated settlement leading to free and fair elections in Angola;

Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) The United States denounces the military offensive in Angola and urges an immediate ceasefire and withdrawal of MPLA forces;

(2) The United States government is committed to assisting the people of Angola in achieving a peaceful settlement leading to free and fair elections;

(3) The United States government should immediately request the government of the Soviet Union to urge the MPLA in the strongest terms possible to cease its military offensive and enter into direct negotiations with UNITA; and

(4) The United States government should continue to provide appropriate and effective assistance to UNITA and to assist in bringing about a negotiated settlement of the conflict in Angola.

AMENDMENTS SUBMITTED

EXCELLENCE IN EDUCATION ACT

McCONNELL AMENDMENTS NOS. 1224 AND 1225

(Ordered to lie on the table.)

Mr. MCCONNELL submitted two amendments intended to be proposed by him to the bill (S. 695) to promote excellence in American education by recognizing and rewarding schools, teachers, and students for their outstanding achievements, enhancing parental choice, encouraging the study of science, mathematics, and engineering, and for other purposes, as follows:

AMENDMENT NO. 1224

On page 64, between lines 2 and 3, insert the following:

PART F—PRESIDENTIAL AWARDS FOR EXCELLENCE IN EDUCATION PROGRAM

SEC. 131. PRESIDENTIAL AWARDS FOR EXCELLENCE IN EDUCATION PROGRAM.

(a) TITLE HEADING AND TABLE OF CONTENTS.—(1) The heading for title II of the Elementary and Secondary Education Act of 1965 is amended to read as follows:

"CRITICAL SKILLS IMPROVEMENT AND PRESIDENTIAL AWARDS FOR EXCELLENCE IN EDUCATION"

(2) Section 1 of the Elementary and Secondary Education Act is amended by inserting after "SEC. 2203. Authorization of Appropriations." the following:

PART F—PRESIDENTIAL AWARDS FOR EXCELLENCE IN EDUCATION PROGRAM

"Sec. 2301. Findings and purpose.
"Sec. 2302. Allocation to States.
"Sec. 2303. State applications.
"Sec. 2304. Selection of award recipients.
"Sec. 2305. Amount and use of awards.
"Sec. 2306. Awards ceremony.
"Sec. 2307. Authorization of appropriations.

(b) AMENDMENT TO TEXT.—Title II of the Elementary and Secondary Education Act of 1965 is further amended by adding at the end thereof the following new part:

PART F—PRESIDENTIAL AWARDS FOR EXCELLENCE IN EDUCATION PROGRAM

"SEC. 2301. FINDINGS AND PURPOSE.

"(a) FINDINGS.—The Congress finds that—

"(1) the success of America's elementary and secondary schools depends most heavily upon the Nation's educators;

"(2) when educators are highly motivated and committed to excellence, they succeed not only in imparting subject matter knowledge, but also in instilling in their students an appreciation of the value and importance of education;

"(3) elementary and secondary school systems should have in place standards of teacher excellence and fair and effective procedures for measuring teacher success; and

"(4) in return for their efforts, excellent elementary and secondary school educators deserve public recognition, respect, and appropriate financial awards.

"(b) PURPOSE.—It is the purpose of this subpart to reward educators in every State who meet the highest standards of excellence.

"SEC. 2302. ALLOCATION TO STATES.

"(a) ALLOCATION FORMULA.—From the funds appropriated under section 2307—

"(1) 50 percent shall be allocated among the States in an amount which bears the same ratio to such amount as the number of children aged 5 to 17, inclusive, in the State bears to the number of such children in all such States, according to the most recent available data that are satisfactory to the Secretary; and

"(2) 50 percent shall be allocated among the States on the same basis as funds are allocated among such States under section 1005 of this Act for the same fiscal year.

"(b) ADMINISTRATIVE EXPENSES.—Each State may reserve up to 5 percent of its allocation under subsection (b) for administrative expenses, including the cost of convening the panel described in section 2304(c).

"(c) STATE DEFINED.—For the purposes of this part, the term 'State' shall include the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico.

"(d) INSULAR AREAS.—The provisions of Public Law 93-134, permitting the consolidation of grants to the Insular Areas, shall not apply to funds allocated under this part.

"(e) DISTRIBUTION OF AWARDS.—Other provisions of this title notwithstanding, each State shall make at least one Presidential Award for Excellence in Education in each congressional district.

"SEC. 2303. STATE APPLICATIONS.

"(a) SUBMISSION OF STATE APPLICATIONS.—The Secretary is authorized to make allocations to States in accordance with the provisions of this part. In order to receive an allocation under this part, the Governor of each State shall submit a one-time application to the Secretary. Such application shall be filed at such time in such manner, and shall contain such information, as the Secretary may reasonably require.

"(b) DESCRIPTION OF STATE CRITERIA AND PROCEDURES.—The application submitted pursuant to subsection (a) shall contain a

description of the State's criteria and procedures for selecting recipients of Presidential Awards for Excellence in Education. The State's criteria and procedures shall be subject to the approval of the Secretary.

"(c) ASSURANCES.—The application submitted pursuant to subsection (a) shall contain assurances that—

"(1) Presidential Awards for Excellence in Education shall be made in accordance with the provisions of this part;

"(2) the State shall provide such fiscal control and fund accounting procedures as the Secretary shall require; and

"(3) the State shall apply the selection criteria uniformly to nominations for recipients of Presidential Awards for Excellence in Education that are received from public and private schools, educators, associations of educators, parents, associations of parents and educators, businesses, business groups, or student groups, as well as those received from educational agencies.

"SEC. 2304. SELECTION OF AWARD RECIPIENTS.

"(a) ELIGIBLE RECIPIENTS.—Any full-time public or private elementary or secondary school teacher of academic or vocational subjects or any full-time public or private elementary or secondary school principal or headmaster shall be eligible to receive an award under this subpart, except that teachers of religion (other than religion as an academic discipline) shall not be eligible.

"(b) NOMINATIONS.—(1) Local educational agencies, public and private schools, educators, parents, associations of educators, associations of parrents and educators, businesses, business groups and student groups may nominate teachers for awards under this part.

"(2) The State educational agencies shall notify local educational agencies, public and private schools, associations of educators, associations of parents and educators, business groups, and the general public of the deadlines and procedures for making nominations, and inform them of the selection criteria which will be used in selecting award recipients in a given year.

"(c) SELECTION BY STATE PANEL.—Selection of award recipients in each State shall be made from among the teachers nominated in accordance with subsection (b). Award recipients shall be selected by a panel which is chosen by the Governor in consultation with the chief State officer and is composed of members representing parents, school administrators, teachers, school board members, and the business community.

"(d) SELECTION CRITERIA.—The State panel shall select award recipients in accordance with the criteria approved by the Secretary in the State's application. Such selection criteria may include an educator's success in—

"(1) educating 'at-risk' students, such as educationally or economically disadvantaged, handicapped, limited English proficient, or homeless children to their fullest potential;

"(2) educating gifted and talented students to their fullest potential;

"(3) encouraging students to enroll, and succeed, in advanced classes in subjects such as mathematics, science, and foreign languages;

"(4) teaching in schools educating large numbers of 'at-risk' students, including schools in low-income inner-city or rural areas;

"(5) introducing a new curriculum area into a school or strengthening an established curriculum;

"(6) acting as a 'master teacher' by helping new teachers make the transition into a teaching career;

"(7) encouraging potential dropouts to remain in school or encouraging individuals who have dropped out to reenter and complete their schooling;

"(8) improving daily attendance;

"(9) leadership qualities; and

"(10) success in employing other innovative educational techniques.

"SEC. 2305. AMOUNT AND USE OF AWARDS.

"(a) AMOUNT OF AWARDS.—The amount of a Presidential Award for Excellence in Education shall be $5,000.

"(b) PRO RATA REDUCTION.—Should the amount allocated by the Secretary to a State not be sufficient to support one Presidential Award for Excellence in Education in each congressional district, the State is authorized to make pro rata reductions in the amount of other awards to enable the award of at least one Presidential Award for Excellence in Education in each congressional district.

"(c) USE OF AWARDS.—An award to an individual recipient under this part shall be available for the recipient's use of any purpose, except that private school educators receiving a Presidential Award for Excellence in Education may only use such award for capital expenses at the school where such individual teaches as set forth in section 1017(d) of the Elementary and Secondary Education Act of 1965.

"SEC. 2306. AWARDS CEREMONY.

"The Secretary is authorized to accept gifts to pay for the costs of conducting awards ceremonies to recognize recipients of Presidential Awards for Excellence in Education.

"SEC. 2307. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated $7,600,000 for the fiscal year 1991 and each of the fiscal years 1992 and 1993 to carry out the provisions of this part.".

On page 45, between lines 12 and 13, insert the following:

"(3) DISTRIBUTION OF AWARDS.—Each State educational agency shall make at least one Presidential Merit School Award in each congressional district.".

On page 47, strike line 21 through line 25, and insert the following:

"(d) AMOUNT OF AWARD.—Each State educational agency shall establish criteria, subject to subsection (c)(4), including criteria relating to the size of the school and the economic circumstances of the student body, for determining the amount of Presidential Merit School Awards.

"(2) The amount of Presidential School Awards shall be substantially equivalent among congressional districts.".

AMENDMENT NO. 1225

On page 39, in the table of contents, strike the item relating to title XIII and insert the following:

TITLE XIII—APPALACHIAN TEACHER STUDENT LOAN ASSISTANCE

TITLE XIV—EFFECTIVE DATE

On page 133 after line 24, insert the following:

TITLE XIII—APPALACHIAN TEACHER STUDENT LOAN ASSISTANCE

SEC. 1301. SHORT TITLE.

This title may be cited as the Appalachian Teacher Student Loan Assistance Act of 1990.".

SEC. 1302. PROGRAM AUTHORIZED.

(a) IN GENERAL.—The Secretary is authorized to establish and operate a program to cancel or pay student loan payments for eligible teachers who agree to teach in public elementary and secondary schools in eligible counties.

(b) NUMBER.—In each fiscal year the Secretary shall cancel or pay student loan payments for not more than 2 eligible teachers in each eligible county.

(c) SELECTION.—The Secretary shall select eligible teachers to receive cancellation or payment of student loan payments in accordance with the provisions of this title on the basis of the eligible teacher's academic record.

(2) The Secretary shall select eligible teachers to receive cancellation or payment of student loan payments in accordance with the provisions of this title within 60 days of the enactment of this Act.

(d) ADMINISTRATIVE EXPENSES.—From amounts authorized to be appropriated in each fiscal year, the Secretary may reserve an amount not to exceed $50,000 for administrative expenses.

(e) APPLICATION.—(1) Each eligible teacher desiring cancellation or payment of student loan payments pursuant to the provisions of this title shall submit an application to the Secretary at such time, in such manner and accompanied by such information as the Secretary may reasonably require.

(2)(A) The Secretary shall give preference in canceling or paying student loans payments to applications from eligible teachers who are—

(i) handicapped or disabled;

(ii) a member of a minority group; and

(iii) a resident of Kentucky, Tennessee, West Virginia, and Virginia.

(B) The amount of preference given each application submitted pursuant to this section shall be determined by the number of the preference categories set forth in subparagraph (A) applicable to such applicant.

SEC. 1303. AGREEMENT.

Each eligible teacher selected to participate in the program authorized in section 1302 shall enter into an agreement with the Secretary. Each such agreement shall—

(1) provide assurances that the eligible teacher will teach in a public elementary or secondary school in an eligible country for a period of not less than 1 year;

(2) provide assurances that the eligible teacher will repay all or a portion of the student loan payments cancelled or paid by the Secretary for that year in the event that the conditions of paragraph (1) are not complied with except where the teacher—

(A) dies,

(B) becomes permanently disabled, as established by the sworn affidavit of a qualified physician; or

(C) has been discharged in bankruptcy;

(3) set forth procedures under which eligible teachers who teach less than the 1-year period required under paragraph (1) will repay the amounts cancelled or paid by the Secretary for that year according to a schedule established by the Secretary;

(4) set forth the total amount of all eligible loans incurred by the eligible teacher in obtaining an undergraduate or graduate teaching degree; and

(5) set forth the terms and conditions under which an eligible teacher will be allowed to seek a new teaching position in another eligible county.

SEC. 1304. PAYMENTS PROVISIONS.

(a) IN GENERAL.—(1) Except as provided in paragraph (2), the Secretary shall cancel or pay 1/10 of the total amount of all eligible loans incurred by an eligible teacher in obtaining an undergraduate or graduate teaching degree for each year an eligible teacher teaches in a public elementary or secondary school in an eligible county in accordance with the provisions of this title.

(2) In no event shall the Secretary cancel or pay more than $4,000 in eligible loans in any fiscal year for any one eligible teacher.

(3) The Secretary is authorized to enter into arrangements with the holder of any eligible loan and the appropriate State educational agency designed to facilitate the payment of principal and interest when due for each payment period the borrower meets the requirements of this title.

(b) SPECIAL RULES.—(1) If a portion of a loan is cancelled or paid under this subsection for any year, the entire amount of interest on such loan which accrues for such year shall be cancelled or paid.

(2) For the purpose of this subsection, the term "year" where applied to service as a teacher means academic year as defined by the Secretary.

(3) The amount of a loan, and interest on a loan, which is cancelled or paid under this section shall not be considered income for purposes of the Internal Revenue Code of 1986.

SEC. 1305. STATE ACTIVITIES.

(a) IN GENERAL.—The State educational agencies in Kentucky, Tennessee, West Virginia, and Virginia each shall—

(1) monitor the activities of teachers within the State who are participating in the program authorized by this title for compliance with the provisions of this title;

(2) biannualy report to the Secretary regarding the monitoring activities required in paragraph (1);

(3) assist eligible teachers in obtaining employment as a teacher in eligible counties within the State; and

(4) perform such other functions as the Secretary may reasonably require.

(b) ADMINISTRATIVE EXPENSES.—From amounts authorized to be appropriated in each fiscal year the Secretary is authorized to make grants to the state educational agencies in Kentucky, Tennessee, West Virginia, and Virginia to pay the reasonable costs of the State activities described in subsection (a).

SEC. 1306. DEFINITIONS.

For the purposes of this title—

(1) the term "elementary school" has the same meaning given such term in section 1471(8) of the Elementary and Secondary Education Act of 1965;

(2) the term "eligible loan" means any loan made pursuant to—

(A) part B of title IV of the Higher Education Act of 1965 including supplemental loans for students; or

(B) part E of title IV of the Higher Education Act of 1965;

(3) the term "eligible county" means any county in Kentucky, Tennessee, West Virginia, and Virginia which is within the jurisdiction of the Appalachian Regional Commission as defined by the Appalachian Regional Development Act of 1965 and in which—

(A) the percentage of the population living in poverty (as determined by the most recent available census data) is at least 1.5 times the national average;

(B) the per capita income exclusive of transfer payments does not exceed 66 percent of the national average per capita income; and

(C) the average annual unemployment rate in the three most recent years is at least 150 percent of the national unemployment rate;

(4) the term "eligible teacher" means a recent college graduate with an undergraduate or graduate degree in education who has not held a teaching position other than student teaching position;

(5) the term "secondary school" has the same meaning given such term in section 1471(21) of the Elementary and Secondary Education Act of 1965;

(6) the term "Secretary" means the Secretary of Education; and

(7) the term "State educational agency" has the same meaning given such term in section 1471(23) of the Elementary and Secondary Education Act of 1965.

SEC. 1307. EFFECTIVENESS STUDY.

From amounts authorized to be appropriated in fiscal year 1992, the Secretary may reserve $50,000 to study—

(1) the effectiveness of the program authorized by this title;

(2) such program's potential for use in addressing acute teacher shortages in other areas of the country, particularly inner city areas; and

(3) such program's ability to enhance minority recruitment.

SEC. 1308. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated $602,000 for fiscal year 1991, $652,000 for fiscal year 1992, and $602,000 for fiscal year 1993 to carry out the provisions of this title.

On page 134, line 1, strike "XIII" and insert "XIV".

On page 134, line 2, strike "1301" and insert "1401".

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BUMPERS. Mr. President, I would like to announce for the public that hearings have been scheduled before the Subcommittee on Public Lands, National Parks and Forests of the Committee on Energy and Natural Resources.

The first hearing will be held on February 21, 1990, beginning at 2 p.m. The purpose of the hearing is to receive testimony on the following measures pending in the subcommittee:

S. 844 and its companion measure, H.R. 1484, to establish a National Park System Review Board;

S. 1360 and its companion measure, H.R. 2844, to improve the ability of the Secretary of the Interior to properly manage certain resources of the National Park System; and

S. 1859, to restructure the repayment terms and conditions for loans made by the Secretary of the Interior to the Wolf Trap Foundation for the Performing Arts for the reconstruction of the Filene Center in Wolf Trap Farm Park in Fairfax County, VA.

The second hearing will be held on Tuesday, March 6, 1990, beginning at 9:30 a.m. The purpose of that hearing is to receive testimony on the following bills:

S. 666, to enroll 20 individuals under the Alaska Native Claims Settlement Act;

S. 1128, for the relief of Richard Saunders;

S. 1719, to designate the segment of the Colorado River within Westwater Canyon in Utah as a component of the National Wild and Scenic Rivers System;

S. 1738, to convey certain Oregon and California Land Grant lands in Oregon to the Rogue Community College District; and

S. 1837, to direct the Secretary of the Interior to establish a Desert Research Center.

The hearings will be held in room SD-366 of the Senate Dirksen Office Building in Washington, DC. Because of the limited time available for the hearings, witnesses may testify by invitation only. However, anyone wishing to submit written testimony to be included in the hearing record is welcome to do so. Those wishing to submit written testimony should send two copies to the Subcommittee on Public Lands, National Parks and Forests, 364 Dirksen Senate Office Building, Washington, DC 20510.

For further information regarding the hearings, please contact David Brooks of the subcommittee staff at (202) 224-9863.

COMMITTEE ON VETERANS' AFFAIRS

Mr. CRANSTON. Mr. President, I announce, for the information of Senators, that the Committee on Veterans' Affairs, which I am privileged to chair, is scheduled to hold a hearing Thursday, February 8, 1990, in SR-418 at 9:30 a.m., to consider the nominations of Ronald M. Holdaway and Hart T. Mankin to be associate judges on the U.S. Court of Veterans Appeals.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. LEAHY. Mr. President, I ask unanimous consent that the full Committee on Environment and Public Works be authorized to meet during the session of the Senate on Thursday, February 1, beginning at 10 a.m., to conduct a hearing on the National Environmental Education Act (S. 1076).

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on February 1, 1990, at 10 a.m., to hold a hearing on the nomination of William D. Hathaway to be a Federal Maritime Commissioner.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON AGRICULTURAL PRODUCTION AND STABILIZATION OF PRICES

Mr. LEAHY. Mr. President, I ask unanimous consent that the Subcommittee on Argicultural Production and Stabilization of Prices of the Senate Committee on Agriculture, Nutrition, and Forestry, be authorized to meet during the session of the Senate on Thrusday, February 1, 1990, at 9:30 a.m., to hold a joint hearing in preparation for the 1990 farm bill regarding oilseeds.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet in open session on Thursday, February 1, 1990, at 10 a.m., to receive testimony on the amended defense authorization request for fiscal year 1991 and the 5-year defense plan; to receive a net assessment from the Chairman, Joint Chiefs of Staff.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITEE ON SECURITIES

Mr. LEAHY. Mr. President, I ask unanimous consent that the Securities Subcommittee of the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Thursday, February 1, 1990, at 9:30 a.m., to conduct hearings on S. 647, the Securities Law Enforcement Remedies Act of 1989.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. LEAHY. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, February 1, 1990, at 2 p.m., to hold a closed hearing in intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON VETERANS' AFFAIRS

Mr. LEAHY. Mr. President, the Committee on Veteran's Affairs would like to request unanimous consent to hold a hearing on the nomination of D'Wayne Gray to be Chief Benefits Director of the Department of Veterans Affairs on Thursday, February 1, 1990, at 9:30 a.m., in SR-418.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, February 1, at 11 a.m., to hold a hearing on foreign policy priorities for the 1990's with Secretary of State James Baker.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to hold a business meeting during the session of the Senate on Thursday, February 1, 1990, at 10 a.m., in room SD-226.

The executive agenda follows:

I. NOMINEES

U.S. Attorney

Michael J. Norton, to be United States Attorney for the District of Colorado.

Ronald Frank Ederer, to be United States Attorney for the Western District of Texas.

U.S. Marshals

James Y. Stewart, to be United States Marshal for the Eastern District of Michigan.

Charles E. Healey, to be United States Marshal for the Eastern District of New York.

Donald E. Crowl, to be United States Marshal for the Northern District of Oklahoma.

Walter J. Bamberg, to be United States Marshal for the Middle District of Alabama.

Robert F. Gilbert, to be United States Marshal for the District of New Hampshire.

II. BILLS

S. 438. A bill to amend chapter 96 of title 18, United States Code—DeConcini.

S. 865. A bill to amend the Sherman Act regarding retail competition—Metzenbaum.

S.J. Res. 14. Joint resolution proposing an amendment to the Constitution of the United States to allow the President to veto items of appropriation—Thurmond.

S.J. Res. 23. Joint resolution proposing an amendment to the Constitution authorizing the President to disapprove or reduce an item of appropriations—Dixon.

S. 594. A bill to establish a specialized corps of judges necessary for certain federal proceedings required to be conducted, and for other purposes—Heflin.

S. 185. A bill to amend title 18 of the United States Code to punish as a federal criminal offense the crimes of international parental child abduction—Dixon.

S. 198. A bill to amend title 17, United States Code, the Copyright Act to protect certain computer programs—Hatch.

S. 497. A bill entitled the "Copyright Remedy Clarification Act"—DeConcini.

H.R. 3045. A bill entitled the "Copyright Remedy Clarification Act"—Kastenmeier.

S. 1271. A bill to amend title 17, United States Code, to change the fee schedule to the Copyright Office, and to make certain technical amendments—DeConcini.

H.R. 1622. A bill to amend title 17, United States Code, to change the fee schedule to the Copyright Office, and to make certain technical amendments—Kastenmeier.

S. 1272. A bill to amend chapter 8 of title 17, United States Code, to reduce the number of Commissioners on the Copyright Royalty Tribunal, to provide for lapsed terms of such Commissioners, and for other purposes—DeConcini.

H.R. 3046. A bill to reduce the number of commissioners on the Copyright Royalty Tribunal, to change the salary classification rates for members of the Copyright Tribunal and the United States Parole Commission and for the Deputy and Assistant Commissioners of Patents and Trademarks, and for other purposes—Kastenmeier.

S.J. Res. 183. Joint resolution proposing an amendment to the Constitution relating to a Federal balanced budget—Simon.

S. 396. A bill to amend title 11, of the United States Code, the bankruptcy code regarding swap agreements with an amendment in the nature of a substitute—DeConcini.

S. 994. A bill to amend the Clayton Act regarding interlocking directorates and officers—Metzenbaum.

S. 995. A bill to amend the Clayton Sherman Acts regarding antitrust procedures—Metzenbaum.

S. 1829. A bill to amend the Controlled Substances Act to further restrict the use of steroids and human growth hormones—Biden.

S. 1965. A bill to protect the rights of victims of crime, establish a Federal Victims' bill of rights for children, and improve the response of the criminal justice system and related agencies to incidents of child abuse—Biden.

H.R. 150. A bill to amend the Immigration and Nationality Act to provide a procedure for an alien who dies while serving on active-duty with the United States Armed Forces during certain periods of hostilities to be considered a citizen of the United States at the time of the alien's death—Donnelly.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

COMMENDING OPERATION TIGER

● Mr. LIEBERMAN. Mr. President, veterans of World War II reflect on the "Good War" with strong feelings of pride and loyalty. Unfortunately, many of the brave men who fought in this war lost their lives in combat, but others were fortunate enough to be snatched from the jaws of death on account of the bravery of their comrades. I would like to take this opportunity to share with my colleagues a story of unmatched heroism which for many years went unrecognized.

Hours before dawn on April 28, 1944, American troops, taking part in a covert training exercise code-named Operation Tiger, were finishing maneuvers in the English Channel in preparation for the Normandy invasion when they drew the attention of high-speed German torpedo boats. The enemy vessels rapidly honed in on the sluggish convoy of amphibious troop transporters, known as LST's and sank two of them, while heavily damaging a third. The soldiers and crew members on the crippled LST's immediately became easy targets to the unmerciful machine guns of the German Navy.

Reports of this incident reached the Allied Command, but, fearing exposure of the top secret mission, they ordered the remaining vessels to return to the safety of the English coastline. However, Capt. John H. Doyle and the crew of LST 515, including Connecti-

cut native, John H. Provini, defiantly remained at the scene and saved the lives of 100 of their fellow soldiers. John Provini and his crew mates repeatedly dove into the icy English Channel to rescue their drowning comrades from almost certain death. These soldiers would not have survived if not for the bravery and loyalty of the men of LST 515.

The reasons for suppressing commendation of Operation Tiger were obvious. The U.S. Government did not want to draw attention to any Allied exercises preparing for the Normandy invasion, which would occur later that year. However, even after the war, these unselfish men never received the gratitude that they rightly deserved. The time has come for the heroic actions of the veterans of LST 515 to be officially recognized by our Government. Those brave men deserve our respect and thanks for going far beyond what their duty required of them. I hope that all of my colleagues will join me in rising to pay tribute to those heroic American soldiers.●

THE 72D ANNIVERSARY OF UKRAINIAN INDEPENDENCE DAY

● Mr. RIEGLE. Mr. President, I would like to take this opportunity to add my voice to the millions of Ukrainians all over the world celebrating the 72d anniversary of the establishment of a sovereign and independent Ukraine. This proclamation, followed by the creation of a united Ukrainian National Republic in 1919, ended years of national persecution and external domination.

After centuries of living under czarist Russian rule, Ukraine emerged as a liberated country, free of foreign hegemony. The young republic set out firmly on the path to democracy by quaranteeing such basic rights a freedom of speech, the press, and religion. In addition, Ukraine committed itself to securing national and personal autonomy for ethnic minorities living within its borders.

Tragically, fate betrayed the Ukrainian National Republic. Within 3 short years, the struggling nation was overrun by the stronger military forces of the Russian Bolsheviks. Much of Ukraine was exposed to brutal colonization by foreign forces, which suppressed the creativity of intellectuals and decimated a great deal of the fertile Ukrainian countryside.

Indeed, while much of the history of the Ukrainian people has been filled with sorrow, today, we must celebrate even the short life of the Ukrainian National Republic. It stood as a beacon of democracy, reaffirming the Ukrainian people's dignity, their spirit, and their right to self-rule.

Remembrance of their tragic, yet courageous past has guided the spirit of the international Ukrainian community to strive for the recreation of an independent Ukraine. Ukrainians have never yielded in their quest for reestablishment of a national homeland and independence from the Soviet Union. We can help in that effort by awakening the world to the realities of the Soviet occupation of the Ukrainian nation, which has been so brutal and painful for the Ukrainian people.

Under Soviet control, not only has Ukrainian political self-determination been stifled, but basic human liberties have been disregarded. In accordance with the official Communist doctrine of atheism, freedom of worship, a universally accepted human right, has been seriously curtailed in the Soviet Ukrainian Republic. The Catholic and Orthodox Churches, cultrual focal points for the Ukrainian people, have been suppressed for seven decades. Recently, in an attempt to promote restoration of religious rights, I wrote a letter to Soviet President Mikhail Gorbachev calling upon Moscow to grant religious freedom to all citizens of the Ukraine.

President Gorbachev has begun to pilot the U.S.S.R. into new and uncharted waters. He has restored basic freedoms for many people in the Soviet Union and Eastern Europe, while attempting to restructure a stagnant Soviet economy. At the same time, independence movements have expanded their activities in several Soviet Republics, including Ukraine. Although these changes are a cause for hope, they unfortunately have largely not extended to Ukraine. Apparently, the Soviet Union has placed greater restrictions on the Ukrainian republic because of its significant economic productivity and large population. These, however, are poor reasons for denying the Ukrainian people their right to self-determination.

On January 21, 1990, in a popular demonstration of Ukraine's national aspirations, citizens of the Ukraine joined hands in a human chain stretching across the republic. Linked arm-in-arm from Kyiv to Lviv, Ukrainians delivered a message of hope and solidarity that their vanquished nation would once again thrive. As a staunch supporter of Ukrainian self-determination, I admire the courage and tenacity of these activists. Their strength reaffairms that the aspiration for a free Ukraine continues to live in the hearts and minds of all Ukrainians.

Each year, as we celebrate the establishment of the Ukrainian National Republic, it is important that we persevere in our efforts to promote the cause of freedom in Ukraine. On this 72d anniversary of the achivement of Ukrainian independence, I pledge to do all I can to achieve that goal.●

STATE DEVELOPMENTAL DISABILITIES PLANNING COUNCILS COMPLETE ASSESSMENT OF SERVICE SYSTEM FOR AMERICANS WITH DEVELOPMENTAL DISABILITIES

● Mr. HARKIN. Mr. President, I am pleased to inform you and my colleagues that on January 1, 1990, the 56 State and territorial developmental disabilities planning councils unveiled a new blueprint for the improvement of public policies which affect people with developmental disabilities. On that date, each developmental disabilities planning council presented their Governor and legislature an analysis of the way in which Federal and State policies either positively or negatively impact services to people with disabilities. These reports are a direct result of the mandate which we included in the 1987 amendments to the Developmental Disabilities Act (Public Law 100-146).

On April 1, Members of Congress will receive a report from the Secretary of Health and Human Services, which is an aggregation of the reports conducted in each State and territory. This vital information will tell us how well our current approach is working in each State, and nationally. This will be invaluable to us as we further develop and refine legislation which affects people with disabilities throughout the United States.

The 1990 report, as this nationwide effort has come to be called, includes three major activities:

A review and analysis of the policies of Federal and State programs that provide services to people with developmental disabilities;

A survey of consumer satisfaction with services provided by these programs; and

Public forums conducted in each State that resulted in input from citizens and families as well as providers of services.

Developmental disabilities planning councils set out to assess Federal and State programs based upon their promotion of independence, productivity, and integration of persons with developmental disabilities into their communities. Consumers were surveyed regarding their experience with programs and how that experience affected their independence, productivity, and integration. Information on key Federal programs was collected, analyzed, and shared with developmental disabilities planning councils. The results were then integrated with a national consumer outcome and satisfaction survey.

In addition to the effects of individual States, the National Association of Developmental Disabilities Councils in collaboration with Temple University provided considerable assistance to councils in accomplishing their work.

University affiliated programs in many States also worked with the councils in organizing and carrying out their activities.

The 1990 report has initiated intensive activity on the part of all developmental disabilities planning councils that will continue long after the process has been completed. Their impact will be significant and provide an exciting and unprecedented opportunity for progress.

I urge each of you to contact your State developmental disabilities council and ask for their 1990 Report. I encourage you to read it and determine for yourself how well your State is doing on behalf of people with developmental disabilities.●

UKRAINIAN INDEPENDENCE

● Mr. BOSCHWITZ. Mr. President, it was just over 72 years ago, on January 22, 1918, that the Ukranian Central Rada proclaimed Ukraine an independent, sovereign state. However, the Ukraine's strategic location and rich resources have always made it a coveted prize of aggressors, and its short-lived independence was soon crushed by the Soviet Union.

With the recent events in Eastern Europe, the Ukranian people have more desire than ever in reattaining their freedom. Their goal is understandable. Freedom is something we Americans enjoy every day. The Third Universal of the Ukrainian National Republic, issued in 1917, proclaimed the rights to freedom of speech, press, and religion. It also established the rights of assembly, and protection for minorities.

The desire for freedom is stronger today than it has ever been in the Ukraine, and other Soviet Republics. Current uprisings demonstrate that the desire for freedom lives in the hearts of people everywhere. As leaders of the greatest free nation, we must listen to these cries for freedom and do all in our power to guarantee that the Ukrainian people are given every opportunity to utilize those rights every free American is entitled to.

I ask all Minnesotans and especially the Minnesota Ukrainian community to join me in sending a message of hope and courage to Ukrainians everywhere.●

TRIBUTE TO DAN CONRAD, MINNETONKA, MN

● Mr. BOSCHWITZ. Mr. President, I rise today to pay tribute to a constituent of mine, a Minnesotan whose work was yesterday honored by the President of the United States as one of his daily "Points of Light."

Dan Conrad, of Minnetonka, MN, is a schoolteacher who has organized a unique class in which students are required to perform 2 hours of community service work a day, 4 days a week.

Dan's commitment to community service is not new—he created this class in 1972, and hundreds of his students have learned valuable lessons about the importance of community service. That is a lesson they take with them for the rest of their lives.

Dan's students work with nursing homes, day care centers, senior citizen groups, and other organizations throughout the community. On Friday of each week, class members meet to discuss their experiences. It is a forum for understanding the value of their efforts, and for developing a perspective on many social issues.

As someone who has had the privilege of leading fund-raising campaigns for many Minnesota charities, I can vouch for the fact that Minnesotans are a particularly warm and giving people. When President Bush spoke in his campaign of a "Thousand Points of Light," I knew that many of those points of light could be found in the North Star State. I am proud that the President has seen fit to honor one of our own, and I want to also extend my own congratulations to Dan Conrad, as well as my appreciation for the efforts he makes on behalf of our State and Nation.●

UNANIMOUS-CONSENT AGREEMENT—S. 1310

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to S. 1310, the illiteracy bill, on Monday, February 5, at 10 a.m., and that the following amendments be the only amendments in order, except for the committee reported substitute:

A Simon technical amendment; a Heinz amendment providing literacy training for commercial truck drivers; an Armstrong amendment to provide that the advisory board include classroom teachers; an Armstrong amendment regarding the teaching of alternate reading methods such as phonics; a Simon possible second-degree amendment to the Armstrong phonics amendment; a Bond amendment regarding parents as teachers expansion; a Simon possible second-degree amendment to the Bond amendment; a Wallop amendment regarding Indian tribes given applicant status under Even Start Program; and a Simon possible second-degree amendment to the Wallop amendment.

I further ask unanimous consent that no motions to recommit be in order, and that any rollcall vote ordered with respect to S. 1310 on Monday occur beginning at 12 noon on Tuesday, February 6, 1990.

I further ask unanimous consent that the Simon second-degree amendments be on the same subject as the first-degree amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement is as follows:

Ordered, That the Senate proceed to S. 1310, the illiteracy bill on Monday, February 5 at 10 a.m., and that the following amendments be the only amendments in order, except for the committee reported substitute:

Simon Technical amendment;

Heinz amendment providing literacy training for commercial truck drivers;

Armstrong amendment to provide that the advisory board include classroom teachers;

Armstrong amendment regarding the teaching of alternate reading methods such as phonics;

Simon possible 2d degree to the Armstrong phonics amendments;

Bond amendment regarding parents as teachers expansion;

Simon possible 2d degree to the Bond amendment;

Wallop amendment regarding Indian tribes given applicant status under Even Start Program;

Simon possible 2d degree amendment to the Wallop amendment;

Ordered, That no motions to recommit be in order, and that any rollcall ordered with respect to S. 1310 on Monday occur beginning at 12 noon on Tuesday, February 6, 1990.

Order further, That the Simon 2d degree amendments be on the same subject as the 1st degree amendment.

EXECUTIVE SESSION

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nomination: Calendar No. 573, Gail Roggin Wilensky, to be Administrator of the Health Care Financing Administration.

I further ask unanimous consent that the nominee be confirmed, that any statements appear in the RECORD as if read, that the motion to reconsider be laid upon the table, that the President be immediately notified of the Senate's action, and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nomination considered and confirmed en bloc is as follows:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Gail Roggin Wilensky, of the District of Columbia, to be Administrator of the Health Care Financing Administration.

SCHEDULE

Mr. MITCHELL. Mr. President, for the information of Senators, many of whom have inquired about the schedule for the next few days, I would like to now provide a brief summary of our plan and what has occurred today with respect to the clean air bill.

In the past few days I have had several discussions with the distinguished Republican leader of the Senate and

the Administrator of the Environmental Protection Agency, as well as other administration officials, and as a consequence of those discussions, we began, earlier today, a series of meetings in an effort to resolve differences over some aspects of the clean air bill.

Yesterday the distinguished Republican leader suggested to me that if the meetings held beginning today were sufficiently productive and promising, that it might be appropriate and in the best interest of the Senate's time that we permit those discussions to go forward and take up other legislation in the Senate. I agreed with that suggestion, pending the results of the meeting today.

Those meetings are still continuing, but I am pleased to report that, so far, they have been productive and reassuring of the good faith of all parties in reaching an agreement to resolve the differences to which I earlier referred.

Accordingly, to permit those meetings to go forward in a manner that is the most efficient use of time of the Senators present and to permit the Senate to conduct other business, it is my intention first that there will be no rollcall votes this evening, and that shortly the Senate will go out for the evening; that the Senate will not be in session tomorrow, Friday. During tomorrow the meetings, however, will continue, as they will this evening.

On Monday, as I have already indicated in the consent agreement previously obtained, the Senate will consider S. 1310, the illiteracy bill. It is my intention on Tuesday morning to proceed to the Excellence In Education Act, S. 695, at 10 a.m. Although we do not yet have an agreement on that bill, both staffs will be working on Monday, tomorrow and Monday, toward one and, in any event, even absent an agreement, it is now the best estimate of staff on both sides that that bill will take 4 or 5 hours. Therefore, we should be able to complete action on it during the day Tuesday. Following completion of that, it is my current intention and expectation that we will then return to the Clean Air Act.

Mr. President, in the past several days, last week and this week, as we have been considering the Clean Air Act, it has been necessary to permit Senators to have the maximum opportunity to consider the bill and to evaluate its provisions before making decisions on it. Concurrently with that, I have received a very large number of requests from Senators not to have votes at certain times and on certain days, and it has been relatively easy to accommodate them because of the status with respect to the clean air bill.

I would like now to state well in advance, so that all Senators may be prepared, that I anticipate that there will be lengthy sessions, well into the evenings, and long days and nights on the clean air bill next week. So Senators should now be prepared and adjust their schedules accordingly. That will be my expectation when we return to the bill, as best I can now predict, sometime during the day on Tuesday.

I want to thank my distinguished Republican colleague for his cooperation in this matter. He and I participated in portions of the meetings today and, I hope, help set the tone that is now continuing in the meetings.

These are very difficult issues; they are very important to all concerned, and a resolution for them will not be easy and may not be possible in all events. I think a good start has been made that will produce actual economies of time when we get to voting on the bill next week.

I would like to now again thank and yield to my distinguished Republican colleague.

Mr. DOLE. I thank the majority leader. I concur with what the majority leader has stated. We are having constructive and productive discussions, in my view, with representatives of the White House and representatives from both parties. As we all know, on the clean air legislation, it is not the party label; it is where do you live and what the economies in your State may be like, and how it may be impacted by clean air legislation. So, in my view, we have a good group working. They have been working all afternoon.

We have another meeting that is about to start this evening. The majority leader will have meetings on tomorrow and I assume through the weekend, if the principals are available.

It is a very difficult issue. In my view, we make better use of our time, as long as we are making progress, doing what we are doing in the negotiations and discussions. I commend the majority leader, and I certainly want to cooperate. This is important legislation. Certainly, it is important to the majority leader and to the President of the United States and everyone in this Chamber.

We will do the best we can to make certain our Members are available. I think it is appropriate to indicate now that Tuesday night, Wednesday night, Thursday night may be late nights, and there may be a number of votes, and I think that is adequate notice. Everybody should be able to make any necessary plans to be here.

Mr. MITCHELL. Mr. President, I want to make clear, in the event there was any ambiguity in the wording of my request or agreement on S. 1310, that the possible 2d degree amendments by Senator SIMON will be on the same subject matter as the 1st degree amendments.

ORDERS FOR MONDAY, FEBRUARY 5, 1990

MORNING BUSINESS

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:45 a.m. on Monday, February 5, and that the time for the leaders be reduced to 5 minutes each, that following the leader time, there be a period for morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL MONDAY, FEBRUARY 5, 1990, AT 9:45 A.M.

Mr. MITCHELL. Mr. President, if the distinguished Republican leader has no further business, and there is no other Senator seeking recognition, I ask unanimous consent that the Senate stand in recess under the previous order until 9:45 a.m., Monday, February 5.

There being no objection, the Senate, at 6:47 p.m., recessed until Monday, February 5, 1990, at 9:45 a.m.

CONFIRMATION

Executive nomination confirmed by the Senate February 1, 1990:

DEPARTMENT OF HEALTH AND HUMAN SERVICES

GAIL ROGGIN WILENSKY, OF THE DISTRICT OF COLUMBIA, TO BE ADMINISTRATOR OF THE HEALTH CARE FINANCING ADMINISTRATION.

THE ABOVE NOMINATION WAS APPROVED SUBJECT TO THE NOMINEE'S COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

EXTENSIONS OF REMARKS

MEDICAID INITIATIVES FOR 1990

HON. HENRY A. WAXMAN
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. WAXMAN. Mr. Speaker, last Thursday I joined with a number of my colleagues in introducing five initiatives designed to improve the ability of the Medicaid Program to meet the needs of the three primary groups of low-income beneficiaries that the program serves: Pregnant women, children, frail elderly, and individuals with mental retardation or a related condition.

Last year, the budget resolution set aside $200 million in new entitlement authority for fiscal year 1990 "to begin Medicaid initiatives to combat infant mortality, improve child health, make community-based services available to the frail elderly and individuals with mental retardation, and require coverage of hospice services." These initiatives were reported by the Committee on Energy and Commerce last July, and were included in the House-passed budget reconciliation bill, H.R. 3299. The final conference agreement on the Omnibus Budget Reconciliation Act of 1989, Public Law 101-239, contained a few important expansions targeted at pregnant women and young children.

Unfortunately, many of the initiatives assumed by the fiscal year 1990 budget resolution, reported by the Energy and Commerce Committee, and passed by the House, were not enacted. The initiatives being introduced today are essentially the same provisions that were not enacted in OBRA 1989, except that the effective dates are moved from 1990 to 1991.

I am pleased to join with Mrs. COLLINS, Mr. HYDE, and 27 other Members in sponsoring the Medicaid Infant Mortality Amendments of 1990, H.R. 3931, which would implement President Bush's campaign promise to phase in Medicaid coverage for pregnant women and infants with incomes below 185 percent of the Federal poverty level.

I am pleased to join with Mr. SLATTERY and 28 other Members in sponsoring the Medicaid Child Health Amendments of 1990, H.R. 3932, which would implement President Bush's campaign promise to phase in Medicaid coverage for all children in families living below the Federal poverty level.

I am pleased to join with Mr. WYDEN and 64 other Members in sponsoring the Medicaid Frail Elderly Community Care Amendments of 1990, H.R. 3933, which would reduce the institutional bias in the Medicaid Program by giving States the option of offering home and community-based care to frail elderly at risk of nursing home care.

I am pleased to join with Mr. TAUKE, Mr. DINGELL, and 28 other Members in sponsoring the Medicaid Community and Facility Habilitation Services Amendments of 1990, H.R. 3934, which would reduce the institutional bias in the Medicaid Program by giving the States the option of offering community-based services to individuals with mental retardation or a related condition such as epilepsy or cerebral palsy.

Finally, I am pleased to join with Mr. PANETTA and 35 other Members in sponsoring the Medicaid Hospice Amendments of 1990, H.R. 3935, which would require the States that do not already do so to offer hospice benefits under their Medicaid programs to low-income terminally ill patients.

Later this week, I plan to introduce an additional Medicaid initiative to address the AIDS epidemic which is threatening to overwhelm the health care delivery systems in some of our communities.

These initiatives will require new entitlement authority, and I intend to request that the Budget Committee again make allowance for them in this year's budget resolution. I have not been able to obtain from the Congressional Budget Office even preliminary estimates of the additional Federal costs that these initiatives will entail. I am confident, though, that the costs of these improvements will not be large, and that the return on these investments—particularly coverage of prenatal and preventive services for low-income pregnant women and children—will be great.

Some of these bills contain provisions that would impose new mandates on the States, which finance on average about 45 percent of the cost of the Medicaid Program. I propose these initiatives with full awareness that the Governors have requested that we withhold for 2 years on enactment of any further mandates. I do so because I continue to believe that there is broad agreement in the Congress that these modest program improvements are reasonable, and that the needs they address are compelling. I recognize that some of these bills will impose additional requirements on many of the States, but I believe that the additional costs will be modest.

A brief summary of each of the bills follow:

MEDICAID INFANT MORTALITY AMENDMENTS OF 1990 (H.R. 3931)

Phased-in Mandatory Coverage of Pregnant Women and Infants Up to 185 Percent of Poverty. Phases-in mandatory coverage of pregnant women and infants from current law minimum of 133 percent of the Federal poverty level up to 150 percent by July 1, 1991, and up to 185 percent by July 1, 1993.

Prohibits application of resource test for pregnant women or infants, effective July 1, 1991.

Presumptive Eligibility. Revises current presumptive eligibility option for pregnant women by (1) extending period of time by which the woman must file application for benefits and (2) extending presumptive eligibility period to the date State makes a final eligibility determination.

Optional Coverage of Home Visitation Services. Allows the States, at their option, to offer coverage for prenatal and postpartum home visitation services to high-risk pregnant women or infants, as prescribed by a physician. Effective July 1, 1991.

Role in Paternity Determinations. Exempts pregnant women seeking Medicaid coverage for prenatal and delivery services from the requirement that they cooperate with the State in establishing paternity or obtaining child support. Effective on enactment.

MEDICAID CHILD HEALTH AMENDMENTS OF 1990 (H.R. 3932)

Phased-in Coverage of Children Up to 100 Percent of Poverty. Phases in mandatory coverage of all children in families with incomes below 100 percent of the Federal poverty level. Effective July 1, 1991, States would be required to cover all children below poverty born after September 30, 1983. So long as these children remained poor, they would continue to be eligible for Medicaid, up to age 18. Thus, poor children 7 and over would be "aged in," one year at a time, so that by the year 2000 all poor chidlren under 18 would be covered.

Optional Coverage of Children Up to Age 6 With Incomes Below 185 Percent of the Poverty Level. Under current law, effective April 1, 1990, States are required to cover all children born after September 30, 1983, up to age 6, in families with incomes at or below 133 percent of the pvoerty level. This provision allows States the option of extending Medicaid to these children with family incomes at or below 185 percent of the poverty level. Effective January 1, 1991.

Applications Using Outreach Locations. Requires States to process applications for Medicaid benefits for pregnant women and infants and children at locations other than welfare offices, including hospitals and clinics. Effective July 1, 1991.

Optional Extension of Medicaid Transition Coverage. Allows States, at their option, to provide an additional 12 months of Medicaid coverage to families who leave cash welfare due to earnings and who continue to work. (Under current law, effective April 1, 1990, States are required to cover these families for 12 months after leaving cash assistance).

Payment for Medically Necessary Services in Disproportionate Share Hospitals to Children under 18. Under current law, with respect to infants under age 1 receiving medically necessary inpatient hospital services from disproportionate share hospitals, States may not limit the number of medically necessary inpatient hospital days they will cover, and, if they reimburse on a prospective basis, must make outlier adjustments for exceptionally high-cost or long-stay cases. These current law provisions would be extended beyond infants to all children under 18, effective July 1, 1991.

Required Coverage of Disabled Children in "209(b)" States. Requires States that apply more restrictive eligibility standards under their Medicaid programs to low-income individuals who receive cash assist-

ance under the Supplemental Security Income (SSI) program to extend Medicaid coverage to disabled children who qualify for SSI. Effective July 1, 1991.

Mandatory Continuation of Coverage for Children Otherwise Qualified for Benefits Until Redetermination. Prohibits States from terminating Medicaid coverage for a child under 18 who, due to a change in family income or resources, is determined to be ineligible, until the State has determined that the child is not eligible for Medicaid on some other basis. Effective July 1, 1991.

Optional Medicaid Coverage for Foster Children. Allows States, at their option, to offer Medicaid coverage to foster children whose incomes are above State cash assistance levels but below the Federal poverty level. Effective July 1, 1991.

FRAIL ELDERLY COMMUNITY CARE AMENDMENTS (H.R. 3933)

Optional Statewide Service (Sec. 4151). Allows States, at their option, to offer community care services to Medicaid-eligible elderly individuals who are found, based on a comprehensive functional assessment, to be functionally disabled. These are individuals 65 or over who (1) are unable to perform without substantial assistance 2 of the following activities of daily living (toileting, transferring, and eating), or (2) have a primary or secondary diagnosis of Alzheimer's disease and is either (1) unable to perform without substantial assistance 2 of the following activities of daily living (bathing, dressing, toileting, transferring, and eating), or (ii) cognitively impaired so as to require substantial supervision because of behaviors that pose serious health or safety hazards.

Community care services include, at State option, one or more of the following: homemaker/home health aide services, chore services, personal care services, nursing care services, respite care, adult day health, and, in the case of individuals with chronic mental illness, day treatment or other partial hospitalization services. Community care services must be provided in accordance with an individual care plan established and coordinated by a qualified case manager. Payments for room and board, or payments made to family members, would not be covered.

States would be subject to a maintenance of effort requirement under which they could receive Federal matching payments only for State spending that exceeds current State or local spending for community care for the frail elderly. In addition, aggregate Federal matching payments for Medicaid community care services in any State would be limited to 30 percent of the aggregate average Medicare per diem payment for SNF care in the State.

The Secretary is directed to develop minimum requirements with respect to community care services and the residential settings in which such services are provided in order to assure that beneficiaries are protected from neglect, abuse, and financial exploitation, and to assure that the quality of such services is adequate. States would be required (1) to conduct annual, unannounced surveys of residential settings to assure compliance with the minimum requirements, and (2) to establish remedies for use in curing noncompliance. The Secretary would be authorized to impose intermediate sanctions, including civil money penalties, in the event of noncompliance.

Effective the later of July 1, 1991, or the date on which the Secretary promulgates interim minimum requirements.

MEDICAID COMMUNITY AND FACILITY HABILITATION SERVICES AMENDMENTS (H.R. 3934)

PART A. COMMUNITY HABILITATION AND SUPPORTIVE SERVICES

Optional Statewide Service. Allows States, at their option, to offer community habilitation and supportive services to Medicaid-eligible individuals with mental retardation or a related condition. States would be subject to a maintenance of effort requirement under which they could receive Federal matching payments only for State spending that exceeds current State or local spending with respect to community-based services for individuals with mental retardation or related conditions.

If offered, these services would, at a minimum, have to include case management, respite care, and personal attendant care, but could also include prevocational, education, supported employment, and other supportive services. Payments for room and board, or payments made to family members, would not be covered. Effective the later of July 1, 1991, or the date on which the Secretary promulgates interim requirements to assure the health, safety, and welfare of clients.

Quality Assurance. Requires that community habilitation and supportive services be provided consistent with the objectives of independence, productivity, and integration, in accordance with an individual habilitation plan that is based upon a comprehensive functional assessment. The Secretary is directed to develop minimum requirements with respect to providers of community services, and residential settings in which such services are provided, in order to protect the health, welfare, and safety of clients. Procedures for monitoring and remedies for enforcing compliance with these minimum requirements are established. In addition, States would be required to develop their own programs and standards for assuring the quality of these community services.

Eliminating Prior Institutionalization Requirement. Deletes the requirement in the current "2176" home and community-based services waiver authority that individuals receiving habilitation services under the waiver be discharged from an institution.

Annual Report and Evaluation. Directs the Secretary to (1) report to Congress annually on the extent of compliance with the minimum requirements for community habilitation and supportive services and for residential settings in which such services are provided, and (2) report to the Congress, by January 1, 1993, on the effectiveness of existing outcome-oriented instruments and methods in evaluating and assuring the quality of such services.

PART B. QUALITY ASSURANCE FOR HABILITATION FACILITY SERVICES

Requirements for Habilitation Services. Sets forth requirements that habilitation facilities (now known as intermediate care facilities for the mentally retarded, or ICFs/MR) must meet in order to participate in the Medicaid program, including those relating to provision of services, clients' rights, and administration. As under current law, these facilities would be required to provide "active treatment" to individuals with mental retardation or related conditions. Effective January 1, 1992.

Survey and Certification Process. Requires States to conduct annual, unannounced surveys of all habilitation facilities other than those operated by the State to assure compliance with the requirements of participation. Requires the Secretary to conduct "look behind" surveys, on a sample basis, to assure the adequacy of State survey efforts, and to conduct annual, unannounced surveys of all facilities operated by the State. Effective January 1, 1992.

Enforcement Process. Requires States to establish intermediate sanctions, including civil money penalties, to remedy noncompliance with the requirements of participation. Provides intermediate sanction authority for the Secretary. Revises the current correction and reduction plan authority. Effective on enactment.

Annual Report. Directs the Secretary to report annually to Congress on the extent to which habilitation facilities are complying with the requirements of paricipation.

PART C. APPROPRIATE PLACEMENT FOR INDIVIDUALS WITH MENTAL RETARDATION OR A RELATED CONDITION

State Preadmission Screening and Annual Review Requirements. Requires States, effective January 1, 1992, to have in place a program for (1) determining, prior to admission, whether individuals with mental retardation or related condition require the level of service provided by a habilitation facility and (2) reviewing, at least annually, whether clients residing in habilitation facilities continue to require the level of services provided by the facility. Payment would not be made under Medicaid for facility services in cases where the preadmission screen or annual review found that an individual did not require such services.

Revision of Utilization Review Provisions. Repeals, effective with the implementation of the preadmission screening and annual review requirements, the current law provisions relating to physician certification and inspection of care as they apply to habilitation facilities.

PART D. PAYMENT FOR SERVICES

Payment for Community Habilitation and Supportive Services and Habilitation Facility Services. Requires that States which elect to cover either community habilitation and supportive services, or habilitation services, or both, pay rates that are reasonable and adequate to meet the costs of providing services efficiently and economically in conformity with applicable laws and regulations. Prohibits States from using methodologies which distinguish between State-operated and other providers. Effective July 1, 1991, with respect to community habilitation and supportive services, and January 1, 1992, with respect to habilitation services.

PART E. EMPLOYEE PROTECTION AND MISCELLANEOUS

Employee Protections for Closures and Reductions in Capacity. Requires States to establish "fair and equitable" arrangements to protect the interests of employees of habilitation facilities that are subject to a closure or reduction in capacity, including the establishment of paid retraining programs and the preservation of rights under applicable collective bargaining agreements. Requires States to offer to employees displaced from State facilities undergoing closure or reduction, employment (at the same compensation and with comparable job responsibilities) in providers of community services or in residential settings. Effective on enactment.

Use of State Developmental Disabilities Agencies. Clarifies that States may assign specific Medicaid management functions to the State agency responsible for develop-

mentally disabled individuals. Effective on enactment.

MEDICAID HOSPICE AMENDMENTS (H.R. 3935)

Mandating Hospice Coverage. Requires States, effective July 1, 1991, to offer hospice coverage to terminally ill Medicaid beneficiaries. Clarifies that, in electing hospice coverage, a beneficiary does not waive the right to personal attendant care.

UKRAINIAN INDEPENDENCE DAY

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. MICHEL. Mr. Speaker, January 22, 1990, marked the 72d anniversary of Ukraine's declaration of independence. I want to join all of our colleagues in commemorating this anniversary. I recently came across an article in the Wall Street Journal concerning the religious persecution Soviet communism has inflicted on Ukrainians. I believe we can all benefit from reading this article since it reminds us what a precious gift freedom is, and how we too often take it for granted.

At this point, I wish to insert in the RECORD "In Ukraine, Faith in God—Not in Gorbachev", by Edward McFadden, in the Wall Street Journal, Thursday, February 1, 1990:

(From the Wall Street Journal, Feb. 1, 1990)

IN UKRAINE, FAITH IN GOD—NOT IN GORBACHEV

(By Edward McFadden)

When the Soviet Council for Religious Affairs announced on Dec. 1 that Ukrainian Catholics would be allowed to register and "enjoy all the rights established by law for religious communities in the Ukrainian SSR," members of the long-banned church were justifiably unenthusiastic. Last week leaders of the Ukrainian Catholic Church gathered in the Church of the Transfiguration in Lvov, declared the church's dissolution in 1946 null and void, and announced that the church would from that moment on function as a fully legal entity within the Soviet Union.

The Ukrainian Catholics' faith in God and lack of same in the Soviet system has led to a quiet revolution.

The Ukrainian Catholic Church's history began in 1596 through an agreement between the Ukrainian Church of the Byzantine Rite and the Church of Rome in which the Ukrainian Catholics, also known as Uniates, pledged allegiance to the papacy but kept their Byzantine liturgy, language and church hierarchy. Josef Stalin banned the church in 1946 through the so-called Synod of Lvov, which forcibly "self-dissolved" the church and merged it with the Communist-backed Russian Orthodox Church. Uniate clergy who refused to surrender their allegiance to Rome and become Russian Orthodox priests were sent to Siberia. All Uniate property was confiscated, most of it going to the Orthodox Church.

Since then, many Ukrainian Catholics have practiced their faith in fields, forests or late in the evening in private homes. Today there are an estimated 3.5 million practicing Ukrainian Catholics in the Soviet Union, the majority of whom reside in Western Ukraine and are counted in official Soviet documents as Russian Orthodox. The Ukrainian Church is overseen by Cardinal Myroslav Lubachivsky from Rome along with 10 bishops in Ukraine, seven of whom only recently came out of hiding (where the other three remain).

Because the Uniates make up the largest Catholic group in the Soviet Union. Pope John Paul II has long placed the relegalization of the Ukrainian Church high on his list of concerns in his limited dealings with the Soviet Union. During the historic two-day meeting between Mikhail Gorbachev and the pontiff in Rome in late November, the Ukrainian Church was discussed often.

Vatican officials, whose policy it is to comment only under the condition of anonymity, say that the pope was willing to make a major concession, promising that should Mr. Gorbachev allow the full legalization of the Uniate Church the pontiff would not press for the return of all church property, the major stumbling block to the Russian Orthodox Church supporting legalization of the Ukrainian Catholic Church.

Despite the talks, however, the Ukrainian Church gained little from the Soviets that it already didn't have. Ivan Hel, head of the Lvov-based Committee for the Defense of the Ukrainian Catholic Church, told reporters that the new policy giving Ukrainian Catholics the right to register as Uniates "does not provide a real legal basis for the church. It does not recognize the 1946 [self-dissolution of the Church] as illegal and does not guarantee the return of property." In fact, there is no guarantee that congregations that apply for registration will even be accepted by the government.

According to officials of the Ukrainian Church in Rome, more than 700 congregations have applied for registration with Soviet officials but only 20 have been approved. More important, the church still does not have legal standing.

Over the past two years, Mr. Gorbachev has used his still-unenacted "Freedom of Conscience" bill, which purportedly would give all religions the same legal standing and property privileges as the official Russian Orthodox Church, to placate religious groups and their leaders—first with Lithuanian Catholics in mid-1988, and then in early 1989 when unrest among Moslems began to grow. When the pope pressed for Ukrainian Church legalization, Mr. Gorbachev once again promised a law early in 1990.

Vatican officials say they have not been consulted by Soviet officials about the law, and Ukrainian Church officials have not seen any of the three draft versions that are said to exist. The issue of church ownership of property might not even be considered in the law, since a Vatican source familiar with the continuing negotiations between Rome and Moscow says that Mr. Gorbachev feels that return of Ukrainian Church property is an issue to be resolved between the Russian Orthodox Church and Ukrainian Catholics.

Such inter-church negotiations began two weeks ago in Moscow, but the Russian Orthodox Church is hesitant to surrender any of the property it holds in Ukraine and the numbers bear out why: The Orthodox Church claims to have more than 10,000 parishes in the Soviet Union. More than 5,700 of the total are in Ukraine—3,000 of these in Western Ukraine. All told, about 60% of the Orthodox Church's holdings are in the republic. A mass re-conversion of members and property to the Ukrainian Catholic Church could be crippling to the Russian Orthodox Church.

In October, before the registration rule was enacted, Ukrainian Catholics were already growing weary of the lip service from Mr. Gorbachev and the Russian Orthodox hierarchy. Beginning with the annexation of Lvov's Church of the Transfiguration, believers have peaceably seized more than 600 churches formerly held by the Russian Orthodox Church. More than 350 Russian Orthodox priests have asked to be accepted as priests for the Ukrainian Church—all have been accepted. While the buildings technically belong to the Russian Orthodox Church, there is little the Orthodox Church can do when an entire parish—led by the parish clergy—returns to the fold of the Ukrainian Church.

In some areas of Western Ukraine, such as the town of Ivano-Frankivsk, where 100,000 of the 250,000 residents have been known to hold Sunday prayer services in the town square, there are no longer any functioning Russian Orthodox Churches. Reports from Ukraine confirm that the taking of these churches has been peaceful, yet the Russian Orthodox Church has attempted to distort the story.

In a confidential cable sent Dec. 23 to Russian Orthodox Church leaders outside the Soviet Union, Archbishop Kirill, chairman of external chruch relations of the Moscow Patriarchate, reported that the Resurrection Cathedral in Ivano-Frankivsk had been taken "by force. . . . [And] many Orthodox churches in Lvov, Ternopol and other cities and villages have been seized. . . . I ask you to exert influence on the Christian and social circles of the country in which you are residing in favor of a most swift and peaceful resolution of the problem." This is the same man who has called publicly for brotherly negotiations between the two churches.

The Russian Orthodox Church, in the hope of coming away with something for its 44-year domination of the region's religious life, is requesting inter-church dialogue based on Christian love and understanding to resolve the current impasse without the aid of the Soviet government. But the Uniates note that only the state can give back what the state has taken away: the rights of religious freedom and the ownership of property.

A VIEW FROM ACROSS THE BIG LAKE

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. LAGOMARSINO. Mr. Speaker, during my recent visit to Great Britain, the following commentary from the London Sunday Telegraph was brought to my attention. I found it most enlightening, especially since my next stop was Czechoslovakia to meet with President Havel.

I agree with the author's assessment that the policies and values long heralded by the conservatives in the West like Konrad Adenauer in Germany, Margaret Thatcher in Great Britain, and Ronald Reagan here in the United States, inspired the popular uprisings on Eastern Europe. As many of the liberal-left policies have failed in the West, their more concentrated Communist-Socialist versions have totally bombed in the East. The East Germans, Poles, Czechoslovakians, Hungarians, Roma-

nians, and others have not cast off communism for the West's so-called enlighted Socialism. Having long been the victims of such policies, they know the dangers of them. Instead, they yearn for free enterprise and less government. In fact, today's Eastern European Socialists sound more like conservative Republicans.

As we begin this new decade, I strongly suggest my colleagues keep these observations in mind when focusing on both Eastern European and domestic policy.

[From the London, England, Sunday Telegraph, Jan. 7, 1990]

THE RIGHT WAY TO FREEDOM

(By Peregrine Worsthorne)

What we are seeing in Eastern Europe and to a large extent in the Soviet Union are conservative counter-revolutions—popular uprisings inspired by sentiments and causes owing much more to the right than to the left. The Christian Churches can take the lion's share of the credit; so can old-fashioned racism and nationalism and, in the case of Romania, even monarchism. Nothing here to rejoice the free-thinking progressive heart. From the new libertarian right, as against the old reactionary right, comes another enormously important contribution: the yearning for private enterprise, private ownership, in a word, capitalism. The desire for freedom is obviously crucial. But to an extent not yet recognized, still less admitted, in the West it is freedom to do things which progressives and socialists deplore.

Yet this is not at all the impression being given in much of the media—particularly television. Anybody watching television over Christmas might have supposed that the conservatives were the baddies being toppled from power, and the goodies doing the toppling were all Eastern European replicas of 1968 student rebels led, in the case of Czechoslovakia, by a radical playwight called Havel, first cousin of our own beloved Harold Pinter. Instead of the evil President Ceausescu being accurately described as a hard-line, far-left communist, he was presented as a right-wing conservative or even, in some quarters, as a Romanian version of our own Iron Lady.

The same ideologically distorting language is also applied to Russian politics. Those communist hard-liners opposing Mr. Gorbachev's stumbling attempts to do to Russia's socialist economy a mini version of what Mrs. Thatcher has done to Britain's socialist economy are described—in exactly the same way as Mrs. Thatcher herself is described—as belonging to the conservative right. Thus everything and everybody in Eastern Europe and Russia on the wrong side is right-wing and everything and everybody on the side of the angels is, by implication, left-wing. In truth, of course, Mr. Gorbachev's opponents are all hard-line, unreconstructed leftists—the very people who have least in common with anything that can be meaningfully described as right-wing.

So have we been witnessing a gigantic media conspiracy to deny right-wing ideas the credit for getting rid of the evil communist tyrannies and to rescue left-wing ideas from the blame for having installed those tyrannies in the first place? Not a conscious conspiracy, in my view. I don't suspect any Orwellian-type BBC newspeak policy. Would that there were such a malign conspiracy. For conspiracies can be exposed and defeated. What cannot be so easily exposed and defeated is a mind-set that is simply unable to comprehend the possibility that freedom and conservatism can be found on the same side of the barricades.

Because the people on the streets in Eastern Europe are obviously all good democrats—and mostly young to boot—it has to follow that they are progressive rather than reactionary, since progress is what democracy is assumed, as an article of faith, to be all about. But in Eastern Europe, it isn't. In Eastern Europe, progressivism, as understood in the West, does not even appeal to the intellectuals, let alone the masses. What have Western progressives or leftists ever done for Eastern Europe—absolutely nothing, except hobnob with the socialist tyrants. It is religion that has fueled the flames of resistance; as have nationalism and racism and also capitalism. The implication of this for Western leftists and progressives is too awful to contemplate: that in the great struggle between good and evil, at least in the last half of the 20th century, their ideals have played a far less honourable part in civilisation's victory than those of the despised right which were assumed to have been relegated to the dust-heap of history.

Sooner, rather than later, however, Western progressives and leftists are going to have to recognise the implications for them of the Eastern European experience. At the moment there is a profound and understandable reluctance to face the truth unblinking. Cardinal Hume, that great liberal Catholic, is as bad in this respect as the media. Addressing an educational conference last week he said the demands for freedom in central and Eastern Europe were "neither a victory for free enterprise capitalism, nor an affirmation of every aspect of Western society". Instead, he went on, they indicated "a longing for a more caring, more human, more equal society"—ie, the kind of society Mr Kinnock is always talking about, and blaming Mrs Thatcher for destroying. The good prelate is talking through his cardinal's hat; grotesquely underestimating the profound suspicion that such language—which has become socialist language—arouses even among intellectuals in Eastern Europe. Here in Britain the socialist decades only vaccinated a minority of intellectuals against the affliction of progressive cant. But in Eastern Europe, where progressive cant was actually put into practice—for the Benns of this world achieved total power—pretty well the entire educated class, as well as most of the manual workers, have passionately turned against it, using language to express the vehemence of their disgust which makes Sun editorials seem positively restrained.

It won't be long before these East European intellectuals are able to join in the Western political debate on a regular basis. When they do, all the apologists for socialism in this country—those appalling South Bank playwrights, for example—will be put to shame. Rather as the full danger of anti-semitism only became clear once the Holocaust victims, liberated from the camps, were free to describe its lethal consequences, so will the full dangers of socialism only become clear once the East European writers are free to describe its consequences in no less lurid and scarifying detail.

Nor is it only socialism that will then become a taboo practice—as unacceptable in civilised society as anti-semitism. Many other bien pensant assumptions will be discreted as well—supra-Nationalism, for one. At the moment the East European states are simply determined to get out of Comecon—the Russian variation of an Economic Community. But having escaped Comecon's clutches it is very doubtful whether they will want to see their economic fate determined by bureaucrats in Brussels. Western European bien pensants may like to peddle the fashionable idea that national sovereignty means nothing nowadays. But the East European nations, who have had 50 years without national sovereignty, know better. Mr. Enoch Powell made a good point last Friday. "The East Europeans," he said, "have not seized self-government and self-determination in order to give those precious gains up just because Americans, Germans and Russians, too, have acquired the habit of prating about 'one Europe'."

Scepticism will be the contribution of the East Europeans. Idiots in London and Paris may suppose that a German-dominated European Community will be the harbinger of milk and honey. But I doubt whether that kind of talk will pass muster in Prague or Bucharest. Bureaucracy, supra-nationalism, social engineering, economic planning—it is impossible to overestimate the loathing for these concepts to be found in Eastern Europe—where they have been tried a l' outrance. In Britain Mrs. Thatcher's hatred for these concepts may seem a bit farfetched or hysterical. But in Eastern Europe it is she, more than any other public figure in the West, who inspires confidence and admiration—and not only from know-nothing reactionaries but from all classes of people who have found out to their terrible cost just how much the road to hell is paved with good intentions.

The sooner she puts this to the test, the better. My guess is that she would be received in Eastern Europe with scenes of enthusiasm not rivalled since Woodrow Wilson visited there just after the First World War. He was an arch-liberal; she, an arch-conservative. What better way of measuring how popular opinion has changed. Now it is in the arch-conservative that the masses with genuine experience of hardship and oppression choose to put their trust.

TRIBUTE TO THE HONORABLE WILLIAM H. NATCHER

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. MAZZOLI. Mr. Speaker, all of us from Kentucky feel just a bit prouder when the dean of our congressional delegation, the Honorable WILLIAM H. NATCHER, is recognized for his outstanding service in the House of Representatives.

A recent New York TImes editorial spoke to the trend toward a higher percentage of participation in rollcall votes by Members of the 101st Congress. In any such review—past, present, or even future—BILL NATCHER has no equal. His record is, as the editorial aptly describes, "perfection."

And, another recent survey conducted among top congressional aides named BILL NATCHER as one of the most respected Members of the House. These distinctions come as no surprise to those of us who have had the privilege to serve with him for some time. He is the personification of honor and integri-

ty, and a model for all who may be privileged to serve in this Chamber.

I salute my friend and colleague from Kentucky's Second Congressional District and am pleased to share with all my colleagues the following New York Times editorial and news article from Roll Call:

[From the New York Times, Jan. 8, 1990]

COUNTING ON CONGRESS

Members of the 101st Congress, on average, showed up for 95 percent of the roll call votes in last year's session. That was the highest rate of participation in the 36 years that Congressional Quarterly magazine has been keeping track. At first glance, it might appear that the 101st is attending more to its legislative obligations. On second glance, there may be less to attend.

Senators and Congressmen are careful to participate in roll call votes whenever possible; too many absences are an easy target for challengers in the next election. While a member's presence for roll calls is hardly a valid measure of his or her effectiveness, it is a much-used yardstick, readily understood by voters.

In 1989, House members averaged 94 percent participation, and Senate members 98 percent. The overall average has been zigzagging upward from 79 percent in 1970. Participation goes up in odd-numbered years and down in even-numbered years, when members are out campaigning.

Despite the long-term upward trend, two developments suggest that last year's record was at least partly illusory. First, there were significantly fewer roll call votes than before. The Senate had 312 in 1989, down from 379 in 1988 and 420 in 1987. The drop-off in House voting was equally sharp, down 25 percent in two years.

Second, in recent years the Senate seems to have grasped a basic Congressional truth the House knew already—namely, that members like long weekends. It thus scheduled more votes for the middle of the week. In 1989, the Senate had only five roll-call votes on a Monday.

Two senators and 34 House members scored less than 90 percent in Congressional Quarterly's 1989 tally, but 20 senators and 13 representatives scored 100 percent. William Natcher, a Kentucky Democrat, is the undisputed champ. A House member since 1954, and next in line to chair the Appropriations Committee, he hasn't missed a vote yet.

For what it's worth, that's perfection.

[From Roll Call, Jan. 29, 1990]

FOLEY MOST RESPECTED, NATCHER IS SECOND, BRADLEY LIKELY NOMINEE IN 1992, POLL FINDS

(By Karen Foerstel)

Speaker Tom Foley (D-Wash) is the most respected Member of the House, Majority Leader George Mitchell (D-Maine) is the most respected in the Senate, and Sen. Bill Bradley (D-NJ) will be the Democratic nominee for president in 1992, according to a new survey of House and Senate staffers.

The annual survey, conducted by the Washington public relations firm Fleishman-Hillard Inc., polled 292 top administrative and legislative aides over a two-week period.

For the third year in a row, Foley was overwhelmingly chosen the most respected House Member, winning 59 percent.

The come-from-behind second with 6 percent of the vote was 19-term Rep. Bill Natcher (D-Ky). Last year, Natcher was voted eighth most respected in the House.

Minority Leader Bob Michel (R-Ill) held on to this third-place finish for the second year in a row with 5 percent of the vote.

Last year, Rep. Claude Pepper (D-Fla) finished second and House Speaker Jim Wright (D-Texas) was fifth. Pepper died last May. Wright resigned from Congress last June.

"This has just made my weekend," Natcher said Friday after being informed of his second-place finish. "I'm delighted. It's a distinct honor, even more so because it comes from the proper sources. [Staffers] are the people who, I think, know more about the Members of Congress than anyone else on Capitol Hill."

Natcher, ironically, has one of the smallest personal staffs on the Hill, with only five aides. He also holds the record for consecutive votes. In his 36 years in Congress, Natcher has never missed a vote, casting his ballot over 12,114 times.

On the Senate side, Mitchell was voted the most respected for the second year in a row with 39 percent, and Minority Leader Bob Dole (R-Kan) held on to his spot as runner-up with 14 percent.

Rep. Alan Simpson (R-Wyo) moved up from fourth to third this year with 8 percent of the vote.

Falling from third to fifth in the Senate was former vice-presidential candidate Sen. Lloyd Bentsen (D-Texas). He received 3 percent of the votes cast.

Bentsen, however, finished second when respondents were asked, "Who will be the Democratic nominee for president in 1992? Bentsen scored 16 percent behind Bradley's 23 percent.

CONGRATULATIONS TO LAWRENCE FRAIBERG

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. TORRICELLI. Mr. Speaker, it is with great respect and admiration that I address my colleagues in the House today, for I rise to extend my heartiest congratulations and warmest best wishes to Mr. Lawrence P. Fraiberg. The National Academy of Television Arts and Sciences will be honoring Mr. Fraiberg with its Trustees Award.

Mr. Fraiberg has been the president of MCA Broadcasting since 1977. His long career in the communication industry began in 1949 when he graduated from the University of California and joined Group W Television station KPIX in San Francisco. He became general sales manager after 10 years and left to join Metromedia in 1959. In 1965 he became vice president and general manager of Metromedia's flagship station, WNEW-TV in New York and, after leaving in 1969 to form his own motion picture and television production company, he returned to manage WNEW-TV again in 1971. In 1977, Mr. Fraiberg was named president of Metromedia Television. He returned to Group W (Westinghouse Broadcasting) in January 1980 where he was appointed president of the Television Station Group.

An active member in community and industry organizations, he is a recipient of an honorary degree (1978) from St. John's University, New York. In May 1986 he was honored with a Peabody Award for Lifetime Achievement in the Broadcasting Industry. He is presently on the board of directors of the Muscular Dystrophy Association of America, Inc. and the National Corporate Fund for Dance, Inc. He is a former member of the board of trustees of Emerson College in Boston, and is currently a member of the executive committee of the National Committee for American Foreign Policy. Mr. Fraiberg is a member of the board of the Theatre Development Fund, the Tony Management Committee, and the Dramatists Guild. He also serves on the board of trustees of Outward Bound, USA.

Mr. Speaker I am proud to join in paying tribute to this exceptional man and extend my appreciation on behalf of his efforts and offer my best wishes for continued success.

HEARINGS ON AIDS FUNDING

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mrs. BOXER. Mr. Speaker, on January 16, 1989, the House Budget Committee Task Force on Human Resources held hearings on one of the most pressing issues of the day: AIDS funding. I am pleased to share with my colleagues the testimony of two of the outstanding witnesses who testified before us on that day.

TESTIMONY BY MAYOR ART AGNOS

Madam Chair, Congressman Buechner, I would like to thank you for bringing your Committee to San Francisco for these hearings.

This past week, my Task Force on the HIV Epidemic released its report on care needs. They stated clearly that the San Francisco model, which has drawn national and world attention for its compassion and its effectiveness, "is near collapse."

Since this epidemic began, there have been more than 5,000 deaths in our city.

That is more than all the San Franciscans who were killed in World War I, World War II, Korea and Vietnam—combined and tripled.

That is a toll from ten years.

In the next three years, we estimate that more than another 5,000 San Franciscans will die in this epidemic. Nearly another 5,000 will be diagnosed and living with AIDS in the next three years.

Those numbers alone would give us reason to conclude that the San Francisco model is near collapse.

But what threatens us most of all, is not a grim inevitability in this epidemic.

It is that now, for the first time, there is reason to hope that we can stave off death with early intervention treatments.

And yet the hope that science and research has bought comes at a price that government won't pay.

Until a year ago, the San Francisco model was primarily AIDS education, out-patient hospital care and hospice.

There wasn't much in-between.

Last June, at the Montreal International AIDS Conference, Dr. James Mason announced that the U.S. Government would shortly approve aerosol pentamidine to prevent pneumonia in people with AIDS.

It was a major breakthrough.

In San Francisco, over half of those who have died have died from pneumonia.

But at that Conference, Dr. Mason also said that it was his duty as a federal health policy leader to see that all those who needed this treatment would get it.

That hasn't happened.

Federal rules will not pay for early treatment *before* pneumonia sets in.

They will pay the estimated $17,000 hospitalization cost after pneumonia has hit.

But even though this would pay for 16 years of early intervention treatments, they will not pay to prevent pneumonia in those who are extremely vulnerable.

San Francisco and California does pay for it.

This state is the only one of the 50 states that will pay for early intervention, and we do it entirely with state and local dollars.

There is something seriously wrong with a federal policy that requires people to go to death's door before they find a welcome mat.

The standard we follow, and the standard I am here to urge be the basis for your budget resolution, provides care for those who would benefit from treatment—not just those who are dying because they didn't get treatment earlier on.

But this city can not do it alone.

Already more than one in every ten city health dollars we spend goes to AIDS.

We have used those city funds to pioneer education programs, outreach programs and care programs.

But too often, we have seen the federal government fund demonstration projects based on our successes and then rule us ineligible because we already have a program.

It's become known as the "San Francisco penalty"—provide care now, lose funding later.

Knowing that city government could not do it alone, last year I named a Mayor's Task Force on the HIV Epidemic. It was the first in our City and perhaps the first in any City to include representatives from every sector of city life.

I gave them a mandate to examine what San Francisco needs for a comprehensive and compassionate program to combat AIDS and stop its spread. And I asked them for a strategy involving both the private and the public sector of all San Francisco, not just the communities hardest hit or the voluntary agencies that have carried the burden thus far.

They have now issued recommendations that are clear and compelling, and they have identified what we need to pay.

We spend $12 million from all sources for prevention programs now—we need $25 million.

We spend $13 million from all sources for prevention among IV drug users now—we need to spend $31 million.

We spend between $10 million and $25 million from all sources on early intervention—we need to spend $103 million.

We spend $123 million on a continuum of care—and we need to spend $151 million.

In all, the gap we face is between $137 million and $152 million—next year.

To close that gap, we are marshaling our resources into a unified strategy.

The Task Force recommended that as Mayor, I designate a Standards of Care Committee that would establish guidelines on early treatment.

If private companies and insurers believe that there is a level playing field, and that each faces the same commitments, then they have indicated a willingness to include early treatment in standard health care programs.

As Mayor, responsible for a city workforce of some 25,000 employees, I will make the City of San Francisco a model employer by working with our insurers to provide this level of care for our employees.

I believe that the private sector will join us, and that what we begin in San Francisco can become a new national model of a public private partnership in care standards.

But that will not be enough.

We have refined our participation in existing federal programs, and our success in documenting actual needs resulted in over $5.6 million in federal funding to reduce waiting lists at substance abuse treatment programs.

We have been creative in using other funds, such as Community Development Block Grants to provide housing for the homeless with AIDS and ARC.

But these steps are not enough.

And while we stretch ourselves as never before—and still fall short—we are deeply disturbed by the indications that Congress may not stretch the budget for AIDS at all.

Last year, for the first time, Congress appropriated less for AIDS than it knew had been proposed by the U.S. Public Health Service. In all, some $1.7 billion was budgeted—not the $2.2 billion sought by Public Health.

This year, given the Congressional climate and the Gramm Rudman restrictions, last year's $1.7 billion may also become this year's ceiling.

That will happen unless the Budget Resolution includes meeting the real costs we are facing.

I began by comparing the number of deaths in our City from AIDS to the deaths of San Franciscans who fought in our nation's wars.

I did that because today, as you deliberate, we are entering a national debate about a "peace dividend" because we are reassessing our national defense requirements.

In my opinion, the battle against AIDS is a matter of our nation's defenses, and so far the record from Washington is to treat this as somebody else's war.

This is not somebody else's war.

If this city, of all cities, falls so far behind that our program collapses, all the world will shudder at what it means for them.

It will mean that each city, each person will have been left to cope—and die—on their own.

It will mean no help is on the way.

In San Francisco, the Mayor's Task Force on the HIV Epidemic marks a firm commitment that we are making to each other to provide help.

We need you to join us.

I have with me today Mr. Lee Smith, President of Levi Strauss International, and a member of the Task Force.

TESTIMONY OF LEE C. SMITH

Good morning. My name is Lee Smith. I am a member of Mayor Agnos's HIV Task Force in San Francisco and President of Levi Strauss International.

As you know, our community is one that has worked hard to garner the resources necessary to meet the needs of those affected by HIV.

Our community-based organizations, our local government, and the local business community were some of the "first responders" in their fields to attempt to meet the grave needs presented by AIDS.

Nevertheless, my year on the Mayor's HIV Task Force has brought me face-to-face with the harsh reality created by a prolonged epidemic. Quite simply, the duration and scope of the HIV crisis have outpaced the currently available resources to fight it.

Today you will hear others outline the discrepancy between the limits of local resources and the exploding needs of HIV disease. The discrepancy is daunting. With your help, it is also surmountable.

Each of us have unique resources we can and must contribute to the fight against AIDS. I believe that is as true for the San Francisco business community as it is for members of your committee.

Let me speak first to the role I believe is appropriately assumed by the business community.

The Mayor's HIV Task Force has identified seven essential ways we can fight HIV. I wholly endorse these recommendations and believe their implementation will go a long way toward easing the horrible toll HIV is exacting in the Bay Area.

First, we must educate employees and continually restate the facts about HIV transmission. For many adults, the work place is the only place where this life-saving information will be available. We cannot miss the opportunity to educate and inform this sector of our society.

Second, the business community must improve health benefits and access to decent, affordable health care for its employees.

AIDS is exacerbating an already over burdened and costly health care system. The business community should lead the way in addressing systemic changes necessary to lower health care costs, provide access to treatment for those in need and prevent or delay disease progression.

The private sector must carry its fair share of the health care burden without instituting or condoning unfair discriminatory practices in private insurance coverage.

This is critical to implementing sane early intervention programs making life extending drugs available, through insurance coverage, to all who require them.

Third, we need to recruit volunteers to provide much needed skills and labor for AID-related services in the Bay Area.

To date, an heroic effort has been made by many. Literally hundreds of thousands of hours have been voluntarily given to support the San Francisco Model of community-based care. But the past and current volunteers cannot keep up with the burgeoning case load. They are shouldering a disproportionate share of the responsibility for handling an epidemic that is a community-wide problem.

We need employers to proactively encourage their people to volunteer.

Fourth, businesses can help by enhancing skills of community-based organizations.

Many of the agencies in the Bay Area are now multi-million dollar operations. Businesses can lend technical assistance in such areas as financial and long range planning and personnel development. We can also provide in-kind services like photocopying, transportation and printing capabilities.

Fifth, private corporation and foundation monies are essential for our agencies. These desperately needed funds often cover vital programs the state and federal governments cannot or will not support.

Please do not misunderstand me. In an epidemic, the federal government has and is expected to take a large share of the funding responsibility. Nevertheless, responsible corporations and business people also have

an obligation to give—and give generously—to community-based agencies which, for too long, have had to bear the brunt of the epidemic.

Sixth, businesses must work to stamp out discrimination. In our community, AIDS-related discrimination often takes on more subtle, though no less insidious, forms. The presence of discrimination is costly to San Francisco businesses and to people with HIV disease.

In a recent San Francisco survey of self identified gay men who chose not to be tested for HIV antibodies, the primary reason was fear of loss of health insurance.

This is a horrifying fact and a justifiable fear on the part of these men. If individuals could possibly benefit from antibody testing, treatment or monitoring, they must be able to come forward for assistance without fear of losing their health benefits altogether.

Discrimination against those with HIV disease or those presumed to be infected with HIV is unwarranted, unacceptable and inhumane. It must be abolished.

Seventh and finally, the business community must actively support reasoned public policies. Businesses must make their concerns known in Washington and we must articulate our beliefs regarding the above recommendations. Rather than divert scarce resources to fight discriminatory propositions, like Prop. 102, we need to support forward looking legislation like The Americans with Disabilities Act.

That's more or less what we in the business community can and will do.

But our effectiveness depends on your effectiveness. Here's what you can do.

You can be willing to take political risks and support impact aid and disaster relief measures so that adequate monies are appropriated to assist cities hardest hit by HIV.

You can respond to this prolonged crisis with the same urgency and intensity with which you responded to the earthquake.

You can provide and encourage a well informed, reasoned and expeditious response from our federal government to assist us in ending this epidemic.

You can provide this community with the financial resources essential to fight this epidemic.

We can work together and succeed or we can fail each other and consequently fail our community, AIDS-related discrimination often takes on more subtle, though no less insidious, forms.

BUT WHY NOT MORE HELP FOR AFRICA?

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. FAUNTROY. Mr. Speaker, I would like to share with you an editorial titled, "But Why Not More Help for Africa?" (Washington Post, February 1, 1990) by Leonard H. Robinson, Jr., the president of the African Development Foundation. The editiorial poignantly describes my angst about the way in which the administration and Congress have been focusing on providing assistance to Eastern Europe. Last year, the United States efforts to galvanize assistance for Poland and Hungary were impressive. Despite our concerns about the budget deficit, we found $900 million of resources to assist the development of Poland and Hungary which are to be distributed over 3 years. This year we are looking into more ways to assist other Eastern European countries that have undergone reform, not to mention the $500 million proposed aid for Panama.

But, Mr. Speaker, what about Africa? There have been democratic reforms in a number of countries in Africa, like Guinea, Ghana, and Madagascar. But those reforms, as real as they are, have been overshadowed by the changes in Eastern Europe. Further, what about the world's and Africa's newest nation, soon-to-be independent Namiba? Why is it that our administration appears to have no commitment for creating an assistance policy that reinforces United States support for democracy in this new nation comparable to our prodemocracy commitment in Eastern Europe and Panama? Is Africa off-limits when it comes to our support for democracy?

I am not saying that Eastern Europe or Panama are undeserving of assistance. But as we in Congress begin considering the budget for fiscal year 1991, I request that my colleagues on both sides of the aisle remember Africa and its urgent needs for our support for democratic political change and economic transformation. Let us seek a balanced approach to assisting our friends and allies around the globe.

I hope you and my colleagues find the editorial informative:

BUT WHY NOT MORE HELP FOR AFRICA?

(By Leonard H. Robinson, Jr.)

It is truly amazing, even breathtaking, to comprehend the speed at which European Communist states, with the Soviet Union as fulcrum, have collapsed wholesale in the past two months. A "cold war" has been nearly dissipated overnight, thanks to the ramifications of perestroika.

The United States has rushed in to capitalize on this extraordinary turn of events. Secretary of State James Baker has visited and touched the now porous Berlin Wall. Poland and Hungary received a nearly unanimous congressional commitment of $900 million in development aid for the next three years. Where did the $900 million come from? Why did it take only days to secure? As an Africanist, I want to know—so do the people of Africa.

Those of us who have toiled for decades in support of Africa's continuing development have been rudely awakened to the harsh realtities of how the world really operates. The fall of Communist regimes in Eastern Europe and the concomitant and obvious reduction in the power of communism as an ideology and way of life has riveted the attention of the West and precipitated a torrent of goodwill, resources and the promise of more to come. Indeed, I fully expect that a second Marshall Plan, aimed at Eastern Europe, is already on the drawing board. But what about Africa?

The East-West struggle has been played out in parts of Africa in cruel, painful and devastating ways, Ethiopia, Somalia, Angola and Mozambique being the most succinct examples of the chess game. The cost in human lives and property has been overwhelming. Add to this Africa's longstanding environmental calamities and chronic economic stagnation, and you have to wonder why Western nations have not rushed to Africa's aid with the same degree of alacrity witnessed in Poland and Hungary. The recent excuse is Africa's limited value from a strategic perspective. If that is so, why then have we been engaged in "containment" there and in other aspects of the East-West stalemate?

Since 1984, African nations have embraced a number of economic and political reforms designed to diversify their economies. They have divested themselves of state-controlled and-owned industries, they have provided incentives to farmers to produce more for human consumption and they have generally moved to privatization. Belt-tightening strategies have been introduced in most countries, often with the encouragement of the IMF and World Bank, but at the very real risk of social and political instability. The striking results in Ghana, Botswana, Nigeria and even Tanzania have been worthy of notice. African leaders and policy makers have publicly acknowledged their past transgressions regarding their policies, and they have courageously accepted their economic responsibility to put Africa back on a solid economic and political footing. So where is the help from the Western nations and their financial institutions, which previously were so avidly courting the continent?

On Jan. 10, the United States pledged to cancel debts of $735 million owed by 12 African sub-Saharan countries. Although the debt of these countries is lower than that of Latin America, unlike the latter, Africa's debt is primarily "official," or owed to governments and multilateral agencies. The issue of Latin America's debt, which totals a staggering $427 billion, is being addressed through relief for the countries of Brazil, Mexico, Argentina and others. The so-called "Brady Plan for Debt Relief was focused almost exclusively on Latin America. No such offical plan has yet been devised for Africa in spite of the fact that Africa's debt of approximately $139 billion pales in comparison to that of Latin America and the Caribbean.

Even though the United States is home to almost 35 million Americians of African descent, its foreign assistance sadly ignores this statistic. Worse still, many African Americans fail to understand or practice the notion of "motherland politics" as their Duro-American counterparts do. Centuries of slavery blotted out almost all vestiges of identification and pride and many Americans continue to view Africa through the eyes of Tarzan and Meryl Streep. But the African continent is one of the planet's richest jewels, and we are throwing it away.

POW INFORMATION—WHAT SHOULD BE CLASSIFIED

HON. ROBERT C. SMITH

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. SMITH of New Hampshire. Mr. Speaker, as many of my House colleagues are undoubtedly aware, I have spent a great deal of time during the last 6 years working to account for our missing U.S. service personnel in Southeast Asia. As a member of the House POW/MIA task force, I have met with officials at the Defense Intelligence Agency on numerous occasions to discuss specific POW cases in detail. I have also taken two separate trips

to Southeast Asia on official congressional fact-finding missions—always going with one agenda—in search of our missing military and civilian personnel. Each time I have been there, I have spent several days of negotiations with top Vietnamese officials on this issue. Additionally, I continue to work with the families of missing servicemen, helping them to get answers from the Government on their missing loved ones.

Mr. Speaker, in view of responsible legislation I have recently co-introduced to declassify information on American prisoners of war from World War II, Korea, and Vietnam, I feel it is important to point out to my House colleagues and to the American public exactly what is and what is not classified on this important matter. Only in this way will we gain a better understanding as to why H.R. 3603 is so urgently needed.

Yes, there is a large quantity of information currently in the public domain regarding POW's and MIA's. Indeed if someone were to ask a Government official for information on the whereabouts of POW's, we could not assume that he or she is requesting access to classified information. On the contrary, many Government officials, including myself, frequently provide to the public upon request declassified information on POW's. In fact, if someone were to write me requesting specific information on POW's, I could literally send them a wheelbarrow of intelligence information, including live-sighting reports, maps, layouts, and so on, and so on. Moreover, my amendment to the House Intelligence Authorization Act in 1988 now requires the Department of Defense to provide to a missing servicemember's family all live-sighting reports received which correlate to their loved one. And yes, family members are perfectly free and legal under our laws to release this information to the general public, as it is already in the public domain when it gets to the family.

Additionally, the Department of Defense also publishes for the general public a POW/MIA Fact Book which provides examples of evidence of the capture of U.S. personnel in Southeast Asia, along with spcecific details on the last known whereabouts of missing servicemen based on hard evidence. This hard evidence is drawn from post-capture photography, United States or indigenous eyewitnesses to capture or detention, and intelligence reports such as live-sightings by refugees in addition to maps and layouts of POW camps.

Finally, the U.S. Government continues to share classified information with Vietnamese and Loatian officials in an effort to gain the fullest possible accounting of our POW's from this war. In the words of General Vessey, the President's Special Emissary to Southeast Asia, this information involves "discrepancy cases in which Americans were known to have survived the incident in which they were involved and we believed they came into Vietnamese hands and probably were prisoners of the Vietnamese."

However, Mr. Speaker, the Defense Intelligence Agency, our chief agency responsible for gathering and analyzing information on missing servicemen, has testified before the Congress that they do not have conclusive evidence that Americans are still being held against their will in Southeast Asia. This is despite the fact that we know many American servicemen were taken prisoners and did not return during Operation Homecoming in 1973.

At the same time, the President of the United States and representatives at the State Department and Defense Department maintain that the abundance of intelligence information received concerning POW's "precludes" ruling out the possibility that American servicemen are still alive in Southeast Asia.

Mr. Speaker, there is plenty of POW intelligence information legally being circulated in the public domain. H.R. 3603 will protect us from jeopardizing the safety of Americans still held against their will. It also will protect us from compromising our national security and is consistent with President Reagan's 1982 Executive order regarding what should and should not be classified by our Government. Indeed, only information that would truly damage our national security and endanger the safety of American POW's should remain classified.

Already, more than 60 of my colleagues have joined Representative DENNY SMITH and myself in supporting the public's inherent right to see all information on POW's from World War II, Korea, and Vietnam. Only with the participation of the American people in this process and only once we have seen all the information on this issue will we ever achieve the fullest possible accounting of our missing men.

MEDICAID CHILD HEALTH AMENDMENTS OF 1990

HON. JIM SLATTERY

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. SLATTERY. Mr. Speaker, Today I am introducing legislation, along with my good friend, Representative HENRY WAXMAN, which would address a very urgent and important need and provide basic health care for our Nation's poor children.

Decent health care is very expensive in this country. Total spending on health care among Americans has skyrocketed, rising from 6 percent of the gross national product [GNP] in 1965 to 11 percent of the much larger 1987 GNP—a greater share of the GNP than many other Western industrial countries spend to obtain comparable or better health care. The United States spent a record $440 billion on health care in 1987.

But despite this massive expenditure, the health of millions of American children is eroding primarily because the uneven distribution of health care and health insurance in our Nation shortchanges low- and moderate-income children and pregnant women.

Millions of American families and children are forced to go without necessary care because they cannot afford it. Many—especially lower income working families and unemployed families—are covered by neither private or public insurance.

Buying medical care has become so expensive that access to health insurance has become a crucial determinant of access to health care: Among low-income children, those who are uninsured receive only about one-half as much medical care as those with health insurance. Yet both our private and public health insurance systems have widening cracks. Between 1982 and 1985, the number of insured Americans grew by 15 percent, from 30.3 to 34.8 million, and the number of uninsured children grew by 16 percent, from 9.6 to 11.1 million.

Our Nation must ensure that all poor children have access to appropriate health care. The Medicaid Child Health Amendments of 1990 will help to achieve this goal. The bill provides for:

SUMMARY PROVISIONS OF THE BILL

Phased-in Coverage of Children Up to 100 Percent of Poverty. Phases in mandatory coverage of all children in families with incomes below 100 percent of the Federal poverty level. Effective July 1, 1991, States would be required to cover all children below poverty born after September 30, 1983. So long as these children remained poor, they would continue to be eligible for Medicaid, up to age 18. Thus, poor children 7 and over would be "aged in," one year at a time, so that by the year 2000 all poor children under 18 would be covered.

Requires States to process applications for Medicaid benefits for pregnant women and infants and children at locations other than welfare offices, including hospitals and clinics. Effective July 1, 1991.

Optional Coverage of Children Up to Age 6 With Incomes Below 185 Percent of the Poverty Level. (Note: This provision is new and was not included in the reconciliation amendments reported by the Committee last year). Under current law, effective April 1, 1990, States are required to cover all children born after September 30, 1983, up to age 6, in families with incomes at or below 133 percent of the poverty level. This provision allows States the option of extending Medicaid to these children with family incomes at or below 185 percent of the poverty level. Effective January 1, 1991.

Optional Extension of Medicaid Transition Coverage. Allows States, at their option, to provide an additional 12 months of Medicaid coverage to families who leave cash welfare due to earnings and who continue to work. (Under current law, effective April 1, 1990, States are required to cover these families for 12 months after leaving cash assistance).

Payment for Medically Necessary Services in Disproportionate Share Hospitals to Children under 18. Under current law, with respect to infants under age 1 receiving medically necessary inpatient hospital services from disproportionate share hospitals, States may not limit the number of medically necessary inpatient hospital days they will cover, and, if they reimburse on a prospective basis, must make outlier adjustments for exceptionally high-cost or long-stay cases. These current law provisions would be extended beyond infants to all children under 18, effective July 1, 1991.

Required Coverage of Disabled Children in "209(b)" States. Requires States that apply more restrictive eligibility standards under their Medicaid programs to low-income individuals who receive cash assistance under the Supplemental Security Income (SSI) program to extend Medicaid coverage to disabled children who qualify for SSI. Effective July 1, 1991.

Mandatory Continuation of Coverage for Children Otherwise Qualfied for Benefits Until Redetermination. Prohibits States from terminating Medicaid coverage for a child under 18 who, due to a change in family income or resources, is determined to be ineligible, until the State has determined that the child is not eligible for Medicaid on some other basis. Effective July 1, 1991.

Optional Medicaid Coverage for Foster Children. Allows States, at their option, to offer Medicaid coverage to foster children whose incomes are above State cash assistance levels but below the Federal poverty level. Effective July 1, 1991.

Health care provided to children, especially preventive health measures taken throughout a child's life, is immensely effective, paying off in improved health as well as in financial savings for government and society. Children who receive comprehensive pediatric care, including preventative services, have been shown to have annual health care costs 10 to 25 percent less than children who do not.

The time is long overdue for the Nation that leads the world in medical technology to ensure the provision of basic health care for poor children and families. I believe this bill will help to deliver this basic care to those children most in need. I encourage my colleagues to support it.

A FEAR OF POGROMS HAUNTS SOVIET JEWS

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. MICHEL. Mr. Speaker, William Korey, director of international policy research for B'nai B'rith, has written an article in the New York Times warning of pogroms against Soviet Jews. I believe our colleagues will find his views both informative and disturbing. At this point, I wish to enter his article into the CONGRESSIONAL RECORD.

A FEAR OF POGROMS HAUNTS SOVIET JEWS

(By William Korey)

At the historic Congress of Jewish Organizations held in Moscow in December, the most talked-about worry was the real possibility of pogroms in the near future. This month's slaughter of Aremenians by Azerbaijanis in Baku, which has repeatedly been described as a pogrom, suggests that during the nationalist unrest across the Soviet Union Jews could again become mob victims. Thus, Jews, recalling the bad old czarist days, are particularly worried by the Kremlin's continued cold silence about their fears.

When delegates from 126 Jewish cultural organizations in 70 cities assembled, the most important speech stressed a "sharp upsurge of public anti-Semitism," which is the flip side of glasnost.

Severe economic dislocations and political instability, the analysis noted, aggravate tensions and permit the Jew to be a scapegoat for the problems of perestroika.

Documentation was not difficult to come by; more than 50 desecrations of Jewish cemeteries, some 1,000 anti-Semitic rallies, and vitriolic hate leaflets in the thousands distributed everywhere. Moreover, some 60 goons from Pamyat, a chauvinist Russian national movement, greeted the delegates with cries of "Yid!" and "Jewish prostitute!"

Beyond these hate-spewing vulgarities, and reinforcing them, is the defense and promotion of Pamyat and anti-Jewish stereotypes by prominent and conservative nationalist publications.

Then, too, there are newly formed patriotic and religious organizations that would ostracize the Jew as "alien" and "cosmopolitan" (a resurrected Stalinist era code word meaning "traitor"), and populist novelists fill their books and essays with flagrant appeals to bigotry.

Only the Young Communist League newspaper has carried as Cassandralike warning. Written by the Lithuanian Jewish writer Grigory Kanovich, a member of the Congress of People's Deputies, the article described "clouds of pogroms . . . gathering over our heads." He expressed dismay that "as this incitement to murder takes place before the eyes of all," the authorities "ignore the thugs and inciters."

From President Mikhail Gorbachev not a single word has come—no repudiation of Pamyat or of omni-present Jew-baiting. Last year, when Mr. Kanovich, joined by two members of the Academy of Sciences, Vitaly Ginzburg and Oleg Gazenko, submitted to the presidium of the Congress of People's Deputies a petition calling for a condemnation of anti-Semitism, and for creating a special committee to follow up on the issue, the petition was buried.

Even though the petition was signed by more than 200 deputies, and Mr. Kanovich is reported to have conferred briefly with Mr. Gorbachev on three occasions, urging him to make the appeal known to the Congress, not only was it not brought before the Congress, it was stricken from the list of petitions submitted to the presidium.

It is not that Soviet prosecutors are unaware of Pamyat's provocations. In one instance, Pamyat's chief was summoned by the K.G.B. and warned against stirring up "national hatred." In another, the Leningrad city public prosecutor said he had brought an end to Pamyat's numerous rallies in one of the public parks because they violated the Soviet Constitution. Yet no arrests have been forthcoming anywhere and Pamyat's provocations remain undiminished.

The absence of any official public denunciation is especially disturbing. When anti-Jewish pogroms seemed to loom on the horizon in 1918, Lenin, the founder of the Soviet state, personally drafted the language in a decree requiring that "pogromists and persons inciting to pogroms be outlawed." Later, in a historic address broadcast to the Russian people, Lenin cried: "Shame on those who foment hatred toward the Jews."

President Gorbachev, glasnost's great advocate, has repeatedly insisted that he draws his inspiration from Lenin. He could take a leaf from his mentor's book by now forcefully expressing humane concern. It could even prove helpful to his program of perestroika. Certainly, he must be aware that his enemies on the right have no hesitancy in exploiting anti-Semitism in their attempts to turn back the clock.

WISE WORDS OF ADVICE ON THE REAL MIKHAIL GORBACHEV

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. LAGOMARSINO. Mr. Speaker, during a recent speech at Time Magazine's "Man of the Year" dinner, former President Richard Nixon analyzed the real Mikhail Gorbachev—his goals, his power, his weaknesses and his challenges. The historic events of the past year are incredible and Mr. Gorbachev has played a major role in their continued unfolding. Unfortunately, some in the West have become carried away with "Gorby-mania" and, to borrow President Nixon's analogy, are thinking too much with their hearts and not their heads. These are time of great hope, but they are also times with difficult challenges demanding strong, level headed leadership and policy.

I strongly suggest that my colleagues carefully study President Nixon's very insightful analysis. After examining his comments, I believe others will agree with me that President Nixon's points are very much on the mark and worth incorporating into our thinking and policy for the new decade.

[From the Washington Times, Jan. 31, 1990]

BY WHAT HONORIFIC IN THE YEAR 2000?

(By Richard Nixon)

Since this is Time's Man of the Year dinner, I would like to share with you my evaluation of Time's Man of the Decade—Mikhail Gorbachev.

Because my views differ in several respects from the conventional wisdom reflected in Time's excellent cover story, I would first like to indicate the areas where we agree.

Gorbachev is the most enlightened Russian leader of this century and possibly in Russian history. He is the best-educated Soviet leader since Lenin. he earned a bachelor's degree in law. He was born with a masters' degree in public relations.

He is by far the most popular leader in Europe, and among America's elite intellectuals, those with postgraduate training, he is even more popular than George Bush—one of America's most popular presidents.

Let me now turn to areas where I do not share the conventional Beltway wisdom. One highly respected major publication tells us that Gorbachev's goal for the Soviet Union is "an economically and politically liberal regime without any expansionism ambitions." You might reach that conclusion from some of the things he has said and done. But we should always bear in mind three hard facts in appraising his actions.

Gorbachev is a true-believing communist. His goal is not to abandon communism, but to save it.

He is a proud Russian nationalist with the same goals for his country that Russian leaders have had for centuries before Lenin.

He is a brilliant, pragmatic political leader who likes power, knows how to use it and will do what is necessary to keep it.

With these facts in mind, let us examine what he has done. His political reforms,

glasnost and democratization, have been an enormous success abroad and have produced a less repressive society for many people in the Soviet Union. While inadequate by Western standards, they are revolutionary when compared with what the Russian people had before.

Where there was no freedom to criticize the government, now there is some.

Where there was no freedom of the press, now there is some.

Where there were no free elections, now there are some. We must keep that in context, however. Two-thirds of the recent elections were rigged. While some communist officials lost their positions, Gorbachev strengthened his. He is now the most powerful Soviet leader since Stalin. He has replaced all of the Polituro members appointed by Brezhnev. He has replaced 80 percent of the members of the Central Committee. He has changed 15 of the 16 heads of the Soviet republics.

In my Kitchen Debate with [Nikita] Khrushchev in 1959, the man standing next to Khrushchev was Leonard Brezhnev. Five years later, Brezhnev led the coup which removed Khrushchev from office. That won't happen to Gorbachev. [British Prime Minister William] Gladstone once said that the first requisite of a prime minister is to be a good butcher. Gorbachev is a good butcher.

While Gorbachev's political reforms would have to be rated as a success, his economic reforms, perestroika, have been an abject failure. The rhetoric has been impressive: support for joint ventures, cooperatives, decentralized controls and even some kind words for a market economy. The results have been dismal. For example, in the 10 years of the economic reforms of Deng Xiaoping, Time's Man of the Year in 1978 and 1985, the per capita income of the Chinese people doubled. In the three years since Gorbachev initiated his perestrioka reforms, the per capita income of the Soviet people has gone down and the prospects for the future are no better.

While his economic reforms have been a failure, Gorbachev's foreign policy has been a brilliant success. He withdrew the Red Army from Afganistan and played a role in getting the Cubans out of Angola and the Vietnamese out of Cambodia. He has announced major cuts in his defense budget and in his Warsaw Pact forces. Most significant, he has renounced the Brezhnev Doctrine and has stood aside while his Soviet clients in Poland, Hungary, Czechoslovakia, East Germany and Bulgaria have been driven from office.

Rather than just applauding what he has done, let us examine why. In 1985 in Beijing, I asked General Secretary Hu Yaobang if he thought Gorbachev would follow Deng's example and reform the Soviet economy. He smiled and said, "I don't think so. But if he doesn't, the Soviet Union will disappear as a great power in the 21st century." He was right, and Gorbachev knows it.

Look at what Gorbachev confronted when he moved into the Kremlin five years ago. Everywhere he looked he saw communism in crisis. He Third World clients were all losers. Cuba, Nicaragua, Angola, Ethiopia and Vietnam cost him billions of dollars in subsidies. Afghanistan was costing lives as well as money.

All over Eastern Europe, sullen, explosive dissent was boiling beneath the surface. Communism had produced stagnation, not progress. And as a result of the communications revolution, the people in Eastern Europe knew how much better life was in Western Europe.

Most ominous, the Soviet economy was a disaster area plagued with corruption, inefficiency, shortage and alcoholism and was falling further behind the West at an alarming rate.

Abroad, Gorbachev found that all of the great industrial powers in Europe and Asia were aligned against him. Most disturbing, he saw that his major potential adversary, the United States, had recoved from the malaise of the late '70s and the recession of the early '80s, had a booming economy, a stronger military, a stronger foreign policy and a new initiative, SDI [the Strategic Defense Initiative], which would cost the Soviet Union billions of dollars it did not have just to keep up. Gorbachev is a true-believing communist, but he is no fool. His pragamatic side took over from his ideological side. He decided that he had no choice but to reform at home and retrench abroad.

We have examined what he has changed. Let us see what he has not changed.

His much-publicized cuts in defense have had a dramatic effect in reducing the Western fear of Soviet aggression. But he is still spending 20 percent of his GNP on defense, compared with 6 percent in the United States. He has modernized all three legs of his nuclear triad with new weapons on land, sea and air. His superiority, after his cuts, in conventional and chemical weapons is still overwhelming. The Soviet military is leaner but stronger today than when Gorbachev come to power five year ago.

In foreign policy, he received great credit for withdrawing the Red Army from Afghanistan. But his puppet communist government in Kabul is still in power and receives $4 billion a year from the Soviet Union to keep it in power. His Soviet clients still rule Angloa, Ethiopia and Cambodia. He provides arms to North Korea and Libya, who threaten their neighbors with aggression and who along with Iran are the major exporters of terrorism in the world.

He provides $6 billion in arms and aid to [Cuba's Fidel] Castro, who ships Soviet arms to Nicaragua who in turn supply arms to the communist rebels fighting against an elected non-communist government in El Salvador. For Gorbachev to claim that he does not know this is happening is ludicrous. The Soviet Union has its weaknesses. But it would be stupid to assume that the KGB is as impotent as our CIA in finding out what is going on in communist countries.

The conventional wisdom is that Gorbachev deserves the primary credit for inspiring and encouraging the revolts against communist regimes in Eastern Europe. The truth is that it was Western values, contrasted with the failure of communist ideas Gorbachev still upholds, which brought millions into the streets of the great cities of Eastern Europe.

Gorbachev had a choice. He could implement the Brezhnev Doctrine and try to keep his clients in power by force, as Khrushchev did in Budapest in 1956 and Brezhnev did in Prague in 1968, or he could take credit for developments he might not have liked but could not contain.

Again, the pragmatic politician took over from the communist Party ideologue. To do what was necessary to keep unpopular puppets in power in Eastern Europe, he would have aborted his brilliant diplomatic blitzkrieg to psychologically disarm his potential adversaries in western Europe. In a nutshell, he had to choose between Eastern Europe and Western Europe, and he chose Western Europe. He decided that developing better relations with Western Europe and the United States, whose assistance and cooperation he needed to rebuild his shattered economy, to hold on to the rebellious populations of Eastern Europe.

What we are seeing under Gorbachev is a profound shift in Soviet priorities. For almost 70 years, Soviet domestic policy served Soviet foreign policy. Now Soviet foreign policy must serve Soviet domestic policy. Whether it is defense, arms control, Eastern Europe or the Third World, Gorbachev's first priority is to do what is necessary to rescue the Soviet economy from terminal illness.

By disarming the West psychologically, he removed the fear—the glue that holds the western alliance together and that provides the justification for adequate defense budgets. This enables him to safely reduce his huge defense budget and to apply the proceeds to desperate domestic needs. By projecting a benign image abroad, he increases his chance to get the credits, aid and technology he needs to revive a sick economy.

This brings us to the crucial question: Should we help him? The answer is yes, but only if it serves our interests as well as his. Gorbachev has changed since the days when he routinely supported Brezhnev's policies. But it is a change of the head, not the heart. At a time he is using his head, we should not lose ours. As long as his ultimate goal is to make life better for the Soviet people, we should help him, provided his reforms go far enough to work. But if ultimately as a result of successful reforms we will face an economically stronger Soviet Union pursuing the same traditionally aggressive Soviet foreign policy, we should not help him. We would, in effect, be subsidizing our own destruction.

Let's look at some specific examples.

Gorbachev's current reforms will not work unless they are radically expanded. Trying to bail out a fatally flawed policy does Gorbachev no favor just as a banker does a borrower no favor by making him a bad loan. If you doubt that, ask Mr. Campeau. As Andrei Sakharov put it, "In the absences of radical reforms, credit and technological aid will only prop up an ailing system and delay the advent of democracy."

Even if the reforms go far enough to work, the success of perestroika is not in our interest unless Soviet foreign policy becomes less aggressive. For example, continued Soviet support for anti-American regimes in Cuba and Nicaragua and for communist rebels in El Salvador is not acceptable. Gorbachev must be made to understand that Central America, for us, is a neuralgic issue. Our policy should be absolutely uncompromising. Any sale of arms to an anti-American regime in the Western Hemisphere will not be tolerated.

Unsubsidized trade in non-military goods serves both our interest. Subsidized trade does not. Providing credits for the purchase of consumer goods would, in effect, help finance perestroika. It is in our interests and in Gorbachev's interest that he have no choice but to finance perestroika by cutting his swollen defense budget and the costs of his foreign adventures.

Arms control that contributes to stability serves both our interests. Our first priority should be the mutual reduction in conventional arms for two reasons. First, the Soviet superiority in conventional arms is the major reason we need nuclear arms. Second, reductions in conventional arms will save far more money than reduction in nuclear arms. Under no circumstances should

we make unilateral cuts in our defense forces. Gorbachev can afford to do so because he still has superiority. We should seek to negotiate mutual agreements which will eliminate that superiority.

Will Gorbachev last? In view of the failure of his economic reforms and his current problems in the Baltics and Azerbaijan, speculation is increasing that he cannot survive in power. I disagree. Gorbachev may not be an ordinary communist or an ordinary Russian nationalist, but he most certainly is an extraordinary politician. I believe that as a pragmatic politician, he will do what is necessary to survive. Ironically, this could mean that he will last not because his reforms succeed but because he will back away from them if carrying them out threatens his power.

Let us put the momentous events of 1989 in historical perspective. We are entering the most exciting decade of the 20th century—more exciting even than the two decades in which the bloodiest wars in history, World War I and World War II, were fought. We can be thankful that we will be waging peace, not war. But we must recognize that the challenge of winning the peace will be even greater than the challenge of winning a war. On all sides, we hear the Cold War is over. It would be more accurate to say that the Soviets have lost the Cold War but the West has not yet won it.

1989 was a heady year of victory without war for the forces of freedom without war. 1990 will be a much tougher year because, as history tells us, waging a successful revolution, while difficult, is not nearly as difficult as governing after winning a revolution. Revolutionary leaders are seldom good nation builders. Revolutionary leaders must destroy. Those who govern must build.

Our historic challenge is to join with our allies in the Free World in doing what is necessary to make sure that the high hopes of the millions in Eastern Europe who cast their lot with freedom in 1989 are not dashed when they encounter the hard realities of building free democratic societies in 1990.

In his book "Great Contemporaries," Winston Churchill observed that Lord Roseberry, a 19th century British prime minister, had the misfortune to live in a time of great men and small events. World leaders today have the good fortune to live in a time of great events. They have a historic opportunity to rise to the level of those events.

This brings us back to Gorbachev. He faces superhuman challenges. But if he has the courage, the wisdom and the will to lead his people away from aggression abroad and enables them to enjoy the blessings of freedom at home, Time's cover story in the year 2000 will hail him not just as the Man of the Year or the Man of the Decade. He could be the Man of the Century.

MODERNIZE TREATIES WITH NATIVE AMERICANS

HON. WAYNE OWENS

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. OWENS of Utah. Mr. Speaker, about a week ago in my home district of Salt Lake County, representatives from county associations from 12 States met to discuss the possibility of lobbying Congress to modernize its treaties with native Americans. While I was offended such an inappropriate event took place in Salt Lake City, I am pleased to report that this fledgling organization did not achieve its announced goals and that it received the disdain it deserved from both the people and Governor of the State of Utah.

I will oppose any efforts to weaken treaties with native Americans, even if they do represent an inconvenience in modern times. Modernizing these treaties is simply another way of abrogating them, once and for all. How do you modernize a promise without breaking it? How could anyone think to even broach this question without the full participation of organizations representing native Americans? Yet that is precisely what this group of county associations attempted.

By establishing Indian lands, we have willingly subjected ourselves to the jurisdictional problems inherent in native American sovereignty. But control of their own lands is the most important part of the contract we made with native Americans in what had to be, in any case, some of the most egregious examples of unfair bargaining in history. To begrudge this arrangement today is fundamentally dishonest and unfair. We can't simply keep changing the rules for our convenience. Modernizing these treaties, without the full consent and participation of the affected tribes, would be tantamount to the last land grab we will ever make from our native American citizens.

WHAT THE PRESIDENT'S FISCAL YEAR 1991 BUDGET MEANS FOR LOUISVILLE AND JEFFERSON COUNTY, KY

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. MAZZOLI. Mr. Speaker, the President made a nice speech. But, his budget and plans are not so nice for Louisville and Jefferson County in two very important respects.

First, he has proposed closing Naval Ordnance Station, Louisville, and with it the much needed 2,400 jobs. I intend to fight this closure.

Second, the President's budget would cut funding for mass transit by $633 million—or 20 percent—including the elimination of funding for transit operating subsidies to cities. Without these subsidies, TARC would not be able to function.

I intend to fight for TARC and for Federal funds for mass transit assistance.

SOCIAL SECURITY PROTECTION ACT OF 1990

HON. HANK BROWN

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. BROWN of Colorado. Mr. Speaker, today I am introducing comprehensive Social Security reform legislation that includes many of the reforms that I have pursued since I came to Congress in 1981 and reforms that many of my colleagues on both sides of the aisle have proposed.

There are two major purposes of this bill, and Congress must consider it seriously and move this year to enact these needed reforms. First the bill assures the sanctity, security, and liquidity of the Social Security System not only for today's retirees and beneficiaries, but also for all future retirees and beneficiaries of the Social Security System. Second, the bill forces Congress to deal with the real deficit this year and separate the Social Security System from the budget deficit calculations for purposes of the Gramm-Rudman-Hollings deficit targets.

In 1989, 39 million Americans received Social Security benefits. The importance of Social Security will continue to grow. By the next decade, the number of Americans 65 and over will almost double.

Today, 132 million Americans make contributions to the Social Security trust funds. We have a sacred contract with American workers to assure that their hard-earned contributions to the Social Security System will be available when they retire.

The current system must be improved so that American workers and their families can be sure that each hard-earned dollar is secure and is working to provide them with the maximum benefits when they are needed.

I have applied a three-part test to every portion of this bill, and I think Congress should apply the same test to every change it makes to the Social Security System.

First, Congress has a sacred contract with today's retirees. We shouldn't make any changes that will cut the benefits of any American that is retired today or who is receiving benefits from the Social Security System because of death or disability. In addition, we must be certain that the trust funds are adequate to cover the future increases in the cost of living.

Second, Congress has a sacred contract with today's working Americans. Congress must ensure the stability of the trust funds so funds will be available to pay benefits to every working American and their families when he or she retires, is disabled, or dies.

Third, Congress must ensure that FICA and SECA contributions are investments, not taxes. We must end the belief of many working Americans that benefits will not be there when they retire. If every American that puts money into Social Security knows that the money contributed today is a down payment for future benefits, the FICA and SECA contributions are not taxes. American workers must be confident that their contribution is a sound investment in their retirement security.

The Social Security trust funds must be taken off budget immediately.

The Federal Insurance Contribution Act [FICA] contributions are deducted from an employee's paycheck, and the employer contributes an equal amount. Self-employed individuals make contributions under the Self-Employment Contributions Act of 1954 [SECA]. These moneys go into the Social Security trust funds. These contributions are premiums paid to provide retirement benefits and the

survivor benefits of deceased workers. In addition, they can also provide disability benefits.

This money is held in trust and is not the Federal Government's money. Because Social Security is counted for Gramm-Rudman purposes, the $56 billion positive cash-flow in the Social Security trust funds last year was included in the budget computations. The funds were used to hide the shortfall in the general revenue fund. In effect, the Federal Government is borrowing from the trust funds to cover the deficit.

By hiding the true deficit, Congress is spending the funds held in the Social Security trust funds. We are misusing the Social Security trust funds. We are betraying the sacred contract with 39 million American retirees and dependents and the 132 million American workers who have paid into the funds.

Stated in simplest terms, we are using an accounting gimmick to mask the size of the budget deficit.

When we take the Social Security trust funds off budget, it is not going to increase the real deficit one dollar. We simply need to end this scam of counting the Social Security surplus as deficit reduction.

How can Congress participate in this fraud on the American taxpayers and ask Americans not to use the same type of accounting gimmicks when they prepare their income tax returns? How can we have any credibility cleaning up the thrift crisis if we don't eliminate accounting gimmicks. How can we require people to comply with the securities laws and not cheat investors. If we continue this fraud on the budget process, we simply have no creditibility with the American people. The Congress should no longer use smoke and mirrors to mask the size of the Nation's deficit.

As part of this legislation, we require the Social Security trustees to give us an accurate picture of whether the trust funds can meet their obligations. We want to know very simply if there will be enough money in the trust funds to pay the benefits.

Until we know the answer to the question, there is no reason to increase FICA and SECA taxes. This bill repeals the increase in FICA and SECA contributions that took effect this year.

In order to meet our goals, the trust funds must be managed to maximize the return on the contributions. The earnings on the trust funds assets can be increased. We have an obligation to investigate this option because maximizing the return on the assets will eliminate future increases in future contributions and maximize benefits available to beneficiaries. There are hundreds of safe investment options available that will provide a sound but better rate of return to the trust funds. I will call on the administration and experts in the investment field over the next year to help us improve the way the funds are managed.

We can have a new system in place in a very short time that will move Social Security from its present form into the 21st century. When we do that, Americans will once again know that the Social Security System will be there in time of need.

SUMMARY OF SOCIAL SECURITY PROTECTION ACT OF 1990

1. Takes Social Security out of Gramm-Rudman deficit calculation: Removes Social Security Trust Funds from the Gramm-Rudman consolidated budget totals immediately upon enactment of the Act.

2. Suspends payroll tax increase: Rescinds the January 1990 increase of 0.14% in the OASDI tax. The tax increase is not justified because we don't know how much is needed to keep the system actuarially sound.

3. Long-range actuarial soundness: Requires the Social Security Trustees to include in their annual report an analysis of the true actuarial soundness of the Social Security Trust Funds.

4. Study on safely increasing economic return on trust fund assets in the interest of Social Security beneficiaries: Mandates a study by the Social Security Trustees of methods of investing Trust Fund surpluses to increase the rate of economic return to the Trust Funds and to ensure their safety in the interest of Social Security beneficiaries.

5. Increases Social Security beneficiaries' outside earnings limit: Increases the amount an individual, age 65-69, can earn annually without having any Social Security benefits withheld to $15,000 in 1991, with future adjustments to be made for inflation. (Limit for 1990 is $9,360.)

6. Makes Social Security Administration an independent agency: The purpose of this provision is to protect the Trust Funds from diversion to other purposes and to insulate them from political interference.

Provision is similar to proposal in House-passed FY 1990 budget reconciliation bill, except that agency would be headed by an Administrator, assisted by a Social Security Advisory Board. (In the House bill, agency was headed by a Social Security Board, there was no Administrator, but rather an Executive Director of the Board.)

THE NATIONAL TRAFFIC FATALITY AND INJURY REDUCTION ACT OF 1990

HON. JIM COOPER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. COOPER. Mr. Speaker, the legislation I am about to introduce should not be controversial, but it probably will be. The legislation will save lives and save money: two goals that are obviously popular with voters. But the legislation asks that automobile passengers buckle up their seatbelts and that motorcycle riders wear safety helmets. Many politicians are afraid that these small precautions are unpopular with voters, even though it's the voter's own life and money we may be saving.

Mr. Speaker, this Congress should be concerned about the leading cause of death among Americans between 1 and 44 years of age. Traffic accidents result in an injury every 8 seconds and claim one life every 10 minutes. They are a major cause of epilepsy and cerebral palsy. Every year, about 45,000 citizens die in vehicular accidents on our roads, an annual casualty rate almost as high as the entire Vietnam war.

The National Highway Traffic Safety Administration [NHTSA] says that seatbelts could cut this fatality rate by a third. State seatbelt laws have already saved more than 10,000 lives over a 5-year period. We must encourage States to pass laws because, before the first State law passed in 1984, nationwide seatbelt use rates were around 13 percent. With laws on the books in the majority of States, rates rose to a national average of 47 percent at the end of 1988. The laws have been effective. After Michigan passed its law, it experienced a 25-percent drop in fatal and severe injuries. Washington State projected that its law saved more than 2,500 injuries over a 2-year period. Passage of a belt law in the remaining States would almost immediately reduce fatalities another 7 percent nationwide—that's more than 3,000 people saved every year. You may be 1 of the 3,000.

Similarly, nationwide adoption of helmet laws could dramatically reduce deaths in motorcycle crashes. In States with such a requirement, over 98 percent of passengers and drivers wear helmets. The very first year after Louisiana adopted its helmet law, wearing rates for riders jumped from less than half to 95 percent, and fatalities fell by almost a third. NHTSA reports that, between 1982 and 1987, helmets saved 4,600 lives, but another 9,000 people died unnecessarily because they didn't wear helmets.

We've had strong Federal requirements before. The safety standards in the 1966 Highway Safety Act led all but three States to pass tough motorcycle helmet laws. However, when Congress prohibited the enforcement of sanctions for the helmet standards in 1976, 28 States weakened or repealed their laws. In these States, just half of drivers and a third of passengers wore helmets. This led to a 61-percent increase in motorcycle fatalities in a 4-year period.

When our constituents are needlessly injured and killed in traffic accidents, uninjured taxpayers are often forced to pay their medical bills. The State of Texas reported paying an extra $32 million for the treatment costs of unhelmeted motorcyclists in just over a year. A startling study of a Seattle trauma center's injured riders found that tax money paid for nearly two-thirds of their medical costs. Insurance companies paid for a fifth. But victims and their families paid less than 1 percent of the medical bills. None of the victims were receiving Government assistance before the accident. Yet, for each of the most severely injured victims, the public paid an average of $113,307 in medical costs. Studies in other parts of the country have had similar findings.

Costs for unbelted automobile riders are also substantially higher. A University of Tennessee study of its trauma center patients reported that hospital charges of unrestrained crash victims were nearly triple that of retrained victims. The study concluded that each 1-percent increase in seatbelt usage would save approximately $5 million in hospital charges in Tennessee alone.

NHTSA says that the total costs of injuries that seatbelts and helmets could have prevented in States without seatbelt and helmet laws totaled $675 million in 1987 alone. Why should we pay these costs when a simple precaution on the part of the injured could have saved us this money?

The legislation I am introducing provides incentives, and, as a last resort, sanctions, to encourage all States to adopt laws mandating motorcycle helmet and seatbelt use. The incentive program provides $95 million out of the Highway Trust Fund for grants to be made available to a State only when it puts in place these laws. The grants are to be spent for safety education, monitoring, and enforcement. States may receive additional grants for up to 2 years if they meet certain standards of helmet and seatbelt use; $5 million is also made available to the National Highway Traffic Safety Administration [NHTSA] to assist States in their safety device programs. Should the incentives prove insufficient to bring every State to adopt the two laws within a period of 4 years, however, a State will lose 5 percent of its highway construction fund for the first year it is not in compliance, and 10 percent thereafter. If a State under sanction passes the laws by fiscal year 1996, the withheld funds will be restored.

Mr. Speaker, many States have done the right thing to protect the lives and health and pocketbooks of their citizens. The rest of the States need strong encouragement to do the same. We should not let the few who complain that seatbelts and helmets are cumbersome force us to bury another generation of our young.

STATES WITH SAFETY BELT OR MOTORCYCLE HELMET USE LAWS

Twenty-two States and D.C. require motorcycle helment use for all riders:

Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Massachusetts, Michigan, Mississippi, Missouri, Nebraska, Nevada, New Jersey, New York, North Carolina, Oregon, Pennsylvania, Tennessee, Texas, Vermont, Virginia, West Virginia, and District of Columbia.

Thirty-three States and D.C. require safety belt use for front seat passengers:

California, Colorado, Connecticut, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Louisiana, Maryland, Michigan, Minnesota, Missouri, Montana, Nevada, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Pennslyvania, South Carolina, Tennessee, Texas, Utah, Virginia, Washington, Wisconsin, Wyoming, and District of Columbia.

H.R. 3935, THE MEDICAID HOSPICE AMENDMENTS OF 1990

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. PANETTA. Mr. Speaker, I rise today to reintroduce legislation to make hospice coverage a mandatory benefit under the Medicaid Program. This compassionate and cost-effective service which serves the terminally ill and their families was made an option under Medicaid in legislation passed and enacted during the 99th Congress. At the same time, the hospice Medicare benefit was made permanent. More recently, as part of the Omnibus Reconciliation Act of 1989, a 20-percent increase for Medicare hospice reimbursements was enacted. I was proud to have been the sponsor of these pieces of legislation and I am pleased to introduce this bill today to extend the Medicaid hospice benefit. This measure, which was first introduced last March, had 39 cosponsors in the last Congress. In reintroducing this measure, I am very pleased to be joined by Mr. WAXMAN, chairman of the Energy and Commerce Committee's Subcommittee on Health and the Environment, as well as my other distinguished colleagues, Mr. GRADISON, Mr. SCHEUER, Mr. WALGREN, Mr. WYDEN, Mr. SIKORSKI, Mr. BATES, Mr. ROWLAND of Georgia, Mr. TOWNS, Mr. MARKEY, Mr. BOUCHER, Mr. GEJDENSON, Mrs. BOXER, Mr. DURBIN, Mr. BERMAN, Mr. MATSUI, Ms. PELOSI, Mr. DE LUGO, Mr. OWENS of New York, Mr. EDWARDS of California, Ms. SCHNEIDER, Mr. PAYNE of New Jersey, Mr. WHEAT, Mr. JOHNSON, Mr. FOGLIETTA, Mr. WILLIAMS, Mr. MCDERMOTT, Mr. CROCKETT, Mr. ACKERMAN, Mr. HAWKINS, and Mr. HYDE.

Hospice is the practice of caring for the terminally ill in their homes and communities, in a familiar setting among family and friends. Over the past decade, there has been enormous growth in the hospice movement, with approximately 150 new agencies created every year for the past 3 years. Today, there are over 1,700 hospice programs in operation throughout the country, of which 1,450 are full-service programs. Half are already certified by Medicare, and 200 more are in the process of becoming certified.

Through this innovative means of care and support a team of health care professionals and other specialists strives to make the remainder of a patient's life as comfortable and meaningful as possible by providing medical and therapeutic attention at home. This is enormously important, not only for the patient, but for their family, as well. In this way, hospice helps people cope with the physical, emotional, and spiritual hardships of terminal illness.

Just as important as the humanitarian contributions of hospice, however, is the fact that hospice programs save money. Hospice allows people to move out of acute care facilities, and into less expensive care arrangements. Now that the need to cut Medicare expenditures is reaching crisis proportions, it is especially important to incorporate hospice into national policies. The Congressional Budget Office has estimated that hospice coverage under Medicare could save more than $100 million over 3 years. Medicaid expenditures could be cut as well; Illinois, for example, would save at least $1 million per year if it had such a benefit. The State of California has estimated that, once fully implemented, a Medicaid hospice benefit would save over $2.1 million per year, including $1 million in Federal savings. Other evidence that hospice is cost-effective includes several studies which have shown that it saves 20 to 40 percent over traditional acute care, and the fact that numerous major health insurers have included a hospice benefit without having to increase premiums. To reduce the deficit, therefore, the development and utilization of community-based forms of care is crucial.

Mr. Speaker, when the legislation making hospice an option under Medicaid was first introduced, it was with the aim of making this form of care for the terminally ill available to those with low incomes and their families. While the Medicare benefit makes hospice available to the elderly and disabled, who represent a large proportion of those who could benefit from hospice, Medicaid beneficiaries, who are indigent, disabled, or both, still do not have need access to the same services.

Unfortunately, the group without hospice coverage includes a large number of AIDS patients, and will include many more as this tragic disease spreads. As you know, AIDS is one of the greatest epidemics to strike this country. The severity of the problem is illustrated by some grim statistics: As of February 6, 1989, there were 85,590 reported AIDS cases and 48,957 deaths as a result of the disease. Projections by the Public Health Service and the Centers for Disease Control predict the death toll will rise to 180,000, with over 50,000 deaths occurring in 1991 alone.

Clearly, there is a pressing need to care for the rapidly growing number of persons who are dying of AIDS, and this must be done in the most cost-effective and compassionate manner possible. Hospice, with its combination of in-patient and out-patient care, provides the most appropriate means of providing for this group. Last year, hospices cared for 25 percent of all those who died of AIDS. Clearly, it is a highly desirable service.

The large and rapidly growing number of intravenous drug abusers among AIDS patients is a further incentive to expand access to hospice. These individuals are often homeless or come from unstable living situations which do not allow for appropriate care at home without outside assistance. Hospice is already providing the best possible care for this group. Expanding the hospice Medicaid benefit through this legislation will enable many more AIDS patients to receive the care they need in hospice programs. Otherwise, they will be forced into expensive acute care settings or, worse, into the streets.

Because of the AIDS epidemic, the cost savings of hospice will be even more significant. Here, we may take a lesson from local efforts to cope with the disease. The average cost of caring for an AIDS patient during the last year of life is about $66,000 in Atlanta, and $120,000 in New York City. Neither of these cities makes extensive use of hospice programs. In San Francisco, however, care for the same patient would cost only $25,000 because of advanced AIDS programs including an extensive network of hospice services. Hospice must be expanded to keep costs down as an increasing number of indigent patients seek treatment for the disease.

So far, 13 States, including New York, Michigan, Florida, Illinois, Texas, and North Carolina, have created a Medicaid hospice benefit since the enactment of the option. Although it is encouraging that several other States are also taking steps to create such a benefit, I believe, along with the other cosponsors of this bill, that the current need is great enough to warrant making the hospice Medicaid benefit mandatory. This makes hospice services available sooner to Medicaid beneficiaries throughout the country. The bill would become effective for calendar quarters beginning on or after July 1, 1991. If necessary, States would be allowed additional time to enact any required legislation. We urge our

colleagues to give their approval to this measure to provide access to hospice coverage for those who need it most while saving taxpayer and Government funds in the process.

For your convenience, the text of the bill follows:

H.R. 3935

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—SHORT TITLE

SECTION 101. SHORT TITLE.

This Act may be cited as the "Medicaid Hospice Amendments of 1990".

TITLE II—HOSPICE COVERAGE

SEC. 201. MANDATING HOSPICE COVERAGE.

(a) IN GENERAL.—Section 1902(a)(10) of the Social Security Act (42 U.S.C. 1396a(a)(10)), as amended by section 6406(b) of the Omnibus Budget Reconciliation Act of 1989, is amended—

(1) in subparagraph (A), by inserting "(18)," after "(17),", and

(2) in subparagraph (C)(iv), in inserting "and (18)" after "(17)".

(b) CLARIFYING EFFECT OF HOSPICE ELECTION.—Section 1905(o)(1)(A) of such Act (42 U.S.C. 1396d(o)(1)(A)) is amended by inserting "and for which payment may otherwise be made under title XVIII" after "described in section 1812(d)(2)(A)".

(c) CONFORMING AMENDMENT.—Section 1905(o)(3) of such Act (42 U.S.C. 1396d(o)(3)) is amended by striking "a State which elects" and all that follows through "with respect to" first place it appears.

(b) EFFECTIVE DATE.—(1) The amendments made by this section apply (except as provided under paragraph (2)) to payments under title XIX of the Social Security Act for calendar quarters beginning on or after July 1, 1991, without regard to whether or not final regulations to carry out such amendments have been promulgated by such date.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation (other than legislation authorizing or appropriating funds) in order for the plan to meet the additional requirements imposed by the amendments made by this section, the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act. For purposes of the previous sentence, in the case of a State that has a 2-year legislative session, each year of such session shall be deemed to be a separate regular session of the State legislature.

DEALING INTO DEBT

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. HERTEL. Mr. Speaker, I would like to call my colleagues' attention to a recent article in the Detroit Free Press which gives an insightful picture of the economic impact of the mergers and acquisitions characteristic of corporate America in the decade of the 1980's.

The article was written by Walter Adams and James Brock. Walter Adams is a former president of Michigan State University, where he is now distinguished professor of economics. He has served on Presidential commissions during the Eisenhower, Kennedy, and Johnson administrations, and has frequently appeared as an expert witness before congressional committees. James Brock is professor of economics at Miami University in Ohio. A popular teacher and a prolific writer, he has contributed articles to diverse professional journals. He has testified before congressional committees on both the State and Federal levels.

[From the Detroit Free Press, Jan. 29, 1990]

DEALING INTO DEBT—TAKEOVER FRENZY POSES LONG-TERM THREATS TO THE ECONOMY

(By Walter Adams and James Brock)

The 1980s will go down in history as the decade of the corporate deal—a trillion-dollar takeover frenzy that produced phenomenal profits for a few but economic stagnation for the nation.

Acquisitions exploded from 1,565 corporate deals in 1980 with a value of $33 billion to 3,487 deals valued at $227 billion in 1988—a spectacular 580-percent jump. In all, some 26,000 corporate deals have been consummated since 1980, totaling more than $1 trillion in value.

But this deal mania isn't creating new jobs or new plants. Rather it amounts to rearranging deck chairs on the Titanic.

This is because for a nation, as for individuals, there is no such thing as a free lunch. A decade of managerial energy devoted to concocting (or fighting off) corporate deals is a decade during which energy has been diverted from the critically important task of investing in new plants, new products, new state-of-the-art manufacturing techniques and new jobs. By the same token, the hundreds of millions of dollars absorbed by legal fees and bankers' commissions have not been plowed directly into the nation's industrial base.

It is especially sobering that in 1986, corporate America spent more on mergers and acquisitions ($204 billion) than it did on research and development ($55 billion) and new plant investment ($81 billion) combined. This hardly bodes well for a nation struggling to reindustrialize in the face of massive foreign trade deficits.

Statistical studies show that the average merger is followed by deteriorating profit performance, as well as losses—not gains—in operating efficiency.

The American steel industry poignantly illustrates the futility of the merger game. The industry giants are the product of some eight decades of mergers and acquisitions, beginning with the formation of U.S. Steel Corp. in 1901 as a consolidation of hundreds of formerly independent plants.

But, alas, America's steel giants are anything but models of economic efficiency. They have lost jobs and market share, not only to foreign producers abroad, but to small, super-efficient and hyper-advanced steel mini-mills at home.

In airlines, successive mega-mergers have resulted in the creation of monopolistic fortress hubs, the escalation of air fares and the deterioration of service. Shackled by their huge, merger-induced debt, the carriers will be hard put to replace their aging fleets. The prospects are hardly a traveler's Shangri-la.

Most generally, the economic infirmities of mergers, takeovers and acquisitions are graphically illustrated by their atrocious failure rate. As summarized by Business Week magazine, one-half to two-thirds of all mergers don't work, with one in three later undone. Management expert Peter Drucker puts the record in even starker terms: On average, he concludes, two mergers out of five are "outright disasters," two "neither live nor die" and one "works"—hardly a stirring testimonial on behalf of claims that merger mania benefits the nation's economy.

Nor is deal mania a boon for investors. A raft of claims shows that the stock values of acquisitive firms typically fall following takeovers—losses that cancel gains in the stock value of target firms at the time of takeover. And bondholders—who also are investors—have been slaughtered by deal mania as higher takeover premiums, high debt-equity and astronomical interest payments erode the value of bonds.

In the final analysis, a nation chooses the kind of economic game it plays A nation chooses, either explicitly or by default, the kinds of skills it will encourage by virtue of the rewards it provides. A nation also chooses the economic consequences it will have to endure, based on the kind of economic game it choose to play.

If the objective is improved productivity, enhanced efficiency, and accelerated technological progress, then corporate deal mania is simply the wrong game to play.

The challenge is to channel business activity away from speculative capitalism and into creative capitalism. This distinction is crucial: Creative capitalism generate productive wealth; speculative capitalism merely trades ownership claims. Creative capitalism gives birth to new goods, services and production techniques; speculative capitalism merely rearranges control over the productive process. Creative capitalism contributes to economic growth; speculative capitalism is a sterile zero-sum game.

Henry Ford personifies creative capitalism at its best. He took the automobile, considered a luxury for the few, and turned in into an affordable commodity for the many. He did it by building, not by buying—by creating, not by trading what already existed.

Fortunately, Ford is not anachronism from a bygone age. America is still blessed with innovative entrepreneurs like Edwin Land, inventor of the instant camera and founder of the Polaroid Corp.; H. Ross Perot, the jug-eared, belt-and-suspenders former naval officer who left IBM in 1962 and founded Electronic Data Service with $1,000 of savings and built it into a multibillion dollar business; and Steven Jobs, the wizard who from his family's backyard garage revolutionized the computer industry wth his Apple personal computer.

As a society, we must decide which game we want the business community to play. We must decide between enterprise and speculation. We must decide between creating wealth and trading it. We must decide between investing in the future and wasting it away in an economically counterproductive game.

Given the right signals, American business can play the right game. It can rise to the challenge of world-class competitiveness.

TRIBUTE TO FATHER ROBERT STEPHANOPOULOS

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. FEIGHAN. Mr. Speaker, on February 10, 1990, Father Robert Stephanopoulos celebrates his feastday, an event that in the Greek Orthodox tradition, is more important than one's birthday. I would like to take this opportunity to pay tribute to Father Stephanopoulos for his 30 years of service to the church and the communities that he has served.

Father Stephanopoulos was ordained on November 8, 1959, after completing his studies at the University of Athens School of Theology in Athens, Greece and the Holy Cross Greek Orthodox School of Theology in Brookline, MA.

Father Stephanopoulos has long been active in interreligious outreach and dialog. In 1970, he was appointed director of interchurch relations for the archdiocese. That same year, he became the first Orthodox and youngest person elected recording secretary of the National Council of Churches. Father Stephanopoulos is author of the Guidelines for Orthodox Christians in Ecumenical Relations and helped initiate the first Greek-Orthodox-Jewish dialog on theological, cultural, and historical matters. His work was recognized by the National Conference of Christians and Jews who awarded him with the National Religious Leaders Award for courageous leadership in intercreedal affairs.

Stephanopoulos came to the Greater Cleveland area in 1974, after serving at the Church of the Saviour in Rye, NY and the St. Demetrios Church in Fall River, MA. From 1974 to 1982, he was dean of the Sts. Constantine and Helen Cathedral of Cleveland. While in Cleveland, Father Stephanopoulos served as diocesan vicar from Ohio, 1978–80, as a member of the Archdiocesan Council, 1980–82 and he was president of the Greater Cleveland Council of Orthodox Clergy, 1978–80. He also served as a member of the advisory commission of the Office of School Monitoring and Community Relations 1978–82.

In September, 1982, His Eminence Archbishop Iakovos asked Father Stephanopoulos to become dean of the Archdiocesan Cathedral of the Holy Trinity in New York City. Under his direction, the cathedral has thrived and Father Stephanopoulos has developed many important outreach programs, one called Cathedral Fellowship, a program that has involved hundreds of young professionals into the church programs. Their activities include holding retreats, sponsoring lectures and participating in the cathedral's ongoing activities for the homeless. The cathedral is part of the Neighborhood Coalition for the Homeless and serves up to 75 dinners for the homeless each week.

Father Robert married the former Nikki Chafos and they recently celebrated 30 years of marriage. They have four children: Anastasia, George, Marguarite, and Andrew. Anastasia, a graduate of the University of Michigan, recently returned from Santiago, Chile, where she worked as a housemother in an orphanage and at a school under the aegis of an Orthodox convent. George Stephanopoulos came to work for me as a legislative assistant, and later became my administrative assistant. He now works for the distinguished majority leader, Mr. GEPHARDT, as his executive floor assistant. Marguarite is administrative assistant to the president of the Monarch Steel Co. in Cleveland. Andrew, a graduate of Ohio University, is a recording manager for Virgin Records in Beverly Hills, CA.

Through this career, Father Stephanopoulos has demonstrated a commitment to interreligious understanding, education and an active community role for the church. I am pleased to have known him and his family and to have worked with him on issues of concern to the Greek-American community. I take this opportunity to extend my best wishes to him on his feastday and belated congratulations on his 30th anniversary in the priesthood.

SISTRUNK HISTORICAL FESTIVAL

HON. E. CLAY SHAW, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. SHAW. Mr. Speaker, I rise today in tribute to the celebration of cultural diversity.

February 1 marks the beginning of the month-long Sistrunk Historical Festival, an annual event in my home district of Fort Lauderdale.

African ancestry is the basis of the festival, but I am convinced that the commonality of the human experience makes this event appealing to all. From lectures and photographic essays to the music and food of a wide variety of African-American cultures, the Sistrunk Historical Festival sets a standard for others to follow.

I had the privilege to participate in the first festival in 1980. The intervening years have seen tremendous growth as the African-American community of south Florida has matured. The 1990 Sistrunk Historical Festival reflects that maturity; the celebration is fast becoming the focus of national attention.

Congratulations to the organizers and participants of the festival. On its 10th anniversary, the Sistrunk Historical Festival celebrates the accomplishments of cultural diversity, which, after all, reflect the very spirit of our Nation.

BLACK HISTORY MONTH

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. BROWN of California. Mr. Speaker, throughout the month of February, our country pauses to celebrate Black History Month. Carter G. Woodson founded this week-long celebration in 1926 to enhance the awareness of the history, accomplishments, and achievements of African-Americans.

The African-American community is diverse, with a heritage fraught with struggle: For freedom, for equal opportunity, for justice, for cohesiveness. The struggle of African-Americans has often overshadowed the many success stories of black Americans who help shape our country's greatness.

The original Black History Week was envisioned as a conduit for opportunities to educate all Americans about the struggle and accomplishments of African-Americans. Unfortunately, our school systems have not yet incorporated black history studies into regular school curriculums yet.

In my congressional district, an exemplary group exists to foster an interest in and a greater understanding of African-American culture. The San Bernardino Black Culture Foundation, Inc. (formally the San Bernardino Black History Committee) is a nonprofit organization founded in 1968 by a small group of concerned citizens. The foundation seeks to heighten community awareness of the accomplishments and achievements, past and present, of black people. Annually, the foundation plans, coordinates, and directs a Black History Month parade and related cultural activities. This year's parade will be held on February 3, and is the 21st annual Black History Parade in our community. The parade is dedicated to the memory of my dear friend, Bob Parker, community leader and founder of the West Side Action Group.

A major objective of the foundation is to bridge the gaps that exist across cultural lines by bringing the local community together to celebrate Black History Month in a spirit of unity and brotherhood. Each year, the planning process begins with the selection of a theme. The theme for 1990 is "Honoring Our Roots." All ethnic cultures in the city of San Bernardino and surrounding communities have been invited to join in celebrating and learning from the African-American ethnic heritage, while expressing the unique characteristics of their own cultures. All ethnic groups will wear their own cultural attire. This visual demonstration of cultures and ethnic diversities will encourage the mutual understanding of ethnic communities. In addition to the annual parade, a Miss Black San Bernardino Pageant, the Black History Ball, and the Black History Gospel Concert will illustrate the richness of the African-American heritage and promote intercultural understanding.

The Black Culture Foundation works diligently every year to organize these events, often with very little funding. In 1990, the foundation received sponsorships from the city of San Bernardino, the California State Lottery, the Southern California Gas Co., American Airlines, the County Sheriffs' Association, Southern California Edison Co., Anheuser Busch, and General Telephone and Electric. In addition, many local organizations and community businesses have provided assistance. These groups and companies have helped to provide a valuable educational opportunity and celebration for our community. I ask my colleagues to join me in saluting the efforts of these groups, with a special expression of appreciation for the Black Culture Foundation.

CLARIFICATION OF COSPONSORSHIP RECORD

HON. TOM CAMPBELL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. CAMPBELL of California. Mr. Speaker, I would like to clarify my record of cosponsorship. Several times last year, it came to my attention that I was listed as a cosponsor on certain commemorative resolutions. Though I support many of the sentiments reflected in these measures, I made a decision early in my congressional career not to cosponsor any commemorative. In my opinion, they are costly to the taxpayer and take up valuable staff and member time. During the 100th Congress, for example, Congress passed 258 commemoratives; merely the printing of these resolutions cost over $50,000. If we add the expense of staff time to the cost, I believe that we probably spent over a million dollars of taxpayer funds. This cannot be justified when we are staring at an already overdrawn budget.

It is my best guess that my name has often been confused with that of my collegue and good friend from Colorado, BEN CAMPBELL. Because there are two Congressman CAMPBELLS in Congress, occasional errors in reporting do occur. Therefore, upon my request, my name has been removed as a cosponsor on five resolutions. These resolutions are: House Joint Resolution 293, House Joint Resolution 379, House Joint Resolution 106, House Concurrent Resolution 57, and House Joint Resolution 373.

In addition to these resolutions, I was also mistakenly added as a cosponsor to House Resolution 189, Take Pride in the Flag Day. This resolution passed the House before I had a chance to remove my name. I certainly agree with the importance of honoring the flag—in fact I support a constitutional amendment to protect it—but I stand by my commitment to remain opposed to all commemoratives.

Once again, let me stress that it is not the good intentions behind these commemoratives which I oppose; rather it is the time and money put into these resolutions that I feel would be better directed elsewhere.

INTRODUCTION OF MEDICAID FRAIL ELDERLY COMMUNITY CARE ACT OF 1990

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. WYDEN. Mr. Speaker, today Chairman WAXMAN and I, along with over 60 of our colleagues, will reintroduce the Medicaid frail elderly community care legislation.

As you know, the frail elderly bill was adopted as part of the House fiscal year 1990 budget reconciliation bill. Unfortunately, however, it was ultimately dropped from the budget bill along with many other extraneous provisions.

Under this legislation, States would be given a new option to offer home and community-based services to low income, functionally disabled seniors. Tragically, the current Medicaid system only allows such services to be reimburseable under limited waiver programs, leaving these frail elderly individuals no other option than to be forced into a nursing home.

The only change in the bill from last year's version will be the adoption of a more flexible definition of eligibility—similar to that contained in Senator ROCKEFELLER's bill—which would allow persons with a combination of mental and physical impairment to qualify for services.

In the aftermath of the catastrophic repeal, passage of the frail elderly bill will take a first step toward giving our elderly constituents access to the kinds of long-term care services they want and need the most: Adult day care, adult foster care, home health aide, homemaker, and chore services.

This legislation is a modest, incremental reform of the Medicaid Program, targeted at removing an unjustifiable institutional bias. It has the strong support of the National Council of Senior Citizens, the National Council on Aging, the Older Women's League, Families USA, the Gray Panthers, and AARP.

I urge my colleagues to join me in an effort to improve the quality of life for many of our frailest elderly citizens by sponsoring this important legislation.

TRIBUTE TO THE LATE HONORABLE HADWEN FULLER

HON. JAMES T. WALSH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. WALSH. Mr. Speaker, I bring sad news today of the passing of one of our former Members, the Honorable Hadwen Fuller of Parish, NY, at the age of 94.

Mr. Fuller served in the New York State Assembly from 1942 to 1943 and was elected to the 78th Congress to fill the vacancy caused by the death of Francis D. Culkin. He was reelected to two terms. As my colleagues who do not know Mr. Fuller hear of this unusual man's extraordinary accomplishments I hope they are as inspired and impressed as I am.

Mr. Fuller was a high school dropout who worked newspaper routes, many newspaper routes, into a part-time business that eventually gave him a virtual monopoly in his hometown. With the rest of his time he did gardening until a newspaper client offered this hard-working teenager a job at his bank.

The Horatio Alger story has nothing on Mr. Fuller. As a young bank employee, Mr. Fuller bought bank stock and was promoted, while still a teen, to assistant cashier, the bank's second most powerful position. When he returned from service in World War II, his bank job was gone, but he borrowed $15,000 and started his own bank, the State Bank of Parish.

He later sold the bank and went into the insurance business and the fuel oil business, remaining president and chairman during 54 years of family ownership.

Mr. Fuller is remembered for his leadership in business and civic affairs. He is a true community patron whose friendship was valued over the years by many people of all walks of life.

I ask my colleagues to join me in sending our respects and condolences to the family of this great American, whose passing leaves us at a loss but with encouragement by his example.

SEVENTY-SECOND ANNIVERSARY OF UKRAINIAN INDEPENDENCE

HON. CONSTANCE A. MORELLA

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mrs. MORELLA. Mr. Speaker, I am pleased to congratulate Ukrainians and Ukrainian Americans on the anniversary of Ukraine's declaration of independence in 1918. Ukraine arose as an independent nation against the historical backdrop of World War I, the Russian revolution, and the dissolution of the Russian and Austro-Hungarian empires.

In the Ukrainian capital of Kiev on January 22, 1918, the Ukrainian Central Rada, or council, issued the Fourth Universal proclaiming the nation free and independent. Mykhailo Hrushevsky, a great Ukrainian historian, became the Republic's first President. The nascent democracy, established on a constitutional basis, guaranteed many of those same basic rights incorporated in our own Bill of Rights, including freedom of speech, religion, assembly, and the press. Capital punishment was abolished and the 8-hour workday implemented. In addition, minority rights, including those of Jews, Poles, and Russians, were protected, and more than 25 percent of the seats in the Rada were minority-held.

But these events, as I noted previously, did not take place in a vacuum. Even as the Ukrainian Republic was consolidating, more than 10,000 Russian troops, under the direction of the new Bolshevik regime in Moscow, invaded in December 1917. By 1922, the sovereign nation of Ukraine had been destroyed by the Soviets and forcibly incorporated into the Soviet Union. Gone were the basic rights and protections for which Ukrainians had struggled, replaced by a systematically repressive Soviet Government which stamped out freedom of speech and religion.

However, remaining unextinguished were the smoldering flames of Ukrainian nationalism, which today are growing stronger as they are fanned by the winds of freedom blowing across Eastern Europe. Soviet President Gorbachev has recently acceded to longstanding Ukrainian and international demands that the Ukrainian Catholic Church be allowed to conduct its affairs in a free and open environment free from Government interference or harassment. Other positive signs include recent meetings in Moscow between a delegation of Ukrainian Catholic bishops with a Vatican delegation and the Moscow Patriarchate of the Russian Orthodox Church.

We must realize, however, that, while important, these are but small steps toward achieving the autonomy and right to self-determination desired by most Ukrainians. The intensity of the desire for freedom was most recently

demonstrated on Independence Day as more than half a million Ukrainians joined hands across the Republic, from Kiev to Lvov, in a poignant and moving statement of solidarity.

While I am pleased by the positive changes taking place in the Ukraine and in the other European republics of the Soviet Union as a result of President Gorbachev's policies of glasnost and perestroika, we must remind him that Ukrainians must be accorded their paramount rights of autonomy and self-determination.

THE TRAGEDY OF KOSOVO

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. BROOMFIELD. Mr. Speaker, the morning newspapers bring us sad news about the horrible violence and the deaths of innocent ethnic Albanians in the autonomous province of Kosovo in Yugoslavia. As the winds of change blow throughout Eastern Europe, it is time for major changes to occur in that country and, in particular, in that province. Now is the time to end martial law in Kosovo and free the many political prisoners who have been punished for speaking the truth about the problems in that region of Yugoslavia.

In recent days, over 14 ethnic Albanians have been killed as they peacefully protested in various towns in the Kosovo region. There are many good reasons why those young ethnic Albanians were letting their voices be heard. They are demanding free elections, the release of all political prisoners, the end of the state of emergency in that province and Kosovo's right to regain its autonomy from the Republic of Serbia. The basic facts about Kosovo and its problems speak for themselves.

Sixty-two percent of all political prisoners in Yugoslavia are ethnic Albanians. A few of those prisoners have been held for over 25 years with some of those years spent in solitary confinement. Many ethnic Albanians have been abused and some tortured. In the past year, over 200 ethnic Albanians have been formally sentenced as political prisoners. Many more are being detained and scheduled to be sentenced soon. The majority of those in prison did nothing more than ask for political freedom and the right of self-determination. The Albanians who are now demonstrating have other legitimate grievances.

In protests held in Kosovo during the past year, scores of ethnic Albanian demonstrators have been killed. The autonomous province of Kosovo has been under martial law for nearly a year. This is the second time that emergency measures have been imposed on that province. Much of Kosovo's autonomy was recently eroded by the efforts of a Serbian nationalist named Slobodan Milosevic who is the President of the Republic of Serbia. Since 1974, Kosovo had been autonomous. His rise to fame is due largely to his promise to fellow Serbs that he would regain control of Kosovo. In response to the demonstrations by ethnic Albanians, Mr. Milosevic reportedly ordered security forces to quell the peaceful protests by using clubs, tear gas, bullets, and water cannons. The use of brute force to quell the peaceful protests resulted in the deaths of many innocent demonstrators. Ethnic Albanians are also incensed by the arrest of one of their senior leaders.

Azelm Vllasi, former Communist Party leader in Kosovo, is now on trial in a district court in that province. He was arrested and tried on charges of "counterrevolutionary" activity. In 1988 and 1989, he was involved in nonviolent political activity for having participated in peaceful demonstrations and strikes with other ethnic Albanians in Kosovo. If convicted, Vllasi could face a minimum sentence of 10 years in prison.

The ethnic Albanians of Kosovo are fed up with being treated as second class citizens in their own region. They want martial law to end and want self-determination. In this age of dramatic change in Eastern Europe, they want freedom and the application of justice in their lives. In a period of history when the Berlin Wall is being auctioned to the highest bidder, and Eastern European despots are being taken to court, ethnic Albanians just want to be treated like human beings.

I call upon my colleagues to work with me in Congress to ensure that justice prevails in Yugoslavia.

BICENTENNIAL ORGANIZERS GAIN RECOGNITION

HON. DOUG BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. BEREUTER. Mr. Speaker, we have just witnessed the closing of a decade in which millions of people who suffered from repressive governments toppled those regimes in their quest for freedom and democracy. We must wish the people of these nations well in the difficult tasks that lie ahead. And, we must do everything we can to insure the success of their endeavors to establish governments based upon the principles of constitutional democracy.

At the same time, we must not neglect to pass on to our own youth the knowledge and understanding of the fundamental principles and values of our own democratic institutions. In this regard, I am most pleased to commend the efforts of several constituents whose dedication to the improvement of the civic education of our students is exemplary. They are Mr. Dennis Lichty, Mr. Ted Larson, Mrs. Lisa Townsley, and Mrs. Carolyn Gigstad of the First Congressional District in Nebraska.

Through their efforts, thousands of upper elementary, middle, and high school students have studied the curriculum of the National Bicentennial Competition; its noncompetitive companion program, Congress and the Constitution; and the National Historical Pictorial Map Contest in Nebraskas's First Congressional District. This curriculum introduces students to the philosophical ideas of our founders, the historical background of the Philadelphia Convention, and the issues and debates that shaped the writing of our Constitution. Students learn how our Government is organized and how it protects the rights and liberties of all citizens. Finally, and most important, students learn the responsibilities which accompany the rights of citizenship in a democracy.

It is ironic that while those who have experienced repressive regimes throughout the world are clamoring for the right to vote in free elections, in the United States, only one out of five eligible voters under the age of 30 takes advantage of that very right. With so few young people understanding the purpose and importance of our Constitution, it is clear that we must do all we can to turn the tide of political apathy into a wave of active and informed participation. Again, I am pleased to recognize and express my admiration and appreciation to Dennis Lichty, Ted Larson, Lisa Townsley, and Carolyn Gigstad for their impressive contributions to the development of competent and responsible citizenship among young Nebraskans.

TRIBUTE TO THE LATE FREDERICK LOUIS McCOY

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. DYSON. Mr. Speaker, on January 22, 1990, Maryland's First District lost a very special man. I rise today to pay tribute to Frederick Louis McCoy, an outstanding American and a prominent resident of the First District.

I wish to honor Fred for a lifetime of service to St. Mary's County and to the Nation. A graduate of Georgetown University, Fred served in the Navy in the South Pacific during World War II. In 1937, he went to work for the Farm Security Administration, a predecessor of the Agriculture Department's Farm Home Administration. He devoted 25 years to Maryland's farmers as the agency's supervisor in St. Mary's County. He also worked in the regional office before moving on to the national office, where he retired in 1972. As the proprietor of St. Gabriel's Manor, his farm at Scotland in St. Mary's County, Fred was himself a farmer.

Fred's interest in history is equally noteworthy. He was chairman of Project Chapel Field, the archeological excavation of an early church site in St. Mary's County. He was also a member of the Vinson Camalier Camp of the Sons of the Confederacy and the Society for the Preservation of St. Ignatius Church in St. Inigoes, MD.

Fred set an example as a familyman. He married Elizabeth Crowley McCoy of Scotland, MD, in 1941. They had nine sons and three daughters: Frederick, Jr., John, Mark, Joseph, Daniel, Thomas, Christopher, Nicholas, Matthew, Mary, Anne, and Margaret. Fred, who died at the age of 74, is also survived by 19 grandchildren.

As an official of the Department of Agriculture, as a three-term president of St. Mary's County Historical Society, and as a devoted husband, father, and grandfather, Frederick McCoy deserves the highest praise. Mr. Speaker, I wish to extend my deepest sympa-

thy to the family of this wonderful American and friend.

IN RECOGNITION OF NATIONAL BLACK NURSES DAY

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. STOKES. Mr. Speaker, it is a pleasure for me to join members of the National Black Nurses Association in celebrating the second anniversary of National Black Nurses Day. The Black Nurses Association represents the collective national voice of nearly 7,000 black nurses in the United States on issues that shape the nursing profession for blacks.

I am pleased to share with my colleagues a brief history of black nurses in our Nation. Organized nursing among blacks dates back to the early 1900's when the National Association of Colored Nursing was formed.

More accurately though, the involvement of blacks in nursing in the United States can be traced back to the 18th and 19th centuries. More often than not, during that time, when illness struck, it was a slave—most likely a house slave—who was called upon to act as nurse. While untrained in the modern sense, it is from this tradition of nursing that the commitment and dedication of service began for black nurses.

At a meeting in December 1971, in Cleveland, OH, a group of black nurses met and formed the National Association of Black Nurses. The organization, now under the leadership and direction of Alicia Georges who serves as president, is committed to meeting the health care needs of the underserved. This is exemplified in their stated goals: to advance and promote the welfare of black nurses; to develop mutual strengths; and to provide leadership for the provision of optimum health care for the black community. Many times, the Black Nurses Association has advocated and supported efforts to address the medically needy and indigent when others failed to see fit to do so.

Mr. Speaker, it is an honor to salute the National Black Nurses Association on the occasion of Black Nurses Day. Their special contributions to our society and their unwavering service to all Americans is to be commended. They are a natural resource which has been a valuable asset to our Nation.

UKRAINIAN INDEPENDENCE DAY

HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. DWYER of New Jersey. Mr. Speaker, 1990 marks the 72d anniversary of the declaration of Ukrainian independence. I am proud to rise today to reassert my support for the cause of freedom and independence in the Ukraine.

This has been an especially historic year for Ukrainians fighting to regain their independence from the Soviet Union. The Catholic Church and the Ukrainian Orthodox Church have been in the forefront of the fight for legalization and the Soviet Ukrainian authorities have stated that they would begin to permit the registration of Ukrainian Catholic churches.

The meeting late last year between President Gorbachev and His Holiness Pope John Paul II was a major step forward toward opening the doors to religious freedom in the Ukraine.

However, the strides made in the past year should not blind us to the human rights abuses which continue in the Ukraine. The struggle is the same one which these brave people have waged since 1921. While democracy has spread across Eastern Europe, it has been slow to come to fruition in the Ukraine.

We must, therefore, take this time to remember those brief years of independence in the Ukraine; to honor those who daily continue the fight for its rebirth; and to recommit ourselves to the goal of achieving that independence once again.

TRIBUTE TO THE VALLEY FORGE ELEMENTARY SCHOOL FOR PROMOTING EXCELLENCE IN SCIENCE EDUCATION

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. SCHULZE. Mr. Speaker, I rise today to congratulate the Valley Forge Elementary School, in Wayne, PA, for promoting excellence in science education through a 6-week program "Science is All Around Us." This program is organized and run by parents of the students in cooperation with the school's faculty. The contribution and participation of these volunteer parents provides the key ingredient for success.

Beginning January 8, students have concentrated on a particular branch of science each week, participating in classroom projects and listening to expert speakers. The six areas studied are aviation/space, meteorology, chemistry, physics, biology, and ecology. On February 21, the program concludes with a school science fair exhibiting projects completed by the students and their families.

Mr. Speaker, I am proud of the task Valley Forge Elementary School has undertaken. The teachers, parents, and children are making use of local community resources to spur interest and curiosity in our young. It is through this type of creative effort—returning attention to the educational basics—that American schoolchildren will fulfill their potential as world leaders in the next century with emerging scientific technology.

To Valley Forge Elementary School Principal Stoughton Watts, the teachers, the volunteers, the parents, the students, and the entire community, I salute your efforts. All of you have set a new standard for other neighborhoods throughout our Nation to judge what is left to be done to promote excellence in education.

JUST SAY YES

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 1, 1990

Mr. LAFALCE. Mr. Speaker, I am pleased to insert in the RECORD the November 27, 1989, inauguration address of Gerald L. Miller, the newly appointed president of Niagara County Community College. At a time when our Nation's youth are being instructed to "just say no," Mr. Miller's speech provides a refreshing and uplifting exhortation—"just say yes," yes to learning, yes to emotional and spiritual growth.

If we are to remain a strong and prosperous nation, American education must provide our young citizens with the tools and ideas to "turn retrenchment to opportunity." While Mr. Miller recognizes the need to elevate the skills of our workers—skills needed to exploit the exciting technological advances of the present and future, his speech goes beyond this. He understands the obligation to address the fundamental needs of our citizens in dealing with the consequences of our technological advancement including the intriguing ethical and moral dilemmas which are raised.

The students at NCCC, and the community which NCCC serves, will certainly benefit from the commitment and optimism of its new president, I commend Mr. Miller's speech to my colleagues so that we to may benefit from a man dedicated to an optimistic investment in our Nation's human resources and to a partnership with the community. We should all just say yes to the opportunities and challenges of the 21st century.

INAUGURATION ADDRESS—GERALD L. MILLER—NOVEMBER 27, 1989

Chancellor Johnstone, Chairman Pawenski, Dr. Notar, honored guests, colleagues, faculty, staff, students, family and friends.

The wonderful song performed by Jennifer Neuland, Simple Gifts, has played a significant metaphorical role for me. This exquisite and meaningful Amish folk song was used in one of my children's theatre productions performed by the now theater called The Present and its very words I believe clearly express the philosophy of our theater company then, our college and community then and now, and my personal life forever.

Tis a gift to be simple
Tis a gift to be free
Tis a gift to come down where we ought to be and when we find a place that we call just right
Twill be in the valley of love and delight

Today I am filled with feelings of love and delight so I must be in the place—this place—that is just right.

I cannot possibly thank all of the individuals who have extended to me special kindnesses, therefore, let me today first simply say thank you to all—family, colleagues, friends, actors, teachers, students past and present, neighbors, dignitaries, those within reach of my voice and those who today must communicate from afar—I love you all.

Having said this, I now feel free to single out the most significant influences on my life past and present—without fear of hurting anyone I leave out.

First I'd like you to meet some wonderful people. The first two represent the first partners I ever knew. I can only present half of the partnership in person—the other half I must present to you only through my heart for she dwells these final days in a nursing home. I am sure she can feel my love and does not need to hear my words of tribute.

This gentle lady along with a giant of a man together spent a life time raising three boys in a quiet, rural western New York village via the philosophy of just say yes. Have you ever though of how many times today parents are confronted by, surrounded by, absolutely forced to utilize the slogan just say no? My parents were always so busy teaching me to just say yes we never had time for the no. Just say yes to God—just say yes to school and learning—just say yes to love—just say yes to the values that really matter—just say yes to family and friends. Just say yes to neighbors—just say yes to freedom—just say yes to your dreams. Just say yes to life and all of its treasury of possibilities.

This gentle, giant of a man never finished high school, but he is very learned. He never was a rich man, but his life has been filled with richness. He has received his share of hard knocks—the drepression—the war years—the stroke that struck his lifetime partner—but he never lost his faith in himself nor his children. It is an honor to present to you my father—Harold Miller.

Next I'd like to present to you a beautiful lady who over 30 years ago agreed to just say yes to being my life long partner—my wife—my best friend—Dorothy.

Our personal partnership produced two sons who already have proven their commitment to life and its fullest possibilities. Two young men who fill Dot's and my life with pride, love, and joy—our sons—William and Mark Miller.

Our family partnership also includes two brothers and a brother-in-law. My brother Bob is in California and unable to be here today. However, my other brother, Don, is here from Binghamton, along with his wife Carol and their daughters Tammy and Christine. Also joining us today from Vermont is my brother-in-law, Richard Noth and his wife Ina.

Thank you for giving me this opportunity to personally present the Miller family partners.

Just as in a family—our community college has been and is today a series of partnerships. A network of pathways, purposes, people, a school for all seasons.

Less than 30 years ago, NCCC was nothing but a perceived opportunity—a gleam in the eyes of those inspired souls who dreamed it up and began to design the future. A partnership which included the likes of Ed Pawenski, Ernie Curto, Gene Swenson, Dr. Notar—visionaries that dared to dream of a future that was more than their past—a future that would be built on just say yes.

Through the years—perceived opportunities have become realities. Programs were developed, services offered, missions defined and redefined. Buildings were borrowed, rented, and built. A campus was born. Expansion and growth have been the reality when the doomsayers prophesized retrenchment. It has taken risk and courage, energy and wisdom, vision and intelligence, imagination and trust, inspiration, and love to get where we are today. A partnership of legislators, trustees, faculty and staff, community organizations, businesses and industry, students and concerned citizenry working together to just say yes.

To our founding president, Dr. Ernest Notar.

To our current chairman of the board, Edward Pawenski, who has been on our board from the very beginning.

To the original faculty and staff who came together with 125 students in 1963 at the shredded wheat building.

To the community of Niagara that has embraced our college whatever its size, wherever its location, and supported its growth from the original 125 students to the over 40,000 unduplicated individuals who are participating in one or more of our educational activities during 1989-90.

To our partners in the Federal, State, county and community government and to our partners in the State University of New York.

To the more than 15,000 who have already graduated from NCCC and are successfully settled in our western New York community.

Let me say thanks for your just saying yes. And let me pledge to you that I will protect the foundation you have created and nourished.

Today, we are a mature institution with an unwavering commitment in our promise to provide access and excellence to all of our students. By design we are located right in the center of our community with arms reaching out to every part of the whole. We are vital partners with businesses and industry and as such are the largest provider of corporate training in the State of New York.

We are partners with BOCES in providing access to vocational programs at the collegiate level; we are seeking out our educational partners in every town, village, and city to establish articulations which will not only guarantee access to our programs but which will assure competency levels that allow successful completion of college degree programs. At the same time we have partnered with all area colleges to guarantee transfer of our graduates with full junior status.

We have joined arms with social services to provide a 21st century solution to the devastating, debilitating 20th century horror story of the enormous human potential and resource which has been subjugated to the welfare system. Our CEOSC program of educational and occupational bridges for single parents on welfare is not only preparing successfully these mothers and fathers to leave the welfare rolls but it is also at the same time putting an end to the perpetuation of the system to their children.

As Thomas Jefferson once said, "I know of no safe depository of the ultimate powers of the society but the people themselves, and if we think them not enlightened enough to exercise their control with a wholesome discretion, the remedy is not to take it from them, but to reform their discretion by education."

Niagara County Community College is not just planning for the 21st century. We have been and continue to be a family of futurist scholars clearly comprising a college already imbedded in the 21st century.

We are in the vanguard of Niagara's march toward resolution of our community's educational challenges. We have already seen an explosion of new classroom and office technology—so much so that we have committed ourselves to being an electronic college—television, interactive video, computers high tech communication, satellite dishes, fax machines. Our title III grant of over $2.5 million will continue to allow us to introduce every teacher, every classroom, every student to incredible automation in our library services and in our teaching delivery systems. Classrooms which once were created to highlight the use of chalk boards, film projectors, and large lectures will be revolutionized by satellite television transmissions, microphone/telephone communication systems that reach out to homes and otherwise inaccessible sites, and self-paced interactive video and computerized instructional tools. What a time to just say yes. However, as high tech is being incorporated into our college life, into our curriculum, into every service, we need to be absolutely certain that we allow, in fact encourage, our students to focus upon values, emotions, their spiritual side.

John Naisbitt in his book Megatrends indicated that with the emphasis on high technology, there is a need to learn to balance the material wonders of technology with the spiritual demands of our human nature. To illustrate his point, Naisbitt reminded us:

1. That the high technology of heart transplants and brain scans led to a new interest in the family doctor and neighborhood clinics.

2. That jet airplanes led to more meetings. Just imagine what teleconferencing will do.

3. That the introduction of tehnology and word processing into our offices brought about the revival of handwritten notes and letters.

4. That the more technology crept into our society the more people congregated to seek out other people. Shopping malls, are now the third most frequently used space in our lives following the home and the workplace.

5. That high technology robots and high touch quality circles have moved into our factories at the same time.

6. That accompanying the introduction of mass computers into schools is the cry for a focus on teaching values and motivation.

Obviously a balance between high technology and our physical and spiritual reality is essential. As Naisbitt called it; the high tech/high touch.

We will need to support educational efforts that encourage risktaking and testing of new behaviors; that help our students better understand themselves, learn more self-confidence—and learn more about the entire world in which they live.

There is no doubt the students with whom we will work during the last decade of the 20th century will be very different: as we attempt to project our present into the future—let me point out some of the things we can predict about our students. First, and most clearly, there are going to be fewer traditional students. The fact that the numbers of college bound, high school students will decline 18 percent over the next 8 years is well documented.

Secondly, the ages of our students will continue to become more diverse. Over ½ of all the students in post secondary education are no longer in the traditional 18-21 year old group.

Additionally, the number of New Yorkers 65 or older will continue to grow. Next year, 1 in 7 in the State will be over 65 and by 2000, the number will be 1 in 6.

Senior citizen activities and child care centers are now common place on community college campuses and will grow significantly during the next 10 years.

Thirdly, New York is already one of the most racially and ethnically diverse States in the Nation, with minorities currently comprising more than ¼ of the States popu-

lation. By the year 2000, 1 in 3 New Yorkers will be non-white and 4 in 10 babies will be born into minority groups, predominately black and hispanic.

Therefore, our mix of students will be very different. Women will constitute the majority of 17-24 year olds and more than 1 out of every 5 in that same age group will represent a minority. Thirty percent of the total college going youth in the 90's will be minority members.

The education and hiring at NCCC of black-American, Hispanic-American, Asian-American, and native American residents of Niagara county is vital to the growth of this county as well as to their own well being.

Our constitution and its guarantees of individual rights and freedoms has, in good and bad times, assured the establishment of educational opportunities for all of our citizens. Yet, given such a remarkable goal, there is much unfinished business ahead of us.

Niagara County Community College must continue to expand the efforts to be the multicultural, diverse aged and gendered environment that mirrors its larger community.

Finally, value issues confronting students will be very different in the future. The manipulation of massive amounts of information about individuals made possible by the information age and the technology which makes test tube babies and a generation of artificial intelligence commonplace is going to create ethical and moral dilemnas.

Furthermore, students of the future will self destruct if we don't figure out how to curb alcohol and drug abuse and the spread of AIDS. Students must be able to gain a better understanding of how to take care of themselves.

The impacts of these trends will be dramatic and will require that we continue to adapt to meet changing needs of our citizens.

Harry Truman felt that the community college was indeed the entity of the future. He said that in 1947. It is equally true in 1989. It is true because the senior citizen population and the working mothers, the high school dropouts and the economically disadvantaged segments of the population are growing in leaps and bounds and the only education with which they truly will identify, and in alot of cases can afford, will be the one on the bus route, the one that can hold classes when they can be there, the one that can provide child care while they're there, and the one that provides the academic, social, psychological and psychic bridges necessary for them to successfully compete.

I have great confidence that as president and in partnership with the State of New York, the State University of New York, the county of Niagara and its surrounding communities, together with our talented administration, faculty and staff, alumni, legislators, business and industry leaders we will fulfill the real object of education as defined by Ernest Boyer.

That is "to give people resources that will endure as long as life endures; habits that time will ameliorate, not destroy; occupations that will render sickness tolerable, solitude pleasant, age venerable, life more dignified and useful, and death less terrible."

I'd like to close this special ceremony of personal celebration with a poem written by another college president, R. Stephen Nicholson of Oakland Community College in Michigan.

ODE TO A COMMUNITY COLLEGE

Upon the desert floor
Beneath the mountains
Listening to the echoes
From the daring Spanish Quest
here
Across the wind blown wagon tracks
of pioneers
Who loved these meadows
We build a college.

No easy task or simple plan
To form a place where mind meets mind
And time meets tomorrow.

Of all man's accomplishments
The motion of ideas from mind to mind
Is most complex
Most fragile and easily flawed
By distractions large or small

As fragile as a dew-laden spider's web
As essential as air or water
As clear as dawn on a mountain peak
As varied as the desert's early bloom
A learning place
No longer sequestered by distance or walls
This college must ride astride the
Volcanic changes of today
If we are to have a tomorrow

And so we plan and build
An expression of hope and confidence
In many yet unborn
In ideas yet unthought
In undreamed dreams
In a tomorrow which begins today.

We build not isolated expanses
Which inspire by size and grandeur
But rather form a place
Whose miniature views and quiet spaces
Create a view of the wider world.
Like spanish missions old
Whose walls turned back both heat and wind
And sheltered all who entered

We build and plan
A place where time stands still
Where each student finds his way
To build a tomorrow which transcends
Today
To become more than he could be
Without this place
To discover
The richness of man's cumulative
Intelligence,
The excitement of
The application
Of that intelligence to life

These open doors
For all
Who seek today
Tomorrow's dream,
Who take today
That first courageous step
To meet tomorrow's challenge
Yet these doors
Close out all that
Hinders, distracts, and flaws
The infinite process of passing ideas
From man to man
From mind to mind

Doors for all
Who live today and
Dream of a tomorrow
With richer life and peace,
An open door we set
To knowledge and understanding
A place so quiet one can hear the past
So busy one can know the present
And so full no one departs less than
He entered.

SENATE—*Monday, February 5, 1990*

(Legislative day of Tuesday, January 23, 1990)

The Senate met at 9:45 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

The PRESIDENT pro tempore. As we reverence God, the prayer will be led by the Senate Chaplain, Dr. Richard C. Halverson.

Dr. Halverson.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

* * * *the path of the just is as the shining light, that shineth more and more unto the perfect day.*—Proverbs 4:18.

Eternal God, perfect in truth, justice, love and grace, this darkening world needs desperately light on its way. If darkness emanates from the Nation's leaders, how great is that darkness?

Grant to Thy servants, the Senators and their advisers, that they may seek the way of justice. Infuse this distinguished historic institution with the passion for justice that it may be for the Nation and the world the light that banishes the darkness and leads the way into the irresistible future.

In the name of Jesus, the Light of the World. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader or his designee is recognized under the order.

The Senator from Nevada [Mr. BRYAN] is recognized.

Mr. BRYAN. I thank the Chair.

THE JOURNAL

Mr. BRYAN. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SCHEDULE

Mr. BRYAN. Mr. President, this morning the time for the two leaders has been reduced to 5 minutes each, after which there will be morning business until 10 a.m.

At 10 o'clock this morning, the Senate will begin consideration of S. 1310, the illiteracy bill, under a unanimous-consent agreement which provides that only certain amendments are in order to that bill. The list of those amendments can be found on page 2 of the Senate Legislative Calendar.

Mr. President, there will be no rollcall votes today.

Any votes ordered relative to S. 1310 will occur beginning at 12 noon on Tuesday, February 6. It is expected that all debate on S. 1310 will be concluded today with the anticipation that prior to any votes tomorrow, there will be some time for brief comments on S. 1310.

Mr. President, the majority leader indicated last Thursday that it is his intention to proceed to S. 695, excellence in education, on Tuesday morning and that he believed action could be completed on that bill by the close of business on Tuesday. Further, once S. 695 is disposed of the pending business would again be the clean air bill.

RESERVATION OF LEADERS' TIME

Mr. BRYAN. Mr. President, I note that neither the Republican leader nor the acting Republican leader is here and, therefore, I ask unanimous consent to reserve the remainder of the majority leader's time and the Republican leader's time.

The PRESIDENT pro tempore. Without objection, the remainder of each leader's time will be reserved.

Mr. BRYAN. I thank the Chair.

MORNING BUSINESS

The PRESIDENT pro tempore. The Chair will inquire of the acting leader, is it the intention that Senators be permitted to speak during morning business? Ordinarily, they are not allowed to speak during morning business unless consent is given. I do not believe that consent has been given.

Mr. BRYAN. Responding to the Chair's inquiry, that would be the intention of the acting majority leader.

The PRESIDENT pro tempore. They may be permitted to speak for up to 5 minutes each?

Mr. BRYAN. Not to exceed 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Under the order, there will now be a period for morning business with Senators permitted to speak therein for not to exceed 5 minutes each.

Mr. BRYAN. Mr. President, I do not note any Senator on the floor desiring recognition so I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Connecticut is recognized for not to exceed 5 minutes, with morning business extended accordingly.

Mr. LIEBERMAN. I thank the Chair.

(The remarks of Mr. LIEBERMAN pertaining to the introduction of S. 2059 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

EXTENSION OF MORNING BUSINESS

The PRESIDENT pro tempore. The Senator from Kansas.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent, since it is past the hour of 10, to speak in morning business for 1 minute.

The PRESIDENT pro tempore. Without objection, it is so ordered. The Senator from Kansas is recognized.

Mrs. KASSEBAUM. I thank the Chair.

(The remarks of Mrs. KASSEBAUM pertaining to the introduction of S. 2069 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

REFUGEES IN SOUTHERN AFRICA

Mr. KENNEDY. Mr. President, many of us are aware of the lives of turmoil which the people of Mozambique and Angola have endured for the past several years.

In a recent report by the U.S. Committee for Refugees this tragedy is brought to life. The report, entitled "Peace or Terror: A Crossroads for Southern Africa's Uprooted," states that "suffering and terror are the daily bread of the Mozambican and Angolan people."

The report goes on to note that "in the midst of so much suffering, there is also hope. In both Mozambique and Angola, Government and rebel negotiators have taken a few tentative

steps on the long and arduous road toward peace."

The fate of these millions of refugees and displaced persons hinges on whether peace negotiations in these two countries are successful. But the continuing conflict and the massive needs of the refugees remind us of the urgency of supporting these developments in any way possible and to continue to provide support to the U.N. High Commissioner for Refugees and other agencies assisting the refugees.

Mr. President, I commend the U.S. Committee for Refugees for this insightful report and ask that excerpts be included in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

PEACE OR TERROR: A CROSSROADS FOR SOUTHERN AFRICA'S UPROOTED BY UNITED STATES COMMITTEE FOR REFUGEES

In Mozambique, fighting continues even though the government and the Mozambican National Resistance (RENAMO) are moving tentatively toward peace talks. More than 100,000 Mozambicans have been purposely killed, and almost 500,000 children are said to have died as a result of the conflict; countless other children have been orphaned, separated from their families, or kidnaped by RENAMO, a group that some have labeled the Khmer Rouge of Africa. An estimated 1.7 million Mozambicans are internally displaced; another 2.9 million who have been able to remain in their homes are affected by the conflict, unable to grow their crops because of the lack of security and partly or wholly dependent on food aid.

* * * * *

The conflict in Angola, between the government and rebels from the National Union for the Total Independence of Angola (UNITA), also continues to ravage the country. Reliable estimates of how many Angolans have been killed do not exist but the high numbers of people that have been maimed, and of children reported to have died in the conflict, suggest that the death toll in Angola is also very high.

According to government estimates, 638,000 Angolans are internally displaced; hundreds of thousands more—many of them people also displaced by the fighting—are living in urban centers in destitute conditions. More than 438,000 Angolan refugees have sought refuge in neighboring countries.

OPPOSITION TO S. 438, THE RICO REFORM ACT OF 1989

Mr. CRANSTON. Mr. President, I rise today to express my very strong opposition to legislation which the Senate Judiciary Committee has approved, S. 438, which would make major changes to the Racketeer Influenced and Corrupt Organizations Act, commonly known as RICO. The approach taken in this bill—severely limiting the remedies available to victims of consumer fraud and white-collar crime—is the wrong way to go about reforming RICO.

Mr. President, there is little doubt that we are currently facing an epidemic of white-collar crime in this country. The General Accounting Office [GAO] has identified white-collar crime as a major cause of insolvency in the savings and loan industry. In 26 thrift institutions in one state examined by GAO, fraud and other abuses were uncovered in each one. The commodities industry has been the target of one of the largest FBI sting operations in history, uncovering evidence of massive fraud and insider trading. Wall Street has been awash in insider trading, stock fraud, and other criminal activities, and the Pentagon is still reeling from the recent procurement fraud scandals. According to testimony presented by the National Association of Insurance Commissioners, over 160 insurance companies worldwide are presently in some form of liquidation/rehabilitation and insurance fraud is an element in almost every instance of failure of an insurance company.

The Congressional Research Service has advised Congress in recent years that defense procurement fraud costs between $23 to $38 billion annually, that bank fraud is the cause or a contributing cause in at least half of all bank failures, and that health care fraud costs the Government $3.6 billion annually—roughly 5 percent of the Government outlays in this area. Overall, it is estimated that white collar fraud costs Americans over $200 billion annually.

Any reform of RICO has to be measured against this backdrop of burgeoning white-collar crime. This is not a time when we should be limiting the use of civil RICO proceedings brought by the victims of stock swindles or consumer fraud. The National Association of Attorneys General, from the front lines of the battle against white-collar crime, have strongly argued against taking this step.

In testifying against the key provisions of S. 438 which would weaken the civil RICO procedures now available to private plaintiffs, the Nation's attorneys general argued that Goverment resources are simply inadequate to cope with the depth of white-collar crime ravaging the country's marketplaces. These chief State law enforcement officers stated that we cannot begin to control the fraud that threatens us without the kind of public/private alliance that current RICO civil remedies offer.

I strongly agree. We should be working to strengthen, not weaken, the remedies that allow the victims of white-collar crime to fight for compensation for their losses.

LITTLE EVIDENCE OF NEED FOR SWEEPING RICO REFORMS

Mr. President, the proponents of S. 438 have repeatedly claimed that civil RICO reform is necessary because the courts are being inundated with RICO litigation and the RICO remedy is being misused as a weapon to force defendants in ordinary business disputes into unjust settlements.

The facts simply do not support that contention. According to the testimony of the National Association of Attorneys General, Federal civil RICO filings declined 12 percent in 1987-88 and have never amounted to over one-half of 1 percent of Federal civil cases filed.

Moreover, courts have not hesitated to curtail abuse of the civil RICO suits through motions to dismiss or summary judgments—procedures which result in meritless cases being swiftly tossed out of court. In fact, 24 of the 34 abusive civil RICO suits most frequently cited by the proponents of S. 438 were, in fact, dismissed before trial. These cases involve such examples as a RICO suit between two rabbis, a divorce case, and a lawsuit by a journalist against ABC-TV. The courts quite properly threw these cases out.

The problem with S. 438 is that it addresses the problem of abusive litigation by denying legitimate victims an effective remedy. A far preferable approach to RICO reform would be to provide for expedited dismissal of cases which have no merit rather than stripping the law of its force to remedy all claims, regardless of merit. Increasing sanctions for filing of frivolous complaints is another approach which would focus on the abusive use of RICO, rather than eliminating or curtailing a legitimate victim's remedies and access to the courts. An additional tool is also available under rule 11 of the Federal Rules of Civil Procedure which provides for sanctions against attorneys who engage in frivolous litigation.

In fact, as the National Association of Attorneys General has pointed out, civil RICO already has a powerful bar against abuse: every successful RICO claim must establish, under current law, that criminal conduct, indeed, a pattern of criminal conduct, exists. A run-of-the-mill contract dispute does not normally involve the elements of criminal fraud. Alternatively, as the Attorneys General have suggested, if the definition of fraud under RICO is considered to be too broad, then we ought to focus on that narrow problem, not the wholesale restructuring of the civil RICO penalties proposed in S. 438.

LIMITING CIVIL RICO REMEDIES

Mr. President, there are a number of changes proposed in S. 438 which I believe would be to the detriment of many individuals injured by activities now covered by RICO. The most serious problem is the elimination of the automatic triple damages now available to all successful RICO plaintiffs. This detrebling of damages would mean that the civil RICO remedy, as

we now know it, would effectively cease to exist. Although the treble damages penalty would continue to be available in litigation brought by government entities, it would disappear for most private RICO litigants.

Mr. President, the legislation would allow certain categories of private litigants to continue to seek treble damages, but the category of lucky plaintiffs is very narrowly defined. An individual whose business or property has been injured would be able to bring suit for three times the actual damages to the business or property only if the defendant had been convicted of a felony based upon the same conduct. This provision, however, creates an illusory remedy for most victims since it conditions a victim's right to recovery on whether the Government has filed a prior criminal case and achieved a conviction. The disposition of a criminal proceeding can be based upon factors wholly unrelated to the merits of the victim's claim.

For example, a criminal case could be thrown out of court based upon illegally seized evidence. The victim would be denied a powerful civil remedy because of the consequent failure to obtain a criminal conviction. The victims would also be dependent upon a prosecutor's decision whether or not to seek a criminal indictment—a decision which may be based upon a wide range of factors having little to do with the injuries inflicted upon innocent third-parties. A prosecutor might decide to accept a plea bargain reducing a conviction from a felony to a misdemeanor, thereby denying the victim a remedy under the scheme devised in S. 438.

It is fair to say that very few cases would be likely to satisfy the requirements of S. 438 for treble damages. The reality for most potential civil RICO plaintiffs is that a successful civil RICO suit will be limited to recovering actual damages.

Additionally, the legislation allows for punitive damages—limited to twice actual damages—in certain consumer fraud cases. But even the availability of this limited remedy is illusory. A plaintiff would have to establish by clear and convincing evidence—a higher standard than the normal preponderance of evidence standard used in civil cases—that the defendant's actions were consciously malicious or so severe that malice may be implied. Establishment of the required element of malice would be a substantial burden for any plaintiff to meet. Moreover, punitive damages are normally assessed against a defendant at a level which actually penalizes the wrong-doer. Placing an arbitrary cap on a punitive damage award based upon what may be minimal actual damages could well turn this remedy into a token slap on the wrist for egregious behavior by a gaint company with vast resources.

Mr. President, some critics of S. 438 have aptly observed that enactment of this legislation would render an already complex statute "convoluted and virtually unusable."

It is also important to understand the devastating effects that elimination of treble damages would have upon the availability of civil RICO remedies for most potential plaintiffs. Obviously, potential plaintiffs could still use RICO to seek actual damages. But rarely would the possibility of actual damages justify the cost and time of litigating a RICO case. As I have indicated, it is unrealistic to expect that many potential plaintiffs would succeed in fitting into the complex new categories where treble damages or punitive damages are available. Civil RICO would effectively be gone for most potential plaintiffs.

From a societal point of view, this means that the white-collar criminal who perpetrates a fraudulent scheme to rob innocent victims of their lifesavings need only fear being forced to give the money back if he is prosecuted by his victims under RICO. RICO would cease to be a deterrent to this type of conduct since the potential penalty would no longer outweigh the potential gains of the illicit conduct.

Mr. President, the proponents of S. 438 will argue that this is not true since the legislation would allow treble damages to be recovered in civil RICO cases brought by certain Government entities and that the threat of these cases will ensure continuation of the deterrent effect of RICO on potential wrong-doers. The reality, unfortunately, is that there simply are not enough Government prosecutorial resources available to handle these cases. As I indicated earlier, the Nation's chief law enforcement officers made this point over and over in testifying against the provisions of S. 438 which would weaken the civil RICO remedies for private plaintiffs. Government resources are needed for RICO cases involving such matters as massive Government fraud or drug money laundering. Private RICO litigation is essential to provide victims a private remedy under which they can seek redress and as a deterrent to white-collar criminals who might otherwise feel free to rob and defraud innocent victims.

CALIFORNIA RICO LITIGANTS

Mr. President, before concluding let me say that on Wednesday morning I met with some representatives of real people—elderly and disabled Californians—who are presently pursuing civil RICO claims in connection with the purchase of what are now worthless bonds sold by American Continental Corp. in the branches of Lincoln Savings and Loan, a California federally insured thrift institution. Their lawsuit contends that they were the victims of an elaborate scheme to induce them to invest in unsecured bonds rather than the federally insured deposits they had sought and that they were deliberately misled by the employees of Lincoln into putting their money, in some cases their entire life savings, into these high risk bonds.

Although the provisions of S. 438 which would have made the legislation applicable to pending litigation were deleted yesterday by the Senate Judiciary Committee, these constituents expressed deep concerns about the possibility that the retroactive provision would be restored at a later time in the legislative process, thereby dashing their hopes of recovering any of their losses through their pending civil RICO proceedings. More importantly, they expressed the very strong view that future victims of this kind of fraud should not be denied the remedies now available under civil RICO.

Frankly, Mr. President, I strongly agree. I see no justification for taking these remedies away from prospective victims of white-collar crime. I will do everything I can to prevent that outcome—both for those now litigating civil RICO claims and for those who may need to in the future. RICO ought to provide a strong and effective remedy for these kinds of victims.

CONCLUSION

Mr. President, if S. 438 were enacted, there clearly would be fewer civil RICO cases filed, but not because there would be fewer cases of fraud in this country. The wrong-doing would continue, but a potent remedy for victims would have disappeared. The victims of white-collar crime are often the most vulnerable of our citizens—elderly, poor, disabled, or under-educated Americans. Abuses by a few litigants does not justify denying broad classes of white-collar crime victims the protections that RICO now provides. The rights of victims have too long been ignored in our society. They deserve effective and tough remedies for the losses they suffer.

TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,787th day that Terry Anderson has been held in captivity in Beirut.

Mr. President, Terry Anderson's case once again gives me occasion to return to the subject of international terrorism. Not long ago, I received a very thoughtful letter on this topic from Mr. Paul Hudson of Albany, NY. Mr. Hudson, a lawyer, lost his daughter in the bombing of Pan Am flight 103.

Mr. Hudson maintains—as I do—that international law empowers the United States to act against terrorism. It does not bind our hands, as some seem to believe, but allows us to react

in a manner that is consistent with our moral and legal traditions. Indeed. We do not defend our values by abandoning them in the effort to combat terrorism.

I ask unanimous consent that portions of Mr. Hudson's letter be reprinted at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

ALBANY, NY.

DEAR SENATOR MOYNIHAN: I read with great interest your exchange on the Senate floor of November 7th in which you discussed CIA Director Webster's recently published remarks on "rendering" accused terrorists to the U.S. for trial and the loosening of restrictions on U.S. security and counter-terrorist forces so that any foreign action involving violence is not automatically equated with assassination and barred by U.S. law.

The overall issue that you gentlemen in particular and Western democracies in general must come to grips with is this: How to effectively fight terrorism in a legal and moral manner.

I firmly believe we can and must fight the evil of terrorism without sacrificing our legal principles and moral values. But we must *act soon*, before this spreading cancer of terrorism reaches the point where lawful, moral methods are completely inadequate.

What can we do? I would stress six approaches:

1. *Vigorous*, pro-active *application abroad of criminal justice methods* used to effectively block terrorism and fight organized crime in this country. This includes use of rewards, witness protection and relocation, paid informants, electronic eaves-dropping, arrests of terrorists on immigration or weapons charges before they can strike or get organized, formation of multi-national counter-terrorist strike forces, trial and conviction of terrorists in absentia.

2. *Application of Nuremberg War Crime principles* to officials of terrorist states. This would mean that terrorist officials would be labeled as war criminals, perhaps after indictment by a multi national grand jury, not just common criminals, and the U.S. would be authorized to use force to apprehend them regardless of where they sought refuge. The rendering of persons accused of the Pan Am 103 bombing from countries where they have taken refuge such as Syria, Iran, Libya, Lebanon and Jordan would not be in violation of international law, particularly where these states have declared terrorist war on the U.S. or harbor groups that have taken credit for the terrorist acts in question.

3. Drafting and Adoption by U.S. and its allies of *Anti-Terrorism Protocols* that would spell out what steps a victimized nation could take under international law to defend against and punish terrorist groups and states.

4. *Diplomatic and Economic Action* such as breaking reducing diplomatic relations, trade embargos, elimination of U.S. landing rights, freezing or forfeiture of assets, black listing of corporations doing business with terrorist groups or states, suspension of Most Favored Nation trade status.

5. *Military actions* such as naval blockades, aerial bombing of terrorist camps or other strategic targets, commando type raids to rescue hostages or destroy terrorist camps, bases and headquarters.

6. *Installation* of a *credible aviation security system* that uses state-of-the-art bomb detectors, properly trained, motivated and disciplined security officers, tightened airport security access points, and hardened airframes to prevent decompression explosions. Until such systems are installed to provide a highly credible defense, we must provide airline passengers with information on any credible warnings of terrorist threatened attacks.

I would implore you to become part of the solution in effectively fighting terrorism.

Very truly yours,

PAUL S. HUDSON.

CONCLUSION OF MORNING BUSINESS

The PRESIDENT pro tempore. Under the order, morning business is now closed.

NATIONAL LITERACY ACT

The PRESIDENT pro tempore. Under the previous order, the Senate will proceed to the consideration of Calendar Order 365, S. 1310, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1310) to eliminate illiteracy by the year 2000, to strengthen and coordinate literacy programs, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Labor and Human Resources with an amendment to strike all after the enacting clause, and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Literacy Act of 1989".

SEC. 2. FINDINGS.

The Congress finds that—

(1) there are between 23 and 27 million adult Americans who are functionally illiterate, a number which is increasing due to disproportionately high drop out rates in the public schools among minorities;

(2) the Adult Education Act is the only major program to reduce illiteracy in the United States and serves only 10 percent of eligible participants, while all public and private literacy programs serve only about 19 percent of those who need help;

(3) illiteracy is a problem of intergenerational nature;

(4) effective literacy training in our Nation's schools, particularly at the elementary level, is essential to preventing further growth in national illiteracy rates;

(5) as many as 50 million workers may have to be trained or retrained between now and the year 2000; and

(6) the supply of unskilled workers is increasing and the demand for unskilled labor is decreasing.

SEC. 3. DEFINITION.

As used in this Act the term "literacy" means the knowledge and skills necessary to communicate, including the reading, writing, basic skills, computation, speaking, and listening skills normally associated with the ability to function at a level greater than the 8th grade level so that education, employment, citizenry and family life is enhanced.

TITLE I—LITERACY COORDINATION

SEC. 101. SHORT TITLE.

This title may be cited as the "Literacy Coordination, Research, and Dissemination Act of 1989".

SEC. 102. NATIONAL LITERACY 2000 FEDERAL INTERAGENCY COUNCIL.

(a) ESTABLISHMENT.—There is established the National Literacy 2000 Federal Interagency Council (hereafter in this title referred to as the "Council").

(b) COMPOSITION.—(1) The Council shall consist of—

(A) the Secretary of Education (hereafter in this title referred to as the "Secretary"), who shall serve as Chairperson;

(B) the Director of the ACTION Agency;

(C) the Secretary of Health and Human Services;

(D) the Secretary of Labor;

(E) the Attorney General of the United States;

(F) the Director of the Office of Personnel Management; and

(G) such other officers of the Federal Government as may be designated by the President of the United States or the Chairman of the Council to serve whenever matters within the jurisdiction of the agency headed by such an officer are to be considered by the Council.

(2) Each individual described in paragraph (1) may designate an individual to represent such individual on the Council.

(3) Each member shall be appointed for as long as such member serves as the head of the appropriate agency.

(4) The Chairman of the Council shall be the President's principal advisor on literacy.

(c) QUORUM.—One more than one-half of the members of the Council shall constitute a quorum for the purpose of transmitting recommendations and proposals to the President, but a lesser number may meet for other purposes.

(d) MEETINGS.—The Council shall meet at least 4 times each year. When a Council member is unable to attend, the Council member shall appoint an appropriate Assistant Secretary or an equivalent individual from the department or agency of the member to represent the member for that meeting.

(e) DUTIES OF THE COUNCIL.—The Council shall—

(1) devise, coordinate, and monitor existing and other government initiatives to—

(A) facilitate the elimination of illiteracy, and

(B) integrate the resources of literacy programs across various departments or agencies of the Federal Government;

(2) solicit information and advice from representatives and experts with experience in literacy-related programs, including members of State and local governments, individuals from education, labor, and business, National literacy organizations, State literacy organizations, and local literacy organizations, volunteer organizations, service providers, and community-based organizations;

(3) set specific and measurable goals for the Federal effort in the education of illiterate adults, children, and their families so that all appropriate Federal agencies have specific objectives and strategies for meeting such goals;

(4) track progress on meeting the goals and objectives set forth in paragraph (4);

(5) issue a biennial report to Congress and the President on the progress made by the

Federal Government and the Nation toward enhancing the literacy skills of its people, including recommendations for legislation required to improve and expand Federal literacy programs;

(6) develop model systems for implementing and coordinating Federal literacy programs which can be replicated at the State and local level;

(7) review and make recommendations regarding ways to achieve uniformity among reporting requirements, the development of performance measures, and the development of standards for program effectiveness for literacy-related Federal programs; and

(8) advise the Director of the National Center with regard to—

(A) the formulation of policy guidelines and issues related to the administration of the Center;

(B) the development and implementation of the activities and projects of the Center and the identification of those activities and projects that address high priority needs identified by the Council; and

(C) the selection and operation of major research and demonstration projects and activities of the Center.

(f) AVAILABILITY OF FUNDS; PERSONNEL.—The Department of Education, the Department of Health and Human Services, the Department of Justice, the Department of Labor, the Office of Personnel Management, and each department participating in the Council shall contribute a total of $100,000 in salaries, expenses and personnel to support the administrative expenses of the Council. The ACTION Agency and each agency participating in the Council shall contribute at least $20,000 in salaries, expenses and personnel to support the administrative needs of the Council. The administrative needs of the Council may include staffing, consultants, supplies and travel.

SEC. 103. LITERACY RELATED PROGRAMS IN THE DEPARTMENT OF EDUCATION.

(a) COORDINATION.—Section 202 of the Department of Education Organization Act is amended by adding the following new subsection at the end thereof:

"(h) The Assistant Secretary for Vocational and Adult Education shall, in addition to performing such functions as the Secretary may prescribe, shall have responsibility for coordination of all literacy related programs and policy initiatives in the Department. The Assistant Secretary for Vocational and Adult Education shall—

"(1) coordinate the staff resources and the assistance provided to the Council;

"(2) assist in coordinating the related activities and programs of other Federal departments and agencies; and

"(3) assist the Secretary in carrying out his or her responsibilities as chairperson of the Council.".

SEC. 104. NATIONAL CENTER FOR LITERACY.

(a) PURPOSE.—It is the purpose of this part to enhance the national effort to eliminate the current problem of illiteracy by the year 2000 by improving research, development and information dissemination through a national research center.

(b) FINDINGS.—The Congress finds—

(1) far too little is known about how to improve access to, and enhance the effectiveness of, adult literacy programs, assessment tools, and evaluation efforts;

(2) there is no reliable nor central source of information about the existing knowledge base in the area of literacy;

(3) a National Center for Literacy would provide a national focal point for research, technical assistance and research dissemination, policy analysis, and program evaluation in the area of literacy; and

(4) such a National Center would facilitate a pooling of ideas and expertise across fragmented programs and research efforts.

(c) PROGRAM AUTHORIZED.—(1) The Secretary shall, make a grant to, or enter into a contract with, a qualified non-profit organization or institution or consortia of such organizations or institutions to establish and operate a nonprofit National Center for Literacy (hereafter in this section referred to as the "Center") to carry out the purposes set forth in subsections (a) and (b). Such grant shall be awarded on a competitive basis and shall be for a period not to exceed 5 years, and is renewable.

(2) The Center shall be composed of—

(A) a director of the Center (hereafter in this section referred to as the "Director");

(B) experts in the literacy field;

(C) directors and supervisors for each of the major functions of the Center set forth in paragraphs (1) through (8) of subsection (e); and

(D) professional and support staff.

(3) The Secretary, in consultation with the Council, shall select a panel composed of individuals who are not Federal employees and who are recognized nationally as experts in adult and child literacy to assist in the selection of a grant recipient under this section.

(4) The Center shall have the ability to enter into contracts and joint ventures, and to form cooperative relationships with State and local agencies, educational entities, community-based organizations, volunteer literacy organizations, business and labor organizations, and service providers, consistent with the purposes of this Act and the functions of the Center.

(5) The Center may accept, but not solicit, private contributions, foundation grants, and other grants to support the research and dissemination activities of the Center.

(6) The Center shall, to the extent practicable, coordinate and utilize existing resources that relate to the mission of the Center.

(d) APPLICATION.—Each organization or entity desiring a grant under this section shall submit an application at such time, in such manner, and accompanied by such information as the Secretary may reasonably require.

(e) USE OF FUNDS.—Funds provided pursuant to this section may be used by the Center to—

(1) conduct basic and applied research on—

(A) the process by which children and adults learn to read and develop basic skills;

(B) problems in diagnosing and treating the learning disabled;

(C) developing instructional techniques and assessment tools;

(D) the use of technology and other studies which would advance the literacy knowledge base, and which would not duplicate the work of other research services but would build on such research efforts;

(E) the development of models for the effective intergenerational education of illiterate adults and their children;

(F) improving curriculum, software, and other literacy materials and to encourage the training and use of full-time professional adult educators; and

(G) addressing problems facing the limited English proficient, in coordination with the national clearinghouse on literacy education of the Center for Applied Linguistics authorized under section 372 of the Adult Education Act;

(2) provide technical assistance including—

(A) tracking the development of literacy and basic skills programs;

(B) disseminating research findings;

(C) disseminating information regarding exemplary program models, curricula, and training models, particularly models that offer effective approaches to diagnosing and serving the learning disabled, prisoners and ex-offenders;

(D) the use of technology and materials development; and

(E) supplementing the technical assistance provided by the State literacy resource centers to local literacy providers;

(3) act as a clearinghouse in providing information on Federal, State, local and private sector literacy efforts and programs, teaching and assessment methods, and evaluation tools, to Federal, State, and local agencies, (including the State literacy resource centers established in section 354 of the Adult Education Act), as well as to businesses, labor organizations, and voluntary groups;

(4) conduct policy analysis and program evaluation activities, including—

(A) the development of a data base on literacy programs;

(B) the development of assessment tools;

(C) evaluation of progress made toward national goals;

(D) developing, collecting, and providing information, including information about State and local programs, to facilitate national planning and policy development in adult and child literacy;

(E) developing model systems for implementing and coordinating Federal literacy programs which can be replicated at the State and local level; and

(F) reviewing and making recommendations regarding—

(i) ways to achieve uniformity among reporting requirements,

(ii) the development of performance measures, and

(iii) the development of standards for program effectiveness for literacy-related Federal programs;

(5) conduct a model demonstration program, in consultation with State educational agencies, to demonstrate innovative approaches to remediate, train, retrain and place persons who do not complete secondary school or possess a general equivalency diploma;

(6) provide a toll-free hotline for literacy related information for individuals and for literacy providers, which may use private contributions;

(7) coordinate with the national clearinghouse on literacy education of the Center for Applied Linguistics established pursuant to section 372 of the Adult Education Act; and

(8) engage in activities related to the development of data and collection of statistics related to literacy and illiteracy.

(f) DATA.—The Center shall, in accordance with regulations published pursuant to subsection (a)(8), provide all interested parties, including public and private agencies and individuals, direct access to data collected by the Center for the purposes of research and acquiring statistical information.

(g) PRIORITY.—The Center shall give priority to the activities described in paragraphs (2), (3), and (6) of subsection (e).

(h) EVALUATION.—The Director of the Center shall report annually to the Congress and to the Council on progress made in achieving national literacy goals. This report shall include the results of an evalua-

tion of Federal, State, and local public, as well as private sector, literacy programs.

(i) AUTHORIZATION OF APPROPRIATIONS.—(1) There are authorized to be appropriated $10,000,000 for fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992 and 1993, to carry out the provisions of this section.

(2) Of the amount authorized to be appropriated pursuant to paragraph (1) for each fiscal year, not more than 5 percent of such funds shall be used to conduct the model demonstration program described in section 103(e)(5).

SEC. 104. STATE LITERACY RESOURCE CENTER.

Subpart 6 of part B of the Adult Education Act is amended—

(1) by inserting at the end thereof the following new section 354:

"SEC. 354. STATE LITERACY RESOURCE CENTER.

"(a) PURPOSE.—It is the purpose of this section to assist State and local public and private nonprofit efforts to eliminate illiteracy through a new program of State literacy resource center grants to—

"(1) stimulate the coordination of literacy services,

"(2) enhance the capacity of State and local organizations to provide literacy services, and

"(3) facilitate the sharing of literacy resources within the State.

"(b) PROGRAM AUTHORIZED.—(1) The Secretary is authorized to make grants to pay the Federal share of the costs of establishing and operating State literacy resource centers in such States that apply for grants. Such grants shall be awarded for a period not to exceed 3 years and shall not exceed $500,000 per year.

"(2) Each State shall contract on a competitive basis with the State educational agency, a State office on literacy, a volunteer organization, a community-based organization or another nonprofit entity to operate a State literacy resource center. If the State educational agency does not operate the Center, the State educational agency shall be provided the opportunity to comment on the selection of the entity selected to operate the Center.

"(3) No State may receive financial assistance pursuant to the provisions of this section for more than 3 fiscal years.

"(c) USES OF FUNDS.—Funds provided pursuant to this section may be used for—

"(1) the development of innovative approaches to the coordination of literacy activities within the State and with the Federal Government;

"(2) activities related to improving access to literacy services in the State through the promotion of technology utilization, the provision of technical assistance to service providers to improve overall literacy program design and evaluation, the dissemination of information among literacy service providers, and other activities which enhance the delivery of literacy services; and

"(3) the establishment of a State literacy resource center to—

"(A) serve as a link between State and local service providers and the National Center for Literacy for the purposes of disseminating research and other information generated by the National Center for Literacy to service providers;

"(B) upgrade the system of diffusion and adoption of state-of-the-art teaching methods and technologies;

"(C) assist in coordinating the delivery of literacy services by public and private agencies;

"(D) encourage government and industry partnerships, including partnerships among small business, private nonprofit organizations, and community-based organizations;

"(E) encourage innovation and experimentation in literacy services;

"(F) provide technical and policy assistance to State and local governments, community-based literacy organizations, and correctional education programs to improve literacy policy and programs;

"(G) train and provide technical assistance to literacy instructors in—

"(i) selecting and making the most effective use of state-of-the-art methodologies, instructional materials, and technologies including—

"(I) computer assisted instruction,

"(II) video tapes,

"(III) interactive systems, and

"(IV) data link systems; and

"(ii) assessing learning style and screening for learning disabilities, and providing individualized remedial reading instruction;

"(H) encourage and facilitate the training of full-time professional adult educators; and

"(I) address new literacy issues, including family literacy, workplace literacy, and English literacy, and to provide technical assistance as such issues emerge.

"(d) SPECIAL RULE.—(1) Each State receiving funds pursuant to this section may use not more than 10 percent of such funds to establish a State advisory council on adult education and literacy pursuant to the provisions of section 332 of the Adult Education Act.

"(2) Each State receiving funds pursuant to paragraph (1) may use such funds to support an established State council to the extent that such council meets the requirements of section 332 of the Adult Education Act.

"(e) APPLICATION.—(1) Each State desiring a grant under this section shall submit an application to the Secretary, at such time, in such manner and containing or accompanied by such information as the Secretary may reasonably require. Each such application shall—

"(A) describe the activities and services for which assistance is sought;

"(B) include a statewide plan with measurable goals for the elimination of illiteracy within the State, including an implementation plan describing—

"(i) strategies to facilitate the maximum participation of community-based organizations, volunteer organizations and other nongovernmental entities in statewide literacy efforts; and

"(ii) procedures for the coordination of literacy activities in the State conducted by public and private organizations, and for enhancing the systems of service delivery.

"(C) contain assurances that the State will use funds provided pursuant to this section in accordance with the provisions of this section.

"(2) Each State desiring a grant under this section shall submit a copy of the plan required by paragraph (1)(B) to the State Advisory Council of Adult Education and Literacy 60-days before submission for review and comment. The State Advisory Council on Adult Education and Literacy shall transmit such comments to the Secretary.

"(f) PAYMENTS; FEDERAL SHARE.—(1) The Secretary shall pay to each State having an application approved pursuant to subsection (d), the Federal share of the cost of the activities described in the application.

"(2) The Federal share—

"(A) for the first two fiscal years in which the State receives funds under this title shall not exceed 75 percent; and

"(B) for the third fiscal year in which the State receives funds under this title shall not exceed 50 percent.

"(g) NON-FEDERAL SHARE.—(1) The non-Federal share of payments under this section may be in cash or in kind, fairly evaluated, including plant, equipment, or services.

"(h) AUTHORIZATION OF APPROPRIATIONS.—For the first fiscal year in which the amount appropriated to carry out part A of the Adult Education Act exceeds $160,000,000 and each fiscal year thereafter, there are authorized to be appropriated $15,000,000 for fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992 and 1993 to carry out the provisions of this section.".

TITLE II—WORKFORCE LITERACY

SEC. 201. SHORT TITLE.

This title may be cited as the "Workforce Literacy Act of 1989".

SEC. 202. STATEMENT OF PURPOSE.

It is the purpose of this title—

(1) to provide financial assistance to improve educational opportunities for adults who lack the level of literacy skills requisite to effective citizenship and productive employment;

(2) to expand and improve the current system for delivering and accessing adult education services, including the use of community based organizations, and including the delivery of such services to educationally disadvantaged adults;

(3) to encourage the expansion of adult education teacher training programs; and

(4) to increase the number of full-time professional adult educators.

SEC. 203. ADULT EDUCATION AMENDMENTS.

(a) AUTHORIZATION OF APPROPRIATIONS.—Section 313(a) of the Adult Education Act is amended by—

(1) striking "There" and inserting "(1) Except as provided in paragraphs (2) and (3), there";

(2) striking "and such sums as may be necessary for each succeeding fiscal year through fiscal year 1993" and inserting "and fiscal year 1990"; and

(3) inserting at the end thereof the following new paragraphs:

"(2) There are authorized to be appropriated for each of fiscal years 1991, 1992, and 1993 an amount equal to the appropriations for the previous fiscal year plus $100,000,000.

"(3) If the Secretary determines in any fiscal year that a majority of the illiterate population assisted under this title has been served, the amount authorized to be appropriated for each of the succeeding fiscal years listed in paragraph (1) shall be equal to the amount authorized to be appropriated for the fiscal year in which the determination is made.".

(b) USE OF FUNDS; LOCAL APPLICATIONS.—Section 322 of the Adult Education Act is amended—

(1) in the second sentence of subsection (a)(1) by striking "only if the applicable local educational agency has been consulted with and has had the opportunity to comment on the application of such agency, organization, or institution" and inserting "only if the grant application from such entities to the State has been made available to the applicable local educational agency for review and comment";

(2) in the third sentence of subsection (a) by inserting "if any," after "agency,";

(3) at the end of subsection (a)(1) by inserting the following new sentence: "Each State educational agency receiving financial assistance under this subpart shall assure direct and equitable access to Federal funds to local educational agencies, public or private nonprofit agencies, community-based organizations, and institutions which serve educationally disadvantaged adults.";

(4) in subsection (a)(3) by—

(A) striking "any consultation" and inserting "the opportunity to comment"; and

(B) striking "taken place is" and inserting "been";

(5) at the end of subsection (a)(4)(A), strike the period and insert: ", particularly those adults with a reading ability below the fifth grade level, and those adults who reside in areas with a high proportion of adults who do not have a certificate of graduation from a school providing secondary education or its equivalent."; and

(6) in subsection (b)(2) by striking "20 percent" and inserting "25 percent"

(c) STATE ADVISORY COUNCIL.—(1) The heading to section 332 of the Adult Education Act is amended by inserting "AND LITERACY" before the period.

(2) Section 332 of the Act is amended—

(A) in the first sentence of subsection (a)(1) by striking "adult education, appointed by the Governor" and inserting "adult education and literacy, appointed by, and responsible to, the Governor";

(B) in the second sentence of subsection (a)(1) by striking all beginning with "consist" through the end period and inserting "consists of representatives of public education; public and private sector employment; recognized State labor organizations; private, voluntary, and community-based literacy organizations and the chief administrative officer of a State, or the designee of such persons, from each of the following State agencies:

"(A) the State education agency;

"(B) the State job training agency;

"(C) the State human services agency;

"(D) the State public assistance agencies;

"(E) the State library program; and

"(F) the State economic development agencies.

The Council shall also include officers of the State government whose agencies provide funding for literacy services or who may be designated by the Governor or the Chairperson of the Council to serve whenever matters within the jurisdiction of the agency headed by such an officer are to be considered by the Council.";

(C) by striking the first sentence of subsection (d) and inserting "The Governor's senior advisor on literacy shall serve as chairperson of the Council. One member more than one half of the members on the Council shall constitute a quorum for the purpose of transmitting recommendations and proposals to the Governor, but a lesser number of members may constitute a quorum for the other purposes.";

(D) in subsection (d) by inserting the following new sentence after the first sentence: "The State advisory council shall meet at least 4 times each year."; and

(E) in subsection (f) by—

(i) redesignating paragraphs (2) and (3) as paragraphs (9) and (10), respectively;

(ii) inserting after paragraph (1) the following new paragraphs:

"(2) review and comment on the plan submitted pursuant to section 354(d)(2) and submit such comments to the Secretary;

"(3) set specific and measurable goals for the State effort in the long-term education of illiterate adults, children, and their families that are consistent with the Federal effort so that all appropriate State agencies have specific objectives and strategies for meeting such goals and there is a comprehensive approach to achieving such goals;

"(4) track progress on meeting the goals and objectives set forth in paragraph (3);

"(5) coordinate and monitor initiatives to—

"(A) facilitate the elimination of illiteracy, and

"(B) integrate the resources of literacy programs across various departments or agencies of the State government;

"(6) disseminate information on State, local, and private sector literacy efforts;

"(7) recommend policies for establishing model systems for implementing and coordinating State literacy programs which can be replicated at the local level; and

"(8) implement reporting requirements, standards for outcomes, performance measures, and program effectiveness in State programs, that are consistent with those proposed by the National Literacy 2000 Federal Interagency Council;"; and

(iii) in paragraph (9) (as redesignated in clause (i)) by inserting "the Governor and" after "advise".

(d) STATE PLAN.—Section 342(c) of the Adult Education Act, is amended—

(1) by striking "and" at the end of paragraph (12);

(2) by striking the period at the end of paragraph (13) and inserting in lieu thereof a semicolon; and

(3) by adding at the end thereof the following new paragraphs:

"(14) report the amount of administrative funds spent on program improvements; and

"(15) contain assurances that financial assistance provided pursuant to this title shall be used to assist and expand existing programs, and to develop new programs for adults whose lack of basic skills—

"(A) renders such adults unemployable;

"(B) keeps employed or unemployed adults from functioning independently in society; and

"(C) severely reduces the ability of such adults to positively impact the literacy of their children.".

(e) TEACHER TRAINING.—(1) Section 353(a) of the Act is amended by—

(A) striking "and" at the end of paragraph (1)(B);

(B) striking the period at the end of paragraph (2) and inserting a semicolon and "and";

(C) inserting at the end thereof the following new paragraph (3):

"(3) training professional teachers, volunteers, and administrators, with particular emphasis on training—

"(A) full-time professional adult educators;

"(B) minority adult educators;

"(C) limited English proficiency adult educators; and

"(D) teachers to recognize and more effectively serve illiterate individuals with learning disabilities, and with a reading ability below the fifth grade level.";

(4) redesignating subsection (b) as subsection (c); and

(5) inserting the following new subsection (b) after subsection (a):

"(b) SPECIAL RULE.—If the amount allotted to a State in any fiscal year exceeds the amount allotted to such State in fiscal year 1990, 15 percent of such excess shall be used to carry out the training described in subsection (a)(3).".

(2) Section 353 of the Act is amended—

(A) in subsection (a) by striking "10" and inserting "15"; and

(B) by amending subsection (b) to read as follows:

"(b) SPECIAL RULE.—At least 7.5 percent of the 15 percent reserved pursuant to subsection (a) shall be used to carry out the provisions of paragraphs (2) and (3) of subsection (a).".

(3)(A) The amendments made by paragraph (1) shall take effect on the date of enactment of this Act.

(B) The amendments made by paragraph (2) shall take effect at the beginning of the first fiscal year in which the amount appropriated to carry out the provisions of part B of the Adult Education Act exceeds $200,000,000 and each fiscal year thereafter.

(f) BUSINESS, INDUSTRY, LABOR, AND EDUCATION PARTNERSHIPS FOR WORKPLACE LITERACY.—Section 371 of the Adult Education Act is amended—

(1) in subsection (a)(1) by inserting ", in consultation with the Secretary of Labor and the Administrator of the Small Business Administration," after "Secretary";

(2) in subsection (a)(4) by redesignating subparagraphs (C), (D), and (E), as subparagraphs (D), (E), and (F), respectively, and inserting after subparagraph (B) the following:

"(C) for fiscal year 1991 and each succeeding fiscal year, contain assurances that not more than 15 percent of the funds received pursuant to this section shall be used for professional teacher or volunteer training (including training regarding the identification and teaching of learning disabled individuals) or technical assistance (including technical assistance in implementing programs);";

(3) by inserting the following new paragraph at the end of subsection (a):

"(5) In awarding grants under this section, the Secretary shall give priority to applications from partnerships which include small businesses."; and

(4) in subsection (c) by striking paragraph (1) and inserting in lieu thereof the following:

"(1) There are authorized to be appropriated $50,000,000 for fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992 and 1993 to carry out the provisions of this section.".

SEC. 204. TARGETED ASSISTANCE.

Section 1531(b) of the Elementary and Secondary Education Act of 1965 is amended by—

(1) redesignating paragraphs (5) and (6) as paragraphs (6) and (7), respectively; and

(2) inserting the following new paragraph (5) after paragraph (4):

"(5) programs of training to enhance the ability of teachers and school counselors to identify, particularly in the early grades, students with reading and related problems which place such students at risk for illiteracy in their adult years;".

SEC. 205. GAO STUDY.

The Comptroller General of the United States shall update the 1975 study entitled "The Adult Basic Education Program: Progress in Reducing Illiteracy and Improvements Needed" within 18 months of the date of enactment of this Act.

TITLE III—FAMILIES FOR LITERACY

SEC. 301. SHORT TITLE.

This title may be cited as the "Families for Literacy Act of 1989".

SEC. 302. STATEMENT OF PURPOSE.

The purpose of this title is to break the intergenerational cycle of illiteracy by improving the parenting and basic skills of adults in order to—

(1) foster learning among the children of illiterate adults;

(2) foster family-oriented approaches to reducing illiteracy; and

(3) address illiteracy through the social environment in which children are born and raised.

SEC. 303. EVEN START.

Section 1059 of the Elementary and Secondary Education Act is amended to read as follows:

"SEC. 1059. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated $60,000,000 for the fiscal year 1991, and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995 to carry out the provisions of this part.".

SEC. 304. FAMILIES FOR LITERACY PROGRAM.

(a) PURPOSE.—The purpose of this section is to provide assistance to nonprofit entities, or consortia of businesses, nonprofit entities, and local educational agencies to initiate education programs and services for children aged 3 and under and their parents to enhance the early literacy developmental process of such children, particularly targeting functionally illiterate parents and their children to enhance the literacy building capabilities of such parents and their children.

(b) GRANTS AUTHORIZED.—(1) The Secretary is authorized, in accordance with the provisions of this section, to make a total of 10 demonstration grants to nonprofit entities, or consortia of businesses (including small business), nonprofit entities, local educational agencies, and other public agencies to pay 80 percent of the cost of establishing intergenerational learning programs and services for children aged 3 and under and their parents, in order to monitor, and improve the early developmental progress of the children, especially in literacy developmental skills.

(2) In awarding grants under this section, the Secretary shall give priority to applicants whose programs serve hard-to-serve populations, including—

(A) teenaged parents;

(B) illiterate parents;

(C) economically disadvantaged parents;

(D) offenders and their families;

(E) unemployed parents;

(F) learning disabled parents; and

(G) non-English speaking parents.

(c) APPLICATION.—Each nonprofit entity, or consortia of businesses, nonprofit entities, local educational agencies, or other public agencies desiring a demonstration grant under this section shall submit an application to the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary may reasonably require. Each such application shall—

(1) describe the activities and services for which assistance is sought; and

(2) contain such information and assurances as the Secretary may require to ensure compliance with the requirements of this section.

(d) STAFF TEAMS.—(1) Each nonprofit entity, or consortia of businesses, nonprofit entities, and local educational agencies receiving assistance pursuant to this part shall employ and train staff teams of early childhood educators, literacy educators or parent educators to provide—

(A) literacy education for adults;

(B) parenting education for adults;

(C) screening for language disorders and learning disabilities;

(D) prereading and other developmental skills for children aged 3 and under;

(E) structured time for parents to use newly acquired skills with their children; and

(F) referral services for families, including referrals for drug rehabilitation, counseling, or assessment and remediation of learning disabilities.

(2) Each nonprofit entity or consortia of businesses, nonprofit entities, local educational agencies, or other public agencies receiving assistance pursuant to this section shall employ, select, and provide training for, staff teams on the basis of—

(A) experience in working with children and families;

(B) a degree in special education or learning disabilities;

(C) a bachelor's degree in child development, psychology, or education;

(D) experience in social work, child care, pediatrics, family counseling; and

(E) experience in teaching reading.

(e) COMMUNITY ADVISORY COUNCILS.—(1) Each nonprofit entity, or consortia of businesses, nonprofit entities, parents, local educational agencies, and other public agencies which receives a grant under this section shall establish community advisory councils to provide—

(A) outreach services, including outreach services to non-English speaking parents,

(B) notification to local family courts of the existence of the Families for Literacy Program,

(C) family referral services,

(D) public relations services, and

(E) recruiting drives.

(2) The community advisory council established under paragraph (1), shall hire staff as well as utilize volunteers. Volunteers may refer individuals into the Families for Literacy Program and from the Families for Literacy Program into services such as—

(A) the Special Supplemental Food Program for Women, Infants, and Children;

(B) well-baby clinics;

(C) literacy programs;

(D) speech, language, and hearing specialists;

(E) learning disabilities specialists; and

(F) child abuse services.

(f) NON-FEDERAL SHARE.—(1) The portion of the costs described in subsection (b) that are not paid from a grant provided under this section may be paid in cash or in kind fairly evaluated, including equipment or services.

(2) Each nonprofit entity, or consortia of businesses, nonprofit entities, and local educational agencies receiving assistance pursuant to this Act may use funds received under chapter 2 of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 to pay the portion of the costs described in subsection (b) that are not paid from a grant provided under this section.

(g) DEFINITIONS.—As used in this section—

(1) The term "local educational agency" has the same meaning given that term in section 1471 of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Act of 1988.

(2) The term "parent" includes a legal guardian or other person standing in loco parentis.

(3) The term "family" includes all primary child care givers in addition to parents.

(h) FAMILY LITERACY PUBLIC BROADCASTING PROGRAM.—(1) The Secretary is authorized to enter into a contract with the Corporation for Public Broadcasting to arrange for the production and dissemination of family literacy programming and accompanying materials which would assist parents in improving family literacy skills and language development. In producing and developing such programming, the Corporation for Public Broadcasting shall work in cooperation with local public broadcasting stations to avoid duplication of efforts.

(2) After the program described in paragraph (1) is produced, the Corporation for Public Broadcasting shall arrange to have audio and video instructional media materials for distribution at sites chosen from among—

(A) State and local libraries operating literacy programs, and

(B) nonprofit entities serving hard-to-serve populations as defined in section 304(b)(2), including community-based organizations, volunteer organizations and other nongovernmental entities.

(3) The audio and video instructional media materials described in paragraph (2) shall be used at sites described in paragraph (2), and on a loan basis, distributed to families.

(4) One year after distribution of the audio and video instructional media materials, the Corporation for Public Broadcasting shall report to the Congress on the distribution and use of the audio and video instructional media materials produced pursuant to this subsection and such audio and video instructional media materials' contribution in promoting literacy.

(i) AUTHORIZATION OF APPROPRIATIONS.—(1) Except as provided in paragraph (2), and for the first fiscal year in which the amount appropriated for section 1059 of the Elementary and Secondary Education Act of 1965 exceeds $30,000,000 and each fiscal year thereafter, there are authorized to be appropriated $10,000,000 for fiscal year 1991 and such sums as may be necessary in each of fiscal years 1992, 1993, 1994 and 1995 to carry out the provisions of this section.

(2) There are authorized to be appropriated $2,000,000 for fiscal year 1991 to carry out the provisions of subsection (h), of which $100,000 shall be reserved for reproducing and distributing programming or audio and video instructional media materials.

TITLE IV—BOOKS FOR FAMILIES

SEC. 401. SHORT TITLE.

This title may be cited as the "Books for Families Literacy Act of 1989".

SEC. 402. STATEMENT OF PURPOSE.

It is the purpose of this title to enhance the capacity of State and local public libraries to combat illiteracy and to improve the quality of public literacy services as such services relate to overcoming the condition of illiteracy in the Nation.

SEC. 403. INEXPENSIVE BOOK DISTRIBUTION PROGRAM.

(a) PRIORITY.—Section 1563(b) of the Elementary and Secondary Education Act of 1965 is amended by—

(1) striking "and" at the end of paragraph (2);

(2) by redesignating paragraph (3) as paragraph (4); and

(3) by adding the following new paragraph after paragraph (2):

"(3) beginning in fiscal year 1991 and each fiscal year thereafter, the contractor will give priority in the selection of additional local programs to programs and projects which serve children and students with special needs including, but not limited to—

"(A) low-income children (particularly such children in high poverty areas);

"(B) children 'at-risk';

"(C) disabled children;

"(D) emotionally disturbed children;

"(E) foster children;

"(F) homeless children;

"(G) migrant children;

"(H) children without access to libraries;

"(I) institutionalized or incarcerated children; and

"(J) children whose parents are institutionalized or incarcerated; and".

(b) STUDY.—The Contractor shall report to the Department of Education annually regarding the number and description of the additional programs funded under subsection 1563(a)(3) of the Elementary and Secondary Education Act of 1965.

SEC. 404. LIBRARY LITERACY PROGRAMS.

(a) AUTHORIZATION OF APPROPRIATIONS.—Section 4(a) of the Library Services and Construction Act is amended by—

(1) striking "and" after paragraph (4);

(2) striking the period at the end of paragraph (5) and inserting a semicolon; and

(3) inserting after paragraph (5) the following new paragraphs (6) and (7):

"(6) for the purpose of making grants as provided in section 602 there are authorized to be appropriated $2,000,000 for fiscal year 1991 and such sums as may be necessary for each of the succeeding fiscal years 1992, 1993, 1994, and 1995; and

"(7) for the purpose of making grants as provided in section 603, there are authorized to be appropriated $2,000,000 for fiscal year 1991 and such sums as may be necessary for each of the fiscal years 1992, 1993, 1994, and 1995.".

(b) BOOKS, TAPES, AND COMPUTER SOFTWARE.—Section 601(c)(2) of the Library Services Construction Act is amended by inserting after "programs" a comma and "including books, tapes, and computer software".

(c) PRIORITY.—Section 601 of the Library Services Construction Act is amended by inserting at the end thereof the following new subsection:

"(f) In awarding grants under this section the Secretary shall give priority to programs and services which—

"(1) will be delivered in areas of greatest need which have highest concentrations of adults who do not have a secondary education or its equivalent, and which—

"(A) have few community or financial resources to establish the program described under this section without Federal assistance, or

"(B) have low per capita income, unemployment or underemployment; and

"(2) coordinate with literacy organizations and community based organizations providing literacy services.".

SEC. 405. STATE AND LOCAL PUBLIC LIBRARY GRANTS.

Title VI of the Library Services Construction Act is amended by inserting the following new sections at the end thereof:

"SEC. 602. MODEL LIBRARY LITERACY CENTERS.

"(a) STATEMENT OF PURPOSE.—It is the purpose of this section to provide for a library literacy demonstration grant program to help overcome illiteracy throughout the Nation by establishing model library literacy centers with resources and facilities to assist those in need of literacy training and access to reading materials.

"(b) GRANTS AUTHORIZED.—(1) The Secretary is authorized to carry out a program of grants to State and local public libraries to establish exemplary model programs.

"(2) Grants made pursuant to this section may not exceed $200,000 in any fiscal year.

"(3) Each State or local public library receiving assistance pursuant to this section may receive 1 grant per fiscal year for a maximum of 5 fiscal years.

"(4) The Secretary may reserve 2 percent of the funds appropriated pursuant to the authority of section 4(a)(6) for the administrative costs of the grant program set forth in this section.

"(5) The Secretary shall select an expert in library literacy activities to administer the grant program set forth in this section.

"(c) APPLICATION.—(1) Each State or local public library desiring a grant under this section shall submit an application at such time, in such manner, and accompanied by such information as the Secretary may reasonably require. Each such application shall—

"(A) describe the activities and services for which assistance is sought;

"(B) describe an innovative approach to public library literacy activities;

"(C) substantiate the potential as to how the library profession will benefit from the demonstration grant and the national significance of the demonstration grant;

"(D) provide a detailed description of how the demonstration grant will impact on illiteracy within the applicant's community;

"(E) set forth any special evidence for the need for such a demonstration grant;

"(F) describe how the results of the demonstration grant will be evaluated and disseminated;

"(G) indicate the potential of the demonstration grant for achieving replicability and for serving as a viable model; and

"(H) provide evidence that the demonstration grant—

"(i) was developed in consultation with the State library agency and with leading experts in adult literacy, and

"(ii) takes into account literacy research.

"(2) The Secretary, in consultation with the peer review panel established pursuant to subsection (d), shall develop regulations regarding the criteria for awarding grants and approving applications under this section.

"(d) PEER REVIEW PANEL.—The Secretary shall establish a peer review panel to assist the Secretary in establishing criteria for awarding grants and approving applications under this section. The Secretary may appoint such technical experts and consultants to the peer review panel as may be useful in carrying out the functions of the peer review panel.

"SEC. 603. INEXPENSIVE BOOK DISTRIBUTION PROGRAM.

"(a) IN GENERAL.—The Secretary is authorized to contract with Reading is Fundamental, a private nonprofit organization which motivates children to learn to read, to support and promote the establishment of reading motivation programs which include the distribution of inexpensive books. Such contract shall give priority to programs and projects which target rural and urban areas with large concentrations of economically disadvantaged children and students.

"(b) USE OF FUNDS.—The contract authorized pursuant to subsection (a) shall provide that Reading is Fundamental use the funds provided pursuant to this title to—

"(1) increase access to children's books for parents, with priority being given to parents of newborns through children aged 5; and

"(2) develop motivational materials to reach parents most disconnected from the education community, by making children's books available in such places as welfare offices, health facilities, homeless shelters, migrant labor facilities, public housing developments, and local offices which administer the Supplemental Food Program established pursuant to section 17 of the Child Nutrition Act of 1966.".

TITLE V—STUDENTS FOR LITERACY

SEC. 501. SHORT TITLE.

This title may be cited as the "Students for Literacy Act of 1989".

SEC. 502. STATEMENT OF PURPOSE.

It is the purpose of this title to promote the development, location, and placement of community service jobs for students in the area of literacy tutoring, outreach, and training under the Work-Study Programs set forth in part C of title IV of the Higher Education Act of 1965.

SEC. 503. STUDENT LITERACY CORPS.

Section 146 of the Higher Education Act of 1965 is amended to read as follows:

"SEC. 146. AUTHORIZATION OF APPROPRIATIONS.

"There are authorized to be appropriated to carry out the provisions of this part $11,000,000 for fiscal year 1991.".

SEC. 504. WORK-STUDY PROGRAMS.

(a) AUTHORIZATION OF APPROPRIATIONS.—Section 441(b) of the Higher Education Act of 1965 is amended to read as follows:

"(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this part $656,000,000 for fiscal year 1991.".

(b) CONTENTS OF AGREEMENT.—Section 443(b) of the Higher Education Act is amended—

(1) in paragraph (2)(A) by inserting after the comma the following: "except that the provisions of this subparagraph shall not apply to literacy training programs pursuant to section 447(b)(2)"; and

(2) in paragraph (5) by—

(A) striking "and" at the end of subparagraph (A);

(B) inserting "and" at the end of subparagraph (B); and

(C) inserting the following new subparagraph at the end thereof:

"(C) the Federal share of the compensation of students employed in the literacy work-study training programs described in section 447(b)(2) shall be 100 percent;".

(c) JOB LOCATION AND DEVELOPMENT PROGRAMS.—Section 446(a) of the Higher Education Act is amended by inserting the following new paragraph at the end thereof:

"(3) The provisions of paragraph (1)(B) shall not apply to institutions of higher education which enter into agreements with the Secretary to use funds allocated pursuant to section 442 for the creation and placement of literacy related positions for students, including students working with existing local literacy organizations.".

TITLE VI—VOLUNTEERS FOR LITERACY

SEC. 601. SHORT TITLE.

This title may be cited as the "Volunteers for Literacy Act of 1989".

SEC. 602. STATEMENT OF PURPOSE.

It is the purpose of this title to develop, strengthen, supplement, and expand the capacity of both public and private agencies and organizations to combat illiteracy through the use of volunteers.

SEC. 603. UNIVERSITY YEAR FOR LITERACY.

Part B of title I of the Domestic Volunteer Service Act of 1973 (hereafter in this title referred to as the "Act") is amended by inserting after section 114 the following new section:

"UNIVERSITY YEAR FOR LITERACY

"SEC. 115. (a) Pursuant to the authority and conditions in sections 112 and 113, the Director shall make grants and contracts for, or both, a program of full-time volunteer service to be known as University Year for Literacy. The purpose of the program shall be to establish and support innovative ways to use full-time students enrolled in institutions of higher education as volunteers in addressing and solving the broad range of problems facing illiterate and functionally illiterate individuals, and in providing assistance to organizations involved in combating illiteracy and the problems of illiterate individuals.

"(b) In recruiting University Year for Literacy volunteers, priority shall be given to individuals pursuing a course of study that is related to, or likely to lead to, a career in a field related to addressing the problem of illiteracy.".

SEC. 604. LITERACY CHALLENGE GRANTS.

Part C of title I of the Act is amended by adding at the end thereof the following new section:

"LITERACY CHALLENGE GRANTS

"SEC. 125. (a) The Director is authorized to award challenge grants to eligible public agencies and private organizations to pay the Federal share of the costs of establishing, operating or expanding community or employee literacy programs or projects that include the use of full-time or part-time volunteers as one method of addressing illiteracy.

"(b) Each eligible organization desiring a grant under this section shall submit to the ACTION Agency an application in such form and accompanied by such information as the Director may reasonably require. Each such application shall—

"(1) describe the activities for which assistance is sought,

"(2) contain assurances that the eligible organization will provide from non-Federal sources the non-Federal share of the cost of the program or project,

"(3) provide assurances, satisfactory to the Director, that the literacy project will be operated in cooperation with other public and private agencies and organizations interested in, and qualified to, combat illiteracy in the community where the project is to be conducted, and

"(4) contain such other information and assurances as the Director may reasonably require.

"(c)(1)(A) The Federal share of the cost of a program or project authorized by this section administered by a public agency, a nonprofit organization other than an organization described in paragraph (2), or a private, for-profit organization shall not exceed—

"(i) 80 percent in the first fiscal year;

"(ii) 70 percent in the second fiscal year; and

"(iii) 60 percent in the third fiscal year.

"(B) The non-Federal share paid by a private, for-profit organization shall be in cash.

"(2) The Federal share of the cost of a program or project administered by a nonprofit community-based organization shall not exceed—

"(A) 90 percent in the first fiscal year;

"(B) 80 percent in the second fiscal year; and

"(C) 70 percent in the third fiscal year.

"(3) The non-Federal share provided by a public agency or a nonprofit organization may be provided in cash, or in kind, fairly evaluated, and may include the use of plant, equipment, and services.".

SEC. 605. AUTHORIZATION OF APPROPRIATIONS.

(a) PART B OF TITLE I.—Section 501(b) of the Act is amended by—

(1) inserting "(1)" after the subsection designation; and

(2) inserting at the end thereof the following new paragraphs:

"(2) Except as provided in paragraph 3 and in addition to the amount authorized to be appropriated in paragraph (1), there is authorized to be appropriated $3,000,000 in each of the fiscal years 1991, 1992, and 1993 to carry out the provisions of section 115(a).

"(3) No funds shall be appropriated pursuant to paragraph (2) in any fiscal year unless—

"(A) the funds available in such fiscal year for the VISTA Program under part A of title I are sufficient to provide the years of volunteer service specified for such fiscal year under section 501(d)(1) for the VISTA Program; and

"(B) the funds available in such fiscal year for the VISTA Literacy Corps under part A of title I are sufficient to provide at least the same years of volunteer service as were provided in the fiscal year preceding such fiscal year.".

(b) PART C OF TITLE I.—Section 501(c) of the Act is amended by—

(1) inserting "(1)" after the subsection designation; and

(2) inserting at the end thereof the following new paragraph:

"(2) Except as provided in paragraph (3) and in addition to the amounts authorized to be appropriated pursuant to paragraph (1) there is authorized to be appropriated $5,000,000 for fiscal year 1991, $7,000,000 for fiscal year 1992, and $10,000,000 for fiscal year 1993 for Literacy Challenge Grants under section 125.

"(3) No funds shall be appropriated pursuant to paragraph (2) in any fiscal year unless—

"(A) the funds available in such fiscal year for the VISTA Program under part A of title I are sufficient to provide the years of volunteer service specified for such fiscal year under section 501(d)(1) for the VISTA Program; and

"(B) the funds available in such fiscal year for the VISTA Literacy Corps under part A of title I are sufficient to provide at least the same years of volunteer service as were provided in the fiscal year preceding such fiscal year.".

SEC. 606. TECHNICAL AMENDMENT.

(a) IN GENERAL.—Section 2 of Public Law 81-874 is amended by inserting at the end thereof the following new subsection (d):

"(d) The United States shall be deemed to own Federal property, for the purposes of this Act where—

"(1) prior to the transfer of Federal property, the United States owned Federal property meeting the requirements of subparagraphs (A), (B), and (C) of subsection (a)(1); and

"(2) the United States transfers a portion of the property referred to in paragraph (1) to another non-taxable entity, and the United States—

"(A) restricts some or any construction on such property;

"(B) requires that the property be used in perpetuity for the public purposes for which it was conveyed;

"(C) requires the grantee of the property to report to the Federal government (or its agent) setting forth information on the use of the property;

"(D) prohibits the sale, lease assignment or other disposal of the property unless to another eligible government agency and with the approval of the Federal government (or its agent); and

"(E) reserves to the Federal government a right of reversion at any time the Federal government (or its agent) deems it necessary for the National Defense.".

(b) EFFECTIVE DATE.—The amendments made by this section shall take effect on October 1, 1989.

The PRESIDENT pro tempore. Under the order, amendments are limited to those which are set forth on page 2 of the Calendar of Business. There is no time agreement on the bill or on amendments thereto.

The Senator from Illinois [Mr. SIMON] is recognized.

Mr. SIMON. Mr. President, I rise in strong support of this legislation, and I am pleased to say I think we are about to make a very significant step forward for this Nation.

If this bill passes and becomes law, and I am optimistic it will, for the first time in the Nation's history we will say we have a goal of eliminating illiteracy. And we spell out specific steps to get there.

For the first time, we are going to have a coordinated approach. Up to this point we have had the Secretary of Education talking about it, along with the Secretary of Labor and the Secretary of HHS, but we have not had a coordinated approach to what is happening.

We will have a comprehensive look at the problem and what we should do about it. And we will have specific goals. And, if we follow through on these specific goals, then we can, for all practical purposes, by the end of this decade eliminate illiteracy in this country. That would be of inestimable help to our economy.

Unless we were to produce a bill this year that would really aggressively move on the deficit—and I think that is not likely, real candidly—this bill will probably have more to do with lifting the economy of this Nation than any bill we are going to pass this year.

Surprisingly, for reasons I will spell out in a few minutes, I think it probably will have more to do with fighting drugs than any bill that we will have up this year.

Let me tell my colleagues how I got involved in this. When I was a Member of the House, I had open office hours where people could come in one at a time with whatever problem they had. And, as my colleagues know, when people have a Federal problem on Social Security or black lung or something like that, they have to sign a consent form. So people would come in and I would hand them the consent form.

And they would say, "Is it OK if my wife signs?" "Is it OK if my husband signs?"

Gradually, even as dense as I am, Mr. President, I understood, they could not read and write even their own name.

Then I had people occasionally who very carefully drew their name. And I knew it was the only thing they could write.

And then, because I am in an area a little bit like West Virginia, where I live down in the southern part of the State, with high unemployment, when people came in desperate for a job the first question I asked was, "Can you read and write?"

And when there was that awkward moment of silence, I knew what the answer was going to be. So I held hearings, the first hearings in the history of Congress over in the House on this question of illiteracy.

The Secretary of Education, Ted Bell, was my first witness. He has written, even though he was Secretary of Education, he really had not paid attention to the problem of illiteracy until he was asked to testify.

As a result of those hearings, we had a series of small breakfast meetings. One of the people who came to those small breakfast meetings, talking about the problem of illiteracy, was Barbara Bush. I think the whole Nation now—we are all Barbara Bush fans. But let me tell my colleague, I became a Barbara Bush fan long before she became First Lady. She was there attending those literacy meetings when there was no political advantage in doing it. She is just a genuinely good-hearted person.

As a result of those meetings, we have had a series of small Band-aids. I was able to get, with the help of a lot of people, $5 million in the Library Services and Construction Act for illiteracy. Because people who cannot read and write hide it, they will not walk into a grade school or a high school. They will walk into a library.

The College Work/Study Program, we got some money on. The Vista Literacy Corps, I was able to get that set up. Let me pay tribute to a former colleague here in this body, Senator Paula Hawkins, who was very helpful on that, as well as Judy Wagner from my staff, who was very helpful.

We were able to get some money for the homeless. But we have had Band-aids up to this time.

What is the problem? Twenty-three million functionally illiterate adult Americans, at least 4 million of whom cannot read or write a thing.

There is a difference of opinion exactly what is functionally illiterate. But it means basically you cannot read or write above the second, third, or fourth-grade level. It has caused high welfare rates. A very high percentage of those who are on welfare are functionally illiterate.

It is causing problems of unemployment. Roughly three-fourths of those who are unemployed beyond 2 or 3 weeks are functionally illiterate.

After World War II, the average worker could get by with fourth-grade skills. Today it is ninth-grade skills for the average worker, and it is going up.

The work force today is composed 18 percent of minorities. By the end of this century, which is not very far off now, it is going to be 29 percent.

When we look at those who are functionally illiterate and look at our dropout rates for those who are functionally illiterate, an estimated 44 percent are black Americans and about 56 percent are Hispanic Americans.

Part of that, obviously, is the inadequate schools and inadequate school opportunities that people have. We have to make sure that those opportunities are there.

But we cannot just give up on people who have emerged from our schools. We are going to have to help.

Just 2 weeks ago, the chief executive officer of Helene Curtis, a major corporation in Chicago employing 2,000 people, came to me and said, "I understand you are interested in this whole field of literacy." She said, "I am spending too much money on training my employees in basic skills."

The New York Telephone Co. tested 60,000 people in order to get 3,000 who could come to work for them at entry level jobs.

Chemical Bank in New York City has to test 40 people in order to get one who could be a bank teller.

IBM had 280 people in their New York State plant who signed up for free college, but only 30 had high school-level skills. On the whole employment thing, about 6 or 8 weeks ago, NIH reported to the Labor and Human Resources Committee—Senator KENNEDY chairs that committee—and they came in with who is using drugs by ethnic group and by age group.

The interesting thing is the group that is by far the highest in the consumption of drugs are the unemployed. I said to the director, "You mean if we move on the problem of unemployment, we are moving on the problem of drug use?" He said, "No question about it."

How do we move on the problem of unemployment? There are a variety of answers, but one is clearly to teach people how to read and write.

We have the whole problem of crime. Fifty-eight percent of juvenile delinquents have inadequate reading skills. Seventy-five percent of adult prison inmates are functionally illiterate. Eighty percent of prison inmates are high school dropouts. The only criticism I have heard of this legislation is we ought to be concentrating on our schools and prevent dropouts. We should not be dealing with the problem of adult illiteracy.

The answer is you cannot really do the job in our schools if we do not also deal with our parents. Listen to this Barbara Bush quote: "The home is the child's first school. The parent is the child's first teacher. We all know that adults who have problems with literacy tend to raise children who have problems with literacy."

Just no question about it. We have to face up to learning disabilities. Seventeen percent of high school graduates, believe it or not—and this is another indication of some of the problems that we have—are functionally illiterate.

What about those who are not high school graduates? We have 600,000 to 700,000 who drop out of school each year. Are we just going to forget about them? I do not think we dare do that.

There is a huge harm to this economy. It holds back the growth in our economy when we have people who do not read and write. There is a huge harm to the individuals. We have these cases, such as one woman who could not read the label "poison" on a bottle and accidentally gave poison to one of her children. Now that is not a huge national statistic, but what a tragedy for that family.

Lack of self-respect that people have is another thing, but one of the reasons I am pleased this bill is here is because illiteracy is a hidden problem. The only thing I can compare it to, Mr. President—and you will forgive me, you are old enough, along with me, to recall these days. Obviously, Senator REID and Senator KASSEBAUM and Senator BOND are far too young to remember these days here, but you are old enough to remember when those who had mentally retarded in their families basically hid those who were retarded. It was a closet problem. Finally, it has emerged and people are no longer ashamed of having mentally retarded in the family, and we are a richer nation. Mentally retarded young people and older people are being worked into our society, and we are much better off.

The same is true on this problem. Once we open it up and encourage people to come out, we are going to be much better off.

What does this bill do? It calls for coordination and specific goals at the Cabinet level. The Secretary of Education is to head it. We have specific goals to write out, and then we are going to find out whether we are meeting those goals. The goal ought to be to eliminate illiteracy in this country by the year 2000. It would establish a National Center for Literacy where we can do research and find out what is going on.

Second, we encourage State participation. Let me just add, this whole bill contemplates a partnership arrangement with State governments, with the private sector, with voluntary groups, State centers and State illiteracy councils. It has families for literacy portions, so we get whole families involved in this. Let me add, we need communities involved, not just some Government entity. We need the news media. ABC, for example, has done some excellent work. One of the Houston newspapers has done some excellent work. The bill calls for the Corporation for Public Broadcasting to do some film aids in this area. It expands the Students for Literacy Program. It has a Volunteers for Literacy Program. It expands the VISTA Program here.

Let me give you this quote from Mayor Wilson Goode, of Philadelphia:

> We have trained more than 6,000 volunteers to tutor on a 1-to-1 basis utilizing the largest number of VISTA volunteers in the Nation.

That sounds great, 6,000, and they have done more than any other city. Six thousand in Philadelphia is more than a drop in the bucket, but is a long way from where we ought to be, but that is part of it.

There are other specifics I will be happy to get into if anyone has any questions. It came out of committee with a unanimous vote. We have 34 cosponsors.

Let me, in closing, tell you about four people. I want to read this article by Edward Husar, for the RECORD, in the Quincy Herald-Whig. It says:

> Clifton Anders, a bagger at the Kroger store in Quincy has a dream.
>
> He wants to learn how to operate a cash register so he can work as a "checker" in one of the supermarket's check-out lanes. As a checker, he can earn a lot more money than he can as a bagger.
>
> But Anders knows he must be able to read before he can get such a job.
>
> At 29, he's trying his best.
>
> For the past eight months, Anders has been working with a volunteer tutor so he can finally—after all these years—learn how to read.
>
> Anders, the father of two, is making great headway in his efforts to read. Not long ago, he learned enough about reading to pass his driver's license test for the first time. And he sees even more doors opening up in the future.
>
> "Maybe some day soon I'll be ready to put my feet behind the register," Anders smiled Friday as he shared his dream. . . .
>
> "I'm so happy I got into the literacy program," he said.
>
> "I felt real shut out when I went places and has to read."
>
> What a change in the life of Clifton Anders! Multiply that times millions, and you understand what a change that could mean in the cultural and economic life of the nation. And you can be sure those two Anders childen are being taught to read—a long-term payoff for them and for the nation.

I do not know the end of that story, but I know this. He has two children and those two children are going to have a much better chance because of this.

Let me tell you about Gloria Wattles. Gloria Wattles is a witness known to Senator KASSEBAUM. I was at a town meeting in Teutopolis, IL, a town of 750 people. This woman got up and said, "I have never spoken in front of a group like this before." She was obviously nervous, and she said, "I'm 45 years old; I want to read to you the first letter I have ever written." And she read this letter thanking me for my involvement in the literacy program, saying how she has learned to read and write. It kind of told her life story. Halfway through reading this letter, which was her life story, she was crying, and she had half the town hall meeting crying. When she finished, I said to her, "Gloria, would you be willing to come to Washington and testify?" She said, "I would."

She came and testified. I hope Senator KASSEBAUM will not object to my relating that when she finished testifying, Senator KASSEBAUM said to me, "I know I'm a Senator, I'm not supposed to cry, but I couldn't help it when Gloria Wattles told her stroy."

It was just marvelous. Gloria Wattles, is living a new life. She is now helping others to learn how to read and write.

Let me tell you a story about someone where the story does not have an entirely happy ending, unfortunately.

We learned about Dexter Manley, who played football for the Washington Redskins. Dexter Manley was standing on the sidelines when Joe Thiesmann, the quarterback for the Redskins, broke his leg. Dexter Manley was making $600,000 a year. He asked, "What would happen to me if I broke my leg?"

He took an unusual step. He called a Washington school and said, "I need help." Very few people who cannot read and write, frankly, have such courage, because it takes a great deal of courage to do that.

They tested him. They found he read at the second grade level. He had been through grade school, high school, and 4 years at Oklahoma State University. It says something about our college athletic programs. They tested him, found out he had a learning disability, and when he testified before us he was reading at the ninth grade level and was studying Japanese.

Now, I wish the story could end there. Unfortunately, it does not. Dexter Manley earlier got involved in drugs and because of that is removed from the National Football League. I cannot help but wonder if Dexter Manley's problem had been diagnosed earlier, would he have ever started on drugs.

Listen to his testimony when he testified before us.

He said:

> I was in the third grade. I was just put in the Special Ed class and I did not want to be in there. And the only thing I can recall is we played with blocks. I stayed there 4 years and there were no programs of any sort to help me learn skills to read and write.
>
> What can I say to those who have a learning disability or are illiterate? It is somehow or other you have to find the will and the courage to come forward and ask for help. For me, the only thing I can say is that I had to humble myself and I had to walk into the Lab School of Washington and not pretend.

Incidentially, I have hope for Dexter Manley. Anyone who has the courage to call and say, "I need help," who has the courage to come and testify before us as he did, I think we can help Dexter Manley and he can help himself.

Finally, let me tell you about Mary Kent Brandon. Mary Kent Brandon lived in the Chicago Housing Authority. Mary Kent Brandon is the mother of 12 and the grandmother of 23. She said, "I had no self respect." She got involved in drugs and alcohol, went to a detoxification center, and they talked about her lack of self respect and they tied it in with her inability to read and write.

She has learned how to read and write. Mary Kent Brandon, believe it or not, is now a counsellor in that same detoxification center. Mary Kent Brandon says with great pride, "I am teaching my grandchildren how to be good students in school." Mary Kent Brandon is now a home owner.

Now, that is not a national statistic about Mary Kent Brandon, but let me tell you it is a marvelous, marvelous story.

What is the cost of all this? We are talking about $229 million for the first year in budget authority, $50 million in outlay. It will go up some after the first year, but it is a fast-payoff kind of approach to a problem. There are other things we have to do like intensify preschool education where the payoff is going to be very, very slow. On this one, the payoff is very fast and it is absolutely critical if this Nation is to achieve its potential.

Let me finally, in closing, Mr. President, express my appreciation to the chairman of the full committee, Senator KENNEDY; the chairman of the subcommittee, Senator PELL; to Senator KASSEBAUM, the ranking member on the subcommittee, who has been very helpful, and let me mention two other members, THAD COCHRAN and JIM JEFFORDS.

I meant to use this illustration earlier. Senator COCHRAN brought us one of the witnesses, a librarian from Sunflower County, MS, a county that is 40 percent in poverty; 43 percent of the

adults have not finished 8th grade. The local library, because of a literacy grant that we were able to give, has trained 80 prisoners at a State prison to become tutors in literary. Now, you can imagine what that does to the self esteem of those prisoners and to others.

Mr. President, as further explanation, S. 1310, the National Literacy Act of 1989. This bill will launch the first major comprehensive and coordinated Federal effort to create, expand and improve the resources available to help the millions of Americans who cannot read.

It is time to bring the illiteracy problem out of the closet and deal with it honestly and effectively. Last year, the Education Summit between the 50 Governors and President Bush resulted in a landmark agreement that national performance goals in education should be developed. President Bush, in his State of the Union address, announced six key education goals upon which he and the Governors have agreed. One of those goals—"Every American adult must be a skilled, literate worker and citizen"—is a simple, but important objective that we should have addressed long ago. Nevertheless, we now have a Presidential commitment toward ending illiteracy in our Nation. With the National Literacy Act, we now have the structure, the strategies and the means to put action behind our words. Indeed, the National Literacy Act provides the foundation needed to mobilize a comprehensive national campaign against illiteracy.

Mr. President, S. 1310 has 34 cosponsors including Senators MITCHELL, KENNEDY, PELL, and KASSEBAUM. I am also pleased to note that S. 1310 was unanimously reported out of the Education Subcommittee and the Committee on Labor and Human Resources. I sincerely appreciate the strong bipartisan support that S. 1310 has received and I plan to continue to work with my colleagues on both sides of the aisle to strengthen that support.

Illiteracy is a great weight that keeps this country and millions of our citizens from reaching their full potential. Illiteracy must be fought at all levels—by the private and public sectors. Strong Federal leadership—a major focus of this bill—is key to making literacy a top national priority, and is needed to mobilize Federal, State and local action.

Until recently, the problems of illiteracy in the United States has been the "hidden" or invisible education problem. Too often, people are too embarrassed to admit that they cannot read to seek help. It is a problem that illuminates the failings of our education system, and the failings of our Nation in general.

People who cannot read cannot do many of the activities that most of us take for granted, such as reading a newspaper, understanding instruction on prescription medicine, getting a driver's license, filling out a job application, or helping kids with their homework. Illiteracy perpetuates the generation-to-generation pattern of too many citizens poorly prepared to help themselves and their children.

In addition to the costs to human potential, illiteracy has economic costs to our society. Some estimate that illiteracy costs over $200 billion annually in lost productivity, crime, accidents, employee errors, and extra training programs. The American Library Association estimates that functionally illiterate adults cost $224 billion annually in welfare payments, crime, job incompetence, lost taxes, and remedial education.

Illiteracy affects everyone. It affects us either directly or indirectly, but it impacts every American and will continue to do so until the problem is addressed. Illiteracy affects us through the taxes we pay to support those who are unemployed due to their inability to read and compete in the job market, or those prisoners who resort to crime because of limited options for legally earning a living. It affects us through increased prices of goods and services when companies must expend resources to train and retrain employees who lack basic skills.

We cannot underestimate the scope of the illiteracy problem. At least 23 million Americans in this country can be considered illiterate according to commonly used estimates. Of these 23 million, an estimated 4 million cannot read at all. Another 45 million adults read with only minimal comprehension. Extremely high rates of illiteracy are reported among the welfare population, the unemployed, drug users, criminals and high school dropouts. It is reported that one-half of all the households that are classified below the poverty level by Federal guidelines cannot read an eighth grade level book.

Regardless of what estimates of illiteracy figures are agreed upon, we do know that the number of illiterate Americans is growing. One reason is the growing number of immigrants and refugees who speak languages other than English. Another reason is the large number of students—600,000 to 700,000—who drop out of high school each year. On an average day, some 3,600 students across the Nation will drop out of school.

A major goal of the National Literacy Act is to improve workforce literacy. The literacy skills of our current and future workforce must be improved if the United States is to remain competitive in domestic and international markets. At a time when many communities are experiencing regional and local labor shortages, greater efforts to provide unemployed persons with critical literacy skills are needed to fill jobs that increasingly go vacant. The media is replete with dramatic examples of the difficulties American businesses are facing today in hiring literate workers.

The New York Telephone Co. had to test 60,000 people on an entry-level exam to hire just 3,000 people. Eighty-four percent of those tested failed the exam.

Chemical Bank in New York must interview 40 applicants to find one applicant who can be trained successfully as a teller.

IBM offered free college-level algebra courses at a New York State plant and 280 workers signed up, but an achievement test revealed that only 30 workers could read and solve math problems at even the high school level.

Chrysler Corp., had to incorporate graphics on its assembly line because so many workers could not read the words "bad hood fit" on the button they were supposed to push when they detected an ill-fitting hood.

The American Society for Training and Development estimates that American businesses now spend about $1 billion a year on basic education in addition to the billions they spend on teaching specific occupational skills. Within a decade that figure is expected to increase at least tenfold.

Clearly, illiteracy is a significant problem in the workplace and among American workers. Without a major expansion in the Federal investment in literacy, too many of these workers will be consigned to dead-end, unskilled jobs with little prospect of increasing their income-earning potential. They will be increasingly vulnerable to market shifts and dislocation due to technological changes.

American jobs are placing greater demands on employees. The average American worker today must have skills at the 9th through 12th grade levels, not the 4th grade level typical after World War II. And the standards keep rising. The growth occupations have increasingly shifted to the service and retail sectors, which require high level problem-solving, communication, reading, writing, and math skills.

By the year 2000, three out of four jobs will require educational training beyond ninth grade. As the threshold for minimum competency levels continues to rise, significant numbers of the current work force will need some type of basic skills training and retraining. Seventy-five percent of the current work force will still be in the work force by the year 2000 and roughly 30 million current workers will need some type of retraining.

Changing demographics suggest that our future work force will rely increasingly on population groups that have disproportionately high rates of illiter-

acy. Women, immigrants, and blacks, Hispanics, Asians, and other races will account for over 80 percent of the work force growth from 1986 to the year 2000. Minorities, especially blacks and Hispanics, and persons with disabilities, dominate the pool of unskilled and increasingly unused labor. It is estimated that 44 percent of black and 56 percent of Hispanic adults are functionally illiterate. The proportion is roughly 16 percent for whites.

Fighting illiteracy is not just an issue of fairness and equity—it is an issue of economics. Our Nation's economic security is directly tied to the quality of the Nation's work force. Over the course of the next decade, some 21 million new labor market entrants, including those from minority groups, will require literacy and basic skills training to enable them to succeed in new jobs. The future growth and prosperity of our economy will be closely linked to our ability to educate and train these individuals.

Another goal of the National Literacy Act is to address the issue of generational or family literacy. The First Lady, Barbara Bush, has been rightfully credited with helping to focus our Nation on the issue of illiteracy. She has repeatedly spoken out on the direct correlation between the educational attainment of parents and their children. She has remarked that:

> The home is the child's first school. The parent is the child's first teacher. Reading is the child's first subject. We all know that adults who have problems with literacy tend to raise children who have problems with literacy.

Parents' academic difficulties are too often passed on to their children. The best indicator for determining who will drop out may be whether a parent was successful in school.

The National Literacy Act also recognizes that illiteracy is correlated with crime; 85 percent of juvenile delinquents have inadequate reading skills; and 75 percent of adult prison inmates are functionally illiterate, and the average person in prison has a third- or fourth-grade reading level.

And American taxpayers pay the price. While it costs only $4,200 a year to send a youth to school, the costs of school failure is much higher if these youth resort to crime and are incarcerated. In fact, it costs $14,000 per year to keep a prisoner in jail and these costs are exacerbated by extremely high rates of recidivism. The high levels of illiteracy among the prison population virtually guarantees poor success in the job market after release. This is a particularly serious problem considering that 90 percent of adults presently in prison will be released within the next 5 to 10 years.

One of the aims of the National Literacy Act is to expand literacy services to persons with learning disabilities and facilitate a better understanding of this learning disorder and how to address it. As with the general definition of literacy, there is no national consensus on just what constitutes a learning disability. According to a 1987 study by the Federal Interagency Task Force on Learning Disabilities, 5 to 6 percent of the total population have learning disabilities. This means that as many as 12 to 24 million Americans have learning disabilities that hinder their ability to read. Experts estimate that those with learning disabilities are disproportionately represented among high school drop outs, the unemployed, the illiterate, and offenders.

As Dexter Manley, of the Washington Redskins, so courageously came forward to tackle his literacy problem, others must be encouraged to do the same. We cannot continue to allow learning disabilities to be ignored or inaccurately diagnosed. Mr. Manley painfully recalled some of the humiliating experiences of growing up with an undiscovered learning disability in testimony at the committee's May 18, 1989, literacy hearing:

> I was in the third grade . . . I was just put in the special ed class. And I did not want to be in there, and the only thing I can recall is we played with blocks . . . I stayed there four years . . . and there were no programs of any sort to help me learn skills to read and write. . . . What I can say to those who have a learning disability or are illiterate is that somehow or other, you have to find the will and courage to come forward and ask for help. For me, the only thing I can say is that I had to humble myself, and I had to walk into the Lab School (of Washington) and not pretend.

If one thing is clear it is that the problem of illiteracy in this country is of disturbing proportions. It is equally clear that solutions to the problem have been ignored for far too long at the national level.

We simply have no national policy as it relates to literacy. There are a number of existing Federal literacy programs, but resources are scarce and dispersed among numerous Federal agencies. Furthermore, the programs that do exist are not coordinated, and are delivered in a fragmented fashion. We do not know enough about what works most effectively in literacy programs, and what we do know is not well disseminated or utilized, particularly because of the lack of sufficient training for the large number of part-time adult educators and part-time volunteers.

There is a growing consensus that the national effort to promote literacy and combat illiteracy has been too weak and that more substantial and comprehensive Federal leadership is needed. The goal of substantially reducing illiteracy by the year 2000 is now viewed as a significant, and necessary, step toward ensuring educational and economic opportunity for all Americans, and enchancing our Nation's economic competitiveness. In some respects, the Federal effort in this area has lagged behind State involvement. Some 38 States have implemented literacy initiatives and committed State resources to attack the problem.

The primary Federal program that exists to reduce illiteracy is the Adult Basic Education Act. It is funded currently at about $158 million, less than 1 percent of the Department of Education's total budget. It serves only 10 percent of those estimated to be in need. Across the country, all the public and private literacy programs combined provide services to about 19 percent of those who need help.

Mr. President, the solution to the illiteracy problem requires Federal resources. It means that we must fully fund existing programs and create some new ones. We cannot continue to ignore this problem. I am pleased with the change in the administration's position regarding funding for existing literacy programs. While last year the administration proposed to eliminate three important literacy programs, this year the administration is proposing increases in several existing literacy programs, including the Adult Education Basic State Grants, Library Literacy Programs, and the VISTA Literacy Corps. I am also pleased to note that the administration has requested new funds for a National Adult Education Clearinghouse, modeled after the National Center for Literacy in S. 1310.

As a nation, I believe that we must ensure that all those who need literacy services will receive them—without being subjected to a waiting list, inaccurate assessments, overcrowded classrooms, or inferior programs taught by poorly trained adult educators. The National Literacy Act of 1989 is intended to achieve these objectives.

One issue that I would like to clarify in regard to the bill's provisions concerning State literacy resource centers. The bill provides that a State education agency, a State office on literacy, or a nonprofit entity operate the State literacy resource center. Although the State Education Agency will in many States be the appropriate place to house the State Literacy Resource Center, the bill provides flexibility in this regard to accommodate different circumstances and governmental arrangements across States. For example, some States have established State offices on literacy that may be outside the State education agency, but also be an appropriate entity to operate the State literacy resource center. In other States, this may be a function appropriately carried out by a nonprofit organization. No matter which organizational arrangement is selected by the State, it is my expectation that each State's education agency will be involved in

the coordination of literacy activities across the State.

Mr. President, I am pleased to note that S. 1310 has received wide support from most national literacy programs and from numerous State and local literacy programs across the country. While I appreciate all of the support the bill has received, I would like to mention a few supports, including: the Literacy Network, International Reading Association, Literacy Volunteers of America, United Way of America, ABC/PBS Project Literacy, the American Library Association, American Association of Community and Junior Colleges, American Vocational Association, Correctional Education Association, National Puerto Rican Forum, National Council of La Raza, Laubach Literacy Action, Association for Community Based Education, National Puerto Rican Coalition, American Jail Association, Coalition on Human Needs, Council of Chief State School Officers, Association of State Literacy Directors, National Council of State Directors of Adult Education, National Conference of State Legislatures, National Urban League, American Association for Adult and Continuing Education, State Directors of Vocational Education, OIC's of America, Alternative Schools Network and the Council of Great City Schools.

Mr. President, I look forward to working with each of my colleagues and to receiving their support on this landmark piece of legislation. I ask unanimous consent that a summary of the bill be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD as follows:

SUMMARY OF THE NATIONAL LITERACY ACT OF 1989, NOVEMBER 1, 1989

(Chief sponsor: Senator Paul Simon)

The National Literacy Act of 1989 is a comprehensive package of literacy initiatives to coordinate and strengthen efforts at the federal, state, local and private, nonprofit sector levels to combat the extensive problem of illiteracy in the United States.

There are between 23-27 million adult Americans who are functionally illiterate, a number which is increasing due to the unacceptably high number—600,000 to 700,000—of students who drop out each year. On an average day, some 3,000 young people drop out of school. Yet, current public and private literacy programs serve less than 19% of those who need literacy assistance.

This comprehensive proposal would give structure and focus to fragmented programs now aimed at increasing literacy by:

Unifying the efforts of existing programs;

Providing a governmental structure to coordinate programs and disseminate information;

Enhancing federal resources for new programs and methods to reach the estimated 19-23 million persons presently not being served by existing programs;

Expanding public-private literacy partnerships.

The National Literacy Act of 1989 includes six separate titles addressing: literacy coordination, workforce/adult literacy, families for literacy, books for families, students for literacy, and volunteers for literacy.

TITLE I. LITERACY COORDINATION

The purpose of this title is to create a federal structure to coordinate national literacy research, information and education, service, and other literacy-related activities. This title will—

Establish a National Literacy 2000 Federal Interagency Council consisting of the administrators of the major federal departments operating literacy programs. The new federal Council will coordinate, monitor and develop existing and new literacy initiatives across federal agencies, and establish specific and measurable goals for the federal effort in the education of illiterate adults, children and families. The federal Council will issue a status report to Congress every two years with recommendations for legislation needed to improve and expand federal literacy programs. The federal Council will also oversee a new National Center on Literacy established in S. 1310.

Authorize the Assistant Secretary for Vocational and Adult Education to coordinate all literacy-related programs and policy initiatives in the Department of Education, and to coordinate the staff resources and assistance provided to the federal Council.

Authorize a National Center for Literacy to conduct basic and applied research on literacy, administer a toll-free hotline for literacy information, serve as a clearinghouse for information on literacy programs, and provide technical assistance to literacy providers and organizations. The Center also will develop new instructional techniques and technology, conduct policy analysis and program evaluation, and develop and collect new data related to literacy and illiteracy. S. 1310 requires the Director of the National Center for Literacy to report annually to Congress and the federal Council regarding the achievement of national literacy goals. Federal support of $10 million is authorized for the National Center for Literacy in FY 91 and sums as necessary in FY 92 and FY 93.

Create a State Literacy Resources Centers Program to be a central resource on literacy at the state level and a link for state level literacy providers and administrators to the National Center for Literacy. The State Literacy Resource Centers will assist in the coordination of state literacy initiatives, encourage innovation and the use of state-of-the-art teaching methods, and provide technical and policy assistance to state and local government agencies and to community based literacy organizations. For FY 91, $15 million is authorized for the State Literacy Resource Centers and such sums as necessary for FY 92 and FY 93. These new authorizations become effective when the federal appropriation for the Adult Basic Education State Grants exceeds $160 million. The federal contribution to support the State Literacy Resource Centers may not be more than 75% in the first 2 years, 50% in the second 2 years, and 25% in the last year of the 5-year grants. The bill also permits States to use up to 10% of the funds available for the State Literacy Resource Center to support the creation and operation of State advisory councils on adult education.

Expand the authority of State advisory councils on adult education, authorized under the Adult Education Act, to include the development of goals for state literacy programs and the review and coordination of literacy-related programs across state agencies. S. 1310 expands membership on this advisory council to include state agency chiefs for those agencies with literacy-related programs, and provides that the state advisory councils have an opportunity to review and comment on the state plan for the State Literacy Resource Center.

TITLE II. WORK-FORCE LITERACY

The purpose of this title is to assist the States in improving educational opportunities for adults who lack the literacy skills requisite for productive employment, to expand and improve the current system for delivering and accessing adult education services, and to encourage the expansion of adult education teacher training programs and increase the number of full-time professional adult educators. This title will—

Increase the authorization for the Adult Education Act (AEA) by an additional $100 million over the previous year's appropriation beginning in FY 91 through FY 93, or until a majority of the illiterate population is being served. Increase from 10% to 15% the existing set-aside in the Adult Education Basic State Grant for teacher training and special projects, and require that half of the funds available through the increased set aside be for teacher training activities, including activities related to training full-time adult educators, minority teachers, limited English proficiency adult educators, and training teachers to recognize and effectively serve persons with learning disabilities, and with reading ability below the fifth grade level. The increased set-aside of 15% will become effective when the federal appropriation for the Adult Education Basic State Grant exceeds $200 million. Prior to reaching this appropriations level, the bill provides that 15% of new funds be set aside for this type of teacher training. Require each state to assure direct and equitable access to federal funds for local public agencies, non-profit, private community-based and voluntary organizations which serve educationally disadvantaged adults. Require each state to assure in their plan that funding is allocated for the population whose lack of basic skills renders them unemployable, reduces their ability to positively impact their children's literacy, and keeps them from independently functioning in society. States must also give priority to funding local programs serving areas with the highest proportion of adults who are not high school graduates.

Increase the authorization for the Business, Industry, Labor and Education Partnerships for Workplace Literacy Program to $50 million in FY 91, and such sums as necessary in FY 92 and FY 93. Create a new set aside for teacher or volunteer training or technical assistance under this program, and provide for the participation of small businesses in workplace literacy partnerships.

Authorize programs funded under Local Targeted Assistance Programs under the Elementary and Secondary Education Act to include teacher training programs which enhance the ability of teachers to identify students in early grades at risk of illiteracy in their adult years.

TITLE III. FAMILIES FOR LITERACY

The purpose of this title is to break the intergenerational cycle of illiteracy by improving the parenting and basic skills of adults in order to foster learning among their children; to foster family-oriented approaches to reducing illiteracy, and to address illiteracy through the social environment in which children are born and raised. This title will—

Increase the authorization for the Even Start Program to $60 million in FY 91, and such sums thereafter through FY 95, to support learning projects, particularly targeting functionally illiterate parents and their children, and to enhance the literacy-building capacities of these parents and their children.

Establish a "Families for Literacy" demonstration program to target services at an earlier stage than provided under Even Start. The demonstration grants would support services to newborns and their parents to monitor and improve a child's early developmental progress. Funds would be used to provide: Literacy and parenting education for adults, prereading and other developmental skills for children aged 3 and under structured time for parents to use newly acquired skills with their children, and referral services for families, including referrals to drug rehabilitation and counseling, or assessment of learning disabilities. S. 1310 authorizes $10 million for FY 91 and such sums thereafter through FY 95. This authorization becomes effective when federal appropriations for the Even Start Program exceed $30 million.

Authorize $2 million in FY 91 for the Secretary of Education to contract with the Corporation for Public Broadcasting to produce and disseminate a program in cooperation with local public broadcasting stations, for parents to improve family literacy skills and language development. This program would be reproduced on audio and visual materials for distribution at various sites, including state and local libraries.

TITLE IV. BOOKS FOR FAMILIES

The purpose of this title is to expand parent access to books and create a model library literacy program. This title will—

Require beginning in fiscal year 1991, that priority in the selection of additional local programs funded under the current inexpensive book distribution programs be given to programs and projects which serve children and students with special needs.

Authorize the Secretary to give priority in awarding Library Literacy grants to areas of greatest need, which have highest concentrations of adults who do not have a secondary education or its equivalent, and which coordinate with literacy organizations and community-based organizations providing literacy services.

Create a Model Library Literacy Demonstration Program to establish model library literacy centers at state and local public libraries, for innovative library literacy programs to reach and assist those in need of literacy training and access to reading materials. Authorize $2 million in FY 91 and such sums thereafter through FY 95.

Authorize the Secretary of Education to award funds to Reading Is Fundamental (RIF) to distribute inexpensive books to economically disadvantaged children and to increase parent acess to books (with priority to those with children under the age of 5), by reaching parents most disconnected from the education community (by making books available in welfare offices, health clinics, and WIC offices). Authorize $2 million for this contract in FY 91, and such sums as necessary thereafter through FY 95.

TITLE V. STUDENTS FOR LITERACY

The purpose of this title is to promote the development, location and placement of community service jobs for students in the area of literacy tutoring, outreach and training under the College Work Study (CWS) Program, which supports the part-time employment of students who are enrolled as undergraduate, graduate or professional students and who are in need of earnings from employment to pursue courses of study at eligible institutions. This title will—

Increase incentives through the CWS Program for college and universities to locate, develop and place students in literacy training and other literacy-related community service jobs. Provide 100% federal funding for compensation paid to students working in literacy projects through the CWS.

Authorize funding of $656 million for the entire College Work Study Program in FY 91.

Authorize the Student Literacy Corps at $11 million for FY 91.

TITLE VI.—VOLUNTEERS FOR LITERACY

The purpose of this Title is to develop, strengthen, supplement and expand the capacity of both public and private agencies and organizations to combat illiteracy through the use of volunteers. This title will—

Authorize a University Year for Literacy program of grants or contracts to support full-time volunteer service by post-secondary students, particularly those pursing a course of study likely to lead to a career in a field related to literacy. Students would receive academic credit and a living allowance similar to the allowance received by VISTA volunteers. Students would be required to serve no less than a full academic year. Authorizes $3 million in each of the fiscal years 1991 through 1993, contingent on full funding of the VISTA program and the VISTA Literacy Corps.

Authorize a new Literacy Challenge Grant program of matching grants to public/private partnerships that establish or expand literacy programs using volunteers as a method of addressing illiteracy. Grantees may be public or private nonprofit agencies, nonprofit community-based organizations or private for-profit organizations, but must operate the project in cooperation with other public and private agencies qualified to combat illiteracy in their community.

Matching requirements are 20% local, 80% federal in the first year, with the federal match declining to 50% in the fourth year, for all recipients except nonprofit community-based organizations. For community-based nonprofit organizations, the match is 10% local, 90% federal, with the match declining to 50% in the fifth year. Authorizes $5 million for fiscal year 1991, $7 million for fiscal year 1992, $10 million for fiscal year 1993, contingent on full funding of the VISTA program and the VISTA Literacy Corps.

Mr. SIMON. I think we have a chance to take a real step forward, Mr. President, and I think the Senate will do it with a resounding vote. I am very pleased to be here to present this legislation.

The PRESIDENT pro tempore. The Senator from Kansas [Mrs. KASSEBAUM].

Mrs. KASSEBAUM. Mr. President, I am pleased to rise in support of S. 1310. Senator SIMON has given, I think, some eloquent illustrations of why illiteracy is a serious problem for our Nation as well as some interesting statistics. One observation he made, which I think is so true, is that illiteracy is a hidden problem. In many cases, perhaps people had not even realized the problem they had and the seriousness of that problem. In all honesty, I must say I did not recognize the degree of illiteracy in this Nation and the tragedy that it can mean for one's personal life as well as family life, until I heard some of the testimony before our committee.

There is no doubt but that illiteracy is a serious problem in our Nation. We live in an increasingly complex society where both the quality of work and the quality of life are dependent upon comprehension of the written word. Yet, for far too many Americans, it is a daily struggle to read and understand bus schedules, application forms, notes from school, or safety instructions.

The importance of tackling this problem was underscored by President Bush in his State of the Union Address last week. Among the national education goals announced by the President was one that "every American adult must be a literate worker and citizen." First Lady Barbara Bush has also brought national attention to this problem through her personal efforts to combat illiteracy.

The priority placed on eliminating illiteracy is reflected as well by the President's budget proposal for the Department of Education. A funding increase of nearly 24 percent is proposed for programs under the Adult Education Act. The Adult Education Act represents the largest Federal effort to reach adults who have not received a high school diploma or its equivalent. The proposed budget increase would permit States to reach an additional 460,000 adults in need of basic skills programs and another 200,000 in need of secondary-level programs.

Funding increases for Adult Education Act national programs would permit continuation of efforts to assess adult literacy rates and education programs and to support innovative approaches. In addition, $5 million would be provided for the establishment of a national literacy clearinghouse. An increase is also requested for the Literacy Training for Homeless Adults Program.

In addition, the budget request calls for a doubling of funding for Even Start—a program which combines early childhood education with adult education for parents of young children. The proposed funding increase would add an estimated 130 projects to the 127 now underway.

Other literacy efforts included in the budget include a 56-percent increase in library literacy programs, an increase of over $350,000 in the Inexpensive Book Distribution Program, and continuation of the Student Literacy Corps Program at a funding level of $5 million.

The National Literacy Act, S. 1310, represents an attempt to give additional focus and support to efforts to combat illiteracy.

Title I of the bill creates the National Literacy 2000 Federal Interagency Council comprised of top executive branch officials or their designees. Responsibilities of the Council include developing a coordinated literacy program, establishing national literacy goals, and tracking the progress of literacy efforts.

The Council will also serve in an advisory capacity to the National Center for Literacy authorized by the bill. The National Center is intended to be a central source of literacy research, information, technical assistance, and policy analysis.

Title I also provides for grant assistance for the establishment of state literacy resource centers to coordinate and support literacy efforts at the State level.

Title II provides for an increase of $100 million in the authorization for Adult Education Act basic State grants and designates additional support for teacher training. It also expands the responsibilities and membership of State advisory councils currently authorized under the Adult Education Act to reflect a greater emphasis on literacy efforts. In addition, it increases the authorized funding level for the Business, Industry, Labor and Education Partnerships for Workplace Literacy Program and places additional emphasis on teacher or volunteer training and technical assistance.

Title II also amends the local targeted assistance program of chapter 2 to establish a priority for the training of teachers and school counselors in identifying potential literacy problems, particularly among children in the early grades.

Title III authorizes the establishment of the Families for Literacy Program. This program focuses on joint learning between children aged 3 and under and their parents. Funding of $10 million would be authorized for this program, provided that funding for the existing Even Start Program reaches $30 million. The bill also authorizes $2 million to permit the Corporation for Public Broadcasting to develop and distribute audio and video instructional materials.

Title IV amends the Inexpensive Book Distribution Program to provide additional focus on low-income children, children with special needs, and parents of young children. It also provides for the establishment of model library literacy centers.

Title V extends the authorization of the Student Literacy Corps, a program in which undergraduate college students offer tutoring services to disadvantaged students. It also increases the authorization for the College Work Study Program and amends the program to permit full Federal funding of literacy work-study training programs.

Title VI would establish a University Year for Literacy Program to support the use of full-time college students as literacy volunteers. It also establishes a Literacy Challenge Grant Program to permit public agencies and private organizations to operate or expand literacy programs which use full- or part-time volunteers.

I joined as a cosponsor of this measure after a series of discussions with its principal sponsor, Senator SIMON. I appreciate the willingness with which he accommodated many of my concerns about his original proposal, and I believe that the product of our negotiations is a sound bill.

In particular, I am pleased that we were able to streamline features of the original bill which I had felt would lead to undue bureaucracy. We have reduced the number of new entities which had originally been proposed and have provided for stronger linkage among groups involved with literacy efforts.

In addition, we have built in funding protection for existing programs to assure that new initiatives are not funded at the expense of ongoing efforts and have incorporated new initiatives into existing authorities wherever possible.

I am pleased to join Senator SIMON and others in moving forward a bill which signals the need not only to undertake some important new initiatives but also to use and coordinate more effectively the resources now available.

We simply cannot continue to have each attempt to address illiteracy go its own way due to divisions of jurisdiction. Those who are involved across agencies and within levels of Government must pool their efforts and ideas. Our capacity to develop effective programs must be strengthened through improved and expanded teacher training. Available pools of talent must be tapped from our universities, our libraries, and our homes. These are the goals of S. 1310, and I hope that all Members of the Senate will join us in support of this legislation.

I also want to acknowledge the efforts of staff in bringing S. 1310 to this point. Particular thanks to Susan Hattan and Becky Rogers Voslow of my staff; Cheryl Smith, Pat Fahy, and Brian Kennedy with Senator SIMON; Ann Young and Marisa Quinn with Senator PELL; and Amanda Brown with Senator KENNEDY.

I too, Mr. President, would like to extend a special thanks to Senator SIMON for his efforts. I think this is a very important measure for us as a nation, and for the fulfillment of President Bush's desires to see education as a chief focus of our country today.

Several Senators addressed the Chair.

The PRESIDENT pro tempore. The Senator from Nevada [Mr. REID].

Mr. REID. Mr. President, I rise today to commend my colleague from Illinois [Mr. SIMON] for his dedication to a problem that we have in our society, the seriousness of which calls for the same attention we devote to other problems, such as the drug scourge which we have in this country.

Mr. President, I would like to take this opportunity to commend the junior Senator from Illinois for not only this legislation but the work that he has done over the many years that he has served in the Congress on matters related to education.

I can remember the first term that I served in the House of Representatives. The junior Senator of Illinois, then a Member of the House, was sponsoring legislation called emergency management science bill—which the Senator will recall passed the House of Representatives—which addressed a problem that was important then, and important now, namely, the inadequacy of our math and science programs in our educational systems throughout this country. One statistic that he pointed out at that time that I will always remember is that there are fewer physics teachers in the country today than there are school districts. The point is that the Senator from Illinois has been a leader in attempting to address the problems of education in our country.

The problem that he has addressed in this legislation today, illiteracy, is certainly not as visible as some of the other problems that we face in the country today such as the drug problem. It is a nonvisible problem. It is however a problem that is equally devastating. I am referring of course to what we have discussed here for some time on the Senate floor—the "scourge." I call it a "scourge," a "scourge" of illiteracy.

Mr. President, I speak from years of experience helping create a statewide literacy initiative for the State of Nevada. The effort in Nevada entailed extensive communications with several States, with Nevada political leaders, and with dedicated volunteers such as my wife, Landra.

In 1987 the Nevada Literacy Coalition was created with the help of a Gannett foundation grant. As the grant expired it was apparent that Nevada's illiteracy problem was only beginning to be addressed. To carry on the work of the foundation, my wife, Landra, formed the Task Force on the Future to develop a statewide literacy initiative. Literacy projects in other States were studied and packaged in a

design to best suit the needs of Nevada.

Mr. President, in the State of Nevada the problem of illiteracy is a dangerous problem. If all the people who were illiterate in the State of Nevada were placed into one place it would be the third largest city in the State of Nevada. Over 70,000 people in the relatively small State of Nevada cannot read. I repeat, it would be the third largest city in the State of Nevada.

I mention that because Nevada is not unique. You can take the States that are represented by people on the Senate floor today, the States of Missouri, Kansas, Illinois, West Virginia, and you would find the same basic ratio would apply. Tens of thousands of people in your States would be illiterate.

Mr. President, a proposal was prepared for and accepted by then Gov. Richard Bryan. Governor Bryan was willing to have his State office work on the literacy initiative. And the new Governor, Bob Miller, placed it in his budget. This was a program to generate private sector awareness, participation, and financial resources.

The National Literacy Act will coordinate literacy efforts from the Federal, State, and local levels. This would have eliminated in the State of Nevada months and months of painstaking research done to find out what other States and other programs have accomplished. National coordination is the key to making a difference. This act will provide guidance as to what is effective for various target groups, whether they consist of young people, old people, or whether they be in rural areas or urban areas. Most States have neither the resources nor the expertise to conduct such significant research. This is a role which needs to be filled by the Federal Government.

I am proud that my colleagues see the importance as I do of dispelling the deceptive notion that what we do not see cannot hurt us. We know better than that. Illiteracy tears away at not only the individuals involved in illiteracy but families, and also, Mr. President, our economy.

It is through my involvement in the Nevada Literacy Coalition that I came to appreciate the need for Congress to address the challenge that illiteracy presents. This National Literacy Act will permit the Federal Government to provide support and leadership to tackle the demands of illiteracy. The elimination of illiteracy has become a national priority.

Mr. President, I refer to the report that accompanies this bill and read a couple of paragraphs that I think are so illustrative. On page 4 of the report:

> Illiteracy affects everyone. It affects us either directly or indirectly, but it impacts every American and will continue to do so until the problem is addressed. Illiteracy affects us through the taxes we pay to support those who are unemployed due to their inability to read and compete in the job market, or those prisoners who resort to crime because of limited options for legally earning a living. It affects us through increased prices of goods and services when companies must expend resources to train and retrain employees who lack basic skills.

On page 5 of the report:

> At least 23 million Americans in this country can be considered illiterate according to commonly used estimates. Of these 23 million an estimated four million cannot read at all. Another 45 million adults read with only minimal comprehension. Extremely high rates of illiteracy are reported among the welfare population, the unemployed, drug users, criminals and high school dropouts. It is reported that one-half of all the households that are classified below the poverty level by Federal guidelines cannot read an eighth grade level book.

The elimination of illiteracy I believe is a national priority. We have elevated drugs to that level, and as the junior Senator from Illinois mentioned in his opening statement, the two are not unrelated. We confronted our drug problem by appointing a drug czar. It is time we do the same for the elimination of illiteracy.

We have a choice between becoming a high productivity Nation with a high quality work force or a second class economy with a second rate work force. The need for national coordination of literacy initiatives is great. Nevada literacy initiatives are making a difference. Already they are making a difference. But there is no quick fix to the problem of literacy. Teaching a person to read and to write is no simple task.

That is clearly illustrated by the large number of children who leave our schools with diplomas, even though they cannot read. It is estimated that 13 percent of Americans cannot read or write basic English. This is not just in my State; this is all of our States. Millions of Americans have been silently crying for help and lack the resources to help themselves. That is why the National Literacy Act is of utmost significance. That is why I support it.

I commend the Senator from Illinois for his outstanding work in education, generally, and specifically in literacy. That is why the U.S. Congress should unanimously support this legislation.

Mr. SIMON. Will my colleague yield?

Let me just commend my colleague from Nevada, who has an ability to find the really important issues, and I see this over and over again, the things that really bear on the future of our country.

The one point that he stressed, that I did not stress enough in my remarks, is the relationship between this and productivity in this country. We grew up believing that somehow our natural resources were the key to our prosperity. But all of a sudden, we are living in a world the prosperous nations and the nations growing rapidly are Japan and South Korea and countries that have virtually nothing in the way of natural resources. What they have done is invest in their people, and what we have to do is the same.

I simply want to commend my colleague from Nevada for once again getting to the nub of something that really is a critical issue in this country.

Mr. REID. Mr. President, just in passing, referring again to the Senator from Illinois, we had in Nevada—for some 80 years—a very large mine and a smelter run by Kennecott Copper Co. After some 75 or 80 years, Kennecott decided to close their operation in White Plain County, NV. As a result of that, thousands and thousands of people who had lived there for generations working in the mine and smelter had no place to work. There were funds provided by the Federal Government to retrain these people.

When I was serving as Lieutenant Governor, and shortly thereafter, there was a problem because those funds for those people to be retrained were not used. The Governor called in the head of the industrial commission and asked why. Basically, it was because many of those people who worked there could not fill out the forms to try to obtain the Federal benefits for retraining purposes. So a lot of those moneys were not used, and those people's lives were literally wasted as a result of their inability to read.

I think if we each look at our individual States, we will find examples of where this Literacy Act is not some general plethora to help other people, but it is an act that will help people in your cities and towns and make your States, our States, more productive.

I yield the floor.

Mr. BOND addressed the Chair.

The PRESIDENT pro tempore. The Senator from Missouri [Mr. BOND] is recognized.

Mr. BOND. I yield to the distinguished floor manager.

AMENDMENT NO. 1226

(Purpose: To Make Technical Corrections)

Mr. SIMON. Mr. President, if I could, before we get to the Bond amendment, I would like to offer technical corrections to an amendment. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDENT pro tempore. Is there objection?

Hearing none, the clerk will state the amendment.

The bill clerk read as follows:

> The Senator from Illinois [Mr. SIMON], offers an amendment numbered 1226.

Mr. SIMON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 46, line 5, strike "1989" and insert "1990".

On page 47, line 13, strike "1989" and insert "1990".

On page 65, line 7, strike "1989" and insert "1990".

On page 68, beginning with line 11, strike all through line 25, and insert the following:

(B) in the second sentence of subsection (a)(1) by striking all beginning with "consist" through the end period and inserting "consists of—

"(A) representatives of public education;

"(B) representatives of public and private sector employment;

"(C) representatives of recognized State labor organizations;

"(D) representatives of private, voluntary, and community-based literacy organizations;

"(E) the chief administrative officer of a State, or the designee of such individual; and

"(F) representatives of each of the following State agencies:

"(i) the State education agency;

"(ii) the State job training agency;

"(iii) the State human services agency;

"(iv) the State public assistance agency;

"(v) the State library program; and

"(vi) the State economic development agency.

On page 72, line 4, strike "(a)".

On page 72, lines 6 and 7, strike "paragraph (1)(B)" and insert "subsection (a)(1)(B)".

On page 72, lines 8 and 9, strike "paragraph (2)" and insert "subsection (a)(2)".

On page 72, line 9, strike "and 'and' ".

On page 72, line 10, strike "thereof" and insert "of subsection (a)".

On page 72, line 11, strike "paragraph (3)" and insert "paragraphs (3) and (4)".

On page 73, line 7, strike "Act is amended" and insert "Act, as amended by paragraph (1) of this subsection, is further amended".

On page 75, line 25, strike "1989" and insert "1990".

On page 81, line 11, insert ", subject to the availability of appropriations," after "authorized".

On page 83, line 7, strike "1989" and insert "1990".

On page 90, line 5, strike "1989" and insert "1990".

On page 92, line 7, strike "1989" and insert "1990".

On page 97, line 9, strike "(d)" and insert "(e)".

On page 97, line 10, strike "(d)" and insert "(e)".

Mr. SIMON. This is precisely what it is, technical corrections. I believe it is accepted by the other side, also.

Mrs. KASSEBAUM. Yes, Mr. President, there is no objection.

The PRESIDENT pro tempore. The question is on agreeing to the technical amendments.

The amendment (No. 1226) was agreed to.

Mr. SIMON. Mr. President, I move to reconsider the vote.

Mrs. KASSEBAUM. I move to lay that motion on the table.

The motion was agreed to.

AMENDMENT NO. 1227

(Purpose: To strengthen the Families for Literacy Act)

Mr. BOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Missouri [Mr. BOND] proposes an amendment numbered 1227.

Mr. BOND. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 76, line 8, strike "and".

On page 76, line 10, strike the period and insert a semicolon and "and".

On page 76, between lines 10 and 11, insert the following:

(4) foster the detection of disabilities or developmental problems that might hinder future learning.

On page 76, line 22, strike "and" and insert "State educational agency," before "local".

On page 76, line 22, insert ", or other public agencies," before "to".

On page 77, between lines 2 and 3 insert the following:

(b) FINDINGS.—The Congress finds that children participating in State Parents as Teachers programs and similar programs have more advanced cognitive skills, language ability, and social skills than their preschool age counterparts.

On page 77, line 3, strike "(b)" and insert "(c)".

On page 77, line 5, strike "a total of 10 demonstration".

On page 77, line 7, insert "State education," before "local".

On page 77, lines 7 and 8, strike "and" and insert "or".

On page 77, line 8, strike "80 percent" and insert "the Federal share".

On page 77, line 14, insert "primarily" after "programs".

On page 77, between lines 22 and 23, insert the following:

(3)(A) Each grant awarded under this subsection shall be in an amount which is not less than $100,000 nor more than $750,000.

(B) In determining the amount of the grant awarded under this subsection, the Secretary shall take into consideration the size of the population to be served, the size of the area to be served, and the financial resources of such population and area.

(4) The Federal share—

(A) for the first fiscal year for which a grant is awarded under this subsection shall be 90 percent;

(B) for the second fiscal year for which a grant is awarded under this subsection shall be 80 percent;

(C) for the third fiscal year for which a grant is awarded under this subsection shall be 70 percent;

(D) for the fourth fiscal year for which a grant is awarded under this subsection shall be 60 percent; and

(E) for the fifth fiscal year for which a grant is awarded under this subsection shall be 50 percent.

On page 77, line 23, strike "(c)" and insert "(d)".

On page 77, line 24, insert "State educational agency," before "local".

On page 77, line 25, strike "demonstration".

On page 78, line 10, strike "(d)" and insert "(e)".

On page 78, line 11, strike "and" and insert "State educational agency," before "local".

On page 78, line 12, insert ", or other public agencies" before "receiving".

On page 78, lines 17 and 18, strike "disorders and learning disabilities" and insert "disorders, learning disabilities, and hearing and vision problems;".

On page 78, line 24, insert "health care," after "counseling,".

On page 79, line 2, insert "State educational agency," before "local".

On page 79, line 15, strike "(e)" and insert "(f)".

On page 79, line 17, insert "State educational agency," before "local".

On page 79, line 17, strike ", and" and insert "or".

On page 80, line 14, strike "(f)" and insert "(g)".

On page 80, line 15, strike "(b)" and insert "(c)".

On page 80, line 19, insert "State educational agency," before "local", and insert "or other public agencies" before "receiving".

On page 80, line 24, strike "(b)" and insert "(c)".

On page 81, line 1, strike "(g)" and insert "(h)".

On page 81, line 10, strike "(h)" and insert "(i)".

On page 83, line 1, strike "(h)" and insert "(i)".

Mr. BOND. Mr. President, let me preface a discussion of my amendment, which deals solely with title III of the bill, Families for Literacy, with some thoughts about the bill as a whole and how this title fits into it.

I must confess that on first reading of S. 1310, I was struck by the reactive nature of much of it. Indeed, a section by section analysis of the bill shows that much of it, from the National Literacy 2000 Federal Interagency Council to the National Center for Literacy, to title II addressing workplace literacy, to the volunteers for literacy section is meant to address not the causes of illiteracy, but its symptoms.

Everyone agrees that we have a serious problem in this country. We are told by some that the United States ranks 49th among 158 member nations of the United Nations in its literacy levels. We are told that some four million citizens cannot read at all, and that another 45 million of us, all adults, read with only minimal comprehension. Mr. President, if this is the case, then that means that some children are passed along from grade to grade regardless of reading ability, and indeed, that one needn't know how to read to receive a high school diploma. The Nation at Risk report tells us that some 17 percent of high school graduates are functionally illiterate. It seems to me the question we should be asking is why our schools are graduating so many illiterates. They are failing in their basic mission,

which is to equip our children with the basic skills they need to be productive citizens. We will not solve this problem by setting up the duplicative structures provided for in this bill.

Despite my concern about many of the provisions of the bill, I heartily endorse title III of the bill, the Families for Literacy Act, which sets up programs designed to assist parents in laying the groundwork for their children's later school success.

We must begin to be more attentive to the crucial first 3 years of a child's life, when the pattern for later learning and achievement is set.

My amendment, though it touches the bill in a number of places, is quite simple. It attempts to improve upon the fine effort that my distinguished colleague from Illinois has made in title III which is known as the Families for Literacy section. I believe this is the best section of the bill. Essentially, it is preventive in nature, rather than reactive. It gets at the root causes of intergenerational illiteracy.

Mr. President, my home State of Missouri knows the importance of beginning at the beginning. From the beginning of a child's life, his or her parents are the first and most important teachers. The foundations of later learning are laid in the first 3 years of a child's life by the parents. It certainly makes sense to equip parents with the skills they need to help maximize their child's health and development. That is exactly what the Missouri new Parents as Teachers Program does. This highly successful program began in four districts in Missouri with a little Federal seed money.

By the time I reentered office as Governor for my second term in 1981, studies of the demonstration programs had proven how successful and effective this program could be. In that year, the Governors Conference on Children, Youth and Family studied the work of the new Parents as Teachers Program and found that it had a wide range of values going beyond the educational, into the health, mental health and child welfare areas as well.

Beginning in 1981, I asked for a statewide authorization and funding for this program. In Missouri we do not take steps quickly; so it took 4 years to do it. It was passed an hour before the end of the last session of my 4-year term. It is, I believe, one of the proudest things that Missouri has done in education in recent years.

The curriculum under the new program is designed to strengthen the foundations of later learning, language, intellectual development, curiosity and social skills, as well as to provide health screening for preschool children to detect potential impairments early in their young lives.

To achieve these goals, the Parents as Teachers Program provides personalized home visits by trained parent educators, group meetings with new parents, and formal screening of vision, hearing, and other health or mental health problems which could interfere with cognitize development.

The strength of the Parents as Teachers Program is that it is community and family based. The administration of the program takes place at the State and local levels, which allows it to retain the local support and flexibility that made it a success in the first place.

Over a month ago, I visited Joplin, MO, where they have combined the program with a title I program to expand it to reach more families and children at risk. And the Parents as Teachers Program is open to all children. It is something that is needed by all children. It is needed by all families. It has worked in urban and rural and suburban areas, and for people at the top and the bottom of the economic ladder.

Over 50,000 Missouri families currently participate in the program. We are seeing the efforts expand through those parents who become the best witnesses and apostles for the program. They get more people involved.

The program is relatively inexpensive. We ask for only a small amount of Federal seed money. The States and localities can support it, as they have in Missouri, and they will find that it is a tremendous investment. But there is no such thing as a free lunch. It is very labor intensive. It is the parents who must do the work.

This program requires that parents spend time and energy and devote attention to their children each day. As for my family we know this is some of the best time that we can invest and we know that it does make a difference.

Parents as Teachers is a proven success. An independent evaluation showed that children participating in Parents as Teachers were significantly more advanced in language development than other 3-year-olds, made greater strides in problem solving and other intellectual skills and have demonstrated competencies that are predictive of and essential to successful educational outcomes in later school activities.

Studies of the demonstration programs showed that the number of participating children reaching first grade needing remedial or special education was less than half the rate of other first grade students entering school in Missouri that year.

In addition, the Missouri Children's Trust Fund Commission set up to administer programs to prevent child abuse studied a wide range of programs, and how they best can prevent child abuse. Their conclusion: A program like the new Parents as Teachers, by teaching the parents what to expect and helping them to understand their children and getting involved with their children, is the very best way to prevent child abuse.

But perhaps the greatest strength of the PAT Program itself is that it is a terrific preventative program which can positively affect almost every measurable social outcome, including: school readiness, parent/school partnerships, child heatlh, teen pregnancy, and child abuse.

Providing for a literate society is certainly among these positive benefits, and I truly believe that the Parents as Teachers Program and others like it should be a very important part of the war on illiteracy being marshaled by my colleague from Illinois.

I commend him for his authorship of the Families for Literacy title of the bill and for his work on behalf of this. Quite simply, my amendment builds upon the ideas he has laid out and adds more of the positive components of the Missouri's Parents as Teachers Program. For example, I believe the health screening of Missouri's children is one of the most important aspects of the program provided in this bill.

We have seen that a slight hearing loss of a small child not detectable by even the most caring parent can result in that child being 1 year behind his or her peers at first grade. You need professional screening to ferret out and determine whether there are these problems that can be dealt with much better if they are dealt with at a young age.

I believe the program is especially beneficial to those who are at risk for illiteracy. Studies have shown that regardless of a parent's own skills, he or she can develop the skills to help his or her child build a foundation for later learning.

One of the great applications of the new Parents as Teachers, if you take a new parent, they are scared to death. When our first son arrived, my wife had been a counselor and had been a speech and hearing therapist at school, and we were absolutely terrified about the responsibilities.

The materials for the new Parents as Teachers Program gave us the opportunity to help our son begin his learning with an exciting curiosity toward learning which will serve him well for the remainder of his life.

Mr. President, it is my hope the Parents as Teachers Program in Missouri will be a model for all programs eventually funded under this section. It makes sense to arrest the life cycle of illiteracy in its early stages.

Mr. President, I ask my distinguished colleague from Illinois whether or not he intends that States and public agencies currently operating Parents as Teachers and similar programs are eligible to apply for funds under the Families for Literacy Pro-

gram. Effective programs now exist in many States. It is my hope that many of these entities will receive funds if and when they meet the specifications in the legislation.

Mr. SIMON. While we want to encourage States, nonprofit agencies and other entitles that do not now run such programs to apply for funds under the Families for Literacy Program, we also want to utilize the experience of those who currently are operating Parents as Teachers and similar programs to expand the benefits of these programs to families at risk for illiteracy-related programs. It is our intent that all entities meeting the specific eligibility requirements under the Families for Literacy Program, regardless of whether or not they are currently running similar programs, be eligible to apply for and receive funds under this title.

Mr. BOND. Another clarification I would like to make concerns the meaning of consortia under the Senator's bill. We have amended the "eligible entity" sections to read "nonprofit entity, or consortia of businesses, nonprofit entities, State educational agencies, local educational agencies, or other public agencies." Under this modified definition, it is my understanding that a State educational agency working through local educational agencies, as Missouri does, would comprise a "consortium" eligible for funds under the Families for Literacy title. Is this correct?

Mr. SIMON. The Senator is correct. While we encourage relevant groups and agencies in a community to join together to run these programs, any combination of entities listed under "consortia" would be eligible for funds under the families for literacy title.

Mr. BOND. I thank the sponsor for his accommodation, and I thank the Chair and yield the floor.

The PRESIDENT pro tempore. The Senator from Illinois [Mr. SIMON].

Mr. SIMON. Again, Mr. President, the amendment offered by the Senator from Missouri is a good amendment that I think improves the package. We are very pleased to accept it on this side.

I commend the Senator from Missouri for his leadership as Governor in this area. Frankly, I was not that familiar with what he has done, and I am grateful not only for this amendment but for his helpfulness in this whole area. I appreciate it a great deal.

Mrs. KASSEBAUM. Mr. President, I join in that as well. I know as a neighboring State, Kansas, we look with some envy at the Missouri effort, and we are adopting in Kansas some aspects of the Parents as Teachers Program. As Governor of Missouri, Senator BOND was a strong leader in some innovative education programs that are now beginning to benefit many other areas of the country.

I associate myself with Senator SIMON's comment that I believe this strengthens the bill in this particular section. It can only benefit the whole package.

The PRESIDENT pro tempore. The Senator from Missouri.

Mr. BOND. Mr. President, I thank my good friends from Illinois and Kansas.

I extend to each colleague and other colleagues who are interested a genuine invitation to visit Missouri to see some of these programs.

I thought the most exciting part would be the gathering of children in some of the third- and fourth-grade classes. I have found that the parents who come together, who share experiences, share concerns, and learn together are really the leaders in this battle. It is a very informative and a very exciting thing to witness, and I extend that invitation to any of my colleagues who may wish to take it.

The PRESIDENT pro tempore. The question is on adoption of the amendment by the Senator from Missouri.

The amendment (No. 1227) was agreed to.

Mr. SIMON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDENT pro tempore. The Senator from Kansas.

AMENDMENT NO. 1228

(Purpose: To provide financial assistance to raise the literacy skills of commercial drivers)

Mrs. KASSEBAUM. Mr. President, I wish to send to the desk an amendment of the Senator from Pennsylvania [Mr. HEINZ] with a statement, and ask for its consideration.

The PRESIDENT pro tempore. Is this one of the amendments that is enumerated?

Mrs. KASSEBAUM. Yes, it is. It concerns grants for commercial drivers' literacy programs. It has been agreed to on both sides.

The PRESIDENT pro tempore. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mrs. KASSEBAUM], for Mr. HEINZ, proposes an amendment numbered 1228.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 75, between lines 2 and 3, insert the following:

"SEC. 373. EDUCATION PROGRAMS FOR COMMERCIAL DRIVERS.

"(a) PROGRAM AUTHORIZED.—(1) The Secretary is authorized to make grants on a competitive basis to pay the Federal share of the costs of establishing and operating adult education programs which increase the literacy skills of commercial drivers which are necessary to successfully complete the knowledge test requirements under the Commercial Motor Vehicle Safety Act of 1986.

"(b) FEDERAL SHARE.—The Federal share of the costs of adult education programs authorized in subsection (a) shall be 50 percent. Nothing in this subsection shall be construed to require states to meet the nonfederal share from state funds.

"(c) ELIGIBLE INDIVIDUALS.—Individuals eligible to receive a grant under this section include—

"(1) private employers employing commercial drivers;

"(2) colleges, universities, or community colleges;

"(3) approved apprentice training programs; and

"(4) labor organizations, the membership of which includes commercial drivers; and

"(5) any other public or private organization the Secretary finds that would most efficiently educate commercial drivers.

"(d) DEFINITION.—The term 'commercial driver' means an individual required to possess a commercial driver's license under the Commercial Motor Vehicle Safety Act of 1986.

"(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $5,000,000 for each of the fiscal years 1991 and 1992".

Mr. HEINZ. Mr. President, in 1986 Congress enacted the Commercial Motor Vehicle Safety Act. The law is intended to eliminate the practice of holding multiple drivers licenses which enable unsafe drivers to flimflam law enforcement by handing over whichever license has the fewest violations against it. Now, drivers who don't turn in multiple licenses face fines and possible imprisonment.

Another provision requires all drivers to obtain a commercial driver's license [DCL] by April 1992. Commercial vehicle operators must take both a written and driving skills test. Passing the driving test ought to be comparatively easy. Most drivers on the road today have excellent driving records and years of experience.

For some, however, getting through the written test will be a whole other story. I've seen a sample driver's manual. It will not be easy for those drivers who do not have sharp literacy skills. Many of the older, experienced drivers have not read a test and taken a written test since high school. They need remedial literacy training. If they do not get it, we could lose the experienced drivers we want in control of the big rigs and vehicles getting our children to school.

In fact, during the first few months after the new licensing procedure was initiated in California, over 50 percent of the driver applicants failed the written portions of their exam.

For this reason, I am offering this amendment to provide financial assistance to raise the literacy skills of commercial drivers. It provides $5 million over each of the next 2 years to help those drivers who need it. Eligible grantees include colleges and universities, approved apprentice programs, private employers, and unions.

I have received letters from many organizations in support of this effort. On June 13, the Pittsburgh Press wrote an editorial endorsing it. I ask unanimous consent that letters from the AFL-CIO, Teamsters, International Brotherhood of Electrical Workers, Service Employees, and the Press editorial be included in the RECORD following my remarks.

The PRESIDENT pro tempore. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HEINZ. Mr. President, we have all heard the regrettable reports concerning this Nation's illiteracy rate. The U.S. Department of Education estimates that the adult illiteracy rate is at least 13 percent—17 to 21 million people.

The commercial drivers who need literacy training earn a good living. They are making substantial contributions to the American economy. It is not right for them to lose their jobs or their rigs for which some have mortgaged their homes in order to buy them, because they could not pass a written test. They want to pass. They want to possess good reading skills.

I urge my colleagues to join me in helping to raise the literacy skills of these hard-working Americans. We can't affort to lose them.

EXHIBIT 1

INTERNATIONAL BROTHERHOOD OF TEAMSTERS,
Washington, DC, June 5, 1989.

Hon. JOHN. HEINZ,
U.S. Senate,
Russell Senate Office Building, Washington, DC.

DEAR SENATOR HEINZ: The Commercial Motor Vehicle Safety Act of 1986 created a federal standard for the issuance of a commercial driver's license by the states. As you are aware, all commercial drivers must now pass a written and a driving skills test before obtaining this national license. Many states, including Pennsylvania, are rewriting their motor vehicle codes to satisfy the demands of this new federal standard. Some states have already implemented their commercial license programs which include the required testing provisions.

A number of drivers have experienced difficulty in passing the written part of the license test. This failure is based on individual reading abilities and not on the qualifications or driving skills of these drivers. Recently you introduced S. 1098, which would provide for a federal grant program to allow labor organizations to establish and maintain adult education programs to increase the literacy skills of commercial drivers. As General President of the International Brotherhood of Teamsters, which represents thousands of commercial drivers, I fully endorse and support your proposal. Your legislation will allow many drivers, who are competent and capable, to continue as productive and safe operators of commercial vehicles.

On behalf of Teamsters everywhere, I commend you and offer our deep appreciation for your efforts in this area.

Sincerely,

WILLIAM J. MCCARTHY,
General President.

D.R.I.V.E.-GEORGIA,
Atlanta, GA, August 2, 1989.

Hon. SAM NUNN,
U.S. Senate, Washington, DC.

DEAR SENATOR NUNN: This Local Union fully endorses and supports Senate Bill 1098 and I strongly urge your help and support of this legislation. The new Commercial Driving License Bill as passed in Congress, which is now being implemented on a State by State basis, has created not only an administrative nightmare for the States, the trucking companies, and labor unions but it will create severe problems in obtaining a driving license to those many, many drivers who do not read and write well or at all.

For these reasons, this organization feels Senate Bill 1098 is vitally needed to help implement this program without penalizing those least able to obtain their license simply because of literacy problems.

I request your help in the passage of this bill.

Yours truly,

JERRY B. KING,
President.

INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS,
Washington, DC. June 13, 1989.

Hon. JOHN HEINZ,
U.S. Senate, Washington, DC.

DEAR SENATOR HEINZ: When Congress passed the Commercial Motor Vehicle Safety Act of 1986, none of us realized at the time that certain provisions of the law would adversely affect those drivers of commercial vehicles who do not possess literacy skills sufficient to pass the written examination to secure a commercial driver's license.

Because the livelihood of our members who fall within this category is in jeopardy, we brought this matter to your attention. Not only did you fully understand the problems of these workers, but you did something about it. You assisted them by introducing S. 1098.

On behalf of the members of the International Brotherhood of Electrical Workers, and all others who you are attempting to help by your efforts, I thank you.

With best wishes, I am,

Sincerely,

J.J. BARRY,
International President.

SERVICE EMPLOYEES INTERNATIONAL UNION,
Washington, DC, June 30, 1989.

Hon. JOHN HEINZ,
U.S. Senate, Washington, DC.

DEAR SENATOR HEINZ: On behalf of the 925,000 members of the Service Employees International Union, I'd like to extend my appreciation for your recent introduction of S. 1098, the bill providing for the remedial training of commercial drivers.

As you are aware, there has been a very direct impact felt by commercial drivers around the country due to the new testing imposed by the Commercial Motor Vehicle Code. Despite years of experience driving school buses and other vehicles, many are ill-prepared to take the written exams required under the new regulations.

We have received numerous inquiries from SEIU members with a confusion shared by many of their employers on the full scope and extent of the new tests. Even if they have spotless driving records, the anxiety of retaining their jobs often masks their true abilities when put to the written test.

Again, thank you for the initiative you have shown in recognizing those drivers who, with minimal guidance and assistance, can continue to move our country's people and goods around safely and effectively. Please let me know if we can be of any assistance to you in making S. 1098 pass swiftly through the Congress.

Sincerely,

JOHN J. SWEENEY,
International President.

[From the Pittsburgh Press, June 13, 1989]

LITERACY BEHIND THE WHEEL

Over the next few years, it may not be unusual to see a trucker devouring the contents of a training manual along with his meat and potatoes at a track stop. It's a scene that's sure to materialize as commercial drivers begin studying for an exam they must take to qualify for a national driver's license that the federal government will require by April 1992.

The national license, mandated by Congress two years ago, will be required of all drivers of buses, trucks of more than 26,000 pounds or those that haul hazardous materials. The aim of the national licensing system is to prevent long-haul drivers from holding several state licenses so they can avoid suspensions for traffic citations.

We were pleased with the establishment of a national system and we are even more gratified by a spin-off development: Many truckers will try to improve their reading and writing skills in an attempt to pass the exam.

Test study manuals and the tests themselves, although supposedly written at a sixth- or seventh-grade level, are baffling many truckers. In California, where the tests already are being administered, more than a third of the drivers failed on their first try.

The problem is not the driver's skills behind the wheel but their lack of skills behind a pencil and paper. Their reading and writing levels are not good enough to understand the 100-page manuals, leaving them ill-prepared for the tests.

Responding to the situation, the American Trucking Association and some unions in the industry are urging individual trucking companies to set up literacy and preparation courses for their drivers. And Sen. John Heinz, R-Pa., wants Congress to put some of its money where its laws are.

Senator Heinz has introduced legislation to provide up to $10 million in matching funds over the next two years to help pay for literacy training for the drivers.

Although it would be impossible to quantify, it is beyond doubt that a more literate truck driver would be a safer truck driver. Imagine the danger potential that exists when, say, a trailer truck driver who can't read or who has only minimal reading skills comes upon an unfamilar direction sign at 55 mph.

We share the notion that trucking companies should help their drivers prepare for tests by improving their literacy skills. And we think Congress should do its part, too,

by providing the matching funds Sen. Heinz is seeking.

AMENDMENT ON LITERACY SKILLS OF COMMERCIAL DRIVERS

Mr. SPECTER. Mr. President, I am pleased to join Senator HEINZ as a cosponsor of an amendment of S. 1310, the National Literacy Act of 1989, which would provide financial assistance to raise the literacy skills of commercial drivers.

In 1986 Congress passed the Commercial Motor Vehicle Safety Act which requires every commercial vehicle operator to obtain a commercial driver's license [CDL] by April 1992. In order to obtain a license, commercial vehicle operators will be required to pass both a written and driving test. While many of the affected drivers are extremely competent and have years of driving experience, they may face the loss of their jobs because they lack the reading skills necessary to obtain an 80-percent mark required on the written test. Clearly, this has the potential to significantly disrupt the commercial transportation labor force not only in the Commonwealth of Pennsylvania, but throughout the Nation.

I have been concerned about this issue since it first arose and in that regard sought the assistance of Secretary of Education Cavazos and Secretary of Labor Dole in identifying Federal resources available to defray the costs of literacy training.

The new literacy requirement demands a cooperative effort on the part of private employers, colleges and universities, labor organizations, the Federal Government and others to meet the literacy needs of the Nation's commercial vehicle operators. This amendment would fulfill the Federal Government's obligation to contribute to this effort by authorizing the Secretary of Education to make grants to help pay the costs of establishing and operating adult education programs which increase the literacy skills of commercial drivers.

Mr. President, this amendment will do much to contribute to two important goals: ensuring the safety of our Nation's roads and increasing the literacy rate among our citizenry. I am pleased to be a part of this effort and will continue to work to achieve these goals in a fair and equitable manner.

Mr. SIMON. Mr. President, this is not only acceptable on this side, I think it is a very good amendment. I frankly was not aware of what we had done in the Senate in terms of maintenance requirements of truck drivers, and all of a sudden at some of my town meetings people have been coming up saying we face some real problems.

I think Senator HEINZ' amendment addresses a very real problem here and I am very pleased to accept the amendment.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by Mrs. KASSEBAUM on behalf of Mr. HEINZ.

The amendment (No. 1228) was agreed to.

Mrs. KASSEBAUM. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SIMON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1229

(Purpose: To include certain classroom teachers on the State Advisory Council)

The PRESIDENT pro tempore. The Senator from Kansas.

Mrs. KASSEBAUM. Mr. President, I send to the desk an amendment on behalf of Senator ARMSTRONG of Colorado.

The PRESIDENT pro tempore. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mrs. KASSEBAUM] for Mr. ARMSTRONG, proposes an amendment numbered 1229.

On page 69, line 6, strike "Council." and insert "Council. The Council shall also include classroom teachers who have demonstrated outstanding results in teaching children or adults to read".

Mrs. KASSEBAUM. MR. President, this is an amendment that adds classroom teachers to state literacy advisory councils.

I know that Senator ARMSTRONG feels, and the committee agrees, that this amendment would serve a very useful function. This amendment strengthens the advisory council by having teachers who certainly understand the problems being members of the council.

Mr. SIMON. Mr. President, this is a good amendment and we are pleased to accept it.

Mr. ARMSTRONG. Mr. President, I thank the managers of the bill for agreeing to accept my amendments to the National Literacy Act. We are all extremely concerned about the increasing amount of illiteracy in our Nation, and therefore it is critical we make information and training about successful methods of teaching children and adults to read available to as many teachers as possible.

My first amendment would require each State council to include at least one classroom teacher who has demonstrated outstanding results in teaching children or adults to read.

The bill requires that representatives of State government, labor organizations, and private and voluntary organizations be members of State councils. I am pleased that those most able to help in setting measurable goals for the long-term education of illiterate adults, children and their families—the classroom teacher—will now be represented.

There are many excellent teachers of reading whose expertise on "what works" in the classroom will be invaluable to the State councils. The councils are responsible for disseminating information on literacy programs that can be replicated at the local level, and teachers who are directly involved in implementing successful literacy programs will insure that the very best programs, those that work, will be made available to the widest possible audience.

My second amendment would assure that training and technical assistance on a variety of reading methods can be made available to teachers and to others who are involved in teaching others to read.

Mr. President, I want to make it absolutely clear that education is a local and State concern, and that more Federal programs alone are not the answer to the crisis we all recognize exists in our schools today. And further, I agree that the Federal Government has no business mandating that certain methods of instruction be used.

My amendment would simply allow professional teachers, volunteers, and administrators to be trained in methods of teaching reading that more than 60 years of research have proven effective. And it isn't just research that has proven these methods effective, it is the experience of thousands of classroom teachers as well.

Mr. President, let me touch briefly on both research and classroom practice. In a major new study on reading instruction released in January 1990 entitled, "Beginning to Read: Thinking and Learning about Print," Marylyn J. Adams, a researcher at Bolt, Beranek and Newman Inc., in Cambridge, MA, recognizes phonics as an essential ingredient of early reading instruction. She concludes that: "Research indicates that to become proficient readers, children need to learn and be able to use the relationships between letters and sounds and that explicit instruction of these relationships leads to improved reading achievement." She goes on to recommend that once the fundamental phonetic structure of the language is taught to children, they should be "given as much opportunity and encouragement as possible to practice their reading." This study is just one more indication in more than 60 years of research, much of it sponsored and paid for by the Federal Government, that reaches the same conclusion.

Mr. President, perhaps the best summary of all of these research findings is the conclusion reached by Lauren Resnick and Phyllis Weaver of Harvard after editing a three volume collection of papers on the "Theory and Practice of Early Reading": "First, as a matter of routine practice, we need

to include systematic, code-oriented instruction; that is, phonics in the primary grades, no matter what else is also done. This is the only place in which we have any clear evidence for any particular practice."

Mr. President, for too long we have been unwilling to deal with the root cause of the problem of illiteracy in America and that is the flawed methods we have used to teach our children to read. I believce my amendments to the National Literacy Act will provide the opportunity for teachers to receive information and training in such tried and proven methods as Orton-Gillingham, Spaulding, Cardin, and many other programs where intensive systematic phonics is used, but without mandating any of them.

Teachers who use these methods are enthusiastic about them, because they work. In one school district in New Hampshire for example, teachers were trained in the principles of systematic phonics, and the results were so dramatic that all of their colleagues joined the trial program. After 2 years the test scores climbed to, and remained at, the mid-to-high 60th percentile range. In Arizona, Sunnyside School District introduced phonics instruction at Gallegos Elementary School in Tucson. The results were immediate and positive. The school was open to everyone on a "first come, first served" basis; the capacity was 623 students; 58 percent were minority students; many children came from low-income families; no Federal money came to the school other than the school lunch program. After 1 year, only four students remained in the special education category, and 33 percent of students on the district honor roll were from Gallegos; and perhaps most important of all, 46 percent of the students in the intermediate grades were former special education students.

Mr. President, these are not just isolated examples. There are thousands of teachers who are using phonics as the first step in teaching children to read, and are finding the same success with their students. If we apply the recommendations of the years of research, and retrain our classroom teachers, we can eliminate illiteracy before the year 2000.

The Republican Policy Committee released a study in September 1989 entitled "Illiteracy: An Incurable Disease or Education Malpractice?" and sent it to Governors, State legislators, educators, the business community and interested citizens. The response has been overwhelmingly positive. More than 12,000 copies of the report have been sent out since September 1989 and requests still average more than 200 copies per week. I ask unanimous consent that this report be printed in the RECORD.

I again thank my colleague Senator SIMON for his support of my amendments, and his willingness to make them a part of the National Literacy Act.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

[U.S. Senate Republican Policy Committee, Sept. 13, 1989]

ILLITERACY: AN INCURABLE DISEASE OR EDUCATION MALPRACTICE?

"Learning to read is like learning to drive a car. You take lessons and learn the mechanics and the rules of the road. After a few weeks you have learned how to drive, how to stop, how to shift gears, how to park, and how to signal. You have also learned to stop at a red light and understand road signs. When you are ready, you take a road test, and if you pass, you can drive. Phonics-first works the same way. The child learns the mechanics of reading, and when he's through, he can read. Look and say works differently. The child is taught to read before he has learned the mechanics—the sounds of the letters. It is like learning to drive by starting your car and driving ahead. . . . And the mechanics of driving? You would pick those up as you go along."—Rudolf Flesch, Why Johnnie Still Can't Read, 1981.

Illiteracy in America is still growing at an alarming rate and that fact has not changed much since Rudolf Flesch wrote his best selling expose of reading instruction in 1955. Illiteracy continues to be a critical problem, demanding enormous resources from local, state, and federal taxes, while agruments about how to teach children to read continue to rage within the education research community, on Capitol Hill, in business, and in the classroom.

The International Reading Association estimates that more than one thousand research papers are prepared each year on the subject of literacy, and that is very likely a low figure. For the past 50 years, America's classrooms have been used by psychologists, sociologists, educationists, and politicians as a giant laboratory for unproven, untried theories of learning, resulting in a near collapse of public education. It is time we begin to move away from "what's new" and move toward "what works."

HERE ARE THE GRIM STATISTICS

As much as a quarter of the American labor force, anywhere from 20 to 27 million adults, lack the basic reading, writing, and math skills necessary to perform in today's increasingly complex job market.

One out of every four teenagers drops out of high school, and of those who graduate, one out of every four has the equivalent of an eighth grade education.

According to current estimates, the number of functionally illiterate adults is increasing by approximately two and one quarter million persons each year. This number includes nearly 1 million young people who drop out of school before graduation, 400,000 legal immigrants, 100,000 refugees, and 800,000 illegal immigrants.

Eighty-four percent of the 23,000 people who took an exam for entry-level jobs at New York Telephone in 1988, failed.

More than half of Fortune 500 companies have become educators of last resort, with the cost of remedial employee training in the three R's reaching more than 300 million dollars a year.

One estimate places the yearly cost in welfare programs and unemployment compensation due to illiteracy at six billion dollars. An additional 237 billion dollars a year in unrealized earnings is forfeited by persons who lack basic reading skills, according to Literacy Volunteers of America.

The federal government alone has more than 79 literacy-related programs administered by 14 federal agencies.

The total amount of money being spent on illiteracy by the federal government can only be guessed at, because there has never been a complete assessment prepared. A conservative estimate would place the amount at more than ten billion dollars each year, and growing steadily.

WHY DOES AMERICA HAVE A READING PROBLEM?

The question that must be asked is this: Why does America have a reading problem at all? We are the most affluent and technologically advanced of all the industrial nations on earth. We have "free" compulsory education for all, a network of state owned and operated teachers' colleges, strict teacher certification requirements, and more money and resources dedicated to educating our children than any other nation on earth.

WHY JOHNNIE CAN'T READ PROVIDES AN ANSWER

Rudolf Flesch, author of *Why Johnny Can't Read* wrote the following in a letter to his daughter in 1955, after teaching his grandson to read:

"Since I started to work with Johnny, I have looked into this whole reading business. I worked my way through a mountain of books and articles on the subject, I talked to dozens of people, and I spent many hours in classrooms, watching what was going on.

What I found is absolutely fantastic. The teaching of reading—all over the United States, in all the schools, in all the textbooks—is totally wrong and flies in the face of all logic and common sense. Johnny couldn't read until half a year ago for the simple reason that nobody ever showed him how."

Time magazine called his book "the outstanding educational event of that year" and suggested that he represented "the devil in the flesch" to the education establishment.

There is an answer to "why Johnny can't read," but the answer is tough medicine to swallow. It requires education professionals, who for years have been engaged in a form of education malpractice, to admit that the methods of teaching reading they have vigorously advocated and staunchly defended ever since the 1930's are dead wrong.

If we are to seriously reverse the increasing number of illiterate adults in America and prevent the problem of illiteracy, we must swallow the medicine, as quickly as possible, and reject the instructional methods that have resulted in the widespread illiteracy we have today.

EVERYONE CAN BE TAUGHT TO READ

Historically, all American school children were taught to read. Teachers never considered that a child "could not" be taught to read, and remedial reading was unheard of. In fact, the first remedial reading clinic opened in 1930, soon after the results of the "look and say" (the so called "Dick and Jane" program) reading methods were beginning to be felt.

Up until the early part of the 20th century, children were taught to read by first learning the alphabet, then the sounds of

each letter, how they blended into syllables, and how those syllables made up words. They were taught that English spelling is logical and systematic, and that to become a fluent reader it was necessary to master the alphabetic "code" in which English words are written, to the point where it [the code] is used automatically with little conscious thought given to it.

Once a child learned the mechanics of the code, attention could be turned to more advanced content. It seldom, if ever, occurred to teachers to give children word lists to read, or to make beginning readers memorize whole words before learning the components of those words, or to memorize whole stories as today's proponents of the "whole language approach" recommend.

Based on a 1987 study funded by the U.S. Department of Education, *Preventing Reading Failure: The Myths of Reading Instruction*, 90 percent of remedial reading students today are not able to decode fluently, accurately, and at an automatic level of response. In a March, 1989, Phi Delta Kappan article, Harvard Professor Jeanne Chall (author of *Learning to Read: The Great Debate*, 1983) cites a study by Peter Freebody and Brian Byrne, that confirms the same finding. Today's students are not being taught the fundamental structure of language, but rather are engaged in what Dr. Kenneth Goodman (a proponent of "the whole language approach") has called a "psycholinguistic guessing game."

TWO WAYS TO TEACH READING

One method is usually called "look and say" but many other labels are, or have been used to describe it, such as: the whole-word method; language experience; psycholinguistics; or whole language. The "look and say" method teaches that children should memorize or "guess" at words in context by using initial letter or picture clues. According to estimates given in one widely used "look and say" reading series, a child taught this method should be able to recognize 349 words by the end of the first grade; 1,094 by the end of the second; 1,216 by the end of the third; and 1,554 by the end of the fourth grade. Learning to read this way is supposed to be more meaningful and fun. This method is currently used by nearly 85 percent of the schools in the United States.

Another method is called intensive, systematic phonics. This method is used to teach children how to sound out and blend the letters that make up words in a specific sequence, from the simple to the complex. Today, educators call this method the "code" approach because it teaches the skills and logic children need to understand the English spelling system. When a child comes to school he/she has a spoken vocabulary of more than 24,000 words. Children taught to read using systematic phonics can usually read and understand at least as many words as they have in their spoken vocabulary by the end of the fourth grade. Less than 15 percent of the schools in the United States use this method.

TEACHING READING: A BIT OF HISTORY

Teaching children to read is the most important objective educators have to accomplish. Reading is a prerequisite for everything else, not only in school but in life itself. Western civilization has taught its children to read using an alphabetic approach ever since the Phoenicians invented the alphabet and the Egyptians stopped writing in hieroglyphics. English is an alphabetic language that, when written, uses letters to represent speech sounds. When students were taught to read, they consciously identified the speech sounds and learned to recognize the letters used to represent them. They were then trained to apply this information to "decode" the names of unknown written words, understand their meaning, and comprehend the information presented as a complete thought.

The English language contains approximately half a million words. Of these words, about 300 compose about three-quarters of the words we use regularly. In schools where the "look and say" method is taught, children are constantly memorizing "sight" words during the first three or four grades of school, but are never taught low to unlock the meaning of the other 499,000 or more words. Reading failure usually shows up after the fourth grade, when the volume of words needed for reading more difficult material, in science, literature, history, or math cannot be memorized quickly enough. The damage to children who have not been taught phonics usually lies hidden until they leave the controlled vocabulary of the basal readers, for more difficult books where guessing, or memorizing new words just does not work. The result is that textbooks in the middle and upper grades are "dumbed" down to a fourth or fifth grade reading level.

This is the real reason why the SAT scores have dropped to such low levels during the last three decades.

BLAISE PASCAL—THE INVENTOR OF MODERN SYSTEMATIC LANGUAGE INSTRUCTION

From the time the alphabet was invented until the time of French scientist and mathematician Blaise Pascal, reading was taught by memorizing the sounds of syllables, and then stringing them together to make words. But Pascal found that by separating the syllables into their letter parts one could learn to read more effectively and efficiently. His method was intended only to assist in the very beginning stages of reading, when a child is learning the printed syllables of his own language.

Former teacher and research Geraldine Rodgers puts it this way: "It was only for this purpose that Pascal invented it [phonics], to make the previously almost unending memorization of regularly formed syllables . . . unnecessary. But phonics WORKS, and has since 1655. So it is not surprising that it was invented by one of the most towering mathematical and scientific geniuses in history, Blaise Pascal . . ."

19TH CENTURY: "LOOK AND SAY" INTRODUCED

In 1837, Horace Mann, a lawyer and Secretary of the Massachusetts Board of Education, proposed to the Boston School Masters the adoption of a "new method" of reading that began with the memorization of whole words rather than just learning the letter sounds and blending them into words. His "new method" was based on the work of Thomas A. Gallaudet who had developed a method to teach deaf children to read. Since deaf children had no ability to "sound out" letters, syllables, or words, the constant repetition of "sight" words from a controlled vocabulary seemed to be the most efficient way to teach them to read.

Adapting the work of Gallaudet, Horace Mann and his wife Mary developed a reading program that applied the same principles to students who had no hearing impairment. His method was tried for about six years in the Boston schools, and then soundly rejected by the Boston School Masters in 1844. Samuel Stillwell Greene, then principal of the Phillips Grammar School in Boston, expressed the views of the Boston School Masters, and the following excerpt from his essay is as relevant today as it was in 1844:

"Education is a great concern; it has often been tampered with by vain theorists; it has suffered much from the stupid folly and the delusive wisdom of its treacherous friends; and we hardly know which have injured it most. Our conviction is, that it has much more to hope from the collected wisdom and common prudence of the community, than from the suggestions of the individual. Locke injured it by his theories, and so did Rousseau, and so did Milton. All their plans were too splendid to be true. It is to be advanced by conceptions, neither soaring above the clouds, nor groveling on the earth,—but by those plain, gradual, productive, common-sense improvements, which use may encourage and experience suggest. We are in favor of advancement, provided it be towards usefulness. . . . We love the secretary, but we hate his theories. They stand in the way of substantial education. It is impossible for a sound mind not to hate them."

20TH CENTURY: "LOOK AND SAY" ESTABLISHED

The establishment of the normal school to train teachers at the same time Horace Mann was promoting the "new method" was not coincidental because these institutions became the vehicle by which to continue promoting the "new method." With the help of John Dewey at the University of Chicago, Arthur Gates at Teachers College Columbia, and the growing network of normal schools springing up around the country, direct, intensive, systematic phonics was debunked in favor of the whole word "look and say" method of teaching reading, with no research to support it.

THE BASAL READER

In 1930-31, William S. Gray and Arthur I. Gates introduced a "basal reading" series which incorproated the methods used to teach the deaf to read. Today's basal reading books, used by nearly 85 percent of American school children, are essentially the same as the 1930-31 Gates and Gray books. Their most harmful aspect is their rigidly controlled vocabulary, and emphasis on memorizing whole words before the letter sounds are learned. Some researchers believe dyslexia is actually caused by this reversal of the noraml learning sequence.

Children trained to read by the "look and say" method are made almost deaf to print if they are unable to sound out a printed new word like "gate" or "frog" by the beginning of second grade. In fact, they are almost as deaf to the sounds of the printed words as a deaf person is to the sounds of spoken words.

RESEARCH PROVIDES THE ANSWER

In 1967, Harvard Professor Jeanne Chall released her review of reading methods with the conclusion that:

"[The phonics approach (code emphasis) produces] better results, at least up to the point where sufficient evidence seems to be available, the end of the third grade. The results are better, not only in terms of the mechanical aspects of literacy alone, as was once supposed, but also in terms of the utlimate goals of reading instruction-comprehension and possibly even the speed of reading."

In 1973, Dr. Robert Dykstra, professor of education at the University of Minnesota, reviewed 59 studies and concluded that:

"We can summarize the results of 60 years of research dealing with beginning reading instruction by stating that early systematic instruction in phonics provides the child with the skills necessary to become an independent reader at an earlier age than is likely if phonics instruction is delayed or less systematic."

In 1973, Samuel Blumenfeld wrote *The New Illiterates,* which further exposed the history of how our children are being damaged by being taught reading with improper methods:

"In the course of researching this book, I made a shocking, increible discovery: that for the last forty years the . . . children of America have been taught to read by a method originally conceived and used in the early 1800s to teach the deaf how to read, a [experimental] method which has long since been discarded by the teachers of the deaf themselves as inadequate and outmoded. Yet, today, the vast majority of . . . American children are still being taught by this very method. The result has been widespread reading disability."

In 1979, a three-volume collection of papers by leading researchers was published titled *Theory and Practice of Early Reading,* edited by Lauren Resnick of the University of Pittsburgh and Phyllis Weaver of Harvard. Of the 59 contributors, 53 (about 90 percent) were in favor of systematic phonics and against the prevailing "look and say" method, which they considered harmful.

Following is one quote from this study that is of particular significance:

"First, as a matter of routine practice, we need to include systematic, code-oriented instruction in the primary grades, no matter what else is also done. This is the only place in which we have any clear evidence for any particular practice."

In 1983, Harvard professor Jeanne Chall reaffirmed her previous research findings and recommended that teacher training be changed to require the teaching of intensive, systematic phonics, essentially the same approach that had been used successfully before the "look and say" method was introduced.

In 1985, the U.S. Department of Education released a report prepared by the Commission on Reading titled *Becoming a Nation of Readers,* which once again confirmed the obvious:

"Classroom research shows that, on the average, children who are taught phonics get off to a better start in learning to read than children who are not taught phonics. . . . The picture that emerges from the research is that phonics facilitates word identification and that fast, accurate word identification is a necessary but not sufficient condition for comprehension. . . . Thus, the issue is no longer, as it was several decades ago, whether children should be taught phonics. The issues now are specific ones of just how it should be done."

This fall, 1989, another major study will be released by the Center for the Study of Reading at the University of Illinois, titled *Beginning to Read: Thinking and Learning About Print, A Summary,* by Marilyn Jager Adams. This study will be of particular interest to teachers, because it once again reaffirms the need to teach the English language as a system, and suggests that well-developed concepts about the form and function of print, including rapid recognition of letters, awareness of sounds in spoken words, and rich experience with books and stories, are important underpinnings for children's success in learning to read.

HOW HAVE THE READING PROFESSIONALS RESPONDED TO RESEARCH FINDINGS

Since admitting fault is not an easy thing for anyone to do, most education professionals respond to research findings that advocate the teaching of intensive systematic phonics with the following excuses: there isn't an illiteracy problem; we do teach phonics; no one method is best; English isn't phonetic; word calling isn't reading; the child isn't ready; the child has a reading disability; it's the parents fault; it's too much TV. But if we are to solve the problem of illiteracy in America, we must stop making excuses and take immediate action to change the methods of teaching.

In December of 1982, a survey of 1609 professors of reading in 300 graduate schools was conducted. When asked which reading authorities of all time, in their opinion, had written the most significant, most worthy, "classic" studies in reading, the top three individuals on the list, in order, were Frank Smith, Kenneth Goodman and Edmund Huey, all well-known, vociferous, dedicated, dogmatic, enemies of early, intensive teaching of phonics. Frank Smith and Kenneth Goodman are two of today's most influential proponents of the "look and say" or as they would term it, "whole language" method of teaching reading.

San Diego State University Professor Patrick Groff recently reviewed 43 reading texts, all published in the 1980's and used by teacher's colleges in training reading teachers, to see if they included the findings of researchers that the "code-emphasis" or phonics method of teaching reading should be used. He found that none of these books advocate phonics. In fact, only nine of these books inform teachers that there is current debate about if or when phonics should be taught.

Despite the overwhelming volume of research supporting early, intensive, systematic instruction in phonics, college textbooks used by most university departments of education fail to apply this research in the training of prospective teachers.

The National Education Association declared in the 1983-84 Annual Edition of *Today's Education* that "the overemphasis on phonics with beginners" is now "ready for the scrap heap."

WHY DO FAULTY METHODS CONTINUE TO BE USED? IT'S BIG BUSINESS!

The sale of instructional reading programs is big business today, as it has been since the 1930's when the basal reading series for elementary schools were introduced.

Each year publishing companies compete for the adoption of reading programs in states like California and Texas where millions of dollars of expendable "look and say" workbooks are purchased every year. Many Americans will recognize Dick and Jane, Alice and Jerry, Janet and Mark, Danny and Sue, or Tom and Betty. These are the characters in the "look and say" readers that most of us have grown up with.

The 1986 National Advisory Council on Adult Education report, *Illiteracy in America* cites several examples of how the cost of reading instruction can be reduced, while at the same time improving reading scores:

"In her book, *Programmed Illiteracy in Our Schools,* [Mary Johnson] says that: 'The workbooks to a sight method ["look and say"] basal series soon become superfluous whenever phonics is taught by a direct method. . . . the annual expenditure on workbooks was more than four times greater than that on hardcover readers [used in a phonics first program]. (The workbooks have to be replaced each year because the children write in them.)' "

The Superintendent of Schools in Seekonk, MA, hired a private sector organization to train his primary-grade teachers in intensive systematic phonics. The cost of reading materials to implement the new program was eighty-eight percent less per pupil than the "look and say" reading program previously used in the district.

"Mr. H. Marc Mason, Principal of Benjamin Franklin Elementary School in Mesa, Arizona, said that in 1978 his school spent $23.42 per student on reading materials. In the same year his teachers were trained [to teach phonics]. By 1981, expenditures for reading materials had dropped to $8.50 per student, [while at the same time] achievement scores . . . surpassed the national, state, and district norms in language as well as in math."

ADDITIONAL OBSTACLES TO READING REFORM

In his book *Preventing Reading Failure: An Examination of the Myths of Reading Instruction,* Dr. Patrick Groff devotes an entire chapter to a question that is most commonly asked: Why do the myths of reading instruction prevail? The answer is summarized below.

There is no single reason for the fact that research findings are not applied in teacher training institutions, or in the classroom. Common sense is defeated by the:

Forces of tradition;

Interlocking relationships between basal reader publishers and reading experts;

Refusal of reading experts to accept outside criticism;

Reading experts' lack of knowledge about phonics teaching, negative biases toward phonic instruction, and fear that phonics advocacy equals political conservatism;

Negative attitudes toward phonics by teacher's organizations;

Unsubstantiated information in educational publications;

Expectancy that research will not affect teaching practices;

Refusal to admit that there is a literacy crisis;

Lack of legal redress for malpractice in reading instruction; and

Establishment of public schools and teacher education is a monopoly.

HOW DO TEACHERS FEEL ABOUT READING METHODS?

Most teachers use methods of teaching reading that their professors teach them, or they follow the teachers guide for the textbook series used in their school system, neither of which present logical and systemic instruction in phonics.

In an *Education Week* article, June 12, 1985, Rudolf Flesch concluded:

"Decades of painstaking research have shown that neither our schools nor our teachers are to blame [for the illiteracy problem in America]. Rather, the fault lies with a method of teaching reading that was first proposed for general use in 1927 and has since been adopted in most of our schools. It is called the 'whole-word' ['look and say'] method because it relies on memorizing the shapes and meanings of whole words. It was introduced with the best intentions: the idea was to make learning to read more fun for our children. Today, it is almost universally used in this country."

The results are evident in an illiteracy rate that is the highest in our history. We should not place the blame on our teachers but rather, we need a major overhaul of our

teacher training institutions. We will not halt the continued spread of illiteracy in America without this critical reform.

THE READING REFORM FOUNDATION—MOVING FROM WHAT'S NEW TO WHAT WORKS

In the forefront of the effort to apply research findings to the teaching of reading has been the Reading Reform Foundation (RRF), organized in 1961. Since that time hundreds of teachers and thousands of children have benefitted from the practical application of the sound, proven, techniques of reading instruction RRF has promoted. Below are just a few of the success stories that can be told, and the implication for the nations' schools should be crystal clear.

If children are taught intensive, systematic phonics at any early age, until it is automatically applied in the reading process, then illiteracy is dramatically reduced, comprehension improves, and remediation is virtually unnecessary, except for very few.

Example 61: Ask Mary Musgrave, Principal, Gallegos Elementary School, Tucson, AZ:

Mary was a teacher in the Sunnyside School District for fifteen years where achievement in reading, math, and writing was always last. "People would say, 'Well, it's these children.' That offended me because I subscribe to the idea that 'God don't make no junk'" She was appointed to a study committee to come up with recommendations on how to improve achievement levels, and one suggestion that the committee approved was to introduce "phonics." Mary had been taught that phonics was "grunt and spit," and that children taught phonics had no fluency in reading and, even if they could read they had no comprehension or understanding. Many other policies were adopted by the review committee, including ways to involve parents, improve discipline, and strengthen teacher training, but the most important policy was the introduction of intensive systematic phonics. After four years the results were unassailable.

The school was open to everyone in the district on a "first come, first served" basis; the capacity was 623 students; 58 percent were minority students; many children came from low-income families; no federal money came to the school other than the school lunch program; there were no learning disabilities teachers, and no need for them; there was no bilingual education because everyone spoke English, and even if children didn't speak English when they came into the school, they did when they left; the grading system had a higher standard than the other 18 schools in the district, and yet 33 percent of students on the district Honor Roll were from Gallegos; and perhaps most important of all, 46 percent of the students in the intermediate grades were former special education students. After one year, only four students remained in the special education category.

The inescapable conclusion:

Teach intensive systematic phonics!

Example No. 2—Ask Charles Micciche, former Superintendent of Schools in Groveton, NH: (Currently Superintendent of Schools in Seekonk, MA)

When Mr. Micciche became Superintendent of Schools, in Groveton, NH, he served one of the 20 poorest counties in the country. He was charged by his School Board to "do something" about the poor reading scores, which were then averaging in the 45th percentile. Everyone, including teachers, parents, and board members, was dissatisfied. After considerable study and research, he concluded the following: "At a point in our not too distant past—some would put the time in the 1920's or '30's—a conflagration was let loose in our nation's classrooms, a bonfire of confusion in the form of a new reading method, look-say, or whole word, which devastated the reading ability of several generations of children, which blackened the landscape of reason, which has given us the scarred legacy we recognize today as illiteracy." But rather than wring his hands in despair, or ask for more money, Mr. Micciche and his teachers decided to try intensive systematic phonics. After a two-week training course, about a third of the primary teachers wanted to try the system. Within three months, the success of their children was so dramatic, all of their colleagues joined in the trial program. Another full year's trial was conducted, and the test scores climbed to, and remained at, the mid-to-high 60th percentile range. At the urging of the staff, and with the enthusiastic support of the parents, intensive phonics was in, and "look and say" was out.

The success of intensive systematic phonics was evident in the improvement of academic achievement, but another side benefit not to be overlooked was it's cost-effectiveness. The old "look and say" system was costing about twenty dollars per child per year to maintain. The cost of the new program over an eight year period amounted to an average annual cost of less than three dollars per pupil. All of this for a program that worked, satisfied the staff and community, lifted reading scores to the mid-sixties on standardized tests, and gave remarkable reading power and enjoyment to the children.

The inescapable message:

Teach Intensive Systematic Phonics!

Example No. 3—Ask Sue Dickson, Author and former first grade teacher:

"In college I had been taught that phonics doesn't work, that the English language is too complicated to be taught that way, and I swallowed that reasoning hook, line and sinker. . . . So, during my first two years as a teacher, I didn't use any phonics. But in 1954[sic], my mother bought a book by Rudolf Flesch called 'Why Johnny Can't Read." At first Sue rejected his recommendations. After all she was "the one . . . with the teaching degree." Finally she decided that she had to do something because ". . . I was losing whole groups of students through the cracks. . . . I decided I would give phonics a try. But I was so scared. My professors had been so adamantly against it. [But the result was that] my class had scored so high on the standardized tests that the [school] administrators thought I had cheated [in reporting my test scores]!" She never went back to teaching "look and say" again.

Then she began to develop her own system of teaching reading, using the principles of phonics, but also using music to make it easier for the children to learn the letter sounds. It took her thirty years to perfect the system, but now hundreds of teachers are using her program with thousands of children, from Maine to California, Michigan to Texas! One school system in Mississippi that used the program in 1988 found that students who were first graders in 1987 improved their reading performance by 42 percentile points on the Standard Achievement Tests. Reading comprehension improved 34 percentile points, and spelling went up 30 points.

The message is clear:

Teach Intensive Systematic Phonics!

WHAT FEDERAL PROGRAMS IMPACT ILLITERACY

According to the Congressional Research Service, Federal assistance for adult education and literacy programs is primarily authorized through the Adult Education Act (AEA). The AEA serves 3.5 million people annually, with an FY89 appropriation of $155 million. Compensatory education (Chapter 1) is specifically targeted toward low income families, and teaching reading is a major emphasis of this program. The FY89 funding for Chapter 1 is $4.5 billion.

Several major studies that have addressed the extent of illiteracy have been funded by the federal government over the years. These include the "National Assessment of Educational Progress," "Follow Through," the "Adult Performance Level" (APL) study, and most recently, the Commission on Reading report, *Becoming a Nation of Readers*, which provided a synthesis of reading research and the present state of the art of reading instruction.

The cumulative amount of money spent on illiteracy by the federal government over the past 25 years has been staggering. The following three programs are only the tip of the iceberg:

Chapter I, cumulative funding from 1966 to 1989=$61 billion;

Right to Read, cumulative funding from 1971 to 1981=$220 million; and

Bilingual education, cumulative funding from 1967 to 1989=$1.7 billion.

The six government agencies that provide the most funding for the problem of illiteracy are: The U.S. Departments of Education (29 programs), Labor (3 programs), HHS (12 programs), Justice (2 programs), Defense (5 programs), and State (2 programs).

RECOMMENDATIONS

1. There should be a moratorium on the establishment of new federal programs to prevent illiteracy, until an assessment is conducted to determine the effectiveness of those programs already in existence.

2. On September 30, 1986, P.L. 99-425 Sec. 901 was approved by the Congress. The law requires the following:

"(a) STUDY.—The Secretary of Education . . . shall conduct a study in order to compile a list, by name, of beginning reading instruction programs and methods, including phonics, indicating—

(1) the average cost per pupil of such programs and methods; and

(2) whether such programs and methods do or do not present well-designed instruction as recommended in the report of the Commission on Reading entitled "Becoming a Nation of Readers".

The listing required by this section shall be written in such a way as to be understandable to the general public.

(b) PUBLIC COMMENT.—In carrying out the study required by this section, the Secretary shall solicit public comments on beginning reading programs and methods.

(c) REPORTS.—The Secretary shall prepare and submit to the Congress such interim reports of the study and listing as the Secretary deems advisable. The Secretary shall prepare and submit a final report containing the listing required by this subsection to the Congress not later than 12 months after the date of the enactment of this Act. The Secretary shall publicize and disseminate nationally the listing required by this section to the education community, parents, and to other interested persons."

This report was due on September 30, 1987, but has yet to be submitted to Congress.

3. Education is primarily a state and local responsibility, however, in some cases the federal government provides funds directly for reading instruction. For instance: teachers providing reading instruction in the 90-day mandated literacy program for federal prisoners; federally funded reading teachers for refugees or immigrants; reading teachers in the Department of Defense dependent schools; teachers of clients in the Job Training Partnership Act basic skills programs; reading teachers in schools that are recipients of Chapter I (Compensatory Education) funds; teachers in bilingual education programs; or reading teachers in any other federally funded program where improving literacy is an objective. In these cases teachers should be required to be trained in intensive systematic phonics. Restrictions in existing legislation, that would prohibit program funds from being used for such training, should be removed.

4. Encourage the nation's Governors to evaluate reading programs in state funded teacher training institutions, and propose legislation requiring teachers to be taught intensive systematic phonics as part of their training to teach in the public schools.

An example is the Ohio law [To Reform The States Education System and To Increase Education Accountability: Amended Substitute Bill #140] that was enacted in 1989, and reads as follows:

"(M) [The State Board of Education shall] formulate and prescribe minimum standards requiring the use of phonics as a technique in the teaching of reading in grades kindergarten through three. In addition, the State Board shall provide in-service training programs for teachers on the use of phonics as a technique in the teaching of reading in grades kindergarten through three."

The overwhelming evidence from research and classroom results indicates that the cure for the "disease of illiteracy" is the restoration of the instructional practice of intensive, systematic phonics in every primary school in America!

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by Mrs. KASSEBAUM on behalf of Mr. ARMSTRONG.

The amendment (No. 1229) was agreed to.

Mrs. KASSEBAUM. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SIMON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1230

(Purpose: To provide for reading instruction in phonics)

Mrs. KASSEBAUM. Mr. President, I send an amendment to the desk on behalf of Mr. ARMSTRONG and ask for its immediate consideration.

The PRESIDENT pro tempore. The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas [Mrs. KASSEBAUM], for Mr. ARMSTRONG, proposes an amendment numbered 1230.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 61, line 4, strike "to" and insert "which may".

On page 62, line 6, strike "including" and insert "such as".

On page 62, line 10, strike "and".

On page 62, between lines 10 and 11, insert the following:

"(ii) reading instruction in methods such as Basal reading method, exposure method, intensive systematic phonics method, linguistic method, Ortin-Gillingham method, sight word ('look-say') method, or whole word method; and

On page 62, line 11, strike "(ii)" and insert "(iii)".

On page 72, line 22, strike "level.";" and insert "level; and".

On page 72, between lines 22 and 23, insert the following:

"(4) training the individuals described in paragraph (3) in reading instruction methods such as the Basal reading method, exposure method, intensive systematic phonics method, linguistic method, Ortin-Gillingham method, sight word ('look-say') method, or whole word method.";

On page 72, line 23, strike "(4)" and insert "(D)".

On page 73, line 1, strike "(5)" and insert "(E)".

Mrs. KASSEBAUM. Mr. President, just briefly, this is an amendment that includes a listing of reading instruction methods which may be provided through State literacy resource centers and Adult Education Act teacher training programs.

It is again an amendment that has been agreed to by both sides.

Mr. SIMON. Mr. President, we have included language in S. 1310 which lists a wide range of methodologies currently used to teach reading skills. This language, which appears in section 354 of title I and section 203 of the title II in S. 1310 is entirely permissive, enabling recipients of Federal funds under this act to have complete discretion over decisions regarding reading instruction. This is entirely in keeping with the Department of Edu-

cation Organization Act, which precludes the Federal Government from mandating curriculum. Such decisions are left within local jurisdiction. Thus the language in S. 1310 listing the different methods of teaching reading skills is not intended, nor should it be interpreted as such, to endorse any one of the reading methods listed, nor to imply congressional preference for one method over another.

In addition, while we have tried to include the full range of different reading techniques currently employed, we recognize that other methods do exist as well, and it is not our intent to preclude their use. Thus, this language does not exclude other methods which are not specifically articulated in the bill from being supported with Federal funds under this act.

Does my colleague from Colorado share this view?

Mr. ARMSTRONG. Yes, that is consistent with my interpretation of the legislative intent behind inclusion of this language. We added this language to S. 1310 to indicate that there are many different approaches to teaching reading. However, in listing the alternative reading methods, we do not intend that its inclusion sends a signal that Congress endorses any one method of reading, nor intends to mandate how reading will be taught with funds under this act. These decisions are best left at the local level.

Mr. SIMON. Mr. President, as it was originally drafted, I had some concerns with this amendment because it would have injected the Federal Government in the field of curriculum in a way that I think is not a desirable precedent.

However, as it has been modified, there is no objection.

The PRESIDENT pro tempore. Is there objection to the consideration of the amendments en bloc? If not, the question is on the adoption of the amendments en bloc offered by Mrs. KASSEBAUM on behalf of Mr. ARMSTRONG.

The amendment (No. 1230) was agreed to.

Mrs. KASSEBAUM. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SIMON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. COATS. Mr. President, in 1986, William Bennett released his landmark report on the condition of elementary schools. That document concluded, "The elementary school must assume as its sublime and most solemn responsibility the task of teaching every child in it to read. Any school that does not accomplish this has failed."

For whatever reason, and there are many, that failure is increasingly evident. About 27 million American adults, a quarter of the labor force, lack the necessary reading and writing skills to perform effectively in the job market. The number of functionally illiterate adults is increasing by over 2 million each year.

Certainly, something must be done. But we must do more than simply pour more Federal dollars into the same programs year after year. This literacy crisis requires innovation—the careful exploration of every option. And some of the most innovative options may well be found in the tested techniques of the past.

This is the reason I support Senator ARMSTRONG's amendment to permit teachers to be trained in phonics instruction and to assure that State literacy resource centers can provide training and technical assistance to educators using this reading method.

There is probably no single best way for every student to learn to read—but each child should be given the chance to learn by the method that will allow them to reach their potential. It's no secret that our teachers aren't given phonics as a viable option for reading instruction. Only about 15 percent of schools in the United States use this method. Yet there is a strong case to be made for its wider distribution.

Phonetics, simply put, is an introduction to the code of written English. Rather than simply memorizing the shapes and meaning of whole words, its pays attention to the organization of letters and syllables. Its primary virtue is clear. A child instructed in phonetics is given the key to pronounce and understand words they have not yet encountered. Rather than guess or memorize a new word, they can uncode its meaning.

Phonetics is a key to reading. But it is also a tool of logic and a pattern of reasoning.

I don't believe that any of our children are unteachable. But we must refuse to restrict our range of options to meet this vital need. We cannot have it said of us, "They thought it more honorable to fail, according to rules, than to succeed by innovation." Phonetics might just be the innovation we require. And this method of learning should be available to our teachers.

AMENDMENT NO. 1231

(Purpose: To permit Indian tribes to apply for Even Start competitive grants)

Mrs. KASSEBAUM. Mr. President, I send to the desk an amendment on behalf of Senator WALLOP and Senator SIMPSON.

The PRESIDENT pro tempore. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Kansas [Mrs. KASSEBAUM], for Mr. WALLOP (for himself, Mr. SIMPSON, and Mr. BINGAMAN), proposes an amendment numbered 1231.

Mrs. KASSEBAUM. I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 76, line 12, strike "Section" and insert "(a) AUTHORIZATION OF APPROPRIATIONS.—Section".

On page 76, between lines 18 and 19, insert the following:

(b) INDIANS.—Section 1052 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2742) is amended—

(1) by inserting ", and to Indian tribes and tribal organizations," after "such agencies" in subsection (a).

(2) by inserting ", Indian tribes, and tribal organizations" after "States" each place it appears in subsection (b), and

(3) by striking out subsection (c) and inserting in lieu thereof the following:

"(c) DEFINITIONS.—For purposes of this part—

"(1) The term 'State' includes each of the 50 States of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

"(2) The terms 'Indian tribe' and 'tribal organization' have the respective meaning given to each of those terms under section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b).".

Mr. WALLOP. Mr. President, the amendment I have sponsored with my colleague from Wyoming, Mr. SIMPSON, is a response to a problem brought to our attention last year by a constituent, Linda St. Clair from Fort Washakie, WY. Mrs. St. Clair has been involved with early child development projects with the Arapahoe and Shoshone Indian tribes on the Wind River Reservation in Wyoming.

Indian children have long been an at-risk population. The tribes have developed various support programs to assist in the educational progress of their children. In recent years, there has been some confusion about what Federal education assistance programs the Indian tribes are eligible. Last week the Department of Education published a list of eligible programs. One program which does not allow tribal participation in the Even Start Program.

Even Start was established in 1988 as an amendment to the reauthorization of the Elementary and Secondary Education Act. It was developed by Congressman GOODLING of Pennsylvania. Even Start combines early childhood education and adult education programs into a new family centered education program. Often a child at risk comes from a family where the parents have a weak educational background. Why should a child struggle for an education when their parents cannot even read to them?

Mrs. St. Clair argues, correctly, that the tribes need a reservationwide program of preschool services. Even Start would be a perfect solution, if it included the Indian tribes as eligible applicants. The amendment I am propos-

ing today would allow the tribes to compete for the grants. They are not guaranteed 1 cent by my amendment. However, they are given the opportunity to demonstrate that their programs can work to eliminate the cycle of illiteracy on the reservation. They are simply seeking an even chance.

I appreciate the assistance of Becky Voslow from Senator KASSEBAUM's staff, and Cheryl Smith of Senator SIMON's staff in working out an agreement on this amendment. I urge the adoption of my amendment.

Mrs. KASSEBAUM. This amendment would permit Indian tribes to compete for Even Start grants. The Even Start Program was created in 1988. It integrates early childhood education and adult education, focusing on projects serving parents eligible for participation in adult basic education programs and their young children ages 1 to 7.

The Wallop amendment would include Indian tribes as eligible grant applicants. The tribes would have to compete for the funds, and the amendment does not earmark funds to them.

I think this is an important addition. Again, I believe it has been agreed to on both sides.

Mr. SIMON. Mr. President, I certainly concur. Native Americans face major problems in our society. Senator WALLOP's amendment is sensitive to those and permits a little greater attention there, and I welcome this amendment.

The PRESIDING OFFICER (Mr. BURDICK). If there is no further debate, the question is on agreeing to the amendment.

The amendment (No. 1231) was agreed to.

Mrs. KASSEBAUM. Mr. President, I move to reconsider the vote, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SIMON. Mr. President, the last amendment—I was just handed a note—is one that Senator INOUYE is also very much concerned about. He chairs the Subcommittee on Indian Affairs.

Let me just add my appreciation again to Senator KASSEBAUM, who has contributed to a significantly improved product. She does solid work consistently. I am very pleased to serve with her on two committees.

Also, let me express my thanks to Cheryl Smith, Pat Fahy, and Brian Kennedy of my staff. Let me express my appreciation also to the thousands of volunteers around the Nation who are tutors, who are enriching this Nation in a quiet, undramatic way that is so important to the future of our country.

A couple of final comments. I was trying to work out an amendment that would in some way encourage proprietary schools to get involved. Frankly, the proprietary schools have reached this portion of our population more effectively than our traditional schools have done.

But it is also true, Mr. President, I regret to say, that a few of the proprietary schools have abused their privileges and we have not been able to work out an agreement. I hope between the House and the conference committee, maybe we can. I would like to see some exploration of how we can, with careful auditing and monitoring, get them involved.

Two final points, Mr. President. Of 158 nations in the United Nations, we are 49th in our literacy rate. We can do much, much better than that. This bill gives us that opportunity. It will not be easy. I do not want anyone to think we passed this bill and because of it suddenly we are going to be on easy street on the road to eliminating illiteracy.

We have taken a very significant step, but it is going to take follow-through by our committee, by the Appropriations Committee, by States, by Cabinet members, by the private sector; all of us are going to have to work on this. This is America's problem, and it is not just one segment of America that is going to be able to solve this problem.

I believe we have taken a very significant, maybe even a giant, step forward in the right direction. I hope that we can pass this overwhelmingly.

Mr. President, I understand that the unanimous-consent agreement says that if there is a rollcall vote, it is to be tomorrow at noon. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. SIMON. I ask that we have a recorded vote on this measure.

The PRESIDING OFFICER. Is there a sufficient second? There appears to be a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, at the core of the many educational issues which we must face in this 101st Congress, the problem of illiteracy is one of our most pressing concerns. Illiteracy in America is a national disgrace. According to one estimate, 25 million Americans are too illiterate to read the poison warning on a can of pesticide, a letter from their children's teacher, or the headlines of a daily newspaper. How can we hope to educate our youngsters and become a more productive nation, when 25 million American adults are functionally illiterate?

Of all of the recent studies, the very excellent book of Jonathan Kozol indicates we are increasing in illiteracy by 1.8 million a year. The problem is not getting better; it is getting worse.

We must act now to address this challenge. In the past, we have too often overlooked the large social and economic costs that we endure by perpetuating illiteracy in such a large segment of society. Adult illiteracy reduces international competitiveness, and increases poverty, welfare and unemployment—at a time when we are increasingly challenged internationally. The quality of our Government and of our democracy itself are threatened, as increasing numbers of illiterate citizens find themselves unable to vote or participate in other ways in the political process.

The National Literacy Act of 1990, currently before the Senate, proposes a comprehensive attack on the problem of illiteracy by encouraging Federal, State, and local education and training programs designed to make America a more literate nation.

The act establishes a Federal Cabinet Council for Literacy Coordination, so that the various Federal agencies conducting literacy programs can work more closely together. It authorizes a National Center for Literacy to conduct research. It creates State literacy resources centers to link States with the National Center. It modifies existing adult education councils, to bring them closer to the model which has been used effectively in Massachusetts to coordinate literacy programs at the State level. The act extends for an additional year the Student Literacy Program which I sponsored in 1988. In addition, the adult education, worksite literacy, library services, college work-study, and action programs are enhanced. New programs are authorized in family literacy and in the use of volunteers for tutoring.

I commend Senator SIMON for his leadership and tireless efforts to bring this legislation to the floor. I urge my colleagues to support this initiative. America will reap substantial benefits in the future when the citizens who will be assisted by this bill are taught to read, to become employable in our increasingly technological economy, and to care for themselves and contribute to our Nation's strength, rather than adding to its weakness.

● Mr. PELL. Mr. President, I rise to commend Senator SIMON for his strong leadership in an area which is vital to our strength as a nation. I was delighted to be an original cosponsor of his important proposal, the National Literacy Act of 1989, and I am pleased to stand today in support of this critical piece of legislation.

Senator SIMON's initiative is a solid and important piece of legislation designed to assist millions of individuals across the country learn to read, write, and perform basic skills. The development of these skills is imperative for individuals to live productive lives and participate actively in society. The vitality of our economy and the success of our experiment in democracy depends upon a citizenry with well-developed educational skills. If we as a

nation expect to compete effectively in the global arena, we must invest in this most vital element. S. 1310 is part of this investment. It is an investment we cannot afford to forgo.

The number of individuals in our country who are unable to read or write with the proficiency necessary to meet the demands of our increasingly complex world is startling. The Department of Education estimates that there are nearly 20 million adults who are lacking in literacy competence. In my own State of Rhode Island, it is estimated that there are at least 10,000 adults in need of literacy assistance and training.

Senator SIMON's bill attacks the scourge of illiteracy from every front. It strengthens and coordinates existing literacy programs. It provides increased funds for teacher training and research. It reaches the intergenerational aspect of illiteracy by providing early intervention programs for families. It fortifies work force literacy programs, and in conjunction with the College Work Study Program, it encourages institutions of higher education to develop and promote literacy tutoring programs.

Keeping this country strong is not simply a task for the military. As I have said time and time again, we rely on a well-educated citizenry for a strong and healthy nation. The growth of illiteracy is a threat to our strength and a waste of our potential. S. 1310 provides the tools to reverse this trend, and the means to bring literacy within the reach of every American.

I commend Senator SIMON and his staff for their hard work in this most critical area, and I urge my colleagues to join me in supporting this critically important legislation.●

Mr. SIMON. Mr. President, Senators KENNEDY and PELL have provided real leadership to this whole area. Without their cooperation, we would not be at this point today.

Mr. HATCH. Mr. President, I am pleased today to be able to support S. 1310, the National Literacy Act of 1989, along with Senator SIMON, Senator KASSEBAUM, and my other colleagues on the Labor and Human Resources Committee. This bill is a step in the right direction. I was amazed when I read in Jonathan Kozol's book, "Illiterate America," that over 25 million people in our country are illiterate. I continue to be appalled whenever I think of it. A country that provides an education to all its citizens should not have any illiterate adults.

As a citizen, I am proud that our President and First Lady have highlighted this critical national issue. The President's budget calls for major increases in funds for literacy initiatives in adult education programs, Even Start, the Student Literacy Corps, and Library Literacy. The President has also requested increased funds to continue the Dropout Prevention and Reentry Demonstration Program to ensure that fewer of our children leave school and suffer through life as adults who cannot read.

Mrs. Bush, in particular, has devoted countless hours to promoting literacy. Her efforts to raise our national consciousness are in large part responsible for the Senate's action today.

I would also like to commend the media for the efforts they have made to focus our attention on the problem of illiteracy. Statistics may document the seriousness of the problem, but the stories developed by the entertainment industry in documentaries, television movies, and major motion pictures dramatize the day-to-day tragedies the illiterate face as they attempt to apply for jobs, use public transportation, read signs which alert us to dangers, read labels on medicines, or order dinner from a menu. The ABC television network has done some wonderful commercials with well-known entertainers reading to children to encourage literacy, and CBS has continued its "Read More About It" project with the Library of Congress. These kinds of programs set a standard for all of us.

Finally, we must remember that despite the marvelous computer technology we have that can assist us, learning to read is still a one-on-one process involving people. All our efforts at the Federal level or to highlight the issue on television are useless without the dedicated corps of volunteers in every community. In my home State of Utah, the First Baptist Church in Salt Lake City has an excellent program which coordinates with many other community groups to train volunteers who can then work individually with those who need help.

These volunteers are opening the door to opportunity and freedom—the freedom to form one's own opinions and to explore the worlds of literature, history, music, current affairs, fashion, or finance. I want everyone to have that freedom, and so I urge my colleagues to join me in supporting this bill.

Mr. DURENBERGER. Mr. President, most of us here in this body have been to a different country, where we did not know the language and have faced the frustrations of not being able to do normally simple tasks like ordering off a menu, following street signs, or following daily or world events because you cannot read a newspaper. But for those who do not know how to read, these brief inconveniences we experienced are an everyday occurrence. A life where everyday tasks can become major obstacles.

Although the number of people who are unable to read or write is relatively low—about 3 to 4 million—another 20 to 30 million Americans are functionally illiterate; adults who simply do not have the basic skills to maintain a job or to function adequately in today's society. In my own State of Minnesota there are between 670,000 and 725,000 adults with basic reading skills below the seventh grade level—a level at which an individual should be able to combine ideas and make inferences based on a short, uncomplicated passage.

The human tragedy of illiteracy has long been a concern. Recently, however, the economic aspect of illiteracy has brought a new sense of urgency to the longstanding concerns. We live in a world driven by our ability to communicate. Thus, people who lack basic reading and writing skills are often left out of this world and cannot find jobs that pay above the minimum wage, or cannot find steady employment. The cost in welfare programs and unemployment compensation due to illiteracy is $6 billion annually. In addition, the annual unrealized earning forfeited by persons who lack basic reading skills is $237 billion.

Mr. President, at a time in this country when we need to increase the productivity of our workforce simply to stay even economically with other nations, this waste of human potential is simply unacceptable.

That is why I am proud to join my distinguished colleague from Illinois, in sponsoring the National Literacy Act, S. 1310. We heard testimony before the Labor and Human Resources Committee about the lack of coordination between the hundreds of programs aimed at eliminating illiteracy and the other Federal and State programs aimed at educating and training our workforce, and how you can't find, in one central place, information about successful programs. This legislation puts an end to the disarray in current programs by strengthening and coordinating efforts at all levels of government.

S. 1310 will increase coordination, research and dissemination by establishing several new programs at the Federal and State level to develop and initiate new literacy programs. This bill will provide funding for a number of creative programs like the visual phonics program in my own State of Minnesota. Visual Phonics has taught 60,000 children to read, write and communicate through a series of 46 hand signs and written symbols. Because the basis of visual phonics is sound, it has been especially useful in teaching individuals with learning disabilities, deafness, and other communicative disorders. S. 1310 provides not only the funding for such programs but also provides a new infrastructure which allows for the collection and dissemination of information on successful programs.

This bill focuses on eliminating workplace illiteracy by expanding adult education and by increasing the ability of business and education to form partnerships in their efforts to combat illiteracy. S. 1310 also coincides with President Bush's efforts to focus on the entire family when addressing the problem of illiteracy by expanding the Even Start Program which targets functionally illiterate parents and their children.

Finally, I would like to thank First Lady, Barbara Bush for her efforts in bringing the problem of illiteracy to the attention of so many Americans. Her long-time efforts to encourage people to learn to read and to put a stop to illiteracy have not gone unnoticed. The First Lady's simple but effective message about the importance of being able to read has motivated not only hundreds of people to learn to read, but also has motivated many others to get involved as volunteers in teaching and tutoring those who cannot read.

The bill will open the doors of opportunity to so many people who have been shut out by their inability to communicate with the rest of society through reading and writing. Mr. President, I urge my colleagues to support S. 1310.

ONE OUT OF FIVE ADULTS LACK THE READING AND WRITING ABILITIES NEEDED TO HANDLE THE MINIMAL DEMANDS OF OF DAILY LIVING

Mr. COATS. Mr. President, in my own State of Indiana it is estimated that 600,000 persons cannot read at a sufficient level.

These statistics will affect our level of productivity. It is becoming apparent already that the level of complexity in work tasks is rising at the same time our students are unable to understand less and less.

Illiteracy is especially damaging for poor Americans who rely on literacy as a ticket out of poverty.

These trends are disturbing and merit action.

I am therefore pleased to support the Illiteracy Elimination Act of 1989. This bill includes some important themes to address this severe problem. These are themes that I have stressed throughout my legislative career and that I incorporated into the American Family Act, introduced last spring.

The themes are traditionally American; hard work, accountability, strengthening families and building character.

One area of the bill that recognizes these important themes is titled "Families for Literacy."

This section addresses the cycle of intergenerational illiteracy. No child operates in a vacuum. We know that if the parents are illiterate, chances are the children will be too.

The parents as teachers model incorporated in this bill recognizes that families play a vital role in the education of each student. By teaching the parents, we are teaching the children.

This is the type of program that make sense to implement. Instead of applying a Band-aid solution, it goes to the heart of the problem. We need this type of thought going into every bill we consider.

If we are serious about helping our children, we will take the time to find these type of solutions that help Americans help themselves.

That has always been the American way. I applaud the efforts of Senator SIMON and support this bill.

Mr. KOHL. Mr. President, as a cosponsor, it is with a great deal of pride that I join my colleague from Illinois in support of the National Literacy Act of 1989.

Senator SIMON is well known for the tremendous amount of time and energy he has given to meeting the educational needs of the Nation. When Senator SIMON first announced his intention to leave the House of Representatives to run for the Senate, the educational community thought it would lose one of its strongest supporters in Congress. However, what the House has lost has been the Senate's gain. More importantly, it has been the Nation's gain: The American people have had an ally fighting for educational programs for the past 15 years. I have a great deal of respect for his work in this area, and I am honored to be associated with this comprehensive legislation to eradicate illiteracy.

An essential component of an educated society is that it be literate. Right now we can not meet that standard. But we are beginning to make progress. Educational goals are now being set by the Nation's governors. The President has already announced his education goals for the Nation. Those goals all assume that in order to move America forward, in order to effectively compete in a technological age, all Americans must be given the help they need to be able to read and write. We must not lose sight of this fundamental objective.

It is important to note that a literate work force must also have problem-solving and communication skills. According to the Corporate Task Force on Education's report:

> Undereducated, Uncompetitive USA—It is estimated that 50 percent of the U.S. population will be functionally illiterate by the turn of the century.

With the economy shifting to one where jobs will be added in the high tech and service industries, the skill levels demanded of American workers will be constantly increasing. The report goes on to say that:

> Productivity losses caused by poorly trained workers and remedial training cost industry about $25 billion a year.

Mr. President, this is a fundamental issue that must transcend partisan debate. By all accounts there are at least 23 million adult Americans who are functionally illiterate. In my own State, a report by the Wisconsin Literacy 2,000 Task Force identified 492,720 Wisconsin residents operating at or below the level of functional illiteracy. An additional 412,720 residents were identified as at-risk because they don't have the basic skills required of an information-age society. I commend President Bush in his recent report to Congress on the State of the Union for including among his education goals a declaration that "Every American adult must be a skilled, literate worker and citizen." The Nation has been fortunate to have a First Lady so dedicated to the cause of eradicating illiteracy in this Nation. Barbara Bush has tirelessly devoted hours of her energy and time to fighting illiteracy in this Nation. In the past 9 years, she has participated in over 500 literacy events across the Nation. And the influence of Barbara Bush in working to eradicate illiteracy is reflected in the support that is given to her cause in the President's budget for fiscal year 1991. I am pleased to see requests for increased funding for States to help finance remedial education, and thus help to improve the literacy levels of adults. In addition I am pleased to see the President supporting the creation of a new adult literacy clearinghouse which will help States, volunteer groups, and those in the private sector share with each other what is working in various literacy programs.

Mr. President, it is time we have a national policy on literacy. The Nation can no longer afford to wait.

I thank the Chair and yield the floor.

Mr. ADAMS. Mr. President, I am very pleased to rise today to support S. 1310, the National Literacy Act of 1989. I want to compliment my colleague, Senator SIMON, for his leadership on this bill.

There are between 23 and 27 million adult Americans who are illiterate. This means that one adult in five probably does not read well enough to meet his or her daily needs. The consequences of this are staggering, not only for those who cannot read, but for our Nation as a whole. It is very disturbing to think of parents who cannot read to their children or help them with schoolwork. A work force with poor reading skills has serious implications for our Nation's international competitiveness. Eliminating illiteracy is an issue of both social fairness and economics.

Public awareness of our country's illiteracy problems is at an all-time high. We have seen commendable efforts at the Federal, State, and local levels to deal with this nationwide problem through Government-private sector collaboration. At the same time,

a great need exists to develop a comprehensible approach to achieving universal literacy.

The National Literacy Act establishes a national goal of eliminating illiteracy and authorizes a program to achieve that goal. Current literacy programs will be strengthened and improved.

Special focus is given to the problem of adult work force illiteracy through improved literacy programs under the Adult Education Act. The authorization will be increased for the basic State grant to help adults who have very minimal reading skills. A portion of the grant will be used for teacher training and increased Federal commitment to the Business, Industry, Labor and Education Partnerships for Workplace Literacy Program.

Statistics indicate that children whose parents are illiterate are less likely to do well in school and more likely to be illiterate themselves. Clearly, this indicates that we must also address the problem of illiteracy at the family level as well. Consider the child who has difficulty with a homework assignment, but cannot ask for help from either parent because neither have the reading skills to understand the assignment. How can we expect these children to have a fair chance to succeed in school?

These kids are at a distinct disadvantage when compared to their counterparts who receive reading help at home. Title III of S. 1310 helps parents learn the skills they need to help their children learn. It focuses on parents with children 3 years old and younger and teaches them how to be teaching parents—parents who otherwise would be at a loss for how they could ever help their child learn because they themselves lack basic literacy skills.

The Books for Families Program under title IV recognizes that children with special needs often do not have access to the books they need. Low-income children often do not have access to any books at all. Title IV increases the amount of funding authorized under the Inexpensive Book Distribution Program. It also creates a new Model Library Literacy Grant Program to encourage the development of effective public library literacy programs.

Finally, this bill will help dedicate more human resources to literacy efforts across the country. Title V encourages colleges and universities to use work-study students in literacy projects and title VI will provide grants to colleges and universities for literacy related student volunteer programs. Title VI also creates the literacy challenge grant to be used for volunteer programs to fight illiteracy which are supported through public-private partnerships.

I urge every one of my colleagues to lend their strong support to this measure. As we struggle to improve education in our country, eradicate drugs and reduce the incidence of crime, maintain our standard of living and regain our global competitiveness, we cannot ignore the impact of illiteracy on these goals. I look forward to the expeditious passage of this bill into law.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment, in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

RECESS UNTIL 1 P.M. TODAY

Mr. SIMON. Mr. President, I ask unanimous consent that the Senate stand in recess until 1 p.m.

There being no objection, the Senate, at 11:08 a.m., recessed until 1 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. CONRAD].

Mr. WIRTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Colorado.

MORNING BUSINESS

Mr. WIRTH. I ask unanimous consent that there be a period for morning business with Senators permitted to speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Colorado.

PRESIDENT BUSH'S SPEECH TO THE INTERGOVERNMENTAL PANEL ON CLIMATE CHANGE

Mr. WIRTH. Thank you, Mr. President.

Mr. President, this morning I was in attendance at Georgetown University, where President Bush spoke to the Intergovernmental Panel on Climate Change. This was a long expected and anticipated, very important address for the President to a panel convened of governmental experts from all over the world, to address the issue of climate change.

The hope had been that the President of the United States would make a very significant speech committing the United States, to actions to address the issue of global warming and outlining what our leadership position and sense of policies were going to be. I must say, it was very important for our President to be there. Who would have imagined a year and a half ago that the President of the United States, a Republican President, would have been at such a conference. It was a start.

But unfortunately, Mr. President, the presentation written for the President by the administration reminded me a great deal of what John Elway said after the Broncos were beaten. John Elway said, "We just showed up." That is about what happened this morning. The United States just showed up.

We announced there is going to be a White House conference on global warming, but there was absolutely no sense of urgency whatsoever, no sense of national commitment, no reference to the agreements that we have made.

Mr. President, at the Paris economic summit in June, the President signed a statement which declared that "Decisive action is urgently needed to understand and protect the Earth's ecological balance. We strongly advocate common efforts to limit emissions of carbon dioxide and other greenhouse gases."

There was no mention of that today at all. At a ministerial meeting in the Netherlands, the administration signed a declaration that recognized the need to stablize CO_2 emissions and emissions of other greenhouse gases. There was no mention of that today at all.

The declaration in The Netherlands went on to urge all industrialized countries to investigate the feasibility of achieving targets, to limit or reduce CO_2 emissions, including a 20-percent reduction of CO_2 emissions by the year 2005. There was no mention of reducing greenhouse gases today at all.

We are still left, Mr. President, without a policy, much less without any sense of urgency whatsoever. We would welcome, of course, research. It is always important to do research. We welcome the President's reference to debt-for-nature swaps. This may be the first time there has been formal Presidential embrace of that concept—and it is very important. Still, there are certainly no basic policy outlines at all.

The three basic policy responses to global warming—which we can do right now—remain unattended: Energy efficiency, alternative energy programs, and population. The great concern that has been expressed by the administration is that somehow, if we do something about global warming, we are going to cause ourselves all kinds of economic problems, as if, if we act on global warming, we are going to lose jobs, or whatever it may

be. That is nonsense, and everybody knows it.

In the area of energy efficiency, for example, we use energy half as efficiently as our German and Japanese competitors. We are only 50 percent as energy efficient. If we were to commit ourselves to a major national initiative led by the administration on energy efficiency, we could save a great deal of money, we would pollute a great deal less, become more energy independent in the United States, and less dependent upon those countries in the Middle East from whom we are importing an increasing amount of energy.

Does it make good economic sense to pursue energy efficiency? Of course, it does. But there is no commitment on that front at all. That is item No. 1 that has to be done in the global warming strategy.

The second stop is alternative energy programs. You know, I know, we all know, that the United States is becoming increasingly dependent, now 50 percent dependent in terms of oil use, on imported oil.

What sense does it make for us to continue that pattern? The President himself outlined alternative energy sources as one of the important parts of his clean air strategy, but unfortunately, we saw no reference to that, no kind of commitment for us to move ahead on solar, hydrogen, readdressing ourselves to the nuclear problem, the whole set of alternative energy programs that we in the United States must pursue, if we are going to clean-up the environment and maintain any kind of economic integrity in this country.

We cannot allow the hemorrhaging of imported oil to continue. We cannot allow our current dependence on oil to remain a basic part of our economy either. That is the second area left unattended.

The third one, perhaps a bit more ideological, the population issue. The President will not address that issue any more. He used to have a strong position on population. Apparently, he changed his position. Everybody changes positions, but again we have to get the United States back in a position of world leadership on this enormously important issue of population growth.

There are 5 billion people in the world now. By the middle of the next century, we will be close to more than 10 billion people, and some estimate as many as 12 billion to 14 billion people.

How in the world can this globe sustain that kind of enormous population growth and maintain any kind of living standards to which we have become accustomed and would like our children, grandchildren, and great-grandchildren to have?

The administration refuses, as we all know, to even address that issue. Let us just leave it aside and come back to that another day and say of those three basic elements, energy efficiency, alternative energy programs, and population, at least we can ask the President to take the lead on two of these.

It was disappointing, Mr. President. Unfortunately, it was not even as strong a response today as that which Secretary Baker had in his very fine speech early in the administration, January or February 1989, in which the Secretary said that he recognized the problem. We should not just wait for more research. We have to act now. I wish that kind of action had come.

The final question I think we have to ask is, who is setting science policy for the administration? Just last Friday, more than 50 percent of all U.S. Nobel laureates and almost half of the members of the National Academy of Science, sent the President a letter urging him to take action to prevent global warming. Fifty percent of the Nobel laureates and almost 50 percent of the members of the National Academy, getting together and writing to the President saying: Take action to prevent global warming.

Unfortunately, we heard today the President inferring that politics and opinion have outpaced the science. What does that mean? When the scientists are coming in and saying, "act," somehow it seems what is happening is that the White House is getting embroiled in some kind of a political agenda up there, or maybe a conflict between the Chief of Staff and the scientists in the administration. Who knows?

It certainly is incumbent upon this administration to sort out what the message is going to be and to get back it seems to me, within the mainstream of what we know has to be done, what the scientific community nationally and internationally is saying has to be done, and to provide once again the kind of leadership that we expect from our Government, that we expect from the United States on a worldwide problem of such extraordinary note.

What an anomalous situation, Mr. President. You and I sit in Budget Committee hearings and listen to the administration come in and argue for $300 billion on defense.

In response to a Soviet threat that withers more every day, it just does not make sense. You know that, I know that, the American people know that. Yet we continue to insist on spending all of this money on defense whereas the major global threat is no longer the Soviet Union. It is what we are doing to the ecology of the globe, global environmental issues. We are saying let us continue to address ourselves to yesterday's, last year's, last decade's problems, put blinders over our eyes, and not think about the future.

I hope that the sense of urgency that many in this body feel and perhaps the sense of outrage that I am sure is shared by other Members of the Senate and of the country will be heard by this administration. We just have so much more to do. It bewilders me why we do not take a leadership role. It bewilders me why the steps that are so obvious to be taken are not being taken. I hope that we will in the future have a response from the administration that is significantly stronger.

Thank you, Mr. President.

I yield the floor.

The PRESIDING OFFICER. The Senator from Oregon.

BICENTENNIAL OF THE FIRST MEETING OF THE SUPREME COURT

Mr. HATFIELD. Mr. President, I am grateful to the Senate leadership for reserving this time today for a special commemoration. The commemoration is the bicentennial of the first meeting of the Supreme Court. It is my privilege to serve, along with my esteemed colleagues, Senator KENNEDY, Senator THURMOND, and Senator DECONCINI, on the Commission on the Bicentennial of the U.S. Constitution.

Mr. President, it was last Friday, some 200 years ago, February, 2, 1790, that the first meeting of the Supreme Court occurred. On that day the Court gathered for the first time, not across the street from us, but at the Royal Exchange in New York City. And with it commenced the work of the third great branch of our Federal Government.

For the past 2 years the Commission, chaired by our distinguished former Chief Justice of the United States, Warren Burger, has sponsored the celebration of numerous significant dates in the 200th anniverary of the writing, ratification and implementation of the U.S. Constitution.

The bicentennial events will culminate next year when we celebrate the ratification of the Bill of Rights, the first ten amendments to the Constitution.

Mr. President, when George Washington signed the Judiciary Act in 1789, he nominated six members to the Supreme Court. He appointed as Chief Justice of the United States, John Jay. Along with him were the distinguished Justices James Wilson, John Rutledge, John Blair, Jr., William Cushing, and James Iredell. The Judiciary Act of 1789 called for the Chief Justice to appoint two of the members of the Court to each of the three circuits that were then established, known as the Eastern, Middle and Southern Circuits.

Also, it is worthy of note that the burden of circuit riding made it difficult for President Washington to find qualified men willing to serve on the Court. During the first decade of government under the Constitution, the Justices' caseload in Federal trial and appeals courts was much heavier than that of the Supreme Court itself, and for Justices "riding circuit" by horse, stage coach, and later steamboat, traveling was arduous and in some cases physically dangerous.

To meet twice a year in Supreme Court session and to travel circuits regularly took its toll on the Justices. In letters to family and friends, they recorded their difficulties in traveling great distances through all sorts of weather, over poorly marked and badly made roads. They lodged at taverns or other public houses that were often crowded, dirty, and disease ridden. The quality of food and habitation was occasionally very good but often very poor.

Justice James Iredell rode 1,900 miles on the Southern Circuit in 1790. He wrote: "I scarcely thought there had been so much barren land in all America." When transfered temporarily to the Eastern Circuit, he praised New England for its "regularity and decency" but added that there "are the most stones that I ever saw."

We had hardy gentlemen in those days serving on our Court, and, Mr. President, I believe it is worthy to pay tribute not only to those earliest of our members of the Judiciary but to those who have followed.

The appearance of a Supreme Court Justice on the circuit was always regarded as a great event. The Justices used the occasion to explain the new Federal Government. When they met with grand juries, the charges or instructions given by the Justices were often appeals to patriotism, honor and duty; some were informal discussions—civic lessons—of the role of the new Federal Government and the concepts of federalism.

In the early years the Court often would announce the judgment in a case and sometime later read the opinion from the Bench without issuing a copy of the opinion. In those days, an opinion day was announed in advance and it became something of a social event. Legend, with some support, tells of an occasion when a Justice, reading an opinion over a period of an hour or more, observed a favored friend enter the courtroom, whereupon he began reading the opinion all over again.

There have been great changes in the Supreme Court's practices in 200 years. For the first 100 years, there was unlimited time allowed for oral arguments. Because it heard only a few cases a year, the Court allowed as much time as 3 to 6 days for argument. Today the Court hears four cases a day, 3 days each sitting, with 150 or more signed opinions in a term of Court.

In 1950 there were 1,321 cases on the Court's docket; by 1988 that number had grown to 5,657.

On the first day on which the Supreme Court met it Court appointed the "crier of the Court." The Court was uncommonly crowded. Newspaper accounts tell us that in attendance were the mayor, sheriff, gentlemen of the bar, Members of Congress, the Attorney General, and many respectable citizens.

John Tucker, the first clerk mistitled the Court minutes as those of the Supreme Judicial Court of the United States, rather than the U.S. Supreme Court.

Legend has it that one of the first Justices, William Cushing, wore a wig from his house to the Court on the first day and was the laughing stock of the town, since wigs were consistent with English, not American custom.

Mr. President, rarely have I heard a more eloquent description of our Nation than the one made by our President in his State of the Union Address last Wednesday. He spoke of, "America—not just the Nation—but an idea, alive in the minds of people everywhere. As this new [post-cold-war] world takes shape, America stands at the center of a widening circle of freedom—today, tomorrow, and into the next century."

I repeat those words today, Mr. President, as we celebrate the bicentennial of our Federal judiciary system. For while the Supreme Court and our Federal court system, are among the oldest of our institutions, they continue today to be among its most vigorous and the fertile soil for continuing growth of democracy in our land.

In the 200 years since that day when the Court first met, the political winds in this Nation have blown in a great many directions. But the Court has remained firmly founded on law, and has remained a beacon of liberty and justice. Like the Constitution it seeks to protect, our judiciary is alive, healthy, poised to meet the winds of the future, as well.

Considerable debate preceded the historic first gathering of the Court back in 1790. The idea of an independent Federal judiciary was unprecedented in world history, and no one was sure what the experiment would bring.

Federalist spokesman Alexander Hamilton declared that "the judiciary is the least dangerous branch of the national Government." Anti-Federalist, Robert Yates, retorted that "Federal jurists could mold the Government into almost any shape they please," and he insisted that the supremacy of the Federal judiciary was inevitable.

We look back on the experiment with nothing short of awe. Evidence of the foresight and vision of our Founding Fathers abounds, but perhaps nowhere more clearly than in the institution of the Supreme Court.

I do not think I exaggerate when I say that our democracy thrives today because the writers of the Constitution realized that justice would not be served without an independent body whose duty it was to give authoritative meaning to the Constitution.

To ensure justice is the high calling of a government and today the Supreme Court and our judicial system make that goal a reality. Chief Justice William Rehnquist put it eloquently:

> Many nations have impressive guarantees of free speech, free elections, and the like. But these have not had the same meaning in those countries because of the want of an independent judiciary to interpret them.

Rising above the heat of the political moment, the Court has served to empower the powerless, defend the weak and to protect individuals—and the individual liberties that are the birthright of all Americans.

The Court's decisions have not always been popular, Mr. President, but justice is not a popularity contest. Justice is an abiding ideal—and, because of the foresight of our Founding Fathers justice has become reality. For 200 years it has been a reality, as it has been guarded by our courts.

I rise here today on the bicentennial of that first meeting in New York to celebrate that ideal—the ideal of justice for all, having become a reality. And I rise to express my thanks to Almighty God for the birth of freedom and justice 200 years ago that has continued to place this great Nation "at the center of a widening circle of freedom—today, tomorrow, and into the next century."

Mr. KENNEDY. Mr. President, I too want to join the Senator from Oregon in expressing our appreciation to the leaders for providing this time for statements and comments on the bicentennial of the Supreme Court. I want to pay tribute to Senator HATFIELD of Oregon for initiating these few comments in the history of the Senate, to set this time aside so that we can make some comments and take some stock on that extremely important institution that celebrates its bicentennial birthday today.

THE BICENTENNIAL OF THE SUPREME COURT

Mr. President, 200 years ago, on February 2, 1790, a quorum of the six original justices of the Supreme Court of the United States gathered for their initial meeting. There were no reporters present and no protesters with placards pacing the sidewalk outside the meeting.

Indeed, there was no sidewalk.

Before a change of venue to Philadelphia's new city hall, the Justices

met in New York in the Royal Exchange Building. Only three of the six members were present for the Court's opening session on February 1, 1790. After reaching a quorum on February 2, the Court handled organizational matters, admitted attorneys to practice before it, and adjourned its first term 8 days later.

In the ensuring years, the Supreme Court of the United States would endure physical hardship and frustrating inconvenience. The Judiciary Act of 1891 authorized the appointment of circuit court judges; until that time, the Justices of the Supreme Court rode their circuits themselves. The task was arduous and even dangerous. Justice Iredell said he sometimes felt like a "traveling postboy." The Court went through 11 different location changes in 145 years. Three times in the initial years—in 1793, 1794, and 1797—the Court was forced by epidemics of yellow fever to cancel its August term. From 1860 to 1935, the Court met in a chamber of the Capitol Building. It was not until 1935 that the Court moved into its present magnificent building across the street from the Capitol.

The executive branch and the legislative branch of the Federal Government are creations of majority opinion. Each must answer to the Constitution, but each must also answer to the people whose votes are the source of its power. But the judicial branch answers alone to the mandates of the Constitution.

It it that unique responsibility to the Constitution and the obligation to serve as its ultimate guardian which make the Supreme Court unique. While other public officials tend to reflect the majority opinions of the public, the Court must adhere to the rule of law and the constitutional guarantee of equal justice for every citizen.

It has been said that when civilization mastered the art of farming, thereby eliminating the need to roam for food, society could turn to the kinder and gentler aspects of existence. Similarly, in political science terms, it can be said that the new American Nation, by fulfilling the immediate need for sound legislative and executive branches of Government, enabled future generations to enjoy that most priceless of American guarantees of liberty—the supremacy of the law.

As Robert G. McCloskey has written:

> The status of the Federal judiciary in the 1790's was ambiguous and comparatively minor. * * * The paramount governmental tasks were legislative and executive.

The U.S. Supreme Court established at the beginning, remained relatively obscure in its earliest years. But the great Chief Justice, John Marshall, changed all that, and in the years since then, the wisdom of the Founders has been proved many times over.

The Supreme Court has grown and prospered. From its meager beginnings and low expectations as a silent partner in the separation of powers at the Constitutional Convention it has developed into the extraordinary modern institution that protects our constitutional rights and liberties from the passing prejudices of the moment and the excessive intrusions of the Government.

For millions of citizens in this country, the judiciary is—and is too often the only—protector of the rights at the heart of our democracy. It is unfortunate, but true, that the rights of minorities are sometimes unheeded or even hindered by the executive or the legislature. But before the Supreme Court, all are equal. The Constitution requires equal justice for all, and the Justices dispense it.

Our modern history has witnessed many extraordinary social battles played out in the Supreme Court. "It is a quiet place," said Justice Oliver Wendell Holmes, "but it is the quiet at the center of the storm." Again and again, the Court has fulfilled its role of vindicating the constitutional rights of all Americans. From school desegregation to school prayer cases to the right to privacy to the most recent reaffirmation of the first amendment in the flag-burning case, the Court has weathered intense public critics because of its decisions, while holding true to the Constitution's promise of justice for all.

The remarkable record of the Supreme Court over the past two centuries is the most eloquent possible tribute to the wisdom and foresight of the Founders. May the Court's next 200 years be even greater than the first.

Mr. President, I ask unanimous consent that the text of a pamphlet entitled "The Bicentennial of the Federal Judicial System," prepared by the Committee on the Bicentennial of the Constitution of the Judicial Conference of the United States be printed in the RECORD.

There being no objection, the text of the pamphlet was ordered to be printed in the RECORD, as follows:

THE BICENTENNIAL OF THE FEDERAL JUDICIAL SYSTEM

"I have always been persuaded that the stability and success of the National Government, and consequently the happiness of the American people, would depend in a considerable degree on the interpretation and execution of its laws."—George Washington to the Supreme Court, April 3, 1790.

THE FEDERAL COURTS: 200 YEARS

Beginnings

The United States Constitution, which today is the object of praise in this country and which has been copied widely abroad, was the subject of intense controversy when proposed in 1787. Those who favored a strong national government, the Federalists, argued that it was needed to protect the rights of the people. The Anti-Federalists feared that such a government would ride roughshod over those rights.

The judicial provisions of the Constitution were especially controversial. Alexander Hamilton claimed that "the judiciary . . . will always be the least dangerous" branch of the proposed national government. Not so, said an Anti-Federalist pamphleteer: "We are more in danger of sowing the seeds of arbitrary government in this department than in any other."

The Constitution contains only a few provisions about the judicial branch. It established the Supreme Court. The framers also took firm steps to keep federal judges independent and to protect them from reprisals for their decisions. In particular, the Constitution provided that the judges would hold office "during good behavior," which gave them a lifetime position rather than a limited term of office. The Constitution also barred Congress from reducing the compensation of federal judges while they remain in office.

However, the Constitution left it to Congress to determine whether there would be any federal trial courts. Why, some people asked, do we need any federal courts besides the Supreme Court? All the states had trial courts, which could decide the country's legal disputes. Many of the Anti-Federalists didn't want another set of courts, especially courts associated with what they saw as a distant national government. They also realized that federal courts would extend national power, which was precisely what the Anti-Federalists wanted to limit.

Once the Constitution was ratified in 1788, the Anti-Federalists sought to have it amended to ensure that the newly established national government could not interfere with such fundamental rights as freedom of expression and religion. They wanted provisions that ensured that no persons would be denied "due process of law," as well as traditional protections of criminal procedure, such as indictment by a grand jury before a criminal trial could be held, and also the right to a lawyer. They also wanted to make it clear that parties to civil suits, as well as parties to criminal cases, could demand jury trials and that higher courts could not overrule a trial jury's factual decisions. The country, they argued, didn't need a set of federal courts; it needed a bill of rights.

Alexander Hamilton, one of the leaders of the Federalists, agreed that state courts were "the great cement of society." But the Federalists weren't willing to have a judicial system composed almost exclusively of state courts. They argued that a federal court system would create conditions for the new nation's commercial growth, which the Article of Confederation had been unable to provide.

All the factions agreed with the goal in the Constitution's preamble—"to establish justice." But they disagreed over the best way to accomplish that goal. As John Jay, the first Chief Justice of the United States, put it, "The expediency of carrying justice . . . to every man's door was obvious," but "how to do it in an expedient manner was far from . . . apparent." The framers left the controversial question of whether and how to set up lower level federal courts to the First Congress.

Establishing the Federal Courts

The First Congress did two things when it convened in the spring of 1789. The House of Representatives set immediately to draft-

ing constitutional amendments to limit the powers of the government. These proposed amendments eventually became the Bill of Rights—the first ten amendments to the Constitution.

Meanwhile, the Senate began working on its first piece of legislation, Senate Bill I, which became "An Act to Establish the Judicial Courts of the United States." President Washington signed this first Judiciary Act into law on September 24, 1789, thus creating the federal court system. Most of the specific provisions in the Judiciary Act have long since been replaced or modified, but the federal court system emboides the Act's basic principles.

The Act was a compromise. For those in favor of national power, it created federal courts in addition to the Supreme Court—three circuit courts for major trials and thirteen district courts for less important cases. Parties could appeal some district court decisions to the circuit courts and some circuit court decisions to the Supreme Court. The Act authorized the district courts to resolve disputes arising on the seas; maritime commerce was the lifeblood of the new nation's economy, and even the Anti-Federalists agreed that federal courts should decide these admiralty cases. The Act established the "diversity of citizenship" jurisdiction that Anti-Federalists feared, permitting suits between citizens of different states to be brought in federal court. It also authorized federal courts to try persons accused of certain federal crimes and to hear petitions from federal prisoners asking federal courts to issue writs of habeas corpus. The Act authorized the United States government to bring lawsuits in federal court and it gave the Supreme Court jurisdiction to hear appeals from state court cases involving the Constitution or federal laws.

The 1789 Judiciary Act was hardly a total victory for the Federalists. It limited the federal courts in many ways not required by the Constitution. The Act did not even grant the district and circuit courts what is now know as "federal question" jurisdiction. Therefore, cases based on the Constitution or on most civil statutes passed by Congress would be decided in the state courts. The states were an important point of reference for the new federal court system: The Act directed the federal courts to use state laws in the absence of federal law to the contrary and used state boundaries as the boundaries for the district and circuit courts.

Thus, under the design of the Constitution as complemented by the first Judiciary Act, federal courts would try federal crimes, admiralty cases, lawsuits by the United States lawsuits between citizens of different states, and a few other matters. The state courts would continue to do the great bulk of judicial work. The Supreme Court was available to correct errors in federal courts and in state courts in certain kinds of cases. With some important changes, this is largely how the system operates today.

Reorganizing the System

Some aspects of the early judicial system seem anomalous today. For example, it required the justices of the Supreme Court to serve also as circuit court judges. In order to do so, the justices had to travel to and around their assigned circuits, trying cases with the district judges. Congress thought this would let the highest judges of the land be seen by the people, and let the justices see the daily workings of the courts.

Almost immediately, the justices began to complain about circuit riding. Travel was difficult, accommodations were often uncomfortable, and the justices were separated from their families for long periods of time. Congress was slow to change the system. The justices' protests grew louder as the country grew and circuit duty became more arduous. Congress made one concession to the justices: when it created an additional circuit, it added another justice to the Supreme Court who would also serve as the justice for the new circuit. Thus, the Supreme Court grew as the country grew. By 1862, it included ten justices, one more than it has now.

Even though circuit riding by the justices was gradally curtailed, the Supreme Court's workload increased, and case backlogs at all levels of the federal court system grew to alarming proportions. After the Civil War, constitutional amendments and federal laws passed to protect the newly freed slaves added more cases to the federal courts' dockets; new laws to promote business growth did the same. In 1867, Congress extended federal court jurisdiction to hear habeas corpus petitions from prisoners convicted in state courts who claimed that their constitutional rights had been violated at trial. In 1875, Congress finally gave the federal trial courts general "federal question" jurisdiction. No longer would most cases arising under federal statutes have to be tried in the state courts as they were under the 1789 Judiciary Act. This change increased the federal caseload still further.

The Supreme Court was now overloaded with appeals from the federal trial courts and the state courts. Many complained that federal trial courts exercised unbridled power because, as a practical matter, there was little opportunity to have their decisions reviewed by the Supreme Court.

Congress did not act until 1891, when it relieved the Supreme Court justices of any obligation to "ride circuit" and began to reduce the categories of cases that the Court was required to decide. Further, Congress significantly reorganized the federal courts by creating a separate set of courts—the circuit courts of appeals—to hear appeals from the federal trial courts. The district courts became the major federal trial courts, and the old circuit courts created by the 1789 Judiciary Act were phased out. This three-tiered system of district courts, courts of appeals, and the Supreme Court remains the structure of the federal judicial system today.

The Federal Courts in American History

Since 1789, the federal judiciary has grown from 13 district judges and 6 Supreme Court justices to over 550 district judges and 160 courts of appeals judges, as well as the 9 justices on the Supreme Court. In these 200 years, the federal courts have played a vital role in the national life, developing important legal principles in the course of resolving individual disputes. Their business in different periods reflected the pressing national problems of those times.

In the nineteenth century, decisions by the circuit courts and the Supreme Court helped create a climate for investment, commercial enterprise, and industrialization. Before the Civil War, federal courts were caught up in the controversy over whether fugitive slaves could be returned to their "owners" in the slave states from which they had fled. After the Civil War, the federal courts were called upon to interpret the civil rights statutes passed to protect the citizens newly freed from slavery.

Today, federal courts decide cases involving economic regulatory statutes and orders issued by administrative agencies. They hear cases based on charges of racial or other arbitrary discrimination, as well as disputes over bankruptcy, patents, copyrights, and admiralty matters. Their dockets also cover the whole range of federal criminal laws. And, as they have for 200 years, they decide cases involving state law between citizens of different states.

As the founders anticipated, federal judges' insulation from public reprisal has permitted them to make unpopular decisions when required by the Constitution, often protecting minority rights or the expression of unorthodox beliefs. When necessary, the federal courts have been the arbiter between the executive and legislative branches of governments, holding each to its constitutional sphere.

By carrying out these judicial responsibilities, the federal courts reflect the commitment of the American people to the rule of law.

The Committee on the Bicentennial of the Constitution of the Judicial Conference of the United States, Hon. Damon J. Keith, chairman, prepared this pamphlet, in cooperation with the Special Educational Services Division of the Federal Judical Center, to promote understanding of the history of the federal courts during the 200th anniversary of their creation. The Judicial Conference is the administrative governing body for the federal court system. The Federal Judicial Center is the federal courts' agency for research, development, and continuing education. The preparation of this pamphlet was supervised by the Honorable Dolores K. Sloviter, United States Court of Appeals for the Third Circuit, a member of the committee, and Russell R. Wheeler, Director, Special Educational Services Division, Federal Judicial Center.

CELEBRATING THE BEGINNING OF THE FEDERAL COURT SYSTEM

Mr. SANFORD. Mr. President, I rise today to commend and celebrate the beginning of the Federal Court System which was established 200 years ago when the U.S. Supreme Court held its first official meeting in New York City. Although the Federal Court System is a highly respected institution today, its beginnings were somewhat tenuous at best.

When the U.S. Constitution was ratified in 1788, it contained only a few

provisions about the Judicial branch. It established the Supreme Court, but left it up to Congress to determine whether there would be any Federal trial courts.

There were those individuals who argued that the country did not need a set of Federal courts. Because all the States had trial courts, it seemed duplicative to establish a Federal Court System. Others, however, realized that a Federal system was necessary to unite the country and to provide a legal forum where the State courts could not properly adjudicate an issue.

Those of us in this Chamber should be especially proud of the fact that when the First Congress convened in 1789, the Senate began working on its very first piece of legislation. It is no coincidence that this was legislation to establish the Judicial courts of the United States. When this legislation was enacted in 1789, it provided that Federal courts would try Federal crimes, admiralty cases, lawsuits by the United States, lawsuits between citizens of different states, and a few other matters. The greatest share of judicial work was still to be handled by the State courts. The Supreme Court was available to correct errors in Federal courts and in State courts in particular kinds of cases. With some important changes, the Federal system continues to operate this way today.

Today, the District court serves as the main forum for litigation. The Circuit Court of Appeals provides appellate review, and the Supreme Court reviews decisions of the Circuit courts. This system is a model of efficiency, and ensures that every litigant has his day in court.

Today, Federal courts decide a broad range of complex issues. The Federal Judiciary is to be congratulated for assuming this burden and performing with extraordinary professionalism. On this anniversary, we should take special note and pay tribute to the 550 district judges, 160 courts of appeals judges, and 9 Justices on the Supreme Court. Without their skills, talents, and devotion, the Federal Court System would not be the outstanding forum for dispute resolution as it is currently recognized by the practicing bar and the general public.

Mr. President, I am delighted to pay tribute to the creation of the Federal Court System, and to the men and women who preserve and protect it. As Americans, we should be relentless in our support for the system, and appreciative of the fundamental role that it plays in modern society. I am truly happy to be able to participate in this most important event.

Mr. THURMOND. Mr. President, today, we are commemorating the bicentennial of the first meeting of the U.S. Supreme Court which occurred on February 2, 1790. On that day, Chief Justice John Jay and five associate justices assembled in New York City.

In 1987, we celebrated the bicentennial of the signing of the Constitution. Last year, the celebration continued with the observance of the convening of the First Congress and the inauguration of George Washington as the first President.

As we continue the bicentennial celebration, we join in marking the beginning of the functioning of the Federal Judiciary, the third branch of Government. During the debates in Philadelphia in the summer of 1787, it was readily determined that there should be a National Government with three coequal branches. The debate on the necessary components of the Judiciary was not as contentious as other issues raised during the Constitutional Convention. The delegates agreed that there should be a Supreme Federal Court to uphold the Constitution and Federal laws but concern was raised that the inferior courts would undermine and duplicate the work of the State courts. Consequently, the delegates, in article III of the Constitution, established a Supreme Court and gave Congress the authority to set up inferior courts. In order to ensure the independence of the Judiciary, the delegates provided that the Justices would be appointed for lifetime rather than elected. The appointment power was given to the President with the advice and consent of the Senate.

A central issue in devising the court system was whether or not the Supreme Court would have the power to invalidate State laws that violated the Constitution. Under the Articles of Confederation, the State courts had the power to nullify the national laws and would often do so when they disagreed with them. The delegates recognized this as a weakness of the current government and sought to correct it by creating a national judiciary. Thus, creation of a national judiciary was an effort to provide a uniform system of justice and uphold Federal laws. During the Convention debates, it was proposed that Congress be given the authority to void States laws. This was rejected. Instead, a provision was included in the Constitution which provided that the Constitution shall be the supreme law of the land. This language, included in article VI of the Constitution, has become known as the supremacy clause. However, the Constitution did not go so far as to provide that the courts would be able to overturn the laws of the States.

Under article III, the duty of shaping the Judiciary was left to the Congress. Therefore, the First Congress enacted the Judiciary Act of 1789 which established the Federal Court System. This Act established one Supreme Court of six Justices, three circuit courts and 13 district courts. The Judiciary Act also made it clear that the Supreme Court could invalidate State laws found to be in violation of the Constitution. The power of judicial review over acts of the Federal Government was later established in 1803 in the celebrated case of Marbury versus Madison.

The fact that our Nation has endured for over 200 years under the Constitution is a true indication of the great wisdom and foresight of those men gathered in Philadelphia during the summer of 1787.

Throughout the bicentennial years beginning in 1987, I have been pleased to serve on the Commission on the Bicentennial of the U.S. Constitution, the Commission has dedicated substantial resources toward educating the people of our great Nation on the rich history of the Constitution. It is my belief that better education about the Constitution gives our citizens a greater understanding and deeper appreciation of the importance of their participation in the system created by this sacred document. This year the Commission will focus its educational efforts on the Judiciary. I encourage all Americans to read and re-read the Constitution so that they may gain a true understanding of the impact of this document on their everyday lives.

This commemoration of the opening session of the Supreme Court reminds us that the Constitution remains the greatest document ever penned by the mind of man for the governing of a people.

Mr. President, it has been my pleasure to serve on the Commission with other Members of the Senate. Senator HATFIELD, Senator KENNEDY, and Senator DECONCINI, and myself are the four Members from the Senate now serving on this Commission. It is a great honor to serve on this Commission and to serve our Nation in celebrating the bicentennial of that great document, the Constitution.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I thank my colleagues who have taken the time to make a commentary on this very important celebration in our political history. I thank especially Senator KENNEDY and Senator THURMOND for their contribution here on the floor and also for their contribution on the Bicentennial Commission, along with Senator DECONCINI, rounding out the quartet of Senators who serve on that committee.

Mr. President, I know there are other Senators who are not able to be with us at this time who have indicated to me they will like to have remarks printed in the RECORD, so I ask unanimous consent that the RECORD be kept open for additional statements that Senators may wish to add to those given here today.

THE BICENTENNIAL OF THE SUPREME COURT

Mr. BIDEN. Mr. President, more than two centuries ago, the framers of the Constitution of the United States created a unique system and structure of government—a system that answered many questions but left others, many of which the framers could not possibly foresee, unanswered. It is the Supreme Court upon whose shoulders responsibility for resolving those questions has fallen. As we celebrate the Court's bicentenntial today, we should rejoice in the knowledge that it has borne that responsibility well.

Time has proven the Supreme Court—the pinnacle of our independent Federal judiciary—to be the "impenetrable bulwark," as James Madison dearly hoped it would, against what was perhaps the greatest fear of the framers—the fear that rights and liberties of the individual would be infringed by the transient tyranny of the majority. Indeed, since the time the framers first met to this very day, we have found ourselves engaged in a national debate over the most profound question that can occupy a democracy—at what point do the rights of the individual prevail over the will of the majority?

That is a question, of course, that the framers did not—and ultimately could not—resolve. But fortunately, the framers did create a process that would move us, case by case, generation by generation, steadily in the direction of a resolution.

At the center of that process has been the Supreme Court—the last and impenetrable bulwark of protection for our freedoms. This process—by which individual rights and freedoms have been secured by the Constitution and an independent judiciary—has been the secret of our longevity as a democracy.

So, as we celebrate the 200th anniversary of the Supreme Court's first full meeting, let us be mindful of the role the Court has played in answering the questions our forefathers left unanswered—and in helping to ensure that each generation of Americans bequeaths to their children a nation that is a little more fair, a little more just, and a little more free.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE BICENTENNIAL OF THE FEDERAL JUDICIAL SYSTEM

Mr. GRASSLEY. Mr. President, I rise to acknowledge the bicentennial of the Federal judicial system, a system created by the Judiciary Act of 1789. The size and structure of the Federal courts system has changed dramatically as it enters its third century. But its essential characteristics are the same: Ensuring the delivery of justice to our people.

With the act of 1789, Congress created a framework implementing the article III requirement that "the judicial power * * * be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish." Our system still follows this plan, though Congress has enacted many provisions over the years on specific provisions.

Mr. President, I rise also to acknowledge the ongoing work of the Federal Courts Study Committee, because this work is so relevant to the courts' ability to sustain a high degree of service to the public.

As my colleagues know, the Federal Courts Study Committee was created by Congress in 1988 to examine the problems facing the courts and to develop a long-range plan for the future. For close to a year, the 15 members of the committee, appointed by Chief Justice Rehnquist, have been meeting on, and studying, the courts' problems. I am proud to serve as 1 of 4 congressional Members, along with Senator HEFLIN, and Congressmen KASTENMEIER and MOORHEAD. Our task is perhaps as important as any facing the courts since the passage of the first judiciary act, 200 years ago.

The problems facing the Federal judiciary, and our judicial system center around the workload of the courts, which is increasing in an unbroken line and at an astonishing pace.

The statistics are of stratospheric dimensions. The number of cases filed in the Federal district courts has gone up by nearly 300 percent since 1960; for the courts of appeals, the increase has been 600 percent.

The criminal caseload has expanded dramatically in the 1980's, with filings up 56 percent. Drug cases have increased by 229 percent, and now account for roughly half of all criminal cases.

It's estimated that by 1991, drug cases will be up another 20 to 50 percent from 1988 levels, as we intensify our antidrug efforts.

One study extrapolated that by the early 21st century, the Federal appellate courts alone will decide approximately 1 million cases each year. That bench would include over 5,000 active judges, and the Federal Reporter would expand by more than 1,000 volumes each year. So much for a uniform body of Federal law.

How did we get to this position? Well the judiciary, unlike the other branches of Government, does not have control over its workload. The courts cannot refuse new cases because they may not have the resources to process them. Given the requirements of due process of law, and the labor-intensive nature of court activities, substantial resources are invested in every case filed, whether they are plea-bargained criminal cases, or even frivolous civil suits.

More cases means more lawyers, and vice-versa. As a nation, we spend more on legal services than ever before—30 percent more than just 10 years ago; we have 5 percent of the world's population, but nearly 70 percent of its lawyers—2½ times as many as Great Britain, five times as many as West Germany, and 25 times as many as Japan. The Japanese surely appreciate the difference. As they have put it: "Engineers make the pie grow larger; lawyers only decide how to carve it up."

The costs imposed by our legal system, both in real terms, and in terms of delay, uncertainty, and lost opportunities, are striking. Lawrence Silberman, now a Federal appeals court judge in Washington, put it this way when he was a Deputy Assistant Attorney General: "The legal process, because of its unbridled growth, has become a cancer which threatens the vitality of our form of capitalism and democracy."

Though I am a member of the Senate Judiciary Committee, I am not a lawyer. In fact, I'm the only nonlawyer on this Study Committee. However, I do not propose to let this distinction prevent me from hitting hard at lawyerly abuses that richly deserve to be hit.

I agree with the assessment of lawyer-economist Peter Huber that much of the business of law is mystification and misdirection: Long words are better than short ones; more words better than fewer. And, of course, if the concept is really important, render it in Latin.

Excess, quite simply, is the enemy of any institution. And professions tend to be an enemy of change because they have a self-interest in the continued prosperity of their profession.

Abraham Lincoln, once a pretty fair country lawyer, advised his colleagues to "discourage litigation," and to "persuade your neighbor to compromise whenever you can. As a peacemaker the lawyer has a superior opportunity of being a good man. There will still be business enough for everyone," Lincoln said.

We are in desperate need of more "Lincolns" among the now more than 700,000 lawyers in the profession. We need fewer gladiators and more diplomats, fewer "hired guns" and more problem solvers.

The Study Committee probably can't change lawyers' behavior, but we can recommend changes to make the Federal courts more hospitable to consensual dispute resolution.

Alternative dispute resolution methods offer courts the opportunity to better serve the people who use our judicial system. Mediation, arbitration, and an array of court-crafted settlement devices can provide prompt, fair, dispute resolution.

This has long been an area of interest for me. Last Congress, we approved legislation, proposed by Congressman KASTENMEIER and myself, to expand a

pilot project in court-annexed arbitration. I'm pleased to see that the Study Committee has been willing to extend these types of proposals nationwide.

I also support the recommendations to improve the "institutional comity" between the legislative and judicial branches. Increasingly, I believe Congress lacks an appreciation for the processes and problems of the judiciary. It's true that we pass on their appropriations, and approve a few judges now and again, but we are largely oblivious to the needs of our coequal branch—particularly to when it comes to the causes and effects of workload.

Often, the increase in workload is directly attributable to acts of Congress. After 16 years in Congress, I've come to know that no real or imagined "wrong" is beyond some legislative "fix"—often with serious implications for the courts' workload. New causes of action are created, and new appeal rights are to be vindicated, only in the Federal courts. It seems that whatever Congress does—whether it's related to the war on drugs, the enforcement of civil rights, or the protection of the environment—ultimately increases the workload of the Federal courts.

This is not necessarily bad, but it's an unmistakable fact.

We can approach the problem of increasing workload in a couple of ways. We can simply increase the numbers of Federal judges to keep pace. Along that line, the Judicial Conference will likely recommend the creation of some 75 additional Federal judges; there are over 20 vacancies left over to be filled by the current Congress.

But this is, of course, expensive—salaries, chambers, libraries and support staffs make for first year costs of up to $1 million per position. It's also, obviously, politically difficult for my friends on the other side of the political aisle to accept 100 or more new lifetime appointees, all named by President Bush—even where there is a demonstrated need.

Other than to simply increasing the numbers of judges, it seems to me that Congress should take the lead in better assessing—and limiting, wherever possible—the adverse impact on the judiciary resulting from our legislative enactments.

Committees of Congress are currently obliged to assess the regulatory and budgetary impact of reported bills, however "pro forma" our compliance has been. But in no way are we required to assess the judicial impact of legislation. I believe this should change, and that the Study Committee should suggest this change.

I believe we also have an obligation to recommit ourselves to forcing committees of Congress to do a better job of legislation drafting—to give more explicit direction to the courts, rather than simply leaving it to the courts to make the tough choices by "filling in the gaps" about our intent.

Congressional imprecision creates gaps. Each gap creates costly, unnecessary, time-consuming litigation—litigation that could be avoided if Congress simply did its job better.

As a remedy, I believe the Congress should institutionalize a kind of "judicial impact statement" for all bills reported by legislative committees—both in terms of the workload impact our bills can expect to have, as well as to formalize a kind of legislative drafting "checklist" to make certain that no unintended gaps are present. Again, I'm pleased the Study Committee has taken on these issues in its recommendation.

Mr. President, under difficult circumstances, the Federal courts have lived up to the aspirations of the framers of article III of the Constitution. But unless Congress attends to the needs of the third branch, and does so quickly, I fear that courts in the next era will be under too much stress to deliver the justice we have come to know and appreciate.

IN COMMEMORATION OF THE BICENTENNIAL OF THE SUPREME COURT AND THE FEDERAL COURT SYSTEM

Mr. DECONCINI. Mr. President, last week the Supreme Court celebrated the 200th anniversary of its first official meeting and the beginning of the Federal court system. The primary foundation of our Federal system is the principle of three coequal branches of Government. When the framers of our Constitution established three separate branches of Government, they recognized that no one arm of the Government should be stronger or more dominant than the other. While each branch was given a check on the other, none was made superior to the others. History has proven the wisdom of those long ago decisions.

For 200 years, the Federal courts have protected the rights of all Americans and stood for the proposition of fairness and justice for all. The Federal courts have been a buffer between our citizens and their Government. They have provided redress and relief for intrusions by governments and by other citizens and have become for many the symbol of equality and freedom. It is highly appropriate that we recognize this important anniversary.

During these times of great change in Eastern Europe, we should be proud that our form of Government stands as the model for the world's emerging democracies. The independent Federal judiciary is admired and respected for the outstanding job they do in maintaining the freedoms we Americans treasure so dearly and other individuals are fighting so desperately for.

I have had the honor to serve as chairman of the Courts and Administrative Practice Subcommittee of the Senate Judiciary Committee and as a member of the committee have participated in the confirmation of many, many Federal judges. I consider the Constitution-imposed responsibility of confirmation of the Federal judiciary among the one or two most important functions of a U.S. Senator. Other than the authority to declare war, there is nothing that a U.S. Senator can do that will have as lasting an effect on our country than confirming lifetime appointees to the Federal branch.

The celebration of the bicentennial of the first meeting of the Supreme Court and the institution of the Federal court system allows us as Americans to reflect on the oustanding heritage we have. I am proud to be a part of the U.S. Constitution Bicentennial Commission and praise the outstanding job being done by our Supreme Court Justices and all our Federal judges.

Mr. COCHRAN. Mr. President, the U.S. Supreme Court had its first official meeting in New York City on February 2, 1790. The experience of the past 200 years is evidence of the unique and important role of the Federal judicial system in our society.

Although our Constitution says comparatively little about the judicial branch, it laid the foundation for an independent judiciary when it created a Supreme Court of the United States and protected Federal judges by giving them life tenure during good behavior and barring reduction in their pay while in office.

The framers, however, gave Congress the responsibility of building a Federal judicial structure on that constitutional foundation. When the Senate convened in the spring of 1789, it began working on its first piece of legislation, Senate bill 1, "An Act to establish the Judicial Courts of the United States." President Washington signed this first Judiciary Act on September 24, 1789, creating a 6-member Supreme Court, 3 circuit courts, and 13 district courts. Although most of the provisons in that act have been modified or replaced, our Federal court system still embodies the basic principles of that legislation.

Today, over 550 judges serve in the district courts, 160 on the courts of appeals, and 9 on the Supreme Court. These dedicated men and women play a vital role in our national life, applying important legal principles in the course of resolving the disputes that are brought before them.

Their insulation from public reprisal has permitted them to make unpopular decisions when required by the Constitution, often protecting minority rights or the expression of unorthodox beliefs. They often referee contests involving various levels and branches of Government, holding each

to its constitutional sphere. We may not always agree with our Federal judges in individual cases, but we must all agree that when they exercise their judicial functions in an able and responsible way, they reflect the commitment of all Americans to equal justice under the law.

I join my colleagues today in congratulating the Federal judges on the bicentennial of the Federal judicial system and in wishing them continued success in service to the Nation.

BICENTENNIAL OF THE SUPREME COURT

Mr. MOYNIHAN. Mr. President, in almost quiet passing, we pause to celebrate—if indeed that is what we do here—the bicentennial of our highest court; what its first clerk mistakenly recorded, from force of habit, as the "Supreme Judicial Court of the United States begun and held at New York on the first Monday of February, and on the first day of said month Anno Domini 1790." And, thereupon, being no quorum established, adjourned "until to Morrow, at one o'clock."

So begun, on the second day of February, on the second floor of the New York Merchants' Exchange—which had been designed and for some time continued to be used as an open-air market—the first term of the first decade of the Court's judicial proceedings. Vested by article III of the Constitution its "Judges—originally six—both of the supreme and inferior Courts, shall hold their offices during good Behaviour, and shall, at stated Times, receive for their Services, a Compensation, which shall not be diminished during their Continuance in Office."

Good "behaviour" was sorely tested. The Court was directed to meet twice in every year; the first term commencing in the cold of February and the second in the insufferable heat of August.

The Judiciary Act of 1789 established 13 district courts in three circuits—the eastern, middle, and southern with the exclusion of Maine and Kentucky—and within each district of the three circuits two circuit courts were established each requiring the presence of "any two Justices of the Supreme Court, and the district judge of such districts.* * *" Riding the circuit was harsh going for the Justices and became cause for discontent.

The Nation was young and much had been sacrificed, not least being the health and good countenance of those early jurists who had helped to establish the Union. In his letter dated March 10, 1790, to Richard Law—United States judge for the District of Connecticut—John Jay—then Chief Justice—wrote of such concerns:

SIR

. . . For accommodations I presume there can be no Difficulty in any Towns in which the Courts are to be held in New England. I wish to lodge in a clean orderly Inn, for as to the Manner in which the Table may be served, it is among the least and last of my Cares.

I thank you Sir! very Sincerely for your kind Attention, and an with great Esteem Your most ob.t & h'ble Serv.t

JOHN JAY.

Our roots in the subject of law and an organized judicature are deep indeed—in Rome and Byzantium—and lest we forget them, we have found in the reflection of our own jurisprudence those earlier jurists Cicero and Justinian. Indeed, the English jurist Sir William Blackstone found "that a competent knowledge of the laws of that society in which we live * * * an highly useful, I had almost said essential, part of liberal and polite education." Yet the neglect of this subject is apparent in the neglect of that branch of our Government which Hamilton suggested could not be complete without, a judicary. "Laws are a dead letter without courts to expound and define their true meaning and operation. * * * To produce uniformity in these determinations, they ought to be submitted, in the last resort, to one supreme tribunal."

Despite the grandiosity of this heritage and of these appeals, the laws of this new Republic were to be "submitted," in fact, on the second floor of a butchers market. And following New York City, moved to Philadelphia in 1791 to quarters unfinished. In the absence of any chambers, the Court met temporarily for its February term in Independence Hall—then State Hall—in rooms left unheated owing to the State Assembly's refusal to provide the Court with stoves which they themselves enjoyed. By the August term of that year, the Court took its rooms in the newly completed city hall but was forced to share them with the mayor's court.

The Court then moved from Philadelphia to the new Capital City of Washington in 1801. Little changed in the way the Court was treated by Congress. Indeed, it was not until 1810 that it received rooms specifically designed for it by the building's architect Benjamim Latrobe. Even in these improved conditions the Court was forced to share its space with other lesser judicial courts including the U.S. circuit court and the orphans' court of the District of Columbia.

These questionable improvements were short lived. The British, of course, burned the Capitol in 1814. A local tavern not far away took to the business of providing accommodations for the Supreme Court of the United States until its return to what was then characterized a "dunjeon" in the Capitol Building in 1817. There is remained, changing twice, until the Court moved again in 1935, after great effort at the behest of Chief Justice William Howard Taft, to Cass Gilbert's temple directly across from the east portico of the Capitol Building.

And now we are to have another building. In some manner an apology for a century and a half of neglect. A moment worth recording. On October 7, 1988, President Reagan signed into law a bill (P.L. 100-480), the Judiciary Building Development Act, which I was proud to have sponsored, authorizing the construction of a second building for the Supreme Court. In the long history of this Republic, in the two centuries of the Senate, this was only the second time we had been asked to provide the Supreme Court a building. The new building will be built on land to the east of Union Station designated for this purpose in the 1981 master plan for the U.S. Capitol. The building is to be of monumental quality—not size—as befits the dignity of the Court. It was complement the tableau of Union Station and the city post office building both designed by Daniel Burnham. And it was have heat.

I would hesitate to think we would or could any longer neglect the importance of that branch of our Government—the judicial—which has for two centuries now preserved and protected the Constitution of the United States.

Mr. HATFIELD. I thank the Chair.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

GLOBAL WARMING

Mr. LIEBERMAN. Mr. President, I rise to join my colleague, the Senator from Colorado, who earlier responded to the statement by the President of the United States this morning on the question of global warming. According to reports I have seen, which are sketchy, about the President's speech today on global warming, it appears he cautioned all of us, scientists included, against trying to solve the problem of global warming by moving too quickly or by burdening anyone, including any of the major industries that are the source of chemicals that most people believe are causing the planet to warm.

That is a bit like telling a firefighter to put out a fire without using water. The truth is, all of us, individuals and industries, are going to have to accept some burdens if we are to protect our endangered planet. In this, as in so many other areas, I think the people are ahead of the politicians in understanding the need for change. Apparently the President does not understand the need for change and does

not want to solve the problem of global warming or even begin to solve it with bold initiatives or strong policies.

He wants to sit back and let events take care of the problem. Let the marketplace work. But the problem is, when it comes to environmental protection that is not enough. That, in fact, is what got us into this environmental nightmare and, unless we have some governmental leadership, there is not going to be any way out of it.

Having shed his alleged wimp image in the conduct of foreign affairs, the President now seems to be about the business of resurrecting that wimp image in the conduct of our environmental policy. The world cannot afford to tolerate a laissez-faire attitude toward global warming. Half the scientists who are members of the National Academy of Sciences and half the American Nobel laureates issued a statement just last week declaring that global warming is a clear and present danger.

There may be disagreement about how quickly the world will warm or by how many degrees, but there is virtually no disagreement that it is happening and all of us are making it happen, and that the long-term consequences of global warming can be devastating to life on Earth as we know it.

Next to how we treat each other in our lifetimes, I think there is no greater measure of our civilization than how we treat our planet, our world. We have abused it for decades and now it is striking back at us. Unless we take dramatic steps to halt the trend toward ecological disaster, it will be too late to stop the degradation of our magnificent planetary resources.

I am concerned, not only by the President's weak and vacillating remarks today at this international gathering of scientists on the question of global warming, I am also concerned about something much closer. That is an unwavering opposition by the President and his administration on the question of whether the Clean Air Act before this Senate now can or should include a provision to limit the emissions of carbon dioxide from automobiles.

Carbon dioxide is the major greenhouse gas, the major cause of global warming. Such standards are essential if we are to make major reductions in carbon dioxide emissions.

I know it is not easy to ask anyone, individuals or industries—in this case the auto industry—to take steps to curb pollution that warms our planet. Change in the status quo is awkward, it is inconvenient, and sometimes it costs us more than we would like to pay. But unless we demand change from ourselves, from institutions and industries around us, the slow and steady ruination of this good Earth as we know it is going to continue. And our children and their children will suffer the consequences of our timidity.

We must provide those who pollute with incentives to stop polluting. It will not happen automatically. That is why we have laws, to help people do things that they would not do, left to their own druthers. We must pass a law that says the auto industry must reduce carbon dioxide emissions and that means increasing the fuel efficiency of our cars. Because it is in the interests of all of us that they do so.

Mr. President, I urge my colleagues to work toward passage of a strong Clean Air Act that contains a provision that will protect us from carbon dioxide emissions warming this planet. That, I think, would be the most effective immediate refutation of the President's refusal to act on this critical issue.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE DEFENSE BUDGET

Mr. GORTON. Mr. President, 1 week ago today, the Congress received the President's Defense budget request for fiscal year 1991. A great deal of concern, thoughtfulness, and wisdom went into the preparation of that document.

This budget, and the ensuring Defense authorization process, represents a cautious turning toward a world which will be significantly different from that of the past 45 years. The fiscal year 1991 budget reflects the uncertain and fragile transition from the end of the cold war to a future that no expert can be confident in predicting accurately. The shocks that ran through the world last Tuesday at the mere, and as it turned out, false rumor of a pending resignation of his party leadership by President Gorbachev reminds us how tenuous, and yet how hopeful, our position is.

To be sure, Mr. President, while we may be approaching the end of the cold war, we are certainly far from the end of history. And if history teaches us anything, it is that the potential for conflict between nations regrettably remains a distinct possibility. So as we consider the defense budget we must all remember that as long as the United States maintains global interests, and proposes to continue as a beacon for freedom everywhere, it will be necessary to support the means to secure a free and peaceful world.

With this as background, I think it's clear to everyone that it is no longer a question of whether the Defense budget will be cut, but by how much, and how wisely? The administration's answer is before us in the budget request: A 2-percent decline in Defense spending, in constant dollars, in each of the next 5 years.

Lest one underestimate the significance of what the administration proposes, bear in mind that if even the modest trends of that proposal are followed, Defense spending in 1995 will be at its lowest level, both as a share of GNP and as a percentage of the Federal budget, since before World War II.

But, Mr. President, I must say in all candor that the administration is deceiving itself if it believes that Congress will not cut Defense spending further for this coming fiscal year and, if present international trends persist, for the next 5 years. The American people will expect us to divert even more resources away from the Defense budget than the administration now hopes. I dare say that an additional $4 to $5 billion is likely to be cut from the President's request before the authorization process is completed. I also believe that such a reduction can be accommodated without causing major damage to our national security.

Additional reductions to the Defense request can be anticipated in the area of strategic force modernization. It is pure fantasy, Mr. President, for the administration to believe that SDI, a program I strongly support, will be increased by almost a billion dollars. With respect to offensive forces, I see little likelihood that, given the new diplomatic environment, the United States will deploy the MX missile in rail garrison mode or build the Midgetman small ICBM. At a time when we need to make hard choices in the strategic area, we may well conclude, as does Richard Perle that "the current generation of ICBM's should prove adequate while the next generation will benefit from further research and development if it is delayed for a few years."

Reducing the overall level of Defense spending is only one-half of the equation. Changes in Eastern Europe and the Soviet Union also warrant, indeed beg, a reevaluation of United States national security interests—and the strategy and forces necessary to protect those interests. The unpredictable nature of the changes occurring in Europe and the Soviet Union make a well-defined strategic approach as challenging as it is imperative.

This is especially true with respect to arms control. It is the height of irony that a negotiated arms reduction agreement with the Soviet Union—both nuclear and conventional—could

leave the Soviets with more forces than if we allow events to take their natural course. As James Schlesinger testified before the Armed Services Committee last week, it would indeed be awkward for the United States to be placed in the position of having agreed to Soviet troop deployments in Eastern European countries that want them out lock, stock, and barrel. Perhaps a decision by the Congress on troop reductions will lead to more dramatic and more prompt Soviet withdrawals than is likely from the CFE process.

I believe, Mr. President, that the Secretary of Defense has established the correct priorities with which to guide the U.S. Defense Program. These are quality personnel; strategic modernization including strategic defenses; versatile, ready, deployable, sustainable conventional forces; continued maritime superiority; reserve forces and mobilization; and special operations forces.

Finally, Mr. President, as defense spending continues to decline, it is vital that we have a clear strategy to guide future choices, and that we guard against the parochial interests of what my friend the chairman of the House Armed Services Committee, LES ASPIN, has termed, the "pork doves"—those Members of Congress who believe that Defense spending should be cut everywhere except at home. Money spent on unnecessary installations is money totally wasted.

These are exciting times, Mr. President. The cause of freedom and justice has won a victory of historic proportions. And American strength, courage and patience has contributed immeasurably to that triump. But we must not be careless in our reaction to these momentous international events. Thomas Jefferson said that "eternal vigilance is the price of liberty." If we agree, and I do, then we must continue to maintain a level of defense spending consistent with the preservation and enhancement of our victory in the cold war.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

The PRESIDING OFFICER. In my capacity as a Senator from the State of North Dakota, the Chair asks unanimous consent that the order for the quorum call be rescinded.

There being no objection, the order for the quorum call was rescinded.

TRIBUTE TO ANN LYNCH

Mr. REID. Mr. President, I rise today to pay tribute to Ann Lynch who will be honored on February 9 at the Las Vegas Area Council Parent Teacher Association's [PTA] Founders' Day Dinner.

Mrs. Lynch currently serves as the national PTA president, but for years she has dedicated her efforts to improving education in Nevada. In her own words, Ann Lynch explains the importance of the parents' role in the education of their children: "Parents must stop just criticizing the schools and expecting teachers to raise their children and start getting more positively involved in their children's education."

The greatest praise that can be said of Mrs. Lynch is that she abides by her own teaching. She is the first national PTA president to hold a full-time professional position. Mrs. Lynch, a Las Vegas, NV resident, is director of public relations and marketing at Humana Hospital Sunrise, one of the largest hospitals in the Western United States. However, Mrs. Lynch makes the time to fulfill her obligations as PTA president and she hopes that her arrangement will serve as an example to other employers and parents.

Ann Lynch has been actively involved in the PTA for over 26 years. She first joined her local elementary school PTA when her son, Ed, entered kindergarten. It was only 1 year later than Mrs. Lynch served as president of her local PTA. Since then, she has held a number of local, State and national positions, including Nevada PTA president, national PTA treasurer and first vice-president of the PTA. She is an honorary life member of 26 State PTA's and the national organization.

In recognition of Mrs. Lynch's lifelong commitment to the Nevada PTA, the Clark County School Board has named a school in her honor. Ann T. Lynch Elementary School will open in Las Vegas for the 1990-91 school year.

To speak only of Mrs. Lynch's involvement in the PTA would be overlooking her countless other volunteer activities. She is a member of the Nevada Governor's Commission on Educational Excellence and the Southern Nevada Drug Abuse Council and has served as chairman of the Las Vegas Civil Service Commission. She is a past president of the Las Vegas Area Council of Camp Fire Girls and currently serves on the board of directors of the Candlelighters, an organization that helps children with cancer, and on the board of directors of CHANCE [Council for Handicapped Children's Education]. Mrs. Lynch was also the founder and first director of Trinity Methodist Day School and Day Camp in Las Vegas. In 1984, she received the Governor's Outstanding Service Award and in 1985, she was honored with the Citizen's Award for Outstanding Service from the city of Las Vegas.

I could continue to list the many honors and achievements of Ann Lynch, but a listing of these could not begin to illustrate the immeasurable contribution she has made on the local, State and national level. She is one of those rare individuals who exemplifies the belief that one person can make a difference. Ann Lynch has already done so in Nevada and she continues to make a difference for parents, teachers, and most importantly, students throughout the country.

RECESS SUBJECT TO THE CALL OF THE CHAIR

The PRESIDING OFFICER. The Chair, in his capacity as a Senator from the State of North Dakota, now asks unanimous consent that the Senate stand in recess subject to the call of the Chair.

There being no objection, the Senate, at 2:01 p.m., recessed until 2:55 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. BRYAN].

UNANIMOUS-CONSENT AGREEMENT S. 169

Mr. LIEBERMAN. Mr. President, at the request of the majority leader, I ask unanimous consent that the Senate proceed on Tuesday, February 6, at 11 a.m., to the consideration of Calendar No. 78, S. 169, the Global Change Research Act, and that it be considered under the following limitation on time: 1 hour on the bill to be equally divided between Senator HOLLINGS and Senator MCCAIN, or their designees; that the only amendment in order be a substitute amendment to be offered by Senator HOLLINGS and Senator BAUCUS to the committee-reported substitute amendment; and that the time on this amendment be included in the total time allocated for the bill; that no other motions or points of order be in order other than a motion to table a motion to reconsider final passage of the bill; and that a vote on any pending amendments and passage of the bill occur immediately following the vote on passage of S. 1310 that has been ordered to occur at 12 noon on Tuesday.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL WOMEN AND GIRLS IN SPORTS DAY

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of House Joint Resolution 82, designating National Women and Girls in Sports Day, which was just received from the House.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 82) to designate February 8, 1990, as National Women and Girls in Sports Day.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the joint resolution?

There being no objection, the Senate proceeded to reconsider the joint resolution.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 82) was ordered to a third reading, was read the third time, and passed.

The preamble was agreed to.

Mr. LIEBERMAN. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. McCAIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REMOVAL OF INJUNCTION OF SECRECY—TAX CONVENTIONS WITH THE FEDERAL REPUBLIC OF GERMANY AND THE REPUBLIC OF FINLAND

Mr. LIEBERMAN. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from tax conventions with the Federal Republic of Germany, Treaty Document 101-10, and the Republic of Finland, Treaty Document No. 101-11, both transmitted to the Senate today by the President.

I also ask unanimous consent that the treaties be considered as having been read the first time; that they be referred with accompanying papers to the Committee on Foreign Relations and ordered to be printed; and that the President's messages be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The messages of the President are as follows:

To the Senate of the United States:

I transmit herewith for Senate advice and consent to ratification the Convention between the United States of America and the Federal Republic of Germany for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income and Capital and to Certain Other Taxes, together with a related Protocol, signed at Bonn on August 29, 1989. I also transmit the report of the Department of State on the convention.

The convention replaces the tax convention that was signed with the Federal Republic of Germany on July 22, 1954, and amended by the protocol of September 17, 1965. It is based on model income tax treaties developed by the Department of the Treasury and the Organization for Economic Cooperation and Development. However, it includes a number of new provisions to accommodate important aspects of the Tax Reform Act of 1986, such as the imposition of a branch tax and strong measures to prevent "treaty shopping."

I recommend the Senate give early and favorable consideration to the convention, together with a related protocol, and give its advice and consent to ratification.

GEORGE BUSH.

THE WHITE HOUSE, *February 5, 1990.*

To the Senate of the United States:

I transmit herewith for Senate advice and consent to ratification the Convention between the Government of the United States of America and the Government of the Republic of Finland for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income and on Capital, signed at Helsinki on September 21, 1989. I also transmit the report of the Department of State on the convention.

The convention would replace the existing income tax treaty with Finland that was signed on March 6, 1970. It is based on the model income tax conventions of the Organization for Economic Cooperation and Development and the Department of the Treasury and takes into account the changes in United States income tax law resulting from the Tax Reform Act of 1986.

The convention contains provisions designed to prevent third-country residents from taking unwarranted advantage of the convention by routing income from one Contracting State through an entity created in the other. The convention also provides for the exchange of information by the competent authorities of the Contracting States.

I recommend the Senate give early and favorable consideration to the convention and give its advice and consent to ratification.

GEORGE BUSH.

THE WHITE HOUSE, *February 5, 1990.*

EXECUTIVE SESSION

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nominations: Calendar Nos. 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, and all nominations placed on the Secretary's desk in the Air Force, Army, Marine Corps, and Navy.

STATEMENT ON THE NOMINATION OF VICE ADM. CHARLES R. LARSON, U.S. NAVY, TO BE ADMIRAL

Mr. McCAIN. Mr. President, reserving the right to object, and I will not object, I would like to take 1 minute of this body's time to recognize Calendar No. 581: "the following named officer for appointment to the grade of admiral while assigned to a position of importance and responsibility under title 10, United States Code, section 601: to be admiral, Vice Adm. Charles R. Larson, Navy."

I am pleased to note that Charles and I graduated together from the U.S. Naval Academy some 32 years ago. He is a man of distinction, of character, and of talent. I believe that in this very difficult and changing time for the U.S. military, we are now giving the U.S. Pacific Fleet the kind of dedicated leadership which is very badly needed. I am, indeed, proud that my friend Chuck Larson would attain this very high position of responsibility.

I remove my reservation, Mr. President,

The PRESIDING OFFICER. Without objection, the acting majority leader's unanimous-consent request is agreed to.

Mr. LIEBERMAN. Mr. President, I further ask unanimous consent that the nominees be confirmed en bloc; that any statements appear in the RECORD as if read; that the motions to reconsider be laid upon the table; that the President be immediately notified of the Senate's action; and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

IN THE AIR FORCE

The following-named officer for appointment as Chief, National Guard Bureau, under the provisions of title 10, United States Code, section 3040, and appointment to the grade of lieutenant general while serving in this position of importance and responsibility under the provisions of title 10, United States Code, section 601:

To Be Chief, National Guard Bureau

To be lieutenance general

Maj. Gen. John B. Conaway, xxx-xx-xxxx xxx-..., FG, United States Air Force.

IN THE ARMY

The U.S. Army Reserve officers named herein for appointment as a Reserve Commissioned Officer of the Army, under the provisions of title 10, United States Code, sections 593(a), 3371, and 3384:

To be major general

Brig. Gen. Francis T. Donohue, xxx-xx-xxxx xxx-...

Brig. Gen. Thomas C. Stones, xxx-xx-xxxx

Brig. Gen. James B. Baylor, xxx-xx-xxxx

Brig. Gen. Donald M. Bagley, Jr., xxx-xx-x... xxx-...

Brig. Gen. Gary A. Stemley, xxx-xx-xxxx

To be brigadier general

Col. Francis D. Terrell, [redacted].
Col. John E. McAllister, [redacted].
Col. Peter W. Clegg, [redacted].
Col. Francis R. Jordan, Jr., [redacted].
Col. Howard T. Mooney, [redacted].
Col. George G. Kundahl, [redacted].
Col. Donald F. Campbell, [redacted].
Col. Robert H.G. Waudby, [redacted].
Col. Lindsay M. Freeman, [redacted].
Col. Charles L. Whitlock, [redacted].
Col. David L. Stabenow, [redacted].

To be brigadier general

Col. Richard F. Reeder, [redacted].
Col. John Compere, [redacted].
Col. Richard J. Dirgins, [redacted].

IN THE AIR FORCE

The following-named officer for appointment to the grade of general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be general

Gen. Robert T. Herres [redacted] FR, U.S. Air Force.

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Richard A. Burpee, [redacted] FR, U.S. Air Force.

The following-named officer for appointment the grade of lieutenant general while assigned to a position of importance, and responsibility under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. Robert D. Beckel, [redacted] FR, U.S. Air Force.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Herbert R. Temple, Jr., [redacted] U.S. Army.

The following-named officer for appointment to the grade of lieutenant general while assigned to a position of importance and responsibility under title 10, United States Code, section 601(a):

To be lieutenant general

Maj. Gen. James W. Crysel [redacted], U.S. Army.

IN THE NAVY

The following-named officer for appointment to the grade of Admiral while assigned to a position of importance and responsibility under title 10, United States Code, section 601:

To be admiral

Vice Adm. Charles R. Larson, U.S. Navy, [redacted]/1120.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be vice admiral

Vice Adm. Paul F. McCarthy, Jr., [redacted]/1310, U.S. Navy.

The following-named officer for appointment to the grade indicated while serving in a position of importance and responsibility designated by the President under the provisions of title 10, United States Code, section 601(a), and to be appointed as senior Navy member of the Military Staff Committee of the United Nations under the provisions of title 10, United States Code, section 711.

To be vice admiral

To be senior Navy member of the Military Staff Committee of the United Nations.

Rear Adm. Robert J. Kelly, U.S. Navy, [redacted]/1310.

DEPARTMENT OF JUSTICE

Michael J. Norton, of Colorado, to be U.S. attorney for the District of Colorado for the term of 4 years.

Walter J. Bamberg, of Alabama, to be U.S. marshall for the Middle District of Alabama for the term of 4 years.

Donald E. Crowl, of Oklahoma, to be U.S. marshall for the Northern District of Oklahoma for the term of 4 years.

Charles E. Healey, of New York, to be U.S. marshall for the Eastern District of New York for the term of 4 years.

Craig L. Meacham, of California, to be U.S. marshall for the Central District of California for the term of 4 years.

James Y. Stewart, of Michigan, to be U.S. marshall for the Eastern District of Michigan for the term of 4 years.

Ronald Frank Ederer, of Texas, to be U.S. attorney for the Western District of Texas for the term of 4 years.

Robert F. Gilbert, of New Hampshire, to be U.S. marshall for the District of New Hampshire for the term of 4 years.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE, ARMY, MARINE CORPS, NAVY

Air Force nominations beginning Maj. William G. Bader, [redacted] and ending Maj. Marsha R. Claybrook [redacted], which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of November 17, 1989.

Air Force nominations beginning Ronald R. Anderson, and ending Ronnie L. Stanley, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Air Force nomination of Consolador C. Palad, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Air Force nominations beginning Maj. Anthony Augello, [redacted] and ending Maj. James A. Balukjian [redacted], which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Air Force nominations beginning Maj. Terry L. Anderson, [redacted] and ending Maj. John D. Moore [redacted], which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Air Force nominations beginning David W. Becker, Jr., and ending Stephen T. Ellis, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Air Force nomination of Gary J. Moore, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Air Force nominations beginning Walter W. Adams, and ending Lawrence F. Sheehan, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Air Force nominations beginning Frank Abate, and ending Don R. Ziss, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Army nominations beginning William J. Mcdougall, and ending * Stephen H. Savage, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Army nominations beginning Calvin E. Mein, and ending Timothy P. Rearden, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Army nominations beginning Thomas W. Allen, and ending Keijiro Nmi Yazawa, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Army nominations beginning Larry T. Bourke, and ending Keith B. Stout, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Army nominations beginning James C. Burke, and ending Joe Wood, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Army nominations beginning William B. Banks, and ending Charles D. Witmer, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Army nominations beginning Richard A. Akre, and ending John D. Zuklic, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Army nominations beginning Rafael A. Acevedo, and ending Frederick J. Zak, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Army nominations beginning Donald R. Ellis, Jr., and ending Bradford S. Goodwin, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Army nominations beginning Albert J. Abbadessa, and ending Scott Avery, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Marine Corps nominations beginning Thomas B. Adair, and ending James F. Zagrzebski, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Navy nominations beginning Paul Michael Bader, and ending Richard Louis Titus, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of November 17, 1989.

Navy nominations beginning Susan K. Arnold, and ending Kevin E. Zawacki, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Navy nominations beginning Kenneth P. Burns, and ending John R. Steenbarger, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Navy nominations beginning T.A. Best, and ending John W. Reeves, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Navy nominations beginning David A. Adams, and ending Michael L. Ziegler, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

Navy nominations beginning Reynaldo L. Apontecestero, and ending Aaron L. Scoggins, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of January 24, 1990.

STATEMENT ON THE NOMINATION OF JOHN B. CONAWAY

Mr. BYRD. Mr. President, I am pleased that the President has nominated Maj. Gen. John B. Conaway for the rank of lieutenant general and to serve as the Chief of the National Guard Bureau. In this new responsibility, he will be the senior National Guard officer representing the interests of the National Guard, consisting of over 570,000 Army and Air National Guard soldiers and airmen. I am proud to say that General Conaway has performed service as a member of the West Virginia Air National Guard early in his career. More recently, he has shared the podium with me on various occasions when I have visited the fine young men and women who constitute the West Virginia National Guard.

General Conaway is a native of Henderson, KY, and a graduate of the University of Evansville, where he received a bachelor of science degree in business administration, and Webster College, where he received a master's degree in management and human relations.

He began his military career while attending the University of Evansville, where he entered the Reserve Officer Training Corps Program and was commissioned as a second lieutenant in the Air Force in June 1965. In 1967, after completing basic pilot training and advanced combat crew training, he was assigned as an F-102 fighter interceptor pilot in the Air Defense Command.

In 1960, General Conaway joined the West Virginia Air National Guard as an SA-16 pilot, flying a special forces operations mission. He was transferred to the Kentucky Air National Guard's 123d tactical reconnaissance wing 3 years later, as an RB-57 pilot and in 1965, became an air technician flying training instructor in operations, flying RF-101's.

He was called to active duty with the Kentucky Air National Guard in January 1968, and served in Alaska, Panama, Japan, and Korea. In October 1972, he was appointed Air Commander of the Kentucky Air National Guard and in December 1974, he was appointed Vice Commander of the 123d Tactical Reconnaissance Wing, with units in Kentucky, Arkansas, Nevada, and Idaho. Other assignments included duty as wing director of operations, wing chief of safety, wing chief of standardization and evaluation, group commander, group deputy commander for operations, and squadron operations officer.

General Conaway was recalled to active duty as Deputy Director of the Air National Guard in April 1977, and in April 1981, became director. He was reappointed director in April 1985, and was named to his current position of vice chief in July 1988.

General Conaway was promoted and federally recognized as a major general on April 1, 1981.

General Conaway holds many honors, including the Distinguished Service Medal, Legion of Merit, Meritorious Service Medal, Air Force Commendation Medal, Army Commendation Medal, Air Force Outstanding Unit Award With Oak Leaf Cluster, Air Force Organizational Excellence Award Ribbon, Combat Readiness Medal With Three Oak Leaf Clusters, Air Force Recognition Ribbon, National Defense Service Medal With Service Star, Armed Forces Expeditionary Medal, Armed Forces Reserve Medal With Hourglass Device, Small Arms Expert Marksmanship Ribbon, Air Force Training Ribbon, and Kentucky Distinguished Service Medal. He is also the Recipient of the Air Force's Eugene M. Zuckert Management Award and the Air National Guard's Order of the Sword. He holds the aeronautical rating of command pilot, and has accumulated over 6,000 military flying hours.

Mr. President, it has been my experience that all members of the reserve components of the armed services, and especially those reaching the high rank of lieutenant general, must spend considerable time away from their families in the pursuit of their military duties. This requires no small sacrifice on the part of those family members, and in this regard, General Conaway's wife, Linda, and their children, Ellen, David, Daniel, and Bolyn, are also to be commended.

Mr. President, I am pleased to support the confirmation of Maj. Gen. John B. Conaway as lieutenant general and chief of the National Guard Bureau.

Mr. SASSER. Mr. President, I strongly support the nomination of Maj. Gen. John B. Conaway to be Chief of the National Guard Bureau with the rank of lieutenant general.

General Conaway is one of the most able general officers serving our country today. Currently, the Vice Chief of the National Guard Bureau, General Conaway brings to his new position a lifetime of preparation and experience.

General Conaway is uniquely qualified to become chief of the national guard. He is indeed the right man for the right job at the right time. I have known General Conaway for a number of years. His word is his bond. His leadership capacity and his integrity will serve him well during the challenges of the coming years.

In my view, changing world political and military realities dictate a sharp reduction in our active military forces. We just do not need today's large force structure in order to meet tomorrow's diminished threats in Europe and to provide for third world contingencies. What we do need is a robust National Guard and Reserve, well-trained and well-equipped to help provide this great country with a cost-effective and capable national defense.

My colleagues know that the biggest bang we get for the defense buck is the investment we make in the guard and reserve. We can achieve an appropriate peace dividend by transferring appropriate roles, missions and active force structure into the guard and reserve.

I look forward to working with General Conaway as the Nation moves toward more reliance on the Army and Air National Guard to provide for our national security and international deterrence.

I congratulate General Conaway for his nomination and confirmation to be chief of the guard bureau. I wish him the very best as he approaches this new responsibility and new challenge.

Mr. BOREN. Mr. President, I am proud as a Senator to represent the men and women who serve in the Oklahoma National Guard. The OKNG has a fine history—from the 1890's when the Oklahoma territory formed a military which helped charge San Juan Hill through World War II and Korea when the 45th division won renown for its undaunted bravery until the present. Today the Oklahoma National Guard enjoys many distinctions including the first multiple launch rocket system battalion and the only reserve Army special operations aviation battalion. The tactical airlift wing is daily doing a yeoman's job and our tactical fighter group has the number one safety record in the Nation.

I am pleased that Maj. Gen. John B. Conaway has been selected to become the chief of the National Guard Bureau. It is obvious that I am not alone since rarely has a nomination gone through the process from the Department of Defense to the White House to the Senate with such ease.

This reflects the character of this man who has served with skill and aplomb throughout his career. He has always shown the willingness to help deserving National Guard units in their missions in all States and we Oklahomans appreciate the assistance he has provided us on numerous occasions.

His recall to active duty as Deputy Director of the Air National Guard was made by an Oklahoman, Lavern E. Weber as Chief of the NGB. General Weber remains a close personal friend. Two years after I came to Washington, General Conaway became director of the Air National Guard where his perseverance, dedication and skills were responsible for the highest rates of combat readiness in the history of the Air National Guard. He became the first-ever vice chief in mid-1988 and has been a key player in the war on

drugs. His efforts in counternarcotics have contributed to increased National Guard support to a wide-range of antidrug law enforcement activities. I have heard it said that the National Guard is out in front as a coordinated productive asset in the war on drugs.

I commend all those who had the foresight to name John B. Conaway as Chief of the National Guard and I look forward to working with him in the years ahead. I wish him all the best and even greater achievements in his assignment as the Chief of the National Guard Bureau.

NOMINATION OF JAMES B. BAYLOR

Mr. BYRD. Mr. President, I am pleased that the President of the United States has nominated Brig. Gen. James B. Baylor, a native of Hinton, WV, for the rank of major general. I have worked with General Baylor over the years and look forward to a continuing and productive working relationship with him in his position as commanding general of the Army's 99th Army Reserve Command.

General Baylor's career in the U.S. Army Reserve spans 34 years, beginning as a second lieutenant at the Ordnance School at Aberdeen Proving Grounds in August 1955. In April of 1989, he was appointed commander of the 99th Army Reserve Command in Oakdale, PA, headquarters for nearly all Army Reserve personnel in West Virginia. He was previously deputy commander of the command, a post he held since March 1985.

Other command posts held by General Baylor include that of commandant, 2093rd U.S. Army Reserve School in South Charleston, WV, group commander, 38th Ordnance Group, South Charleston, and Battalion commander, 321st ordnance battalion, also in South Charleston.

He has received many decorations and awards including the Meritorious Service Medal with two Oak Leaf Clusters, the Army Reserve Components Achievement Medal with Oak Leaf Cluster, and the Armed Services Reserve Medal with two 10-year devices.

Mr. President, I am pleased to support the confirmation of Brig. Gen. James B. Baylor as major general.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now return to legislative session.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations and treaties which were referred to the appropriate committees.

(The nominations and treaties received today are printed at the end of the Senate proceedings.)

DIVESTMENT OF A DEFENSE CONTRACTOR—MESSAGE FROM THE PRESIDENT RECEIVED DURING RECESS—PM 86

Under the authority of the order of the Senate of January 3, 1989, the Secretary of the Senate, on February 2, 1990, during the recess of the Senate, received the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Banking, Housing, and Urban Affairs:

To the Congress of the United States:

1. I hereby report to the Congress on my decision to order the China National Aero-Technology Import and Export Corporation (CATIC) to divest all its interest in MAMCO Manufacturing, Inc., a company located in Seattle, Washington, and incorporated under the laws of the State of Washington. I have taken this action under the authority vested in me as President by section 721 of the Defense Production Act of 1950 ("section 721" or "the Exon-Florio provision"), 50 U.S.C. App. 2170. This report is submitted pursuant to subsection (f) of section 721. A copy of my order is attached.

2. The United States welcomes foreign direct investment in this country; it provides foreign investors fair, equitable, and nondiscriminatory treatment. This Administration is committed to maintaining that policy. There are circumstances in which the United States maintains limited exceptions to such treatment. Generally these exceptions are necessary to protect national security. Of those foreign mergers, acquisitions, and takeovers which have been reviewed under the Exon-Florio provision to determine effects on national security, this is the first time I have invoked section 721 authority. My action in this case is in response to circumstances of this particular transaction. It does not change our open investment policy and is not a precedent for the future with regard to direct investment in the United States from the People's Republic of China or any other country.

3. Section 721 requires me to make certain findings before exercising the authority conferred by that provision. Specifically, I must find that:

(1) there is credible evidence that leads me to believe that the foreign interest exercising control might take action that threatens to impair the national security, and

(2) provisions of law, other than section 721 and the International Emergency Economic Powers Act (50 U.S.C. 1701-1706), do not in my judgment provide adequate and appropriate authority for me to protect the national security.

I have made the findings required by section 721. Specifically, confidential information available to me concerning some of CATIC's activities raises serious concerns regarding CATIC's future actions. It is my determination that this information constitutes the "credible evidence" required by the statute. Moreover, I have determined that no law, other than section 721 and the International Emergency Economic Powers Act, provides adequate and appropriate authority to protect against the threat to the national security posed by this case.

4. MAMCO voluntarily notified the Committee on Foreign Investment in the United States ("CFIUS") of CATIC's intention to acquire MAMCO. CFIUS has been designated by Executive Order No. 12661 to receive notifications and to review and investigate to determine the effects on national security of foreign mergers, acquisitions, and takeovers. On November 30, 1989, CATIC purchased all of the voting securities of MAMCO. The acquisition was consummated while CFIUS review of the transaction was in progress, an action not prohibited by the statute.

CATIC is an export-import company of the Ministry of Aerospace Industry of the People's Republic of China. CATIC has business dealings with various companies in this country, in several sectors including commercial aircraft. The Ministry engages in research and development, design, and manufacture of military and commercial aircraft, missiles, and aircraft engines.

MAMCO machines and fabricates metal parts for aircraft. Much of MAMCO's production is sold to a single manufacturer for production of civilian aircraft. Some of its machinery is subject to U.S. export controls. It has no contracts with the United States Government involving classified information.

5. On December 4, 1989, CFIUS made a determination to undertake a formal investigation and so informed the parties to the transaction. CFIUS undertook the investigation in order to assess MAMCO's present and potential production and technological capabilities and the national security implications of CATIC's purchase of MAMCO.

6. During the investigation, CFIUS asked for and received information from MAMCO in addition to that provided in the initial filing. Officials of the Departments of Commerce and Defense, representing CFIUS, visited MAMCO to gather information to assist CFIUS in its assessment of MAMCO's current production and technological capabilities.

7. In its investigation, CFIUS also considered the adequacy of all laws, other than the Exon-Florio provision, to deal with the national security concerns posed by the transaction.

8. Because of the sensitive nature of the evidence in this investigation, CFIUS will be available, on request, to provide the appropriate committees, meeting in closed sessions, with a classified briefing.

GEORGE BUSH.
THE WHITE HOUSE, *February 1, 1990.*

SCIENCE AND ENGINEERING INDICATORS—MESSAGE FROM THE PRESIDENT—PM 87

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

Pursuant to 42 U.S.C. 1863(j)(1), I am pleased to submit to the Congress a report of the National Science Board entitled *Science & Engineering Indicators—1989.* This report is the ninth in a continuing series examining key aspects of the status of American science and engineering.

The importance of scientific and engineering research to the well-being of our Nation is widely recognized. Science and engineering play a vital role in maintaining our Nation's defense, improving its health, and increasing its economic productivity.

I commend *Science & Engineering Indicators—1989* to the attention of the Congress and those in the scientific endeavor.

GEORGE BUSH.
THE WHITE HOUSE, *February 5, 1990.*

ANNUAL REPORT ON HAZARDOUS MATERIALS TRANSPORTATION MESSAGE FROM THE PRESIDENT—PM 88

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Commerce, Science, and Transportation:

To the Congress of the United States:

In accordance with the requirements of section 109(e) of the Hazardous Materials Transportation Act (Public Law 93-633; 49 U.S.C. 1808(e)), I transmit herewith the Annual Report on Hazardous Materials Transportation for calendar year 1988.

GEORGE BUSH.
THE WHITE HOUSE, *February 5, 1990.*

ANNUAL REPORT OF THE SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION—MESSAGE FROM THE PRESIDENT—PM 89

The PRESIDING OFFICER laid before the Senate, the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Environment and Public Works:

To the Congress of the United States:

I transmit herewith the Saint Lawrence Seaway Development Corporation's annual report for 1988. This report has been prepared in accordance with section 10 of the Saint Lawrence Seaway Act of May 13, 1954 (33 U.S.C. 989(a)), and covers the period January 1, 1988, through December 31, 1988.

GEORGE BUSH.
THE WHITE HOUSE, *February 5, 1990.*

ANNUAL REPORT OF THE FEDERAL LABOR RELATIONS AUTHORITY—MESSAGE FROM THE PRESIDENT—PM 90

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with section 7104(e) of title 5, United States Code, I hereby transmit the Tenth Annual Report of the Federal Labor Relations Authority, which covers fiscal year 1988.

GEORGE BUSH.
THE WHITE HOUSE, *February 5, 1990.*

MESSAGES FROM THE HOUSE

At 10:04 a.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 82. Joint resolution to designate February 8, 1990, as "National Women and Girls in Sports Day."

ENROLLED JOINT RESOLUTIONS SIGNED

The PRESIDENT pro tempore (Mr. BYRD) announced that on today, February 5, 1990, he had approved and signed the following joint resolutions previously signed by the Speaker of the House:

S.J. Res. 130. Joint resolution designating February 11 through 17, 1990, as "Vocational-Technical Education Week"; and

H.J. Res. 149. Joint resolution designating February 16, 1990 as "Lithuanian Independence Day."

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, February 5, 1990, he had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 130. Joint resolution designating February 11 through 17, 1990 as "Vocational-Technical Education Week."

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. LIEBERMAN (for himself and Mr. DODD):

S. 2059. A bill to establish the Weir Farm National Historic Site in the State of Connecticut; to the Committee on Energy and Natural Resources.

By Mr. DOLE:

S. 2060. A bill to suspend temporarily the duty on Sucralfate; to the Committee on Finance.

S. 2061. A bill to suspend temporarily the duties on Diltiazem Hydrochloride, and Sustained Release Diltiazem Hydrochloride; to the Committee on Finance.

S. 2062. A bill to suspend temporarily the duty on Mesalamine; to the Committee on Finance.

S. 2063. A bill to suspend temporarily the duties on TA3090; to the Committee on Finance.

By Mr. MOYNIHAN:

S. 2064. A bill to amend the Harmonized Tariff Schedule of the United States to change the rate of duty applicable to certain bicycles; to the Committee on Finance.

S. 2065. A bill to provide for duty-free treatment of, and refund of duties paid on, certain entries of frozen vegetables; to the Committee on Finance.

By Mr. HEINZ:

S. 2066. A bill to place a restriction on the granting of eminent domain powers by the Federal Government with respect to bridges over the Delware River between New Jersey and Pennsylvania; to the Committee on Environment and Public Works.

By Mr. KERRY:

S. 2067. A bill to amend the National Trails System Act to designate the route from Selma to Montgomery for study for potential addition to the national trails system; to the Committee on Energy and Natural Resources.

By Mr. SHELBY:

S. 2068. A bill to designate the U.S. courthouse located at 1800 Fifth Avenue North in Birmingham, AL, as the "Robert Smith Vance United States Courthouse"; to the Committee on Environment and Pulic Works.

By Mrs. KASSEBAUM:

S. 2069. A bill to provide an 18-Month Moratorium on employer revisions upon termination of single-employer defined benefit

pension plans; to the Committee on Labor and Human Resources.

By Mr. KOHL:

S. 2070. A bill to amend title 18, United States Code, to prohibit the possession or discharge of a firearm in a school zone; to the Committee on Judiciary.

By Mr. MURKOWSKI (for himself, Mr. BURDICK, Mr. LUGAR, Mr. COCHRAN, Mrs. KASSEBAUM, Mr. WARNER, Mr. PRYOR, Mr. D'AMATO, Mr. BOREN, Mr. EXON, Mr. MCCLURE, Mr. HEFLIN, Mr. LEVIN, and Mr. SIMON):

S.J. Res. 249. Joint resolution to designate March 23, 1990 as "National Energy Education Day"; to the Committee on the Judiciary.

By Mr. CHAFEE (for himself, Mr. BAUCUS, Mr. BRADLEY, and Mr. WILSON):

S.J. Res. 250. Joint resolution designating April 1990 as "National Recycling Month"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. LIEBERMAN (for himself and Mr. DODD):

S. 2059. A bill to establish the Weir Farm National Historic Site in the State of Connecticut; to the Committee on Energy and Natural Resources.

WEIR FARM NATIONAL HISTORIC SITE

Mr. LIEBERMAN. Mr. President, I rise today to introduce legislation which would make the J. Alden Weir Farm, of Wilton and Ridgefield, CT, my State's first national park. The Weir Farm would also be the first national park area in the United States to commemorate an American painter.

J. Alden Weir is considered by many to have been the leader of the American impressionism movement. His farm was home to most of the great impressionist painters of the late 19th and early 20th centuries. John Twachtman, Albert Pinkham Ryder, Childe Hassam, and many others came to Weir Farm to paint the land, and their paintings continue to instruct and delight all who see them. They provide testimony to a conservative ethic, and an interpretation of one relationship to the land common to New Englanders: that of stewardship, cultivation, and nurturing. And their paintings reveal how, just as they shaped the land, these painters were shaped and made better by it or perhaps their efforts to come to terms with it. Every rock, tree, field, pond, barn, and house on that land has been recorded and explored in these great paintings. They provide not only a window on the past and insight into the way we thought about the land at the turn-of-the-century, but also a startling introduction to what remains of the land today.

In addition to the American impressionists, Weir Farm provided a home and inspiration to Mahonri Mackintosh Young, the great American sculptor and grandson of Brigham Young, whose works now grace the State of Utah, and many other places in our country. Today, Weir Farm is inhabited by Sperry and Doris Andrews, also significant American painters; so three American artists and their families have occupied and cared for Weir Farm continuously since Mr. Weir first acquired it in 1882.

It was the concern of Mr. and Mrs. Andrews and of the descendants of Mr. Weir and Mr. Young that prompted the effort to save Weir Farm from development 6 years ago. They contacted the Trust for Public Land, which worked with the families to purchase what they could of the original farm. Simultaneously, the Weir Farm Heritage Trust was formed by local residents, selectmen, State legislators, conservationists, and just plain appreciators of art, to raise money for the protection of the farm and to manage it until the National Park Service, with its expertise, could become involved. In 1984, Weir Farm was listed on the National Register of Historic Places.

The U.S. Park Service has undertaken of its own initiative to conduct a suitability and feasibility study of Weir Farm. And the special quality of this site so moved my former colleagues in the legislature of Connecticut that the State voted just this past year to bond approximately $4.25 million dollars to purchase the 60 acres of the original Weir Farm.

In addition, just this week, a coalition of 20 national conservation groups issued a report calling on Congress to fund land acquisition at Weir Farm. This is a Who's Who of specialists in land preservation and conservation and includes the Wilderness Society, the Izaak Walton League, the National Wildlife Federation, the National Association of Parks and Conservation, the National Audubon Society, the Sierra Club, and many, many others.

With the adjacent Weir Preserve owned by the Nature Conservancy, and a protected tract of open space owned by the town of Ridgefield, the protected site now covers close to 185 contiguous acres. This may not seem like much to may distinguished colleagues from the West, but to Connecticut it is a significant amount of open space.

All that is left for Congress to do is to authorize acquisition of the land. And we are not even being asked to buy it all. For an amount not to exceed $1 million, the park system can acquire the 2-acre core parcel of land which includes the houses, barns, studios, with original furnishings intact. The State welcomes the expertise and leadership of the National Park Service and will render its land to U.S. Park Service management. The Nature Conservancy has indicated its willingness to work with the Park Service on projects of mutual interest, and the Weir Farm Heritage Trust will continue to raise money for improvement of the site and will advise the Park Service on interpretation.

Mr. President, I urge my colleagues to support this legislation, not only because it has already engendered so much local, Statewide, and national support; not only because it would provide the National Park Service representation in Connecticut; but because Weir Farm provides us a rare opportunity to commemorate the quiet marriage of art and tended landscape that so clearly defined the American impressionist movement; and because by honoring the vision of J. Alden Weir and the land that he loved so well, we commemorate some of our own best instincts toward the natural world.

By Mr. DOLE:

S. 2060. A bill to suspend temporarily the duty on Sucralfate; to the Committee on Finance.

S. 2061. A bill to suspend temporarily the duties on Diltiazem Hydrochloride, and Sustained Release Diltiazem Hydrochloride; to the Committee on Finance.

S. 2062. A bill to suspend temporarily the duty on Nesalamine; to the Committee on Finance.

S. 2063. A bill to suspend temporarily the duties on TA3090; to the Committee on Finance.

TEMPORARY SUSPENSION OF DUTY ON CERTAIN PHARMACEUTICAL PRODUCTS

Mr. DOLE. Mr. President, today I am introducing four bills to suspend U.S. duty on pharmaceutical products with proven or anticipated health benefits. Because these products are each unique, I believe the suspensions to be entirely noncontroversial.

Mr. President, I ask unanimous consent that a description of the products and the text of the bills be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2060

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1.—That subchapter II of chapter 99 of the Harmonized Tariff Schedules of the United States is amended by inserting in numerical sequence the following new subheadings:

"9902.95.12	Sucralfate provided for in subheading 2940.00.0000.	Free	No change	No change	On or before 12/31/92".

SEC. 2.—The amendment made by the first section of this Act applies with respect to articles entered, or withdrawn from warehouse for consumption, on or after the 15th day after the date of the enactment of this Act.

GROUNDS FOR DUTY SUSPENSION

Sucralfate

Sucralfate is the active ingredient in the pharmaceutical Carafate®, which is used for the short-term treatment of duodenal ulcer.

Sucralfate is a proprietary, patent-protected pharmaceutical for which there is no exact equal manufactured in the United States.

The substance has been classified by the Customs Service under Harmonized Tariff Schedule ("HTS") subheading 2940.00.0000 at 5.8% ad valorem.

A duty suspension is warranted by the health care benefits of Sucralfate. Sucralfate is the only non-systemic pharmaceutical product approved by the Food and Drug Administration for the treatment of duodenal ulcer disease.

S. 2061

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1.—That subchapter II of chapter 99 of the Harmonized Tariff Schedules of the United States is amended by inserting in numerical sequence the following new subheadings:

"9902.95.08	Diltiazem Hydrochloride provided for in subheading 2934.90.2500.	Free	No change	No change	On or before 12/31/92
"9902.95.09	Sustained Release Diltiazem Hydrochloride in encapsulated heads provided for in subheading 3004.90.6020.	Free	No Change	No Change	On or before 12/31/92
"9902.95.10	Sustained Release Diltiazem Hydrochloride in uncapsulated heads provided for in subheading 3003.90.0000.	Free	No Change	No Change	On or before 12/31/92".

SEC. 2.—The amendment made by the first section of this Act applies with respect to articles entered, or withdrawn from warehouse for consumption, on or after the 15th day after the date of the enactment of this Act.

DILTIAZEM HYDROCHLORIDE AND SUSTAINED RELEASE DILTIAZEM HYDROCHLORIDE

Diltiazem Hydrochloride (hereinafter "Diltiazem Hcl") is the active ingredient in the pharmaceutical Cardizem®, which is used to treat angina, hypertension and related cardiovascular disorders. Diltiazem Hcl is a proprietary, patent-protected pharmaceutical for which there is no exact equal manufactured in the United States. The substance has been classified by the Customs Service under Harmonized Tariff Schedule ("HTS") subheading 2934.90.2500 at 6.9% ad valorem.

Diltiazem Hcl is also available in a sustained release form. It is the active ingredient in the pharmaceutical Cardizem SR®. In the form of encapsulated beads, this substance has been classified by the Customs Service under HTS subheading 3004.90.6020 at 6.3% ad valorem; in the form of unencapsulated beads it is classified under HTS subheading 3003.90.0000 at 6% ad valorem.

Duty suspensions are warranted by the health care benefits of Diltiazem Hcl. It is the only benzothiazepine class of calcium channel blocker approved for marketing in the United States by the Food and Drug Administration. (Calcium channel blockers are drugs used to dilate relax blood vessels.) Diltiazem Hcl is a well-tolerated product that can be used to treat angina and hypertension in a wide range of patient types, including the elderly and patients with coexisting diseases.

S. 2062

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1.—That subchapter II of chapter 99 of the Harmonized Tariff Schedules of the United States is amended by inserting in numerical sequence the following new subheadings:

"9902.95.11	Mesalamine provided for in subheading 2922.50.4000.	Free	No change	No change	On or before 12/31/92".

SEC. 2.—The amendment made by the first section of this Act applies with respect to articles entered, or withdrawn from warehouse for consumption, on or after the 15th day after the date of the enactment of this Act.

MESALAMINE

Mesalamine is the active ingredient in the pharmaceutical product that, if approved, will be sold under the trade mark of Pentasa to treat ulcerative colitis and Crohn's disease. Mesalamine is a proprietary, patent-protected pharmaceutical for which there is no exact equal manufactured in the United States. The substance is classified under Harmonized Tariff Schedule ("HTS") subheading 2922.50.4000 at the most-favored-nation rate of 3.7 cents/kg. plus 15.6% ad valorem.

A duty suspension is warranted by the expected health care benefits of Mesalamine. If approved by the Food and Drug Administration, Mesalamine will be the only process-protected, orally available 5-aminosalicyclic acid marketed in the United States for the treatment of ulcerative colitis and Crohn's disease.

S. 2063

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1.—That subchapter II of chapter 99 of the Harmonized Tariff Schedules of the United States is amended by inserting in numerical sequence the following new subheadings:

"9902.95.13	TA3090 provided for in subheading 2934.90.2500.	Free	No charge	No charge	On or before 12/31/92".

SEC. 2.—The amendment made by the first section of this Act applies with respect to articles entered, or withdrawn from warehouse for consumption, on or after the 15th day after the date of the enactment of this Act.

TA3090

TA3090 is a pharmaceutical product in its developmental stages. There is no exact equal to this substance manufactured in the United States. The substance has been classified by the Customs Service under Harmonized Tariff Schedule ("HTS") subheading 2934.90.2500 at 6.9% ad valorem.

A duty suspension is warranted by the expected health care benefits of the substance. TA3090 is designed to have all of the advantages of certain calcium channel blocking agents (drugs used to dilate blood vessels), together with a longer duration of action. It is believed that TA3090 will prove effective in the treatment of stroke, angina and hypertension. TA3090 may also inhibit atherogenesis (the production of atheroma—the fatty degeneration of the inner lining of the arteries).

By Mr. HEINZ:

S. 2066. A bill to place a restriction on the granting of eminent domain powers by the Federal Government with respect to bridges over the Delaware River between New Jersey and Pennsylvania; to the Committee on Environment and Public Works.

BURLINGTON-BRISTOL BRIDGE

● Mr. HEINZ. Mr. President, we are a nation of many sovereign States. But, although we like to think of ourselves as a perfect union, there are times when the sovereignty leads to fragmentation, divisiveness, and threats upon the very notion of federalism.

The Commonwealth of Pennsylvania and the State of New Jersey are now embroiled in a dispute that I don't expect will dissolve our Union. But it has come to my attention that the Burlington County New Jersey Bridge Commission has unilaterally raised tolls on two bridges that cross the Delaware River—the body of water that demarcates the boundaries of these two sovereign States. This is, at the very least, a form of taxation without representation being visited on my constituents by their neighbors from New Jersey. And I think all of us can agree that this sort of policy has dangerous possibilities.

The purpose of this action is to increase revenue in order to replace the existing Burlington-Bristol Bridge.

It is the intention of this commission to undertake this project without consulting or soliciting the views of any Pennsylvania citizen, even those whose homes or workplaces stand in the new bridge's path. I don't think this is fair, and although I don't think it would have changed history, it occurs to me that had this situation developed back in 1789, it might have delayed the final union of the States under our Constitution.

New Jersey and Pennsylvania have agreed on a compact regarding bridges over the Delaware River, That agreement, supplemented in the 1987 Highway Act, provided for a joint body known as the Delaware River Joint Bridge Commission. While virtually all bridges north of Philadelphia and south of Port Jervis, NY, are governed by the Delaware River Joint Toll Bridge Commission, the Burlington-Bristol Bridge apparently is not.

For this reason, in the spirit of union and the compact, I am introducing legislation which would require coordination and cooperation on any bridge project over the Delaware River.

Bernard Baruch once said, "The highest and best form of efficiency is the spontaneous cooperation of a free people." It follows then that the least efficiency derives from the lack of cooperation. It may indeed be that the bridge needs to be replaced. But to do it efficiently, do it cooperatively.

I ask unanimous consent that the full text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2066

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the power of eminent domain, and the authority to condemn, acquired, occupy, possess, and use property, that are provided under section 509 of the General Bridge Act of 1946 (33 U.S.C. 532) or that may be granted under any other provision of Federal law, shall apply with respect to any bridge (or project for the construction, replacement, or reconstruction of any bridge) over the Delaware River between the Commonwealth of Pennsylvania and the State of New Jersey only if the highway department of the Commonwealth of Pennsylvania and the highway department of the State of New Jersey consent to the provision for grant of such power and authority with respect to such bridge or project.●

By Mr. KERRY:

S. 2067. A bill to amend the National Trails System Act to designate the route from Selma to Montgomery for study for potential addition to the national trails system; to the Committee on Energy and Natural Resources.

SELMA TO MONTGOMERY NATIONAL TRAIL STUDY ACT

● Mr. KERRY. Mr. President, I rise today to introduce legislation to designate the road from Selma to Montgomery, AL, for study as a national historic trail.

On Sunday, March 7, 1965, over 500 people attempted to march that distance to dramatize the need for voting rights legislation—to make a stand for civil rights. When they reached the Edmund Pettus Bridge in Selma, they were met by police dogs and billy clubs. That day, which became known as Bloody Sunday, raised the Nation's consciousness, convincing the Nation's leaders of a need for voting rights for all Americans. The march was attempted again 2 days later but was interrupted for fear of further bloodshed.

Finally, together with National Guardsmen, Army troops, U.S. marshals, and FBI agents, marchers were able to complete the journey from Brown Chapel in Selma to the State capitol in Montgomery. This courageous and historic march led directly to Washington and passage of the Voting Rights Act of 1965.

Tragically, only 50.15 percent of the voting age population went to the polls in the 1988 Presidential election. How could we have come so far, yet accomplished so little? By designating the trail from Selma to Montgomery as a historic landmark, I hope to once again elevate this Nation's consciousness and remind them of a time when every citizen did not have the right to vote.

At the close of the first session, Representative JOHN LEWIS introduced this legislation in the House and I am pleased to introduce it today in the Senate. I am honored to be working with a man who has been a pivotal leader in the civil rights movements. And, I urge my colleagues to join me in supporting this very important proposal to celebrate as a national historic trail the bittersweet memory of our Nation's long journey toward an America with liberty and justice for all.●

By Mr. SHELBY:

S. 2068. A bill to designate the U.S. courthouse located at 1800 Fifth Avenue North in Birmingham, AL, as the "Robert Smith Vance United States Courthouse"; to the Committee on Environment and Public Works.

ROBERT SMITH VANCE UNITED STATES COURTHOUSE

● Mr. SHELBY. Mr. President, in the American tradition, after the death of a distinguished and respected individual, a memorial is dedicated to commemorate his life's work. Following that tradition, I am today introducing legislation that would rename the old Federal courthouse in Birmingham, AL, the Robert Smith Vance United States Courthouse.

Judge Vance had a distinguished career of service to the people of the United States and the State of Alabama. He began his service at an early age as a page in the U.S. House of Representatives. During the Korean conflict, he was on active duty with the Army as a judge advocate, and he subsequently retired from the Army Reserve as a lieutenant colonel. When the Korean conflict ended, he returned to Alabama and practiced law, with distinction, in Birmingham until January 3, 1978, when he assumed the office of judge of the U.S. Court of Appeals for the fifth circuit.

On October 1, 1981, as a result of the division of the fifth circuit, he became a member of the U.S. Court of Appeals for the eleventh circuit. Judge Vance's contributions to the Federal bench, and thus to the cause of justice, were many. He was a man of great courage, a scholar blessed with common sense. He was a judge's judge.

The Birmingham bar association properly described our loss:

A learned and competent judge is often taken for granted. But it is a time such as this, when an even-handed, dedicated and respected judge is taken from us, that we realize the true worth of such a man. Robert S. Vance was such a treasure and he will be sorely missed as a judge of this district and as our friend.

On behalf of the State of Alabama and the eleventh judicial circuit, I respectfully urge my colleagues to support the measure.●

By Mrs. KASSEBAUM:

S. 2069. A bill to provide an 18-month moratorium on employer reversions upon termination of single-employer defined benefit pension plans; to the Committee on Labor and Human Resources.

MORATORIUM ON TERMINATION OF SINGLE-EMPLOYER DEFINED BENEFIT PENSION PLANS

Mrs. KASSEBAUM. Mr. President, today I am offering legislation to place an 18-month moratorium on the practice of allowing companies to strip surplus assets from their pension funds. I am convinced that it is essential for Congress to look carefully at this matter, which affects the lives and the retirement security of millions of Americans.

Pension funds are the primary source of income for our Nation's retirees. Taken as a whole, these funds pay out more each year than the Social Security system. In 1988, for example, pension funds paid out $222 billion in retirement benefits compared with $148 billion paid by Social Security.

Pension funds also are the most basic part of our national savings account. With more than $2 trillion in assets, these funds not only are our primary source of retirement income, they are the pool of capital upon which our entire economy stands.

Given the obvious importance of pension funds for all Americans, many of my colleagues, and most retirees, may believe that these funds are locked away—safe, sound and secure. I believed that was true until recently. I no longer believe so and that is why I offer this legislation today.

In fact, under our current laws and regulations, a retiree with a perfectly sound, federally-insured pension can suddenly learn that his pension fund is being terminated and replaced by an annuity from an insurance company he has never heard of with no apparent backing by the Federal Government. Hundreds of thousands of our retirees have learned just that in recent years and many of them are understandably alarmed by it.

I am concerned about this practice because I believe it raises a number of questions that have never been adequately addressed—not the least being the ultimate security of a retiree's pension benefit. Recently those questions came into crystal-clear focus when a major employer in my hometown of Wichita, KS, announced the termination of its pension plans covering some 6,300 workers and retirees.

By itself, this announcement by the Coleman Co. might have attracted little attention. However, an alert newspaper reporter at the Wichita Eagle learned that the pension checks of Coleman retirees were to be replaced by annuities from the Executive Life Insurance Co. of California. The reporter further discovered that Executive Life had recently run into financial problems and had been downgraded by national investment rating companies from a triple-A rated company to a single-A due to a major writeoff of holdings in so-called junk bonds.

The resulting news story, set off alarm bells both in Wichita and in Washington. My colleague, Senator DOLE, and I both began looking into this and asking questions of Coleman and its parent company, MacAndrews and Forbes Holdings of New York. The more closely I looked at this matter the more concerned I became, not only with this specific case but with pension reversions generally.

Here, in brief, are some of the key issues:

It is not clear whether the fiduciary standards established in the Employee Retirement Income Security Act apply to the handling of pension fund assets after a plan is terminated. Bizarre as it may sound, questionable financial dealings that would never be allowed in handling a pension fund may be allowed with the same money once a plan is terminated.

In transferring the obligations of a pension fund to an insurance company for payment of annuities the only standard that must be met is that the insurance company be licensed in at least one State. That's all. It does not have to be a triple-A rated company or a giant of the industry; it only has to be licensed in one State.

The Federal Government's obligation to insure the pension or annuity apparently is terminated with the pension plan but no one knows for certain if this would ever hold up in court. If the insurance company issuing the annuities were to go bankrupt it is possible that the Pension Benefit Guaranty Corporation meaning the taxpayers, would be responsible for continuing to pay the benefits.

In light of these concerns, with enormous implications for retirees and taxpayers alike, I wrote to the Pension Benefit Guaranty Corporation and Labor Secretary Elizabeth Dole asking that they impose an immediate moratorium on pension reversions until these matters were adequately addressed. Both agencies immediately began investigations of the Coleman Co. situation. However, both agencies also questioned the need for a broad moratorium and their legal power to impose such a step.

Last week, Senator DOLE and I met with senior executives of Coleman and MacAndrews and Forbes. In that meeting, the companies' executives agreed to a request by the PBGC to further delay their pension reversions for at least 60 days. They also announced that they were withdrawing from their arrangement with Executive Life and would instead seek to place their retirees' annuities with a triple-A rated company, as Executive Life had been when this process first started.

In taking these steps, Coleman and MacAndrews and Forbes are voluntarily going above and beyond current legal requirements. They are acting reasonably and responsibly to safeguard the benefits of their retirees. I salute them for this but I believe we should also require that every company act reasonably and responsibly with money held in trust for their workers and retirees.

Mr. President, I am now drafting legislation to address the issues I have outlined in this statement and to impose tough new standards on pension plan terminations and surplus asset reversions. If the past is any guide to the future, this may be a protracted effort because there are many difficult and complex matters involved and there are reasonable grounds for disagreement.

The very heart of this issue is the matter of surplus assets in pension plans. These assets can make a company an attractive target for a takeover or a leveraged buyout. The pension plan is then terminated and the surplus is stripped out for the company or its new owners to use as they wish. Companies believe these surplus assets belong to them because they voluntarily established the pension plan to begin with and they have made contributions into the plan. Retirees and others believe the surplus is part of the promise made to them and should either be used to improve benefits or left alone.

I tend to believe that pension fund surpluses belong right where they are—in the pension fund. For one thing, the current surpluses are almost entirely the result of a major increase in the value of stocks and bonds over the past 8 years. If stocks and bonds drop in value, as they will at some point, these surpluses could evaporate like the morning mist. Terminating these funds and stripping out the surplus is but one more way to realize immediate short-term gain at potentially large long-term cost.

For all of these reasons, I believe we must impose a moratorium. It is important to note that this legislation does not prevent pension terminations. My bill only prevents the stripping of pension plan assets for nonpension purposes.

Under this bill a pension plan can be terminated and a new plan established provided that the company does not try to strip the old plan's surplus to use for nonpension purposes. There are a variety of reasons a pension plan might be terminated unrelated to the asset stripping issue, including the need to establish a new plan with more generous benefits. This bill provides that a new, more generous plan may be established and that accrued benefits under the old plan of less than $3,500 may be paid out.

What this legislation does do, however, is require that a pension plan surplus must be either paid to the employees, placed in the new plan or placed in a trust for the exclusive benefit of the employees. This trust would continue until the end of the moratorium and would then be distributed in accordance with laws applicable on August 1, 1991. This gives Congress the time necessary to clarify the current pension termination procedure and to resolve other difficult issues.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2069

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. 18-MONTH MORATORIUM OF EMPLOYER REVERSIONS UPON PLAN TERMINATION.

(a) IN GENERAL.—In the case of any termination of a defined benefit plan (other than a multiemployer plan) with respect to which the final distribution of assets pursuant to section 4044 of the Employee Retirement Income Security Act of 1974 has not begun before February 5, 1990—

(1) subsections (a) and (b)(9) of section 408 of such Act shall not apply with respect to any transaction constituting a distribution to the employer in connection with such termination, and

(2) each party in interest having any authority with respect to the management or disposition of the assets of the plan shall be jointly and severally liable for a breach of fiduciary duty under part IV of title I of such Act unless, in the final distribution of assets of the plan, any amount that would have been available for distribution to the employer under the terms of the plan (but for any amendments to the plan adopted in conformance with the requirements of this section) is distributed to participants or beneficiaries or paid into a trust established by the employer or plan administrator in accordance with subsection (b).

(b) TRUST.—The employer or plan administrator shall designate the trustee of a trust established pursuant to subsection (a). The terms of the trust shall provide for final distribution of the assets held by the trust in accordance with such applicable law as may be in effect on the date of distributon from the trust purusant to subsection (d) and shall otherwise be consistent with any terms of the plan providing for such trust and such regulations as the Secretary of Labor may prescribe.

(c) EXCLUSIVE PURPOSES OF TRUST.—Any trust established pursuant to subsection (a) shall be used exclusively for—

(1) receiving and holding any amount paid into the trust under this section,

(2) defraying the reasonable administrative expenses incurred in carrying out the trusteeship under this section, and

(3) making the final distribution from the trust under subsection (d).

Any income earned on the balance in such trust shall be paid into such trust.

(d) END OF MORATORIUM.—Subject to applicable law as in effect on August 1, 1991—

(1) subsecton (a) shall not apply with respect to terminations pursuant to which no distribution of plan assets has commenced as of such date, and

(2) during the 30-day period beginning on such date, any trust established pursuant to subsection (a) shall be dissolved and any balance (including income) in such trust at the time of its dissolution shall be distributed from the trust in accordance with the terms of the trust.

By Mr. KOHL:

S. 2070. A bill to amend title 18, United States Code, to prohibit the possession or discharge of a firearm in a school zone; to the Committee on the Judiciary.

GUN-FREE SCHOOL ZONES ACT

Mr. KOHL. Mr. President, we have a growing problem in America today: The proliferation of firearms in our schools. Over the past few years we have witnessed a shocking number of attacks against our children as they sat in the classroom and played in the schoolyard. Less than 2 years ago in Winnetka, IL, Laurie Dann opened fire on an elementary school classroom. She injured six children and killed one. Just last year on a California school playground, Patrick Purdy used an AK-47 assault rifle to kill 5 children and wound 30 more. And last fall in Washington, DC, four students were injured when gunfire broke out in a dispute over cafeteria seating. The assailant was a high school dropout.

Armed outsiders are not the only ones who pose a threat to our children. The National School Safety Center estimates that more than 100,000 students carry guns to school every day, and that more than a quarter of a million students brought a handgun to school at least once in 1987. In New York City alone, school authorities confiscated almost 2,000 weapons from students in 1988.

My home State, Wisconsin, is not immune from this wave of gun violence. Last year, the Milwaukee school system expelled more than a dozen students for weapons violations. And the number of Milwaukee County juveniles charged with handgun possession has doubled over the past 2 years. According to Gerald Mourning, the director of school safety for Milwaukee, "[K]ids who did their fighting with their fists, and perhaps knives, are now settling their arguments with guns."

To ensure that our school grounds do not become battlegrounds, I am introducing the Gun-Free School Zones Act of 1990. Similar legislation has been introduced in the House by my colleague, EDWARD FEIGHAN.

Our bill is simple, effective, and straightforward. The measure would create a Federal criminal offense knowingly to bring a gun within 1,000 feet of a public, private, or parochial school. It would also make it a crime to fire a gun in these zones. Each violation would carry a maximum prison sentence of 5 years and a fine of up to $5,000. However, the act contains carefully crafted exceptions for school-approved programs, law enforcement officers, and unloaded guns in locked containers. It also would exempt private property that is not part of school grounds.

Mr. President, the widespread support for this proposal underscores its commonsense approach. Already, the National Education Asociation, the American Association of School Administrators, the National School Boards Association, and the American Academy of Pediatrics have endorsed the legislation. When Congress mandated drug-free school zones in 1984, we declared that our Nation's classrooms deserve special protection. In the same way, this bill will help keep the areas around our schools from becoming sanctuaries for armed criminals and drug gangs. Gun-free school zones are not a panacea, to be sure, but they are an important step toward fighting gun violence and keeping our teachers and children safe.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD; as follows:

S. 2070

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Gun-Free School Zones Act of 1990".

SEC. 2. PROHIBITIONS AGAINST POSSESSION OR DISCHARGE OF A FIREARM IN A SCHOOL ZONE.

(a) IN GENERAL.—Section 922 of title 18, United States Code, is amended by adding at the end the following:

"(q)(1)(A) It shall be unlawful for any individual knowingly to possess a firearm at a place that the individual knows, or has reasonable cause to believe, is a school zone.

"(B) Subparagraph (A) shall not apply to the possession of a firearm—

"(i) on private property not part of school grounds;

"(ii) if the individual possessing the firearm is licensed to do so by the State in which the school zone is located or a political subdivision of the State and the law of the State or political subdivision requires that, before an individual obtain such a license, the law enforcement authorities of the State or political subdivision verify that the individual is qualified under law to receive the license;

"(iii) which is—

"(I) not loaded; and

"(II) in a locked container, or a locked firearm rack which is in a motor vehicle;

"(iv) by an individual for use in a program approved by a school in the school zone;

"(v) by an individual in accordance with a contract entered into between a school in the school zone and the individual or an employer of the individual;

"(vi) by a law enforcement officer acting in his or her official capacity; or

"(vii) that is unloaded and is possessed by an individual while traversing school premises for the purpose of gaining access to public or private lands open to hunting, if the entry on school premises is authorized by school authorities.

"(2)(A) Except as provided in subparagraph (B), it shall be unlawful for any person, knowingly or with reckless disregard for the safety of another, to discharge or attempt to discharge a firearm at a place that the person knows is a school zone.

"(B) Subparagraph (A) shall not apply to the discharge of a firearm—

"(i) on private property not part of school grounds;

"(ii) as part of a program approved by a school in the school zone, by an individual who is participating in the program;

"(iii) by an individual in accordance with a contract entered into between a school in a school zone and the individual or an employer of the individual; or

"(iv) by a law enforcement officer acting in his or her official capacity.

"(3) Nothing in this subsection shall be construed as preempting or preventing a State or local government from enacting a statute establishing gun-free school zones as provided in this subsection.".

(b) DEFINITIONS.—Section 921(a) of such title is amended by adding at the end the following:

"(25) The term 'school zone' means—

"(A) in, or on the grounds of, a public, parochial or private school; or

"(B) within a distance of 1,000 feet from the grounds of a public, parochial or private school.

"(26) The term 'school' means a school which provides elementary or secondary education, as determined under State law.

"(27) The term 'motor vehicle' has the meaning given such term in section 10102 of title 49, United States Code.".

(c) PENALTY.—Section 924(a) of such title is amended by adding at the end the following:

"(4) Whoever violates section 922(q) shall be fined not more than $5,000, imprisoned for not more than 5 years, or both. Notwithstanding any other provision of law, the term of imprisonment imposed under this paragraph shall not run concurrently with any other term of imprisonment imposed under any other provision of law.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to conduct engaged in after the end of the 60-day period beginning on the date of the enactment of this Act.

By Mr. MURKOWSKI (for himself, Mr. BURDICK, Mr. LUGAR, Mr. COCHRAN, Mrs. KASSEBAUM, Mr. WARNER, Mr. PRYOR, Mr. D'AMATO, Mr. BOREN, Mr. EXON, Mr. MCCLURE, Mr. HEFLIN, Mr. LEVIN, and Mr. SIMON):

S.J. Res. 249. Joint resolution to designate March 23, 1990, as "National

Energy Education Day"; to the Committee on the Judiciary.

NATIONAL ENERGY EDUCATION DAY

● Mr. MURKOWSKI. Mr. President, recycling, alternate energy sources, off-shore drilling, and global warming are all issues certain to be echoing in the Halls of Congress well into the next century. As our constituents turn to us for guidance, we must be prepared to provide leadership as well as adequate answers to their questions.

One such answer lies in our Nation's youth. It we can develop a nation of energy-literate students we are one step closer to a citizenry of informed adults. I rise today, along with a number of my colleagues, to assist in this energy education effert by introducing a joint resolution to designate March 23, 1990 as National Energy Education Day.

Congress launched NEED in 1980. Since then, the project has grown to include 38 State committees and over 150 regional committees. This year between 8,000 and 10,000 schools are expected to culminate weeks and months of prior planning and research in a celebration of NEED's 10th anniversary. Based on the theory that students retain more knowledge when actively engaged, NEED incorporates cooperative learning and the most current educational research into a year-round study of energy topics. In addition, students use NEED as a vehicle to heighten their community's awareness of many complex energy issues.

I urge may colleagues to cosponsor this joint resolution, not as simply another commemorative day but as an opportunity to allow students, educators and community leaders to celebrate the national energy network that the National Energy Education Development Project has become.●

By Mr. CHAFEE (for himself, Mr. BAUCUS, Mr. BRADLEY, and Mr. WILSON):

S.J. Res. 250. Joint resolution designating April 1990 as "National Recycling Month"; to the Committee on the Judiciary.

NATIONAL RECYCLING MONTH

● Mr. CHAFEE. Mr. President, today I along with Senators BAUCUS, BRADLEY, and WILSON, are introducing legislation to designate April, 1990 as "National Recycling Month." The importance of educating the public about the real benefits to society from recycling cannot be overstated.

Recycling is not a new phenomenon, at least not in concept. America's early settlers recycled as a matter of survival, turning corn husks into mattresses and old clothes into quilts. Many of my colleagues will remember the materials conservation efforts during World War II, when aluminum foil was carefully saved, used automobile tires collected, and many other consumer items were recycled and put toward the war effort. In fact, most of us have recycled materials at some point in our lives—typically paper, aluminum, or glass.

While many of us may be familiar with recycling, there is still a need for public education campaigns to inform consumers that garbage does not disappear when the sanitation worker loads it into the truck. Our society must be made aware that there are very real costs, both financial and environmental, associated with the continued proliferation of municipal garbage.

In the United States today we are facing a crisis in solid waste management. The United States presently is generating about 160 million tons of solid waste per year, almost double the amount we produced in 1965. If present trends continue, the United States will generate close to 200 million tons per year by the turn of the century. Towns and cities across the United States are realizing that the city dump will be forced to close its gates in a few short years. Just in the last two decades the number of landfills accepting solid waste has been reduced dramatically—from about 30,000 to 6,000. It is becoming virtually impossible to establish any new landfill sites because of the "not in my backyard syndrome," and the rising value of land and real estate.

When confronting an urgent crisis, such as the threat to human health and the environment from burgeoning mountains of trash, it is tempting to look to technology to provide us with the easy solution. Such technological fixes, however, will not eliminate the undeniable need for significant changes in the way we conduct our daily lives. Not only must we find more environmentally sound ways of handling municipal trash, but we must also greatly reduce the amount of garbage we generate in the first place. This will require a concerted effort on the part of consumers, manufacturers, and government. That is why we are introducing legislation to designate April, 1990 as National Recycling Month.

Reducing the amount of household garbage we generate poses the most difficult of public policy problems: changing human habits. The purpose of this legislation is to encourage a public attitude that can allow these needed changes to take place. People must be made aware that their actions do have a critical impact on reducing the amount of garbage entering the waste stream.

It is critical that our Nation's children—the next generation of consumers—learn sound waste disposal practices so that by adulthood, those practices will have become habit. We selected April as National Recycling Month so as to coincide with Earth Day, April 22, 1990. It is our hope that during the month of April, schools will sponsor educational activities on how recycling can help us preserve the Earth's natural resources.

My home State of Rhode Island, for example, was the first State to pass a mandatory recycling law. Presently, over 65 percent of the cities and towns in Rhode Island separate recyclables such as glass, paper, aluminum and plastics for curbside collection. By October of this year, the entire State will participate in this recycling program.

Recycling also creates employment. According to one recent study 10,000 tons of material spawns 36 jobs compared to 6 for landfilling the same amount. Some communities have formed working partnerships with workshops for the disabled, developed and administered job training partnerships, or otherwise found work for unemployed labor in recycling programs. In my own State, the Rhode Island Department of Environmental Management estimates that 300 jobs have been created by recycling.

The exciting feature of the battle against solid waste is that it can be won. Other nations are doing far better than we are. No drastic solutions are required, nor are big sacrifices sought. With relatively small changes in habits, educational initiatives, and reasonable laws we can overcome the crisis we now face. I urge my colleagues to help us move closer toward this goal by joining us in designating April, 1990 as National Recycling Month. I ask unanimous consent that the full text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 250

Whereas the continued generation of enormous volumes of solid waste each year presents unacceptable threats to human health and the environment;

Whereas several regions of the United States are experiencing a severe shortage of disposal capacity for municipal solid waste;

Whereas as a result of the inability to find sites for new solid waste management facilities, many communities are managing waste in facilities that were not designed with the best available environmental controls;

Whereas the generation of hazardous waste and solid waste must be reduced and as much remaining waste as possible must be recycled to protect human health and the environment and to minimize treatment and disposal capacity problems;

Whereas a significant amount of waste can be diverted from disposal by the utilization of source separation, mechanical separation, and community-based recycling programs;

Whereas local governments should be an integral component of the decisionmaking process regarding the management of municipal solid waste;

Whereas developing a system of waste management that, to the greatest extent practicable, separates elements of the waste stream that require special management or

that are in demand for reuse or recycling will enhance the economic feasibility and environmental safety of all management methods, including recycling, incineration, and land disposal;

Whereas source reduction and recycling represent the most enviornmentally sound means of managing municipal solid waste and can often be carried out with a lower cost than is incurred by other means;

Whereas recycling preserves limited landfill capacity and reduces the amount of solid waste intended for incineration;

Whereas recycling can save energy and avoid the pollution created from extracting resources from their national environment;

Whereas the revenues recovered by recycling programs offset the costs of solid waste management;

Whereas a well-developed system of recycling scrap metals, paper, and glass already exists and is significantly reducing the quantity of solid waste entering landfills or incinerators;

Whereas the technology for recycling plastic is currently under development, and progress continues toward increasing potential markets;

Whereas many consumer products are designed without sufficient regard for safe and efficient recycling after disposal;

Whereas Federal, State, and local governments should promote the design of products that can be recycled safely and efficiently;

Whereas Federal, State, and local governments should enact legislative measures that will increase the amount of solid waste that is recycled;

Whereas Federal, State, and local governments should encourage the growth of incremental markets for materials recovered from recyclable goods;

Whereas Federal, State, and local governments should establish incentives for household separation of waste to encourage recycling;

Whereas the success of source reduction and recycling programs depends on the participation of an informed public; and

Whereas the people of the United States should be encouraged to participate in educational and legislative endeavors that promote waste separation methods, community-based recycling programs, and expanded utilization of recovered materials: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That April 1990 is designated as "National Recycling Month", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe the month with appropriate ceremonies and activities.●

ADDITIONAL COSPONSORS

S. 695

At the request of Mr. NICKLES, his name was withdrawn as a cosponsor of S. 695, a bill to promote excellence in American education by recognizing and rewarding schools, teachers, and students for their outstanding achievements; enhancing parental choice; encouraging the study of science, mathematics, and engineering, and for other purposes.

S. 775

At the request of Mr. SHELBY, the names of the Senator from Pennsylvania [Mr. HEINZ] and the Senator from Wisconsin [Mr. KASTEN] were added as cosponsors of S. 775, a bill to require the Secretary of Energy to establish three centers for Metal Casting Competitiveness Research.

S. 1216

At the request of Mr. SIMON, the names of the Senator from Massachusetts [Mr. KERRY] and the Senator from Iowa [Mr. HARKIN] were added as cosponsors of S. 1216, a bill to amend the National Labor Relations Act to give employers and performers in the live performing arts, rights given by section 8(e) of such Act to employers and employees in similarly situated industries, to give to such employers and performers the same rights given by sections 8(f) of such Act to employers and employees in the construction industry, and for other purposes.

S. 1310

At the request of Mr. SIMON, the names of the Senator from New York [Mr. D'AMATO], the Senator from Tennessee [Mr. GORE], and the Senator from Georgia [Mr. FOWLER] were added as cosponsors of S. 1310, a bill to eliminate illiteracy by the year 2000, to strengthen and coordinate literacy programs, and for other purposes.

S. 1365

At the request of Mr. COATS, the name of the Senator from Alabama [Mr. HEFLIN], was added as a cosponsor of S. 1365, a bill to amend title I of the Omnibus Crime Control and Safe Streets Act of 1968 to authorize grants to States for projects to demonstrate innovative alternatives to the incarceration of persons for nonviolent offenses and drug-related offenses.

S. 1430

At the request of Mr. KENNEDY, the names of the Senator from Tennessee [Mr. GORE], the Senator from Alabama [Mr. HEFLIN], and the Senator from Massachusetts [Mr. KERRY] were added as cosponsors of S. 1430, a bill to enhance national and community service, and for other purposes.

S. 1664

At the request of Mr. HEINZ, the names of the Senator from Utah [Mr. HATCH], the Senator from Kansas [Mr. DOLE], and the Senator from Texas [Mr. GRAMM] were added as cosponsors of S. 1664, a bill to establish a congressional commemorative medal for members of the Armed Forces who were present during the attack on Pearl Harbor on December 7, 1941.

S. 1696

At the request of Mr. KENNEDY, the name of the Senator from North Dakota [Mr. BURDICK] was added as a cosponsor of S. 1696, a bill to amend title 28 of the United States Code to prohibit racially discriminatory capital sentencing.

S. 1751

At the request of Mr. GORTON, the name of the Senator from North Carolina [Mr. HELMS] was added as a cosponsor of S. 1751, a bill to prohibit the use of refrigerated motor vehicles for the transportation of solid waste, to prohibit the use of cargo tanks in providing motor vehicle transportation of food and hazardous materials, and for other purposes.

S. 1791

At the request of Mr. ROCKEFELLER, the name of the Senator from New Jersey [Mr. LAUTENBERG] was added as a cosponsor of S. 1791, a bill to amend the International Travel Act of 1961 to assist in the growth of international travel and tourism into the United States, and for other purposes.

S. 1815

At the request of Mr. BOSCHWITZ, the name of the Senator from Iowa [Mr. HARKIN] was added as a cosponsor of S. 1815, a bill to amend the Internal Revenue Code of 1986 to exclude the imposition of employer Social Security taxes on cash tips.

S. 1835

At the request of Mr. WILSON, the name of the Senator from Kentucky [Mr. MCCONNELL] was added as a cosponsor of S. 1835, a bill to amend the Drug-Free Schools and Communities Act of 1986 to provide for the awarding of grants for drug abuse resistance education instruction for students, and for other purposes.

S. 1854

At the request of Mr. METZENBAUM, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of S. 1854, a bill establishing the Aviation Policy Board for the purpose of setting airfares and routes, and requiring the Secretary of Transportation to take certain actions to improve service and promote safety in airline travel.

S. 1876

At the request of Mr. KOHL, the name of the Senator from Tennessee [Mr. GORE] was added as a cosponsor of S. 1876, a bill to amend the Internal Revenue Code of 1986 to provide a refundable tax credit for the costs of small businesses in providing accessibility for disabled individuals.

S. 1893

At the request of Mr. LAUTENBERG, the name of the Senator from Maryland [Mr. SARBANES] was added as a cosponsor of S. 1893, a bill to reauthorize the Asbestos School Hazard Abatement Act of 1984.

S. 2021

At the request of Mr. DOLE, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of S. 2021, a bill to amend

title 11, United States Code, to ensure that the bankruptcy laws are not used to prevent restitution to, or recovery of, failed financial institutions.

S. 2048

At the request of Mr. SARBANES, the name of the Senator from Virginia [Mr. WARNER] was added as a cosponsor of S. 2048, a bill to provide for cost-of-living adjustments in 1991 under certain Government retirement programs.

SENATE JOINT RESOLUTION 229

At the request of Mr. CRANSTON, the name of the Senator from Tennessee [Mr. SASSER] was added as a cosponsor of Senate Joint Resolution 229, a joint resolution to designate April 1990 as "National Prevent-A-Litter Month."

SENATE JOINT RESOLUTION 235

At the request of Mr. HUMPHREY, the name of the Senator from Minnesota [Mr. DURENBERGER] was added as a cosponsor of Senate Joint Resolution 235, a joint resolution proposing a constitutional amendment to limit congressional terms.

SENATE JOINT RESOLUTION 236

At the request of Mr. WILSON, the names of the Senator from Missouri [Mr. BOND], the Senator from Idaho [Mr. MCCLURE], the Senator from Arizona [Mr. DECONCINI], the Senator from Utah [Mr. GARN], the Senator from Rhode Island [Mr. CHAFEE], and the Senator from New Hampshire [Mr. HUMPHREY] were added as cosponsors of Senate Joint Resolution 236, a joint resolution designating May 6 through 12, 1990, as "Be Kind to Animals and National Pet Week."

SENATE JOINT RESOLUTION 243

At the request of Mr. LAUTENBERG, the names of the Senator from Rhode Island [Mr. CHAFEE], the Senator from Arizona [Mr. DECONCINI], the Senator from Connecticut [Mr. DODD], the Senator from Ohio [Mr. GLENN], the Senator from Washington [Mr. GORTON], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Idaho [Mr. MCCLURE], the Senator from Delaware [Mr. ROTH], and the Senator from Colorado [Mr. WIRTH] were added as cosponsors of Senate Joint Resolution 243, a joint resolution to designate March 25, 1990, as "Greek Independence Day: A National Day of Celebration of Greek and American Democracy."

SENATE JOINT RESOLUTION 246

At the request of Mr. BOSCHWITZ, the names of the Senator from Wisconsin [Mr. KOHL], the Senator from Arizona [Mr. MCCAIN], the Senator from Florida [Mr. MACK], the Senator from Massachusetts [Mr. KERRY], the Senator from Connecticut [Mr. DODD], the Senator from Nevada [Mr. REID], the Senator from Washington [Mr. GORTON], the Senator from Maine [Mr. COHEN], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Connecticut [Mr. LIEBERMAN], the Senator from Hawaii [Mr. INOUYE], and the Senator from Iowa [Mr. GRASSLEY] were added as cosponsors of Senate Joint Resolution 246, a joint resolution calling upon the United Nations to repeal General Assembly Resolution 3379.

NOTICE

In the RECORD of January 31, 1990, the following cosponsors were inadvertently omitted. The permanent RECORD will be corrected accordingly.

SENATE JOINT RESOLUTION 238

At the request of Mr. SARBANES, the names of the Senator from Nevada [Mr. REID], the Senator from Michigan [Mr. LEVIN], the Senator from Maine [Mr. COHEN], the Senator from Utah [Mr. GARN], the Senator from Iowa [Mr. GRASSLEY], the Senator from Alaska [Mr. MURKOWSKI], the Senator from New York [Mr. D'AMATO], the Senator from Oklahoma [Mr. BOREN], the Senator from Arkansas [Mr. BUMPERS], the Senator from Arkansas [Mr. PRYOR], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from North Dakota [Mr. CONRAD], the Senator from Delaware [Mr. ROTH], the Senator from Virginia [Mr. WARNER], and the Senator from California [Mr. CRANSTON] were added as cosponsors of Senate Joint Resolution 238, a joint resolution to designate the week beginning March 5, 1990, as "Federal Employees Recognition Week."

AMENDMENTS SUBMITTED

NATIONAL LITERACY ACT

SIMON AMENDMENT NO. 1226

Mr. SIMON proposed an amendment to the bill (S. 1310) to eliminate illiteracy by the year 2000, to strengthen and coordinate illiteracy programs, and for other purposes, as follows:

On page 46, line 5, strike "1989" and insert "1990".

On page 47, line 13, strike "1989" and insert "1990".

On page 65, line 7, strike "1989" and insert "1990".

On page 68, beginning with line 11, strike all through line 25, and insert the following:

(B) in the second sentence of subsection (a)(1) by striking all beginning with "consist" through the end period and inserting "consists of—

"(A) representatives of public education;

"(B) representatives of public and private sector employment;

"(C) representatives of recognized State labor organizations;

"(D) representatives of private, voluntary, and community-based literacy organizations;

"(E) the chief administrative officer of a State, or the designee of such individual; and

"(F) representatives of each of the following State agencies:

"(i) the State education agency;

"(ii) the State job training agency;

"(iii) the State human services agency;

"(iv) the State public assistance agency;

"(v) the State library program; and

"(vi) the State economic development agency."

On page 72, line 4, strike "(a)".

On page 72, lines 6 and 7, strike "paragraph (1)(B)" and insert "subsection (a)(1)(B)".

On page 72, lines 8 and 9, strike "paragraph (2)" and insert "subsection (a)(2)".

On page 72, line 9, strike "and 'and' ".

On page 72, line 10, strike "thereof" and insert "of subsection (a)".

On page 72, line 11, strike "paragraph (3)" and insert "paragraphs (3) and (4)".

On page 73, line 7, strike "Act is amended" and insert "Act, as amended by paragraph (1) of this subsection, is further amended".

On page 75, line 25, strike "1989" and insert "1990".

On page 81, line 11, insert ", subject to the availability of appropriations," after "authorized".

On page 83, line 7, strike "1989" and insert "1990".

On page 90, line 5, strike "1989" and insert "1990".

On page 92, line 7, strike "1989" and insert "1990".

On page 97, line 9, strike "(d)" and insert "(e)".

On page 97, line 10, strike "(d)" and insert "(e)".

BOND AMENDMENT NO. 1227

Mr. BOND proposed an amendment to the bill S. 1310, supra, as follows:

On page 76, line 8, strike "and".

On page 76, line 10, strike the period and insert a semicolon and "and".

On page 76, between lines 10 and 11, insert the following:

(4) foster the detection of disabilities or developmental problems that might hinder future learning.

On page 76, line 22, strike "and" and insert "State educational agency," before "local".

On page 76, line 22, insert ", or other public agencies," before "to".

On page 77, between lines 2 and 3 insert the following:

(b) FINDINGS.—The Congress finds that children participating in State Parents as Teachers programs and similar programs have more advanced cognitive skills, language ability, and social skills than their preschool age counterparts.

On page 77, line 3, strike "(b)" and insert "(c)".

On page 77, line 5, strike "a total of 10 demonstration".

On page 77, line 7, insert "State educational agency", before "local".

On page 77, line 7 and 8, strike "and" and insert "or".

On page 77, line 8, strike "80 percent" and insert "the Federal share".

On page 77, line 14, insert "primarily" after "programs".

On page 77, between lines 22 and 23 insert the following:

(3)(A) Each grant awarded under this subsection shall be in an amount which is not less than $100,000 or more than $750,000.

(B) In determining the amount of the grant awarded under this subsection, the Secretary shall take into consideration the size of the population to be served, the size

of the area to be served, and the financial resources of such population and area.

(4) The Federal share—

(A) for the first fiscal year for which a grant is awarded under this subsection shall be 90 percent;

(B) for the second fiscal year for which a grant is awarded under this subsection shall be 80 percent;

(C) for the third fiscal year for which a grant is awarded under this subsection shall be 70 percent;

(D) for the fourth fiscal year for which a grant is awarded under this subsection shall be 60 percent; and

(E) for the fifth fiscal year for which a grant is awarded under this subsection shall be 50 percent.

On page 77, line 23, strike "(c)" and insert "(d)".

On page 77, line 24, insert "State educational agency," before "local".

On page 77, line 25, strike "demonstration".

On page 78, line 10, strike "(d)" and insert "(e)".

HEINZ (AND SPECTER) AMENDMENT NO. 1228

Mrs. KASSEBAUM (for Mr. HEINZ, for himself and Mr. SPECTER) proposed an amendment to the bill S. 1310, supra, as follows:

On page 75, between lines 2 and 3, insert the following:

"SEC. 373. EDUCATION PROGRAMS FOR COMMERCIAL DRIVERS

"(a) PROGRAM AUTHORIZED.—(1) The Secretary is authorized to make grants on a competitive basis to pay the Federal share of the costs of establishing and operating adult education programs which increase the literacy skills of commercial drivers which are necessary to successfully complete the knowledge test requirements under the Commercial Motor Vehicle Safety Act of 1986.

"(b) FEDERAL SHARE.—The Federal share of the costs of the adult education programs authorized in subsection (a) shall be 50 percent. Nothing in this subsection shall be construed to require states to meet the nonfederal share from state funds.

"(c) ELIGIBLE INDIVIDUALS.—Individuals eligible to receive a grant under this section include—

"(1) private employers employing commercial drivers;

"(2) colleges, universities, or community colleges;

"(3) approved apprentice training programs; and

"(4) labor organizations, the membership of which includes commercial drivers; and

"(5) any other public or private organization the Secretary finds that would most efficiently educate commercial drivers.

"(d) DEFINITION.—The term 'commercial driver' means an individual required to possess a commercial driver's license under the Commercial Motor Vehicle Safety Act of 1986.

"(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $5,000,000 for each of the fiscal years 1990 and 1992".

ARMSTRONG AMENDMENT NOS. 1229 AND 1230

Mrs. KASSEBAUM (for Mr. ARMSTRONG) proposed two amendments to the bill S. 1310, supra; as follows:

AMENDMENT NO. 1229

On page 69, line 6, strike "Council." and insert "Council. The Council shall also include classroom teachers who have demonstrated outstanding results in teaching children or adults to read.".

AMENDMENT NO. 1230

On page 61, line 4, strike "to" and insert "which may".

On page 62, line 6, strike "including" and insert "such as".

On page 62, line 10, strike "and".

On page 62, between lines 10 and 11, insert the following:

"(ii) reading instruction in methods such as Basal reading method, exposure method, intensive systematic phonics method, linguistic method, Ortin-Gillingham method, sight word ('look-say') method, or whole word method; and

On page 62, line 11, strike "(ii)" and insert "(iii)".

On page 72, line 22, strike "level.';" and insert "level; and".

On page 72, between lines 22 and 23, insert the following:

"(4) training the individuals described in paragraph (3) in reading instruction methods such as the Basal reading method, exposure method, intensive systematic phonics method, linguistic method, Ortin-Gillingham method, sight word ('look-say') method, or whole word method.";

On page 72, line 23, strike "(4)" and insert "(D)".

On page 73, line 1, strike "(5)" and insert "(E)".

WALLOP (AND OTHERS) AMENDMENT NO. 1231

Mrs. KASSEBAUM (for Mr. WALLOP, for himself, Mr. SIMPSON, and Mr. BINGAMAN) proposed an amendment to the bill S. 1310, supra, as follows:

On page 76, line 12, strike "Section" and insert "(a) AUTHORIZATION OF APPROPRIATIONS.—Section".

On page 76, between lines 18 and 19, insert the following:

(b) INDIANS.—Section 1052 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2742) is amended—

(1) by inserting ", and to Indian tribes and tribal organizations," after "such agencies" in subsection (a).

(2) by inserting ", Indian tribes, and tribal organizations" after "States" each place it appears in subsection (b), and

(3) by striking out subsection (c) and inserting in lieu thereof the following:

"(c) DEFINITIONS.—For purposes of this part—

"(1) The term 'State' includes each of the 50 States of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

"(2) The terms 'Indian tribe' and 'tribal organization' have the respective meaning given to each of those terms under section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b).".

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BUMPERS. Mr. President, I would like to announce that the hearing before the Subcommittee on Public Lands, National Parks and Forests of the Committee on Energy and Natural Resources, which was previously announced for February 7 at 2 p.m., has been rescheduled for February 26 at 10 a.m. The purpose of the hearing is to receive testimony on two major provisions of H.R. 987, the House-passed Tongass reform legislation, which have not been directly addressed at previous subcommittee hearings. Specifically, the subcommittee will take testimony on those portions of H.R. 987, relating to fisheries protection and buffer zones (section 104(e)), and those provisions relating to the designation of additional wilderness areas on the Tongass National Forest (title III).

For further information regarding the hearing, please contact Beth Norcross of the subcommittee staff at (202 24-7933.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FINANCE

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on February 5, 1990, at 2 p.m. to hold a hearing on a proposal to reduce Social Security taxes.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the full committee of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate Monday, February 5, 1990,

10 a.m. for a hearing to receive testimony concerning the following Department of Energy nominations: John Wesley Bartlett, of Massachusetts, to be Director of the Office of Civilian Radioactive Waste Management, vice Ben C. Rusche, resigned, and Robert H. Gentile, of Ohio, to be an Assistant Secretary of Energy (Fossil Energy), vice James Allen Wampler, resigned.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

IN COMMEMORATION OF THE MARIAN CATHOLIC HIGH SCHOOL MARCHING BAND

● Mr. SIMON. Mr. President, it gives me great honor to once again pay tribute to the members of the Marian Catholic High School Marching Band for their outstanding accomplishments in national high school band competition. The Spartan Marching Band of Marian Catholic High, located in Chicago Heights, IL, is the 1989 Grand National Champion of the nationwide high school band competition sponsored by the Marching Bands of America. This year's achievement alone would deserve our attention, but it is even more remarkable because the Spartan Marching Band has held this honor for 3 consecutive years. In addition, they have received this award for the fourth time in 5 years—a feat never before accomplished.

This year's competition held in Indianapolis, IN, was attended by 56 top-notch bands from across the Nation. After 2 grueling days of displaying its talents to an audience of music enthusiasts, Marian High School defended its National Champion status with an inspiring performance. The winning score was an impressive 94 points.

In addition to this year's national competition, the Spartan Band has won the Illinois State Championship in its class for 5 of the past 7 years. Along with the Grand National Championship Award, Marian Catholic High School received the trophy as AA Division Champions and the Highest Achievement Award for Best General Effect.

Under the direction of Greg Bimm and the assistant directorship of Bob Page, Marian Catholic High School Marching Band has provided spectacular entertainment. It has been a great source of pride to its community, the State of Illinois, and the Nation as a whole. All too often we forget the countless hours invested and the dedication required to produce an impressive work of art. These talented young men and women who dedicate themselves to a skillfully coordinated musical performance are nothing short of artists with a profound commitment to their craft.

Mr. President, I hope my colleagues will join me in congratulating the Marian Catholic High School Marching Band for its distinguished record of accomplishment, and in wishing the members and the band our best for continued success in the years to come.●

RABBI MENACHEM MENDEL SCHNEERSON

● Mr. MOYNIHAN. Mr. President, today marks the 40th anniversary of Rabbi Menachem Mendel Schneerson's investiture as the Seventh Lubavitcher Rebbe. For over 40 eventful years Rabbi Schneerson has provided inspired leadership to a worldwide network of educational, cultural, and religious agencies that have helped write a major chapter in contemporary Jewish history. New Yorkers of all faiths are proud that the world headquarters of Lubavitch is located in the Crown Heights section of New York City's borough of Brooklyn where it was relocated in 1940 by the current Rebbe's venerable predecessor and father-in-law, Rabbi Joseph Schneerson.

Many Members of the Senate are familiar with the role that a Member of this body played in securing the release of Rabbi Joseph Schneerson from a Soviet prison and the emigration of his entire immediate family, including the current Rebbe, from Stalin's Russia. The intervention of Senator William Borah of Idaho on behalf of this beleaguered Chassidic family stands as a noble example of courageous moral leadership. All of us in public life would do well to ponder Senator Borah's oft-repeated explanation as to his "motive" in leading an international campaign to save an apparently obscure religious leader in a faraway land, "I like to do things that get me votes in that next election in Idaho but every so often I do something that assures me of votes in that final election we will all have to stand for someday."

I thought of Senator Borah less than a month ago when I visited Morocco in my capacity as chairman of the Senate Foreign Relations Committee's Subcommittee on the Middle East and South Asia.

When I met with the Jewish leaders of Morocco and toured several of their synagogues and civic centers I discovered two pictures in every building—His Majesty King Hassan II and the Lubavitcher Rebbe, Rabbi Menachem Mendel Schneerson.

This should not surprise anyone who is familiar with the Rebbe's historic role in supporting Jewish education and Jewish continuity throughout the world. The Members of the Senate are familiar with Lubavitcher activities in their own States but Lubavitch is also deeply involved in over 100 nations around the globe—including many where it is the only official Jewish presence and the only source of Jewish educational and religious training. And, some day, hopefully soon, the full story will be told of Lubavitch's heroic role in keeping Judaism alive in lands of cruel tyranny where teaching the Bible is a crime and uttering a public prayer is rewarded with a prison sentence.

For 40 years these remarkable activities—the publicized and the clandestine; the Chanukah lamp lighting on television and the underground matzah baking under the noses of Communist secret police, the young women giving out Sabbath candles on Fifth Avenue, and the Yeshiva schools in Arab lands—have been directed and inspired by Rabbi Menachem Mendel Schneerson.

I ask that I may place in the RECORD a brief biography of Rabbi Schneerson and a description of his career prepared by the Lubavitch Youth Organization. I am sure that the entire Senate joins me in congratulating him on his 40 years of exceptional spiritual leadership and in wishing him many more years of healthy and vigorous involvement: L'chaim.

The material follows:

THE REBBE

The Lubavitcher Rebbe, Rabbi Menachem Mendel Schneerson, world leader of the Chabad-Lubavitch Movement, has been described as one of the most respected Jewish personalities of our time. To his hundreds of thousands of Chassidim and numerous followers and admirers around the world, he is "the Rebbe," today's most dominant figure in Judaism and largely responsible for stirring the conscience and spiritual awakening of world Jewry.

From his office at Lubavitch World Headquarters in New York, the Rebbe generates a constant flow of optimism, strength and instruction that unites and inspires world Jewry. Indeed, many of the Rebbe's innovations are so deeply ingrained in Jewish life today that they often are no longer identified as Lubavitch in origin.

EARLY YEARS

Rabbi Menachem Mendel Schneerson is seventh in the dynastic lineage of Lubavitcher leaders. The Chabad-Lubavitch Movement was founded in the 18th century by Rabbi Schneur Zalman of Liadi (1745-1812), author of the basic work of Chabad philosophy—*Tanya*, and the Schulchan Aruch—the Code of Jewish Law.

The Rebbe was born in 1902, on the 11th day of Nissan, in Nikolaev, Russia. He is the son of the renowned Kabbalist and Talmudic scholar, Rabbi Levi Yitzchak Schneerson, and Rebbetzin Chana, an aristocratic woman from a prestigious Rabbinic family. He is also the great-grandson of the third Lubavitcher Rebbe, and his namesake, Rabbi Menachem Mendel of Lubavitch. At the age of five he moved with his parents to the Ukrainian city of Yekatrinislav, now Dnepropetrovsk, where his father was appointed Chief Rabbi.

From early childhood the Rebbe displayed a prodigious mental acuity and soon had to leave the *cheder* because he was so far ahead of his classmates. His father engaged private tutors for him, and after that, taught him himself. By the time he reached his Bar Mitzvah, the Rebbe was considered an illuy, a Torah prodigy. He spent the rest of his teen years immersed in the study of Torah.

The Rebbe met the previous Labavitcher Rebbe, Rabbi Yosef Yitzchak Schneersohn, in 1923, in Rostov, Russia. In 1929 Rabbi Menachem Mendel Schneerson, married the second daughter of Rabbi Yosef Yitzchak Schneersohn, the late Rebbetzin Chaya Moussia, in Warsaw.

He later studied in the University of Berlin and then at the Sorbonne in Paris. It was there that his formidable knowledge of mathematics and the sciences began to blossom.

ARRIVAL IN U.S.A.

In 1941 he emigrated to the United States. His father-in-law, who arrived in the United States a year earlier, appointed him to head his newly founded organizations: Merkos L'inyonei Chinuch, the educational arm of the Lubavitch movement; Machne Israel, the movement's social service organization; and Kehot Publication Society, the Lubavitch publishing department.

Shortly thereafter the future Rebbe began writing his scholarly notations to various Chassidic and Kabbalistic treaties, as well as a wide range of responsa on Torah subjects. With publication of these works his genius was soon recognized by Jewish scholars the world over.

LEADERSHIP

After the passing of Rabbi Yosef Yitzchak Schneersohn, on the 10th Shevat, in 1950, Rabbi Menachem M. Schneerson, ascended to the leadership of the flourishing movement. Labavitch institutions and activities soon took on new dimensions. The outreaching philosophy of Chabad-Labavitch, based on the biblical: "and you shall spread forth to the West and East and to the North and to the South" (Genesis 28:14) was immediately translated into action as Chabad-Lubavitch Centers were opened in dozens of cities across the United States.

Motivated by a profound love for the Jewish people, the Rebbe launched an unprecedented program to reach every Jew. His shluchim—the Lubavitch emissaries—were charged with establishing Chabad-Lubavitch centers in every corner of the world. These dedicated men and women reflect the commitment of Lubavitch to the entire Jewish people. With open minds and open hearts, they respond to the needs of their respective communities through religious, educational and social-service programs. It is no wonder that, for many communities, Chabad-Lubavitch has become the central address for Yiddishkeit.

ONE THOUSAND POINTS OF LIGHT

During the Rebbe's four decades of inspired leadership Lubavitch has become the world's largest Jewish outreach organization, maintaining centers in almost every Jewish community on the globe.

Today, some one thousand Chabad-Lubavitch institutions span dozens of countries on six continents, and those countries and communities that have no Chabad-Lubavitch institution in place are visited and cared for by the closest existing facility.

These educational and social-service institutions serve a variety of functions for the entire spectrum of Jews, regardless of background or affiliation. Indeed the programs geared to humanitarian endeavors reach out beyond the Jewish community to all mankind.

In the United States alone, more than 180 centers serve every state in the Union.

In Israel, the "Chabadniks" are particularly endeared to all. Their programs reach all segments of the community, and enjoy the respect of the population, regardless of affiliation. From the soldier stationed at the isolated army post to the farmer on the kibbutz—all have come to admire the personal attention given to him by the Rebbe through his emissaries.

Kfar Chabad, near Tel Aviv, is one of several Lubavitch cities in Israel, and serves as the Lubavitch headquarters there. Its unique educational institutions and outreach facilities have become a lifeline of spirituality for tens of thousands of Israeli citizens.

It was in Russia that Chabad-Lubavitch was born more than 200 years ago, and since nurtured there by its Rebbes in each generation.

The heroic efforts of Chabad-Lubavitch in maintaining Judaism there under the most difficult conditions before and especially after the Bolshevik revolution are legion, and have yet to be told.

Those knowledgeable as to the maintenance of Judaism in the Soviet Union during the past century know that Lubavitch and its Rebbes played the major role in keeping the fires of Judaism aglow under the most oppressive and excruciating circumstances conceivable.

Now that perestroika has arrived, the work continues publicly. The Rebbe has established more than twenty institutions for Jewish learning. Dozens of emissaries have taken up residence there, and as soon as developments will allow, Jewish institutions under the aegis of Lubavitch will begin to mushroom throughout the U.S.S.R. and Eastern Europe.

In other countries, Lubavitch institutions have been established in Argentina, Australia, Belguim, Brazil, Canada, Chile, Colombia, Costa Rica, England, France, Holland, Hong Kong, Hungary, Italy, Morocco, Paraguay, Peru, Scotland, Soviet Union, South Africa, Spain, Switzerland, Tunisia, Uruguay, Venezuela and West Germany.

These institutions monitor the pulse of Jewish life in their respective communities, and contribute to their spiritual vitality and stability. Directors report regularly to Lubavitch World Headquarters in New York, so that the Rebbe is constantly aware of what is happening in Jewish communal life around the world.

Under the Rebbe's guidance, the Lubavitch publishing house, Kehot Publication Society, has become the largest Jewish publishing house in the world. It publishes and distributes millions of books, pamphlets, cassettes and educational materials in Hebrew, Yiddish, English, Russian, Spanish, French, Portuguese, Italian, Arabic, Farsi, Dutch, and German.

The central library and archive center of Agudas Chassidei Chabad-Lubavitch, at Lubavitch World Headquarters, is one of the world's most precious repositories of Jewish books and literature, containing a collection of rare books and manuscripts.

REVERSING THE TIDE

The Rebbe has often been heard saying that "we dare not rest until every Jewish child receives a Jewish education."

The Jewish day-school system, of which Lubavitch was the pioneering force, has displaced across a wide spectrum the once-prevalent ideology that Jewish education was a kind of dutiful appendage to the real business of acquiring a secular education. Jewish day schools have since become accepted and fashionable. This, as well as some of the outreach programs of Chabad-Lubavitch have served as a guide for others to emulate.

The Rebbe has continually emphasized the need to reach out to alienated youth and young adults to bring them back to their Jewish roots. He has seen to the establishing of special educational facilities for them.

From full-time yeshivas for Jewish men and women with little or no background in Torah study to literally tens of thousands of classes at Chabad-Lubavitch centers and synogogues around the world—the Rebbe has been, and continues to be, the vital life-force behind an outreach process that has affected the entire spectrum of Jewish life.

His widespread Mitzvah and festival campaigns, have ignited in the masses a flame of devotion and commitment to Judaism, and has created a virtual spiritual revolution among those previously alienated from Judaism.

The Lubavitch Mitzvah-Mobiles, or the "Jewish Tanks to combat assimilation," as the Rebbe refers to them, have become a familiar sight on the streets and by-ways of urban and suburban communities around the world. Offering "Mitzvahs on the spot for people on the go," these "tanks" encourage their visitors to participate in a Mitzvah, and prompt them to come closer to their precious Jewish heritage.

From Melbourne to London, Casablanca to Los Angeles, through the many Lubavitch schools, youth centers, institutions, agencies and activities established and maintained through the Rebbe's efforts, countless Jews have found their way home.

CONCERN FOR ALL

There is a story told about the Rebbe's early life that seems to be almost symbolic of much that was to follow. When he was nine years old, the young Menachem Mendei, dived into the Black Sea to save the life of another boy who had fallen from the deck of a moored ship. That sense of other lives in danger, seems to dominate his conscience. Jews "drowning," and no one hearing their cries for help; Jewish children deprived of Jewish education; Jews on campus, in isolated communities, under repressive regimes—all in need of help.

The Rebbe continually strives, ceaselessly and untiringly, to reach out to all Jews. He moves and motivates all those whom he reaches to take part in this task to reach out to others, to help them, to educate them and bring them together.

REVOLUTIONARY THINKER

The Rebbe is a systematic and conceptual thinker on the highest level. His unique analytical style of thought has resulted in a monumental contribution to Jewish scholarship. His brilliant approach to the understanding of the classic Biblical commentary of *Rashi*, for example, has revolutionized Bible study.

More than 125 volumes of his talks, writings, correspondence and reponsa have been published to date.

For all this scholarship, he consistently exhorts that intellectual understanding must bring to action and good deeds.

LETTERS AND CORRESPONDENCE

The *Igrot Kodesh* series, a chronological collection of the Rebbe's correspondence and responsa, is now in the midst of publication. Volume 16 has just been published, and brings the total of letters published to more than 6,000, written up to the winter of 1958. The series contains only his correspondence in Hebrew and Yiddish; his prolific correspondence in English is now being prepared for publication.

The writings in the *Igrot Kodesh* series shed some light on the Rebbe's genius and the success of Lubavitch under his leadership. His correspondents include Rabbinic scholars and statesman, homemakers and educators, chief rabbis and Bar/Bat Mitzvah youngsters, scientists and laborers, communal leaders and laymen, men and women from all walks of life.

The breathtaking sweep of topics covered in these letters encompasses every sphere of interest, and every field of human endeavor. They range from mysticism, Talmud and Chassidic philosophy, to science and world events, from guidance in personal matters to advice in education and social and communal affiars.

It is a veritable treasure chest of profound Rabbinic, Talmudic, Kabbalistic and Chassidic teachings, exuding encouragement, inspiration and direction, reflecting the Rebbe's remarkable insight into human nature.

It is perhaps the case that his fame as a leader and innovator of widespread mitzvah campaigns and communal projects is a result of his originality as a thinker, and his ability to unite the conceptual with the pragmatic. Essentially, with the Rebbe these two facets are one—the comprehensiveness of his thought and action are part of the same drive: the unity of Torah, the unity of the Jewish people, the unity of mankind in fulfilling the ultimate purpose of creation.

FARBRENGEN

A "Farbrengen," Chassidic gathering at which the Rebbe speaks publicly, is an unforgettable experience.

The Rebbe speaks extemporaneously, usually for hours, without referring to any notes, on a wide range of subject matter, from profound Talmudic and Chassidic teachings, to matters affecting the quality of Jewish life, to events of vital national and international concern. The Rebbe teaches, guides and elevates.

During the brief intermissions in the Rebbe's talks the thousands in attendance join in Chassidic singing, and raise their cups in greetings of "L 'Chayim" to the Rebbe.

Amidst the thousands of Chassidim in attendance at a Farbrengen at Lubavitch World Headquarters in New York, one can find people from literally all walks of life, young and old, communal leaders and plain folk, rich and poor.

When the Rebbe speaks on weekdays his talk is transmitted live via satellite to Chabad-Lubavitch centers and to cable TV stations across North America and parts of South America, and often to Israel, Europe, Africa and Australia, bringing the Rebbe's message into millions of Jewish and non-Jewish homes.

A special telephone hookup system also relays the Rebbe's talk live to Lubavitch Centers around the world.

A simultaneous English translation of his talk in Yiddish is provided for the television audience. Those personally attending the Farbrengen can use wireless receivers providing simultaneous translations in English, Hebrew, Spanish, French and other languages as well.

The Rebbe's Farbrengen has been described as a "unique blend of intellectual profundity and joyous celebration; an uplifting experience that enlightens and motivates."

PILLAR OF LIGHT

Those who consult or visit the Rebbe for the first time—usually do so because of his reputation as a man of encompassing vision. They tend to emerge somewhat unnerved, taken by surprise. They might expect, the conventional type of leader, imposing his presence by the force of his personality. What they find is difficult to define. The Rebbe, despite the enormous complexity of his involvements and concerns, is totally and humbly engaged with the person he is speaking to. It is as if nothing else exists.

Every Sunday morning, huge crowds of men, women and children gather at Lubavitch World Headquarters and patiently wait their turn to meet the Rebbe face-to-face, whereupon they receive his blessing. The Rebbe gives each individual a crisp, new dollar bill to be given to a charity of their choice.

This custom attracts people from all walks of life who sometimes travel thousands of miles just for this momentary, yet profoundly special, unforgettable encounter.

UNIVERSAL MESSAGE

Responding to the demands of the time, the Rebbe has reached out beyond the Jewish community with a universal message to all peoples of the world.

The Rebbe has consistently called for greater awareness of the crucial importance of education of all mankind, stressing that the goal of education is not only to provide a child with information, but more essentially to develop a child's character, together with his intellectual ability, with emphasis or moral, spiritual and ethical values. Only as a result of such education will individuals recognize the need to abide by fundamental human rights and societal obligations.

The Rebbe has continuously maintained that modern, secular man has an enduring need for moral values and religious philosophy by which to live.

He often speaks of the obligation of all humankind to adhere, and live by, the "Seven Noahide Commandment"—the universal code of Biblical morality and ethics, given to all at Sinai. This, the Rebbe insists, is of the utmost necessity to bring sanity and stability to a perplexed world.●

FORTY YEARS OF LEADERSHIP BY RABBI MENACHEM M. SCHNEERSOHN

● Mr. BOSCHWITZ. Mr. President, February 5 marks the 40th anniversay of leadership of the World-Chabad Lubavitch Movement by Rabbi Menachem M. Schneersohn. This movement is a global Jewish educational and welfare effort of which I am an admirer and supporter. Rabbi Schneersohn assumed leadership of the movement in 1950 upon the passing of his esteemed father-in-law, Rabbi Yosef Schneersohn.

The focal point of the Lubavitch movement is education. During Rabbi Schneersohn's four decades of inspired leadership, Lubavitch has become the world's largest Jewish outreach organization, maintaining centers in almost every Jewish community around the the world.

Today, some 1,000 Chabad-Lubavitch institutions are found in 30 countries on 6 continents. In the United States alone, more than 180 centers serve every State. Countries and communities with no Chabad-Lubavitch institution in place are visited by those at the closest existing facility.

These educational and social service institutions serve a variety of purposes for all Jews, regardless of background or affliliation. Indeed, those programs geared to humanitarian endeavors reach out beyond the Jewish community to all mankind.

Rabbi Schneersohn has consistently called for greater awareness of the crucial importance of education for all mankind, stressing that the goal of education is not only to provide a child with information, but more essentially to develop a child's character, together with his intellectual ability, with emphasis on moral, spiritual, and ethical values. Only as a result of such education will individuals recognize the need to abide by fundamental human rights and societal obligations.

Mr. President, The rabbi has continously maintained that modern, secular man has an enduring need for moral values and a religious philosophy by which to live. He often speaks of the obligation of all mankind to adhere, and live by, the "Seven Noahide Commandments"—the universal code of morality and ethics given to all and a precursor of the Ten Commandments—to bring sanity and stability to a perplexed world.

As Rabbi Schneersohn marks his 40th year of leadership, I applaud his accomplishments and wish him many, many more healthy and happy years.●

RHODE ISLAND HOUSE OF REPRESENTATIVES SUPPORTS THE MOYNIHAN BILL

● Mr. PELL. Mr. President, on January 23 of this year I joined with the distinguished Senator from New York, Senator MOYNIHAN, in introducing legislation (S. 2016) to reduce the Social Security payroll withholding tax paid by workers and their employers from 6.2 to 5.1 percent by January 1, 1991.

This legislation is intended to stop the effective use of excess Social Security taxes to hide and to finance a significant part of the Federal Government's budget deficit. It is in addition a step toward reducing inequities in our tax system by cutting the heavy tax burden borne by middle and lower income families. Many of those families now pay more in Social Security taxes than they do in Federal income taxes, and the combination of the two

taxes comprises an especially unfair tax burden on middle and lower income families.

This proposal has generated a great deal of discussion and, I am happy to say, a great deal of support.

In the Rhode Island General Assembly, the House of Representatives on January 25 adopted a resolution expressing its support for this legislation. I want to thank the members of the Rhode Island House of Representatives for its prompt expression of support, and I particularly commend its initial sponsors, Representatives Neil A. Corkery of Warwick, Paul E. Moura of East Providence, Zygmunt J. Friedemann of Warwick, Thomas A. Lamb of West Warwick, and Armand E. Batastini, Jr., of Providence. Support for this proposal is so broad that 41 members of the 100-member House of Representatives quickly signed as cosponsors before the speedy adoption of the resolution by the full House.

Mr. President, this outpouring of support is heartening, and I ask that the text of the resolution adopted by the House of Representatives of the Rhode Island General Assembly be printed at this point in the RECORD.

The resolution follows:

HOUSE RESOLUTION MEMORIALIZING CONGRESS TO SUPPORT SENATOR DANIEL PATRICK MOYNIHAN'S BILL TO CUT SOCIAL SECURITY TAXES

Whereas, Senator Daniel Patrick Moynihan, D-N.Y., is proposing legislation to cut social security taxes by up to six hundred dollars ($600.00) a year per working couple. This proposed legislation would not pose a threat to current or future social security benefit payments or cost-of-living increases, but, in reality, would force the government to stop the use of social security funds to hide and finance the federal budget deficit; and

Whereas, Counting their employers' share, nearly three-quarters of all Americans now pay more in social security taxes than they do in income taxes. One result of this situation is that the expenses of government are financed more by the poor and middle class and less by a tax on the wealthy; and

Whereas, The main reason why the overall federal budget deficit has supposedly decreased in the last few years is because the federal government is including social security funds as part of its total revenues;

Whereas, In Senator Moynihan's words "We can no longer tolerate the use of social security surpluses to finance, say, B-2 bombers or a capital gains tax cut"; now, therefore, be it

Resolved, That the members of this house of representatives of the State of Rhode Island and Providence Plantations hereby memorialize the members of the Rhode Island Delegation in the United States Congress to support Senator Daniel Patrick Moynihan's bill to cut social security taxes; and be it

Resolved, That the secretary of state be and she hereby is authorized and directed to transmit a duly certified copy of this resolution to the Rhode Island Delegation in the United States Congress.●

COSTA RICAN ELECTIONS

● Mr. DURENBERGER. Mr. President, yesterday, Costa Ricans went to the polls to cast their ballots in Costa Rica's 10th straight peaceful Presidential election. I want to offer my personal congratulations to Rafael Calderon for his victory in this election. In a region not historically characterized by stable democracies, Costa Rica has truly distinguished itself. In November 1989, it is also important to recall, Costa Rica celebrated its centennial anniversary of democracy.

The Costa Rican elections yesterday represent the third democratic, free, and fair election in Central America in less than a year, with El Salvador and Honduras celebrating peaceful transfers of civilian power during 1989 and early 1990. Panama, liberated from the dictator Noriega, is now free to pursue its own democratic aspirations. Guatemala will elect a new President in November of this year, which will mark the first peaceful transfer of civilian power in that country's history.

There's a definite and encouraging trend in the region toward greater democracy and freedom. Costa Rica has been leading the way, and for that, the people of that country deserve our thanks and admiration.

Nicaragua is the final hold-out in the region. I sincerely hope that the people of Nicaragua, like their neighbors, will be able to experience the fruits of a genuinely free and democratic election, with broad-based participation across the political spectrum. It has long been my strongest hope that Nicaragua's electoral process would proceed freely and fairly, leading to honest elections on February 25, 1990. Regrettably, the electoral process thus far in Nicaragua has not lived up to the standards set by its neighbors.

The Costa Rican path to democracy does not necessarily provide a model for other countries in the region to follow as a script. But it does provide an inspiration. After all, Costa Rica is the oldest and most stable democracy in the Central American region. And for that, the people of Costa Rica have our deepest thanks and appreciation.●

U.S. FOREIGN AID AND POPE'S TRIP TO AFRICA

● Mr. DURENBERGER. Mr. President, Pope John Paul's recently completed tour of several west African nations draws our attention to a region of the world that is often forgotten and certainly little noticed. A primary message is expressed by the Pope before and during his travels is that the wealthy countries of the north cannot abandon their common responsibility for the south, for the problems of the Third World.

This is an important message for us in the United States to consider, especially at a time when we face increasing pressure to reassess our foreign assistance program and to provide greater aid to newly emerging democracies around the world. Senator DOLE recently highlighted this issue when he called for the United States to reconsider its foreign aid programs, in an effort to support the East European and Latin American democracies.

As I stated last year during the Foreign Assistance Appropriations debate:

As we witness remarkable changes taking place throughout the world, I believe that the time is ripe for us to reconsider the objectives and goals of U.S. foreign assistance.

Furthermore, it is important to recognize that in the past, much of our aid has been related in some way to the East-West struggle—the political, military, ideological, and philosophical conflict between the United States and the Soviet Union. But that justification is no longer as certain or valid as it once was.

Senator DOLE, to his credit, has prominently initiated an important debate. In my opinion, however, it is essential that we take heed of the Pope's admonition to assist the lesser known countries of the Third World. Without question, it is important philosophically and diplomatically for us to assist in the promotion of democracy, establishment of democratic freedoms and institutions, and creation of free and open markets. We must also recognize, however, that there are many countries throughout the Third World that, although they may not make the headlines, they do require and warrant U.S. financial assistance.

The Pope toured several of the same countries in west Africa that I visited last summer. Many of the countries in Africa and Asia to which I traveled are among the most destitute and impoverished lands in the world, where profound deprivation persists unabated. I believe strongly that even small amounts of U.S. foreign assistance to these countries can make an enormous difference.

When a country basically has nothing, the smallest amounts of assistance, while maybe not solving their long-term problems, can certainly alleviate much of the human suffering and misery that I witnessed last summer, and the Pope has reminded us of this week.

Even in a period of budget constraints, I believe it is possible to restructure the U.S. aid program in such a way as to provide meaningful support to a larger number of countries than we currently do. There will be considerable debate about cuts in foreign aid to various countries. But it is clear to this Senator that we in this country have both an obligation and the resources to provide more assistance to more countries around the

world that have desperate needs for food, health care, and economic development. I think the Pope's recent trip reminds us that in an era of bold new realities in the international arena, we should not ignore our obligation to do what we can to alleviate suffering and deprivation in some of the world's most impoverished countries.●

ORDERS FOR TOMORROW

RECESS UNTIL 9:15 A.M.—MORNING BUSINESS

Mr. LIEBERMAN. Mr. President, on behalf of the majority leader, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:15 a.m., Tuesday, February 6, and that following the time for the two leaders there be a period of morning business until 10 a.m., with Senators permitted to speak therein for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS FROM 12:30 P.M. TO 2:15 P.M.

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the Senate stand in recess from 12:30 to 2:15 p.m. on Tuesday, February 6, in order to accommodate the party conferences.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. LIEBERMAN. Mr. President, the majority leader has asked me to indicate that at 10 a.m. tomorrow, it is his intention to proceed to S. 695, the excellence in education bill, and consider that bill for 1 hour.

At 11 a.m., the Senate will proceed to the consideration of Calendar No. 78, S. 169, the global warming bill, under a 1-hour time limitation, with no amendments other than a Hollings-Baucus substitute. The Senate will vote final passage of S. 1310, the illiteracy bill, tomorrow, beginning at 12 noon, with the yeas and nays already having been ordered.

Further, Mr. President, the Senate will resume debate on S. 695 upon reconvening at 2:15 p.m. tomorrow.

Mr. President, the majority leader has asked me to indicate to our colleagues that discussions are ongoing with respect to the Clean Air Act, and that he will provide a detailed report tomorrow on the status of those negotiations.

RECESS UNTIL 9:15 A.M. TOMORROW

Mr. LIEBERMAN. Mr. President, if the distinguished acting Republican leader has no further business—and I see no Senator seeking recognition—I now ask unanimous consent that the Senate stand in recess under the previous order until 9:15 a.m. on Tuesday, February 6.

There being no objection, the Senate, at 3:03 p.m., recessed until Tuesday, February 6, 1990, at 9:15 a.m.

NOMINATIONS

Executive nominations received by the Senate, February 5, 1990:

ENVIRONMENTAL PROTECTION AGENCY

ERICH W. BRETTHAUER, OF NEVADA, TO BE AN ASSISTANT ADMINISTRATOR OF THE ENVIRONMENTAL PROTECTION AGENCY, VICE VAUN A. NEWILL, RESIGNED.

RAILROAD RETIREMENT BOARD

CHARLES J. CHAMBERLAIN, OF ILLINOIS, TO BE A MEMBER OF THE RAILROAD RETIREMENT BOARD FOR THE TERM OF 5 YEARS FROM AUGUST 29, 1989 (REAPPOINTMENT).

GLEN L. BOWER, OF ILLINOIS, TO BE A MEMBER OF THE RAILROAD RETIREMENT BOARD FOR THE REMAINDER OF THE TERM EXPIRING AUGUST 28, 1992, VICE THOMAS J. SIMON.

IN THE COAST GUARD

PURSUANT TO THE PROVISIONS OF 14 USC 729, THE FOLLOWING NAMED LIEUTENANT COMMANDERS OF THE COAST GUARD RESERVE TO BE PERMANENT COMMISSIONED OFFICERS IN THE COAST GUARD RESERVE IN THE GRADE OF COMMANDER.

DAVID L. POWELL	ALBERT W. SCHMITT
RICHARD T. CANCELLIER	ROBERT C. GRANT
JEFFREY S. MCCOMBS	LOREN H. HOWARD
BARRY R. GOGEL	FRANKLIN FLOYD
JOSE S. CULPEPPER	ALAN M. ORR
ROCCO V. CAPPETO	JOE C. WEST
JOSEPH W. COSGROVE, JR.	BRADFORD C. HERTER
MARGARET E. MINTON	DAVID F. PATELLA
JAMES T. ARMSTRONG	CHARLES O. DAVIS
MICHAEL A. LEESON	ROBERT L. COCKREL
SCOTT L. ANDERSON	ROBERT W. WEST III
MICHAEL M. JACKSON	JON W. MINOR
WILLIAM J. LAGEMAN, JR.	DANIEL V. HAGAN
STEVEN D. POOLE	STEVEN D. JORGENSEN
WILLIAM N. HINES	BARRY L. HIGGINS
COLLIN LAU	

CONFIRMATIONS

Executive nominations confirmed by the Senate February 5, 1990:

DEPARTMENT OF JUSTICE

MICHAEL J. NORTON, OF COLORADO, TO BE U.S. ATTORNEY FOR THE DISTRICT OF COLORADO FOR THE TERM OF 4 YEARS.

WALTER J. BAMBERG, OF ALABAMA, TO BE U.S. MARSHAL FOR THE MIDDLE DISTRICT OF ALABAMA FOR THE TERM OF 4 YEARS.

DONALD E. CROWL, OF OKLAHOMA, TO BE U.S. MARSHAL FOR THE NORTHERN DISTRICT OF OKLAHOMA FOR THE TERM OF 4 YEARS.

CHARLES E. HEALEY, OF NEW YORK, TO BE U.S. MARSHAL FOR THE EASTERN DISTRICT OF NEW YORK FOR THE TERM OF 4 YEARS.

CRAIG L. MEACHAM, OF CALIFORNIA, TO BE U.S. MARSHAL FOR THE CENTRAL DISTRICT OF CALIFORNIA FOR THE TERM OF 4 YEARS.

JAMES Y. STEWART, OF MICHIGAN, TO BE U.S. MARSHAL FOR THE EASTERN DISTRICT OF MICHIGAN FOR THE TERM OF 4 YEARS.

RONALD FRANK EDERER, OF TEXAS, TO BE U.S. ATTORNEY FOR THE WESTERN DISTRICT OF TEXAS FOR THE TERM OF 4 YEARS.

NAVY NOMINATIONS BEGINNING PAUL MICHAEL BADER, AND ENDING RICHARD LOUIS TITUS, JR, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD OF NOVEMBER 17, 1989.

NAVY NOMINATIONS BEGINNING SUSAN K. ARNOLD, AND ENDING KEVIN E. ZAWACKI, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD OF JANUARY 24, 1990.

NAVY NOMINATIONS BEGINNING KENNETH P. BURNS, AND ENDING JOHN R. STEENBARGER, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD OF JANUARY 24, 1990.

NAVY NOMINATIONS BEGINNING T. A. BEST, AND ENDING JOHN W. REEVES, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD OF JANUARY 24, 1990.

NAVY NOMINATIONS BEGINNING DAVID A. ADAMS, AND ENDING MICHAEL L. ZIEGLER, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD OF JANUARY 24, 1990.

NAVY NOMINATIONS BEGINNING REYNALDO L. APONTECESTERO, AND ENDING AARON L. SCOGGINS, WHICH NOMINATIONS WERE RECEIVED BY THE SENATE AND APPEARED IN THE CONGRESSIONAL RECORD OF JANUARY 24, 1990.

HOUSE OF REPRESENTATIVES—*Monday, February 5, 1990*

The House met at 12 noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

At the beginning of a new week and of a new day, we come before You in prayer, O God, not as we pretend to be but as we truly are. Put aside our pretensions and posturing or any public presence and allow us to place before You our honest feelings, our doubts or fears, our joys and delights, all the emotions of our hearts. May Your holy spirit lead us and guide us this day and this week that we may be the people You would have us be. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. The gentleman from Kansas [Mr. ROBERTS] will please come forward and lead the House in the Pledge of Allegiance.

Mr. ROBERTS led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

SUNDRY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Kalbaugh, one of his secretaries.

RESIGNATION AS MEMBER OF COMMITTEE ON GOVERNMENT OPERATIONS

The SPEAKER laid before the House the following resignation as a member of the Committee on Government Operations:

HOUSE OF REPRESENTATIVES,
Washington, DC, January 30, 1990.

Speaker THOMAS S. FOLEY,
Capitol, Washington, DC.

DEAR MR. SPEAKER: As a result of the very time consuming committee work I am involved with on the Committee on Public Works and the Committee on House Administration, I am hereby respectfully asking that my name be removed from the Committee on Government Operations.

Thank you for the opportunity for having served on this Committee. I have enjoyed my subcommittee assignments with Commerce, Consumer and Monetary Affairs and Environment, Energy and Natural Resources. I regret that my work load does not allow me to continue to serve in these areas.

Sincerely,

JOE KOLTER,
Member of Congress.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

THE PRESIDENT'S PROPOSED BUDGET MUST BE KIND AND GENTLE TO LOUISVILLE AND JEFFERSON COUNTY, KY

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, last week the President made a very nice State of the Union speech. It might even be called a kind and gentle State of the Union Message.

But behind that nice speech lies a budget which has very harsh effects upon my community of Louisville in Jefferson County, KY, in two particular respects.

One, the budget proposes to possibly close the Naval Ordnance Station in Louisville, one of the Navy's most efficient and important ordnance facilities. That could lead to the discharge of 2,400 men and women who work on Southside Drive.

The second effect of the President's budget is to reduce markedly, by some $600 million, funds for mass transit and to eliminate totally all funds for urban mass transit subsidies which for TARC, the transit authority of River City, is absolutely vital to its continuation.

I intend to fight against the closure of the Naval Ordnance Station and fight for additional funding for TARC.

If this is going to be a nice and gentle State of the Union budget, it has to be nice and gentle to Louisville and Jefferson County, KY.

END COMMITTEE TURF BATTLES FOR MORE EFFECTIVE WAR ON DRUGS

(Mr. GILLMOR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GILLMOR. Mr. Speaker, as we approach another debate on anti-drug strategy for fiscal year 1991, the time is right for us to restructure the way Congress does its part in the war on drugs. The congressional process in the drug war was aptly described by the late Congressman Larkin Smith as a "drug maze". Congressman Smith, who himself was a former law enforcement official, exposed the tangled web of overlapping committee jurisdictions that is the House's effort to win against narcotics. I think we can all agree that 53 committees and subcommittees trying to control a piece of the drug war is no way to win.

Mr. Speaker, the solution is simple. We need to create one House committee with jurisdiction over the war on drugs. Our seriousness on the drug issue should not only be judged by our willingness to spend, but also our willingness to give up the committee turf battles for a more united, more organized, and I believe more effective drug battle.

PENSION BENEFITS PROTECTION ACT

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, today I am introducing the Pension Benefits Protection Act of 1990. This bill amends the Employee Retirement Income Security Act of 1974 [ERISA] to clarify the fiduciary duties of an employer when the employer uses insurance to distribute pension plan benefits. In short, this bill says to corporate raiders that you cannot raid a pension fund and then just walk away from responsibility.

I am concerned that the law which established minimum funding requirements to ensure that pension plans contain enough money to pay out benefits is not being enforced properly, and needs substantial revision in order to deal with the current era of mergers and acquisitions.

This problem came home to Kansas in recent weeks when MacAndrews & Forbes tried to use part of the $83 million in the Coleman Company's employee pension plans to purchase annuities from a financially unstable insurance company in California. My bill would make any parent company fully liable for the pension-plan payments should the insurer default and raise the standards required by the Federal agency which approves all pension plan terminations.

I intend to work to secure the pension plans of working Americans and make certain that corporate raiders are held accountable to the people

who've built companies, like Coleman, over the years.

ESTABLISH DEPARTMENT OF ENVIRONMENTAL PROTECTION

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LARGOMARSINO. Mr. Speaker, I rise in strong support of President Bush's call to make the Environmental Protection Agency a Cabinet level department.

The ongoing cleanup of our environment is truly one of the major challenges of the 1990's. We at the Federal Government must insure that that challenge is met.

By making the Environmental Protection Agency a Cabinet level department we will give environmental protection the stature and attention it deserves. The change will assist in heightening our domestic environmental concerns and, just as important, will inform the rest of the world of the seriousness the United States' stand on environmental protection.

Because I believe that the protection and improvement of our environment is one of our highest priorities, I have signed on as a cosponsor of H.R. 3847, legislation introduced by Congressmen CONYERS and HORTON, which calls for the creation of the Department of Environmental Protection.

The establishment of the Department of Environmental Protection is a step in the right direction. I call on my colleagues to support the President's endorsement of this idea, and I call for quick action on H.R. 3874.

SPECIAL TRIBUTE TO TIHATI

(Mr. FALEOMAVAEGA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include therein extraneous matter.)

Mr. FALEOMAVAEGA. Mr. Speaker, it is with great pleasure that I take this opportunity to pay a special tribute to a young Polynesian couple who truly exemplifies what the American dream is all about. In fact, Mr. Speaker, despite their tribulations and struggles, but with tremendous drive and energy, this couple is one of Hawaii's great success stories—might even be best described in the words of the song, "The Impossible Dream".

Papaliitele Jack Tihati Thompson and his lovely wife, Cha, have just recently celebrated a special anniversary of the company they founded 20 years ago which now employs over 600 employees and is considered the largest cultural entertainment organization in the State of Hawaii.

Mr. Speaker, I submit that the odds were very much against Papaliitele and Cha to succeed in the entertainment business in Honolulu. I say this because they literally started with nothing. Barely out of high school, they both started their careers as Polynesian performers at the various showcase attractions in Waikiki. But, with sheer determination, hard work, and perseverance over the years, the Tihati Productions today is rated the best in the State for producing Polynesian shows at conventions and hotel showrooms. What is unique with Tihati Productions is that the shows are truly magnificent display of Polynesian culture.

Congratulatory letters were also noted from Hawaii's Governor John Waihee, Mayor Frank Fasi of the city of Honolulu, and the president of the Hawaii Visitors Bureau, Mr. Stanley Hong—all attest to the tremendous success of Papaliitele and Cha who have constantly provided to visitors from all over the world—the most authentic cultural dances and songs from the various Polynesian island groups.

Mr. Speaker, I was privileged to be invited recently to a special executive luncheon that was held at the Royal Hawaiian Hotel in honor of Papaliitele and Cha. The luncheon was hosted by senior vice president of the Sheraton Corporation for Hawaii and Japan, Mr. Patrick J. Birmingham. In attendance also were Mr. Stan Takahashi, executive vice-president, Kyo-Ya Company Ltd.; Ms. Myrtle Lee, President of Island Holiday Tours; Mr. Bill Paul, president of Hawaii Press News; Mr. David Kochi, resident manager of the Princess Kaiulani Hotel; Bill Sealley, general manager of the Royal Hawaiian Hotel; Mr. Carlton Thomas, general manager of the Princess Kaiulani Hotel; Ms. Patricia Lei Anderson, former Miss Hawaii; Mr. Keith Vierra, director of advertising and communications for Sheraton Hotels; Mr. John Tilton, vice president for Tihati Productions, and Mr. Steve Laulu, director of operations for Tihati Productions.

In summary, Mr. Speaker, I want to share with my colleagues a congratulatory letter written to Papaliitele and Cha from His Highness Malietoa Tanumafili II, Head of State of the Independent State of Western Samoa.

Mr. Speaker, I also submit for the RECORD an article written in the Samoan International magazine, dated December 1989, giving Papaliitele and Cha special recognition for which they richly deserve.

The letter and article follow:

Papali'itele (Tihati) and Cha Thompson, I am delighted to send you greetings from Samoa on the celebration of your 20th Anniversary in your chosen field of endeavour. The success you have made of "Tihati Productions" no doubt has brought many rewards and satisfaction for you both. In addition I believe you have in the process achieved for yourselves deep senses of fulfillment, peace and goodwill towards your fellowmen. This is indeed an admirable outcome and a fine culmination of twenty years of hard work and dedication to perfection.

I am proud of you both and I send you personal best wishes on this happy occasion.

God bless you.

MALIETOA TANUMAFILI II.

[From the Samoan International Magazine, December 1989]

THE IMPOSSIBLE DREAM

THE TIHATI LEGEND

How do you describe the King and Queen of Entertainment in the Hawaiian Islands?

Do not expect ritzy show biz glamour when you meet Jack and Cha Thompson. They are good, solid Christian folk and humility comes naturally in the easy grace with which they carry their tremendous success. What they are, are very substantial people with not an ounce of pretentiousness about them.

Jack Thompson, known throughout the Hawaiian Islands as Tihati, is President of Tihati Productions, a major entertainment empire employing well over 600 people in the Hyatt, Sheraton, and Hilton hotel chains and other Entertainment Centers throughout the Hawaiian Islands.

Cha Thompson, a dynamic, vivacious and attractive lady, plays a key role in their organization as Executive Vice President.

As Jack puts it: "We are a perfect team, both at home and at work. At work I write and direct our productions, Cha choreographs and promotes them.

"At home we have our ups and downs, just like any other couple, but during those times when the old flame looked like it was about to burn out, Cha and I reminisce about when we were childhood sweethearts at Farrington High School and . . . how easy it is to fall in love all over again."

They have already begun to spread their wings outside the Hawaiian Islands. Recently, there was an urgent request from Thailand for an 80-person Polynesian review for a 3,000-seat showroom.

Cha took off for Bangkok, after she and Jack returned from a quick two-day trip to Los Angeles on other business.

They continually travel the world searching for new ideas to upgrade and raise the standards of their shows.

They have staged theme productions such as "Raiders of the Lost Ark," "The Roaring Twenties," "Casino Night," and "Beach Olympics," to name but a few.

With typical Thompson modesty, Cha put it this way: "Hotel managers want to run hotels, not deal with entertainers. You know entertainers, like all artists they are moody, temperamental, well, just plain difficult to handle. So a manager says: "Cha, I need a Polynesian Review 3 nights a week, a couple of piano serenaders, a nice combo for the main lounge, whatever." We provide an entertainment package and all the entertainment in our big resort clients are provided by Tihati Productions.

"They deal only with Tihati Productions, not the individual entertainers. They get the services, we handle the problems."

Jack grins and adds: "We have to be careful when handling the kind of influence in the entertainment business we have acquired. One time a big resort owner phoned me and said: "Tihati, I think some of your boys are doing dope and performing below standard." I flew over there and said: "Boys, if you don't stop the dope, not only will I fire you but I blackball you and you can pack your bags for Florida to find work as entertainers." I then made them say a prayer with me asking the Lord to help

them with their problem. The Lord answered our prayers and one week later, the manager said: "Tihati, these guys are great. What did you do to them?" He did not believe when I said: "The Power of Prayer."

Jack and Cha firmly believe their faith and love of God are essential factors in their success. The Thompsons not only preach their faith, they live it.

Jack, despite his workload, is chairman of the Board of Trustees of the East Oahu Christian Church and still practices as the senior Elder of the Congregation.

In a subtle way and more by example, they have tried to get all their entertainers to adopt a Christian life-style.

Jack now finds Church matters take up about 20% of his work. He attends meetings in the mainland and throughout the Hawaiian Islands for his Church all the time.

With their strong Christian faith and principles behind them, they have developed Tihati Productions to a point where it is the biggest entertainment corporation in the Hawaiian islands and the biggest Polynesian production in the United States.

They have a large administration staff in their fully-computerized offices. "Someone needs a magician and like magic, you press the computer and it gave us a list of magicians, and what they do, availability, the works."

HUMBLE BEGINNINGS

How did it all happen?

Papaliitele gives that adolescent and charming grin, and with deliberate modesty, says: "You know that song the "Impossible Dream" from the "Show Man of La Mancha," that says it all. Cha and I have achieved our impossible dream."

It has been a struggle, the road hard and parchy. "Nothing beats hard work," says Cha. It is clearly a combination of Cha's driving personality and Jack's determination to succeed.

From humble beginnings they have built an entertainment empire, all the time keeping their priorities. As Cha puts it: "We owe it all to the Lord. And every day we find new manifestations of His great blessings on us. We try to thank Him but we know we have been so blessed it will be hard."

They have raised a total of 11 children, only 5 of them are their own. They have raised them all in a warm and loving home and care for them all with that special Thompson warmth and love.

"We love all our children so much. They come from such different backgrounds but we have tried to instill in them all those Christian values we believe in and upon which our entire lives are based."

Jack was born in Swains Island. His mother, Eliza, was a Jennings who all orignally came from Swains. His father, Afa, is Samoan-English and his mother, Eliza, refers to herself as a Tokelau.

He grew up steeped in the strongest traditions of Samoan culture and he is very proud of his heritage.

One of Jack's greatest moments in life was when Malietoa Tanumafili II bestowed the High Chief title of Papali'itele on him in 1986.

Jack's success has made him all the more determined not to give up his strong links to his cherished Samoan customs and traditions. As the "faletua" of Papali'itele Siaki, Cha Thompson may as well be a full Samoan.

In fact my observation is Cha Thompson is more "faletua" than many full Samoan women.

Cha was born in Oahu. Her father is Chinese and her mother is Hawaiian-English.

Cha's mother is a Parker, a descendant of the founder of the great Parker Ranch on the Big Island of Hawaii and the grand daughter of King Kamehameha I.

The Parker Ranch is still today the largest privately-owned cattle farming operation in the United States.

HOW DID THEY MEET?

"It was not exactly love at first sight," says Cha. "I thought Jack was to quiet and boring, even if he was a handsome hunk, and Jack thought I was a great "fiapoko" who was too proud."

Anyone looking at Jack and Cha can tell the chemistry, whatever the mix, is still there and still sparkles.

THE DREAM LIVES ON

A major celebration was held in December to commemorate the 20th Anniversary of Tihati Productions. Congressman Eni F.H. Faleomavaega, Mufi Hanneman and Wayne Harada were among the many distinguished guests who attended the gala event. This spectacular evening included guest entertainer Tony Ruivivar and the Society of Seven. Steve Laulu (director of operations for Tihati) took part in a Beatles sequence to sing "Twist and Shout" from beneath a moptop wig. Three of Tihati's long-time employees Emosi Damuni, Iona Teriipaia and Iele Eseroma were singled out by Tihati and Cha for their many years of devotion to Tihati Productions. Jack and Cha Thompson were surrounded with friends and family who all shared in the joy of wishing Tihati Productions the best of yet to come.

Jack and Cha will also be celebrating their 24th wedding anniversary in June 1991.

The Legend of Tihati continues to grow and spread it's wings. Looking at Jack, I ask: "What are you thinking right now?" Tihati grins and says: "Thank you Lord for blessing us with your peace which surpasses all human understanding. Thank you Lord for Cha."

What more can be said about the Legend of Tihati?

DO NOT BUILD AIR FORCE BASE IN CROTONE, ITALY

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker and my colleagues, if anybody wants to save at least $360 million, and my bet is it will be a whole lot more, I hope they will join me today in the bill I am putting in to prevent the construction of a new base by the United States in Crotone, Italy.

Last year we were thrown out of Madrid, Spain and we are in the process of building a new base in Italy that will not even be a war fighting base. It will just be there as a backup base. My guess is when we get all done, the cost will be close to $1 billion.

□ 1210

I think if we are in this critical period of realignment, trying to figure out where we should be and what we should be doing, this is not the time to proceed toward building all sorts of new bases outside the United States. I hope many will join me in saying that to the Department of Defense. I think it would be welcome relief for the taxpayers that we are starting to look and scrutinize all these new construction projects that are being laid out.

LET US NOT EASE ECONOMIC RESTRICTIONS AGAINST SOUTH AFRICA

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, this is not the time to ease economic sanctions against South Africa. There is progress being made. Their new President is taking some significant steps, including the possible release of Nelson Mandela and other political prisoners, in addition to giving the African National Congress legal status.

But we should not rush, we should be cautious. President Bush should consult with the Congress before proceeding. Sending a signal that we are going to ease economic sanctions before serious and substantive significant steps are made I think could have a negative effect. But as somebody that has voted always for sanctions agianst South Africa, we should recognize the postive steps of President De Klerk.

He is making a major effort. He is facing political difficulties at home because he is taking courageous steps. But here is an opportunity where the Congress and the President can work together without one going ahead of the other.

Mr. Speaker, the time is not here to ease economic sanctions; the time is to continue to encourage President De Klerk in this positive role but there should be close consultation between the Congress and the President before taking any futher steps.

ST. LAWRENCE SEAWAY DEVELOPMENT CORPORATION ANNUAL REPORT FOR 1988—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Public Works and Transportation.

(For message, see proceedings of the Senate of today, Monday February 5, 1990.)

REPORT OF NATIONAL SCIENCE BOARD ENTITLED "SCIENCE AND ENGINEERING INDICATORS, 1989"—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Science, Space, and Technology.

(For message, see proceedings of the Senate of today, Monday, February 5, 1990.)

TENTH ANNUAL REPORT OF FEDERAL LABOR RELATIONS AUTHORITY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Post Office and Civil Service.

(For message, see proceedings of the Senate of today, Monday, February 5, 1990.)

ANNUAL REPORT ON HAZARDOUS MATERIAL TRANSPORTATION FOR 1988—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Energy and Commerce, the Committee on Public Works and Transportation, and the Committee on Merchant Marine and Fisheries.

(For message, see proceedings of the Senate of today, Monday, February 5, 1990.)

CRITICISM OF THE PRESIDENT'S BUDGET

(Mr. CONTE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONTE. Mr. Speaker, one Member after another got up last week to bash the President's budget. The noted budget philosopher and social critic Mr. Russo let us know in his immortal words that it "stinks and lies." The powerful chairman of the House Budget Committee said President Bush is "playing games with the budget." A thoughtful Member from Kansas told us that the President wanted to kill Tiny Tim.

The critics say this budget's spending priorities are wrong. They say it's full of smoke and mirrors. And they say if they were in charge, that would all change. We'd get us the cleanest, tightest, deficit reducingest budget we've ever seen.

Well, last fall they were in charge. And what did we get? Last November's reconciliation bill—a scandalous measure full of sham savings, special favors, one-time revenues and mystery amendments nobody ever saw or examined. Moving agriculture deficiency payments from fiscal year 1990 to fiscal year 1989. Delaying Medicare payments for 2 days to claim a half billion dollar savings. Shifting the post office off-budget, for $1.7 billion. Those clouds of smoke and jagged chunks of mirror made up a quarter of the savings.

That was the best part of it.

The worst was sequestration. And the Budget Committee—the home of the loudest bashers of this year's budget—stood by and let it happen. Committees that failed or even refused to meet their savings targets—like Merchant Marine and Fisheries with the Coast Guard user fee—got off scot free, and committees which met their targets got hit with a sequester. Maternal and child health care, research on cancer, student aid—they all got hit. That bill was a shame and a scandal on the whole Congress.

Now, this year's budget isn't perfect. No one expects it to be perfect—it's the first step in a year-long process. We all have an interest, and we all want to change it in our own way.

That's fine. But nobody's going to get anything done by standing here attacking the President of the United States and pretending the Ways and Means Committee or the Budget Committee is as pure as driven snow.

Let's cut the nonsense, get off the soapbox and get to work.

MAKING SENSE OF NON-PROFIT AND VOLUNTEER LIABILITY

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker, 213 Members of this body have cosponsored H.R. 911 the Volunteer Protection Act, a bill I introduced to protect the 110 million Americans who freely give their time in our local communities.

H.R. 911 encourages the States to enact statutes protecting individual volunteers from personal financial liability in a tort suit against the organization they serve. As appalling as it may seem, the fact is that volunteers are named in suits against the organizations they serve, and studies show that many Americans don't volunteer because they are afraid of being dragged into court.

The Volunteer Protection Act takes a sensible approach to this problem. First, it doesn't protect volunteers who intentionally or maliciously cause harm. Second, it doesn't prevent an injured party from suing the organization for redress of his or her grievances. What it does do is prevent the use of legal gymnastics to harass volunteers.

Mr. Speaker, the bill makes so much sense that dozens of States have already enacted similar laws. We can support this movement and America's volunteers by taking action now on the Volunteer Protection Act.

□ 1220

NATIONAL VOTER REGISTRATION ACT AMENDMENT

The SPEAKER pro tempore (Mr. BENNETT). Under a previous order of the House, the gentleman from Illinois [Mr. MICHEL] is recognized for 5 minutes.

Mr. MICHEL. Mr. Speaker, the following is the text of the en bloc amendment to H.R. 2190, the National Voter Registration Act of 1989, to be considered on Tuesday, February 6.

AMENDMENTS TO H.R. 2190 OFFERED BY MR. MICHEL OF ILLINOIS OR HIS DESIGNEE

(Note: Section references are to the amendment in the nature of a substitute printed in the report of the Committee on Rules, H.Rept. 101-396)

In section 102, strike out "In addition" and all that follows through "this Act." and insert in lieu thereof the following: "In addition to any other voter registration procedure provided for by law, each covered State may provide for voter registration procedures for elections for Federal office in accordance with this Act.".

In the first sentence of section 103(a), strike out "shall" and insert in lieu thereof "may".

In section 104(a), strike out "shall" and insert in lieu thereof "may".

In the first sentence of section 105(a), strike out "shall" and insert in lieu thereof "may".

In the second sentence of section 105(a)—

(1) insert after "available," the following: "to the extent practicable,"; and

(2) strike out "shall" each place it appears and insert in lieu thereof "may".

In the third sentence of section 105(a), strike out "shall" and insert in lieu thereof "may".

In section 105(b), strike out "shall" each place it appears and insert in lieu thereof "may".

In section 107(2), strike out "may" and insert in lieu thereof "shall".

Strike out section 113 and insert in lieu thereof the following:

SEC. 113. VOTER REGISTRATION ENHANCEMENT BLOCK GRANTS.

(a) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Federal Election Commission for making grants under this section for fiscal years 1991, 1992, and 1993, a total of $120,000,000. There are authorized to be appropriated such sums as may be necessary for administative expenses of the Federal Election Commission in carrying out this Act.

(b) BLOCK GRANTS.—From the amounts appropriated under subsection (a) for any fiscal year, the Federal Election Commission shall make grants to States, through chief State election officials, for the purposes of supporting, facilitating, and enhancing voter registration activities, including the activities set forth in this Act. The grants shall be allocated as provided in subsection (c).

(c) ALLOCATION OF GRANTS.—The Commission shall, by regulation, establish criteria for allocation of grants among States. The criteria shall be based upon (1) the number of residents of the State, and (2) the percentage of eligible voters in the State not registered to vote, and (3) the increase in the percentage of voters, but shall not be based solely upon these factors.

(d) ADMINISTRATIVE REQUIREMENTS.—The Commission shall, by regulation, establish administrative requirements necessary to carry out this section. To be eligible to receive a grant under this section, a State shall certify that the State—

(1) agrees to use any amount received from a grant under this section in accordance with the requirements of this section;

(2) agrees that any amount received from a grant under this section for any period will be used to supplement and increase any State, local, and other non-Federal funds that would, in the absence of such grants, be made available for the programs and activities for which grants are provided under this section and will in no event supplant such State, local, and other non-Federal funds; and

(3) has established fiscal control and fund accounting procedures to ensure the proper disbursement of, and accounting for, grants made to the State under this section.

The Commission may not prescribe for a State the manner of compliance with the requirements of this subsection.

(e) REPORTS.—The chief State election officials of a State that receives a grant under this section shall submit to the Commission annual reports on its activities under this section. The reports shall be in such form and contain such information as the Commission determines (after consultation with such officials) to be necessary (1) to determine whether grant amounts were expended in accordance with this section, (2) to describe activities under this section, and (3) to provide a record of the programs made toward achieving the purposes for which the block grants were provided.

At the end of section 201(a)(4), strike out "and" after the semicolon.

In section 201(a)(5), strike out the period and insert in lieu thereof "; and".

At the end of section 201(a), add the following:

(6) all voters are entitled to be protected from vote fraud, including voter rolls containing the names of ineligible voters and inadequate enforcement of laws against vote fraud.

After section 202, insert the following (and redesignate accordingly):

SEC. 203. PRESERVATION OF THE EFFECT OF STATE LAW THAT PROVIDES GREATER PROTECTION AGAINST VOTE FRAUD.

In the case of any conflict between the provisions of this Act and any provision of the civil or criminal law of any State, the law of the State shall prevail to the extent that such State law provides for more stringent suppression of vote fraud than this Act.

JOHN HORBACK, JR. TESTIMONIAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. COYNE] is recognized for 5 minutes.

Mr. COYNE. Mr. Speaker, on February 10, 1990, members of Veterans of Foreign War posts from Pittsburgh, Allegheny County, and the Commonwealth of Pennsylvania, will gather to honor John Horback, Jr., Commander of District No. 29.

John Horback, Jr. began his service to the United States with his enlistment in the U.S. Army in December 1942. He served with distinction in the European-African-MIddle Eastern Theatre of Operations in Italy with the Headquarters Company, 2d Battalion, 351st Infantry Regiment, from January 1944 until August 1945. He received his honorable discharge in October 1945.

For the past 20 years, Mr. Horback has continued to serve his country and his fellow veterans through his extensive activities with the Veterans of Foreign Wars. During that time, he has served in leadership roles with VFW posts on the local, county, and State levels, leading up to his current position of Commander of District No. 29.

John Horback, Jr. is the living embodiment of the motto of the Service Division of the Veterans of Foreign Wars—"To Honor the Dead by Helping the Living". He has served his country, his fellow veterans, and his community. Not only has he served, but his leadership and example have inspired others to serve as well.

RECYCLING EFFORT GETS RESULTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 5 minutes.

Mr. MONTGOMERY. Mr. Speaker, I want to bring to the attention of my colleagues an aluminum can recycling project on the base of the Meridian Naval Air Station in my hometown of Meridian, MS.

The Budweiser recycling center, in connection with Anheuser-Busch's Container Recovery Corporation, joined forces with NAS Meridian and the Commodore's Can Campaign in this effort. A trailer was placed at the base and containers for collecting cans were put at locations throughout the base, including barracks, clubs, and offices.

In the 1½ years since its inception, the campaign has been responsible for collecting and recycling 10,800 pounds of cans and has generated a total of $5,177 in revenues for the Department of Morale, Health, and Welfare on the base.

Not only is it a way to raise funds, the program saves energy and reduces disposal and landfill costs. Manny Mitchell, president of Mitchell Distributing Company in Meridian, and Capt. Bob Maier at Meridian's Naval Air Station deserve credit for this well-run and very successful project.

BUSH ADMINISTRATION SUPPORTS ANNUNZIO POLISH PROPOSAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, recent newspaper stories indicate that Poland has said it cannot meet first-quarter interest payments on its commercial bank debt because of balance of payments difficulties. The Warsaw Government, struggling to transform its economy into a post-Communist free market, told bank creditors that balance of payments problems and currency changes will prevent it from allocating hard currency for debt payments.

Poland has a foreign debt of about $40 billion. It missed a $70 million payment on medium-term rescheduled debt that was due on January 22. Poland owes Western commercial banks $9 billion, of which about $1 billion is in short-term trade credits.

Poland needs assistance to help it restructure its financial institutions. Aid to Eastern European nations, particularly Poland, will enable them to serve market-based economies. The concepts of supply and demand and their relationship in determining price levels for services have been virtually unknown for a generation in those nations.

In December, I wrote to Treasury Secretary Nicholas F. Brady and Secretary of State James A. Baker III recommending that they assist the nations of Eastern Europe to establish and lead an interagency task force designed to provide them with technical assistance in establishing a market-oriented financial institution infrastructure.

I told them it is important that the United States, as leader of the democratic nations, stand ready to provide whatever assistance we can offer the nations of Eastern Europe. That is the principle upon which Congress passed, and President Bush signed into law, the legislation designed to promote the development of private sectors in those countries and to promote policies and practices conducive to developing the private sector.

Mr. Speaker, I am happy to report that I received a letter from a representative of Secretary Brady in which he said the Treasury Department agrees with me and will undertake an effort to establish an interagency task force to assist Eastern European nations in creating effective financial institutions.

The Department representative said the Federal agency has begun to determine the best way to organize the group, to decide agency responsibilities and to establish its relationship with the overall task force set up by President Bush on Eastern Europe.

The Treasury says it has already played an active role in United States assistance to the Eastern Europeans, most recently in establishing a $1 billion fund for Poland, which I supported. In addition, the Treasury said it helped organize a $500 million bridge loan for Poland.

The department agreed with me that a smoothly functioning financial system will be essential to the Eastern European transition from command to market economies, and that existing Eastern Europe financial systems are woefully inadequate. The agency also joined

me in saying that the Eastern Europeans will have to determine their own needs but that the United States can go a long way in assisting them.

A representative of the Agency for International Development [AID] also wrote to me as chairman of the House Banking Subcommittee on Financial Institutions Supervision, Regulation and Insurance that it will carry out a private sector technical training needs assessment in Poland and Hungary to ascertain the priority areas for training. AID also said it would evaluate the institutional needs for establishing and operating credit unions as part of the overall skill needs assessment. After AID makes the assessment, the Agency will determine the most suitable public and private organizations to implement the program.

Mr. Speaker, I applaud the administration for its intentions to carry out the financial assistance programs for Poland. However, we cannot let down our guard. The Financial Institutions Subcommittee will continue to oversee the administration's efforts to aid the Polish people who want to become financially independent from the Government.

THE PENSION BENEFITS PROTECTION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas [Mr. GLICKMAN] is recognized for 5 minutes.

Mr. GLICKMAN. Mr. Speaker, today I am introducing the Pension Benefits Protection Act of 1990. This bill amends the Employee Retirement Income Security Act of 1974 [ERISA] to clarify the fiduciary duties of an employer when the employer uses insurers to distribute pension plans benefits. In short, this bill says to corporate raiders that you cannot raid a pension fund and then just walk away from responsibility.

Today's business climate seems to encourage the giant conglomerate corporation. As a result, U.S. businesses have become increasingly concerned about the recent rash of mergers, hostile takeovers and leveraged buyouts. Not only has this trend created negative effects on the Nation's economy, but it threatens thousands of working Americans in acquired companies.

The financial safety of the Nation's pension plans recently has been in the national spotlight. One problem is a lack of proper enforcement at the Federal level. While the number of pension plans and assets has been increasing steadily, the number of inspectors and Federal regulators has not. The Employment Retirement Income Security Act [ERISA], in 1974, orignially established Federal standards for all pension plans, including minimum funding requirements to ensure that pension funds would contain enough money to pay out benefits. I am concerned that the law is not being enforced properly, and needs substantial revision in order to deal with the current era of mergers and acquisitions.

Many of these problems were brought home to Kansas last year when a holding company called MacAndrews & Forbes bought out the Coleman Co. in a leveraged buyout. Coleman is one of the top 10 employers in Wichita, KS. In the last few weeks, MacAndrews & Forbes announced plans to terminate $83 million in Coleman employee pension plans and replace them with annuities purchased from a financially unstable insurance company in California. While the problem is being corrected and Coleman officials have assured me that the pension will be protected, today I have introduced legislation which makes any parent company fully liable for the pension-plan payments in the event the insurer defaults and also raises the standards required by the Federal agency which approves all pension plan terminations.

Specifically, the bill requires that, in the event an employer uses terminated pension plan assets to purchase annuities from an insurance company, the insurer's bonds must receive the highest rating under the generally recognized bond-rating agencies, currently known as Standard & Poors or Moody's. This rating would assure workers that the new company underwriting their pension plans is a reputable and financially sound company.

The security of working Americans' retirement funds cannot be treated as just another bargaining chip in the high-stakes game of corporate mergers currently sweeping the country. I will work to secure those pension plans and make certain the corporate raiders are held accountable to the people who've built companies, like Coleman, over the years.

CONGRESS RECESS ACTIVITIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Mexico [Mr. RICHARDSON] is recognized for 60 minutes.

Mr. RICHARDSON. Mr. Speaker, today I have taken this special order out to discuss two recent activities of mine during the congressional recess. One was a trip to Mexico with Majority Leader GEPHARDT, along with attending a conference in my hometown of Santa Fe, NM, of the Commission for the Study of International Migration and Cooperative Development was created after the immigration bill. Then recently last week, a trip I took as an observer to the Nicaraguan elections with President Jimmy Carter's nationally recognized observer group. President Carter was asked to represent the United States as an international observer by both the opposition party and the Sandinistas.

Mr. Speaker, first I wish to deal with Mexico. I was honored recently to participate in several activities conducted by the Commission for the Study of International Migration and Cooperative economic development in Santa Fe, Mexico. This Commission was created by the Congress as an essential part of the Immigration Reform and Control Act of 1986. We charged the Commission with examining the conditions in countries which contribute to unauthorized migration to the United States, and to recommend to the President and the Congress, trade and investment programs which might alleviate such conditions. The Commission members were appointed by the bipartisan leadership of both Houses of Congress and include my distinguished colleagues, the gentleman from Texas [Mr. BRYANT], my good friend, the former Governor of Texas, Toney Anaya, the former Governor of New Mexico. It is chaired by Ambassador Diego Asencio, former Assistant Secretary of State for Consular Affairs. The staff director is Skip Enders, formally the staff chief of the Subcommittee on Immigration, Refugees, and International Law of the House Committee on the Judiciary.

I was privileged to be the lead-off witness at the Commission's hearing on Monday, January 22. I was followed by representatives of several national Hispanic organizations, New Mexico legislators, and border experts. The witnesses testified on a variety of United States-Mexico border issues, including trade with Mexico, the causes of unathorized migration, the impact of such migration on State and local governments, and border industrialization. The League of United Latin American Citizens [LULAC] the Mexican American Legal Defense Fund [MALDEF] the National Association of Latino Elected Officials [NALEO] and the National Council of La Raza [NCLR] offered recommendations. The testimony was both informative and well received.

The hearing was preceded by a Sunday afternoon, January 21, border conference. Participants at the border conference included some of the most knowledgeable and experienced border experts from the United States and Mexico. They included officials from both sides of the border as well as representatives from academia and the private sector. During the conference there was extensive and thoughtful discussions of a variety of issues, including the environment, ports of entry, transportation, and border finance.

I am pleased to bring to the attention of my colleagues the very important field work of this Commission. They have held hearings around the country, in several countries in South and Central America. They are composed of many distinguished members, Archishop McCarrick, for one. Many others from the field of business, academia, and politics, Dale Dehaon, formerly with the Senate Judiciary Commission on Immigration. We think that this is an important Commission, and many Members from the Congress are anxiously awaiting their recommendations which will be provided in July this year.

There was great interest at the conference as the subjects turned to our trade relations with Mexico, since international trade patterns are primary topic, as the world leaders begin to gear up for the 1990's. Mr. Speaker, today I want to focus on the relation-

ship we have with Mexico, and how significantly the relationship has progressed, and how important the relationship is.

As Members read the newspaper today, Members will find that the United States and Mexico have agreed on historic debt agreement, which hopefully will be the model for many other debt agreements across the board. It was modeled after the Brady plan, and I think the Secretary of the Treasury should be commended for this plan and the way that the administration pursued this debt agreement with Mexico; however, the time has come to expand our trade relationship with Mexico. Why? The reason is that the world is moving so fast that we have the European Community in 1992 merging together in a common market. We have Eastern Europe changing dramatically, hopefully into market economies. What we have is the international community in the economic area changing rapidly. New markets are being created, and if we do not move fast enough in this Western Hemisphere, we are going to be left behind.

Mr. Speaker, what we need is a free trade agreement between the United States and Mexico similar to the one we concluded recently with Canada, which over 10 years, products will be phased in, duty free, when negotiations take place, between the executive branches to live economic and trade and tariff barriers, and allowing zones of active economic interdependence. Mr. Speaker, the reason that we need a free trade zone with Mexico is that the world is rapidly changing. We have an opportunity now with the pragmatic adminstration of President Salinas de Gortari, to move ahead beyond the sector-by-sector agreements that we are pursuing now. We have concluded the successful agreement with Canada. Ten years, an agreement will be completed whereby total products, all products will be duty free. Why not do the same thing with Mexico? Perhaps we could start with Mexico with a free trade zone. Two hundred miles, both sides of the border, to initiate border revitalization, allowing products to move duty free to set up coproducton zones, where companies on both sides of the border get certain tax preferences, if they hire people, if they generate economic activity, if they merge. I think it is important that we move ahead with a concept of free trade zone in the entire Western Hemisphere, but I think first we must start with Mexico.

It is important that we realize that this is going to take time. Recently in my trip to Mexico with Majority Leader GEPHARDT, and outstanding trip that covered issues of drugs, politics, economic integration, and trade, we met with President Salinas, who is a realistic individual that supports the concept of free trade, and hopefully in the future we can look at free trade as an avenue that will enable people in the Western Hemisphere to do what the Europeans are going, and that is, banding together. We should face it, EC 1992 is not clearly a free trade effort. It would be protectionist.

The first initiative out of the box was 51 percent limits on American programming. Why not deal in the same way within our own hemisphere, and at least be protected to have products and barriers fall between our two countries in the Western Hemisphere?

Mr. Speaker, what we have done in the executive and the congressional branches, we have elevated Mexico into a plane of importance in our foreign policy relationships. We have had lots of problems with Mexico, including drugs, immigration, foreign policy, our differences over Central America. However, now we have a realistic President, and thankfully an administration that recognizes the importance of Mexico and a Congress that has devoted a lot of time to issues facing both countries, not just at the border, but across our bilateral relationships. The time has come to expand our free trade relationship with Mexico. Several years ago I introduced a bill that a lot of people laughed at. It was called the United States-Mexico Free Trade and Coproduction Act. However, I have introduced it again, H.R. 1360 in the 101st Congress. It is attracting more attention. It is an innovative attempt at stimulating economic growth, negotiating with Mexico on a reciprocal and mutually beneficial basis, for the purpose of developing and entering into a bilateral agreement to establish a United States-Mexico free trade and coproductive zone.

□ 1230

I think the United States-Mexico border region faces a series of problems on both sides. These problems include high unemployment, substandard living and health conditions, and a continued influx of illegal immigration. In approaching these problems thoughtfully and effectively, we must recognize that they are fundamentally produced by a lack of economic opportunity. The solution, therefore, must entail a stimulation of the region's economy.

It is important that we look at how Mexico feels about this issue. What is the outlook for a free trade zone between the United States and Mexico? Historically, Mexico has shied away from open trade agreements with the United States because of a deep-rooted fear of U.S. economic and cultural domination. Previous Mexican presidencies repeatedly resisted efforts by Washington to eliminate tariffs and foreign investment procedures. After 6 frustrating years of negotiations, we were able to develop only the framework of a trade agreement with Mexico. This package, however, falls short of the comprehensive agreement both sides had hoped for.

So we continue to negotiate on a sector-by-sector basis. This is fine, but it moves slowly. There are a lot of problems, but I think our two Secretaries of Commerce, with the congressional leadership, should be bold and move ahead with a free trade agreement with Mexico. That is maybe 1 or 2 or 3 years down the road, but clearly we should start thinking about it.

As a part of our effort, I was very pleased, along with Majority Leader GEPHARDT, that President Salinas also decided that we would open two new border crossings, the two in New Mexico, with Apra and Santa Teresa. Both of these projects are going to proceed simultaneously, but the Mexican Government has approved them before we have. Our State Department is now evaluating the validity of both projects. Both projects are valid. They merit strict attention. They are going to increase trade and commercial relationships, not just between the United States and Mexico but between the states of New Mexico and Chihuahua.

Mr. Speaker, once again I think it is theoretically important that we deal with our leadership with Mexico and be bold and look toward a United States-Mexico free trade agreement.

REPORT ON FIFTH PRE-ELECTION TRIP TO NICARAGUA

Mr. Speaker, last week I went with President Jimmy Carter and Congressman DOUG BEREUTER, along with the senior Senator from Missouri, Mr. DANFORTH, as observers to the Nicaraguan election. This was a trip prior to the election that is going to take place on Monday, February 26. President Carter is asked by the opposition group, UNO, and by the Sandinistas to be the international observer to these elections, along with the United Nations and the Organization of American States.

Mr. Speaker, after coming back with President Carter, after extensive meetings with UNO represenatives, labor leaders, the Sandinistas, and Cardinal Obando, attending political rallies, meeting with the United Nations and OAS observers, generally the view of President Carter and some of us in the delegation is that although there are serious problems, the election most likely is going to be fair. Again I repeat, the Sandinista-UNO opposition election in Nicaragua is generally going to be fair.

Why do I say that? I say that because I think what we have is a machinery created by the Supreme Electoral Council in Nicaragua that is very, very clear in its process, one that has done a lot in terms of voter registration. Over 89 percent of the Nicaraguan people have registered to vote.

That is a fantastic number, compared, for instance, to the number of people in our country who are registered to vote.

There is an intense interest in the election. There is an intensive effort on the part of the United Nations and the OAS, with over 500 observers between them, to make sure that this election is fair.

Mr. Speaker, I wish to call the attention of the Members to President Jimmy Carter and his efforts. Some have said he is the best ex-President we have ever had, and they say that rather glibly. Let me just say, Mr. Speaker, that I have observed the way in which this man has conducted himself in Nicaragua. He is truly a national asset. Through him we have been able to make progress that hopefully will make this election a fair one.

When there was campaign violence in Jinotepe, it was President Carter who intervened and got the Sandinistas and both sides, along with border officials, the U.N., and the OAS, to agree that there would be no more violence. Mr. Speaker, there has not been any more violence.

When there have been problems with funding from the Congress—we appropriated $9 million to go to the election in Nicaragua to make sure that proper elections are held among the Supreme Electoral Council, funds for the UNO opposition party—some of these funds were stranded by the Sandinistas. They were held up; there is no question about that. There was bureaucratic red tape. President Carter, through his intervention, changed that, and now hopefully the funds and the issue of where the funding is to both the Foundation IPSE and to the UNO party, relating mostly to vehicles, have been resolved, through the intervention of President Carter.

At one point the Mosquito Indians were not going to participate in the election. It was President Carter who intervened and demanded of the Sandinistas that the Mosquitoes be part of the electoral process. They will now be participating.

Mr. Speaker, I am convinced that President Carter is totally unbiased in his approach to this election. We saw his record in Panama. It was he actually who determined that Noriega was cheating, and he went public and at grave risk predicted that this election was going to be fraudulent. President Carter's election observer team did that.

Now we are here in Nicaragua where we have respected members of both parties and where President Carter has managed to get the Sandinistas to allow more observers from the U.S. Congress to attend. And they will be attending. Apparently they have recently been appointed.

Again it is critically important that we have an open mind on this election. I think it is too close to call. I think UNO has the advantage of the issues. In terms of the Sandinistas' performance on the economy, it has not been good. UNO has that advantage. UNO, the opposition party, also is saying that they will not proceed with mandatory military service in that country. That is a popular issue.

The Sandinistas, however, are better organized. They have been active in terms of getting their voters out and ready to vote. They have the advantage of being the incumbents. There is no question that they have used incumbency to great advantage. I think, despite all the polls, this election is going to be very close.

During our discussions in Nicaragua we discovered several problems. One was the problem of intimidation and harassment, and after we proceeded with a number of interventions, both parties agreed that any intimidation of poll watchers was a serious threat to the integrity of the election. Government officials from the Sandinistas pledged through private instructions and public pronouncements to convince their supporters that any intimidation was damaging to their cause. President Ortega informed President Carter and our delegation that they had just made a similar commitment to Cardinal Obando to take steps to end this intimidation. There have been reports of intimidation of poll watchers, mostly by the members of the Interior Department, not the Sandinista Party, on individuals wanting to register and become a part of the process, mostly on the side of UNO. Hopefully, those have abated. There have been those problems, and I think they are now reasonably on track, so that intimidation has declined considerably.

On the use of government facilities—the Sandinistas have been using government vehicles and posters—and these have been observed in government buildings. It had been reported the Sandinistas had not paid for the rent of the vehicles, and that other political parties had not been permitted to use them. The electoral laws of Nicaragua permit leasing of government vehicles for campaign use. Both the Supreme Electoral Council and the Sandinista officials have agreed to work to assure that a complete accounting for the payment for these facilities by other political parties will take place. The UNO campaign managers have said that they did not wish to rent the vehicles at this time but preferred to use those owned by private companies. Hopefully, this problem, that is, the use of government facilities on an unauthorized basis by the Sandinistas, is now abating.

On the access to media, as to who controls the TV and who controls the radio advertising, this has been a problem, but once again hopefully we are making some progress. Although the political agreement of last August had been honored concerning access to electronic media and additional time had since been allocated, the time in optimum hours for campaign advertisements were still not adequate, mostly disadvantaging the UNO group. Both the OAS and the United Nations reported that because of the control of the most powerful radio and TV stations by the government, an imbalance in the coverage of the campaign was clearly evident. The Supreme Electoral Council, through the encouragement of President Carter and others, is meeting with the FSLN leaders to try to correct this and provide additional time to the opposition parties. My understanding is that that has already been done, but there is still a slight imbalance that needs to be corrected.

□ 1240

In terms of verifying registration, Mr. Speaker, the registration process has been successful. Both UNO officials and others agree that at least 90 percent of those eligible have been registered. There is enormous interest in Nicaragua over this registration and over this election. The Supreme Electoral Council delivered the computer lists beginning on December 16, and continuing through mid-January. Since the last lists were delivered later than the previously required December 25 deadline, the Supreme Electoral Council relaxed the deadline for complaints on the list so that parties will have at least 20 days after receipt of the list to request correction. This is adequate according to UNO officials.

In terms of human rights and political prisoners, Mr. Speaker, some may have seen the announcement by President Ortega that political prisoners will soon be released across the board, including 39 national guard officers.

Vote count: The Supreme Electoral Council agreed to permit copies of the actas to be assigned for our observer teams. Our observer teams, the United Nations and the OAS, will have a full access to all the voting booths, all the actas, all the number of election counting procedures that are going to take place. I am convinced that each of the voting places, 4,394, will be adequately monitored by poll watchers and observers on both sides. The sticking point where what had happened to the money the U.S. Congress appropriated for the opposition, for UNO and IPCE; only a small portion of the funds previously appropriated by the U.S. Congress for delivery to UNO, to the Supreme Electoral Council and to the Institutes for Electoral Promotion and Training had been delivered despite previous concerted efforts by

39-059 O-91-38 (Pt. 1)

President Carter and many others. An agreement was reached consummated with the Nicaraguan Government and central bank officials whereby funds would be delivered without further delay to UNO, IPCE, and the Supreme Electoral Council. The Government agreed that IPCE and the Supreme Electoral Council will work in harmony to assure that activities and expenditures would be in accordance with Nicaraguan law and election procedures. The Supreme Electoral Council would assure compliance with this agreement which was signed by representatives of the two organizations and witnessed by President Carter.

Immediately after our departure, Mr. Speaker, the leaders of this foundation sent a letter to the Supreme Electoral Council indicating its intention to implement its activities in accordance with electoral code. The contract that they had signed with the National Democratic Institute and the National Republican Institute was included. Within 3 hours the Supreme Electoral Council sent a letter to the Ministry of External Cooperation approving of this foundation's activities, though acknowledging that it would have to examine the contract in more detail later. The Ministry of External Cooperation then approved the transfer of funds to IPCE.

The U.S. Government observers is another issue. The U.S. Government had not been able to get approval for an adequate delegation to observe the election. The Nicaraguan Government indicated that it considered such a delegation partial to the opposition and that it had already invited an unprecedented number of international observers in their country including our delegation and those of the United Nations and the OAS. At the request of Senator DANFORTH and former President Carter, however, the Nicaraguan Government leaders approved the addition of up to eight additional Members of the United States Congress to our observer team. They are going to be given the same free access in performing their duties under the auspices of President Carter's group as has been granted to other international observers. Eight new additional observers.

Mr. Speaker, these are our conclusions.

After the delegation's visit in September, the Miskito Indian leaders were welcomed back into the country and seemed to be fully involved in the political process. After the delegation's visit in December, new instructions were promulgated to end campaign violence, and everyone agreed that there have been no incidents of violence or threats at any political rallies since then.

During this last visit the delegation was impressed by the determination of all political parties to participate in the election, but all were concerned about the problem of intimidation and harassment. The delegation made clear that it was in the interest of both the Sandinistas and the opposition that all poll watchers perform their duties on the day of the election. If this does not occur, this would call into question the integrity of the election. The Government understands this point and expressed interest in taking steps to insure it will not happen. Due to the active preelection work and the plans for the election and the vote tabulation by our organization, the United Nations and the OAS, we believe that, if there is fraud in the election, we will be able to detect it.

In all, Mr. Speaker, the election process is moving forward satisfactorily. Given the experience in the past electoral process, it is fair to expect that new problems will emerge, but, if the initiatives approved during this last visit are fully implemented in good faith, then we hope that any new issues will be similarly resolved. Therefore, we conclude that the opportunity for the Nicaraguan people to vote for their next government on February 25 looks good.

Mr. Speaker, I have talked about Mexico, and I have talked about Nicaragua. I wanted to raise these issues with my colleagues because I think it is critically important that we move ahead in our relationship with the Mexican Government and that we observe the Nicaraguan elections. I believe, if these elections are free, that whoever takes over in Nicaragua after February 26, we are going to have to have a new relationship with them. If UNO wins, certainly it is going to mean a new relationship. If the Sandinistas win, hopefully it will mean a new relationship, one where we will respect each other.

Mr. Speaker, there is still going to be problems, but on the whole I think it is important that we look at this election. Every indication is that it is going to be fair. If it is not, there is a question about the kind of U.S. relationship we are going to have with that country, but, if it is, I think we should move into a realistic arena.

Mr. Speaker, I thank my colleagues for their indulgence in this special order.

INTRODUCTION

Seven members of the Observer Delegation of the Council of Freely-Elected Heads of Government travelled to Nicaragua between January 26–29, 1990: former President Jimmy Carter, Rosalynn Carter, former Colombian President Alfonso Lopez Michelsen, Senator John Danforth, Congressman Douglas Bereuter, Congressman Bill Richardson, and Dr. Robet Pastor. This was the fifth visit by members of the delegation, following a trip earlier in the month by Senator Christopher Dodd, Chairman of the Subcommittee on Western Hemisphere Affairs of the Senate Foreign Relations Committee. Dr. Jennifer McCoy, the Director of the Managua Office, helped organize the visit and accompanied the delegation.

Since President Carter's visit in December, U.S. military forces had invaded Panama and intruded in the Nicaraguan Embassy residence in Panama. The latter event evoked a strong reaction by the Nicaraguan government, which included the expulsion of U.S. diplomats in Nicaragua. On this occasion, the principal opposition leader, Violeta de Chamorro, joined in criticizing the U.S. action and applauded the reaction by the Nicaraguan President. What was most interesting on this delegation's visit, however, was that no Nicaraguan raised Panama; the issue seems to have already receded.

The technical provisions of the election are progressing well, but the members of the delegation heard of serious problems and complaints related to the campaign. The principal concern related to charges of intimidation and harassment of opposition party candidates and poll-watchers (fiscales). Other problems included the imbalance in access to the media and the use of government facilities and vehicles by the Sandinista party. The opposition also complained that its access to funds provided by the U.S. Congress was being impeded, and the U.S. government also complained that its official delegation was not permitted to observe the elections.

With the return in mid-January of Sra. Violeta de Chamorro after a knee injury and of Vice Presidential Candidate Virgilio Godoy, the UNO campaign has moved into high gear. The candidates of the Sandinista Party and the other parties are campaigning intensely. With the election just one month away, and each of the two principal parties still confident of victory, the race is simply too close to call.

ACTIVITIES

As before, the delegation met with leaders in the major opposition party (UNO), the Sandinista party (FSLN), minor opposition parties, the United Nations and Organization of American States observer teams, the Supreme Electoral Council (SEC), and Cardinal Obando y Bravo. (See the appendix for a full itinerary.)

Along with observers from the OAS and the UN, and accompanied by many members of the press, the delegation witnessed a realistic trial demonstration of the procedures to be followed on election day. The process functioned very smoothly. Electoral officials and poll-watchers of the political parties will open the Juntas (voting sites) at 6 A.M. on February 25 to prepare for the day. They will receive sealed envelopes containing the ballots, and other voting supplies including three ballot boxes—for the Presidency and Vice Presidency, the National Assembly, and the Municipalities. The Juntas will open for voting at 7 A.M., with a limit of 300 voters per facility. Registration cards will be checked against computerized lists; a number selected by the junta and electoral officials on the day of the election will be stamped on each colored ballot. After voting, each individual will put their thumb in a jar of indelible ink to prevent voting a second time. A test was made to see how rapidly people could vote, and there is no question that 300 people will be able to vote by the time polls close at 6 P.M. Anyone still in line at that time will vote.

The Supreme Electoral Council has authorized our delegation to observe the voting by going in and out of the Juntas

during the voting and counting. The delegation also met with the Regional Electoral Council for the Managua region and was impressed at its high degree of organization. In general, the delegation concluded that an excellent technical preparation has been made.

The delegation also attended major political rallies of Presidential candidates Daniel Ortega in Rivas and Violeta de Chamorro in Jinotepe. Both rallies were well attended and peaceful. The police kept a prudent distance from the rally as mandated by the Supreme Electoral Council decree that was issued at the end of the delegation's visit in December.

As in previous visits, the delegation consulted fully with the observers of the O.A.S. and the U.N. Both were concerned about the intimidation issue and were investigating the complaints. They urged us to pursue this issue with the government, and we did. In addition, we discussed ways to coordinate our deployments on election day and in conducting the parallel vote tabulations. In our visits to the rallies, we also consulted with these two groups.

RESULTS OF DISCUSSIONS

Intimidation and Harassment: All parties agreed that any intimidation of fiscales was a serious threat to the integrity of the election. Government officials pledged, through private instructions and public pronouncements, to convince their supporters that any intimidation was damaging to their cause. President Ortega informed President Carter that he had just made a similar commitment to Cardinal Obando to take steps to end intimidation.

Use of Government Facilities: The FSLN had been using government vehicles and posters had been observed in government buildings. It was reported that the Sandinistas had not paid for the rent of the vehicles and that other political parties had not been permitted to use them.

The electoral laws permit leasing of government vehicles for campaign use. The SEC and FSLN officials will work to assure a complete accounting for the payment for this service, and other political parties will be reminded of this opportunity. The UNO campaign manager said that they did not wish to rent the vehicles at this time, but preferred to use those owned by private companies. The SEC and FSLN will make another effort, similar to the fairly effective one made before Christmas, to remove all campaign literature from government buildings.

Access to Media: Although the political agreement of last August had been honored concerning access to electronic media and additional time had since been allocated, the time and optimum hours for campaign advertisements were still not adequate. Both the OAS and the UN reported that because of the control of the most powerful radio and television stations by the government, an imbalance in the coverage of the campaigns was clearly evident.

We encouraged the Supreme Electoral Council (SEC) and FSLN leaders to provide additional time on television time to the opposition parties and that their campaign advertisements might be shown during available prime time between 7:00 and 9:30 p.m. The SEC agreed and promised to take such steps.

Verifying Registration: UNO officials and others agree that the registration process has been successful (at least 90% of those eligible were registered). The SEC delivered the computer lists beginning on December 16 and continuing through mid-January. Since the last lists were delivered later than the previously-required December 25th deadline, the SEC relaxed the deadline for complaints on the list so that parties will have at least twenty days after receipt of the list to request correction. UNO indicated to the delegation that this timing would be adequate for them to review the list. They had just undertaken a preliminary review of the lists, and they seemed to be adequate, but they were awaiting funding to IPCE to do a more systematic examination. Since the delegation's visit in December, the SEC had granted permission for UNO and others to acquire computer tapes and diskettes to supplement the hard copies of voter lists, as UNO had requested.

Human Rights and Political Prisoners: In the Central America Accord reached at Tela in August 1989, the Nicaraguan government agreed to implement an amnesty for political prisoners and the release of the remaining 39 National Guard officers from prison. The government had previously indicated that it would do that only when the other part of the agreement related to the demobilization of the Resistance (the contras) was implemented.

The delegation was informed by Cardinal Obando that President Ortega said that he would release the prisoners after February 25th, and at the Cardinal's request, promised to consider including the 39 National Guardsmen in that release. The delegation asked Nicaraguan government leaders whether they would consider releasing all of them before the election. Shorty after the delegation's departure, President Ortega announced that both groups would be released between February 5 and 15.

Vote Count: The SEC agreed to permit copies of the actas (vote tally sheets) the be assigned for our observer teams (the Council, the UN, and the OAS). We will receive two copies of the vote records and tabulations from each of the 4394 voting places in the country. Furthermore, our observers will have unimpeded access to all voting sites, with the right to observe all voting procedures, handling of ballots, and tabulation and transmission of vote counts.

Funds for UNO/IPCE: Only a small portion of the funds previously appropriated by the U.S. Congress for delivery to UNO, to the SEC, and to the Institute for Electoral Promotion and Training (IPCE) had been delivered, despite previous concerted efforts by President Carter and many others. An agreement was consummated with the Nicaraguan government and Central Bank officials whereby funds would be delivered without further delay to UNO, IPCE, and the SEC. The government agreed that IPCE and the SEC would work in harmony to assure that activities and expenditures of IPCE would be in accordance with Nicaraguan law and election procedures. The SEC will assure compliance with this agreement, which was signed by representatives of the two organizations and witnessed by President Carter.

Immediately after our departure, the leaders of IPCE sent a letter to the Supreme Electoral Council indicating its intention to implement its activities in accordance with the electoral code; the contract that they had signed with NDI/NRI was included. Within three hours, the SEC sent a letter to the Ministry of External Cooperation approving of IPCE's activities, though acknowledging that it would have to examine the contract in more detail later. The Ministry of External Cooperation than approved the transfer of funds to IPCE.

U.S. Government Observers: The U.S. Government had not been able to get approval for an adequate delegation to observe the election. The Nicaraguan government indicated that it considered such a delegation partial to the opposition, and it had already invited an unprecedented number of international observers in their country, including our delegation and those of the UN and OAS. At the request of Senator Danforth and former President Carter, however, the Nicaraguan government leaders approved the addition of up to eight additional members of the U.S. Congress to our observer team. They will be given the same free access in performing their duties under the auspices of the Council of Freely-Elected Heads of Government as has been granted to other international observers.

CONCLUSIONS

After the delegation's visit in September, the Miskito Indian leaders were welcomed back into the country and seem to be fully involved in the political process. After our visit in December, new instructions were promulgated to end campaign violence, and everyone agreed there have been no incidents of violence or threats at any political rallies since then.

During this visit, the delegation was impressed by the determination of all the political parties to participate in the elections, but all were concerned about the problem of intimidation and harassment. The delegation made clear that it was in the interests of both the Sandinistas and the opposition that all designated opposition poll-watchers perform their duties on the day of the election. If this does not occur, this would call into question the integrity of the election. The government understands this point, and expressed interest in taking steps to ensure that it will not happen. Due to the active pre-election work and the plans for the O.A.S., we believe that if there is fraud in the election, we will be able to detect it.

In all, the election process is moving forward satisfactorily. Given the experiences in the past electoral process, it is fair to expect that new problems will emerge. But if the initiatives approved by the Nicaraguan government during this last visit are fully implemented in good faith, then we hope that any new issues will be similarly resolved. Therefore, we conclude that the opportunity for the Nicaraguan people to vote for their next government on February 25 looks good.

ITINERARY

Friday, January 26, 1990

11:15 a.m. arrive Managua.

Meeting with Foreign Minister Miguel D'Escoto.

Lunch with Alejandro Martinez Cuenca, Minister of Planning.

Meeting with Dr. Virgilio Godoy, Vice-Presidential Candidate of UNO and UNO's Political Committee, including Dr. Hernaldo Zuniga, Legal Representative, Dr. Edgard Quintana, Electoral Control, and other UNO leaders.

Meeting with OAS/UN observer missions.

Meeting with OAS regional coordinators.

Meeting with Cardinal Obando y Bravo.

Dinner with Henry Ruiz, Minister of External Cooperation, William Hupper, Minister of Finance, Giovanni Delgado, Vice Minister of External Cooperation, and Roberto Gutierrez, Vice-President of Central Bank.

Saturday, January 27, 1990

Breakfast with Vice-President Sergio Ramirez.

Meeting with Supreme Electoral Council.
Lunch with Moises Hassan (MUR) Presidential Candidate.
Travel to Mateare to observe voting demonstration.
Meeting with OAS/UN Coordinators at Carter Center office on independent vote counts.
Meeting with Bayardo Arce, FSLN Campaign Manager.
Meeting with Doña Violeta de Champorro, Presidential Candidate of UNO.
Dinner with Arturo Lacayo, Campaign Manager of UNO and Christiana Chamorro, Editor of La Prensa.

Sunday, January 28, 1990

Meeting with Daniel Ortega and Vice-President Sergio Ramirez in Rivas.
Attend FSLN rally at Rivas.
Attend UNO rally at Jinotepe.
Lunch with international observers and local UNO leaders in Jinotepe.
Meeting with Guillermo Potoy, Treasurer of IPCE, & Guillermo Selva, UNO representative on Supreme Electoral Council.
Meeting with Humberto Ortega, Minister of Defense, and Joaquin Cuadra Lacayo, Chief of Staff of the Armed Forces.
Press conference.
Private press interviews.
Meeting with recently returned Contra leaders.
5:45 p.m. Departure of President Carter, Rosalynn Carter and Dr. Robert Pastor.

Monday, January 29, 1990

Briefing for Congressional Members at U.S. Embassy.
Meeting with Gilberto Cuadro, President of COSEP (business) Alvin Guthrie, Secretary-General of CUS (labor).
Meeting with Luis Sanchez, Public Relations Coordinator of UNO.

UNIVERSAL VOTER REGISTRATION ACT

The SPEAKER pro tempore (Mr. BENNETT). Under a previous order of the House, the gentleman from Kansas [Mr. ROBERTS] is recognized for 60 minutes.

Mr. ROBERTS. Mr. Speaker, I rise today and take this special order to discuss something called H.R. 2190, the Universal Voter Registration Act, which the House will consider as of tomorrow. It is commonly called the motor voter bill.

Mr. Speaker, I am on the Subcommittee on Elections of the full committee on House Administration that has jurisdiction over this legislation, and I must say that some of my colleagues may recall last Wednesday during the debate on the rule that on this vote there was considerble blood-pressure concern on the part of the chairman of the subcommittee, the gentleman from Washington [Mr. SWIFT], my good friend and colleague, and in addition, I think, some concern on the part of the ranking Republican on the subcommittee, the gentleman from California [Mr. THOMAS]. Let the record show that both of these gentlemen have labored long and hard in extensive hearings in a bipartisan fashion to produce what they think is a good bill, a bill to ostensibly increase voter registration and voter turnout in the election process.

In addition, Mr. Speaker, there was some concern raised on the part of both gentlemen, more specifically with the chairman of the subcommittee, about the lack of bipartisan support at the last minute. I am not going to go into this. I am not going to speak anymore about it other than to say to my colleagues, that I am on the subcommittee, and I am on the full committee, and I took part in these hearings, and there were those of us on the subcommittee and full committee that never agreed with this approach, that never thought this bill as the appropriate step, always agreed with the intent and the spirit of the legislation, certainly did not ever question the intent of the subcommittee chairman or the ranking Republican, but we did not ride with that posse. We never got on that stagecoach. I did not ride shotgun with this bill.

What was I going to do as a minority within a minority? I suppose at the subcommittee level we could have lobbed hand grenades, if my colleagues will, in the way of this legislation, really spoke to the issues as we see them; that is, that this is going to be a Federal intervention in our entire election process, unprecedented and be very counterproductive. We did not do that. We did not have the votes.

I suppose we could have been more obstreperous in the full committee, and there were many of us: the gentleman from Ohio [Mr. GILLMOR], the gentlewoman from Nevada [Mrs. VUCANOVICH], the gentleman from Alabama [Mr. FLIPPO], the gentleman from Alabama [Mr. DICKINSON], and the gentleman from Kansas [Mr. ROBERTS] stating that we had real problems with this bill. We did not force it to vote. We did not have the votes, but we always thought that when this bill went to the Committee on Rules and when this bill was discussed on the floor that we would have ample time to discuss it and to point out what lurks under the banner of reform and to point out, in fact, the law of unintended effects, and what is going to happen at the local county election office if this Federal mandate is passed.

So what were we to do?

□ 1250

So what were we to do? Well, perhaps we did not do enough.

Let me say to the chairman of the subcommittee, my good friend from the State of Washington [Mr. SWIFT] that he is the dean emeritus, if you will, of the Congress in terms of good government. When I had a discussion with the gentleman from Washington [Mr. SWIFT] as of this morning on national television on the merits of this bill, you would think that the very future of the Republic hangs on whether or not we pass this legislation.

I do not know how to overcome that hurdle when we think, at least, that the very premise of this bill is flawed. I do not know of anybody in this Congress who is opposed to more accurate voter registration and more participation in the voting process, but I do not think there is any evidence that such a drastic change as H.R. 2190 is needed.

This is based on the premise that too few Americans vote, and the reasons they do not vote hinge on barriers to registration. I just do not think the facts really support that argument.

In the last 40 years, voter registration in America during the Presidential election years has remained fairly constant, despite the massive reforms that have removed roadblocks to voting in many States, literacy tests, property ownership tests, poll taxes, residency requirements long ago were torn down, and rightly so. No Member is in favor of that kind of thing.

Estimates are that 65 percent of American voters were registered in 1948. In 1988, last year, or 2 years ago, that figure was 71 percent. It increased. The average for the period is 72 percent, and registration in congressional election years is lower, 65 percent 40 years ago, 67 percent as of 2 years ago; but again, it remained fairly constant even with all the barriers that were being withdrawn State by State.

Motor-voter then in fact turned the Nation's election process on its head, and that is what it will do. It will take ever county and State election officer like Humpty Dumpty and push them off that wall, really for about 28 percent of Americans who historically have not registered.

There is very little correlation, despite the arguments of the proponents of this bill, between registration and actual voting. While registration has remained fairly constant, the percent of voting in Presidential elections has dropped from 57 percent in 1948, 40 years ago, to 50 percent today.

In congressional elections, the drop is very dramatic, 42 percent voting in 1948 and 36 percent voting in 1986.

But lack of registration is not the cause of lower voter turnout. Disillusionment with the process is. In fact, poll after poll shows people give reasons other than inability to register for their failure to vote.

Do not misunderstand me. We are all for individual States and for the Federal Government to encourage States to encourage more voter registration. One of the most often mentioned in terms of why people do not vote is the lack of good candidates. I would hasten to add that if we would strengthen the two-party system, if we

could have more positive campaigns, with all due respect to this body, if Congress would clean up its act, I think people would probably vote more.

In terms of media coverage, I think that is a problem, in terms as I have said of the negative campaigns. I think that is a problem. But simply to go ahead and mandate more voter registration when you get your driver's license in order to increase the turnout, that simply is not going to work.

States that had eased their registration requirements do report no great increase. Wyoming, for instance, a neighboring State of mine out West, they have same-day registration on election day, yet only 62 percent of those eligible choose to vote in Wyoming.

If you want a good turnout, I will tell you how to get a good turnout. You get competition. You get good candidates. You get a school bond issue, and people will turn out.

Let us not forget that the average voter in America votes twice a year. We vote often in terms of school board elections, city elections, or whatever.

The baby boom generation, who has never voted in strength, always claims that there is apathy in the voting process, and that is the reason.

Let us move to cost. Boy, is this outfit outstanding in terms of mandating things on State and local governments, but then avoiding the cost. I can tell you that States and the Federal Government simply cannot afford the cost of this legislation. Almost every State that originally supported motor-voter has changed its position when it became clear the money would not be appropriated. If this is so important, why do we not fund it?

Oh, it is funded to the tune of $20 million, now $50 million. The Congressional Budget Office and the GAO have estimated it might be $80 million, not billion, but million. At $100 million, it is going to cost about 4 bucks per voter in L.A. County. In my State of Kansas, the Secretary of State says it is going to cost $1.2 million. Costs are hard to pin down. One thing is certain, the bill only appropriates $50 million, not nearly enough to start the changes envisioned by this bill. If this is so important, let us fund it. Let us not simply mandate that cost on top of the Secretaries of State and the hard-pressed State budgets.

There is a serious constitutional question involved here, my colleagues. Historically Congress and the Federal Courts have stepped into a State's right to set election law only when serious fraud was involved or when voters' rights were being trampled. This bill mandates the most minute registration procedures on our States. We are going to micromanage through the Federal Election Commission, if you will, and my goodness, in terms of appeals with the FEC, people are crawling out of train wrecks faster than that outfit settled the question.

This bill assumes that what is good for the inner city of New York is good for my 58 county district out on the prairie.

States must continue to have the flexibility to account for these differences.

I think the reasons to kill this legislation really pale, however, beside the opportunity for fraud and abuse that this bill will create. At a minimum, this bill would create chaos in elections. At worst, it invites voter fraud in the padding of registration roles by one party or another or any interest group. It mandates registration at a time a person gets his driver's license.

Now, that is the whole name of the bill, motor-voter. It is assumed that people are entitled to be registered when you get a driver's license.

I have mentioned that to several people. They say, "What do you mean? When you go in to get your driver's license, you are all ready registered to vote?"

Never mind the fact that if you are not a citizen, you can get a driver's license, or if you have a criminal record, you can get a driver's license. It mandates registration at a time a person gets a driver's license. No screening for factors that make a person ineligible to vote. These are prohibited.

I know in my State of Kansas you get a driver's license at age 16. How the State of Kansas is going to handle that situation on the difference between 16 and 18, we do not know. The Federal Government, the FEC, simply mandates it.

A driver's license is not always tied directly to the person's place of voting residence. In rural States, like in Kansas and in my district, the street addresses are not used. So when a voter becomes registered in one corner of the State, you can do that through your driver's license. It will be extremely difficult for the clerk in his home county to place him in the proper precinct for voting, and the list goes on.

States are mandated to use all Federal and State government facilities to register persons, including facilities that issue fishing and hunting licenses. That means in a great many States we are going to be registering folks to vote in bait shops and even bars.

Let me go over that again. Everybody that is for this bill, listen. Everybody that thinks that this is a simple act on the part of the Federal Government to mandate increased voter registration, it also mandates that State and Federal agencies are in the business of pursuing aggressive voter registration. Your friendly welfare office, your unemployment officer, where you get your hunting license, where you get your fishing license, where you get your marriage license, I am not sure but maybe the ASCS down in my country in terms of the outfit that really runs the farm program, or your soil convervation service. What happens when you go to buy a hunting license at your friendly 7-Eleven store and some youngster who is working part-time and the only person in that store is 16 years old and that person has the obligation to affirmatively register you to vote?

What happens in the bait and tackle shops at many of our lakes out in Kansas and, yes, we do have lakes, what happens in that case when the guy behind the bar, yes, behind the bar, say, "Joe, you don't have your fishing license." I am going to buy my fishing license at the particular time and be affirmatively registered to vote?

We are going to make a bartender, a 16-year old kid, the clerk at the welfare office, all up and down the line, actual county election officers?

The owners of these facilities, or the government employee involved and, hey, if you are a government employee, how can you do this in response to the Hatch Act? They have got the burden of getting the registration form to the proper official. That puts a great deal of control for the election process in the hands of many folks who are simply not trained for this job.

□ 1300

At a minimum this bill should be changed to allow the voter himself to send in the registration with some kind of assurance that that is actually taking place, either notarized or by two signatures or something.

We have gone to great lengths in this country to prevent both Government employees and those using our government services from intimidation by politics, yet this legislation would mandate registration at places where folks go to get the Government services, as I have said, the welfare office, the unemployment service.

Does not the Hatch Act really prevent our Federal employees from this kind of behavior? Just forget the opportunity of fraud for a moment. Think of the opportunity for duplication and error. We are a mobile society. A person's name may appear in different ways on different government forms.

In committee hearings on this bill, the Justice Department warned that public employees or officials sometimes use their power to dispense or withhold benefits in order to pressure citizens into voting a particular way or registering for a political party. Once a person is registered under this bill, there is no way under this act to remove him or her from the rolls for

not voting. That is the key provision of this bill. The list-purge requirements under this bill simply do not work up to a standard that we should set.

A schedule amendment would allow a purge every 4 years when a State cannot verify a person's address. We will end up, as some States already have, with jurisdictions that have more persons registered than people in those jurisdictions. This kind of swelling of the registration rolls opens the door for fraud, and it will increase the cost of campaigns because politicians will be forced to try and reach all registered whether they intend to vote or not.

The bill requires that if there is a question whether a person if eligible to vote he must be, must be allowed to vote, and his eligibility settled later. Stop and think now a minute about what we are talking about here. Historically at the local election, what entity, the school or whatever place where one votes, we have had people from the Democrat Party, people from the Republican Party serving as poll watchers, and we go in and say, "I am registered to vote," and the local election officer says, "Yes, by golly, Joe Jones, you are," and the Republican Party and the Democrat Party volunteer says, "Yes, by golly, that is the case." No more. No more. That kind of control is gone. I cannot challenge the individual. "Well, I have got a driver's license. It is right here. I can vote. I have got a fishing license over by Lake Perry: I can vote. I went to the welfare office and they gave me this, and I do not know how many times I have registered to vote, maybe under a different name, but I do not have the receipt right now. I can vote." One cannot challenge them. Oh, they can be challenged after the election. How long is it going to take to certify that election if, in fact, we have fraud or in terms of duplication?

At a minimum it strips our time-honored system of two-party poll watchers from being effective and cutting down fraud and error at the polling place. This bill contains no notarization process to double-check a person's eligibility, no way to cross-check a Social Security number, for instance, or an address, for example.

Finally, this fight over this legislation is also about opening up the process and involving more Americans in the election process, something we all support very vigorously, but it also involves a fight around some in both parties, both my friends on this side of the aisle and my colleagues on this side of the aisle who think they can inflate their numbers, and each side really believes the bill is going to help them.

I do not think I am really telling any tales out of school. When in meetings on this bill, by Republicans, we will say to Republicans, "Do you think this is going to benefit us over our Democrat colleagues? Do you think maybe we can get some of those fundamentalists who voted for Pat Robertson to come to the polls and really encourage them to vote Republican?" And on the other side, I know the language has been, "Do you think those in the Rainbow Coalition who follow the Reverend Jackson can get more active here and it will benefit us?" I do not think they can both be correct even if they do succeed in inflating the registration numbers. But will that translate into votes? It has been shown that that is not the case.

I think the proponents of this bill are fond of comparing the United States to other countries that have higher voter turnouts. That is what the chairman of the subcommittee, the gentleman from Washington [Mr. SWIFT], said to me this morning when we were on CBS, just for this small amount, maybe $100 million, $200 million or whatever, we can encourage people to register to vote and increase the democratic process, small "d," not a capital "D" in that respect. After all, the United States is one of the few countries with free elections around the world that has a 50-percent turnout. What is not said is that we vote more often, and as I say again there are other reasons why people do not vote. One-hundred percent turnout at the point of a gun or under other duress simply cannot compare with the long American tradition of motivated and informed voters choosing their elected officials and deciding the pressing issues of the day. I think that is the key. That is the key, my colleagues.

Voting is a cherished right. Yes, it is a right, but it is also a privilege, and it carries with it the responsibility of getting informed and getting registered and getting to the polling place. I do think that an uninformed, unmotivated voter may be worse than no voter at all.

We are going to have some en bloc amendments in the second hour of debate, and we are going to try to make this a little better. No. 1, let us make it voluntary. Twelve States already have motor voter, no, not the kind of motor voter that the people who propose this bill would envision, because that is going to have to be changed if that is the case, so let us make it voluntary. If this is such a good idea, let other States take a look at it. In Kansas, we are moving to a centralized computer system. We are moving to registration by mail. We do not have the money for it right now, but we are moving in that direction. I do not know of any barriers in my 58 counties that exist in regards to registration at the polling place.

My goodness, we have an outreach program in Kansas one would not believe. Virtually every entity that I know of, Republican, Democrat, Spanish American, VFW, American Legion, Farm Bureau, League of Women Voters, you name it, we have the polling places, advertisements in the paper, free phone calls, take the people to the polls, all of that encouraging people to register.

Do not impose a $1.2 million cost on the State of Kansas when we cannot handle it, adding more employees, more forms. We have never seen duplication. All of that pouring in in the last 10 days of the election.

Rita Slattery is my county clerk in Ford County, KS, America. What makes the gentleman from Washington [Mr. SWIFT] and the gentleman from California [Mr. THOMAS] think they know better than Rita Slattery on how to register people to vote in Ford County, KS, America? I do not understand it. We do not have a problem.

Let us make the bill voluntary for States if the Federal Government does not fully fund costs involved.

If this is so important, with the en bloc amendments, let us fully fund it. Let us keep the purge provision of every 2 years instead of 4 years.

I will not go through all the en bloc amendments. For goodness sakes, let us let States have the flexibility to determine what State agencies and Federal agencies can actually pursue voting registration as opposed to the bartender and the 16-year-old at the 7-Eleven store. That is just simply not right.

Mr. Speaker, in closing, I wish to read a paragraph from my secretary of the state of Kansas, the Honorable Bill Graves, who says,

> H.R. 2190 would force my office to add 22 staff persons and greatly expand our computer system. Frankly, I have no faith the Federal Government will finance these programs. I know the State of Kansas cannot currently afford them. I do want improved access to registration, but through a sensible, efficient, cost-effective program. In Kansas, we are moving toward centralized registration, and we are currently proposing a form of agency-based registration. Please allow us to do our job in a manner best suited to Kansas and not at the blanket discretion of the Congress.

Mr. Speaker, I feel very strongly about this, and in no way do I wish to represent any kind of argument or consideration or feeling opposed to increased voter registration and a higher voter turnout. But honest to goodness, I do not get letters from back home saying, "Pat, pass this bill or that bill or this mandate," under whatever banner that we have out there. I get an awful lot of letters saying, "Pat, what on Earth are you doing back there saddling us with all of these regulations and forms and rules and laws that are counterproductive, that actu-

ally do not do what they say they are going to do?"

In that respect, I think that this body suffers from a lack of accountability and oversight responsibility. Maybe we need a little truth in legislation as well as truth in packaging and truth in lending. Maybe we ought to put at the bottom of this bill, "Warning: To all secretaries of state and every county election officer throughout this land, this bill has been shown to be of future economic harm to the welfare of the national election process."

□ 1310

All questions regarding costs, regulations and problems should be sent to the subcommittee sponsors. Maybe we should do that.

I know it is important to add legislation to the books that will increase the democratic process and voter turnout. I am for it. Let us make it voluntary. Let us pay the costs up front. Let the Federal Government encourage cost share, if you will, if in fact this is such a good idea.

Motor voter, we better check under the hood, folks. This is a broken Amtrak Streamliner parked at the local county election parking lot at about 90 miles an hour.

I yield back the balance of my time.

OPERATION JUST CAUSE: A PRELIMINARY ASSESSMENT

The SPEAKER pro tempore (Mr. BENNETT). Under a previous order of the House, the gentleman from Missiouri [Mr. SKELTON] is recognized for 30 minutes.

Mr. SKELTON. Mr. Speaker, I speak today about the outstanding efforts of our Armed Forces. In the early morning hours this past December 20, American military forces initiated Operation Just Cause, which brought to an end the thuggish regime of Manuel Antonio Noriega. The four objectives outlined by President Bush in his announcement to the Nation upon ordering United States troops to action in Panama included: (1) Safeguarding the lives of American citizens in Panama, (2) helping restore democracy to Panama, (3) protecting the integrity of the Panama Canal Treaties, and (4) bringing Manuel Noriega to justice.

The invasion was the largest United States military action since the Vietnam war. It included approximately 12,500 United States troops stationed in Panama reinforced by 12,000 troops from the United States. It marked the first test of the structural reforms that have been in effect since the Goldwater-Nichols Department of Defense Reorganization Act became law in late 1986. Among other things the Goldwater-Nichols Act strengthened the role of the Chairman of the Joint Chiefs of Staff and role of the unified commanders in the hierarchy of the U.S. Defense establishment.

CRITICAL EVENTS IN 1989

Four critical events in 1989 contributed to the decision of the President to take the action he did. The first event stemmed from the Panamanian, Presidential election of May 7. The annulment of those elections by the Noriega-controlled electoral tribunal when the opposition seemed about to win an overwhelming victory revealed the unpopularity of the Noriega regime. That action also allowed the President to help forge a strong bipartisan policy against Noriega here at home.

The second event took place at the Organization of American States [OAS]. At the OAS, U.S. policy shifted from an exclusively unilateral one to one that emphasized both unilateral pressure and support for regional diplomacy in a multilateral forum. While the OAS condemned "the grave events and the abuses by General Noriega in the crisis and electoral process in Panama" it proved unable to take any further action against the illegal regime. Over a period of 3 months the OAS tried and failed to facilitate a transfer of power in Panama. At least the case can be made that the United States had sought to resolve the difficulties in Panama in association with our Latin American friends.

The third critical event of the year was the attempted military coup against General Noriega of October 3, led by Maj. Moises Giroldi of the Panamanian Defense Forces [PDF]. Units loyal to Noriega put down the coup killing 10 of the rebels including Major Giroldi. But unlike other previous occasions in Panama's history where the losers were arrested and sent off to a comfortable diplomatic exile, reports reached human rights workers in Panama that Noriega had executed 77 and arrested another 200.

The U.S. reaction to the events of October 3 was flatfooted and there was much criticism of the administration in Congress, from Democrats and Republicans alike, for not having aided the leaders of the coup. For months American officials, including the President, had called for the overthrow of Noriega. When the opportunity finally presented itself, we fumbled it. Our contingency plans proved inadequate to take advantage of a confused situation in Panama. Even worse, confusion in Washington contributed to a situation where the President made the decision not to intervene only after the coup had failed. Obviously the crisis management machinery in Washington needed some repair.
